The following pairs were announced:

Until further notice:

Mr. MESICK with Mr. PETERS.

Mr. LYBRAND with Mr. LENTZ.

Mr. DAVIDSON of Wisconsin with Mr. NORTON.

Mr. HOOKER with Mr. CATCHINGS.

Mr. BINGHAM with Mr. DECKERY.

Mr. HOPKINS with Mr. MCALEER.

Mr. BELKNAP with Mr. MAGUIRE.

Mr. MILLER with Mr. CLARDY.

Mr. HAGER with Mr. ALLEN.

Mr. YOUNG of Pennsylvania with Mr. BENTON.

Mr. LORIMER with Mr. SMITH of Kentucky.

Mr. WHITE of Illinois with Mr. SIMS.

Mr. BISHOP with Mr. BREWER.

Mr. WILLIAMS of Pennsylvania with Mr. ROBERTSON of Louisiana.

Mr. MORRIS with Mr. WHEELER of Kentucky.

Mr. HENDERSON with Mr. BRANTLEY.

Mr. SPALDING with Mr. CRAWFORD.

Mr. DORR with Mr. MADDOX.

Mr. VAN VOORHIS with Mr. HOWARD of Georgia.

Mr. JOY with Mr. MARSHALL.

Mr. HAMILTON with Mr. TODD.

Mr. WM. ALDEN SMITH with Mr. BRUCKER.

Mr. SHELDON with Mr. YOUNG of Virginia.

Mr. CHICKERING with Mr. BRADLEY.

Mr. DAYTON with Mr. PIERCE of Tennessee.

Mr. FOSS with Mr. DAVEY.

Mr. KULP with Mr. STALLINGS.

Mr. ACHESON with Mr. WILSON of South Carolina.

Mr. CORLISS with Mr. LATIMER.

Mr. MCEWAN with Mr. VEHSLAGE.

Mr. BELDEN with Mr. SULZER.

Mr. BELFORD with Mr. SWANSON.

Mr. SIMPKINS of Massachusetts with Mr. LESTER.

Mr. PUGH with Mr. SUTHERLAND.

Mr. BEACH with Mr. BERRY.

Mr. MUDD with Mr. CLARK of Missouri.

Mr. BARHAM with Mr. LITTLE.

Mr. LOVERING with Mr. FITZGERALD.

Mr. BRUMM with Mr. COX.

Mr. BOUTELLE with Mr. TATE.

Mr. STEVENS of Minnesota with Mr. JONES of Washington.

Mr. SPERRY with Mr. GRIGGS.

Mr. HICKS with Mr. OTEY.

Mr. STEWART of New Jersey with Mr. TAYLOR of Alabama.

Mr. POWERS with Mr. GAINES.

Mr. REEVES with Mr. BALL.

Mr. OVERSTREET with Mr. ZENOR.

Mr. MILLS with Mr. SULLIVAN.

Mr. SULLOWAY with Mr. TALBERT.

Mr. COLSON with Mr. OSBORNE.

Mr. MAHON with Mr. BENNER of Pennsylvania.

Mr. MCCALL with Mr. JONES of Virginia.

Mr. SAUERHERING with Mr. STRAIT.

For this day:

Mr. PERKINS with Mr. ROBB.

Mr. HEPBURN with Mr. DE GRAFFENREID.

Mr. WARD with Mr. LEWIS of Washington.

On this vote:

Mr. EDDY with Mr. BAIRD.

Mr. ODELL with Mr. MCCLELLAN.

Mr. ADAMSON. Mr. Speaker, although I did not hear it read by the Clerk, I am paired with the gentleman from Massachusetts, Mr. WRIGHT, and as a motion to adjourn seems to have been made a political question, I desire to withdraw my vote. I voted "nay."

Mr. TATE. Mr. Speaker, I ask leave of absence for my colleague, Mr. BRANTLEY, who is away on account of sickness in his family.

Mr. RICHARDSON. My colleague, Mr. GAINES, is detained from the House on account of sickness, and I ask indefinite leave of absence for him.

Mr. BRUCKER. Mr. Speaker, I am paired with the gentleman from Michigan, Mr. WM. ALDEN SMITH. I desire to withdraw my vote and to be marked "present."

Mr. ADAMSON. Mr. Speaker, during the session of last Thursday, through inadvertence, caused by an impression that the gentleman from Massachusetts, Mr. WRIGHT, with whom I am paired, was present, I voted on a motion to allow the gentleman from Kansas to proceed in order. Voting first, I could not certainly foresee that the issue would be regarded as a matter for party alignment; perhaps rendered careless because correction could be made before announcement of the result. Being called away from the House before the completion of the roll call, I did not notice until I read the RECORD the next morning that the gentleman from Massachusetts had not been present during the vote. As it appears that the majority party solidly opposed the proposition, and it being too late now to withdraw my vote, I

desire to express my regret and render what justice I can to the gentleman from Massachusetts by stating the facts. By agreement, we were paired until further notice on all party questions, and he had a right to expect that I would not vote and that an announcement of our pair should appear in the RECORD.

LEAVE OF ABSENCE.

By unanimous consent, leave of absence was granted as follows:

To Mr. CLARK of Missouri, indefinitely, on account of important business.

To Mr. VEHSLAGE, for one week, on account of important business.

To Mr. BROSIUS, for the balance of the day, on account of illness.

To Mr. GAINES, indefinitely, on account of sickness.

The result of the vote was then announced as above recorded.

And accordingly (at 3 o'clock and 40 minutes p. m.), the House adjourned until Thursday next.

EXECUTIVE COMMUNICATIONS.

Under clause 2 of Rule XXIV, the following executive communications were taken from the Speaker's table and referred as follows:

A letter from the Secretary of War, transmitting, with a letter from the Chief of Engineers, an estimate of the cost of improving the Merrimac River, Massachusetts, between Newburyport and Haverhill—to the Committee on Rivers and Harbors, and ordered to be printed.

A letter from the Secretary of War, transmitting, with a letter from the Chief of Engineers, report of survey of Point Judith Harbor, Rhode Island—to the Committee on Rivers and Harbors, and ordered to be printed.

A letter from the Acting Secretary of the Treasury, calling attention to certain changes in the wording of the bill codifying the inland rules of the United States to prevent collisions of vessels—to the Committee on the Merchant Marine and Fisheries, and ordered to be printed.

A letter from the Secretary of the Treasury, calling attention to certain changes desirable in the bill codifying the inland rules of the United States to prevent collisions of vessels—to the Committee on the Merchant Marine and Fisheries, and ordered to be printed.

A letter from the President of the United States, recommending an appropriation for the relief of destitute American citizens in Cuba—to the Committee on Foreign Affairs, and ordered to be printed.

PUBLIC BILLS, RESOLUTIONS, AND MEMORIALS INTRODUCED.

Under clause 3 of Rule XXII, bills, resolutions, and memorials of the following titles were introduced and severally referred as follows:

By Mr. SUTHERLAND: A bill (H. R. 3233) to provide for the purchase of a site for a public building in the city of Hastings, in the State of Nebraska, and for other purposes—to the Committee on Public Buildings and Grounds.

By Mr. QUIGG: A bill (H. R. 3234) to amend section 4504 of the Revised Statutes relative to the duties of shipping commissioners—to the Committee on the Merchant Marine and Fisheries.

Also, a bill (H. R. 3235) to carry out section 61 of the act of Congress of August 28, 1894, entitled "An act to reduce taxation, to provide revenue for the Government, and for other purposes"—to the Committee on Ways and Means.

Also, a bill (H. R. 3236) creating an art commission of the United States, and for other purposes—to the Committee on the Library.

By Mr. LAMB: A bill (H. R. 3237) for the erection of a public building in the city of Manchester, State of Virginia—to the Committee on Public Buildings and Grounds.

By Mr. LOUD: A bill (H. R. 3238) to define the appellate jurisdiction of the Supreme Court of the United States and the United States circuit court of appeals for the ninth circuit over the judgments and decrees of the United States circuit court for the District of Alaska—to the Committee on the Judiciary.

By Mr. QUIGG: A joint resolution (H. Res. 55) to provide for the presentation of medals of honor to certain troops who volunteered their services in 1863 before the battle of Gettysburg, Pa.—to the Committee on Military Affairs.

Also, a joint resolution (H. Res. 56) directing the Secretary of the Navy to appoint a commission of naval experts to examine and report upon the Secor direct system of propelling vessels and its applicability to naval purposes—to the Committee on Naval Affairs.

By Mr. COCHRAN of Missouri: A joint resolution (H. Res. 57) proposing an amendment to the Constitution, authorizing the levy of a tax on incomes—to the Committee on the Judiciary.

By Mr. STEPHENS of Texas: A joint resolution (H. Res. 58) acknowledging the independence of Cuba—to the Committee on Foreign Affairs.

By Mr. KING: A memorial of the legislature of the State of Utah, asking that certain residents of Utah be reimbursed for services rendered, money expended, and property lost in Indian disturbances in the Territory of Utah during the years from 1865 to 1870, inclusive—to the Committee on War Claims.

Also, a memorial of the legislature of Utah, praying that the Industrial Home property at Salt Lake City, Utah, be granted to the State of Utah, to be used for educational or charitable purposes—to the Committee on the Judiciary.

Also, a memorial of the legislature of the State of Utah, asking that Congress submit to the legislatures of the several States a proposition to amend section 3, Article I, of the Constitution, so as to provide for the election of United States Senators by direct vote of the people—to the Committee on Election of President, Vice-President, and Representatives in Congress.

Also, a memorial of the legislature of the State of Utah, asking an appropriation for the enlargement and improvement of Fort Douglas military post—to the Committee on Military Affairs.

Also, a memorial of the legislature of the State of Utah, praying for the restraint of the Southern Ute Indians—to the Committee on Indian Affairs.

Also, a memorial of the legislature of the State of Utah, for the relief of claimants who suffered from Indian depredations in the Territory of Utah before they became citizens of the United States—to the Committee on Claims.

Also, a memorial of the legislature of the State of Utah, relative to granting to the State of Utah the reservoir sites reserved by the Government of the United States—to the Committee on Irrigation of Arid Lands.

Also, a memorial of the legislature of the State of Utah, representing the conditions existing in Cuba, and praying Congress to protect the American citizens—to the Committee on Foreign Affairs.

Also, a memorial of the legislature of the State of Utah, asking that the Uintah and Uncompahgre Indian reservations be opened to settlement and that the State of Utah be given a preference right of selection—to the Committee on the Public Lands.

Also, a memorial of the legislature of the State of Utah, asking Congress to withdraw from sale and set apart as a State park Fish Lake and certain described lands appurtenant thereto—to the Committee on the Public Lands.

Also, a memorial of the legislature of the State of Utah, praying that Congress cede to the State of Utah all of the public lands except mineral lands in the State—to the Committee on the Public Lands.

PRIVATE BILLS AND RESOLUTIONS INTRODUCED.

Under clause 1 of Rule XXII, private bills and resolutions of the following titles were introduced and severally referred, as follows:

By Mr. BARLOW: A bill (H. R. 3239) for the relief of Catharine McCarty—to the Committee on Invalid Pensions.

By Mr. BOOZE: A bill (H. R. 3240) granting an honorable discharge to Charles H. Rarick—to the Committee on Military Affairs.

By Mr. BOTKIN: A bill (H. R. 3241) granting a pension to Angelina Welden, of Media, Kans., as army nurse—to the Committee on Invalid Pensions.

By Mr. BREWER: A bill (H. R. 3242) for the relief of John W. Martin—to the Committee on War Claims.

By Mr. BRUCKER: A bill (H. R. 3243) for the relief of Cordell B. Green, Company D, Sixteenth Michigan Infantry—to the Committee on Military Affairs.

By Mr. CLARKE of New Hampshire: A bill (H. R. 3244) granting a pension to Samuel I. Bailey—to the Committee on Invalid Pensions.

Also, a bill (H. R. 3245) granting a pension to Pheroba A. Hale—to the Committee on Invalid Pensions.

Also, a bill (H. R. 3246) for the relief of Capt. Francis A. Benter—to the Committee on War Claims.

Also, a bill (H. R. 3247) granting a pension to Eliza H. Getchell—to the Committee on Invalid Pensions.

By Mr. COCHRAN of Missouri: A bill (H. R. 3248) granting an honorable discharge from the United States Army to James Harrington, late of Company E, Thirty-fifth Missouri Volunteers—to the Committee on Military Affairs.

Also, a bill (H. R. 3249) granting a pension to Mrs. Laura J. Scofield—to the Committee on Invalid Pensions.

Also, a bill (H. R. 3250) granting an honorable discharge from the United States Army to William Miers, late of Company F, Ninth Minnesota Volunteers—to the Committee on Military Affairs.

Also, a bill (H. R. 3251) for the relief of Napoleon B. Giddings—to the Committee on Military Affairs.

Also, a bill (H. R. 3252) for the relief of Fred E. Ernst, executor of the will of Charles F. Ernst, late postmaster at St. Joseph, Mo.—to the Committee on Claims.

By Mr. KERR: A bill (H. R. 3253) to reimburse G. L. Cary—to the Committee on War Claims.

Also, a bill (H. R. 3254) granting a pension to Jefferson Harris—to the Committee on Invalid Pensions.

Also, a bill (H. R. 3255) granting a pension to Clarence E. Doane—to the Committee on Invalid Pensions.

Also, a bill (H. R. 3256) granting a pension to James Hayden—to the Committee on Invalid Pensions.

Also, a bill (H. R. 3257) granting a pension to Robert P. Holliday—to the Committee on Invalid Pensions.

Also, a bill (H. R. 3258) granting a pension to Alexander Scott—to the Committee on Invalid Pensions.

By Mr. KETCHAM: A bill (H. R. 3259) for the revival of letters patent for an invention entitled the "P. B. Lawson centrifugal machine," which letters patent are numbered 204834, and bear date the 11th day of June, 1878—to the Committee on Patents.

By Mr. LOUD: A bill (H. R. 3260) referring the claim of Robert W. Dunbar to the Court of Claims—to the Committee on War Claims.

By Mr. McCLEARY: A bill (H. R. 3261) to remove the charge of desertion from the military record of George L. Plummer—to the Committee on Military Affairs.

By Mr. OSBORNE: A bill (H. R. 3262) granting an increase of pension to George L. Durbin—to the Committee on Invalid Pensions.

By Mr. QUIGG: A bill (H. R. 3263) to provide for the extension of letters patent for an "improvement in insulating submarine cables"—to the Committee on Patents.

Also, a bill (H. R. 3264) for the relief of Clara A. Graves and others, heirs of Lewis Smith, deceased—to the Committee on Claims.

Also, a bill (H. R. 3265) granting a pension to Catherine R. Jardine, widow of Brig. Gen. Edward Jardine—to the Committee on Invalid Pensions.

Also, a bill (H. R. 3266) for the relief of Dr. Edward R. Duffy, late United States surgeon—to the Committee on Invalid Pensions.

Also, a bill (H. R. 3267) for the relief of William Plimley, late general superintendent of the money-order division of the post-office at New York— to the Committee on Claims.

Also, a bill (H. R. 3268) to restore the name of Jacob Coffer to the pension roll—to the Committee on Pensions.

Also, a bill (H. R. 3269) for the relief of James Eagan, late of Company G, Tenth New York Volunteer Infantry—to the Committee on Military Affairs.

Also, a bill (H. R. 3270) to pension Michael McAndrew—to the Committee on Invalid Pensions.

Also, a bill (H. R. 3271) to increase the pension of Mrs. Rebecca S. Foster—to the Committee on Invalid Pensions.

Also, a bill (H. R. 3272) granting an increase of pension to Laura Sprigg Foster—to the Committee on Invalid Pensions.

Also, a bill (H. R. 3273) for the relief of Secor & Co., Perine, Secor & Co., and executors of Zenor Secor—to the Committee on War Claims.

Also, a bill (H. R. 3274) for the relief of Charles V. Munier, late of Company D, Fourth Excelsior Brigade, subsequently known as Seventy-third Regiment New York Volunteers—to the Committee on Military Affairs.

Also, a bill (H. R. 3275) for the relief of Samuel Davis, naval apprentice—to the Committee on Naval Affairs.

Also, a bill (H. R. 3276) for the relief of Francis Irsch—to the Committee on Military Affairs.

Also, a bill (R. R. 3277) for the relief of Mary Ferguson—to the Committee on Invalid Pensions.

Also, a bill (H. R. 3278) to increase the pension of Mrs. George H. Cooper, widow of the late Rear-Admiral George H. Cooper—to the Committee on Invalid Pensions.

Also, a bill (H. R. 3279) granting an honorable discharge to Thomas J. Miller, late of Company A, Thirty-eighth New York Volunteers—to the Committee on Military Affairs.

Also, a bill (H. R. 3280) for the relief of Nancy E. Day, administratrix of the estate of James L. Day, deceased—to the Committee on Claims.

By Mr. WEYMOUTH: A bill (H. R. 3281) granting a pension of $50 per month to Henry S. Hitchcock—to the Committee on Invalid Pensions.

By Mr. JETT: A bill (H. R. 3282) for the relief of Andrew H. Jordan, alias Andrew Hannon—to the Committee on Military Affairs.

Also, a bill (H. R. 3283) for the relief of William B. Craig—to the Committee on Military Affairs.

By Mr. KING: A bill (H. R. 3284) for the relief of Verona E. Pollock—to the Committee on Claims.

By Mr. McMILLIN: A bill (H. R. 3285) for the relief of Willis Cornwell, of Tennessee—to the Committee on War Claims.

Also, a bill (H. R. 3286) for the relief of J. C. Buntin, of Tennessee—to the Committee on War Claims.

Also, a bill (H. R. 3287) for the relief of Sampson D. Bridgman, a soldier of the Florida war—to the Committee on Pensions.

By Mr. RICHARDSON: A joint resolution (H. Res. 59) authorizing John C. Sanders, administrator of B. Sillard, deceased, to present his claim to the Court of Claims—to the Committee on War Claims.

PETITIONS, ETC.

Under clause 1 of Rule XXII, the following petitions and papers were laid on the Clerk's desk and referred as follows:

By Mr. ADAMS: Resolutions of the Philadelphia Drug Exchange, favoring the Torrey bankruptcy bill instead of the Nelson bill—to the Committee on the Judiciary.

By Mr. BINGHAM: Resolutions of the Original M. S. Quay Club; also of the Second Ward Republican executive committee; also of the Twenty-fourth Ward Republican executive committee; also of the Twenty-sixth Ward Republican Club; also of the Young Men's Republican Club of the Thirty-first Ward; also of the Penrose Republican Club of the First Ward; also of the Union Republican Club of the Second Ward; also of the Vare Republican Club, all in the city of Philadelphia, Pa., condemning the present civil-service law—to the Committee on Reform in the Civil Service.

By Mr. BRUMM: Petitions of James Morgan, C. Davenport, and other citizens of Shenandoah, Pa., urging the passage of a law restricting immigration—to the Committee on Immigration and Naturalization.

By Mr. BUTLER: Petitions of citizens of West Bradford, Downington, and East Goshen Township, Pa., for the passage of a more rigid immigration law—to the Committee on Immigration and Naturalization.

By Mr. DALZELL: Petition of sundry citizens of Pitcairn, Pa., in favor of the passage of an immigration restriction law—to the Committee on Immigration and Naturalization.

By Mr. GILLETT of Massachusetts: Petition of the Woman's Christian Temperance Union of Boston and vicinity, for the passage of a bill to prohibit kinetoscope reproductions of prize fights—to the Committee on Interstate and Foreign Commerce.

By Mr. KNOX: Petition of C. E. Richardson and 21 other citizens of Woburn, Mass., favoring a more rigid restriction of immigration—to the Committee on Immigration and Naturalization.

By Mr. LOUD: Resolutions adopted by the Board of Trade of San Jose, Cal., favoring the repeal of the reciprocity treaty with the Hawaiian Islands—to the Committee on Foreign Affairs.

By Mr. MILLER: Petition of J. M. Heasley and other citizens of Mason County, W. Va., asking for the passage of a more rigid immigration law—to the Committee on Immigration and Naturalization.

By Mr. OTJEN: Petition of C. A. Chapin and 198 other citizens of Milwaukee, Wis., praying that a bill be passed authorizing the President to appoint a commission on currency and banking—to the Committee on Banking and Currency.

By Mr. PAYNE: Petition of Lake Keuka Baptist Church, of Crosby, N. Y., urging the passage of a bill to prohibit lottery and gambling messages by telegraph or telephone; also petition of same to prohibit the transmission of descriptions of prize fights by mail or interstate commerce—to the Committee on Interstate and Foreign Commerce.

Also, petition of Lake Keuka Baptist Church, favoring the passage of a bill to enact a Sabbath law for the District of Columbia—to the Committee on the District of Columbia.

Also, petition of Lake Keuka Baptist Church, for the passage of a bill forbidding the sale of intoxicating beverages in Government buildings—to the Committee on Public Buildings and Grounds.

Also, petitions of Mrs. E. B. Ingalls, Mrs. Ina Mansfield, John Kline, and others, of Keuka College, regulating the sale of cigarettes—to the Committee on Interstate and Foreign Commerce.

By Mr. SHOWALTER: Petitions of citizens of Beaver Falls, Sharpsville, Fredonia, and Sarversville, in the State of Pennsylvania, asking for a more rigid immigration law—to the Committee on Immigration and Naturalization.

By Mr. STEELE: Petition of the United Trades Council of Gas City, Ind., asking that the Government be empowered to take charge of and operate public telegraph lines—to the Committee on Interstate and Foreign Commerce.

By Mr. STRODE of Nebraska: Petition of E. Y. Grupe and other working lithographers, praying for protection against foreign competition—to the Committee on Ways and Means.

By Mr. ZENOR: Paper to accompany House bill No. 2768 to correct the military record of George Peyton—to the Committee on Military Affairs.

Also, paper to accompany House bill No. 2954, for the relief of Henry Mills, jr.—to the Committee on Invalid Pensions.

SENATE.

TUESDAY, *May 18, 1897.*

Prayer by the Chaplain, Rev. W. H. MILBURN, D. D.

The Journal of yesterday's proceedings was read and approved.

PETITIONS AND MEMORIALS.

Mr. SEWELL presented petitions of D. Thomas and 22 other citizens of Bayonne, Howard Heisler and 27 other citizens of Marlboro, Samuel Heuling and 52 other citizens of Beverly, F. B. Middleton and 15 other citizens of Jamesburg, N. O. Brewer and 15 other citizens of Rahway, Capt. Thomas R. Mills and 41 other citizens of Newark, and of W. C. Tubbs and 81 other citizens of Elizabeth, all in the State of New Jersey, praying for the enactment of legislation restricting immigration; which were ordered to lie on the table.

Mr. PLATT of New York presented sundry petitions of citizens of Ilion, Brooklyn, and Prince Bay, all in the State of New York, praying for the enactment of legislation for the more rigid restriction of immigration; which were ordered to lie on the table.

He also presented sundry petitions of kid-glove sewers, cutters, and finishers of Gloversville, N. Y., praying for an increase of the duty on kid gloves; which were ordered to lie on the table.

Mr. DAVIS presented the petition of Ren Burns and 186 other citizens of Winona, Minn., praying for the adoption of the lumber schedule in the pending tariff bill as passed by the House of Representatives; which was ordered to lie on the table.

He also presented a petition of sundry citizens of Duluth, Minn., praying for the enactment of legislation restricting immigration; which was ordered to lie on the table.

Mr. LODGE presented a petition of 70 citizens of Springvale, Mass., and a petition of 25 citizens of Springvale, Mass., praying for the passage of the so-called Lodge immigration bill; which were ordered to lie on the table.

THE RICE INDUSTRY.

Mr. MCENERY presented a statement, signed by members of the Rice Association of Louisiana, Georgia, and South Carolina, relative to the rice industry; which was ordered to lie on the table, and to be printed in the RECORD, as follows:

A STATEMENT TO THE SENATE AND HOUSE OF REPRESENTATIVES RELATIVE TO THE RICE INDUSTRY.

Rice schedule proposed by the Senate and by the House.

Rice.	House bill.	Senate bill.
	Cents.	*Cents.*
Cleaned ..... per pound..	2	1¼
Uncleaned ..... do....	1½	$\frac{9}{10}$
Paddy ..... do....	¾	¾
Rice flour, rice meal, and broken rice which will pass through a wire sieve known commercially as No. 12, per pound	½	½

The undersigned representatives of the rice-producing interests of the United States respectfully represent that the rice industry has special and just claims for protective legislation, among which are the following:

First. While rice planting has been carried on for many years in the United States, improved agricultural machinery has not been employed to any extent in all lines of its production till in the past ten years. If given time and favorable conditions, this application of machinery will revolutionize and Americanize the industry.

Second. It is not a limited and sectional industry. It constitutes the principal cereal product of over 1,000 miles of the coast country of the United States. In this rice belt are millions of acres of land specially adapted to its cultivation; more than sufficient territory to supply, when fully developed, our entire country with rice, which will be rapidly improved under favorable conditions. The rice planters are almost exclusively devoted to the production of this cereal, and hence purchase from the Northwestern States their corn, oats, wheat, pork, butter, horses, and mules, making a large and steady market for these articles. Any legislation that brings ruin to the rice planters is equally a disaster to the Northwest.

Third. The first improvement of a rice farm calls for a large expenditure in levees, ditches, canals, fences, buildings, and irrigating machinery. Every well-equipped rice farm is a user of engines, boilers, pumps, and agricultural implements, which fact appeals strongly to the manufacturing interests of the country. This large first cost is a reason why unfavorable legislation more readily cripples the rice planters than other farmers.

Fourth. With steady and reasonably protective duties on rice all the markets of the United States will soon be supplied by the American product, and prices will be regulated by home competition.

Fifth. Our rice planters compete with the lowest paid labor in the world, and the ocean freights on rice from those foreign countries to New York is less than from some of the rice-producing sections of our own country.

Sixth. Under the McKinley duties the rice industry greatly prospered and rapidly increased. Under the Wilson rates there has been a large decrease in acreage planted and general depression.

Seventh. It is evident from the following statement that unintentiona error has been made in framing the rice duties proposed by the Senate Finance Committee. The rice producers do not object to the rates on broken rice and on paddy. Taking 75 cents per hundred as an equitable duty on paddy, or the rough rice of the planter, what duty ought to be placed on uncleaned rice and on clean rice? It required 168 pounds of paddy or 118 pounds of uncleaned rice to make 100 pounds of clean rice. The duties on these amounts under the Senate rate would be $1.26 on the paddy, 94.4 cents on the uncleaned, and $1.50 on clean. These would be the respective duties on equivalent amounts of rice reduced to cleaned.

The difference in weight between equivalent amounts of paddy and uncleaned rice is 50 pounds, as stated. The freight on this from Asia to New York would be 25 cents; the milling of 168 pounds of paddy to reduce it to 118 pounds of uncleaned would be 15 cents, and the breakage and loss in milling would amount to 10 cents, making a total of 50 cents as the just differential between paddy and uncleaned. That uncleaned rice at $1.25 per hundred duty is still rated somewhat lower than paddy is shown by the fact that when that differential existed very little paddy was imported.

If the duty on uncleaned be placed at $1.25 per hundred, the duty on cleaned should be $2, because it requires 118 pounds of uncleaned, as stated, to make 100 pounds of cleaned, showing a loss of 18 pounds on which first cost, duty, and freight had been paid. The cost of 18 pounds and freight average 30 cents, the duty at 1¼ cents per pound would be 22½ cents, the rice broken in milling and separated from the cleaned shipments we place at 10 cents, making a total of 62½ cents to be added to the uncleaned. The difference between this amount and 75 cents, with the offal, is the margin allowed the importer and miller, which amounts to 30 cents, and is sufficient.

It is thus shown that the differentials of 75 cents, 80 cents, and $1.50 per hundred on the different classes of rice, as in the Senate's schedules, are not equitable differentials, and that 75 cents, $1.25, and $2, as in the Dingley bill, are equitable.

We further represent that under average crop conditions and with the proposed Senate rate of eight-tenths of a cent on uncleaned rice the home producer would receive for his product from $1.27 to $2 per barrel (162 pounds of rough or paddy rice), depending upon the quality. The average would not be over $1.70 per barrel, or a little over 1 cent per pound, and such was the actual result under the Wilson tariff, except for the past season, when the crop was cut short in India and Louisiana by phenomenal drought. Even at the present high prices uncleaned Siam rice was quoted May 10 at $1.50 per hundred, New York delivery, and choice Japan rice at $2.25. Adding duty and the cost and duty on 18 pounds additional to make the amount of uncleaned obtained from a barrel of rice and we have $2.71 and $3.49 as their respective costs in New York, duty paid.

This foreign rice, owing to selection and hand culture, mills more high-price rice per barrel than American rice, and this difference is equal to one-half cent per pound, or 59 cents on 118 pounds. Deducting this amount to place it upon a parity with American rice, we have $2.12 and $2.90 as the price of 118 pounds of American uncleaned rice in New York. From these prices we must deduct partial milling, 15 cents, to produce uncleaned; average freights from the Louisiana plantation to New York, 40 cents, and commissions, 10 cents, making a total of 65 cents, which, deducted from the above, leaves $1.47 and $2.25 as the net price to be paid the producer in close competition with foreign rice, and this under extraordinarily short crops and consequent high prices. The average per barrel under ordinary conditions, as stated above, would not exceed $1.70, which is considerably below the cost of production, as fully shown in the report to the Ways and Means Committee of the House.

Respectfully submitted.

TABLETS AT ANTIETAM.

Mr. HALE presented a communication from the Secretary of the Treasury, transmitting a letter from the Secretary of War, submitting a revised estimate of deficiency in the appropriation for battle lines and sites for tablets at Antietam, to be substituted for the item on page 31 of the general deficiency appropriation bill; which, with the accompanying papers, was referred to the Committee on Appropriations, and ordered to be printed.

CONSTRUCTION OF DRY DOCKS.

Mr. HALE presented a communication from the Secretary of the Navy, transmitting certain views relative to the appropriations for the construction of a dry dock at the Portsmouth (N. H.) Navy-Yard, and also for the construction of a wooden dry dock at the United States navy-yard, Boston, Mass.; which was referred to the Committee on Naval Affairs, and ordered to be printed.

REPORT OF A COMMITTEE.

Mr. WARREN, from the Committee on Claims, to whom was referred the bill (S. 356) for the relief of Twyman O. Abbott, reported it with an amendment, and submitted a report thereon.

BILLS INTRODUCED.

Mr. DAVIS introduced a bill (S. 1999) for the relief of John Berrisford; which was read twice by its title, and referred to the Committee on Military Affairs.

Mr. HALE introduced a bill (S. 2000) removing the charge of desertion from the name of Reuben R. Hammond; which was read twice by its title, and, with the accompanying petition, referred to the Committee on Military Affairs.

Mr. HOAR introduced a bill (S. 2001) to remove the charge of desertion from the record of James J. Murphy; which was read twice by its title, and referred to the Committee on Naval Affairs.

Mr. BURROWS introduced a bill (S. 2002) granting an increase of pension to Byron R. Pierce; which was read twice by its title, and, with the accompanying papers, referred to the Committee on Pensions.

VISITOR TO WEST POINT.

Mr. WALTHALL. I ask to be excused from service as one of the Visitors appointed at the last session of Congress by the Vice-President to attend the annual examination of cadets at the

Military Academy at West Point. It is not probable that I shall be able to discharge that duty, and I desire to decline the appointment now, so that another Senator may be appointed.

The VICE-PRESIDENT. If there be no objection, the resignation of the Senator from Mississippi as a Visitor to West Point will be received and accepted by the Senate. The Chair hears no objection, and the resignation is accepted. The Chair will appoint the Senator from Florida [Mr. PASCO] as the successor of the Senator from Mississippi as a Visitor to West Point.

PROPOSED FINANCIAL LEGISLATION.

Mr. STEWART. I desire to give notice of an amendment to be proposed to the tariff bill when it is under consideration. I ask that the proposed amendment be read at the desk.

The Secretary read as follows:

That there shall be at all times a reserve fund in the Treasury amounting to the sum of $50,000,000. Whenever the available balance in the Treasury exceeds the sum of $50,000,000, it shall be the duty of the Secretary of the Treasury to invest the surplus above such sum in United States bonds, and whenever the available cash balance in the Treasury shall be less than the sum of $50,000,000, it shall be the duty of the Secretary of the Treasury to issue United States legal-tender noninterest-bearing Treasury notes to make up the deficiency of $50,000,000. Such notes shall be redeemable out of the first surplus moneys in the Treasury above such sum of $50,000,000. In case insufficient coin to meet the coin obligations of the United States shall come into the Treasury through the ordinary sources of revenue, it shall be the duty of the Secretary of the Treasury to exchange the silver certificates paid into the Treasury for the coin which is in the Treasury for the redemption of such certificates, and with the coin paid and obtained through the conversion of silver certificates the coin obligations of the United States shall be discharged, and it shall be the duty of the Secretary of the Treasury to coin sufficient of the silver bullion purchased under the law of July 14, 1890, to supply all deficiencies that may occur in the supply of coin under the foregoing provisions to meet and discharge all coin obligations presented.

Mr. STEWART. I ask unanimous consent for a word of explanation.

The VICE-PRESIDENT. Is there any objection? The Chair hears none, and the Senator from Nevada will proceed.

Mr. STEWART. There is now in the Treasury about $230,000,000 of idle money. This amendment would invest about $180,000,000 of that money in United States bonds, thus saving interest and distributing the money among the people.

The amendment further provides that in case a deficiency shall occur so as to reduce the reserve below $50,000,000, the Secretary of the Treasury shall issue legal-tender noninterest-bearing Treasury notes to be redeemed out of the first surplus money that comes into the Treasury above the $50,000,000, so that this issue will be very temporary. In that way there would not be a large amount of idle money in the Treasury at any time, nor would there be any possible danger of a deficiency to meet the obligations of the Government.

The amendment further provides that the revenues coming into the Treasury by silver certificates, which form probably more than half the revenues now, shall be used for the purpose of obtaining coin to meet coin obligations. The silver certificates are exchangeable now in the Treasury for the coin in the Treasury deposited for their issue. This simply requires that that exchange shall be made. That will probably furnish the current coin that may be necessary for redemption.

The amendment further proposes, in order that there may at all times be an ample redemption fund, that the bullion now in the Treasury purchased under the act of 1890 shall be coined, or a sufficient quantity of it to keep up the regular supply of coin. In this way we would not contract and expand the currency by means of our fluctuating revenues.

I have heard it suggested that the tariff bill would raise sufficient revenue to retire a portion or all of the greenbacks. That would be retiring the money upon which the people depend for their business. There is already at least $180,000,000 retired and lying idle in the Treasury, for the retirement of which there is no necessity, and that amount ought not to accumulate. I am opposed to taking what money there is in circulation, or any portion of it, from the people for any purpose whatever. Let it be kept in circulation.

This amendment, if adopted, would put the surplus above $50,000,000 in circulation, and if the revenues should at any time be insufficient, the temporary loan provided for can be made, greenbacks or Treasury notes can be issued and be redeemed by the first surplus revenue that comes in, and Congress would have time to increase taxation, so that there would be revenue enough and still not keep the money out of circulation.

Thus it would not increase the paper circulation permanently at all, but it would prevent a large amount of money from lying idle, and it would repudiate the idea that the tariff bill is to have the sinister purpose of retiring our greenbacks, or retiring any part of our money. I think there is nothing more reprehensible than in times like these, when the country is suffering for money, to tie it up in the Treasury by any scheme whatever.

I shall advocate this amendment earnestly, and I hope that, the attention of the Senate now having been called to it, Senators will think over the subject and help to perfect it, if it is not perfect now, so that it may go on the tariff bill, and that we may have a system of revenue whereby our reserve will be always kept at a certain point and not have to borrow any money, except by a temporary loan to be supplied immediately by new revenue, and without contracting the currency by hoarding the money of the people in the Treasury.

The VICE-PRESIDENT. The amendment will lie on the table and be printed.

AMENDMENT TO DEFICIENCY APPROPRIATION BILL.

Mr. HOAR submitted an amendment intended to be proposed by him to the general deficiency appropriation bill; which was referred to the Committee on Appropriations, and ordered to be printed.

AMENDMENTS TO THE TARIFF BILL.

Mr. McENERY submitted an amendment intended to be proposed by him to the bill (H. R. 379) to provide revenue for the Government and to encourage the industries of the United States; which was ordered to lie on the table and be printed.

Mr. DAVIS submitted an amendment intended to be proposed by him to the bill (H. R. 379) to provide revenue for the Government and to encourage the industries of the United States; which was ordered to lie on the table and be printed.

Mr. GEAR (by request) submitted an amendment intended to be proposed by him to the bill (H. R. 379) to provide revenue for the Government and to encourage the industries of the United States; which was ordered to lie on the table and be printed.

ANNALS OF THE ASTROPHYSICAL OBSERVATORY.

Mr. LODGE submitted the following concurrent resolution; which was referred to the Committee on Printing:

Resolved by the Senate (the House of Representatives concurring), That there be printed and bound 3,000 copies of a special report describing the methods and results of the investigations conducted at the astrophysical observatory of the Smithsonian Institution, entitled Annals of the Astrophysical Observatory, of which number 500 copies shall be for the use of the Senate, 1,000 copies for the use of the House of Representatives, and 1,500 for distribution by the Smithsonian Institution.

MOBILE MARINE DOCK COMPANY.

The VICE-PRESIDENT. There being no further morning business, the Calendar under Rule VIII is in order.

Mr. PETTUS. I ask unanimous consent to call up the bill (S. 1038) for the relief of the Mobile Marine Dock Company. The bill has been examined by the Committee on Claims at three different sessions of the Senate; it has been unanimously reported from that committee at three different times, and it has been reported at the present session unanimously. I ask that it be put on its passage.

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill. It proposes to pay to the Mobile Marine Dock Company, or its authorized agent or attorney, $86,202.65, in full payment for the use and occupation of and damage to property of that company taken from April 16 to November 15, 1865, inclusive.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

ROAD TO NATIONAL CEMETERY AT DOVER, TENN.

Mr. BATE. I ask unanimous consent to call up for consideration a bill which has heretofore passed the Senate three times, being the bill (S. 931) to construct a road to the national cemetery at Dover, Tenn.

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill. It proposes to appropriate $11,500 for the purpose of constructing, under the direction of the Secretary of War, a macadamized road, or a road partly of gravel and partly of stone, from the river landing or its vicinity, in the town of Dover, Tenn., to the national cemetery near Old Fort Donaldson.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

BRIDGE ACROSS PEARL RIVER, MISSISSIPPI.

Mr. WALTHALL. Mr. President——

Mr. COCKRELL. The regular order, Mr. President.

The VICE-PRESIDENT. The regular order is called for.

Mr. WALTHALL. I ask unanimous consent to proceed to the consideration of Senate bill 1979.

Mr. COCKRELL. As the Senator from Mississippi was recognized as entitled to the floor, I give notice now that when the bill to which he refers is passed the Calendar will have to be proceeded with in regular order.

Mr. WALTHALL. This bill will take but a few minutes.

The VICE-PRESIDENT. Unanimous consent is asked for the present consideration of a bill which will be read.

The Secretary read the bill (S. 1979) to authorize the construction of a bridge across Pearl River, in the State of Mississippi; and, there being no objection, the Senate, as in Committee of the Whole, proceeded to its consideration.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

Mr. COCKRELL. Let us have the regular order now, Mr. President.

The VICE-PRESIDENT. The regular order is called for. The Secretary will report the first bill on the Calendar.

HEIRS OF LEWIS SMITH.

Mr. COCKRELL. Yesterday the bill (S. 433) for the relief of Clara A. Graves, Lewis Smith Lee, Florence P. Lee, Mary S. Sheldon, and Florence P. Lee, legal representative of Elizabeth Smith, deceased, heirs of Lewis Smith, deceased, was passed over at my instance, because I supposed a question of interest was involved. I find that the report states no interest has been allowed upon the claim, and that the amount of $2,317.77 is the original claim without any interest. I ask that it may be taken up and acted upon. It has been read.

There being no objection, the Senate, as in Committee of the Whole, resumed the consideration of the bill.

The VICE-PRESIDENT. The bill was amended yesterday as in Committee of the Whole on motion of the Senator from Missouri [Mr. COCKRELL]. If there be no further amendment as in Committee of the Whole, the bill will be reported to the Senate.

The bill was reported to the Senate as amended, and the amendment was concurred in.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

FANNY B. RANDOLPH AND DORA L. STARK.

The bill (S. 977) for the relief of Fanny B. Randolph and Dora L. Stark was announced as first in order on the Calendar, and the Senate, as in Committee of the Whole, proceeded to its consideration. It proposes to pay to Fanny B. Randolph or her legal representative $8,280, and to Dora L. Stark or her legal representative $8,280, making in all $16,560, the same being in full for, and the receipts of the same to be taken and accepted in full and final discharge of, their claim examined, investigated, and reported favorably by the Court of Claims of the United States under the provisions of the act of March 3, 1883, entitled "An act to afford assistance and relief to Congress and the Executive Departments in the investigation of claims and demands against the Government," and the act of March 3, 1887, entitled "An act to provide for the bringing of suits against the Government of the United States."

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

PUBLIC PARKS IN VALENTINE, NEBR.

The bill (S. 28) granting to the incorporated town of Valentine, in the county of Cherry and State of Nebraska, certain lands, and for other purposes, was announced as next in order.

Mr. COCKRELL. Let that bill be passed over without losing its place.

The VICE-PRESIDENT. The bill will be passed over.

HELEN M. FIEDLER.

The next business on the Calendar was the concurrent resolution reported from the Committee on Foreign Relations, requesting the President of the United States to bring to the attention of the Government of Brazil the claim of Helen M. Fiedler, executrix of Ernest Fiedler, deceased, against the Government of Brazil.

The Secretary read the concurrent resolution, reported by Mr. TURPIE from the Committee on Foreign Relations, March 31, 1897, as follows:

Resolved by the Senate (the House of Representatives concurring), That the President of the United States be requested to bring to the attention of the Government of Brazil the claim of Helen M. Fiedler, executrix of Ernest Fiedler, deceased, against the Government of Brazil, growing out of a contract, alleged by said claimant to be obligatory on that Government, for the hire of the ship *Circassian* to transport emigrants from the United States to Brazil in the year 1867, with the view to ask said Government to consider the said claim and to provide for the allowance and payment of such sum as shall be found just to such claimant.

The VICE-PRESIDENT. The question is on agreeing to the concurrent resolution.

The concurrent resolution was agreed to.

ST. LOUIS RIVER BRIDGE.

The bill (S. 956) to amend an act entitled "An act to authorize the construction of a steel bridge over the St. Louis River between the States of Wisconsin and Minnesota," approved April 24, 1894, as amended by an act approved August 4, 1894, entitled "An act to amend an act to authorize the construction of a steel bridge over the St. Louis River between the States of Minnesota and Wisconsin," was considered as in Committee of the Whole.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

MISSOURI RIVER BRIDGE.

The bill (S. 426) to authorize the construction of bridges across the Missouri River between its mouth and the mouth of the Dakota or James River; and across the Mississippi River between the mouth of the Minnesota River, in the State of Minnesota, and Donaldsonville, in the State of Louisiana; and across the Illinois and Des Plaines rivers between the mouth of the Illinois and the city of Joliet, in the State of Illinois; and to prescribe the character, location, and dimensions of the same, was considered as in Committee of the Whole.

The bill was reported from the Committee on Commerce with amendments.

The first amendment was, in section 1, line 3, before the word "corporations," to strike out "persons, associations, or;" so as to make the section read:

That any corporations complying with the provisions of this act and having the authority of the Secretary of War may hereafter, when public necessity so demands, erect bridges at points where said construction will not materially affect the interests of navigation across the Missouri River between its mouth and the mouth of the Dakota or James River; and across the Mississippi River between the mouth of the Minnesota River and Donaldsonville, La.; and across the Illinois and Des Plaines rivers between the mouth of the Illinois and the city of Joliet, in the State of Illinois, for railroad or other uses, upon compliance with the provisions and requirements of this act; and hereafter no bridge shall be built over said rivers within said limits except under the said provisions and requirements.

The amendment was agreed to.

The next amendment was, in section 5, line 42, after the word "company," to strike out "or persons;" so as to read:

And also that if, by reason of the location of a bridge in or near a city harbor, or from any other cause, the draw opening, channel, or raft span next the shore becomes difficult of access at any season or seasons because of the proximity of river craft which are or may be tied up to the bank, or from any other cause, then the company owning, controlling, or operating said bridge shall, by purchase or otherwise, extinguish the right to obstruct the entrance to said draw opening or span for a distance of at least 700 feet above and 700 feet below the bridge.

The amendment was agreed to.

The next amendment was, in section 10, line 1, before the word "company," to strike out "persons or;" and in line 15, after the word "company," to strike out "or persons;" so as to make the section read:

SEC. 10. That any company constructing any bridge under authority of this act shall build and maintain at all times, as accessory works to such bridge, such booms, piers, dikes, guard fences, and similar devices as may be necessary to insure at all times a permanent channel for a sufficient distance above and below the bridge site, and for the guiding of rafts, steamboats, and other water craft safely under or through said bridge; and if at any time after the construction of the bridge and its accessory works the approaches to draw openings, channel spans, or raft passages in bridges over the navigable waters referred to in this act are found to be dangerous or difficult of access by any important class of river traffic, the Secretary of War may, upon the recommendation of the Chief of Engineers, United States Army, order the company owning, controlling, or operating said bridge to construct under his direction and to maintain such additional sheer booms, dikes, and other devices as will obviate the difficulty mentioned, which additional sheer booms, dikes, and other devices shall be built and maintained at their own expense by said company or persons.

The amendment was agreed to.

The next amendment was, in section 12, line 1, after the word "bridges," to strike out "authorized by this act;" in line 3, before the word "high," to strike out "be" and insert "if;" and in the same line, after the word "bridges," to insert "be constructed;" so as to make the section read:

SEC. 12. That all bridges over the Missouri River below the mouth of the Platte River and above the mouth of the Kaw River shall, if high bridges, be constructed with unbroken and continuous spans, having at least one channel span of not less than 400 feet clear channelway, all other spans over the waterway to have a clear channel way of not less than 300 feet; and all said spans shall have a clear headroom of not less than 50 feet above high-water mark.

The amendment was agreed to.

The next amendment was, in section 13, line 1, after the word "bridges," to strike out "authorized by this act;" in line 3, after the word "shall," to strike out "be" and insert "if;" in the same line, after the word "bridges," to insert "be constructed;" and in line 7, after the word "mark," to insert: "Nothing in this act shall be held to prohibit the construction of low bridges over the Missouri River, subject to the provisions and limitations as to low bridges hereinbefore set forth;" so as to make the section read:

SEC. 13. That all bridges over the Missouri River between its mouth and the mouth of the Kaw River shall, if high bridges, be constructed with unbroken and continuous spans, all spans over the waterway to have a clear channelway of not less than 400 feet, and a clear headroom of not less than 55 feet above high-water mark. Nothing in this act shall be held to prohibit the construction of low bridges over the Missouri River, subject to the provisions and limitations as to low bridges hereinbefore set forth.

The amendment was agreed to.

The next amendment was, in section 19, line 1, after the word "authorized," to strike out "person;" so as to read:

That any authorized company or corporation intending to construct a bridge under the provisions of this act shall give notice for two weeks of such intention, stating the kind of bridge and exact location by publication in papers having a wide circulation, etc.

The amendment was agreed to.

The next amendment was, in section 20, line 4, before the word "company," to strike out "persons or;" in line 7, before the word "company," to strike out "persons or;" and in line 8, after the word "said," to strike out "persons or;" so as to read:

That whenever the Secretary of War has good reason to believe that any of the provisions of sections 7, 10, and 25 of this act have not been complied with by any company owning, controlling, or operating a bridge authorized under the provisions of this act, it shall be the duty of the Secretary of War,

on satisfactory proof thereof, to require the said company to comply with the provisions of said sections, and on failure of said company to comply with said requirements within a reasonable time the Secretary of War shall proceed to cause the necessary work, in the form of additions, alterations, repairs, or removal of obstructions, to be made at the expense of the United States and shall refer the matter, without delay, to the Attorney-General of the United States, etc.

The amendment was agreed to.

The next amendment was, in section 21, line 1, after the word "companies," to strike out "or persons;" so as to read:

That any companies owning, controlling, or operating bridges authorized by this act shall maintain, at their own expense, from sunset to sunrise throughout the season of navigation, such lights and other signals on the bridges as may be required by the Light-House Board for the security of navigation, etc.

The amendment was agreed to.

The bill was reported to the Senate as amended, and the amendments were concurred in.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

SUFFERERS BY LOSS OF LIGHT VESSEL NO. 37.

The bill (S. 665) for the relief of the heirs of certain seamen lost in the foundering of light vessel No. 37 was considered as in Committee of the Whole. It proposes to settle and pay the accounts of the legal representatives of Howard Selover, mate, and George Richardson, seaman, for value of clothing and effects lost when they were drowned by the foundering of light vessel No. 37, off Cape May, N. J., while on duty thereon during the cyclone of August, 1893, and appropriates $137.25 for that purpose; but the sworn itemized list of losses shall be approved by the proper light-house inspector, and the appropriation recommended by the Light-House Board.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

AIDS TO NAVIGATION.

The bill (S. 673) to provide for light-houses and other aids to navigation was considered as in Committee of the Whole. It proposes to establish and erect light-houses and other aids to navigation, as follows:

A light and fog-signal station on Greens Ledge, Norwalk Harbor, Connecticut, $60,000.

A light and fog-signal station on Pecks Ledge, Norwalk Harbor, Connecticut, $10,000.

A light on Long Beach Day Beacon, Norwalk Harbor, Connecticut, $2,500.

Lighted beacons at Round Beach, Fitchs Point, White Rock Reef, and Grassy Hammock, Norwalk Harbor, Connecticut, $600.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

The bill (S. 674) to provide for aids to navigation was considered as in Committee of the Whole. It proposes to establish and erect a light and fog-signal station on the outer breakwater, entrance to New Haven Harbor, Connecticut.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

QUARANTINE STATION AT ASTORIA, OREG.

The bill (S. 966) providing for the establishment of a quarantine station at or near Astoria, Oreg., was considered as in Committee of the Whole. It appropriates $30,000 for the purchase of site, erection of buildings, pier, disinfecting apparatus, launch, and other appurtenances, for the establishment of a quarantine station at or near Astoria, Oreg., and for the maintenance of that station during the fiscal year ending June 30, 1898, which is to be maintained and operated under the provisions of the quarantine laws of the United States.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

JAMES SIMS.

The bill (S. 937) for the relief of James Sims, of Marshall County, Miss., was announced as next in order on the Calendar.

Mr. CHANDLER. I ask that that bill may go over without prejudice.

The VICE-PRESIDENT. There being no objection, that will be the order.

CUMBERLAND FEMALE COLLEGE, M'MINNVILLE, TENN.

The bill (S. 1106) for the relief of the Cumberland Female College, of McMinnville, Tenn., was considered as in Committee of the Whole. It proposes to pay to the Cumberland Female College, of McMinnville, Tenn., $5,000, in full of all claims of that college for the use, occupation, and consumption of its property for hospital and other army purposes during the late war of 1861 to 1865 by the military authority of the United States, and provides that the acceptance of that sum by the college shall be a complete and absolute bar to any and all claims for damage and destruction of the property of the college or the use and occupation thereof by the armies of the United States.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

NANCY E. DAY.

The bill (S. 675) for the relief of Nancy E. Day, administratrix of James L. Day, deceased, was considered as in Committee of the Whole. It proposes to pay Nancy E. Day, administratrix of the estate of James L. Day, deceased, late of Norwich, Conn., $3,041.66 in payment and satisfaction of the amount found due from the United States to Nancy E. Day by the Court of Claims upon a reference of her claim to that court by the Postmaster-General, under the provisions of section 2 of an act of Congress approved March 3, 1883, entitled "An act to afford assistance and relief to Congress and the Executive Departments in the investigation of claims and demands against the Government."

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

OBSTRUCTION OF NAVIGABLE WATERS BY WATER HYACINTH.

The bill (S. 390) to provide for an investigation of the obstruction of the navigable waters of Florida, Louisiana, and other South Atlantic and Gulf States by the aquatic plant known as the water hyacinth, and for other purposes, was announced as next in order on the Calendar.

Mr. PASCO. I ask that that bill may be transferred under Rule IX. There is an appropriation in the sundry civil bill having the same purpose in view, and, if that be finally adopted, there will be no necessity for the passage of this bill. Let it go over under Rule IX.

The VICE-PRESIDENT. That order will be made, in the absence of objection.

IMPROVEMENTS OF BRIDGEPORT HARBOR, CONNECTICUT.

The joint resolution (S. R. 16) providing for estimate of cost of certain improvements of Bridgeport Harbor, Connecticut, was considered as in Committee of the Whole. It directs the Secretary of War to submit estimates of the cost of extending the channel of Bridgeport Harbor, Connecticut, through an arm of the sea known as Yellow Mill Branch of that harbor, such channel to be 12 feet deep and 200 feet wide; also of widening the main channel to the western harbor line, between the inner beacon and the Naugatuck Railroad wharf, with a depth of 12 feet; all as shown by maps and surveys made in compliance with the provisions of the river and harbor act of August 17, 1894, and submitted to Congress under date of November 29, 1895.

The joint resolution was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

SAIL VESSELS OF OVER 700 TONS.

The bill (S. 622) concerning sail vessels of over 700 tons was announced as next in order on the Calendar.

Mr. COCKRELL. I see that the Senator from Maine [Mr. FRYE] who reported that bill is absent, and I find that he has offered amendments to the bill. Whether they were offered by the authority of the Committee on Commerce or simply as his own amendments, I do not know. I do not object to the bill, but I suggest that it had better be passed over, retaining its place on the Calendar.

The VICE-PRESIDENT. Unless there be objection, that will be the order.

CERTIFICATES OF TITLE TO VESSELS.

The bill (S. 946) providing for the collection of fees for furnishing certificates of title to vessels was announced as next in order on the Calendar.

Mr. PLATT of Connecticut. Who reported that bill?

The VICE-PRESIDENT. The Senator from Maine [Mr. FRYE].

Mr. PLATT of Connecticut. I think it had better lie over until he comes back.

The VICE-PRESIDENT. If there be no objection, the bill will lie over in the absence of the Senator from Maine.

THE REVENUE-CUTTER SERVICE.

The bill (S. 620) to promote the efficiency of the Revenue-Cutter Service was announced as next in order on the Calendar.

Mr. PLATT of Connecticut. I think all those bills reported by the Senator from Maine [Mr. FRYE] had better lie over until he returns.

The VICE-PRESIDENT. If there be no objection, it will be so ordered.

REV. J. A. GILFILLAN.

The bill (S. 869) for the relief of Rev. J. A. Gilfillan was considered as in Committee of the Whole. It proposes to pay to the Rev. J. A. Gilfillan $233.81, being an amount expended by him in the purchase and shipment of 322 bushels of seed potatoes, for planting, in May, 1895, for the Leech Lake, Cass Lake, and Winnibigoshish bands of Chippewa Indians, Minnesota.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

GERMAN EVANGELICAL CHURCH, OF MARTINSBURG, W. VA.

The bill (S. 536) for the relief of the trustees of the German Evangelical Church, of Martinsburg, W. Va., was considered as in Committee of the Whole. It proposes to pay to the trustees of the German Evangelical Church, at Martinsburg, W. Va., $2,500 on account of the destruction of their church building and its furniture on the 17th of February, 1863, while in the possession of a portion of the military forces of the United States, and through their carelessness.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

PEARSON C. MONTGOMERY.

The bill (S. 1168) for the relief of Pearson C. Montgomery, of Memphis, Tenn., was considered as in Committee of the Whole. It proposes to pay to Pearson C. Montgomery, of Memphis, Tenn., $3,200, in full compensation for all claims connected with the steamer *New National* and its use while in the service of the United States upon the Mississippi River and its tributaries prior to the 21st of March, 1863.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

CALVIN GUNN.

The bill (S. 262) for the relief of Calvin Gunn, was considered as in Committee of the Whole. It proposes to pay to Calvin Gunn, of St. Louis, Mo., $700, in full compensation for the amount due him as informer and ordered to be paid to him by the United States district court for the eastern district of Missouri in case No. 1387 before that court in the year 1868.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

NAPOLEON B. GIDDINGS.

The bill (S. 226) for the relief of Napoleon B. Giddings was considered as in Committee of the Whole. It directs the Secretary of War to cause to be investigated the circumstances of the alleged taking from Napoleon B. Giddings, in January, 1847, at Santa Fe, N. Mex., and deposit with A. B. Dyer, lieutenant of ordnance, United States Army, by order of Sterling Price, colonel commanding the army in New Mexico at that time, of 140 kegs of gunpowder, and to ascertain and determine the reasonable market value of such powder at that time and place, and whether the same, or any part thereof, was ever returned or delivered back to said Giddings, and the final disposition of such powder; and if the same, or any part thereof, was never returned to or delivered back to said Giddings, then to certify to the Secretary of the Treasury the amount of the reasonable market value at that time and place of the powder so never returned or delivered back to said Giddings; and directs the Secretary of the Treasury to cause to be paid to said Napoleon B. Giddings the amount so certified by the Secretary of War to be the reasonable market value of such powder.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

GEORGE A. ORR.

The bill (S. 227) for the relief of George A. Orr was considered as in Committee of the Whole. It proposes to pay the claim of George A. Orr as acting assistant provost-marshal at Mount Vernon, Mo., from May 28, 1863, to January 30, 1864, at the rate of $100 per month for his services, and such sum for legitimate expenses during that period as may be shown and found to have been actually expended by him in the lawful discharge of his duties and necessary for the public service.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

JOSEPH W. CARMACK.

The bill (S. 228) for the relief of Joseph W. Carmack was considered as in Committee of the Whole. It proposes to pay to Joseph W. Carmack, late of Company A, Sixth Missouri Cavalry, the pay and allowances of a first sergeant of cavalry from the 1st day of May, 1862, to the 30th day of September, 1862, less any pay received by him during that period.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

JOHN S. NEET, JR.

The bill (S. 229) for the relief of John S. Neet, jr., was considered as in Committee of the Whole. It proposes to pay to John S. Neet, jr., late a private in Company C, Third Regiment Missouri State Militia Cavalry, afterwards Company L, Sixth Missouri State Militia Cavalry, $100, in full payment of the sum allowed him in October, 1878, by the Third Auditor of the Treasury Department.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

JOHN M. DAVIS.

The bill (S. 230) for the relief of John M. Davis was considered as in Committee of the Whole. It directs the Secretary of War to revoke and set aside the general order approving and confirming the sentences of the court-martial dismissing John M. Davis, captain of Company H, of the Sixty-third Regiment Illinois Volunteer Infantry, and to issue to him an honorable discharge as of date of April 9, 1865.

Mr. PLATT of Connecticut. Who reported the bill?

The VICE-PRESIDENT. The bill was reported from the Committee on Military Affairs by the Senator from Missouri [Mr. COCKRELL].

Mr. PLATT of Connecticut. I should like to ask the Senator from Missouri how he supposes that Congress or the President can set aside the judgment of a court-martial?

Mr. COCKRELL. Because the President has express authority to approve or disapprove of it. It has to come to the Department for final action, and the bill simply authorizes them to undo what they have done, and which they could have done in the beginning.

Mr. PLATT of Connecticut. I suppose the President has once approved of the sentence of the court-martial.

Mr. COCKRELL. Yes. The bill simply vests him with authority to consider the case again, and it is the only way on earth to correct the record of a man who was unjustly dealt with.

Mr. PLATT of Connecticut. I am very glad the Senator has reported the bill in this form. Whenever I have wanted to accomplish an end of that sort I have been told by the Military Affairs Committee that it was not within the power of Congress to do it.

Mr. COCKRELL. The Senator is mistaken about being so told by the Committee on Military Affairs. This is the form of bill which has now been used for four Congresses. Bills similar to this were passed in the Fifty-second, the Fifty-third, and the Fifty-fourth Congresses. It is the form which has been adopted; it was prepared with great care, after consultation with the officers of the War Department. There have been twenty cases at least which have followed this form where the bills have been passed and are now law.

Mr. PLATT of Connecticut. That applies to any court-martial?

Mr. COCKRELL. To special and general courts-martial; it does not make any difference which. This was a general court-martial; it recommended the dismissal of the officer, and the proceedings had to come to the War Department for action.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

EZRA S. HAVENS.

The bill (S. 231) for the relief of Ezra S. Havens was considered as in Committee of the Whole. It proposes to pay to Ezra S. Havens, late captain of Company G, Eighteenth Regiment Missouri Volunteer Infantry, the pay and allowances of a captain of infantry in the late volunteer service from the 11th day of March, 1862, to the 2d day of February, 1863.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

MISSOURI MILITARY ACADEMY.

The bill (S. 232) for the relief of A. F. Fleet, superintendent of the Missouri Military Academy, Mexico, Mo., was considered as in Committee of the Whole. It proposes to relieve A. F. Fleet, superintendent of the Missouri Military Academy, Mexico, Mo., from all money responsibility for so much of the ordnance and ordnance stores issued to that academy under its bond as was destroyed by fire September 24, 1896.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

RETIRED PAY OF JUDGES.

The bill (S. 1565) to amend and make certain the intent of section 714 of the Revised Statutes of the United States, providing for salaries of judges in certain cases after retirement, was considered as in Committee of the Whole. It provides that whenever the judge of any court provided for in section 714 of the Revised Statutes of the United States shall have held two or more commissions for different courts, or as justice and chief justice of the same court, his time of service under each of those commissions shall be reckoned in making up his ten years provided for in the act, and he shall be entitled, after retiring, to receive the salary he was entitled to at the time of retiring.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

WILLIAM P. BUCKMASTER.

The bill (S. 252) for the relief of William P. Buckmaster was considered as in Committee of the Whole. It proposes to pay to William P. Buckmaster, surviving partner of James Murphy & Co., late of New York City, $22,386.61, being a balance due for

labor and material furnished by James Murphy & Co. in the construction of the machinery for the double-ender vessel *Otsego*.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

WILLIAM WOLFE.

The bill (S. 251) for the relief of William Wolfe, of Shelbina, Shelby County, Mo., was considered as in Committee of the Whole. It authorizes the Secretary of War to cause to be investigated the claim of William Wolfe for the loss of the schooner *Anna Sophia* and her freight while in the military service of the United States. Upon the certification of the award the Secretary of the Treasury is directed to pay to William Wolfe the amount so found to be due him from the United States, not to exceed $9,262.29.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

HENRY J. HEWITT.

The bill (S. 261) for the relief of Henry J. Hewitt was considered as in Committee of the Whole. It authorizes the Secretary of War to cause to be investigated the claim of Henry J. Hewitt, of Missouri, for corn, oats, hay, horses, and wagons taken from him for the use of the Army in northern Missouri, and for the use and occupation of his hotel, storehouse, and barns by the military authorities of the United States, and to report the result thereof to Congress.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

RICHMOND COLLEGE, RICHMOND, VA.

The bill (S. 677) for the relief of Richmond College, located at Richmond, Va., was considered as in Committee of the Whole. It proposes to pay to Richmond College, Richmond, Va., $25,000 for the occupation of its buildings and grounds by United States troops and officers for the period of eight months and for injury to and destruction of the buildings, the apparatus, libraries, and other property of the college by the troops and officers.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

JOHN F. W. DETTE.

The bill (S. 273) for the relief of John F. W. Dette was considered as in Committee of the Whole. It directs the Secretary of War to cause to be examined the conditions of the contract of John F. W. Dette with the United States to build a stone wall of masonry around the national cemetery at Jefferson Barracks, St. Louis County, Mo., and what, if any, sum is reasonably and equitably due to Mr. Dette, in addition to the amount already paid him, by reason of any changes or modifications in his contract, and to report the result to Congress.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

HEIRS OF JAMES BRIDGER, DECEASED.

The bill (S. 272) for the relief of the heirs of James Bridger, deceased, was considered as in Committee of the Whole. It proposes to pay to the heirs of James Bridger, deceased, $6,000, in full satisfaction for his improvements made at Fort Bridger, Utah Territory, which were appropriated by the United States Army.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

ANNA M. COLMAN.

The bill (S. 253) to permit Anna M. Colman, a widow, to prosecute a claim, was considered as in Committee of the Whole. It proposes to refer to the Court of Claims the claim of Anna M. Colman, widow and sole legatee of Charles D. Colman, deceased, against the United States, on account of the seizure by the United States of certain moneys and securities in St. Louis, Mo., about February, 1865, held by the bailee as a special deposit theretofore made by Charles D. Colman.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

TONNAGE TAX.

The bill (S. 621) concerning tonnage tax was announced as the next business in order on the Calendar.

Mr. COCKRELL. The Senator from Connecticut [Mr. PLATT] suggested that the bills reported by the Senator from Maine [Mr. FRYE], the chairman of the Committee on Commerce, should be passed over. I suggest that this bill be passed over, unless there is some one present to take charge of it.

The VICE-PRESIDENT. If there be no objection, the bill will be passed over.

HEIRS OF THOMAS U. WALTER, DECEASED.

The bill (S. 1269) for the relief of Olivia and Ida Walter, heirs and children of Thomas U. Walter, deceased, was considered as in Committee of the Whole. It proposes to pay to the beneficiaries named $14,000, in full satisfaction of all claims against the United States for services rendered by the testator in connection with any of the public buildings belonging to the Government, whether as architect, designer, disbursing agent, superintendent, or otherwise.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

ST. CHARLES (MO.) COLLEGE.

The bill (S. 249) for the relief of St. Charles College was considered as in Committee of the Whole. It directs the Secretary of War to cause to be investigated the alleged use and occupation by the United States military authorities during the late war of the college buildings and grounds of St. Charles College, in St. Charles County, Mo. Upon certification of the award the Secretary of the Treasury is authorized to pay to the college the amount found to be due from the United States.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

L. ROBERT COATES & CO., OF BALTIMORE.

The bill (S. 714) for the relief of L. Robert Coates & Co., of Baltimore, Md., was considered as in Committee of the Whole. It proposes to pay to L. Robert Coates & Co., of Baltimore, Md., $5,273.30, in full of the bill of the firm for steel plates furnished for and which were used in the construction of the U. S. lighthouse steamer *Zizania*.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

POTOMAC STEAMBOAT COMPANY.

The bill (S. 1010) for the relief of the Potomac Steamboat Company was considered as in Committee of the Whole. It proposes to pay to the Potomac Steamboat Company $5,000, being the amount paid by that company for services rendered to the steamer *Excelsior*, belonging to it, when she was sunk by the U. S. steam tug *Fortune* in Hampton Roads, Virginia.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

RESIDUARY LEGATEES OF MARK DAVIS.

The bill (S. 437) for the relief of the residuary legatees of Mark Davis, deceased, was considered as in Committee of the Whole.

The preamble recites that the military authorities of the United States in command of the city of New Orleans on the 23d day of February, 1863, demanded and received from the agent of Mark Davis, a loyal citizen of the United States, then residing at Petersburg, Va., certain personal property, consisting in part of fifty-five promissory notes, of the amount and value in the aggregate, without interest and deducting certain indorsements thereon, of $27,383.38, and legal currency to the amount of $275.30, and also demanded and received possession of certain real estate belonging to Mark Davis, and subsequently collected certain rents for the use and occupation of the same, all of which personal property and real estate were duly receipted for by the officer receiving the same; and that Mark Davis has since died, leaving a will wherein certain parties are constituted residuary legatees of his estate.

The bill proposes to pay to the personal representative of Mark Davis, deceased, for the use of his residuary legatees named in his last will and testament, or their heirs or assigns, $21,828.33, that being the amount and value of the promissory notes and cash so taken.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

The preamble was agreed to.

BLUE MOUNTAIN IRRIGATION AND IMPROVEMENT COMPANY.

The bill (S. 1233) extending the time allowed the Blue Mountain Irrigation and Improvement Company for the construction of its reservoirs and canal in and through the Umatilla Indian Reservation, in the State of Oregon, was announced as next in order on the Calendar.

The VICE-PRESIDENT. The senior Senator from New Hampshire [Mr. CHANDLER], who is not now in his seat, requested that the bill be passed over, retaining its place. It will be passed over.

JOHN W. LEWIS.

The bill (S. 1153) for the relief of John W. Lewis, of Oregon, was considered as in Committee of the Whole. It proposes to pay to John W. Lewis, register of the land office at The Dalles, Oreg., $521.97, being the amount of his maximum compensation in addition to his salary from April 17, 1890, to July 7, 1890.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

CLASSIFICATION OF LANDS IN OREGON.

The bill (S. 746) to provide for the examination and classification of certain lands in the State of Oregon was announced as next in order.

Mr. COCKRELL. That is quite a lengthy bill, and the Senator

reporting it is not here. I suggest that it be passed over without losing its place.

The VICE-PRESIDENT. The bill will lie over.

BRIDGE ACROSS THE RED RIVER OF THE NORTH.

The bill (S. 1451) to authorize the construction of a bridge across the Red River of the North at Drayton, N. Dak., was considered as in Committee of the Whole.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

INDIAN APPROPRIATION BILL.

Mr. PETTIGREW submitted the following report:

The committee of conference on the disagreeing votes of the two Houses on the amendment of the Senate numbered 10 to the bill (H. R. 15) making appropriations for the current and contingent expenses of the Indian Department and for fulfilling treaty stipulations with various Indian tribes for the fiscal year ending June 30, 1898, and for other purposes, having met, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows:

That the House recede from its disagreement to the amendment of the Senate numbered 10, and agree to the same with an amendment as follows: In lieu of the matter inserted by said amendment insert the following:

"The Secretary of the Interior is hereby directed to at once allot agricultural lands in severalty to the Uncompahgre Ute Indians now located upon or belonging to the Uncompahgre Indian Reservation in the State of Utah, said allotments to be upon the Uncompahgre and Uintah reservations or elsewhere in said State. And all the lands of said Uncompahgre Reservation not theretofore allotted in severalty to said Uncompahgre Utes shall, on and after the 1st day of April, 1898, be open for location and entry under all the land laws of the United States."

And the Senate agree to the same.

R. F. PETTIGREW,
F. M. COCKRELL,
Managers on the part of the Senate.

J. S. SHERMAN,
CHARLES CURTIS,
Managers on the part of the House.

Mr. PETTIGREW. I ask that the conference report be agreed to.

The report was concurred in.

PORTRAIT OF DANIEL D. TOMPKINS.

The bill (S. 107) to purchase a portrait of Daniel D. Tompkins, late Vice-President of the United States, painted by Jarvis in 1812, was announced as next in order on the Calendar.

Mr. COCKRELL. Let that be passed over.

The VICE-PRESIDENT. The bill will be passed over.

FORT PEMBINA MILITARY RESERVATION.

The bill (S. 1492) providing for the selection of the lands within Fort Pembina Military Reservation, N. Dak., by the State of North Dakota was considered as in Committee of the Whole. It provides that the lands within the limits of the Fort Pembina Military Reservation, in the State of North Dakota, may be selected, at any time within one year after the passage of this act or the approval of the survey of the reservation by the Secretary of the Interior, by the State of North Dakota as a part of the lands granted to the State under the provisions of an act to provide for the admission of North Dakota into the Union, approved February 22, 1889; and when the lands are selected as herein provided, the Secretary of the Interior shall cause patents to be issued to the State of North Dakota. But if the State of North Dakota shall select the lands, such selections shall embrace all the lands in the reservation in the State of North Dakota, not exceeding the amount of land granted the State by the enabling act.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

EXECUTOR OF C. M. SHAFFER.

The bill (S. 537) for the relief of the executor of C. M. Shaffer, deceased, was considered as in Committee of the Whole.

The bill was reported from the Committee on Claims with amendments.

The first amendment was, in line 7, before the word "hundred," to strike out "five" and insert "four;" so as to read:

That the Secretary of the Treasury be, and he is hereby, authorized and directed to pay to the executor of C. M. Shaffer, deceased, of Berkeley County, W. Va., out of any money in the Treasury not otherwise appropriated, the sum of $1,400, in full payment for rent and occupation of his warehouse in the town of Martinsburg, in said county and State, as a commissary storehouse during the war of the rebellion.

The amendment was agreed to.

The next amendment was to add at the end of the bill the following proviso:

Provided, That he is satisfied after examining the claim that said warehouse was actually occupied by the United States for the purpose alleged; and the claim shall be allowed at the rate of $50 a month for such time as it was so occupied and not paid for.

The amendment was agreed to.

The bill was reported to the Senate as amended, and the amendments were concurred in.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

WAR IN CUBA.

The VICE-PRESIDENT. The hour of 2 o'clock having arrived, it is the duty of the Chair to lay before the Senate the unfinished business, which is Senate joint resolution 26.

The Senate, as in Committee of the Whole, resumed the consideration of the joint resolution (S. R. 26) declaring that a condition of public war exists in Cuba, and that strict neutrality shall be maintained.

The VICE-PRESIDENT. The pending question is on the motion of the Senator from Maine [Mr. HALE] to refer the joint resolution to the Committee on Foreign Relations, on which the Senator from Illinois [Mr. MASON] is entitled to the floor.

Mr. MASON. Mr. President, that we may have a fair understanding as to the pending joint resolution, I desire briefly to state its contents. As I understand it, it is Senate joint resolution No. 26, Order of Business on the Calendar 59. I desire to call the attention of the Senate to the fact that it was introduced on the 1st day of April, and on the 6th of April it was placed on the Calendar.

The provisions of the joint resolution are, simply:

Resolved, etc., That a condition of public war exists between the Government of Spain and a government proclaimed and for some time maintained by force of arms by the people of Cuba, and that the United States of America shall maintain a strict neutrality between the contending powers, according to each all the rights of belligerents in the ports and territory of the United States.

One of the interesting things to be discussed might be the "state of the art," as we call it in the law business, of this particular resolution. It will be the "state of the art" of polite delay, to take the place of the old-fashioned game we used to call filibustering. Some of our distinguished friends in the minority have delayed action day after day upon the pending joint resolution upon one pretense after another, although long before I took my seat in this Chamber the people of the United States had expected this body to speak upon this question. Day after day the people have heard for the past month the voice of eloquent Senators saying what must be done in this great cause.

Day after day the papers have been full of the announcement that this country was at last to speak, and that the barbarities inflicted by the Spaniard on the Cuban were to have some rebuke at least in the Senate of the United States. The rules of the Senate, to which we all bow with such graceful dignity, have permitted this gentlemanly filibuster to continue until there is to-day no guaranty that the voice of the people will be heard here, or that there is to be any protest from the American people, either in the legislature or by the Executive, against the sale of girls, the murder of children, and the barbarities that the Spaniard calls "war."

That is the state of the art.

But I want to say to my colleagues now, at the opening of the discussion that I shall be indulged in, I am not going to deal in technicalities. I am not going to dwell long on international law. Every student of international law knows that it is made by force and that there is no barbarity of all the past that did not find its precedent in international law. International law is as flexible as time, as changeable as everything else in the earth.

I am not studied much in the use of language. I much believe in the old-fashioned definition that language is the means of communicating thought. I have not yet learned to appreciate the modern diplomatic definition that language is the means of concealing thought. I am here to say as a Republican, I am here to carry out the pledges of my party in convention assembled, that there is no question before the American people so much demanded by the hearts of the intelligent Christian people of this country as the demand made upon us here and now that we shall lift our voices and our hands in defense of liberty in the Island of Cuba. Day after day has passed, Mr. President, but no vote has been had. No one in this body doubts the reason why. A majority of us favor the measure, but the majority can not control.

The Executive, that splendid American citizen, has been somewhat criticised, I think by the Senator from Nevada [Mr. STEWART], upon some of his ideas upon silver; for there is no discussion so sacred that will not invite the question if there is the jingle of a 10-cent piece on the carpet. He criticises our President upon his position on the financial question. Some of the other friends have been inclined to praise him on account of other things. I am here neither to praise nor to criticise the President. It is enough for me to know that in the most exciting political campaign this country has ever seen, amidst the heat of battle and the dust and noise, William McKinley's name, his splendid character, his beautiful life, was like a pillar of fire by night that led us to the greatest victory we have known in modern times, for an honest currency and for protection to the industries of the country. I do not and I shall not criticise him for the delay. I trust his judgment even though I may differ with him. I reserve the right to express my opinion and to cast my vote upon this question when the hour shall come.

And to prove to you, Mr. President, and to my colleagues upon this floor, that the hour has come, let me read to you the message of yesterday. What is it that we contend for in the joint resolution? Namely, that there is a state of war, and that we will agree to keep hands off and give every side fair play; to let the insurgents come into this country as well as the Spaniards. Here is the proof of the necessity of the pending joint resolution, in the communication made yesterday by the President of the United States. I desire to read but a part of it. The President says:

The agricultural classes have been forced from their farms into the nearest towns, where they are without work or money.

Who forced them from their farms? Was it the insurgents? If so, then there is war by the confession of the document itself. Was it the Spaniards who forced 800 American citizens away from a chance to eat bread in the sweat of their own face? Then if there is not war, there ought to be, and with us. Eight hundred American citizens driven from their homes, starving and unsheltered; yet friends upon this floor say, "We do not think there is much of a war." Answer me, then, the question, Who drove these American citizens from their homes? Stand by them one way or the other. If they were driven away by the insurgent, you admit the insurgent is strong enough to make war. If they were driven away by the Spaniard, you ought to be man enough to stand up and give heart and courage to the struggling people of Cuba and to defend American citizens, not alone with a piece of bread, but, if need be, with bayonets and a "Long Tom."

I call your attention, Mr. President, to another part of this message. I voted for it. I had no desire to antagonize that resolution in order to pass this resolution, which I think more important. It was half a loaf better than none. Let me read you further on in this same message:

The local authorities of the several towns, however kindly disposed, are unable to relieve the needs of their own people and are altogether powerless to help our citizens.

What is the matter with our citizens in Cuba? They are hungry in a state of peace, in a land flowing with milk and honey, where all you have to do is to put your hand out and gather the gifts of God Almighty to cover yourself and feed yourself, and yet we are told by the people who say there is no war that they need means to provide them with the things they need to eat. Again I say, Who prevents it? Is it the insurgent? Then there is war. Is it the Spaniard? Then there ought to be war.

I will read one more sentence from this document, which proves the necessity of the passage of the joint resolution under consideration:

The latest report of Consul-General Lee estimates six to eight hundred Americans are without means of support.

How did it happen, Mr. President? American citizens there investing their money, tying their life and their futures with the future of Cuba. How did it happen that six or eight hundred of them, known to the consul-general, are out of food and out of employment?

It is desirable that a part of the sum which may be appropriated by Congress should, in the discretion of the Secretary of State, also be used for the transportation of American citizens who, desiring to return to the United States, are without means to do so.

Eight hundred starving Americans in the Island of Cuba, and we boasting of the right of an American to go anywhere in the world! And now we stand in this position: Instead of demanding protection of the Spaniard alike with the insurgent for American citizens, we say: "Please, Mr. Spaniard, we do not mind your killing the Cuban women and children; we do not mind your selling the daughters of the insurgent to the lustful sensuality of the Spanish army, but, oh, please, kind Mr. Spaniard, with the gentle, insinuating stiletto, let us take a little of American bread to give to our poor, starving Americans in your peaceable island; and then, if they want to, please let us bring them home, that we can protect them under our flag." [Manifestations of applause in the galleries.]

The PRESIDING OFFICER rapped with his gavel.

Mr. MASON. And yet there is no war in Cuba! If the noncombatant is starving to death, what is the combatant doing? If the American citizens, 800 in one place, are being driven like dogs and swine into a herd, and the Spanish Government, refusing to feed them, compels us to send from our store, in the name of God, if it is not war, what is it?

The joint resolution we passed was this:

That the sum of $50,000 be, and the same is hereby, appropriated, out of any money in the Treasury not otherwise appropriated, for the relief of suffering American citizens in the Island of Cuba, said money to be expended at the discretion and under the direction of the consul-general of the United States at Habana.

Suffering American citizens! Do we mean to give notice to the world that Coxey's army has moved down to the Island of Cuba—that they are tramps—or do you mean to say by the resolution that passed yesterday that 800 American citizens, as good as you or I, entitled to the same defense under our flag as you or I, are suffering because the brute in command of the island drives them like dogs away from the place where they can supply their daily needs? We are so tender and so fearful of injuring the delicate feelings of the Spanish minister that we are willing to humiliate our citizens and feed them with the hand of charity, and yet the Senate of the United States says there is no war—the minority says so, and a minority of this body is always the Senate of the United States. [Laughter.]

Mr. President, I only want one minute upon the question of what brought about this condition of affairs. It is familiar to every gentleman upon this floor. Those people suffer exactly as our fathers suffered in 1770 and on until we relieved ourselves of the yoke of England—that lovely old mother country to whom we owe so much, as my eloquent friend from Maryland says. Yes, we do owe her a great deal, but, thank God, we settled a part of it at Bunker Hill. [Laughter.] There may have been a little balance in her favor, but we settled that by our votes here within the past two weeks.

TAXATION WITHOUT REPRESENTATION.

The very moment that a Cuban baby comes from the womb of a Cuban mother that baby is taxed. When it is taken out of the cradle, its very swaddling clothes are taxed. Carried to the church to be christened, the very benediction of God is taxed—not by a kind of a tariff tax, Brother MILLS, but a tax to go toward keeping the Spaniard in idleness and lazy luxury. They are taxed from the cradle to the grave. When the groom takes his bride to the altar, she is taxed, if she has not been before sacrificed to some brute of a Spaniard.

Revolution after revolution came up, and when the insurgents had about won the prize the Spaniard, with that simple diplomacy—they are always diplomatic—with which they have always convinced the insurgents in revolution after revolution, persuaded them if they would only lay down their arms they would be better treated. Ten years at one time they stayed out. This time they have been out two years. Is it wonderful, Mr. President, is it at all surprising, that to-day the brave leader of the insurgent army says he has no compromise to make? The Cubans have been taxed and robbed until there is no place but death and starvation.

After the boy married the girl and went into business he was taxed. The sign over his door was taxed. The Spaniard found that was not enough, and put a tax upon each letter of his sign. They taxed his clerks, his amount of business, and stopped only when their grinding exactions threatened to crush out his life, and thus put an end to extortion. The native-born Cuban, up to some two years ago, could not even teach school in his own bailiwick, and has never been permitted to hold any office of honor or trust. Some of their children came to our schools. They heard the music of Yankee Doodle, and they took back to their insurgent father and brother the story of Bunker Hill, and they have begun to demand their right—their right to govern themselves.

Let me say to you, Mr. President, whether we shall sit silent on and on; whether we shall continue, in this dignified body, to be silent when all the people ask us to speak; whether the United States shall do its duty or not, under the providence of God, Cuba shall be free. There shall be no slave on the continent where our flag floats. [Manifestations of applause in the galleries.]

My friend from Maryland yesterday asked the question: "Where is the Cuban government?" I am going to ask the Secretary to read a statement which will take but two minutes. I propose to give my authority—Mr. Decker, one of those newspaper men who like to deal in fiction when they run short of facts, as my brother said, which I do not agree with.

The PRESIDING OFFICER (Mr. SEWELL in the chair). The Secretary will read as requested, in the absence of objection.

The Secretary read as follows:

CUBAN GOVERNMENT.

Salvador Cisneros, President of the Republic of Cuba, has his headquarters, with a full cabinet of officers (and has continuously maintained it there), within 2 miles of Cubitas. Cubitas is a Spanish fortified town in the province of Puerto Principe, and about 50 miles northwest of Puerto Principe, the capital of that province. It is to the east of the trocha. In January last President Cisneros and his cabinet crossed the trocha and joined Gomez and remained with him until the end of February, when, at Gomez's suggestion, he again crossed the trocha and returned to his headquarters, Gomez remarking: "You know you are perfectly safe there." They have a constitution, a code of civil law, a code of military law, a military recruiting law, and an electoral law.

Under that law twenty-four delegates are now being elected to a central congress which is to convene September 2, 1897, for the purpose of electing a President and for the transaction of such other business as may come before it. The island is divided into districts, which are again divided into prefectures, and these into subprefectures. These prefects and subprefects are administering civil government according to the civil code. They also act as commissaries for the army and as postal officers. A very perfect and efficient postal service is in operation. Mr. Karl Decker, who is authority for these statements, having just come from a two months' sojourn with Gomez and the Cuban patriots, wrote and mailed through this insurgent postal service a letter to Consul General Lee at Habana detailing the death of Mr. Crosby and started for Habana the same day. His letter reached Habana six days before he did.

Mr. WELLINGTON. Will the Senator allow me one question?

Mr. MASON. Yes, sir.

Mr. WELLINGTON. I wish to ask the Senator whether that is the kind of information the Senate of the United States is to accept as to the existence of a government in the Island of Cuba?

Mr. MASON. Mr. President, when struggling humanity can only speak through its best methods; when the insurgent is surrounded by the Spaniard, who sells his daughter and murders his boy; when American correspondents of the newspapers go into the forests to find the news, and when the Spaniard covers every port of entry on the Island of Cuba, we should, in the name of humanity, take the best we can get and be satisfied with that. If this account should overstate the facts; if it be not true that they have an election; if it be not true that they have a capital, we do know this: The wealth of a nation is not measured by the capitol dome; the wealth of humanity is not measured by the money in the banks or the miles of railroad, and if the government of struggling Cuba to-day holds its capital under the trees, with nothing but God and the stars for a shelter, I am for that government just the same. [Manifestations of applause in the galleries.]

The information, of course, has not been conveyed by an ambassador nor other representative of the insurgent government, for none is here; he has not yet been received by our Executive; we have not yet declared that such government exists, and the effort to day is, upon the information we have, to lend a helping hand to this extent, by acknowledging their belligerent rights and giving the insurgents who fight for liberty the same right to buy our wheat, the same right to buy our corn, and the same right to buy our guns that the Spaniard has in our open markets.

Mr. GALLINGER. If the Senator will permit me, in addition to the testimony given by Mr. Karl Decker, I hold in my hand Document No. 19, published by the Senate, which shows the absolute existence of a government in the Island of Cuba, and not only that, but gives the constitution of the Republic of Cuba and certain laws which have been passed. Perhaps the Senator has overlooked the existence of this document.

Mr. MASON. I had heard of the document, but have never seen it.

Mr. GALLINGER. I think it would be well for the Senator from Maryland to see it.

Mr. MASON. "A government on paper," says the Senator from Maryland. That is more than Washington had at Valley Forge.

Mr. WELLINGTON. I beg the Senator's pardon.

Mr. MASON. I will give you pardon, but that is true. [Laughter.]

Mr. WELLINGTON. I deny it.

Mr. MASON. I do not care what you deny; it is true.

Mr. WELLINGTON. Oh, but stick to facts. Mr. President, I insist upon having fairness in this discussion. It is not necessary to go outside of the truth and start in upon fiction. You know, sir, and I know, that when Washington was at Valley Forge he had a government back of him. He had a government back of him before he went to Valley Forge. We know very well that when Washington was at Valley Forge it was the darkest hour of the Revolution. It is true that he was then surrounded by his Continentals, barefooted, hatless, ragged, and torn, but back of them there was a government, back of them was a Continental Congress, which had appointed Washington to be the Commander in Chief of that army. The Senator very well knows it. Let us be fair in this discussion. So far as I am concerned, I am willing to stand by fairness, but I will not be misrepresented upon the floor of the Senate. I will not have American history falsified upon the floor of the Senate for the benefit of even the Cuban insurgents.

Mr. MASON. Mr. President, I am extremely surprised that my friend should get excited. I made the statement that Washington at Valley Forge had a paper government, and it was a paper government. That paper was not worth a continental damn. [Laughter.] The money of your Government was not worth more than waste paper in the markets of the world, and you would not have had the power at Valley Forge to stem the incoming tide of the English if it had not been for Lafayette and public sentiment that came to our relief from all over the world. We propose now to give to Cuba what Lafayette gave to Washington at Valley Forge. [Applause in the galleries.]

Mr. WELLINGTON. Mr. President, one question more.

The PRESIDING OFFICER. The Senator from Maryland will suspend a moment. Occupants of the galleries are reminded that they occupy their seats by the courtesy of the Senate, and any infringement of the rules of the Senate which require order will necessitate having the galleries cleared by the Presiding Officer.

Mr. WELLINGTON. Mr. President, I am sure that my friend the Senator from Illinois is carried away by his sympathy for Cuba into making statements that will not be verified by written history. He knows when Washington was at Valley Forge there stood back of him not only a central Government under the Continental Congress, but there was back of that Continental Congress thirteen State governments which had been built upon the colonies which formed the United States of America. He knows full well that there were thirteen colonies that had been formed into States by the will of the people on each and every occasion. History will tell that the State of Maryland had been formed, and that the governor of Maryland, a civil officer of that State, sent the first regiment that left the Southern colonies to go to the assistance of Massachusetts in the great Revolutionary struggle—the Alleghany Riflemen, from my own section of the State. The Senator must know this.

I want to emphasize, sir, here and now, that there is not in Cuba to-day, and there never has been since the beginning of this rebellion or revolution, such a government as you can look to. There have been no jury trials, and you know that. Sir, there is not in existence there anywhere, in a province or in a central port, any government whatsoever that can be so denominated according to law.

Let us be fair. Let us discuss this. I know I am here in defense of a proposition that does not seem to be popular in the country to-day. I am willing to wait for vindication, because I am for my country and its best interests.

Mr. GALLINGER. You will wait forever.

Mr. WELLINGTON. The Senator says we can wait forever.

Mr. GALLINGER. No; you will wait forever, I say.

Mr. WELLINGTON. No; I am not going to wait forever.

Mr. GALLINGER. You will die waiting.

Mr. WELLINGTON. No; I am not going to die at present. [Laughter.] Oh, no; but if you are in favor of liberty and freedom, I will tell you how you can best get it for Cuba, and how you can best get it for all the countries around you—make republican institutions respectable, say when there is a republic that there shall be back of it conservatism and law.

I am proud of my country, and I do not intend to be placed in a false position upon this matter. I am as much an American as is the Senator from Illinois. I believe in liberty as much as he does. I believe in the flag of the country as much as he does, and when it comes to waving the American flag I can do that as well as he can.

But that is not the question. We are now discussing as to whether it is best that the United States of America should recognize the belligerency of Cuba. In my humble opinion, it is not best to do so, and for that reason I have taken the position that I took yesterday. One thing I did accomplish yesterday. It seems to have stirred up the gentlemen on the other side. It seems to have brought to the fore and front this morning the Senator from Illinois. It has brought him so far that he has left the land of truth back of him and is wandering in the land of romance and fiction created by himself. Unfortunately, that is not good ground to stand upon when you go into international questions. It is not a question of what the sympathies of this people may be, but it is a question, and a great question, to know as to what the effect will be upon the United States of America.

Mr. President, so far as I am concerned, the applause of the galleries or their hootings and laughter make but very little difference to me. I am here to carry out for the State I represent the feeling and sentiment I have and what I believe to be just, honest, and correct, and for the best interests of my country.

Mr. MASON. Mr. President, the statement of fact by my colleague from Maryland that he will not die is quite sufficient to gratify my most sanguine hopes. I hope it is true, but it is like some of his other statements in regard to the provisional or the present government of Cuba. This document, reported by the Senator from Minnesota [Mr. DAVIS], and the papers accompanying the report submitted by Hon. J. D. Cameron from the Committee on Foreign Relations of the United States Senate on December 21, 1896, on a joint resolution acknowledging the independence of Cuba, gives a full statement of the officers of that government; it shows what part of the island is under their control, and shows how they collect their taxes.

It is conceded that we gained our independence with but 3,000,000 of inhabitants. In the Island of Cuba to-day there are a million and a half at least; but the Senator would measure in his scales of justice and equity the divine question of liberty by mere questions of numbers. It follows, therefore, that if 3,000,000 Americans were entitled to liberty, a million and a half of Cubans are only entitled to 50 per cent of liberty. [Laughter.]

Here is their government. There is a report made by a committee before you and I became statesmen [laughter], before we took the oath of office at that desk and began to draw our salaries with great regularity [laughter]—speaking for myself. There is the report; there is the evidence. The Senator speaks of the great duty of the United States Senate. I call his attention to a publication in this morning's newspapers. I know, from the statement of the Senator and from many of my colleagues, that a newspaper statement is like a gentle breeze against the great Rock of Gibraltar; but here is the breeze, here is a petition signed by the leading merchants of the great cities in your country and mine.

Let me read you just one line of it. Let me show to the Senator that the Republican party was right in its convention platform when it said the great question to be settled in the future was to recognize belligerency and declare the independence of the Island of Cuba. You were elected on that platform, and so was I. The President of the United States accepted that platform in every detail, was elected on that platform, and I am here to stand by that platform while I continue on the pay rolls. [Laughter.]

The subscribers to this memorial, citizens of the United States, doing business as bankers, merchants, manufacturers, steamship owners, and agents in the cities of Boston, New York, Philadelphia, Baltimore, Savannah, Charleston, Jacksonville, New Orleans, and other places, and also other citizens of the United States, who have been for many years engaged in the export and import trade with the Island of Cuba, finding that their several interests are suffering severely from the long continuance of the struggle now going on in the Island of Cuba.

Oh, there is no struggle there. They are mistaken. They have not been informed so officially by the Spanish minister in Washington. Every merchant who signed this petition was probably a common-sense American citizen. He did not have to wait to be notified officially that his cargoes could not go in or come out at the ports of entry. He did not need a telegram from the descendants of Queen Isabella that he could not do business in the State of New York and in the Island of Cuba. This is their petition. It is too long to read in full.

The magnitude of the American commerce with the Island of Cuba is readily shown by citing the volume of our trade with that island for the three years 1893, 1894, and 1895, in each of which years the value of our imports from Cuba exceeded $75,000,000. Our exports to Cuba ranged in value from $25,000,000 to $30,000,000 a year during these years, and had been even greater in previous years, during the reciprocity treaty of the United States with Spain.

When you read it you can see we have some financial and commercial interests in this little island as well as the sentiment that my friend likes to talk about—that sentiment, that splendid sentiment which is not moved at the sale of women and children, but that sentiment that brings tears to the eye at the thought of the great-great-great-grandmother who pawned her jewels for Columbus to cross the ocean. [Laughter.] Yes; she did. We have done her all the honors we can, and to her memory. It is not against Isabella; but let me call the Senator's attention to the fact, in passing, that the Spaniard in 1492 was a Spaniard and a Spaniard true. She sent Columbus across the water, risking her money against his life, to find gold for the queen; but when he could not produce the thing that the Spaniard wanted he put him in irons, and he died a pauper, and he is not buried in Spanish soil, thank God! who doeth all things well.

I am not familiar with the practice of the Senate, but I am growing somewhat familiar with some of its practices. [Laughter.] I desire, if it is proper, to save the time of the Senate, that this splendid petition, containing names of leading merchants in the great cities of New York, Philadelphia, and in Bethlehem, Pa., St. Louis, signers in Boston, signers in New Orleans, signers in Mobile, signers in Pensacola, Fla., signers in Brunswick, Ga., and so on to the end of the chapter—I shall be pleased, if it is proper (and if it is not, I shall ask the Secretary to read it, so that it may go into the RECORD, not all the names to encumber the RECORD), that it be printed in the RECORD, so that the Senators of the United States may know what the business men of this country think of this proposition, that the time has come that America should defend her own in the Island of Cuba.

Mr. MORGAN. I will suggest to the honorable Senator, if he will allow me, that he print that document as an appendix to his remarks, and put in all the names.

Mr. MASON. I ask unanimous consent to do so.

The PRESIDING OFFICER. If there be no objection, the document will be printed in the RECORD, as suggested.

Mr. MASON. Speaking again of the government of Cuba, I have here a half dozen newspapers printed there; in the woods, they say. I can not read them. I can not even tell the dates. I have only the word of the gentleman who gave me them, and because I happen to be a Senator of the United States I do not think I ought to get so far on top of the Capitol that I can not receive common, ordinary, intelligent communications. The Spanish minister has not sent with his seal the statement that that [indicating] is a Cuban paper, but I believe it and you believe it.

It is common sense we are after. It is the common sense that our friends on the other side seek to avoid. I want it understood here now, as I present this petition from the merchants and the business men of these great cities, that it finds echo in every hamlet among the people where I live. During the political campaign just closed, during the great struggle for supremacy of the two great parties, I felt the pulse of thousands of people. There are no Senate rules among the people. In Illinois, if they do not like what you say they say so, and if they do, they let you know it.

In Illinois, from Cairo to Dunleith, 400 miles of the best State in the Union, the plain people there, as well as the merchants, in response to the proposition that the Cubans should be free, agreed with one acclaim whenever it was mentioned; and, while to-day the people are waiting with bated breath and financial affairs are based upon our action on the tariff, when you get at the deep undertone of the conscience of the Christian people of this country they say, "Let us have freedom in Cuba. Let the Spaniard go back to his own land, and let us have no slaves upon our continent."

Not that alone makes me make this plea. My friend the Senator from Maryland [Mr. WELLINGTON] understands that I appreciate and honor him for his convictions, and I ask at his kind and generous hands only the same consideration I give to him. I have not called names. I shall not indulge in that, and I shall not permit it. You can call jingo as long as you like. You may define jingo as long as you please. Patrick Henry was a jingoist according to the definition of the gentlemen who are trying to keep the insurgents in Cuba. Every man who had rather fight than to buy peace at the dishonor of his wife or his child has been called a jingo from the days of early republics until now.

I am for the liberty, for the independence of Cuba on a better and broader ground. I propose such action as shall secure for that island and for ourselves a better environment, not only for trade or commerce, not at all for the extension of territory—and that is the difference between the ordinary English lawmaker and ourselves. A friend of mine who was entertained at a dinner in London within three months related to me that when one of the great officers of the English navy said, "We are as ready as ever to extend English trade with the English navy," the merchants of London jumped into their chairs and put their napkins above their heads. That is not the sentiment of the American citizen. Nineteen hundred years we have professed to follow the Nazarene. It is not the sentiment that comes from an American conscience. I would not extend our trade one dollar nor sell one pound of American corn at the point of a bayonet. I would not steal the Island of Cuba, nor seek the acquisition of territory by force—which is another name for grand larceny—and I would not put the American flag in Hawaii or Cuba, or on the smallest island of the sea, to add glory to the flag, without the consent of the poorest inhabitant who lived in that island. That is the difference. I do not want Cuba. I am not praying for annexation. I hope I have one glimpse of the divine thought that was in Lincoln's mind when, driving along one day, he saw a struggling bug upon its back and got out of the carriage and with his cane turned the insect to its feet, and when he got back he said, "Well, I have given him a show, an equal show with all the other bugs." [Laughter.]

I wish to give Cuba an equal show. She is not getting it to-day. You are keeping it from her. To-day Spain can come into your market and buy every gun you have to sell, if she has the money. Last night a little band started out to cross the water to take guns and ammunition and dynamite to the insurgents. We watched it like hawks. We have filled our prisons with them. We are paying taxes to-day to keep native Cubans from going back to fight for their own country; and this is America, and this is the United States Senate!

Equal before the law is the demand of the joint resolution. Equal rights of belligerency—that is all that is asked for in the joint resolution by the Senator who has offered it—not preference, not help to the insurgents, but simply to give them a chance, one struggling chance, to come to our shores and with their money buy our goods. When you do it, when the sanctity of law is above it, in the providence of God there is a Lafayette in this country—I do not know his name, but somewhere among men who have grown weary of worshiping the millions some American will have told to him by his boy the story of Lafayette, and he will build the ship if the Government refuses to do so. He will bring ships, he will furnish the courage to the insurgents, he will stand for equal rights before the law; and all we ask is this simple proposition, that hereafter when the Cuban government, so called, offers to buy in our markets, offers to set sail from our ports, we will treat her exactly as we do the Spanish Government.

We hesitate because of an ancient barnacle known as international law—Presidential prerogative, Congressional jurisdiction—and we mingle words with the divine principles of liberty, forgetting for the time that we come from the great liberty-loving people of all the world.

Mr. President, I was going to read extracts from what purported to be instructions of the Assistant Secretary of State to one of our consuls in Cuba. Most of you are familiar with them. I do not believe it is fair to put into the RECORD those statements when the gentleman is said to deny them. The only denial I see is in the press this morning, which says that the State Department says that Mr. Rockhill never sent any such letters.

Therefore it is but fair to him, it is but fair to myself, and but fair to the cause I represent, not to quote those things and make them a part of the RECORD. It is charged; he denies it; the proof is not here. I leave it with his conscience, but I call his attention to one fact: In the communication yesterday received from the Executive Mansion, the facts of which were furnished to the President, presumably from the State Department, it is stated

that "official information from our consuls in Cuba establishes the fact that a large number of Americans," etc. When did this gentleman get that information to furnish the Executive? Let him answer the people and through the press to-morrow. He says he never told a United States consul to shade a report; he never told him to mark it "confidential" to keep the Senate from getting it.

Let him make answer through the press and over his name to-night or to-morrow, if he will. When, Mr. Rockhill, did you get the information that you sent to the Senate that 800 American citizens are starving in Cuba? Did you get it yesterday? Did you get it last night? Did you get it last month? You know what we know. Let him answer. He may deny, if he will, directing the United States consuls to withhold reports, but he can not deny, and show the file mark of his office upon the proposition that we believe to be true, that for days and months he has had possession of that information and that it never went to the Executive until Saturday.

One word, Mr. President, and I shall conclude. My good friend the Senator from Maryland [Mr. WELLINGTON], who is always in earnest and always good-natured, and who wrested the great State he represents from the fallacies of free silver and free trade, seemed to think yesterday, and has intimated to-day, that no newspaper reports can be relied upon. My rule in that regard is this: When they speak well of me, I am sure it is true, and if they speak ill, everybody knows it is false. [Laughter.] So we are very apt to act, I admit, when we read these reports from Cuba in the newspapers. When they do not happen to fit his idea of independence, belligerency, he can not possibly believe them, and I can not help believing them. It is the way we are made.

But as to his general statement in regard to them, he never means to be unfair, but he was. Chicago had a reporter on the field of a three-days engagement in Cuba. Charles Crosby was killed in the Island of Cuba. He was not there to write romances. He was there to furnish the great, throbbing 70,000,000 of people with news, news of struggling Cuba; to put a light upon the watch tower of the liberty-loving people of America that they might know whether liberty was dead or whether on this continent the slave should still be held. Crosby was not a romancer. He answered to his profession with his life. Of ten of the correspondents of the United States newspapers who have gone to Cuba, five have left their lives there. Fifty per cent of the ten we know. Four are dead, one of them is standing to-day in the shadow of the grave, and yet, going into a climate that is dangerous, going into the very field of battle, as the old war correspondents used to do in 1860 to 1865, they have stood where the fight was hot, and no man who carried a gun earned more honor in many a field than the brave newspaper lad who sent the news, sent home tidings of victory for the Union flag.

I insist that while newspaper reports are often conflicting, often, it may be, exaggerated, I insist that after eighteen months of repeated statements, after eighteen months of conflicting news—not conflicting upon one proposition—after eighteen months of regular reports from the scene of conflict, it is time for gentlemen to say we have got to accept the newspaper reports. There is no contradicting it. I do not deny the fact that they are often enlarged upon, but I do say that the best means of information we have comes from that source, and I am sure my distinguished friend did not mean, in the heat of his argument, to cast a reflection upon a class of men whose profession is as honorable as his or mine, and more laborious, involving much more suffering, God knows, to that class of them certainly who have to sit in the gallery at about $40 a week and listen to the speeches we make on this floor.

Mr. GALLINGER. Will the Senator from Illinois permit an observation?

Mr. MASON. Certainly.

Mr. GALLINGER. As I remember the matter, Mr. Crosby, the correspondent of the Chicago newspaper, lost his life while he was on the field observing a battle between the Spanish and Cuban forces. Is that correct?

Mr. MASON. Yes, sir. He stood within 6 feet of the insurgent general. He was shot by a sharpshooter. It is the first time I have ever known a Chicago newspaper man to get the worst of it. [Laughter.] He always gets the news and never gets hurt; but this brave boy, who was reporting for one of our Chicago dailies, was struck here [indicating] and the bullet came out there [indicating], and he fell, mortally wounded. He was a newspaper man, not a writer of fiction.

Mr. GALLINGER. Yet we seem to be hesitating, and some Senators are declaiming against our acknowledging a state of war in Cuba. They say it does not exist.

Mr. MASON. Mr. President, one word and I shall be through. I am sorry to have taken so long. I have felt that I wanted to vote upon this question, and following my platform, every line of which I read and a part of which I wish to insert in my speech, I intend to vote upon this question if it takes all summer.

My friend says that the four years of depression came from a lack of confidence in Europe. It is true to a certain extent.

Mr. WELLINGTON. I beg the Senator's pardon, if he will permit me right here again. I am sure he does not want to be unfair.

Mr. MASON. Not at all.

Mr. WELLINGTON. I said it arose from a lack of confidence both among ourselves and in European countries.

Mr. MASON. All right. I will accept the amendment. Still he has not told it all. It came from the widespread dissatisfaction and distrust; but it came principally because the money of the country would not circulate among the arteries of trade.

Mr. WELLINGTON. Why was that?

Mr. MASON. Because of the passage of the bill that encouraged Americans to give labor to foreigners when it should have been given to the American people. You preached that doctrine from every stump in Maryland, and believe it as well as I do.

Mr. WELLINGTON. Certainly. I merely wished to emphasize the fact of the lack of confidence.

Mr. MASON. Yes; but it was not produced by anything we had done by way of demanding our rights among the nations of the world. Fear of Europe! Afraid of war! He suggested how gunboats would clean our frontier.

Mr. President, if we did not have a ship in the world, if every gun was melted into a plowshare, if every bayonet was buried, if every ship we ever had was sunk in the middle of the sea, there is no nation in the world, much less Spain, that would ever dare strike our colors or invade American soil. [Applause in the galleries.]

Here is my doctrine at St. Louis. Its location was a trifle bad. [Laughter.] "Cuba" is the heading. I am reading to you, my colleagues upon this floor, the platform I submitted to the intelligent people of Illinois as a reason why McKinley should be President and I or some other good Republican should be Senator from that State. I read it, and I want every gentleman on this side of the Chamber to remember, and those of you who have changed your minds, say so when you help to filibuster against the joint resolution. Oh, filibuster is a harsh word! It jars upon the sensitive minds and the delicate touch of those of us who are popular in Spanish quarters, but filibuster is the word. You have indulged in it with a grave and gentle smile. You have kept from a vote with a filibuster, covered with a masked face and kid gloves, but I give you notice that when you get a filibuster from Illinois there will be no mask, there will be no kid gloves. It will be a straight filibuster from the start to the finish.

Here is my platform that I was pledged to when I came here: "Cuba."

You remember how the great hall rang. The great, struggling, liberty-loving people of the world said: "At last the Republican party is on the high road to success. McKinley, sure! Liberty for Cuba will come." The Republican party spoke, and from the days of Lincoln to the days of McKinley it has never stepped backward from one plank of its platform, and it will not do so now.

"Cuba!" at St. Louis when we wanted votes. [Laughter.] Listen, my good Republican brother. There is here no question of Presidential jurisdiction or Congressional jurisdiction. The jurisdiction of the convention decided it—the jurisdiction of the convention—and there never has been a convention since Lincoln was nominated that came closer from the hearts of the people than the convention at St. Louis. Hear what the jurisdiction of the people was. Hear the decree of a court that always has jurisdiction once in four years:

The Government of Spain having lost control of Cuba—

What—

having lost control of Cuba—

Now, as a Republican, I ask the Republicans who live upon that platform, have they lost control, or do you rise to the dizzy height of Senatorial jurisdiction and forget your promises made before election and in convention?

Spain having lost jurisdiction—

having lost control of Cuba, and being unable to protect the property or lives of resident American citizens—

Was it not true? In the name of God and the light of prophecy, have you read the message of McKinley? Then go back and read the first chapter (our platform), and see whether, in the light of prophecy, taking Mr. McKinley's message, our splendid President and our splendid convention, it was not true. Did he not tell you that 800 American citizens are starving there? Did we not tell you in our convention that they had so lost control of Cuba that they could not protect American citizens?

Just let me read this plank:

CUBA.

From the hour of achieving their own independence the people of the United States have regarded with sympathy the struggles of other American peoples to free themselves from European domination. We watch with deep

and abiding interest the heroic battle of the Cuban patriots against cruelty and oppression, and our best hopes go out for the full success of their determined contest for liberty.

The Government of Spain having lost control of Cuba and being unable to protect the property or lives of resident American citizens, or to comply with its treaty obligations, we believe that the Government of the United States should actively use its influence and good offices to restore peace and give independence to the island.

In convention pledged to the loaf of independence, in the hour of success we hesitate to give the crumb of belligerency. I am proud to be a member of the party that never broke its pledge. Yes, it has once or twice, because the Senate was in the control of the minority. But from the days of Lincoln to the days of McKinley that party has never broken its pledge when it had the power in legislative bodies to fulfill it. In your convention at St. Louis pledges were made by those upon this side of the Chamber. My distinguished friend the Senator from Massachusetts [Mr. LODGE] was on the committee to draw up the resolution, and when it was heard, reciprocity shook the rafters, protection set everybody to work with hands and feet; but when we spoke the broad, deep tone of liberty, when we said we remembered Valley Forge, and by the eternal freedom there won, by everything dear to Americans, the Republican party was committed to the independence of Cuba, the hall and the rafters rang and the people all over the whole United States said, "Thank God! Amen, and amen."

Are you as good as your promises before election? Did you believe in the platform then? There is no one on this side of the Chamber who did not speak for it in all its planks, and to-day you stand here idle, not like Republicans, but like men who seem to have gone to sleep, men who seem to have forgotten the pledges their party made.

Mr. President, I had intended to read one or two instances where we do not rely altogether on newspaper reports. No one doubts the statement of John McCullough, an American who owns his own farm 20 miles east of Sagua la Grande. In February, 600 refugees were upon his farm starving, sick with fever. He rode to the officers of the Spanish army begging to buy quinine and other medicines, and the reply was: "Let them suffer." Mr. McCullough protested in the name of humanity, and he said they were pacific, innocent peasants. "But they are Cubans, are they not?" asked the Spaniard. Mr. McCullough said they were Cubans, yes. "Then let them die. So much the better. The quicker the breed is extinguished the better I like it."

No one doubts his statement. He is not a newspaper correspondent writing friction. No one doubts the statement made by the woman who has spoken in different parts, who saw the outrages in the past. No one doubts that they took the Cuban boy, 15 or 16 years old, and stood him in a line and shot him like a dog, not for what he had done, but that the blood of an insurgent was in his veins. You remember it possibly, about the time we came here; when I thought I saw the grandest nation in the world under one roof. I saw my colleagues come in one by one. I saw the Representatives of the House, and recognized that here was the lawmaking power of the greatest nation in the world. I saw the Supreme Court, in its dignity and its great equipment for work, file in one by one, and remembered that that judiciary, in all the annals of the past, had never had its character impugned or its reputation assailed.

I saw the representatives of the Army and Navy come in and take their seats here. I saw our wives and our children in the galleries, and I was inspired with the thought that this is the greatest nation in the world, strong in war or in peace; and at that very moment I remembered the Cuban boy, without a name, taken out the day before by the Spaniard to be shot to death. He asked only one privilege, that his eyes might be uncovered, that he might turn his eyes to the hills from whence he came. I have been outraged and shocked by the cruelties of the past, but I was inspired by the death of that Cuban boy, and I have been silent too long to carry out the wishes of the plain people who sent me here.

I hold my commission, Mr. President, from no set of men. I got my seat from no boss. I hold my place, your equals politically, through the machinations or dictations of no machine. By the eternal power I hold my commission from the people. I promised the people I would speak, but if I have been too long silent or too long speaking I shall answer to my people and my people alone.

You know the outrages. You do not need official returns. You know them from the reports of women in our country who have seen them pass the daughters of the Cuban out of the windows as a prey to the brutal licentiousness of the Spanish soldier, and we, fathers of daughters, gather our children about our own hearthstone and lock the outside door and say, "Am I my brother's keeper?" I am my brother's keeper! Then we march back to the Senate of the United States, with the voices of children and women in our ears, innocent girls ravished and murdered by the Spanish soldiery, and not denied; we gather around in our dignified way and talk about Presidential jurisdiction, Congressional jurisdiction!

Mr. President, no one expects war, but if to keep our promises with Cuba and protect her means war, let it come. If to protest against the butchery of women and children means war, let it come. If to defend the honest daughters of brave patriots means an insult to Spain and war, in the name of God, let it come, and come quickly. Whether you sleep bound hand and foot by the rules of order, or whether you speak like American brave men, the march of the Nazarene is upon us; liberty shall prevail, and the Island of Cuba, under the providence of God, shall be free.

APPENDIX.

BUSINESS, IMPERILED, VOICES ITS DEMAND FOR PEACE IN CUBA.

To the Hon. JOHN SHERMAN, *Secretary of State, Washington, D. C.:*

The subscribers to this memorial, citizens of the United States, doing business as bankers, merchants, manufacturers, steamship owners and agents, who have been for many years engaged in the export and import trade with the Island of Cuba, finding that their several interests are suffering severely from the long continuance of the struggle now going on in the Island of Cuba, desire to present for your careful consideration the following facts, in the hope that you may be able to devise measures whereby the termination of the struggle between the armed forces in the Island of Cuba may be hastened and the sufferings and losses of your subscribers may be relieved and commerce may be reestablished between the United States and the Island of Cuba.

The magnitude of the American commerce with the Island of Cuba is readily shown by citing the volume of our trade with that island for the years 1893, 1894, and 1895, in each of which years the value of our imports from Cuba exceeded $75,000,000. Our exports to Cuba ranged in value from $25,000,000 to $30,000,000 a year during these years, and had been even greater in previous years during the reciprocity treaty of the United States with Spain.

The struggle in the Island of Cuba has continued for more than two years, to the serious derangement of our commerce with the island, our imports from Cuba shrinking in value to some $30,000,000 in 1896 and our exports to Cuba in 1896 amounting to only $7,000,000, so far as ascertainable.

Many of your subscribers, moreover, have large interests in Cuba, either as property holders or holders of mortgages, or in the shape of business credit advances, and your subscribers see these interests, already seriously injured, now threatened with annihilation by the continuance of a state of affairs under which we can neither operate any business in the Island of Cuba with safety nor take the precautions possible in ordinary times to protect our interests.

It appears to your subscribers that for the reasons above cited they may venture to lay these facts before you most appropriately at this time, and they sincerely hope that you may be inclined, in view of the magnitude and importance of the American commercial interests that are involved, to give careful consideration to the serious blow inflicted upon our commerce and trade by the present disturbance in Cuba and to determine upon the expediency of taking measures which may facilitate an honorable reconciliation between the contending parties.

The restoration of peace in Cuba now, or within the present rainy season, would probably not only rescue from destruction the large interests of American citizens there at stake and serve to reestablish an important branch of our nation's commerce, but would prevent further loss of life, destruction of property, widespread distress, hunger, and suffering that are inevitably increasing accompaniments of an armed conflict such as has existed for more than two years now in Cuba.

Your subscribers especially solicit your speedy consideration of this matter, desiring relief for their own large interests involved, and desiring also to aid in securing the inestimable blessings of peace for one and a half million of residents of the Island of Cuba now enduring unspeakable distress and suffering.

The great cause of true humanity will be furthered jointly with that of American commerce by such measures as your subscribers trust you may deem expedient at this juncture.

Mr. HOAR. Mr. President, it is not my purpose this afternoon to enter into a discussion of the question before the Senate. I hope before the debate shall be over to find an opportunity to say what I think of the proper policy of the United States and the power and jurisdiction of the Senate as affecting the great question of our international relations with which we have to deal. I shall, I suppose, retain the respect for the Constitution I have sworn to support which the Senator from Illinois seems to despise.

Mr. MASON. Seems to what?

Mr. HOAR. I shall retain also—I will repeat what I said, if the Senator did not hear it—I say I expect to retain that respect for the Constitution I have sworn to support which the Senator from Illinois seems to despise.

Mr. MASON. The Constitution or the oath?

Mr. HOAR. I shall retain also my respect for what he terms the ancient barnacle known as international law, notwithstanding the impassioned and exuberant oratory to which we have listened. I believe in international law, that mighty force under which nations are compelled to submit to a power other and greater than their own desires, and upon which depends in the last resort every hope of human liberty, every hope of peace, the security of the workman's wages, civilization, commerce, the sanctity of every human home the world over—and this notwithstanding the utterances of the honorable Senator from Illinois. But at this moment I wish to call attention to the position of the Senate and to the position of the Senator, and I ask that the pending joint resolution may be read at the desk.

The VICE-PRESIDENT. The Secretary will read the joint resolution.

The Secretary read as follows:

A joint resolution (S. R. 26) declaring that a condition of public war exists in Cuba, and that strict neutrality shall be maintained.

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That a condition of public war exists between the Government of Spain and the government proclaimed and for some time maintained by force of arms by the people of Cuba, and that the United States of America shall maintain a strict neutrality between the contending powers, according to each all the rights of belligerents in the ports and territory of the United States.

Mr. HOAR. Mr. President, Cuba, as has been said, is surrounded by a sea controlled by a Spanish fleet. Her citizens have no access, as Mexico would if she were in a like condition, to our territory. The only effect of that resolution, which is to be interpreted, and must be, and is meant to be, by "that ancient barnacle, international law," is that it declares that while the present condition of things continues Spain may search our ships at sea at her discretion, and that our citizen on that island who suffers from lawlessness there shall have in the future no remedy or recompense against Spain whatever; and that is the whole of it.

Six months ago that was declared and demonstrated by citing authorities in abundance, our own and those of other countries, as the whole effect of a resolution declaring the belligerency of Cuba and Spain; and the eloquent Senator stands up here and for two hours denounces those of us who hesitate to take that step with being indifferent to human liberty and attempting to postpone and to suppress his innocent and youthful ardor.

Mr. MASON. Mr. President, will the Senator from Massachusetts yield for a question?

Mr. HOAR. Certainly; for six.

Mr. MASON. All right; I only want one. Are you willing that we should have a vote in the Senate on the pending resolution?

Mr. HOAR. I expect to have one.

Mr. MASON. Are you willing to help us get a vote?

Mr. HOAR. I expect to help get a vote, and I expect before we get through to make that vote a little more intelligent than some Senators seem disposed to make it.

Mr. MASON. I have no doubt that that is your idea.

Mr. HOAR. Mr. President, my honorable friend has read from the platform of the Republican party, and I should like to have his attention for a moment, because, I dare say, he may want to ask me another question before I get through:

From the hour of achieving their own independence the people of the United States have regarded with sympathy the struggles of other American peoples to free themselves from European domination.

Amen! I declare now my renewed allegiance to that noble utterance.

We watch with deep and abiding interest the heroic battle of the patriots against cruelty and oppression, and our best hopes go out for the full success of their determined contests for liberty.

The Government of Spain having lost control of Cuba and being unable to protect the property or lives of resident American citizens, or to comply with its treaty obligations, we believe that the Government of the United States should actively use its influence and good offices to restore peace and give independence to the island.

We have listened delighted to the rhetoric which that declaration inspired in the Senator. But what is the logic? The United States must actively use its influence to restore peace; therefore we recognize belligerency. The United States sympathizes with Cuba in her heroic efforts at independence; therefore Spain may in the future, if she sees fit, search all American ships in those waters, and therefore we will abandon any just claim our citizens may hereafter have for damages they suffered in the island. That is the Senator's logic.

If you feel as you say, why do you not put a resolution in here:

Resolved, That the war in Cuba has become a butchery and an outrage, and therefore we declare war against Spain.

You are attacking us as filibusters, and yet you are sitting here silent for two months and likely to sit silent, as far as that is concerned, for months to come; you say that we ought to declare war and that this is an outrageous condition of things right at our doors, and not a man of you has the pluck to stand up here and offer a bill or a resolution based on your own doctrines; not a single blessed individual man of you is proposing to carry out your logic.

Mr. MASON. May I ask another question?

Mr. HOAR. Certainly.

Mr. MASON. You say that an acknowledgment of the belligerent rights of Cuba gives the Spaniard a right to examine our ships?

Mr. HOAR. I do.

Mr. MASON. All right. Is that any nearer a declaration of war than you want? Do you pretend to say that the mere acknowledgment of the belligerent rights of a nation is a cause for war under your so-called law of nations?

Mr. HOAR. Not at all.

Mr. MASON. Do you not know that it is not a cause of war?

Mr. HOAR. I do not think it is a cause of war.

Mr. MASON. Then you mean to say that an American citizen who suffers damages by reason of being in Cuba can not recover damages from Spain?

Mr. HOAR. I do.

Mr. MASON. I can not agree with you there. You and I will agree to disagree upon that point.

Mr. HOAR. What I mean to say is exactly this, that if Spain has mobs and disturbances or claims to have them in that island, and the property of an American citizen there is destroyed, we have a good claim against her for not preventing them.

Mr. MASON. Why do you not prevent it instead of appropriating $50,000 to feed them?

Mr. HOAR. I am talking about what you are doing now, and not what I am doing. I am coming to that a little later. I am talking about what you are doing, and I say that all this great brass band of talk about humanity and the outrages on women and children practiced at our doors is followed by this little slender, squeaking mouse of a resolution:

"Whereas our ancestors have loved liberty and we have loved liberty, and whereas we are the greatest nation on earth—Mr. President, when we are the greatest nation on earth, we shall stop talking about it; no great nation brags—whereas we are the greatest nation on earth, whereas all humanity are looking at us, and whereas our hearts are stirred to the very roots and our sympathies are boiling over with love, and whereas we are courageous and we are not afraid of Spain, and if we had not any ships, and had not any gunboats, and had not any army, and had not any guns, all the nations on earth would not dare to touch our flag; therefore, hereafter, Mrs. Spain, search our ships if you want to, and hereafter let your mobs destroy our citizens' plantations in Cuba if you want to, and we will not make any claim against you."

I think that is rather a lame and impotent conclusion. I do not see how this resolution, which the Senator is going to stay here all summer to get a vote on, carries out the Republican platform.

Mr. President, I will tell you what I think ought to be done, and what I think ought to have been done last winter; what I proposed to do, and voted to do, and advocated doing. I think the President of the United States should be asked by Congress to use his good offices with Spain to secure peace and independence in that island, and that is just what the Republican platform said. The Republican platform adopted the very proposition which the Senate had included in one of its resolutions, for which I voted, and which I advocated on the floor. I was reproached then by some of the gentlemen who take this theory that I went a great deal further than they did. The then Senator from Ohio, Mr. Sherman, thought I was going too far in that particular.

If that mediation fail, then I would have the President of the United States or the Foreign Relations Committee of the Senate, or both, make a clear, calm, temperate, and well-proved statement of the facts existing there. I would not take them from newspaper correspondents, and I mean no disrespect to newspaper correspondents either. I would have them found as facts, just as a court finds the facts on which it enters its judgment; and if those facts be what the Senator supposes, and he does not think that Mr. McKinley would misstate them, I would proceed to say to Spain, "We find such and such to be the facts, on which we propose to act; and if you do not stop that war we will stop it ourselves." That is the way for a self-respecting nation to do—not stand here and brag and bluster and sputter in the Senate of the United States.

Mr. MASON. How long do you think it would take, under the present rules of this body, to pass a resolution of that kind?

Mr. HOAR. I think we would have rules that would pass it. I do not think you would find a resolution of that kind met by anything but the grave and serious and proper consideration which every Senator would agree belonged to it.

Mr. President, I do not know but I am an old-fashioned barnacle, as the Senator from Illinois thinks international law is; but I am one of those persons who have a profound respect for the Senate of the United States. Whatever title I have to human memory or human respect, whatever right I have to suppose I have rendered any service to my country or to mankind in my not now short life, depends upon what I have been permitted by the kindness of my constituents to say or to do in this Chamber. I have studied as well as I could the history of its foundation. There were two things which the United States of America contributed to the science of government, to the protection of human liberty, and to the ascendency of law among mankind. One was the institution of the Supreme Court of the United States and the other was the institution of the Senate. They were intended to be, they were, and still are, and, so far as I can have anything to do with it, they ever shall continue to be of equal authority and dignity. When the Senate of the United States has spoken or has acted, a great action, a great transaction, has taken place in the sight of mankind. We were expected in the beginning to be a tribunal raised above the tempests of human passion, the excitements of popular feeling, the flames even of amiable and honest and honorable popular emotion.

What would be thought if, when the Supreme Court of the United States assembled some morning, one of the judges should say, "I hear there is a man going to commit an assault and battery down in New Orleans; I read it in the newspaper, and I move that we pass a resolution to this effect, that if he commit that assault and battery this court will see that he is punished; and if we do not do it pretty quick, either the assault will not take place or it will be over." [Laughter.]

Then suppose another judge should say "I understand that there is an American citizen in a Cuban jail, and if we do not pass a resolution that the Supreme Court of the United States will sustain any proper method of setting him free, he will get out of jail; I understand arrangements are making and the man will get out of jail before we can get our resolution passed." Then suppose one of the other judges should say, "Will you allow me to ask you whether that man is really an American citizen or whether he has not got a naturalization paper that is fraudulent on its face?" and the judge interrupted should proceed to chatter, chatter, chatter for three or four hours, and say, "I will not submit to any interruption, and you will find the consequences exceedingly troublesome if you insist upon doing it."

Mr. President, that kind of performance is no more creditable to the Senate of the United States than it would be if it took place in the Supreme Court of the United States. It is not two days since a long resolution was introduced here, reciting that whereas it was alleged that somebody was going to apply for a pardon, therefore the Senate resolved that the pardon ought not to be granted until the man was first put into jail and then, being in jail, where he could not get out, came before the Senate and purged himself of contempt. [Laughter.] That resolution was referred to the law committee of this body, and they found not only that neither the President nor the Attorney-General had ever heard of an application for pardon, but the man never had any thought of making one.

I am sick of this kind of behavior in the Senate. I think it is discreditable, and I do not think I shall change my mind whoever berates or whoever reviles me for taking that attitude.

I do not think a recognition of belligerency is the way to deal with this condition of things. The Senator from Illinois wants to put down a cruel Spanish army, and he is calling into requisition the service of a mosquito to do it, and a mosquito with a very little sting.

Mr. MASON. You have never been in New Jersey. [Laughter.]

Mr. HOAR. I have never been in New Jersey [laughter], but I know the reputation of the New Jersey mosquito; and a New Jersey mosquito two seconds old out of the egg—if that is where he comes from—has more strength and more sense than the resolution of which the Senator from Illinois is so earnest an advocate. [Laughter.]

Mr. President, I want that plank of the Republican platform read, and annexed to my remarks when they go into the RECORD. I stand by every line of it. I call upon the Senate, I call upon the great Committee of Foreign Relations, I call upon my honorable friend from Minnesota [Mr. DAVIS], a great soldier and a great statesman, and the successor in his great place on that committee of great statesmen, to rise to the condition, to the dignity and the importance of this transaction. Do not let us talk about recognizing belligerency when one belligerent is surrounded by an occupied sea and the whole advantage of the recognition is to go to the party against whom we feel all our sympathies are enlisted. Bring on your resolution and your facts in a temperate, clear, strong, well-considered, and well-founded narration, and declare what you propose to do about it, and let Spain and the rest of the world understand it, and we will stand by you.

I believe, as the Senator from Illinois says he believes, that President McKinley is to be trusted to deal with this great transaction. If he wants any support from the Senate, so far as my vote is concerned he shall have it, but I am not going to get up here to make speeches for buncombe or for Chicago [laughter], which are to be followed by no practical action and by no sensible or discreet proposal.

The plank in the Republican platform of 1896, referred to by Mr. HOAR, is as follows:

CUBA.

From the hour of achieving their own independence the people of the United States have regarded with sympathy the struggles of other American people to free themselves from European domination. We watch with deep and abiding interest the heroic battle of the Cuban patriots against cruelty and oppression, and our best hopes go out for the full success of their determined contest for liberty.

The Government of Spain having lost control of Cuba, and being unable to protect the property or lives of resident American citizens, or to comply with its treaty obligations, we believe that the Government of the United States should actively use its influence and good offices to restore peace and give independence to the island.

Mr. GALLINGER. Mr. President, I remember when, a few weeks ago, we had a concurrent resolution recognizing the belligerency of Cuba before the Senate, the distinguished Senator from Massachusetts [Mr. HOAR] was very much disturbed because it was not a joint resolution. Now we have a joint resolution before the Senate, and he says it is of no more consequence than the voice of a mosquito of New Jersey or of some other State. It seems to be impossible to please the opponents of Cuba in this debate; and I submit that it is a very extraordinary statement for

Senators so old and so learned as the Senator from Massachusetts to make, that the passage of a joint resolution through both Houses of Congress is not a matter of some concern. It certainly is a matter that the Chief Executive will have to take notice of either by giving it his sanction or by giving it his disapproval.

The Senator from Massachusetts—and I am only going to occupy a moment of time to-day—treats with utter contempt this resolution, and indicates that those of us who advocate it are talking for buncombe for our own States or our own communities. That may be the highest form of Senatorial courtesy in dealing between Senators, and it may be one of the ways that the Senator is going to elevate this body to the dizzy heights that the Supreme Court occupies in the hearts and consciences of the American people. For myself, Mr. President, I claim to be just as sincere, just as earnest, and just as honest in my contention as is the Senator from Massachusetts in his; I claim nothing more for myself than I extend to him; but he is not justified, he has not been asked, and it is not his province to stand here and say that I or any other Senator who is advocating this resolution in behalf of Cuba is simply talking for the applause of the galleries or for buncombe with his constituents.

Mr. President, in 1870, when Cuba certainly was no nearer freedom than she is to-day, when she had fought two years, as she now has fought more than two years, a very distinguished Senator, older than the Senator from Massachusetts both in service in this body and in years, stood on this floor and presented a resolution in almost identical terms with the one that is now under consideration. I read it once before, Mr. President, and I want to read it again, because in all these criticisms which the Senator from Massachusetts makes of those of us who are young in the service and inexperienced in public life, and who have not had the advantages of education and learning which have come to that great Senator, I want him to realize the fact that when he is criticising the Senator from Illinois and the junior Senator from New Hampshire he is likewise criticising the present Secretary of State in the Administration of President McKinley. John Sherman stood in this Chamber on the 11th of February, 1870, and offered this resolution:

> Whereas the United States observe with deep interest the civil war now existing in Cuba, and sympathize with the people of all American nations or colonies in their efforts to secure independence of European power: Therefore,
>
> *Be it resolved*, That the United States recognize the existence of a state of war between the Kingdom of Spain and the colony of Cuba, waged on the part of Cuba to establish its independence, and the United States will observe strict neutrality between the belligerent parties, as is their duty under the law of nations.

Mr. ELKINS. May I ask the Senator a question?

Mr. GALLINGER. Certainly.

Mr. ELKINS. Was that resolution passed?

Mr. GALLINGER. It was not.

Mr. ELKINS. That is all I want.

Mr. GALLINGER. It was not, for we had filibustering in 1870 as well as in 1897.

Mr. MASON. And the same old rules.

Mr. GALLINGER. Yes, the same old rules.

Mr. WHITE. Do I understand the Senator to say that that resolution was presented here by the present Secretary of State?

Mr. GALLINGER. I did so state.

Mr. WHITE. There has been no similar document emanating from that office since, I believe.

Mr. GALLINGER. I do not know how that may be. The present Secretary of State was then a member of this body. I have read the great discussion that occurred on this resolution, and I have not discovered that any Senator in 1870 ventured to so flippantly discuss the matter as certain Senators are discussing this matter at the present time. They looked upon it as a serious question, and, while the resolution did not pass, the resolution was offered here by John Sherman, Senator of the United States from the State of Ohio, now Secretary of State of the United States in President McKinley's Cabinet.

Mr. HALE. Will the Senator let me ask if he will amplify a little on the intimation which he made just now, that there had been filibustering resorted to to defeat or to delay this resolution?

Mr. GALLINGER. It does not need any amplification. It speaks for itself.

Mr. HALE. Will the Senator allow me to make a very brief statement upon that point?

Mr. GALLINGER. Well, I think I will—yes. I am always delighted to hear the Senator from Maine, for he is always entertaining.

Mr. HALE. The resolution of the Senator from Alabama [Mr. MORGAN] was presented by him and debated by him for five days. He was not interrupted and could have had a vote at any time, but he submitted so many propositions that needed answer, and demanded answer, that brief answers were made by Senators opposed to his resolution; but all of the answers made up to yesterday did not take one-fifth of the time that he consumed in advocating his resolution. Then the Senator from Indiana [Mr. TURPIE] made another extended speech, which I did not understand to be done for filibustering, but which still delayed consideration; and up to yesterday, Mr. President, the advocates of this resolution had consumed five hours of the time of the Senate where its objectors and those opposed to it had consumed one.

The debate again started yesterday, and the Senator from Maryland [Mr. WELLINGTON], opposed to the resolution, consumed thirty minutes of the time of the Senate, and the Senator from Virginia [Mr. DANIEL], in advocacy of the resolution, delivered one of his masterly and splendid specimens of argument and rhetoric, and he consumed two hours and a half. I have not heard that called filibustering. Then the resolution went over, and to-day, when it came up at 2 o'clock, the Senator from Illinois [Mr. MASON] claimed the floor in advocacy of the resolution and talked in his entertaining fashion for an hour and a half, and then asked the Senator from Massachusetts, who was replying briefly and did not take up twenty-five minutes, if he was ready to take a vote.

Mr. MASON. I desire to interrupt the Senator, and to correct him.

Mr. GALLINGER. Interrupt me, if the Senator please, for I have the floor.

Mr. HALE. I am speaking by the courtesy of the Senator from New Hampshire.

Mr. MASON. Then I desire to interrupt both of you, by the consent of both of you.

Mr. GALLINGER. I am pleased to yield to the Senator.

Mr. HALE. So am I.

Mr. MASON. I did not ask the Senator from Massachusetts if he was ready to take a vote; I do not ask you if you are ready, but I ask you if you will give unanimous consent at any time within one day, two days, or two weeks that the vote may be taken on the resolution? Now I ask, Will you agree to unanimous consent to let us vote within a month on this resolution?

Mr. HALE. Of course I will. We will get a vote a great deal quicker than that.

Mr. MASON. All right.

Mr. HALE. But it is the height of audacity and impudence here in this body——

Mr. GALLINGER. I do not yield for that kind of language.

Mr. HALE. I withdraw that. It is the height of audacity, certainly, and it is a kind of colossal cheek—— [Laughter.]

Mr. GALLINGER. I have the floor.

Mr. HALE. I withdraw that.

Mr. GALLINGER. I am entitled to the floor.

Mr. HALE. I will withdraw that.

Mr. GALLINGER. I insist on my rights, Mr. President.

Mr. HALE. Let me finish my sentence.

The VICE-PRESIDENT. The Chair recognizes the Senator from New Hampshire as entitled to the floor.

Mr. HALE. We are not filibustering; we are not even talking——

Mr. GALLINGER. If the Senator will take his seat, I will proceed.

When I inadvertently used the word "filibustering," I did not suppose that I was to receive such a lecture from the Senator from Maine [Mr. HALE]. The Senator is willing to withdraw his very offensive terms which he has used toward me—inadvertently, I presume, for they were very offensive—so far as this debate is concerned, and I am willing to withdraw the term "filibustering," because I had no intention of speaking more than a moment this afternoon. I rose merely to call attention to the fact that the senior Senator from Massachusetts [Mr. HOAR] had read some of us a lesson, and had called attention to the fact that this body ought to emulate the Supreme Court in its dignity and in its methods of procedure, and that we were doing a very wrong thing in advocating so insignificant and unnecessary a resolution as is now before this body.

Mr. HOAR. May I ask the Senator a question?

Mr. GALLINGER. Certainly.

Mr. HOAR. Did I allude to the Senator from New Hampshire in any form or manner?

Mr. GALLINGER. I presume, being a member of this body, the Senator did allude to me. He alluded to the Senate. If he does not consider me as a part of it——

Mr. HOAR. Did I allude to the Senator in any form or manner?

Mr. GALLINGER. If the Senator does not consider me a member of this body, he did not allude to me; but if he does consider me a member of it, then he did allude to me.

I will proceed for only a moment. What I desire to call attention to is the fact that this is not an extraordinary resolution, that during the other contest that Cuba had with Spain, lasting ten long years, precisely such resolutions were offered, and they were offered by the colleagues of the Senator from Massachusetts at that time, men whose names are prominent in the history of this country, names that will be remembered after the Senator from Massachusetts and myself are both dead and gone. That is about all I intended to say.

Now, Mr. President, in answer to the Senator from Maine, I simply desire to say this—and I have the authority of the Senator who offered this resolution to say it—that if those who oppose the resolution are ready to agree to take a vote on the resolution on Friday or Saturday of the present week, or Tuesday or Wednesday or Thursday or Friday of next week, we shall be very glad to enter into an agreement with them to have the vote taken at that time. I think the Senator from Alabama will bear me out that I have stated what he said to me a moment ago.

Mr. MORGAN. That is correct, Mr. President. Very frequently during the time the Senator from Maine has referred to I have asked him if he would fix a day or would consent to a day for taking the vote, and twice I have let the resolution go over for his personal accommodation.

Mr. HALE. Does not the Senator think such a request would come with better grace if, after presenting his case so elaborately, some reasonable opportunity should be given to Senators upon the other side to present their views? There is nobody on this side who proposes to occupy very much time; there is nobody who has occupied very much time in opposition to the resolution. The Senator from California [Mr. WHITE] spoke briefly, and when I had the honor to address the Senate I spoke less than an hour. I was then obliged to leave town by a message that I could not disregard. Nobody has made long speeches or has resorted to any tactics or any parliamentary devices to turn aside this resolution or to prevent a vote upon it. There might have been a vote after the Senator from Maryland [Mr. WELLINGTON] had spoken, but for the fact that the Senator from Virginia [Mr. DANIEL], as he had the perfect right to do, and ought to have done if he felt it his duty, addressed the Senate.

Mr. GALLINGER. Now, I should like to proceed, Mr. President.

Mr. HALE. I thought the Senator was through.

Mr. GALLINGER. I am not.

Mr. HALE. Let me finish my sentence. The Senator from Virginia made a remarkably strong speech and presented points that certain Senators want to answer, not at length, but briefly. I will guarantee that the Senator will get his vote. There is no doubt about that. But there will be, Mr. President, and there ought to be, a fair opportunity for reasonable discussion of this resolution, and at the end of that time neither the Senator from Alabama nor the Senator from New Hampshire need fear that there will be any attempt to delay action upon it. The Senate has a right to vote upon the resolution, and I want to see it out of the way.

Mr. GALLINGER. The Senator from Maine is a very adroit tactician and parliamentarian; we have learned that during the debate on all these Cuban resolutions; and when the Senator from Maine says we might have had a vote yesterday at the close of the very extraordinary speech made by the Senator from Maryland, he is possibly not aware of the fact that he had said in my presence that the opponents of the resolution had arranged to occupy the entire day and send the resolution over to this legislative day.

Mr. HALE. That was after the Senator from Virginia had spoken.

Mr. GALLINGER. It was not; it was during the speech of the Senator from Maryland that I heard the statement made.

The Senator is a very adroit tactician and parliamentarian. He knows perfectly well that the tariff bill is to appear here next Monday, that the debate on the tariff bill is to begin on Monday next, and he understood very well that certain appropriation bills were to come into this body and obstruct this resolution.

Mr. HALE. I wish I felt as certain about the tariff bill coming up next Monday as the Senator does. I hope it will.

Mr. GALLINGER. Of course, it is just possible it may not.

Mr. HALE. But there is no attempt to run this resolution into interference with the tariff bill.

Mr. GALLINGER. It is just possible it may be run into interference with the passage of the tariff bill.

I have said all I purposed to say when I rose. I simply desire now to make a brief statement in defense of those of us who have the audacity and the cheek and the temerity—to use some of the terms that have been used to-day—to say a word in behalf of struggling Cuba, under the circumstances that engaged the attention of this honorable Senate in 1870, when greater men were here than those of us who chance to be advocating the cause of Cuba to-day. It was dignified then. It was treated as a proper thing at that time; and I simply want to say, so far as I am concerned, that I am acting in quite as good faith as the Senator from Maine or the Senator from Massachusetts, and all I claim for myself in this debate is the same courtesy and rights that I very gladly extend to those distinguished Senators.

Mr. HAWLEY. Mr. President, I shall occupy the time of the Senate but for a very few moments.

I listened with a good deal of interest, and an occasional thrill, to the very vigorous eloquence of the Senator from Illinois [Mr. MASON], and the old French phrase occurred to me, "This is magnificent, but it is not war."

I have wished sometimes, not irreverently, I hope, that I might possess the power of omnipotence. I feel so when I look upon the condition of Cuba and the indescribable cruelties, the exceptional cruelties, that occurred there during that civil war; and every generous man's heart warms up when he reads the story about Greece and the wonderful behavior of the Christian powers in relation to Greece and Turkey. We are soon to see—mark the prediction; it is an easy one to make—we are soon to see Great Britain crush the Transvaal, the land of sturdy, brave, liberty-loving men, because the Transvaal stands in the way of that domination which Great Britain intends to extend over Africa, from Egypt down to the Cape. All these things I should like to be able, with a nod or a quiver of the finger, to put an end to. But I am afraid I should use my power unjustly; I am afraid I should be cruel also; but I sometimes wish I could do it.

We are in no condition as a country to step forward into the arena of the world and say we are going to see justice done by every poor people everywhere; that we will interfere; that we will declare belligerency, or that we will declare war. The Senator from Illinois asked with some vigor once or twice if we were afraid of war. Yes; I am. I am afraid of war on the part of an unprepared nation. I declare that we are not fit to undertake a war against any but the very weakest of the nations of the earth, and this is the text upon which I have been preaching these ten or twelve years, more or less. My hope is to see our coast defenses and our Navy put into such condition that we can conduct an international debate, for we can not have an international debate without the guns; and when we have something of an armament that is befitting our great place in the world, we can then afford to assume the responsibilities the Almighty placed upon us by reason of our wealth and our power.

I should be glad to have somebody explain more particularly and satisfactorily what would be the result of this declaration of belligerency. I have looked at the books, and I am not quite clear about it. I find that now the Cubans may have all the guns they can pay for from this country, and all the munitions of war they can pay for. The difficulty comes in landing them at the ports, at which Spain has exclusive and complete control. I do not see that the declaration of belligerency would help the Cubans in the matter of obtaining supplies at all.

Mr. MASON. Will the Senator yield for a question?

Mr. HAWLEY. Oh, yes.

Mr. MASON. Are you not aware that our Government is arresting and is preventing people from taking guns and munitions of war from our ports to Cuba?

Mr. HAWLEY. Oh, yes; and we should have to do it more particularly after the declaration of neutrality under this resolution.

Mr. MASON. You said just now that the Cubans could buy all the arms they wanted from us.

Mr. HAWLEY. We have the right to sell.

Mr. MASON. But we have refused to let them be delivered.

Mr. HAWLEY. Our citizens have the right to sell, but if our Government believes they are going to use them to interfere in a war against a friendly government, it is our business not to let them do so.

Mr. MASON. We have a right to sell, but they can not buy.

Mr. HOAR. The Senator from Connecticut, I think inadvertently, made a mistake in his answer to the Senator from Illinois.

Mr. MASON. I think so, too, but that is all right. I will accept the explanation.

Mr. HOAR. If this is a mere matter of a circus, I will sit down.

Mr. MASON. If the Senator from Massachusetts understands this to be a circus, he does not understand it from me.

Mr. HOAR. Very well. Then I should like to say, seriously, Mr. President, I mean no discourtesy to the Senator, but I thought his answer was hardly fitting——

Mr. MASON. I shall endeavor to take care of myself.

Mr. HAWLEY. I shall be glad to have the Senator from Massachusetts correct me.

Mr. HOAR. We have, as I understand it, under the laws of nations, the right to sell arms or any munitions of war, and our Government does not interfere with that now. It is only military expeditions that we interfere with.

Mr. MASON. Only what?

Mr. HOAR. Military expeditions, and those military expeditions have the same character whether we declare neutrality and belligerency or whether it remains as now. There is no different right in the least under the law of nations except the right of search.

An American vessel can take a load of arms intended for the belligerents in Cuba. She can fly the American flag, and Spain can not touch her until she gets within the 3-mile line. Then they can seize her if they choose.

Mr. MASON. Does the Senator——

Mr. HOAR. Let me finish my statement. After this the pending joint resolution becomes operative; or when it does, Spain can search that vessel 10 miles off the Florida coast.

Mr. MASON. Just one moment, if the Senator from Connecticut will pardon me. Does not the Senator from Massachusetts know that the insurgents can not buy guns or ammunition and sail from any port if the officers of this Government know it?

Mr. HOAR. No, sir; I do not.

Mr. MASON. Let me read to the Senator an extract which is simply an illustration of what is occurring every day. It seems to me the Senator ought to be aware of it:

Filibusters get away.

Mr. HOAR. Yes.

Mr. MASON—

The *Jones* landed at the railroad wharf and took on two carloads of material. The *Long* also took on provisions and a cargo of dynamite, and then to evade suspicion loaded a small cargo of coal—

This is from the morning paper—

The *Jones* had been under the eye of the officials for some time.

This was in North Carolina. The Senator from North Carolina [Mr. PRITCHARD] knows from personal observation that our Government is engaged every day in stopping the sending of munitions of war to the insurgents, and every day the Spaniards can buy such articles, and do enjoy privileges here which the insurgents can not enjoy. Does the Senator from Massachusetts deny it?

Mr. HOAR. I do deny it most emphatically. If the United States stopped that vessel, it had something more than a load of arms or breadstuffs or anything else on board. It had men on board, which made it a military expedition. It was the soldier, the recruit, going with the arms.

Mr. MASON. Could recruits go out of any harbor of our coast to day to fight for Spain in Cuba? Would our Government stop them? You know it would not. Any Spanish vessel can start today on our coast and recruit an army from our people, and our officers and our Government would be silent. All we ask now, sir, is that you shall give the insurgent the same show that you give the Spaniard.

Mr. HOAR. I am sorry to differ so much with my honorable friend. Spain can not under our laws recruit troops for her armies here. We dismissed the British minister for doing that long ago.

Mr. HAWLEY. Mr. President, I thank the Senator from Massachusetts for correcting what I supposed was an error, but I find that I understood the question just as he does. I may have been unfortunate in expressing myself, however.

As I said, I did not rise to make a speech. I rise to protest against the spirit of war, the light way of saying that nobody on earth dares to touch our flag. The same people here will frequently vote against completing our coast defenses or vote against necessary increase of the Navy. Let us make ourselves fit for war before we indulge in great talk about war. I remember what Jefferson said, that a distinguished love of peace combined with a defenseless condition is the surest possible invitation to insults.

Mr. BURROWS. Mr. President——

Mr. HOAR. Does the Senator from Michigan desire to proceed to-night?

Mr. BURROWS. I should like to take the floor to make some observations on this matter.

Mr. HOAR. With the Senator's leave, then, I will move that the Senate proceed to the consideration of executive business.

Mr. BURROWS. I yield, and will take the floor to-morrow.

Mr. HOAR. I make that motion.

The VICE-PRESIDENT. The Senator from Massachusetts moves that the Senate proceed to the consideration of executive business.

The motion was agreed to; and the Senate proceeded to the consideration of executive business. After seventeen minutes spent in executive session the doors were reopened, and (at 4 o'clock and 32 minutes p. m.) the Senate adjourned until to-morrow, Wednesday, May 19, 1897, at 12 o'clock meridian.

NOMINATIONS.

Executive nominations received by the Senate May 18, 1897.

SOLICITOR OF INTERNAL REVENUE.

George Morgan Thomas, of Kentucky, to be Solicitor of Internal Revenue, vice Robert T. Hough, resigned.

CIRCUIT JUDGE.

William W. Morrow, of California, to be United States circuit judge for the ninth judicial circuit, vice Joseph McKenna, resigned.

INDIAN AGENT.

Samuel G. Morse, of Port Angeles, Wash., to be agent for the Indians of the Neah Bay Agency in Washington, vice John C. Keenan, resigned.

CHIEF ENGINEER IN THE NAVY.

P. A. Engineer Frank H. Eldridge, to be a chief engineer in the Navy, from the 9th day of May, 1897, vice Chief Engineer Robert Potts, retired.

CONFIRMATIONS.

Executive nominations confirmed by the Senate May 18, 1897.

UNITED STATES DISTRICT JUDGE.

William H. H. Clayton, of Arkansas, to be judge of the United States court of the central district in the Indian Territory.

APPOINTMENT IN THE NAVY.

John Hancock Merriam, a citizen of Minnesota, to be an assistant paymaster in the Navy.

POSTMASTERS.

D. E. Peiper, to be postmaster at Fitzgerald, in the county of Irwin and State of Georgia.

George D. Breed, to be postmaster at Chilton, in the county of Calumet and State of Wisconsin.

Hubert E. Carpenter, to be postmaster at East Hampton, in the county of Middlesex and State of Connecticut.

Martin E. Stanger, to be postmaster at Downers Grove, in the county of Dupage and State of Illinois.

William H. Gilliam, to be postmaster at Vienna, in the county of Johnson and State of Illinois.

Mrs. Mary W. Morrow, to be postmaster at Abilene, in the county of Taylor and State of Texas.

J. Henry Norcross, to be postmaster at Medford, in the county of Middlesex and State of Massachusetts.

Dexter Grose, to be postmaster at North Abington, in the county of Plymouth and State of Massachusetts.

James C. Cooper, to be postmaster at Chester, in the county of Hampden and State of Massachusetts.

W. M. Moss, to be postmaster at Jackson, in the county of Madison and State of Tennessee.

Herschel P. Kinsolving, to be postmaster at Malden, in the county of Dunklin and State of Missouri.

Orlando P. Robinson, to be postmaster at Ayer, in the county of Middlesex and State of Massachusetts.

John H. Meyer, to be postmaster at Newport, in the county of Campbell and State of Kentucky.

Alexander Barron, to be postmaster at Kirwin, in the county of Phillips and State of Kansas.

Alpheus A. B. Cavaness, to be postmaster at Baldwin, in the county of Douglas and State of Kansas.

Samuel M. Yost, to be postmaster at Staunton, in the county of Augusta and State of Virginia.

John M. Griffin, to be postmaster at Fredericksburg, in the county of Spottsylvania and State of Virginia.

James T. Stephens, to be postmaster at Hickman, in the county of Fulton and State of Kentucky.

John Marshall, to be postmaster at Bonneterre, in the county of Saint Francois and State of Missouri.

James Lewis, to be postmaster at Canton, in the county of Lincoln and State of South Dakota.

Owen S. Higgins, to be postmaster at Lebanon, in the county of Warren and State of Ohio.

SENATE.

WEDNESDAY, *May 19, 1897.*

Prayer by the Chaplain, Rev. W. H. MILBURN, D. D.

The Secretary proceeded to read the Journal of yesterday's proceedings, when, on motion of Mr. MITCHELL, and by unanimous consent, the further reading was dispensed with.

AGREEMENT WITH CHOCTAW AND CHICKASAW INDIANS.

The VICE-PRESIDENT laid before the Senate a communication from the Secretary of the Interior, transmitting, in compliance with the provisions contained in the sixteenth section of the Indian appropriation act of March 3, 1893, an agreement between the commissioners of the United States to negotiate with the Five Civilized Tribes and the commissioners on the part of the Choctaw and Chickasaw Indians concluded on the 23d day of April, 1897, together with a communication from the Commissioner of Indian Affairs, stating that, so far as is known to his office, this agreement is satisfactory to those persons having interests in the Choctaw and Chickasaw nations or who may be affected by the agreement; which, with the accompanying papers, was referred to the Committee on Indian Affairs, and ordered to be printed.

PROPOSED ADJOURNMENT OVER FROM THURSDAY.

Mr. HOAR. I move that when the Senate adjourn to-morrow it adjourn to meet on the following Monday. I make the motion now in order that Senators may be able to make arrangements for Friday.

Mr. MILLS. I suggest the want of a quorum, Mr. President.

The VICE-PRESIDENT. The roll will be called.

The Secretary called the roll, and the following Senators answered to their names:

Allison,	Davis,	Kyle,	Pettus,
Baker,	Deboe,	Lindsay,	Platt, N. Y.
Bate,	Fairbanks,	Lodge,	Pritchard,
Berry,	Faulkner,	McBride,	Rawlins,
Butler,	Foraker,	McEnery,	Roach,
Cannon,	Gallinger,	Martin,	Sewell,
Carter,	Gear,	Mills,	Smith,
Chandler,	Hanna,	Mitchell,	Stewart,
Clark,	Harris, Kans.	Morgan,	Turpie,
Clay,	Hawley,	Nelson,	Vest,
Cockrell,	Heitfeld,	Pasco,	Walthall,
Cullom,	Hoar,	Perkins,	Wetmore,
Daniel,	Kenney,	Pettigrew,	White.

The VICE-PRESIDENT. Fifty-two Senators have answered to their names. A quorum is present. The Senator from Massachusetts [Mr. HOAR] moves that when the Senate adjourn to-morrow it adjourn to meet on Monday next.

Mr. MORGAN. I believe that that is a debatable motion, being made to-day.

Mr. HOAR. I shall not press it if a single Senator objects to it.

Mr. MORGAN. I object to it.

Mr. HOAR. Considerably more than half of the Senate have made an arrangement to be absent from the city, to go to Monticello, on Friday. I thought it might be well to have the adjournment over agreed upon in advance, so that arrangements could be made; but if the Senator from Alabama would prefer not to have the motion made now, I will wait until to-morrow before making it.

Mr. MORGAN. I do not propose to interfere with any of the pleasures of the Senate, even on a junket of this kind, while the gravest possible matters are existing and in terrible force in this and in a neighboring country, but I do not think that the motion ought to be passed upon to-day.

Mr. HOAR. Very well; I will withdraw it, Mr. President.

The VICE-PRESIDENT. The motion is withdrawn.

PETITIONS AND MEMORIALS.

The VICE-PRESIDENT presented a petition of Capital City Council, No. 327, Junior Order United American Mechanics, of Harrisburg, Pa., praying for the enactment of legislation for a more rigid restriction of immigration; which was ordered to lie on the table.

Mr. MITCHELL presented a petition of sundry citizens of Iowa County, Wis., praying for the enactment of legislation prohibiting the sale of intoxicating liquors in the Capitol building and in all parts of the United States under Federal jurisdiction; which was referred to the Committee on the District of Columbia.

He also presented a petition of the Board of Trade of La Crosse, Wis., praying for the appointment of a banking and currency commission; which was referred to the Committee on Finance.

Mr. FAIRBANKS presented sundry petitions of citizens of Muncie, Ind., praying for the enactment of legislation for a more rigid restriction of immigration; which were ordered to lie on the table.

Mr. HOAR presented a petition of sundry citizens of Massachusetts, praying for the enactment of legislation for the more rigid restriction of immigration; which was ordered to lie on the table.

Mr. LODGE presented a petition of 5 citizens of Westfield, Mass., and a petition of 44 citizens of Brooklyn, N. Y., praying for the passage of the so-called Lodge immigration bill; which were ordered to lie on the table.

Mr. KYLE. I present a petition in behalf of a large number of citizens of Aberdeen, S. Dak., praying for free lumber in the pending tariff bill. I have received a large number of letters from individual citizens throughout the State, regardless of political faith, asking for the same thing. I present this petition as embodying in general their views. The case may be stated in a few words from the petition, as follows:

> The total consumption of pine, spruce, and hemlock lumber for the year 1892 is estimated by high authority at about 16,000,000,000 feet and that of 1895 at about 12,000,000,000. The importation of Canadian lumber for the year 1892 averaged 669,000,000 feet, and for 1895 the average was 693,000,000. Complaints of the lumber trade are comprehensible when founded on this reduction of 4,000,000,000 feet in the yearly home demand, but ridiculous when aimed at the little quantity from Canada, which has been coming in at substantially the same rate for ten years.
>
> Thus the market for lumber has fallen something like 4,000,000,000 feet in five years. The people have been unable to buy even at existing prices. The whole people are consumers of lumber. The producers are few, and, unlike the typical case of stimulated production, under protective legislation must grow fewer.

I ask that the petition lie on the table, to be considered in connection with the pending tariff bill.

The VICE-PRESIDENT. It will be so ordered.

Mr. SMITH presented sundry petitions of citizens of Beverly, Dividing Creek, Jersey City, Marlboro, Newark, Rahway, and Spotswood, all in the State of New Jersey, praying for the enactment of legislation restricting immigration; which were ordered to lie on the table.

Mr. SEWELL presented the petition of William S. Fay and 49 other citizens of Newark, N. J., and the petition of A. K. Davidson and 38 other citizens of Newark, N. J., praying for the enactment of legislation for the more rigid restriction of immigration; which were ordered to lie on the table.

Mr. TURPIE presented a petition of the Acme Milling Company, of Indianapolis, Ind., praying that a reciprocity clause be inserted in the pending tariff bill; which was ordered to lie on the table.

He also presented the petition of Rosengarten & Sons, of Philadelphia, Pa., praying that a duty be placed upon quinia, sulphate of, and all alkaloids or salts of cinchona bark; which was ordered to lie on the table.

He also presented a petition of the Board of Managers of the Trades League of Philadelphia, Pa., praying Congress to take such measures as may be necessary to increase the capacity of our coastwise system of canals for defense and commerce; which was referred to the Committee on Commerce.

He also presented a memorial of the Board of Managers of the Trades League of Philadelphia, Pa., remonstrating against the repeal of the present civil-service law; which was referred to the Committee on Civil Service and Retrenchment.

He also presented the memorial of Henry W. Mitchell, of New York City, remonstrating against the adoption of paragraph No. 267 in the pending tariff bill, relating to the duty on oranges, lemons, limes, etc.; which was ordered to lie on the table

Mr. LINDSAY presented a petition of sundry citizens of Paris, Ky., praying for the enactment of legislation to regulate the importation and sale of agricultural seed; which was referred to the Committee on Agriculture and Forestry.

He also presented a memorial of Cigar Makers' Union No. 105, of Maysville, Ky., remonstrating against the proposed increase of duty on Sumatra and Habana tobacco; which was ordered to lie on the table.

He also presented a petition of sundry hemp growers of Shelby County, Ky., praying for the enactment of legislation placing such a tariff on jute and all other textile fibers which come into competition with the hemp grown in this country as will be a sufficient protection to the home industry; which was ordered to lie on the table.

Mr. WETMORE presented a petition of 165 citizens of Rhode Island, praying for the enactment of legislation for a more rigid restriction of immigration; which was ordered to lie on the table.

Mr. FAULKNER presented petitions of E. T. Glover and 77 other citizens of Wise, E. G. Thrasher and 51 other citizens of Gormania, H. B. Turner and 13 other citizens of Barboursville, J. K. Snodgrass and 117 other citizens of Roane County, and A. M. Prince and 51 other citizens of Bluefield, all in the State of West Virginia, praying for the enactment of legislation restricting immigration; which were ordered to lie on the table.

REPORT OF A COMMITTEE.

Mr. PASCO, from the Committee on Claims, to whom was referred the bill (S. 1197) for the relief of Rinaldo P. Smith, of Baltimore, Md., reported it without amendment, and submitted a report thereon.

BILLS INTRODUCED.

Mr. FAIRBANKS introduced a bill (S. 2003) to remove the charge of desertion from the record of William Cruse, of Prairieton, Vigo County, Ind.; which was read twice by its title, and referred to the Committee on Military Affairs.

Mr. BAKER introduced a bill (S. 2004) for the relief of Joseph B. McCooey; which was read twice by its title, and referred to the Committee on Claims.

Mr. BUTLER introduced a bill (S. 2005) to increase the pension of Mrs. Elizabeth V. Harman; which was read twice by its title, and referred to the Committee on Pensions.

AMENDMENTS TO THE TARIFF BILL.

Mr. PETTIGREW submitted four amendments intended to be proposed by him to the bill (H. R. 379) to provide revenue for the Government and to encourage the industries of the United States; which were ordered to lie on the table and be printed.

AMENDMENT TO DEFICIENCY APPROPRIATION BILL.

Mr. CULLOM submitted an amendment intended to be proposed by him to the general deficiency appropriation bill; which was referred to the Committee on Appropriations, and ordered to be printed.

PRINTING OF BILLS TO REGULATE COMMERCE.

Mr. GORMAN submitted the following resolution; which was considered by unanimous consent, and agreed to:

Resolved, That there be printed for the use of the Senate 500 copies each of House bill No. 7273, Fifty-third Congress, as passed by the House of Representatives December 11, 1894; House bill No. 3837, Fifty-fourth Congress, as introduced in the House January 13, 1896; and Senate bill No. 1932, Fifty-fifth

Congress, as introduced in the Senate May 11, 1897, all being bills to amend an act entitled "An act to regulate commerce," approved February 4, 1887, said bills to be delivered to the Senate document room.

DISTRICT PARK LIGHTING CONTRACTS.

Mr. FAULKNER submitted the following resolution; which was considered by unanimous consent, and agreed to:

Resolved, That the Secretary of War be, and he is hereby, directed to inform the Senate if it is true that the superintendent of public buildings and grounds has accepted bids for park lighting at the rate of $91.25 per light and rejected bids at the rate of $10 per light per year; and if true, the reasons for such action; and also to inform the Senate if the contracts for such lighting have been completed.

C. B. BRYAN & CO.

The VICE-PRESIDENT. The morning business is closed, and the Calendar is in order. The first bill on the Calendar will be stated.

The bill (S. 936) for the relief of C. B. Bryan & Co. was announced as first in order on the Calendar, and the Senate, as in Committee of the Whole, proceeded to its consideration. It proposes to pay to C. B. Bryan & Co., of Memphis, Tenn., $3,643.60, being for the value of a coal barge and 16,968 bushels of Pittsburg coal, as found by the Court of Claims.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

TAXATION OF INDIAN LANDS HELD IN SEVERALTY.

Mr. PETTIGREW. The bill (S. 374) extending relief to Indian citizens, and for other purposes, was passed over the other day. I desire to have it called up at this time. It is under Rule VIII.

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill, which was read, as follows:

Be it enacted, etc., That the lands now allotted to or which may be hereafter allotted to any Indians in severalty, under agreements already made, when such Indians, under the provisions of any existing law, have become or shall become entitled to the benefits of and subject to the laws of any State, and when such lands shall be embraced in and as a part of any county or town organization, so as to enjoy full and equal participation in the benefits of such local government, and when the Indians enjoy their equal privileges as citizens, shall be subject to State and local assessment and taxation, the same as any other lands similarly located in such State: *Provided, however*, That nothing herein contained shall authorize the sale or incumbrance of any such land on account of such assessment and taxation or in any manner interfere with the trust in which such lands are held by the United States while such trust continues: *And provided further*, That during the continuance of said trust said taxes so assessed and levied shall be paid from the Treasury of the United States to the county treasurer or other legally authorized officer of the county or municipality to which such taxes are payable at such time as said taxes shall become due and payable: *And also provided further*, That said taxes shall only be paid on the receipt of the sworn statement of the county treasurer or other legally authorized officer of the county or municipality to which such taxes are payable, showing that such tax has been legally assessed and levied, and that said tax is then due and payable, accompanied by the certificate of the Secretary of the Interior that said lands are within the State and county described in said statement, and that the lands therein described have been allotted in severalty or belong to Indian citizens of the United States, and that he is satisfied, after sufficient inquiry, that the assessment of the lands for taxation is a fair and reasonable one, and the taxes levied just and equitable, both independently and in proportion to the valuation and taxation of lands in the same county, town, or other municipal corporation: *And provided further*, That no moneys shall be so paid for road or highway taxes, which, by the laws of the State, may be discharged by work, but the Indians owning such lands shall be required to so discharge such taxes: *And provided further*, That the Secretary of the Interior shall be satisfied, and so certify, that the public expenditure of such taxes is fairly made to give the lands of such Indians their just share of benefit.

SEC. 2. That from and after the passage of this act there shall be paid annually, from any moneys in the Treasury not otherwise appropriated, such sum as shall be necessary to pay such taxes so certified under section 1 of this act.

SEC. 3. That all agreements hereafter made for the purchase of the unallotted lands in any Indian reservation shall provide a fund for the payment of taxes upon inalienable allotments in the manner provided by this act.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, and was read the third time.

Mr. COCKRELL. I simply desire to record my vote by placing in the RECORD the statement that I am opposed to the principle involved in this bill.

The bill was passed.

JAMES SIMS.

Mr. WALTHALL. Yesterday the bill (S. 937) for the relief of James Sims, of Marshall County, Miss., was passed over without prejudice on the objection made by a Senator. That Senator tells me that after an examination of the bill he has no objection to its passage. I ask the Senate to proceed to its consideration.

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill. It proposes to pay $6,338 to James Sims, of Marshall County, in the State of Mississippi, for quartermaster and commissary stores furnished by him to the Army of the United States in the years 1862 and 1863.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

ANNA W. OSBORNE.

The VICE-PRESIDENT. The next bill on the Calendar will be proceeded with.

The bill (S. 415) for the relief of Anna W. Osborne was announced as next in order on the Calendar, and was read, as follows:

Be it enacted, etc., That the Secretary of the Treasury be, and he is hereby, authorized and directed to pay to Anna W. Osborne the sum of $800, out of any money in the Treasury not otherwise appropriated, the same being the amount of personal property belonging to her and to John W. Osborne, her late husband, of the United States Army, destroyed by fire at the destruction of the post hospital at Fort Ripley, Minn., July 21, 1870.

Mr. COCKRELL. I should like to know why this claim was not adjudicated by the War Department under the general authority which it has to adjudicate all claims arising from loss by fire. We passed a number of years ago a general law for the very purpose of keeping this class of claims out of the committees of Congress.

Mr. PASCO. I do not know why the claim was not presented to the Department under the general law. The bill came before the Committee on Claims and was carefully examined there. The Senator from Missouri will find by the report, which is on file, that it is a meritorious case. I see no reason why the bill should not be passed.

Mr. COCKRELL. But this is the question: A man has a just claim and we have provided a tribunal for the adjudication of it, where it can be adjusted, and yet he comes to us and insists that we shall pass a special law. There is no use in passing a general law if Congress has to pass a special act for every little case that comes up, and a man can take his choice and come to Congress or go before the Department.

Mr. PASCO. I do not remember the general law to which the Senator from Missouri calls attention.

Mr. COCKRELL. I have always understood that the Committee on Claims and the Committee on Military Affairs refused to report favorably claims of citizens who had a remedy before the Departments and would not pursue that remedy.

Mr. PASCO. This claim has been before Congress ever since the days when Mr. Wilson was Vice-President, and no one has ever before suggested that it came under a general law. The bill was reported unanimously by the Committee on Claims in the last Congress and passed then, and I do not see any reason why the same course should not be pursued now.

Mr. NELSON. Mr. President——

Mr. COCKRELL. I object to the consideration of the bill until we can ascertain whether the Department has jurisdiction of the case. If it has, I object to the Senate wasting its time in considering matters that properly belong to the executive branch of the Government to adjudicate. The report does not show any reason why it was not presented to the Department. There may be some just cause.

Mr. PASCO. I hope the Senator from Missouri will withhold his objection until the Senator from Minnesota [Mr. NELSON] can be heard. He introduced the bill, and he may be able to give the Senator the special information he desires.

Mr. COCKRELL. Certainly; I will withhold it until the Senator is heard.

Mr. NELSON. I trust the Senator from Missouri will withdraw his objection. This is a very small claim.

Mr. COCKRELL. If the Senator will excuse me, it does not make a bit of difference how small it is or how large it is. The principle involved is the question whether Congress shall waste its time in considering little claims of individual citizens when by a general law the executive branch of the Government has full power to adjudicate and pay them. I insist that a citizen shall not have the right to come to Congress when we have provided another tribunal.

Mr. NELSON. I am not aware of any general law under which this claim can be adjudicated.

Mr. COCKRELL. If the Senator will just let the bill be passed by, I will furnish him with a copy of the law. It was enacted years ago. This is the first of these claims that I have seen here in Congress for some time. There is no question about such a law having been enacted.

Mr. PASCO. I wish to state that this lady, a widow, with two children, has been before Congress ever since the Forty-seventh Congress endeavoring to get the claim paid. The bill has been reported favorably in both Houses, and yet she never has been able to get the claim adjusted. It would have been very kind and fair for the Senator from Missouri during all those years to have called our attention to this fact before, so that the poor woman might have gotten her relief without waiting as many years as she has in order to get it through the action of Congress. He has never before suggested that there was a general law which would cover the case.

There was no such suggestion made in the papers, and there was no such suggestion before the committee. There was no such suggestion before the House of Representatives when a favorable report was made there. I hope that she will not be further delayed, so far as the action of the Senate is concerned. It is a meritorious case. The attention of the committee was not called

to the fact that she could get relief under a general law. I ask, if the bill is to be passed over, that the report, which is brief, be printed as a part of my remarks.

The VICE-PRESIDENT. Is there objection? The Chair hears none, and the report will be printed.

The report is as follows:

[Senate Report No. 78, Fifty-fifth Congress, first session.]

April 14, 1897.

Mr. PASCO, from the Committee on Claims, submitted the following report, to accompany S. 415.

The Committee on Claims, to whom was referred the bill (S. 415) for the relief of Anna W. Osborne, have examined the same and submit the following report thereon:

This claim was before the committee during the Fifty-fourth Congress, and the bill for its settlement was favorably reported and was passed by the Senate.

This report was as follows:

[Senate Report No. 1454, Fifty-fourth Congress, second session.]

"The Committee on Claims, to whom was referred the bill (S. 114) for the relief of Anna W. Osborne, have carefully considered the same, and submit the following report thereon:

"The claimant is the widow of John W. Osborne, who served for three years during the late war as a member of Company E, Thirty-sixth Massachusetts Volunteers. He reenlisted soon after his discharge in June, 1865, and was appointed as hospital steward and served as such until October 28, 1870, when he was accidentally killed at Fort Ripley, Minn., where he was on duty at the time.

"About three months before his death the hospital building at the fort was destroyed by fire, and Osborne and his family, who were living in the building, lost all they had. It is stated that Osborne, instead of trying to save his property, exerted himself to rescue the patients and save the property of the Government. This statement is supported by some of the officers who were on duty at the post.

"Before his death Osborne applied to the late Vice-President Wilson, then a Senator from Massachusetts, for aid in securing relief, and some letters written by him, acknowledging the receipt of the papers, are before the committee. Some of the papers sent to Senator Wilson were subsequently lost or mislaid, and among them an itemized statement of the losses which, according to the recollection of the widow, was among them. This loss is supplied by the widow, who has submitted a list of the losses as full and correct as was possible after the lapse of so many years. Her statement is that this loss amounted to $800.

"The death of her husband left the widow with three young children depending upon her for support. She came to Congress with her claim during the first session of the Forty-third Congress and asked for an appropriation of $600, and a bill giving her this relief was passed in the House of Representatives, but no action was taken in the Senate.

"Since that time her claim has been frequently before the House and a number of favorable reports have been made by the committees which have considered the case. Similar bills have been introduced from time to time in the Senate, but with no final results in any case.

"The claim seems to be meritorious, and the House committees, after careful consideration and, it is to be presumed, on sufficient evidence, having frequently recommended the sum of $600 as fair and just, the committee are disposed to accept that amount as a proper recompense for the loss sustained, without looking for further evidence than that contained in the record.

"The committee therefore recommend that the bill do pass."

The present bill is in the same terms and has the same purpose in view, and the committee recommend that it do pass.

Mr. HOAR. I should like to ask the Senator from Missouri, before the bill is passed over, what is the general law to which he refers?

Mr. COCKRELL. I have sent for a copy of it. There is a general law which authorizes the War Department to consider all these claims. We had an immense number of them pending here at one time.

Mr. HOAR. Will the Senator listen to me one moment? I ought not to have interposed when he was answering my question, but he has answered that he has sent for a copy of the general law. I should like the attention of the Senate for one moment.

This is a case where the papers of this widow were sent to Vice-President Wilson when a member of the Senate and by him lost. The general law only authorizes the War Department to pay proved claims and not to exercise an equitable discretion in regard to accepting other than the ordinary legal evidence. So she could not get relief under the general law. It is a six-hundred-dollar claim of the widow of an officer who, it is said, lost his property because when the flames broke out he neglected his own property and looked after the public property. Proof of that fact was sent to the Senate, and my distinguished predecessor, Senator Wilson, lost the papers. Thereupon this lady came to the committee. They have reported several times that they are satisfied those are the facts, and they have taken, instead of legal evidence, such moral evidence as to the probability of the fact as they could get, including her affidavit, and the committee report that she ought to be paid $600.

I submit to my honorable friend from Missouri that that makes an exception to the principle, which I agree to as much as he does, that we should leave these people to the general law where they come within the general law. It would leave it to my honorable friend's sense of justice.

Mr. COCKRELL. I can not consent. It is a valid law. I have sent for a copy of the law. When I get it, we can ascertain whether the claimant has ever applied to the Department for relief, and if she has not applied to the Department, and the law covers her case, she can get it infinitely more quickly than she will ever get Mr. REED to pass the bill through another branch of Congress.

Mr. HOAR. But the general law does not apply. Let me read this sentence from the report of the committee:

Before his death Osborne applied to the late Vice President Wilson, then a Senator from Massachusetts, for aid in securing relief, and some letters written by him, acknowledging the receipt of the papers, are before the committee. Some of the papers sent to Senator Wilson were subsequently lost or mislaid, and among them an itemized statement of the losses, which, according to the recollection of the widow, was among them. This loss is supplied by the widow, who has submitted a list of the losses as full and correct as was possible after the lapse of so many years. Her statement is that this loss amounted to $800.

It seems to me that that makes an exception to the ordinary case, because the Department can not waive the law for this purpose.

The VICE-PRESIDENT. Is objection made to the present consideration of the bill?

Mr. COCKRELL. The Senator does not seem to have read the report carefully. I have read every word in it. "This loss" of papers "is supplied by the widow, who has submitted a list of the losses as full and correct as was possible after the lapse of so many years."

Mr. HOAR. That is what I read.

Mr. COCKRELL. There is no controversy about the items of the account. I object to the present consideration of the bill.

The VICE-PRESIDENT. The Senator from Missouri objects, and the bill will lie over. The next bill on the Calendar will be stated.

Mr. NELSON. What becomes of the Osborne bill?

The VICE-PRESIDENT. It lies over under objection.

Mr. PASCO. I understand that it goes over without prejudice.

Mr. COCKRELL. I asked a while ago that it might go over without prejudice, and it was still insisted on and I had to object; but if the Senator is willing to let it go over without prejudice, I will withdraw my objection and let that course be taken.

Mr. PASCO. If it does not go over without prejudice, I shall ask that it be taken up notwithstanding the objection.

Mr. COCKRELL. I am perfectly willing to let it go over without prejudice.

The VICE-PRESIDENT. The bill goes over without prejudice.

MARTHA A. BAGWELL.

The bill (S. 1559) for the relief of Martha A. Bagwell, executrix of Sally Hardmond, deceased, was announced as next in order on the Calendar.

Mr. NELSON. I will inquire whether there is any general law covering that case? I would make the inquiry of the Senator from Missouri.

Mr. COCKRELL. The distinguished Senator from Massachusetts [Mr. HOAR] introduced this bill, and he is presumed to know all about it. He can answer if he desires. If not, and if the Senator from Minnesota can show any valid reason why it should not be passed, I would be very glad to hear it. I never object unless I have some reason for objecting.

The VICE-PRESIDENT. Is there objection to the present consideration of the bill?

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill. It proposes to pay to Martha A. Bagwell, executrix of Sally Hardmond, deceased, $4,850, being the balance due said Sally Hardmond on account of her personal services as a nurse in the Bureau of Freedmen, Refugees, and Abandoned Lands, district of Virginia, and for rent of a dwelling house in the city of Richmond, in the State of Virginia, and for one house hired by and used for the purposes of the Bureau, and for money expended by her in and for the Bureau.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

PORT HUDSON FORLORN-HOPE STORMING PARTY.

The bill (S. 1557) to grant medals to the survivors and heirs of volunteers of the Port Hudson forlorn-hope storming party was considered as in Committee of the Whole. It directs the Secretary of War to procure a suitable medal to be presented to the survivors of the forlorn-hope storming party against the works at Port Hudson, La., June 15, 1863, in fulfillment of the promises made by Maj. Gen. N. P. Banks, commanding the Department of the Gulf, and contained in his General Order, No. 49; and in case of decease of such volunteers said medals shall be given to the widow or oldest heir.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

SUFFERERS BY WRECK OF GALLATIN.

The bill (S. 117) for the relief of the sufferers by the wreck of the U. S. revenue cutter *Gallatin* off the coast of Massachusetts was announced as next in order.

Mr. COCKRELL. Let that bill be passed over.

The VICE-PRESIDENT. Objection is made, and the bill will be passed over.

CHRISTOPHER SCHMIDT.

The bill (S. 1464) for the relief of Christopher Schmidt was considered as in Committee of the Whole. It proposes to pay $40 a month for and during the term of his natural life to Christopher Schmidt, of St. Paul, Minn., for injuries received from accidental shot on the rifle range at Fort Snelling July 14, 1892, in quarterly payments, upon such vouchers as the Secretary of the Treasury may prescribe.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

LEGAL REPRESENTATIVES OF JOHN ROACH.

The bill (S. 1115) for the relief of the legal representatives of John Roach, deceased, was considered as in Committee of the Whole. To carry out the provisions of the act making appropriations for the naval service for the fiscal year ending June 30, 1884 (22 Stats., page 477), the bill proposes to pay to the legal representatives of John Roach, deceased, the sum of $28,160.25 for labor and material furnished by the said John Roach in completing the dispatch boat *Dolphin* under the advice and assistance of the naval advisory board mentioned in that act.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

HEIRS OF THE LATE JOHN ROACH.

The bill (S. 1116) to pay the heirs of the late John Roach, deceased, $330,151.42 for labor and material, dockage, and detention and occupation of yards and shops for the gunboats *Chicago*, *Boston*, and *Atlanta* was announced as next in order, and was read.

Mr. BATE. I do not know who introduced the bill, but I think he ought to explain why the large sum of $330,000 is proposed to be appropriated by the bill out of the Treasury. The bill has been up heretofore, I know, and it was perhaps discussed at a previous session.

Mr. CHANDLER. The adjustment of the claim has been very carefully made by a board of officers, and by the committee it has been carefully examined. Nevertheless, as it is a large sum, and members of the committee are not here, I think it quite right for the Senator from Tennessee to ask that the bill may go over.

Mr. BATE. Yes, let it go over without prejudice. I want to examine it.

The VICE-PRESIDENT. That will be the order.

PAY OF NONCOMMISSIONED OFFICERS OF THE ARMY.

The bill (S. 661) to regulate the pay of noncommissioned officers in the Army was considered as in Committee of the Whole.

The bill was reported by the Committee on Military Affairs with an amendment, in line 4, to strike out the date "1896" and insert "1898;" so as to make the bill read:

Be it enacted, etc., That on and after the 1st day of July, 1898, the pay per month of the following noncommissioned officers of the line of the Army shall be as follows: Sergeant-major, artillery, cavalry, and infantry, $30; regimental quartermaster-sergeant, artillery, cavalry, and infantry, $30; first sergeant, artillery, cavalry, and infantry, $30; sergeant, artillery, cavalry, and infantry, $23; corporal, artillery, cavalry, and infantry, $17: *Provided*, That nothing in this act shall be construed to prevent the increase of pay to noncommissioned officers of the Army by reason of longevity service now provided by law: *Provided further*, That nothing in this act shall be construed to increase the pay of noncommissioned officers of the Army on the retired list July 1, 1898.

The amendment was agreed to.

Mr. SEWELL. I would state that a similar bill to the one now before the Senate received the full consideration of the Senate at the last Congress and passed without any objection.

The bill was reported to the Senate as amended, and the amendment was concurred in.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

JOHN STULL.

The bill (S. 660) for the relief of John Stull was considered as in Committee of the Whole. It directs the Secretary of War to revoke and set aside Special Orders, No. 144, paragraph 1, of the War Department, dated April 11, 1864, dismissing from the service John Stull, late captain of Company M, Third Regiment New Jersey Cavalry Volunteers, and to grant him an honorable discharge as of date April 11, 1864.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

CHRISTIAN M. KIRKPATRICK.

The bill (S. 136) to provide for the payment of the claim of Christian M. Kirkpatrick for paving the street adjacent to the United States arsenal at Indianapolis, Ind., was considered as in Committee of the Whole. It proposes to appropriate $6,044.22 for the payment of the claim of Christian M. Kirkpatrick for improving with brick the street known as Clifford avenue from the tracks of the Cleveland, Cincinnati, Chicago and St. Louis Railroad Company to a point 145 feet east of Newman street, including the roadway in front of and adjacent to the ground owned by the United States Government, known and designated as the United States arsenal at Indianapolis, Ind.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

CONTINENTAL FIRE INSURANCE COMPANY AND OTHERS.

The bill (S. 436) for the relief of the Continental Fire Insurance Company and others was considered as in Committee of the Whole. It directs the Secretary of the Treasury to cause the Commissioner of Internal Revenue to reopen and reexamine the refunding claims of the Continental Fire Insurance Company, the Eagle Fire Insurance Company, the City Fire Insurance Company, the Commercial Mutual Insurance Company of the State of New York, the Maryland Fire Insurance Company, the Western National Bank, the Merchants' National Bank, the Chesapeake Bank of the State of Maryland, and the Eastern Railroad Company of the State of Massachusetts for taxes erroneously paid by them and now on file in his office, and to examine and allow such amounts as he may find those companies and banks have paid as a duplicate tax upon the same identical income or profits, and to transmit his allowances to the proper accounting officers of the Treasury for certification to Congress, in compliance with the second section of the act of Congress approved July 7, 1884.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

FRANCIS W. SEELEY.

The bill (S. 659) to place Francis W. Seeley on the retired list of the Army was considered as in Committee of the Whole. It proposes to authorize the President of the United States to nominate and, by and with the advice and consent of the Senate, to appoint Francis W. Seeley, late a captain in the Fourth Regiment United States Artillery, a captain of artillery in the Army, and to place him on the retired list thereof with that rank and pay, the retired list being thereby increased in number to that extent; to suspend all laws and parts of laws in conflict with such action for that purpose only; but from and after his appointment under the provisions of the act no pension shall be paid him.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

BVT. COL. THOMAS P. O'REILLY.

The bill (S. 1594) for the relief of Bvt. Col. Thomas P. O'Reilly was considered as in Committee of the Whole. It proposes to authorize the President of the United States to appoint Thomas P. O'Reilly, late second lieutenant in the Twenty-second Infantry of the Army, a first lieutenant in the Army, and to place him upon the retired list of the Army in his late grade, the retired list being thereby increased in number to that extent.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

ORIN R. M'DANIEL.

The bill (S. 809) for the relief of Orin R. McDaniel was considered as in Committee of the Whole. It directs the Secretary of War to place the name of Orin R. McDaniel, late an enrolled soldier of Company H, Sixty-fourth Regiment Illinois Volunteers, upon the records of that company as enrolled December 26, 1863, and discharged February 14, 1864, for disability, and to grant him an honorable discharge accordingly, as of date February 14, 1864, for disability.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

CHARLES FLETCHER, ALIAS JAMES H. MITCHELL.

The bill (S. 394) for the relief of Charles Fletcher, alias James H. Mitchell, was considered as in Committee of the Whole. It proposes to remove the charge of desertion standing against Charles Fletcher, who served under the name James H. Mitchell as a private in Company H, Ninety-fifth Regiment of New York State Infantry Volunteers, and directs the Secretary of War to discharge that soldier as of the date of July 16, 1865, to which that company and regiment were paid on their discharge.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

JOHN CLYDE SULLIVAN.

The bill (S. 1340) for the relief of John Clyde Sullivan was considered as in Committee of the Whole. It authorizes the President of the United States to nominate, and, by and with the advice and consent of the Senate, to reappoint John Clyde Sullivan a paymaster in the Navy with the relative rank of lieutenant-commander at the foot of the list of paymasters having the relative rank of lieutenant-commander.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

LEGAL REPRESENTATIVES OF JOHN ROACH, DECEASED.

The bill (S. 958) for the relief of the legal representatives of John Roach, deceased, was announced as next in order on the Calendar.

Mr. BATE. I see that that bill is reported by the same Senator who reported Senate bill 1115, and has the same title. In his absence, I think it had better be passed over for the present.

The VICE-PRESIDENT. The bill will lie over.

Mr. BATE. It may be that the bills are the same.

ESTATE OF RICHARD LAWSON.

The bill (S. 1194) for the relief of the estate of Richard Lawson was considered as in Committee of the Whole. It authorizes the administrator de bonis non of the estate of Richard Lawson, late of Baltimore, Md., to sue in the United States Court of Claims for his individual interest as a partner in the late firm of John McFadon & Co., and also the late firm of William McFadon & Co., formerly of Baltimore, Md., on account of French spoliations committed prior to the year 1800, and directs such court to pass upon the facts and law in the case and report the same to Congress.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

DORENCE ATWATER.

The bill (S. 400) for the relief of Dorence Atwater was considered as in Committee of the Whole.

The bill was reported from the Committee on Military Affairs with an amendment, in line 7, after the words "directed to," to strike out "revoke" and insert "annul;" so as to make the bill read:

Be it enacted, etc., That Dorence Atwater be, and he is hereby, relieved and absolved from the effect of the sentence adjudged against him by a court-martial on the 11th day of September, 1865, and that the Secretary of War be, and he is hereby, authorized and directed to annul the order dishonorably discharging said Atwater as a private, general service, United States Army, and to issue to him an honorable discharge from said service, to date from the 22d day of September, 1865.

The amendment was agreed to.

The bill was reported to the Senate as amended, and the amendment was concurred in.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

PUBLIC BUILDING AT ALTOONA, PA.

The bill (S. 1273) for a public building at the city of Altoona, Pa., and appropriating money therefor, was considered as in Committee of the Whole. It directs the Secretary of the Treasury to purchase by private sale or secure by condemnation a site for, and cause to be erected thereon, a suitable building, with fireproof vaults therein, for the accommodation of the United States district and circuit courts, post-office, and other Government offices, at the city of Altoona, in the county of Blair, State of Pennsylvania, the cost not to exceed, for the site and building, complete, $125,000.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

PUBLIC BUILDING AT MAMMOTH HOT SPRINGS.

The bill (S. 422) to provide for the erection of a public building for the use and accommodation of the post-office at Mammoth Hot Springs, in the Yellowstone National Park, was considered as in Committee of the Whole. It directs the Secretary of the Interior and the Postmaster-General to select a suitable site at Mammoth Hot Springs, in the Yellowstone National Park, and cause to be erected thereon a suitable building for the use and accommodation of the post-office at that place, such building not to exceed in cost $10,000.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

PUBLIC BUILDING AT EVANSTON, WYO.

The bill (S. 134) to provide for the purchase of a site and the erection of a public building thereon at Evanston, in the State of Wyoming, was considered as in Committee of the Whole. It directs the Secretary of the Treasury to acquire, by purchase or otherwise, a site, and cause to be erected thereon a suitable building, including fireproof vaults, heating and ventilating apparatus, and approaches, for the use and accommodation of the United States courts, post-office, land offices, and for other Government purposes, at Evanston, in the State of Wyoming, the cost of such site and building complete not to exceed $100,000, not more than $15,000 of which shall be used for the purchase of the site.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

DR. S. A. BROWN.

The bill (S. 377) for the relief of Dr. S. A. Brown was considered as in Committee of the Whole. It proposes to pay $485.47 to S. A. Brown, of Sioux Falls, S. Dak., for services as passed assistant surgeon, United States Navy, during the years 1876, 1877, and 1878, said account having been allowed by the Treasury Department.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

HEIRS OF STERLING T. AUSTIN.

The bill (S. 432) for the relief of the heirs of Sterling T. Austin, deceased, was considered as in Committee of the Whole. It proposes to pay to Florine A. Albright and Missouri A. Pollard, heirs of Sterling T. Austin, deceased, $59,287, being the proceeds of the sale of 360 bales of cotton, the property of Sterling T. Austin, seized by the civil and military authorities of the United States and received into the Treasury, as found by the Court of Claims.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

MISSISSIPPI RIVER BRIDGES AT ST. PAUL, MINN.

The bill (S. 1687) to authorize the construction and maintenance of two railroad bridges across the Mississippi River at or near the city of St. Paul, Minn., was considered as in Committee of the Whole.

The bill was reported from the Committee on Commerce with amendments.

The first amendment was, in section 4, line 4, before the word "feet," to strike out "fifty" and insert "fifty-five;" so as to read:

The main span shall be over the main channel of the river and not less than 300 feet in length in the clear, nor less than 55 feet in the clear above high-water mark.

The amendment was agreed to.

The next amendment was to insert as a new section the following:

SEC. 5. That all railroad companies desiring the use of said bridges, or either of them, shall have and be entitled to equal rights and privileges relative to the passage of trains or cars over the same and over the approaches thereto upon the payment of a reasonable compensation for such use; and in case the owner or owners of said bridges, or either of them, and the several railroad companies, or any one of them, desiring such use shall fail to agree upon the sum or sums to be paid, and upon the rules and conditions to which each shall conform in using said bridges, or either of them, all matters at issue between them shall be decided by the Secretary of War upon a hearing of the allegations and proofs of the parties.

The amendment was agreed to.

The next amendment was to insert as a new section the following:

SEC. 7. That this act shall be null and void if the bridges herein authorized be not commenced within one year and completed within three years from the date of approval hereof.

The amendment was agreed to.

The bill was reported to the Senate as amended, and the amendments were concurred in.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

AMERICAN REGISTER FOR BARKENTINE SHARPSHOOTER.

The bill (S. 1788) to provide an American register for the barkentine *Sharpshooter*, of San Francisco, Cal., was considered as in Committee of the Whole.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

PORT OF ENTRY AT GREAT FALLS, MONT.

The bill (S. 1716) making Great Falls, Mont., a port of entry was considered as in Committee of the Whole.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

THE CENSUS.

The bill (S. 94) to provide for the Twelfth and subsequent censuses was announced as the next business in order on the Calendar.

Mr. COCKRELL. Let the bill be passed over.

The VICE-PRESIDENT. It will be passed over.

LEGAL REPRESENTATIVES OF EDWIN DE LEON.

The bill (S. 1357) for the relief of the legal representatives of Edwin De Leon, deceased, late consul-general of the United States in Egypt, was considered as in Committee of the Whole. It proposes to pay to the legal representatives of Edwin De Leon, deceased, late consul-general of the United States in Egypt, $479.11, being the balance due him on adjustment of his official accounts by the First Comptroller of the Treasury.

Mr. COCKRELL. After the word "Secretary," in line 6, I move to insert "of the Treasury;" so as to read: "Secretary of the Treasury."

The amendment was agreed to.

The bill was reported to the Senate as amended, and the amendment was concurred in.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

PUBLIC BUILDING AT OAKLAND, CAL.

The bill (S. 706) to provide for the purchase of a site for and the erection of a public building at Oakland, in the State of California,

was considered as in Committee of the Whole. It directs the Secretary of the Treasury to acquire, by purchase, condemnation, or otherwise, a site, and cause to be erected thereon a suitable building, including fireproof vaults, heating and ventilating apparatus, elevators, and approaches, for the use and accommodation of the United States post-office and other Government offices, in the city of Oakland and State of California, the cost of site and building, including vaults, heating and ventilating apparatus, elevators, and approaches, complete, not to exceed $350,000.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

BLUE MOUNTAIN IRRIGATION AND IMPROVEMENT COMPANY.

Mr. McBRIDE. I ask unanimous consent to return to the bill (S. 1233) extending the time allowed the Blue Mountain Irrigation and Improvement Company for the construction of its reservoirs and canal in and through the Umatilla Indian Reservation, in the State of Oregon. It was passed over yesterday during my absence from the Chamber.

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill.

Mr. McBRIDE. In line 8, I move to strike out "five" and insert "eight."

The VICE-PRESIDENT. The amendment will be stated.

The SECRETARY. In line 8, it is proposed to strike out "five" and insert "eight;" so as to make the bill read:

Be it enacted, etc., That the time prescribed by the act of Congress approved January 12, 1893, for the construction and completion of the irrigation ditch, or canal, and reservoirs of the Blue Mountain Irrigation and Improvement Company across the Umatilla Indian Reservation, in the State of Oregon, is hereby extended eight years from the date of the passage of said act.

The amendment was agreed to.

The bill was reported to the Senate as amended, and the amendment was concurred in.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

FIRST LIEUT. BENJAMIN W. LORING.

The bill (S. 1337) to commission First Lieut. Benjamin W. Loring a captain was announced as the next business in order on the Calendar.

Mr. BATE. This seems to be a bill to promote an officer from first lieutenant to captain. There ought to be some reason given for it. It may be that the ordinary channels of promotion are open to him. There ought to be some explanation given. I do not see present the Senator who reported the bill, and I think it should be passed over without prejudice.

Mr. COCKRELL. The Senator who introduced the bill is present.

Mr. BATE. The Senator from Maine [Mr. FRYE] reported it.

Mr. PLATT of New York. I could not hear what the Senator from Tennessee said. Will he please repeat it?

Mr. BATE. I do not know who introduced the bill, but it was reported by the Senator from Maine [Mr. FRYE], who is not in the Chamber.

It seems to me from the caption on the Calendar that here is an effort to promote a first lieutenant to a captaincy by a Congressional act, which is unusual. There must be some extraordinary reason for it, and none seems to be given. I should like to have an explanation of the matter, or else let the bill be passed over until the Senator from Maine comes in.

Mr. PLATT of New York. I will say to the Senator from Tennessee that I have not the facts before me. I ask that the bill may be passed over for the present.

Mr. BATE. Very well.

The VICE-PRESIDENT. The bill will be passed over.

PREVENTION OF CRUELTY TO ANIMALS IN THE DISTRICT.

The bill (S. 1063) for the further prevention of cruelty to animals in the District of Columbia was announced as the next business in order on the Calendar.

Mr. COCKRELL. Let the bill be passed over.

The VICE-PRESIDENT. It will be passed over.

PETER VON ESSEN BEQUEST.

The bill (S. 468) authorizing the Commissioners of the District of Columbia to accept the bequest of the late Peter Von Essen for the use of the public white schools of that portion of said District formerly known as Georgetown was considered as in Committee of the Whole.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

REGULATION OF CEMETERIES IN THE DISTRICT.

The bill (S. 467) for the regulation of cemeteries and the disposal of dead bodies in the District of Columbia was considered as in Committee of the Whole.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

ADJOURNMENT FROM THURSDAY UNTIL MONDAY.

Mr. CHANDLER. I desire the attention of the Senator from Alabama [Mr. MORGAN] to a motion which I wish to make at this time. I move that when the Senate adjourn to-morrow it be to meet on Monday next. I make the motion because it is well known that many Senators desire to be absent from Washington Friday for a purpose which everyone will commend. The Senator from Alabama objected this morning to a similar motion when made by the Senator from Massachusetts [Mr. HOAR], the objection being made, I suppose, in the interest of the Cuban joint resolution and with a view to having a time fixed for voting upon it.

It seems to me, Mr. President, if the Senator from Alabama will allow me to make a suggestion, that the best course would be on Monday morning next to ask to have a time fixed for voting upon the Cuban joint resolution. I do not think the friends of the joint resolution ought this week to ask that a time should be fixed. It is due to truth to say that there has not been filibustering against the joint resolution in the ordinary sense of the term or in any sense of the term. When a few weeks ago the Senator from Maine [Mr. HALE] asked that there might be delay upon the joint resolution, he explicitly stated that he was willing at the proper time to agree to a date for voting upon the question. The Senator from Maine renewed that assurance yesterday, and I know of no opponent of the Cuban joint resolution who does not propose to agree, when it is proper for the friends of the joint resolution to ask for it, that a time shall be fixed for voting.

I think the opponents of the joint resolution, so far as appearances hitherto are concerned, should be acquitted of any disposition to delay a vote upon the measure after reasonable discussion. The discussion has been largely conducted by the friends of the resolution, and the Senators who are opposed to it I know intend to allow a vote to be taken upon it in due time. The Senator from California [Mr. WHITE] who has just entered the Chamber and who has spoken upon the resolution has himself said not only that he sympathizes with the Cubans in their struggle for independence, but that he is willing at the proper time to have a vote taken upon the belligerency resolution.

Mr. President, having acquitted, as far as I am concerned, the opponents of the resolution of any intention to delay action upon it, I suggest to the Senator from Alabama not to object to the motion which I now make, and to ask on Monday next, before the tariff bill is taken up, that a time may be fixed for voting upon the Cuban resolution. I will certainly at that time help him to secure a vote upon the resolution. I move that when the Senate adjourn to-morrow it adjourn to meet on Monday next.

Mr. MORGAN. If I have the privilege of speaking upon the motion, by unanimous consent, I would be glad to be heard upon it.

I objected this morning to the consideration to-day of a motion that was to operate to-morrow, for the reason that I had the hope, from the course of debate upon the joint resolution, that we might be able to-morrow to reach a solution of that question, at least one part of it, which, I must insist, I think is intended for delay, and only for delay—that is, the motion to refer the joint resolution to the Committee on Foreign Relations.

With that motion out of the way and a direct vote to be taken on the joint resolution, a great deal of the embarrassment would be removed from this case. The joint resolution, on its merits, is probably stronger than it would be upon the motion to commit, because, say what we may about it, there is a desire on the part of some Senators and others to have a delay in the passage of the resolution. For my part, I think that every day of delay is a day of wretchedness to the people in Cuba, a day of suspense to the people of the United States, and a day of injustice to our own character as a country. Therefore I have desired to try to urge the joint resolution as well as I could upon the attention of the Senate, and I hoped that by to-morrow at least we would be able to reach a vote on the question of committing it to the Committee on Foreign Relations.

I beg to assure the Senate that the Committee on Foreign Relations understand this question to-day as well as they will a week from now, and they understand it to-day better than a great many Senators do here, for the reason that some of the members of that committee, not including myself, have had an opportunity to look over the dispatches. I had the opportunity also, but I did not avail myself of it, to look over the dispatches from our consuls and consul-general in Cuba. They will not say on this floor that the situation as presented by the reports of our consuls is less aggravated, less intense, than that which has been reported by the correspondents of the newspaper press who have gone to Cuba and made personal examination.

The evidence as it has been reported to the committee from the gentlemen who have looked at the dispatches shows that a state of affairs exists in Cuba worse (if it is possible to make a statement of anything that is worse) than that which has been represented by the newspaper press of the United States.

I desire that the motion to commit this measure to the committee shall be disposed of by a vote of the Senate some time this week, say to-morrow evening, and then that would leave us entirely free to go on the expedition to Monticello, in which I wish to participate also, without any embarrassment at all. The Senator from New Hampshire suggests to me that I should let the matter go over really until Monday, and that then I shall ask that a day be fixed for voting.

Mr. CHANDLER. The Senator from Alabama misunderstands me.

Mr. MORGAN. Oh!

Mr. CHANDLER. I am willing the whole of to-morrow shall be devoted to the subject, but I suggested to the Senator to refrain from asking the opponents of the joint resolution to agree to a time for voting until Monday morning, and that Monday morning he should make the request. He may make it to-morrow if he chooses. What I want to do now is to persuade the Senator to consent to have it understood that we shall adjourn from to-morrow until Monday, because if we are going to Monticello we must know it. Now, will the Senator consent to that?

Mr. MORGAN. I have been extremely solicitous, and I think I can claim for myself that I have been patriotically solicitous, to keep the joint resolution out of collision with any political question in the United States. That the tariff is a political question, and that, too, of the severest and most exacting character, I think no one can deny. I have been trying to get a vote upon the joint resolution before the tariff bill was ready for discussion. I do not want to postpone the tariff a second on account of the joint resolution. I do not want to bring up any collision between the tariff bill and the joint resolution. We can not do this country proper justice, nor can we do proper justice to our own motives, if we permit a domestic question of this kind to come in and displace the joint resolution, when we now have the power, and when, I think, it is our duty, to vote upon the joint resolution before a political question intrudes itself.

If we can get a vote on the motion to commit, then we shall understand the whole situation exactly; and if the joint resolution should not be committed, I would have no objection to letting the case go over until Monday, and then asking a time to be fixed for voting on the resolution, except one, and that is that it would bring me into an attitude that I do not wish to occupy, of antagonism to action upon the tariff. Now, why should I be forced into that attitude by the Senate when we have ample time now to avoid it?

Mr. VEST. Will the Senator permit me?

Mr. MORGAN. Yes.

Mr. VEST. The Senator knows that I sympathize with him entirely in his view upon the Cuban question, but he has made an allusion here which I think deserves some inquiry. It has been stated in the public press that three Senators, the Senator from Alabama being one of them, had been invited by the State Department to examine the reports made by our consular agents in Cuba, and that the examination had been made. The Senator from Alabama informs us this morning that he did not participate in that examination. I take it for granted that the other two Senators did.

I submit that the result of that examination ought to be made known to the Senate. I have never seen any authoritative statement as to what General Lee has said about the condition of affairs in Cuba. I have my own opinion, based upon unofficial information, but which I must confess was to a large extent satisfactory to me. Now, may I be permitted to ask the Senator from Alabama whether those Senators were invited there, whether they made the examination, what was the result, and where it is? We are entitled to have it.

Mr. MORGAN. The three Senators were not invited; they were sent by the Committee on Foreign Relations as a subcommittee to confer with the President and Secretary of State. The injunction was imposed upon us that in speaking of this matter in the Senate we should not name General Lee or any other consul; that we should not state the place from which any dispatch was written; that we might give the substance of what the dispatches contained, and no more.

Mr. VEST. Without the authority.

Mr. MORGAN. Without the authority, except to say that it came from consular authority. When the question was asked as to the reason for that, it was because there was apprehension that if the names of these gentlemen were given, they would be massacred in Cuba. Another question was asked, why such an apprehension could be indulged when we had no gunboats and no ships of war in the ports of Cuba; that we had made no provision, so far as I have ever heard, for meeting such desperate consequences from such a desperate and such a depraved people as must be in Cuba if our consuls are expected or it is dreaded that they will be massacred because they have told the truth.

Mr. WHITE. Will the Senator from Alabama permit me to ask him who expressed the opinion that they would be massacred? Was that an official expression?

Mr. MORGAN. Yes; official.

Mr. WHITE. I will ask one further question, with the permission of the Senator from Alabama. Does the Senator understand that the Committee on Foreign Relations has a right to obtain official information directly pertinent to a matter before the Senate and withhold that information from the Senate, when the Senate must act upon the subject?

Mr. MORGAN. I refused to go with that committee and examine the dispatches because of these injunctions. I informed the officials of the Government that I knew enough about Cuba and its situation and its affairs to justify me in my action and in my vote and to convince the Senate and the world that I was standing upon no false foundation or imaginary ground; and I declined to be handicapped with any confidences at all, for after I had received them I could not then be permitted to speak out as a Senator should, without at least the appearance of having violated confidences, which I did not choose to have imputed to me.

So I stand here to-day informed in regard to all the affairs about Cuba as well as any man on this floor. But there are other sources of information besides consuls. There are letters from credible people, and there is that historian that never told a lie—the photograph. I have them now in my desk here, if gentlemen want to examine them, and they show the conditions in Cuba. I have letters from women in Cuba who are not given to lying in regard to the outrages perpetrated upon them and their children. I have all the information I want, and I would not receive from the Executive of the United States any information at all under any injunctions that I could not communicate it to my colleagues on this floor, nor will I ever do it.

Mr. ELKINS. Let me ask the Senator a question. Is it fair to Senators who have to vote on this question that some Senators will have information that they can not impart, and which may control their judgment, while it is denied to other Senators?

Mr. MORGAN. If that be unfair, charge it upon the Executive and not upon me or the country. There we stand.

Mr. ELKINS. As I understand, three Senators know some facts here that other Senators are not permitted to know.

Mr. MORGAN. Two Senators.

Mr. ELKINS. Well, two Senators. Why should two Senators have facts that they are permitted to know and other Senators are not to have them in voting upon a question that is to become a world-wide transaction?

Mr. MORGAN. If the Senator from West Virginia will go to the White House or to the State Department and make that inquiry, he will get an answer that will satisfy him, I have no doubt. It does not satisfy me, but it will satisfy him.

Mr. ELKINS. We ought to have the White House and State Department to communicate all the facts if they want us to act intelligently upon the state of affairs in Cuba. We are entitled to know the facts.

Mr. MORGAN. They have not communicated any facts. On the contrary, on the 29th day of April I asked the Senate to pass a resolution, and it was passed, calling for all the correspondence of the consul-general and the consuls of the United States relating to affairs in Cuba which had been sent to the State Department and not heretofore published. On the 5th day of May I wrote to the Secretary of State, inclosing him a copy of the resolution, and asked him if he expected to comply with it, inasmuch as the Senator from Maine [Mr. HALE] and myself had agreed that on the next Monday we would take up this case for final disposal. The reply was that it would take several weeks to prepare the information.

That to me, I must confess, was rather an astounding piece of information in regard to the imbecility of this Government in furnishing the information to the Senate. I do not know that that excuse was ever before made. And then that it would depend upon whether the President saw proper to make the communication. I have the letter in my desk.

Mr. BURROWS. Let me ask the Senator whether there has been any response to that resolution?

Mr. MORGAN. There has not been and there will not be for six months, if it can be avoided.

The VICE-PRESIDENT. The hour of 2 o'clock has arrived, and it is the duty of the Chair to lay before the Senate the unfinished business of yesterday, which will be stated.

The SECRETARY. A joint resolution (S. R. 26) declaring that a condition of public war exists in Cuba, and that strict neutrality shall be maintained.

Mr. CANNON and Mr. CHANDLER addressed the Chair.

The VICE-PRESIDENT. The Senator from Utah.

Mr. CHANDLER. I now make my motion, which I suppose is a privileged motion, and I ask the attention of the Senator from Alabama to the motion. I move, as a privileged motion, that when the Senate adjourns to-morrow it adjourn to meet on Monday

next. I want to bring the attention of the Senator from Alabama to that precise question and for the moment away from the Cuban question. Does the Senator see any real objection to having that motion adopted at the present time?

Mr. MORGAN. I am entirely indifferent about that. I want, though, to get a vote taken on the motion to commit. Does the Senator object to my having a vote to-day?

Mr. CHANDLER. I say to the Senator from Alabama that immediately after the motion to commit is voted upon, if it is voted down, as I have no doubt it will be, there will be a vote upon the main question. As a friend of the resolution, as good a friend to it as he is, I do not think it advisable to attempt to get a vote this week upon the motion to commit. Therefore I hope the Senator will allow my motion to be adopted.

Mr. MORGAN. I am not aware that any Senator desires to speak upon this subject except the Senator from Michigan [Mr. BURROWS], and he has just informed me that he does not feel disposed to go on to-day.

Mr. FAULKNER. The Senator from Utah [Mr. CANNON] is ready to proceed.

Mr. MORGAN. I was not aware of it.

Mr. CHANDLER. If the Senator from Utah will allow me a word, I am frank to say that I do not think the friends of the resolution are entitled to ask, either to-day or to-morrow, to have a time fixed for voting upon the resolution, unless we are prepared to give up the visit to Monticello on Friday. Therefore I urge the friends of the resolution to let the motion be adopted which I have made. I shall say no more about it.

Mr. VEST. Before this matter passes away, I should like to ask the Senator from Alabama one question.

The VICE-PRESIDENT. Does the Senator from Utah yield?

Mr. CANNON. Certainly.

Mr. VEST. I am not certain that I understood him, and I think he ought to be understood. As I did understand him, a committee or a subcommittee of three members of the Foreign Relations Committee were sent or invited to the State Department.

Mr. MORGAN. They were sent. They were not invited.

Mr. VEST. They were sent by the committee, then, to examine the correspondence with our consular agents in Cuba in regard to the condition of affairs there. Do I understand the Senator from Alabama to say that there were conditions, antecedent conditions, imposed upon that committee or subcommittee that they should not make known the authority upon which their statements were made afterwards, but that they were permitted to go there, and when they went there they were permitted to examine this correspondence, and then retain that information for the committee, not to be given to the Senate? I should like to understand exactly how that was.

Mr. MORGAN. I do not think there was any injunction imposed or attempted to be imposed upon the committee at large in communicating to the Senate what the subcommittee might report to them. I do not understand that. The injunctions that were imposed upon the subcommittee were that the names of consuls who had made the communication to the executive department of the Government should not be mentioned in the Senate and that the places at which the dispatches were written should not be stated. But we were at liberty, as I understand, to give, not copies, but the substance of what our consular agents in Cuba had communicated to the executive department, the reason being, as I have already stated, that there was an apprehension that if the names were given or the places at which the dispatches were dated it would result in the massacre of our consuls.

Mr. WHITE. Has the Senator from Alabama any objection to stating what official of the Government of the United States made that statement?

Mr. MORGAN. Well, both the officials concerned in the matter made the statement—the President and Secretary of State.

Mr. CHANDLER. I ask unanimous consent for a vote upon my motion.

The VICE-PRESIDENT. The Senator from New Hampshire moves that when the Senate adjourn to-morrow it be to meet on Monday next.

The motion was agreed to.

WAR IN CUBA.

The Senate, as in Committee of the Whole, resumed the consideration of the joint resolution (S. R. 26) declaring that a condition of public war exists in Cuba, and that strict neutrality shall be maintained, the pending question being on the motion of Mr. HALE to refer the joint resolution to the Committee on Foreign Relations.

The VICE-PRESIDENT. The Senator from Utah [Mr. CANNON] is entitled to the floor.

Mr. FORAKER. Will the Senator from Utah yield to me for just one moment?

Mr. CANNON. Certainly.

Mr. FORAKER. I think I should state, in addition to what has been said by the Senator from Alabama, that there was no limitation placed by the President or the State Department upon the use by the committee of all the information the State Department is in possession of. We were not denied access to any document on file there. On the contrary, full information was given to us. Great pains were taken to make us fully acquainted with everything in the way of knowledge that was possessed by the officials of the Government. The subcommittee deputed by the Foreign Relations Committee for that purpose has full information. I have not any restriction upon me that I know of, beyond the mere use of names and the making of other statements that might identify persons and lead to excitements, and possibly lead to personal injuries.

I expect to address the Senate before this debate closes, and I am not conscious of any restriction upon me as to the use of all the knowledge (to be used, of course, in an appropriate way) that I have in this matter become possessed of.

Mr. VEST. May I ask the Senator from Ohio a question?

Mr. FORAKER. Certainly, if the Senator will first allow me just a moment. In addition to that, I should state—and I state it only because of what has already been said—that the State Department are now engaged in the labor of preparing, for the use of the Senate, full copies of all the correspondence called for by the resolution recently adopted by the Senate, according to the terms of which resolution all correspondence in regard to the Cuban difficulty is called for which has not been heretofore printed. But it is quite a labor, more than I anticipated, more than I had appreciated, and some little time will necessarily elapse, I understand, before the correspondence is ready for this body. I am not asking any delay so far as I am concerned.

Mr. VEST. I call the attention of the Senator from Ohio to the remarkable statement of the Senator from Alabama, that the President of the United States and the Secretary of State informed the Committee on Foreign Relations that the authority for this information, the names of our consular agents and representatives in Cuba, should not be given for fear it would involve their assassination. Is that so or not?

Mr. FORAKER. No; the statement was not made in just that language, as I recollect it.

Mr. VEST. Was it made to that effect?

Mr. FORAKER. But the President and other officials were apprehensive, I will say, now that the statement has been made, and did so express themselves, that the publication of the correspondence at this time, if not made in a judicious and advised manner, might precipitate violence, and possibly do more harm than good. But there was no disposition upon the part of the President or the State Department to withhold from the committee or from the Senate the substance of all the knowledge they have, or the details either, in so far as they might be essential.

Mr. VEST. But I understood the Senator from Ohio to state distinctly that there was no limitation, in his opinion, upon the information he received. Does the Senator mean to say that it is no limitation when the authority for a statement is not to be given?

Mr. FORAKER. No; I said no limitation except that.

Mr. VEST. Except that?

Mr. FORAKER. Yes, sir.

Mr. VEST. Then I will take the amendment. Now, Mr. President, I come to the serious question, Has the Government of the United States undertaken to send any gunboats or war vessels there to protect the representatives of this Government in the discharge of their official functions? That, it seems to me, is the highest duty of any government upon earth. Are we to be told now that we can not ascertain whether it was General Lee or some other consul or diplomatic representative who made these statements for fear that they will be assassinated? Has this Government come to that low degree of power and protection over its own official representatives that we are to be content with the statement that they might be assassinated if their names are given? That is a most serious question.

Mr. MORGAN. Mr. President, I desire in just a word to put myself in a correct attitude before the Senate and the country about this matter. After the subcommittee had conferred with the President and got permission under these limitations to examine the correspondence, we went to the State Department. The Secretary of State seemed to be entirely reluctant to give the information under those conditions, I thought. He said at first that he would read us the dispatches. It turned out upon an examination that the dispatches were not present in the Department—that they were in the hands of Mr. Rockhill for the purpose, as I understood it, of being edited or arranged in some way. Thereupon Mr. Day, the Assistant Secretary of State, came in and gave us that information.

Mr. Sherman then, addressing himself to me personally, said: "Mr. MORGAN, you will understand that these communications are strictly confidential, and that you have no right to name any of the consuls or the places from which the information was written, at which the dispatches were dated." In reply to that, after

some other little matters occurred between him and myself, I stated to him that I would not receive his communication under any such injunction. Thereupon it was arranged that at night we should meet at the Secretary's house to look at the dispatches. I availed myself of the occasion to write a note to the Secretary and tell him that I would not be there for the purpose of examining them. So I have not seen any of the dispatches, and I rely entirely upon my colleagues for the information that they contain.

Mr. FORAKER. If I may be allowed another word, that statement is entirely correct so far as it goes. But there was one other reason assigned, and the chief reason, as I understood it at the time, the one most in the mind of the State Department and the President, why the correspondence ought not to be given out without some kind of restriction, and that was the fear that it might cut off our source of information.

Mr. MORGAN. That is true.

Mr. FORAKER. That was distinctly stated.

Mr. MORGAN. Yes; that was stated.

Mr. FORAKER. And the other remark was incidental, I think, rather than otherwise, as a part of the conversation that followed. Certainly it must be appreciated in the mind of every Senator that we want to be correctly informed, and that to be so correctly informed our consular representatives must feel free to write the exact truth, and they write it under the understanding that it is all in the nature of a confidential communication to the State Department.

Mr. VEST. May I be permitted to ask the Senator from Ohio what he means when he states that the means of communication between this Government and its representatives in Cuba might be cut off?

Mr. FORAKER. I did not make any such remark as I understand from the question of the Senator.

Mr. VEST. I beg pardon. I might have used the wrong verbiage.

Mr. FORAKER. I misunderstood the Senator. What was in the mind of the State Department, whether justly so or not, was this: They said that if the confidential communications of our consular representatives were to be given out to the public without any restriction or limitation whatever there might be, on that account, some reserve on the part of the consular representatives in communicating with the Government. The Government wants every kind of facts pertaining to the situation, in order that it may be fully advised, and it wants every consular representative to feel that he is writing under the protection of the State Department.

I do not understand that there is anything unusual in the proposition to protect the communications of this Government's foreign representatives. That, I think, has been the practice from the beginning of this Government, and has been the practice of every government.

Mr. WHITE. Can the Senator from Ohio state whether the various communications which are now being edited will, when the edited edition is sent to the Senate, contain the names of the parties who sent the information—the names of the consular agents?

Mr. FORAKER. Yes, sir. What I mean is that every scrap in the way of a communication that may be on file in the State Department will be sent to the Senate, but it will be sent as a confidential communication from the President to this coordinate branch of the Government.

Mr. WHITE. That is proper.

Mr. FORAKER. And we will consider it in executive session. That is the way I understand it.

Mr. WHITE. It should have been considered there before this.

Mr. HOAR. I should like to be permitted to state one fact, if the Senator who is entitled to the floor will allow me.

Mr. CANNON. Certainly.

Mr. HOAR. It is the universal rule, as I understand it, a rule for the protection of the consuls themselves—I do not mean now that there is any reason for any apprehension of violence—that their communications are to be treated as highly confidential, except such as may be in the discretion of the Department given to the public without interfering with the usefulness of the consuls where they are.

It happened a little while ago, during the Administration of President Grant, that one of the most brilliant and distinguished of our ministers to a South American Republic observed in one of his dispatches in regard to an important claim by an American citizen against that country that it was necessary in order to get a legislative appropriation that some expenditure of money must be had.

That was the condition of the legislature of that country, a fact almost as notorious to all mankind as the existence of the country itself. The communication, by a mere accident at the Department, got printed, the matter was called by the minister here to the attention of his Government, and the recall of our minister was demanded; and our Administration had to accede to it as a matter of course. Our minister had done absolutely his duty to his own Government; he had stated a notorious fact; and yet that South American Government had a perfect right to treat that statement as offensive to it, and did so treat it.

Now, if a tithe of what the Senator from Alabama claims to be true, and a tithe of what we all believe to be true be true in Cuba, be put into the report of a United States consul and printed, as a matter of course the recall of that consul would be demanded by Spain, and it could not be otherwise. It seems to me it would be an innovation on the practice of civilized governments to hold that as a matter of course these communications are to be presented and the names of the authors made known to the public at the discretion of anybody except the Secretary of State or the President himself.

We always put into our resolutions a direction to all other Departments of the Government; we deal with the question ourselves whether the Secretary of the Treasury or the Secretary of the Navy or the Postmaster-General should state certain facts; but in regard to everything affecting our foreign relations we address our request to the President as a request, and insert in it "if not in his judgment incompatible with the public interests."

Mr. CANNON. Mr. President——

Mr. VEST. Will the Senator allow me?

Mr. CANNON. I will yield to the Senator from Missouri to propound an inquiry.

Mr. VEST. Just a single question. Unquestionably the Senator from Massachusetts [Mr. HOAR] is correct in regard to the general statement he has made, but I should like to ask him if, in his long experience here, he has ever known a case before when a subcommittee of the Committee on Foreign Relations has been sent to the head of an Executive Department, the Secretary of State, for instance, and had been given certain information with the statement that the author of that information was not to be made known to the Senate? Has there ever before been such a case?

Mr. HOAR. I do not know, but I have no doubt it has been done a hundred times. I should expect that it would be so, that it has happened a hundred times. I have not been on that committee, however, and do not know.

Mr. FORAKER. If the Senator from Massachusetts will allow me, that was not the statement that was made; that was not the restriction at all. There was no restriction imposed by anybody as to giving the names, places, and all details to the Senate, but the restriction was simply put upon making it public property, to be known and read of all men in this country and elsewhere.

Mr. CANNON. Mr. President——

Mr. HOAR. If the Senator will allow me, I wish to make one observation in regard to the order of business.

Mr. CANNON. I yield for that purpose.

Mr. HOAR. I am one of those Senators who desire that there shall be an early vote upon this question. I have never seen any advantage to be gained in postponing it after the time of reasonable debate has exhausted itself. I am especially desirous that it shall be out of the way, because there is other important business now ripe and ready for the action of the Senate, for which this special session of Congress was called, and for which the business men and the workingmen of the country, both alike, are impatiently waiting.

I have not felt disposed, when Senators who have occupied on their side five hours at least, if not ten, to one hour that has been occupied on the other side closed long three or four hour speeches with the demand, "Are you going to filibuster or are you going to delay a vote; and, if not, will you now fix a time when we can vote?"—I have not felt that it was in accordance with my own self-respect to jump up and answer such a question as that in the affirmative. That in substance is what has happened. But I am prepared, for one, to have this matter come to an early vote; and, as an evidence of my sincerity in that particular, I desire to say that I have had in my possession some remarks, which I very carefully prepared, intended to go over the whole question of the authority of the legislative and the executive power in regard to the recognition of belligerency and of independence and of making war, the whole condition of things in Cuba, the effect of resolutions of recognition of belligerency or of independence under the law of nations, our relations to Spain, and the expediency of one or another course of action on this subject; and I have refrained from making those remarks to the Senate for the sole reason that I wanted this thing out of the way so that we might take up the tariff bill.

I therefore hope that our friends who are in favor of these resolutions, when the Senators who shall have something to say upon them in the course of the next two or three days shall have said half as much against them as has been said in their favor, will propose a vote and a time—and I hope they will be polite enough to do it without calling us names when they do it—and I think if they do, they will probably find their desires gratified.

Mr. CANNON. Mr. President——

Mr. GALLINGER. Will the Senator yield to me for a single moment?

Mr. CANNON. Certainly.

Mr. GALLINGER. Mr. President, a little time ago it was agreed that the tariff bill should be taken up on Monday of the present week; but, through the good nature, I take it, of the friends of the bill largely on this side of the Chamber, a delay of another week was granted, and the understanding now is that it shall be taken up next Monday.

We have had under consideration, Mr. President, a simple resolution for forty-nine days in this Senate, which requires only to be read to be perfectly understood. It was introduced on the 1st day of April, and it is now the 19th day of May, and yet the Senate of the United States, acting under those musty old rules it has had almost from its organization, is not ready to vote upon a simple resolution after forty-nine days have come and gone.

Some of us have been found fault with because we have said there was unnecessary delay, and the statement is made by the opponents of this resolution that they have not been accorded an opportunity to present their side of the case. Why, Mr. President, there has not been a day during those forty-nine days that a Senator who was opposed to that resolution might not have had an opportunity to be heard on that question. I think I can say for the Senator from Alabama [Mr. MORGAN], who has occupied some time that no one else was prepared to occupy, that he would cheerfully have yielded to any Senator who desired to present his views in opposition to the views that the Senator from Alabama holds.

Mr. VEST. I beg the Senator's pardon, but does he undertake to say or mean that any of the delay attending the consideration of the tariff bill has come from this side of the Chamber?

Mr. GALLINGER. I do not say anything of the kind, and my language can not be contorted into meaning that; but I did mean to say, Mr. President, that at the end of forty-nine days, with the tariff bill before us, to be taken up on Monday next, we have today deliberately voted—and I believe my vote was the only one in the negative—to leave the city on Friday morning and go down into Virginia and spend Friday and Saturday in a pleasure trip. I had promised myself that pleasure; but I was unwilling to vote to carry out my desires in that respect if it interfered for one single moment with the consideration of the tariff bill, the importance of which is being pressed upon us by the business interests of every city and of every hamlet in the United States. I think we ought to remain here on Friday and Saturday and dispose of this pending resolution, if it can be disposed of, at least to facilitate action upon it, with a view of not permitting this question to come in next Monday to delay and to possibly endanger the passage of the tariff bill.

It is said that on Monday next we shall come to some agreement as to when we shall reach a vote on the pending resolution, but that statement is likewise coupled with the statement that we are to continue to debate this resolution. While we debate this resolution, the business interests of this country continue to suffer, and the laboring men and manufacturers of this country continue to plead with us, to urge us to work and to vote as soon as we can get an opportunity, to pass a tariff law that they hope will bring some relief to the destitution and suffering that now exist.

I desire simply to put myself on record as opposed to taking any pleasure trips or any holidays that would interfere in the slightest degree with the consideration of that great measure which is to come before the Senate on Monday morning next, which ought to be disposed of at the earliest possible opportunity, and which our Democratic friends have assured us over and over again that they do not propose to unduly delay. That is all I desire to say.

Mr. CANNON. Mr. President, I am gratified that I received my lecture from the distinguished Senator from Massachusetts [Mr. HOAR] antecedent to my remarks, and trust that the usual scolding which follows any declaration affirmative concerning this resolution will be omitted subsequent to what I shall say.

Mr. President, jingoism in this country is a fluctuating characteristic. When I had the honor to be admitted to a seat in this Chamber there were, I believe, but three defenders of the then existing Administration; and therefore there were but three anti-jingoes in the Senate. So long as a Democratic President sat in the White House, it was the general impression in this body that no Republican could be quite loyal to his party and the people and the traditions of America unless he outjingoed jingoism; and it was partly upon a promise to do better things toward our duty in the world that the American people reversed their verdict of 1892 and gave to the Republicans a victory in 1896. But no sooner does the triumphant party come to its own than it begins to pursue in this body the tactics which it reprehended when another Administration was in power.

Parties may come and parties may go in their control in the United States Senate and in the affairs of Government in this country, but jingoism among the people of the United States will go on forever. If it be jingoism, Mr. President, to desire that the United States shall stretch out the arm of its power and seize that mad dog, Weyler, the Captain-General of Cuba, the ravisher of women, the assassin of men, the crucifier of children—if it be jingoism to hope that no longer will we write words of cowardice in chapters of American history, then 71,000,000 Americans are jingoes. The remaining 263,000 of our population are, some of them, engaged in trade, in counting houses; a few of them, a very few, thank Heaven, in newspaper offices; and a few, still fewer in number, but, alas, greater in power, are in the Senate of the United States. [Laughter.]

Mr. President, this building should be the very temple of human liberty, and every man in either House of Congress should be a guardian of the ark of freedom's covenant. This place should be the sanctuary to which might come all those who desire refuge. Even pagans have recognized that right of sanctuary. But what have we seen here during these two years? Supplicating, bleeding Cuba bowing before us; and by adroitness and by chicanery, if not by absolute opposition, we have denied to her the right of entrance here.

When I listened on yesterday and the day before to remarks which were made here, I could almost have believed myself a witness of proceedings before the Spanish Cortes. I was reminded on day before yesterday, when a plea was offered in behalf of the commercial interests and the conservatism of the United States in matters of high duty, of something that I saw in New York a year or two ago. A great painting of the Man of Sorrows was on exhibition in a hall. The perspective had been so arranged that after a minute or two of contemplation one could almost fancy that he saw the scene where on the mount Christ taught, where in the garden He suffered His agony, and where on the hill He died that we might live. When I went to leave the building, I looked at the book in which men who had come to view the painting had written their sentiments. There on the open page I saw, inscribed by a man who is now a member of the United States Senate, these words: "O Christ, come back; the money changers are in the temple!" On Monday, when I listened to the money-changing sentiments, I thought, "O Christ, come back; the money changers are in the temple of human liberty!"

We can not stand alone, we are told, Mr. President. Then we have fallen into doddering old age. We could stand alone more than a century ago. We can not stand alone, but must be encrutched by the monarchies of Europe for the support of our faltering and senile steps to the grave. If we can not stand alone, we would better blot out the stripes of white from the flag and place there the yellow of Spain, and the ground of blue from the flag and put in the black of Germany. We can not stand alone! when we are the most prosperous, the most intelligent, the most industrious nation under the sun. The only thing needed to enable us to stand alone, patriotically, politically, commercially, financially, is a little more of the jingoism which has fallen into disrepute in this body since the 4th day of last March.

We can not stand alone! and Mulhall, the English statistician, indulges, in our behalf, in a little of that bluster condemned on yesterday. He says we are the greatest nation under the sun; that we have more energy than Germany, Great Britain, and France combined. It is true, sir, that we have more education than any other nation. We pay more money for our public schools than is paid in Austria and Germany and Italy and Spain and France combined. We have 12,000,000 school children attending 236,000 public schools in the United States. We have four and one-half million farms; we have an annual production of $9,000,000,000 of manufactured products; and with this glorious base upon which to establish our feet, we can not stand alone because we need European capital to come here and further enslave our people. We would better stand alone, weak though we may be, until the end of our work, when God will blot us out, as, in His providence, He has blotted out other failures.

Mr. President, the people of the United States, some of them, want a new tariff bill, and some of them do not; some of them want currency reform, and some of them do not. We were told on Monday what the people of the United States wanted. Almost without exception the people of the United States want a declaration from the Congress of the United States that we are prepared to do our duty, not only toward our own people, but toward all other lands under the sun.

What we need more than tariff laws or currency reform in this country is a revival of a spirit of unity among the people. Sectionalism is deplored, the warring of selfish interests is deplored. Nothing could occur to bring the people of the United States into greater harmony one with another, to restore the feeling of confidence, which is a necessary part of national progress, than for the United States to step boldly into the arena of the world and say, "Within this hemisphere, consecrated from the beginning to human liberty, the United States is paramount, and will guard all the lands which adjoin it from tyranny."

Mr. President, the joint resolution under consideration is not such an one as I prefer. I believe in the resolution proposed by the Senator from Texas [Mr. MILLS], and I should like to vote for it. I believe it is the duty of the United States to establish a

protectorate over the Island of Cuba and to hold it sacred from Spanish domination until the people are fit to govern themselves. I do not propose, because of that radical opinion, as some may term it, to vote against the pending resolution, but rather to vote for it, and if one who is new to the Senate, new to the consideration of these great public questions in a public capacity, may be permitted to allude to the arguments which have been advanced in opposition to the resolution, I shall address myself to a few of them.

The distinguished Senator from Massachusetts thinks that by the passage of this resolution we would do injury to American citizens in Cuba; that if we shall declare belligerency, American citizens resident there losing life and property will not have redress against the Spanish Government. What remedy the Senator proposes was not distinctly stated, but it was a fair inference that the message which he would send to our fellow-citizens in Cuba would be, "Endure, O suffering ones, even unto the death, and we will collect damages for your estates from Spain after you are gone. [Laughter.] You ask us for bread, for liberty, for protection, and we will give your heirs a lawsuit against a bankrupt monarchy."

It certainly can not have escaped the attention of so careful a lawyer as the senior Senator from Massachusetts that the existing situation is that which affords danger to the estates and the lives of American citizens. There will be but one power in Cuba with a right to protect, with a right to assail, and with the property to pay damages, and that will be, in some day not far distant, the Cuban Republic. This is the declaration of the provisional government of that republic in its constitution:

ART. 20. The plantations and property of whatever description belonging to foreigners are subject to the payment of taxes for the revolution while their respective governments do not recognize the rights of belligerency of Cuba.

The estates, the plantations, the other property of American citizens are liable to confiscation at this moment and rightfully, too. If this Republic will not recognize the belligerency of Cuba, and gives her sympathy, and thereby her support, to Spain, the provisional government of Cuba has a right in law and morals to tax, even to the point of confiscation, the property of foreigners to maintain the war against the tyranny of Spain.

I do not share the solicitude of the Senator from Massachusetts as to citizens of this country now denizens of Cuba if the joint resolution shall pass. On that particular point of contention it is enough for me to know that Cubans and Americans desire to have the joint resolution passed and that Spain and Spanish-Americans do not want to have it passed. Just in so far as the joint resolution will give comfort to Cuba, just in so far as it will add to the power of Cuba to resist oppression, just in so far as it will prevent Spain from obtaining blood money in the markets of the world, it will answer the purpose of the American people, and I am for it. I think the joint resolution will pass and that it will accomplish good, and I think that neither the tariff nor any other question will be permitted to prevent a vote in this body upon the joint resolution unless jingoism is dead in all other quarters besides the Republican contingent here.

But these practical reasons failing, Mr. President, we were treated to a dissertation on international law as a reason why we should not vote for a joint resolution of this character. During the brief time I have been in this body I have discovered that every time there is an external right to be asserted by the people of the United States or a wrong to be redressed in our behalf or in behalf of humanity, somebody rises and with trembling voice and bowed frame cries out "international law."

What is international law? By what national legislatures unitedly was international law written? The manner in which the subject is alluded to here might lead us to believe that the slightest act of manhood and national integrity on the part of the United States would call forth from the vasty deep some monster to crush the Republic in its folds. Is international law a gyve upon the hands of a republic and a sword in the hands of a tyranny? International law as used here in this discussion by its advocates is not a barnacle; it is a hissing serpent, and it is the duty of the United States to set its heel upon the serpent's head, according to the commandment, even though we may be bruised in doing it.

If international law binds us, as we were told yesterday, then it is time for the one great nation of freedom to revise the code of international law and make the world accept it in all our relations to the world. Tory was once a name of honor in this land, but it soon became a word of reproach. In later generations, when those who come after us to inherit weal or woe from what we do, shall read the history of these times, perhaps they will think of the international lawyers of America as we now think of the Tories of one hundred and twenty years ago.

When the plea for international law fails, we are edified by instructions as to the Presidential prerogative. The speech of the Senator from Virginia [Mr. DANIEL] was a complete and conclusive answer. But the President has a prerogative. I have not been asked, of course, to advise him, nor have I requested to be his mouthpiece here, but if I had been on terms of desire and opportunity to advise, I should have said before the 4th of March last, "The greatest right, privilege, or prerogative which any President of the United States has had since Lincoln is now with you."

The President of the United States might have said to his fellow-citizens: "In this time, when men are shelterless and foodless and ragged, it is not wise that we should have pageantry; the inauguration of a President is a solemn thing." The personal stateliness surrounding the man who would walk to the Capitol and there take the oath of office would have been more impressive to the American people than all the parade, than all the display, which filled Pennsylvania avenue on the 4th of last March. Then, if the President, immediately after inauguration, had said: "Contemporaneous with or even antecedent to the remedy of ills at home this nation will stop the bloodshed in Cuba," he would have been enshrined in the hearts of his countrymen in an unassailable position. There is ample opportunity for the assertion of Presidential prerogative. If the Senate will do its duty by the joint resolution, and if the House shall pass it, the President of the United States may assert an undisputed prerogative. He may either sign or veto it, and so far as the discussion in this body is concerned that ought to be sufficient.

Mr. President, there is a higher ground than even our right to pass the joint resolution. There is the ground of our duty to pass it. The Senator whose utterances in this body concerning the Army are usually accepted as conclusive tells us we are not prepared for war. We are better prepared for war in the measure of the generations to-day than we are prepared for that deadly, silent disintegration of the Republic which follows fast upon cowardice. If Spain were to declare war against us because of any act of justice on our part, we would be thrice armed.

We owe a duty to this hemisphere and toward all the world—a duty which we must pay. Above international law, above Presidential prerogative, above the fear of war, above the commercial interests of the United States, stands the immutable law of retribution. The people of this country, the inheritors of the free thought of all the ages crystallized for our well-being, can not avoid the solemn obligation which they owe. Senators may plan and men may plot for commercial advantage, but if we fail to discharge the duty which we owe, behind us will stalk unerring vengeance.

Columbus discovered America, we heard the other day. He did not; but that makes no difference to the joint resolution, except by way of corroboratory argument to the idea that we owe a duty to the world. What kept Leif Ericson and the Vikings from making permanent establishment upon this soil? Because in the providence of Almighty God freedom had not grown to such stature in other lands as to make it desirable to open this.

This hemisphere was held sacred through all the dark ages until such time as men had developed their thought and hope so far as possible under monarchies, and then Columbus sailed; the crimson gates of the sunset hemisphere opened wide, and there was established here the tree of liberty which could not grow upon the blood-soaked soil of Europe. It was not the jewels of Isabella which filled the sails of Columbus's ships. It was the spirit of God moving upon the waters to make a new world, to establish man anew in power and in might. In just so far as we fail in the duty which we owe to mankind on this hemisphere, just so far we shall suffer under that law of retribution.

Mr. President, Cuba is lost to Spain. The first place on which the Italian navigator landed will be the last on which she will set her cloven hoof. She will be banished from the island, and with her will go the last tyranny that infests the Western Hemisphere. If we shall do our duty, we shall aid Cuba in throwing off the yoke. Spain has violated every treaty obligation to us. She has made war upon this country. That which she has done by one citizen in the darkness of a dungeon she would have done by all our citizens if she had had the power.

We were told not long since that the cause of Cuban independence was dead and buried. Who was the purse-bearing Judas in America who betrayed it to death and burial? If the Senate of the United States will rise to the wonderful opportunity now afforded for an assertion of the dignity of Americanism, and if the House shall do its part, and if the President, exercising prerogative and right and discharging his obligation to the people of this country, shall sign the joint resolution, and if following them there shall be such aggressive action on the part of the people of the United States as shall serve notice on tyranny that faith is absolved, the American people will roll the stone from the grave away, and Cuban independence will be resurrected to be mighty and powerful, as a further example to the liberty loving of all lands of what the Western Hemisphere can do under the providence of God. [Applause in the galleries.]

The PRESIDING OFFICER (Mr. GALLINGER in the chair). The Chair will inform the occupants of the galleries that the rules of the Senate prohibit manifestations either of approval or disapproval, and if the offense is repeated it will be the duty of

the Chair, through the Sergeant-at-Arms, to have the galleries cleared.

Mr. LINDSAY. Mr. President, I believed it to be the duty of this Government, more than a year ago to recognize the revolution in Cuba as having attained the condition of belligerency, and I believe if that policy had been pursued, instead of a year of cruelty and horrors, the war would have assumed the status of civilized warfare, and the world would not to-day look upon a spectacle which horrifies every eye that is attracted to the unfortunate island.

We were told the other day that it would be an idle act to recognize the belligerency of the Cuban revolutionists; that it would add nothing to their standing, and would subject the American people to difficulties which we ought to avoid. It will not do to attempt to minimize the importance of such a recognition to the struggling Cuban patriots. The American conscience will not accept any such disposition of the question, and, besides, the recognition of belligerency is the first great step to the ultimate independence of the Cuban people.

For nearly three years those people, without resources, have struggled against a power strong enough to have crushed any ordinary insurrection, and although there have been individual expressions of sympathy, not a single power on earth has raised its voice in an authoritative way to give encouragement to the struggling patriots. Let it go forth to the world that the United States has recognized the Cubans as belligerents; let the soldiers in Cuba understand that there is one power on earth which recognizes the fact that they are making war, and that they are not mere outlaws, and a new spirit will be given them, a message of encouragement will go which will induce them to struggle on against adversity until in the end their triumph shall come.

But, independent of this proposition, is it a mere matter of form to acknowledge the belligerency of the struggling revolutionists? What do the law writers, the international-law writers, say upon this subject?

> The recognition of belligerent rights is not solely to the advantage of the insurgents. They gain the great advantage of a recognized status, and the opportunity to employ commissioned cruisers at sea, and to exert all the powers known to maritime warfare, with the sanction of foreign nations. They can obtain abroad loans, military and naval materials, and enlist men as against everything but neutrality laws; their flag and commissions are acknowledged; their revenue laws are respected, and they acquire a quasi-political recognition.

Does this amount to nothing? Does this add nothing to the standing of a struggling people? This acknowledgment establishes the quasi political character of the people engaged in the struggle.

Have we reached that point at which we may safely make this recognition? Is it true, as a matter of international law, that before revolutionists who are seeking to establish their independence and to set up a new government shall be recognized as belligerents they must accomplish all, as I have heard insisted here, that entitles them to the recognition of their independence?

Is it essential that war shall be conducted according to the rules of civilized warfare? Is it essential that flags of truce shall be exchanged? Is it essential that prisoners shall be treated as prisoners of war? If it be, then the parent country can put off for all time the recognition by any foreign government of the belligerency of the revolutionists. Is it necessary that they shall have a civil government, capable of administering municipal law as though peace prevails? Is it essential that they shall show themselves able, the war ceasing, to go on and discharge all the duties which a government owes to its people and to the world?

I maintain that such is not the law and that such was not claimed to be the law until within the last eighteen or twenty years. The question is, Does a state of war exist; have the revolutionists such cohesion, such power that they have organized armies and conducted a war for a reasonable period of time which the parent country has been unable to subdue? When they ask for recognition as war-making power, it is not a question as to what their civil government is or shall be in the future. It is a question whether they have armies, whether they are able to conduct war and do conduct war. I maintain that in almost all the successful revolutions of the world military despotism has denominated the revolution until independence has been virtually secured. Civil government comes not in the war and with the war. Civil government comes as a consequence to a successful war, and it is a misapplication of the rule to say that the belligerent shall never have his belligerency acknowledged until he shall have virtually accomplished his independence.

What is belligerency and when has it been acknowledged by the nations of the world? I read an extract from Abdy's Kent:

> It has been the constant practice of European nations and of the United States to "look upon belligerency as a fact rather than a principle," holding, with Mr. Canning, "that a certain degree of force and consistency acquired by a mass of population engaged in war entitled that population to be treated as belligerent."

If that state of case has been established in the Cuban struggle, then we have reached a point at which we may with propriety acknowledge the belligerency of the revolutionary government, whether it be a civil government or a military government. If the revolutionists so far submit to and support the government they have, as to indicate it is the government they desire, then the question is, Have they an army; do they maintain and prosecute war as wars are usually maintained and prosecuted?

Are 160,000 Spanish soldiers in the Island of Cuba engaged in suppressing not a belligerent power, but in an attempt to keep the peace in the island? The very statement of the proposition carries with it its contradiction. Talk to me about it requiring 160,000 regular troops to maintain order in an island of 1,500,000 people, one-half of whom are confined in cities within the Spanish military lines. If there be no war in Cuba, then the Spanish army is a travesty upon an army. In the history of the world there has been no instance of a mere band of conspirators, or outlaws, or disaffected and lawless people who could maintain against such an army a struggle for two years and a half, as these people have done.

The condition of affairs in Cuba to-day demonstrates that the armed forces of the revolutionists, whether they be guerrillas or regulars, are backed by the people of Cuba. What is the condition of affairs in Cuba? We have had frequent references to the last Administration's want of sympathy with the Cuban movement; yet in December last the President of the United States thus described affairs in that unhappy island:

> The spectacle of the utter ruin of an adjoining country, by nature one of the most fertile and charming on the globe, would engage the serious attention of the Government and people of the United States in any circumstances. In point of fact, they have a concern with it which is by no means of a wholly sentimental or philanthropic character. It lies so near to us as to be hardly separated from our territory. Our actual pecuniary interest in it is second only to that of the people and Government of Spain.
>
> It is reasonably estimated that at least from $30,000,000 to $50,000,000 of American capital are invested in plantations and in railroad, mining, and other business enterprises on the island. The volume of trade between the United States and Cuba, which in 1889 amounted to about $64,000,000, rose in 1893 to about $103,000,000, and in 1894, the year before the present insurrection broke out, amounted to nearly $96,000,000.

What had been the effect upon the material interests of the Island of Cuba up to the time at which this message was written, and what are the duties we owe to that people and ourselves?

It should be added—

Said the President—

> It should be added that it can not be reasonably assumed that the hitherto expectant attitude of the United States will be indefinitely maintained. While we are anxious to accord all due respect to the sovereignty of Spain, we can not view the pending conflict in all its features, and properly apprehend our inevitably close relations to it and its possible results, without considering that by the course of events we may be drawn into such an unusual and unprecedented condition as will fix a limit to our patient waiting for Spain to end the contest, either alone and in her way, or with our friendly cooperation.
>
> When the inability of Spain to deal successfully with the insurrection has become manifest, and it is demonstrated that her sovereignty is extinct in Cuba for all purposes of its rightful existence, and when a hopeless struggle for its reestablishment has degenerated into a strife which means nothing more than the useless sacrifice of human life and the utter destruction of the very subject-matter of the conflict, a situation will be presented in which our obligations to the sovereignty of Spain will be superseded by higher obligations which we can hardly hesitate to recognize and discharge.
>
> Deferring the choice of ways and methods until the time for action arrives, we should make them depend upon the precise conditions then existing; and they should not be determined upon without giving careful heed to every consideration involving our honor and interest or the international duty we owe to Spain. Until we face the contingencies suggested, or the situation is by other incidents imperatively changed, we should continue in the line of conduct heretofore pursued, thus in all circumstances exhibiting our obedience to the requirements of public law and our regard for the duty enjoined upon us by the position we occupy in the family of nations.
>
> A contemplation of emergencies that may arise should plainly lead us to avoid their creation, either through a careless disregard of present duty or even an undue stimulation and ill-timed expression of feeling. But I have deemed it not amiss to remind the Congress that a time may arrive when a correct policy and care for our interests, as well as a regard for the interests of other nations and their citizens, joined by considerations of humanity and a desire to see a rich and fertile country, intimately related to us, saved from complete devastation, will constrain our Government to such action as will subserve the interests thus involved and at the same time promise to Cuba and its inhabitants an opportunity to enjoy the blessings of peace.

That was the view of the last Administration when the last campaign was just beginning. What are the conditions now that that campaign has virtually come to a close? The message which the President sent to the Senate and House the other day discloses. The agricultural people have been driven from their homes; they have been taken captive and carried into the Spanish fortresses and towns, and in the richest country the sun has ever shone upon starvation has set in. The Spanish authorities can not feed their own people, and the President of the United States has asked an appropriation to feed the 700 or 800 Americans who have suffered in this common calamity, or else to take them out from this scene of desolation and starvation.

Now, if these conditions exist just as the rainy season has set in, what will naturally be the conditions when the next campaign commences six months hence? They will be just as they were six months ago; the revolutionists will reoccupy all the country as they did when the present campaign commenced; and the campaign of 1898 will be but a repetition of the campaign of 1897.

It is not whether the belligerency or this revolutionary uprising ought to be acknowledged, but whether the Government of the United States, owing to its contiguity to Cuba and to its past history so far as the Cuban people are concerned, ought not to go at once beyond the recognition of the belligerency and intervene to save the island and the people from utter destruction.

We have made ourselves the sponsor for the Spanish title to Cuba and the right of the Spanish Government to rule over the Cuban people. In 1823 we served notice upon Europe and all the European powers that no other power should ever own Cuba than Spain, and as time progressed we gave assurance to Spain that we would uphold and defend her title against any other power. We are the sponsors for her right to govern these people, and we can not shut our eyes to our duty to see that they be governed and not exterminated. That is the issue we have to meet to-day. It is not a mere question of belligerency. It is not a mere question of temporary policy.

We are to determine the ultimate destiny of the Cuban people. Spain has demonstrated her incapacity or else her unwillingness to give these people good government, and a condition of affairs has been wrought out by the inevitable march of events which proclaims to every people the fact that Spain and Cuba can never live together except the one be treated as a subjugated province and governed by the strong arm of martial law.

This great question has been considered by statesmen who have gone before us. In 1874, while the former Cuban revolution was in progress and after the Government of the United States had refused to recognize the belligerency of the struggling patriots, Mr. Fish, in a letter to Mr. Cushing, our minister at Madrid, in discussing the unfortunate condition of affairs, used the following language:

And, grievous as this inconvenience is to the United States in ordinary times, it is more intolerable now—

The grievance consisted in the inadequacy of the Spanish Government in the Island of Cuba—

seeing that, as abundantly appears, the contest in Cuba is between peninsular Spaniards on the one hand and native-born Spanish-Americans on the other, the former being the real representatives of Spanish force in Cuba, and exerting that force when they choose, with little, if any, respect for the metropolitan power of Spain. The Captain-General is efficient to injure, but not to redress, and if disposed to redress, he may be hampered, if not prevented, by resolute opposition on the part of the Spaniards around him, disobedient alike to him and to the supreme Government.

In fine, Cuba, like the former continental colonies of Spain in America, ought to belong to the great family of American Republics, with political forms and public policy of their own, and attached to Europe by no ties save those of international amity and of intellectual, commercial, and social intercourse. The desire of independence on the part of the Cubans is a natural and legitimate aspiration of theirs, because they are Americans. And while such independence is the manifest exigency of the political interests of the Cuban themselves, it is equally so that of the rest of America, including the United States.

Then the prediction is made in this letter:

That the ultimate issue of events in Cuba will be its independence, however that issue may be produced, whether by means of negotiation, or as the result of military operations or of one of those unexpected incidents which so frequently determine the fate of nations, it is impossible to doubt. If there be one lesson in history more cogent in its teachings than any other, it is that no part of America large enough to constitute a self-sustaining state can be permanently held in forced colonial subjection to Europe. Complete separation between the metropolis and its colony may be postponed by the former conceding to the latter a greater or less degree of local autonomy, nearly approaching to independence. But in all cases where a positive antagonism has come to exist between the mother country and its colonial subjects, where the sense of oppression is strongly felt by the latter, and especially where years of relentless warfare have alienated the parties one from another more widely than they are sundered by the ocean itself, their political separation is inevitable. It is one of those conclusions which have been aptly called the inexorable logic of events.

This was written in 1874. In 1897 we have the same conditions more intensified than they were twenty-three years ago, and we had as well look the truth in the face and recognize the fact that the time has come when "the inexorable logic of events" declares that Spain and Cuba shall separate, and separate forever. The only question is what steps can be with the greatest propriety taken, how far we shall go to-day, and how far we shall forbear to go. Owing to the situation of Cuba, lying as it does under our very feet, with the fact staring us in the face that the Cubans can not live longer under the Spanish Government except as the servile minions of military power, we have reached a point where we can not longer refuse to act.

I have no disposition to force the present Administration to act before it is ready, but I do think the Administration should understand, as the people understand, as the world understands, that the time for action has come, and that that action is to be directed not to the mere temporary cessation of bloodshed which we look upon with so much horror, but to final and everlasting separation between the Island of Cuba and the Kingdom of Spain. In this same letter Mr. Fish, speaking for the President, said:

Withal the President can not but regard independence, and emancipation, of course, as the only certain, and even the necessary, solution of the question of Cuba. And, in his mind, all incidental questions are quite subordinate to those, the larger objects of the United States in this respect.

Emancipation and independence. Emancipation has long since come; independence must and will follow, and it will follow through our intervention, if not without it.

It requires to be borne in mind that, in so far as we may contribute to the solution of these questions, this Government is not actuated by any selfish or interested motive. The President does not meditate or desire the annexation of Cuba to the United States, but its elevation into an independent republic of freemen, in harmony with ourselves and with the other republics of America.

You will understand, therefore, that the policy of the United States in reference to Cuba at the present time is one of expectancy, but with positive and fixed convictions as to the duty of the United States when the time or emergency of action shall arrive. When it shall arrive, you will receive specific instructions what to do.

That was the manner in which General Grant looked at the question of Cuban independence in 1874. These are the words used by his Secretary of State in expressing the fact that he looked forward with expectancy to the ultimate independence of Cuba, and that when the opportune moment should arrive his minister to Spain would receive his proper instructions.

Grant has passed away. A great concourse assembled the other day in New York to do his memory honor. He is but a memory to the younger generation, and yet at this late day we are still hesitating to take the second step in the direction pointed out by General Grant twenty years ago. Emancipation and independence, the two together, to be the fate of Cuba. He lived to see emancipation. Shall not those of his own generation live to see the ultimate independence of that unfortunate island?

The inability of Spain to deal successfully with the revolution has become manifest. It has been demonstrated that her sovereignty in Cuba "is extinct for all the purposes of its rightful existence," the hopeless struggle "has degenerated into a strife which means nothing more than the useless sacrifice of human life and the utter destruction of the very subject-matter of the conflict." We are met with those higher obligations which, in the language of Mr. Cleveland in December last, "we can hardly hesitate to recognize and discharge."

How far we ought to go it is not for me to point out, but that we may go as far as it is proposed by the pending joint resolution to go seems to me clear beyond all reasonable doubt. The recognition of the belligerency of the Cuban insurgents is not an act of war. It is not an unfriendly act to Spain.

I have had difficulties, and I still have difficulties, in regard to the question where this power of recognition lies. I do not agree that it is exclusively an executive power. I see difficulties in the way of its being a legislative power. I do not concede that it is a concurrent power that one branch may exercise to the necessary exclusion of the other. It is rather a power to be ordinarily jointly exercised by the executive and legislative branches of the Government. Generally the executive will take the initiative, and the legislative will go no further in advance of the Executive than to tender its advice and to give assurance of its support in case he chooses to act.

I would much have preferred in this exigency that the preliminary step had been taken by the Executive, but for a year and a half this question has been considered in Congress and out of it, and the Executive has failed to act. I appreciate the anomalous attitude of Congress in declaring a fact, stopping with the declaration of that fact, and sending the declaration to the President, that he may either approve or disapprove of it. But the joint resolution goes further than to declare a fact. If it stopped merely with the declaration that a state of war exists between Spain and those engaged in insurrection against the Government of Spain in the Island of Cuba, and therefore we recognize the belligerency of the insurgents or revolutionists, I would say that was a very difficult proposition to deal with. That would be a mere question of opinion with which the Executive may differ, if he chooses, and I feel that we would be in an awkward attitude in voting by a two-thirds vote, that our opinion should prevail over his.

But the joint resolution does not stop with the declaration of a fact. The declaration of fact may be omitted, and still the joint resolution would provide that the Government shall occupy a position of strict neutrality between the two contending powers and treat each as it treats the other, which amounts to a rule of action prescribed by the lawmaking power which I think will govern the Executive.

Suppose we should provide that a state of neutrality shall exist between these two contending forces and that we will treat them as equals during the continuance of the present war; then it follows that when the Cuban cruiser comes into our ports we shall treat it as we treat the Spanish cruiser. Wherever our people come in contact with those who represent the Cuban government, we will be bound to treat them as we would treat the representatives of the Spanish Government. This rule of action would govern not only the Chief Executive of the country, but all the executive and ministerial officers of the country. None of the difficulties which have been pointed out will follow in case of the overturning of the government of Cuba.

Suppose we recognize belligerency to-day and to-morrow peace

and pacification be established throughout all the Cuban country; then our declaration of neutrality will go for nothing, because the occasion for its exercise will never arise. It was no more necessary that an act of Congress should be passed to raise the blockade of the Southern ports after Lee and Johnston had surrendered, in order to open the blockade, than it would be necessary to pass an act of Congress to declare that we shall no longer act as a neutral between two powers one of which had ceased to exist.

The difficulties are imaginary. Our conduct will change with the change of conditions, and another declaration will not be necessary. So long as the Cuban insurrection maintains itself, so long as it can bring itself in contact with the American Government, just that long this resolution, if it be adopted by the Senate and House of Representatives, will bind the President and bind all our executive and ministerial officers; and the very moment peace be restored to Cuba, whether the war ends by a treaty between the two countries or whether it ends by driving the Spaniards out of Cuba or by the overthrow of the Cuban insurrection, the result will be all the same. The resolution will no longer apply, because the conditions which called for it no longer exist.

There is one other phase of this question to which I must call the attention of the Senate. Can it be said that perfect peace prevails between Spain and the United States, and that we should be reluctant to do that which is right for fear of giving offense to our peaceful neighbor, when the statement is made on the floor of the Senate that our consular officers on the Island of Cuba can not afford to have it published to the world that they have reported the truth in relation to affairs as they there exist for fear of putting their personal safety in danger? In danger from whom? In danger from the lawless Spaniards? Why, sir, the lawless Spaniards are dominated by 160,000 regular soldiers; there is not a Cuban port in which resides an American consul which is not a garrisoned town and subject to the domination of the troops there stationed.

Has it reached the point that the truth can not be told without exciting in the breasts of the people who represent the Government with which we claim to be at peace feelings of resentment to such an extent as that our public officials will be put in danger? If this be true, if there be any reasonable ground for believing this to be true, then we ought to act at once and go further than this resolution provides.

It has been intimated here a half dozen times that the last Administration withheld facts from the Senate because it feared by giving out information it would put our representatives in Cuba in danger; but it was only to-day that the authoritative information came to the Senate that this Administration shares that fear and that this Administration is willing on that account that the legislative branch of the Government shall know the truth only upon condition that the truth be disclosed to it in confidence.

I understand why every fact that comes to the State Department shall not be given out, even to Congress. Communications made by other Governments are confidential in their nature, and ought not to be disclosed without their consent; communications made by our representatives of facts they receive from Governments to which they are accredited ought not to be given out, because that might be regarded as a kind of breach of faith; but when our consul is sent there to look after our material interests, and he is required to report to Washington not that which he learns from the Spanish authorities but that which comes under his daily observation, and those facts are reported to this Government in order that this Government may base its future action upon them, shall we say that such information is to be treated as confidential? Confidential between whom? Confidential not between Spain and the United States, not between the representatives of Spain and the United States, but confidential between this Government and its own agents, to be given out only under such conditions as will protect the reporting agent from danger at the hands of the people and the Government to whom he has been accredited.

I say if General Lee is in danger, or would be endangered by having the public taken into the confidence of the Government as to any fact which he reports from his own knowledge or observation, or if any consul, however humble he may be, would be put in danger because of a report which he makes being given to the public, then the time has come either when our Navy should be sent down to Cuba to protect those agents against violence, which the Spanish Government either can not or will not protect them from, or else they should be required to leave the island and come home, and all diplomatic relations should terminate between this Government and Spain.

I do not advise any such extreme measure as this, but I do think the first step ought now to be taken, and I do think the honor and dignity of the United States require that we shall officially recognize a fact which we all know exists.

Independent of these dispatches, which we have not had the opportunity to read, the messages of two Presidents, the message of December last and the message of May, leave no question about the condition of affairs in Cuba; and that condition of affairs, considered in the light of seventy years of our history, that condition of affairs considered in the light of seventy years of a policy which we had established, and to which we have always adhered, with regard to relations between Spain and Cuba, demands that the first step looking to the ultimate relief of Cuba from the oppressions of a Government that either can not or will not give it good government ought to be taken; and as this is the only tangible step that is anywhere proposed, I am prepared to give my vote for the resolution.

Mr. FORAKER. Mr. President, the question before the Senate is on the motion to refer the resolution of the Senator from Alabama [Mr. MORGAN] to the Committee on Foreign Relations. I have already spoken, briefly, it is true, but, nevertheless, sufficiently to show my favor for that motion.

It has seemed to me that a resolution of this importance, a resolution of the far-reaching consequences of this resolution, ought to take the regular course, meet with thorough consideration at the hands of the Committee on Foreign Relations, and be in the regular way reported to the Senate before the Senate should take action upon it; this to the end that we may have on record as the predicate for our action the report of the committee embodying such facts as they might be able with propriety to present to this body.

Having entertained that view and having expressed that opinion, I did not expect to speak to the merit of the resolution of the Senator from Alabama until after a vote had been taken on the motion to refer to the committee; but, sir, this debate has taken such range and such things have been said in this debate that I now feel that it will be with propriety, at least, notwithstanding I am a member of the committee to which, according to this motion, this resolution should be referred, that I should speak as to the merit of the resolution itself.

And, coming to speak upon the merit of that resolution, I want to say at the outset that I propose to vote for that resolution or some other resolution of kindred character whenever we come to the point of taking a vote.

I want to say further, Mr. President, that, in order that I may support that resolution, it is not necessary, according to my judgment, that there should be any violation by this Senate of any principle of international law. On the contrary, in my judgment, we shall act strictly in accordance with the principles of international law in now taking the step which this resolution provides shall be taken. And I speak at this time upon the merit of this proposition because, in view of that which has been said here, it seems to me very appropriate and important that it should be pointed out that the resolution of the Senator from Alabama, if adopted by this body, will not be adopted in violation of international law, but in recognition and in consistency with the principles of international law.

Mr. President, there are just four ways in which a foreign power, acting at all, can take notice of internal dissensions and disturbances in another country. They are: First, by a recognition of independence; in the second place, by a recognition of belligerency; in the third place, by a tender of friendly offices as a mediator, and, in the fourth place, by the drastic method suggested by the senior Senator from Massachusetts [Mr. HOAR] yesterday—intervention.

No one pretends, I believe—at least I have not heard that any one does—that we could with propriety consider a proposition to recognize independence in Cuba. There can be no recognition of independence until independence shall have been achieved. No one claims that the independence of Cuba has yet been achieved.

So far as mediation is concerned, that, too, may be considered beyond consideration in connection with the consideration of this proposition. We were told yesterday by the Senator from Massachusetts that he believed it to be the duty of this Administration to first propose mediation, and then, if mediation be not promptly accepted, to intervene and compel a cessation of hostilities and the establishment of peace.

The Senator doubtless spoke in ignorance of the fact, which I feel myself, notwithstanding some restrictions that have been adverted to, at liberty to state to the Senate that mediation has been tendered by this Government and has been rejected by Spain. As long ago as April 4, 1896, Secretary Olney addressed to the Spanish Government, through the Spanish minister resident in this city, a communication, a copy of which I hold in my hand, of very considerable length and very great ability, in which he recounted the then existing conditions in Cuba, pointed out the necessity for a cessation of such practices as were then being resorted to in the prosecution of that war, and also pointed out the interests of the United States as prejudicially affected by that war, and, as the result of it all, upon that as a basis for it, tendered to the Spanish Government the friendly offices of the United States Government to secure peace in the Island of Cuba consistent with the dignity and the honor and the continued sovereignty of Spain in that island.

I hold in my hand, also, part of the answer which some two

months later was made by the Spanish Government to that communication. I read from it just one sentence. It is under date of June 4, 1896. The answer is equally as long as the communication of Mr. Olney. In it a great many things were said which I do not feel I should be justified in commenting upon here in public. At the conclusion of the argument he made in behalf of the position Spain took in rejecting that friendly mediation, the Spanish minister uses this sentence:

In brief, there is no effectual way to pacify Cuba, unless it begins with the actual submission of the armed rebels to the mother country.

That, Mr. President, was the end, so far as I have been able to discover, of the efforts on the part of our Government as a friendly mediator. Those efforts came to naught. They came to naught because of the rejection on the part of the Spanish Government of this friendly tender.

Reference was made yesterday to the Republican platform in regard to Cuba——

Mr. HOAR. Before the Senator leaves that point, will he allow me to ask him a question?

Mr. FORAKER. Certainly; with pleasure.

Mr. HOAR. I desire to ask the Senator from Ohio whether the tender of mediation was a tender of the good offices of this Government to secure the independence of Cuba, or whether it was limited to a tender of the good offices of our Government to secure pacification there by the adoption by Spain of certain legislative or other reforms?

Mr. FORAKER. I have not been honored with the attention of the Senator from Massachusetts that I complimented myself I was being honored with.

Mr. HOAR. Yes; the Senator has.

Mr. FORAKER. I stated distinctly that the tender by this Government to the Spanish Government was to use the good offices of this Government to secure peace to the Island of Cuba on terms consistent with the dignity, the honor, and the continued sovereignty in Cuba of the Spanish Government.

Mr. HOAR. If the Senator will pardon me, I understood it exactly so; and I wish to call the attention of the Senator—because the Senator perhaps has not honored me with the attention which I should have deemed a very great compliment if I had received it——

Mr. FORAKER. I did not know that I was bound to be watching the Senator while I was addressing the Senate.

Mr. HOAR. The Senator quoted what I said yesterday.

Mr. FORAKER. Yes.

Mr. HOAR. What I said yesterday was that I was in favor of an offer of mediation of this Government to secure the independence of Cuba. The Senator then, undertaking to take up what I said yesterday and referring to it, objects to that proceeding by quoting an offer to mediate on the terms made four or five months ago or a year ago, an offer to mediate on the terms of the continued authority of Spain; and I asked him to restate the offer in that letter, in order that he might see the distinction between my proposition and the offer of our Government through Mr. Olney. When I said that the honorable Senator had not exactly listened to me, I referred to the remark which he was quoting, and not to what is going on now.

Mr. FORAKER. The Senator from Massachusetts is laboring under a misapprehension when he supposes I did not understand him. I was speaking as to the four ways in which we might take notice of the fact that there was a disturbance, not to use the term war, in Cuba at this time. I had spoken of the fact that independence was not to be considered, for the reasons I gave. I was just now speaking of the fact that mediation was not to be considered properly, because that effort had been made and had been rejected.

I have appealed to the record to sustain me in that respect. What is it the record shows—the letter of Mr. Olney and the answer thereto? It shows that what this Government offered to do was to intervene as a friendly mediator, to secure a peace consistent with the honor, the dignity, and the continued sovereignty of Spain in Cuba. Does the Senator from Massachusetts suppose that the Spanish Government, having rejected that proposition, would entertain one now based upon the proposition that we should become a friendly mediator to secure peace on condition that the Island of Cuba should be given independence?

Mr. HOAR. I do.

Mr. FORAKER. You do? You think Spain would entertain more favorably a proposition that she should abdicate than that she should continue sovereign? I submit to Senators that I need not dwell upon the idea I am seeking to advance, that the greater includes the less, and that, if Spain would not entertain a proposition continuing her sovereignty, we could not expect her to entertain a proposition based on a condition precedent of abdication of authority.

Mr. HOAR. If the Senator will pardon me one moment, I shall not interrupt him again——

Mr. FORAKER. I shall be delighted to have the Senator interrupt me at his pleasure.

Mr. HOAR. I shall say what I wish to say on the general subject after the Senator gets through.

It seems to me, whether reasonably or unreasonably, that Spain now, a year and three months or four months later, might entertain a proposition for intervention to secure independence, or, if she did not, we should have some reason to know where we stood, notwithstanding the fact that she declined to permit the mediation of a foreign country to determine what laws she should make for her subjects.

Now, I conceive it would be a much greater loss of dignity on the part of the United States, if one of our States were in revolution, to permit a foreign government to dictate or suggest what laws we should pass while she continued ours than it would be to suggest the impossibility of our longer maintaining our control at all. So, not only are the two propositions separated from each other by a year and three months of time crowded with important events, but they seem to me, with great deference to my honorable and distinguished friend, to be different from each other in point of acceptability to Spain. However, I will say what I have to say about that later.

Mr. FORAKER. I quite agree with the Senator from Massachusetts that what Spain refused to do a year or more ago she might be willing to do to-day; but is it reasonable—for we are to consider what is reasonable here—taking into consideration her past history with respect to this matter, to expect that a change of mind has overcome her? We must all remember in this connection that when the ten years' war was in progress there the friendly offices of this Government were tendered to the end that peace might be secured, and they were then rejected, but with the reservation that Spain appreciated the friendship manifested toward her by the United States, and would, if circumstances should change later in the progress of that war, avail herself of our friendly offices; but the whole ten years of that fearful struggle passed, and nothing more was heard from Spain.

Now, in view of that fact, and in view of the manner in which these friendly offices were rejected, I for one deem it entirely unreasonable to suppose that Spain would entertain with any more favor now than she did one year ago a tender of the friendly offices of this Government; and I remain yet to be convinced that it would add to the agreeableness, in the estimation of Spain, of this tender if it should be based on the condition of abdication instead of a continuation of sovereignty.

Therefore, to resume the argument I was making, I, for the purposes of the discussion in which I intend to engage this afternoon, consider as beyond our right of consideration here two of the recognized methods of intervention, or taking notice of that which transpires in another country of a warlike character—independence and mediation are to be set aside. There remains but the two other ways I have specified. We can take notice of that condition of things by the recognition of belligerency, according to the belligerents belligerent rights, or we can intervene. It is my judgment, Mr. President, that intervention is the better, the shorter, the more Christian-like way to settle the difficulty in Cuba.

I think the time has come when the United States Government would be justified in saying to Spain that the proceedings which have been there going on so long should, in the name of civilization, in the name of humanity, as well as because of their destructive influences upon our interests, come to a stop, and come to a stop immediately. That is what I think. [Manifestations of applause in the galleries.]

But, Mr. President, the author of this resolution has not seen fit to go so far. He has simply proposed by this resolution that we shall recognize the belligerent rights of the contending Cubans. That does not necessarily involve war. The insurgents in Cuba have no right to demand of us that we give them this recognition, and, on the other side, Spain has no right to complain of our action if we see fit to give it to them. It is an action, Mr. President, which is to be taken at our option, having regard to our own interests, whenever circumstances are such as to justify us in doing so; and when I say whenever circumstances are such as to justify us in doing so, I mean justify us under international law—the international law applicable to such a case.

What are the conditions, Mr. President, that will justify us in adopting the joint resolution recognizing the belligerent rights of the Cubans? According to all international text writers two conditions precedent must coexist. There must be in the first place war in the international sense, and in the second place we must have rights or interests prejudicially affected by that war, and if there be war and if our rights and interests be prejudicially affected, then the only remaining question is one of expediency. Is it expedient to do it? Is it to our interest to do it?

I propose, in the first place, to show that there is war in Cuba within the meaning of international law applicable to such a case. I had not supposed until I heard the discussions in this Chamber that it was necessary to read out of law books on that proposition,

but inasmuch as that seems to be a necessity, I desire to call attention to what is said on this subject by one of the ablest of the writers on international law. I read from Professor Pomeroy's book on International Law at section 280, page 287. After reviewing other text writers who had written on that subject previously, and after distinguishing their various views, he then, as a summing up of the whole argument and as a statement of the condition necessary to constitute war in its international sense, says:

This, then, is the sole criterion. The measures which the parent state uses to repress the rebellion must be something more than the ordinary civil means of arrest and punishment; more than the aid of the civil officers by the posse comitatus; more, even, than the aid of the civil power by the military. The civil means must be for a while suspended, and all coercive efforts must be made by the military arm.

On the other hand, the resistance of the insurgents must be something more than the energies of a tumultuous mob or of unorganized multitudes. The very idea of the resistance amounting to war does demand that the insurgents should occupy some territory which they claim as their own, and over which they exercise some jurisdiction; that these insurgents should be organized into some form of political society, acknowledging some government that exercises over them supreme authority. But it can not be necessary that this government should be anything more than provisional. Finally, the resistance itself must be military in its character.

I might read further to the same point, but without shedding any additional light. The truth of the matter is, therefore, according to this authority—and I submit, without fear of successful challenge, that it is a standard authority, recognized all over the world—it is sufficient to constitute war in the international sense in which we are now using that term when it is required, in order to enforce civil authority, that the military powers shall be invoked in the sense in which the author here describes. Is not that true in Cuba?

Much solicitude has been manifested as to the character of the civil government of the insurgents in Cuba. Has anybody described the civil government of the Spaniard in Cuba? The Spaniard has no civil government in Cuba. He has throughout the island, wheresoever he asserts authority at all, only martial law and military force. There is no pretense of any other kind of government. On the contrary, although it has been said that this is but a paper government, the fact is found and reported to the Senate by the Committee on Foreign Relations, and established also by communications of an official character on file in the State Department, that the insurgent Cubans have a thoroughly organized government, in the sense that they have a written constitution, a president and other officers of state; they have a cabinet; they have all the machinery necessary, if it were only left to itself, to administer the civil affairs of the people and to entitle them to take a place among the nations of the earth.

That is the character of the situation in that respect. What is it in others? We are told we must not rely upon newspaper reports. I am happy in the fact that I do not have to rely on newspaper reports. I have in my hand again the official communication from the then Secretary of State, Mr. Olney, dated April 4, 1896, in which, under all the solemnities of his official position, in the discharge of the high duty upon which he had entered, he describes the existing conditions in Cuba as they had been theretofore made known to him by official communications on file in the Department of which he was the head.

When a newspaper article is referred to, and a Senator says, "I do not choose to believe it," that is his privilege; it is unofficial; it is unauthorized. You may believe it; I may disbelieve it. We may have different opinions about its credibility. But, Mr. President, when the duly authorized agents of this Government in their official communications state facts to us, we are all alike bound to believe them.

Secretary Olney believed that there existed in Cuba the conditions which he described. I shall read only briefly and shall ask permission that this paper, inasmuch as it has never been printed, may be published in the RECORD in connection with my remarks.

The PRESIDING OFFICER. Without objection, that order will be made.

Mr. FORAKER. Secretary Olney says to the Spanish minister:

It is now some nine or ten months since the nature and prospects of the insurrection were first discussed between us. In explanation of its rapid and, up to that time, quite unopposed growth and progress you called attention to the rainy season, which from May or June until November renders regular military operations impracticable. Spain was pouring such numbers of troops into Cuba that your theory and opinion that when they could be used in an active campaign, the insurrection would be almost instantly suppressed seemed reasonable and probable. In this particular you believed, and sincerely believed, that the present insurrection would offer a most marked contrast to that which began in 1868 and which, being feebly encountered with comparatively small forces, prolonged its life for upward of ten years.

It is impossible to deny that the expectations thus entertained by you in the summer and fall of 1895, and shared not merely by all Spaniards but by most disinterested observers as well, have been completely disappointed. The insurgents seem to-day to command a larger part of the island than ever before. Their men under arms, estimated a year ago at from ten to twenty thousand, are now conceded to be at least two or three times as many. Meanwhile, their discipline has been improved and their supply of modern weapons and equipment has been greatly enlarged, while the mere fact that they have held out to this time has given them confidence in their own eyes and prestige with the world at large. In short, it can hardly be questioned that the insurrection, instead of being quelled, is to-day more formidable than ever and enters upon the second year of its existence with decidedly improved prospects of successful results. Whether a condition of things entitling the insurgents to recognition as belligerents has yet been brought about may, for the purposes of the present communication, be regarded as immaterial.

Then he passes on to say that it is the desire of this Government, as I have stated, only to interpose as a friendly mediator; but he does not say, on the contrary, by implication—he plainly says the opposite—that a condition of war does not exist, one that would justify this Government in the recognition of belligerent rights. Now, that was the warlike condition of the island one year ago, when the Secretary of State spoke on the subject, and spoke from official information.

I now have in my hand all that I am allowed to have under the limitations and restrictions which have been imposed upon us with respect to the information that has been given the Committee on Foreign Relations, but it is sufficient to show that all the then Secretary of State said is true, only in a stronger degree at this time. There is no official communication on file in any Department of this Government which is not in harmony with the few lines I shall read; there is no communication which is not confirmatory of all I shall read, and there is so much on file that, as it has been stated in this Chamber to-day, the State Department will be several weeks engaged in the labor of copying and preparing for the Senate the correspondence called for by the resolution which has been adopted. But I say it is all comprised in the little I shall read.

This is of recent date, being only a few days old. It has reference to a proclamation issued by General Weyler, in which he claimed that the entire island, except only the province of Santiago de Cuba, had been pacified; and I call attention now, as I should have done a moment ago, to the fact that it is admitted by Spanish authority that the insurgents have control of the largest of the six provinces of the island, and therefore they have the footing necessary, according to some international law-text writers, to a recognition of belligerent rights.

They are not only in possession of the larger part of that province, but let me say further, while it is in my mind, that the official information of this Government sustains that which has been said unofficially, that the government which it is claimed exists only on paper has a postal system in operation with a high degree of success under the trying circumstances attending the operation of such a system. It has a fiscal system more satisfactory, measured by the results in money in the treasury, than was the fiscal system of the thirteen colonies during the war of the Revolution.

I now wish to read what I referred to a moment ago:

I can not understand the truth of the claim that all the provinces of the island are in the main pacified, except that of Santiago de Cuba, because there are more insurgents under arms at this time than—

I will leave out a word or two here to avoid identification—"than there were" will give the sense of it—

ten months ago.

That would carry you back to the time when Secretary Olney wrote:

I do not think it is a fair inference to draw from existing conditions that the war is approaching a termination—

This writer does not hesitate to say there is war, and to use the term—

because in pursuance of an established policy the insurgents avoid as far as possible all serious engagements. The impossibility of expelling the Spanish troops from this island by force of arms is well known to them, and they do not propose to risk the lives of their men and the success of their cause upon one or more pitched battles. I conclude, therefore, that the war will drag its weary length along so long as the insurgents can dig sustenance from the ground on the one side, or money be obtained by the other, with the continued result of untold human suffering, loss of human life, the murder of innocent men, women, and children.

There is more that I might read to the same effect.

The Senator from Minnesota [Mr. DAVIS] calls my attention quite properly to the fact that in a communication other than the one from which I read, but a communication with which the Senator is familiar, the organization and the number of troops of each and every province is given in a detailed way, and in such a way as to show beyond all controvertibility that there is not only in Cuba perhaps more than 40,000 men under arms, but that they are distributed over the island throughout all the provinces, each having its own army, and that the army of 40,000 men, now an army of veterans, is armed chiefly with repeating rifles; that it is organized not only into companies, but also into regiments, brigades, divisions, and corps, thoroughly officered and thoroughly disciplined.

Not only that, but they tell us further that the troops and the insurgents throughout the island are to-day not only stronger, but that they are more encouraged, more hopeful, more determined on ultimate and triumphant success than ever before in the history of the insurrection.

Mr. WHITE. Will the Senator from Ohio yield for a question?

Mr. FORAKER. Certainly.

Mr. WHITE. The Senator from Ohio is a member of the Committee on Foreign Relations. I desire to ask him whether it is contemplated to give to the Senate the information to which he alludes, and which he now says he is prevented from disclosing because of an injunction of secrecy imposed, presumably, by the State Department.

Mr. FORAKER. If I had my way about it, I would give it to the world before to-morrow morning. [Applause in the galleries.]

The PRESIDING OFFICER rapped with his gavel.

Mr. FORAKER. But what will be done about it further I do not know. I know simply that we are possessed of certain information, controlled by certain limitations and restrictions, and beyond that I can not state, except as I have already stated in the progress of this argument, that I have been informed by the State Department that they are now engaged in the work necessary to enable the State Department to comply with the resolution of the Senate requesting all the correspondence on the subject.

Mr. WHITE. I merely wish to call attention to what I consider to be the right of the Senate to any information possessed by its Committee on Foreign Relations. Of course, as to whether it is to be disclosed in executive session or publicly is an entirely different matter. I think we ought to have the information, so that we may judge for ourselves, as the Senator is able to judge for himself, with respect to the facts.

Mr. FORAKER. I think so, too, and I will not for a minute stand in the way of the Senate having it in executive session or otherwise when the proper time comes. But I am not the judge, and I have not any disposition to criticise anybody who is a judge, of what should be done or what is to be done in that respect. I can only give the Senator the benefit of what information I have.

So, therefore, without pursuing the matter further, I think we are safe in concluding that there is war in Cuba. As was said by the senior Senator from Kentucky [Mr. LINDSAY], when speaking a few minutes ago, the Spanish Government has sent into that island for the suppression of the insurrection, as they call it, nearly 200,000 drilled and disciplined veterans of the Spanish army, a greater military force than the combined armies of Grant and Lee in the battles of the Wilderness, and yet we are told that it is a debatable question whether or not there is war in Cuba.

I am not speaking about the effect upon this question of the action already taken by the Executive. Surely it is not a condition of peace that prevails in an island only 90 miles distant from our shores when six to eight hundred American citizens, in company with thousands of the natives of the island, are impounded like so many cattle, there to be literally and purposely starved to death.

Mr. ELKINS. Let me ask the Senator from Ohio where is the proof of the fact that they are impounded?

Mr. FORAKER. The proof of that fact is on file in the State Department, and it was upon that information that the President acted when he sent the message.

Mr. ELKINS. We do not know it officially in the Senate.

Mr. FORAKER. I tell it to the Senator officially.

Mr. ELKINS. We do not take it from you officially. We do not take facts from another Senator. Each Senator has his rights here——

Mr. FORAKER. Certainly.

Mr. ELKINS. Equal as to every other Senator.

Mr. FORAKER. It is in the message.

Mr. ELKINS. What message? It does not say they are impounded, to be starved to death. The President of the United States said nothing of the kind. The Senator from Ohio said that.

Mr. FORAKER. I will say it to the Senator, and he can go to the State Department and ascertain it, as I have done, or he can wait until the State Department sends it here. If he has any compunction about receiving it at my hands, he is not bound to, I suppose. But I state it as a Senator who obtained his information in the performance of a duty.

Mr. ELKINS. Let me ask one other question. Will the Senator pardon me?

Mr. FORAKER. Certainly.

Mr. ELKINS. Does each one of us have to walk up Pennsylvania avenue to the State Department, be admitted there, with the blinds pulled down, while the Secretary of State tells us to hush, and have to come back to the Senate and get up and proclaim that we have these facts? Is that the way we get facts from the State Department or from the Executive?

Mr. FORAKER. I have not been a member of the Senate long enough to give the Senator from West Virginia the information.

Mr. ELKINS. Why do you not report those facts as all other resolutions or bills are reported upon from the Foreign Relations Committee? You belong to the committee. You have facts that I do not have.

Mr. FORAKER. Yes.

Mr. ELKINS. Are you afraid to assemble those facts and put them before us? This is a great transaction. The world is looking on. We are asked to vote without a fact in the world being submitted. We are asked to vote upon what Senators on the Foreign Relations Committee learn by going to the State Department. Hid away in a room, they get the facts, and, slipping out, they come to the Senate and dole out this information, and then say "filibuster" if we do not vote right off, blindly and without the facts.

Mr. FORAKER. The Senator should not use the term "filibuster" with respect to myself.

Mr. ELKINS. I have heard that word used.

Mr. FORAKER. I am on the side that is asking the reference of the joint resolution to the committee. The Senator from West Virginia certainly could not have been in the Chamber listening during the whole of my remarks. What I said at the outset was that I had not purposed to speak on this question until a vote had been taken upon the motion to refer, and if the resolution shall be referred, as I have hoped it might be, it is my purpose then to speak in support of the report we may make. I said I desired a reference in order that the matter might take the usual course and in order that we might present to the Senate the facts which I am giving now, not by way of report from the committee, but as a Senator in the discharge of my duty. Of course the Senator is not bound to accept any statement I may make, but he should not become irritated about it when he has the delicious privilege of rejecting it. [Laughter.]

Resuming my argument, I assume that the first of the two conditions precedent to the recognition of belligerency, namely, the existence of war, does exist.

Now, the next question is whether or not the rights and the interests of the United States are so prejudicially affected thereby as to justify us in taking any notice of it. All text writers are agreed that if there be rebellion in a country with which we have no transactions, or a rebellion that does not in any way whatsoever affect us, there would be no justification in our taking any note of it; but, on the other hand, all text writers are in accord that when we do have rights and interests that are prejudicially affected, it is not only our right, Mr. President, but our duty to act, and to act seasonably, in the language of the text writers. The question is whether or not our interests and rights are affected.

Let me recur to an authority which those who are opposing the resolution of the Senator from Alabama should not dispute. I read again from Secretary Olney. I read from him now as to the interests of the United States which are affected by the war. He says:

> The situation thus described is of great interest to the people of the United States. They are interested in any struggle anywhere for freer political institutions, but necessarily, and in special measure, in a struggle that is raging almost in sight of our shores. They are interested, as a civilized and Christian nation, in the speedy termination of a civil strife characterized by exceptional bitterness and exceptional excesses on the part of both combatants. They are interested in the noninterruption of extensive trade relations which have been and should continue to be of great advantage to both countries.
>
> They are interested in the prevention of that wholesale destruction of property on the island which, making no discrimination between enemies and neutrals, is utterly destroying American investments that should be of immense value and is utterly impoverishing great numbers of American citizens. On all these grounds and in all these ways the interest of the United States in the existing situation in Cuba yields in extent only to that of Spain herself, and has led many good and honest persons to insist that intervention to terminate the conflict is the immediate and imperative duty of the United States.

And then he goes on to say that he does not now propose to discuss the question of intervention, but only the question whether they will permit the United States to act as a friendly mediator.

But, Mr. President, not to detain the Senate unduly, if I have talked to any purpose thus far, I have shown that war exists by authority that no Senator has a right to question, because it is official; and I have shown, also, that interests and rights of the very highest character, property rights, commerce rights, the right to life and liberty, all are prejudicially affected by the war that is proceeding in Cuba. If these things be established, then there remains, as I said a while ago, but one further general question, and that is whether it is expedient for us to adopt the pending resolution.

When we come to the question of expediency, it is, according to the text writers, more a question of politics than of international law, but it is one of those political questions that international law deals with. Being a question of expediency, it is right and proper that we should answer (for in that lies the whole controversy) the question propounded by the senior Senator from Massachusetts [Mr. HOAR] when, yesterday at the conclusion of the address of the Senator from Illinois [Mr. MASON], he made an inquiry as to what would be the result. I can not give his language exactly, but he is watching me so intently that I believe I will read it. I said he put it as an inquiry. He did

not. He put it as a statement of his opinion as to the result. He said:

The only effect of that resolution—

Referring to the joint resolution of the Senator from Alabama—

which is to be interpreted, and must be, and is meant to be, by "that ancient barnacle, international law"—

It is fair to the Senator from Massachusetts that I should say that is a quotation [laughter]—

is that it declares that while the present condition of things continues Spain may search our ships at sea at her discretion, and that our citizens on that island who suffer from lawlessness there shall have in the future no remedy or recompense against Spain whatever; and that is the whole of it.

In other words, Mr. President, we are told that the legal results and consequences that will flow from the adoption of the resolution will be, first, a right of search conferred upon the Spaniard with respect to our merchantmen on the high seas, and, secondly, a release of Spain from liability to make reparation.

Mr. HOAR. From the acts of the insurgents.

Mr. FORAKER. Now, let me speak briefly upon that point. It is true that these are two of the consequences that would result, but not in the unlimited extent stated by the Senator. It is true that from the moment the joint resolution is adopted and signed by the President, and thus given effect—from the moment there is recognition of belligerency, in other words—we do release Spain from liability to make reparation to us for losses incurred by American citizens in that island because of the acts of the insurgents.

That is true. But, Mr. President, I do not regard that as a serious loss. I have been to the State Department upon that subject as well as others. I find in the State Department, as any Senator can find, that claims are piled up there amounting to many millions, preferred by this Government against the Spanish Government in behalf of American citizens in Cuba whose property in Cuba has been destroyed by the insurgents. I find, furthermore, that in each and every instance of the presentation to the Spanish Government of such a claim there has been a long, prolonged diplomatic correspondence, winding up in the end, without an exception, in every case, with a flat final repudiation by Spain of the claim and a refusal to pay it.

To begin with, therefore, Spain does not recognize any such claims. In the second place, it is a fact notorious to all that if she did recognize them she is not able to pay them. I do not think there is much loss in releasing Spain from liability to make reparation to American citizens. On the contrary, Mr. President, I say it in all seriousness, I would rather have the obligation of the insurgents of the Republic of Cuba than the obligation of Spain. [Applause in the galleries.]

The PRESIDING OFFICER. The Chair again reminds the occupants of the galleries that a violation of the customs of the Senate in making manifestations of either dissent or assent will be followed by the clearing of the galleries. Those who occupy the galleries will please bear this in mind.

Mr. FORAKER. Now, as to the other disagreeable result that would flow from this action. We are told, as though it was some terrible thing, that a recognition of belligerency would instantly confer upon Spain a right of visit and search of American merchantmen upon the high seas. That is true. But what is this right of search? Is it, as the Senator from Massachusetts yesterday said, a right that is to be exercised without limitation; that, to give his own language accurately, "Spain may search our ships at sea at her discretion?"

No, Mr. President; according to international law no such right as that is conferred upon Spain. The right that is conferred upon Spain is the right to hail, to stop, to board, with one officer in the first instance, any merchantman of our country traveling on the high seas, respectfully to request an examination of the ship's papers, and make such other examination, the character of which is well described in all international law, as may be deemed necessary to determine whether there are on board that ship any contraband goods of war. What are contraband goods of war?

In the absence of any specific naming of contraband goods, such as is customary in treaties between countries, there is much discussion in the authorities as to what are contraband goods of war. But in the treaty between this country and Spain we are told what are contraband goods of war. I read from the treaty between Spain and this country of 1795, Article XVI:

This liberty of navigation and commerce—

Which in preceding sections has been described—

This liberty of navigation and commerce shall extend to all kinds of merchandises, excepting those only which are distinguished by the name of contraband; and under this name of contraband or prohibited goods, shall be comprehended arms, great guns, bombs, with the fuses, and other things belonging to them, cannon-ball, gunpowder, match, pikes, swords, lances, spears, halberds, mortars, petards, granades, saltpetre, muskets, musket-balls, bucklers, helmets, breast-plates, coats of mail, and the like kind of arms proper for arming soldiers, musket-rests, belts, horses with their furniture, and all other warlike instruments whatever.

In other words, Mr. President, there could be no question here as to whether clothing on board the ship was contraband goods of war, as has so frequently been discussed as to character of an article of that kind when found by the exercise of the right of search. Nothing is contraband of war except only arms and munitions of war, to state it concisely.

Now, it is true that just so soon as we recognize the belligerency of the insurgents, if we do, Spain will have the right to hail and detain our ships until she may have examined the ship's papers to determine whether there are any contraband goods on board destined to the belligerents. I quote upon this subject from Lawrence, upon The Principles of International Law, a book very recently issued, but one that is very ably written. Having spoken of the right, and stating that it is the duty of the ship desiring to exercise the right of search to hail the merchantman, the author proceeds:

Assuming that the summons of the belligerent cruiser is obeyed, the next step taken by her commander is to send an officer in uniform on board the vessel to be searched. The visiting officer should question the master of the vessel and examine her papers. If any circumstances of suspicion are revealed by his examination, but not otherwise, he is at liberty to call his boat's crew on board and order them to make a thorough search of the vessel. Should the search confirm the suspicions, the commander of the cruiser may take possession of the ship, secure her papers, and hold her master and crew as prisoners. But throughout his proceedings he is bound to use courtesy and consideration, and to carry on the search with as little disturbance as possible of the interior economy or navigation of the suspected vessel.

The regular course is to send her to the most accessible prize court of his own state for adjudication. If the grounds on which the capture was effected turn out to be good, condemnation will ensue, and the captors will receive the proceeds of the sale of the captured property in the form of prize money. If the evidence against the vessel is not conclusive in spite of circumstances of just and reasonable suspicion, she will be released, but her owners will have to bear the expense of detention and delay. But if the capture was effected on frivolous and foolish grounds, the officer responsible for it will be condemned in costs and damages.

In other words, Mr. President, there is no liability to the right of search upon the part of any American merchantman who does not carry contraband of war, and there is no contraband of war under the treaty between the United States and Spain except only arms and munitions of war, and the arms and munitions of war that are contraband under that treaty before the merchantman shall be subjected to liability to the right of search shall be shown to be destined to the insurgents. When there is this right of search, if there be no contraband on board there is not anything disagreeable about it. It is the delay of only a few minutes. International law says the officer boarding the American merchantman will have to be considerate and courteous, and I think he would be.

Mr. ELKINS. May I interrupt the Senator from Ohio?

Mr. FORAKER. With pleasure.

Mr. ELKINS. How long do you think you could avert war if you allowed the Spanish Government to overhaul one of our merchant ships and have her examined, and certainly if they made a mistake? With all the war feeling there is in the Senate and out of the Senate, I tell the Senator he invites us to this very result of war.

Mr. FORAKER. Certainly not.

Mr. ELKINS. It follows logically, when we recognize belligerency, that Spain has a right to search our ships, and that means war, and that is the way to bring on war, too.

Mr. FORAKER. If the record were to show that there are 100,000 armed men in Cuba constituting the insurgent army and a civil government as firmly established as was the civil government of the Southern Confederacy in its capital at Richmond, the Senator would yet say, "We will not recognize belligerency, because the right of search will be conferred, and that means war."

Mr. ELKINS. But, if the Senator will allow me, there is no proof before the Senate proving it in the way you say, by information from the State Department, that there is any hundred thousand men firmly established and intrenched as was the Southern Confederacy. A comparison between Cuba and the Southern Confederacy is a travesty.

Mr. FORAKER. I have not said there are 100,000 men in the Cuban army—I was illustrating—but there are 40,000 men in that army. The Senator is bound to accept without question the official statement of officers of this Government. I have read to him here in open Senate in the course of these remarks the official statements of the Secretary of State made more than a year ago, and I have read to him an extract from an official statement that has been confirmed over and over again, as he can learn by a recurrence to the files of the State Department.

Mr. CHANDLER. Mr. President, will the Senator from Ohio allow me a moment?

Mr. FORAKER. Certainly.

Mr. CHANDLER. I should like to inquire of the Senator from West Virginia where he obtained the facts upon which he voted a year ago, upon the yeas and nays, for a resolution in exactly the same terms as the resolution now before the Senate?

Mr. ELKINS. I had some assurances that I found out were not true when I investigated the facts. They were newspaper

reports, I will tell the Senator from New Hampshire; they were not facts which were brought into the Senate. Now, what do we appeal for and beg for? If the Senator from Ohio will allow me, I will state that the Senator from Massachusetts [Mr. LODGE] got up here on behalf of the Committee on Foreign Relations and begged that the resolution be referred to the Committee on Foreign Relations, that we might have a report. Now, report the facts, if you have got them. A Cuban officer belonging to the insurgents says that the facts are not the same that they were a year ago; that there have been great changes.

Mr. CHANDLER. Then the Senator has changed his mind since a year ago?

Mr. ELKINS. I have not said I did; not at all. And, Mr. President, allow me to say this is the hardest way I ever heard to prove a war. We know that there is a war going on between Turkey and Greece.

Mr. FORAKER. How do you know?

Mr. CHANDLER. How do you know it?

Mr. ELKINS. It is all over the world. But here you twist the President's message for relief. One Senator argues it in one way. Another Senator says, "I have been admitted into the sanctum sanctorum of the State Department, and I have got it; you must take it from me; and if you do not want to take it from me, you must leave it alone." Where are the facts?

Mr. FORAKER. I hope the Senator from West Virginia will not interrupt me further with a mere repetition of questions that I have answered two or three times already.

The PRESIDING OFFICER. The Senator from Ohio declines to yield further. The Chair will suggest to Senators that under the rule they can only interrupt a Senator on the floor by asking permission through the Chair. The rule will be observed in the future.

Mr. FORAKER. Now, referring to the statement made by the Senator from Massachusetts [Mr. HOAR] yesterday, that the whole result of a recognition of belligerency was to confer upon Spain the right of search and release her from liability to make reparation, that and nothing more, to quote his exact language, I desire to call attention to another fact. What, Mr. President, is the attitude of this Government toward the insurgent Cubans now? It is one of absolute refusal to give them any recognition whatever. We as a Government know only one people, one Government, one authority on the Island of Cuba. That being the case, when a Cuban comes into this country, I would say to the Senator from Massachusetts, if he comes to act with respect to insurgency in Cuba, he comes here subject to the municipal laws of the United States. The policing of our seacoast that was referred to by Senators in the debate yesterday was in pursuance of and in recognition of that fact and in accordance with the proclamation of the President of the United States.

I desire to call attention in this connection to the proclamation issued by Mr. Cleveland, as President, June 12, 1895, and to read a part of it. He said:

Whereas the Island of Cuba is now the seat of serious civil disturbances accompanied by armed resistance to the authority of the established Government of Spain, a power with which the United States are and desire to remain on terms of peace and amity; and

Whereas the laws of the United States prohibit their citizens, as well as all others being within and subject to their jurisdiction—

"All others" are the Cubans—

from taking part in such disturbances adversely to such established Government—

That is, our municipal laws prohibit Cubans from coming here and being kept from taking part adversely to the authority of Spain—

by accepting or exercising commissions for warlike service against it, by enlistment or procuring others to enlist for such service, by fitting out or arming or procuring to be fitted out and armed ships of war for such service, by augmenting the force of any ship of war engaged in such service and arriving in a port of the United States, and by setting on foot or providing or preparing the means for military enterprises to be carried on from the United States against the territory of such Government—

The Government of Spain—

Now, therefore, in recognition of the laws aforesaid and in discharge of the obligations of the United States toward a friendly power, and as a measure of precaution, and to the end that citizens of the United States and all others within their jurisdiction may be deterred from subjecting themselves to legal forfeitures and penalties, I, Grover Cleveland—

Do command that you do not do these things so prohibited—not taking the time to read the proclamation through to the end.

Now, the laws to which he refers, in pursuance of which he makes the proclamation, are entitled our neutrality laws, and they will be found at section 5281 of our Revised Statutes et sequitur. If you will recur to those sections and read them, you will find that the prohibitions are throughout against any action being taken by anybody in this country that is in the nature of hostile action against the Government of Spain in the Island of Cuba.

I answer again the inquiry made by the Senator from Massachusetts yesterday. You will remember what it was. He appealed to the Senator from Illinois to know what earthly benefit could result to the insurgents of Cuba from a recognition of their belligerency. I will tell the Senator from Massachusetts. The first result will be the substitution of international for municipal law to govern all who are interested in Cuba while they are here in the territory and in the jurisdiction of the United States.

Mr. WHITE. Mr. President——

Mr. FORAKER. I will tell it to you in a plainer way, if you will bear with me a minute. The insurgent in Cuba to-day, in the absence of the recognition proposed by this joint resolution, is but a traitor on land and a pirate on sea. He is shot like a dog when captured on shore, instead of being treated as a prisoner of war. If they had a battle ship, and he were on her and captured, he would be hanged at the yardarm as a pirate. And here in our country he is known only as a violator of our municipal law, and denied all recognition under the law of nations. Recognition will change all this. Let me particularize further.

Every such case as this is to be determined by its particular facts. There are to-day hundreds of American youths in the insurgent army. One of them, captured with a gun in his hand, taken in battle, is, like the Cuban insurgent, but a traitor to be shot in his tracks. When this Government refuses to recognize belligerency, great and mighty and powerful as it is, it is absolutely without the power to protest against it; but when we shall have recognized belligerency, we have invested this Government with power to say that a man fighting for human liberty, for national independence, taken in the line of duty, with arms in his hands, gallant and heroic, shall be treated as a soldier engaged in legitimate war, and shall be accorded all the rights and privileges that belong to prisoners of war captured in battle.

So, while it is true that Spain gets the right of search, and gets release from further obligation to us, yet it is also true that this act puts the Cuban cause on a higher plane; the Cuban Republic at once takes a place among the nations of the earth; the soldier of that republic is henceforth engaged in legitimate war; taken in battle, he is entitled to be treated as a prisoner of war.

Furthermore, comes this result to us as a people: It puts us in a position of neutrality. We are not in a position of neutrality now. Every Cuban who comes into this country comes here subject to the municipal regulations to which I have referred. He comes under the surveillance of this Government until, as in many cases that have occurred, he is arrested and brought to trial; but no Spaniard is under any such surveillance, because our municipal code only prohibits those things and makes them unlawful which are done in hostility to a recognized power with which we are on friendly relations. Therefore it is that there is an important consideration here to which I wish to call attention. We are not a neutral power now as between these belligerents, but the very moment we recognize belligerency we become absolutely neutral according to all international law.

What does becoming neutral mean? It means that we have recognized the Cuban Republic as a friendly power, that we are at peace with that power, and that we can prohibit, as in violation of our municipal law, schemes set on foot in the United States in hostility to Cuba, as we now can only schemes set on foot in the United States in hostility to Spain.

Another thing—I might stand here and dwell upon this almost without limit—in all this matter there is something of higher concern to me, something that appeals to my conscience more than anything else that has been adverted to in this debate. Do you not think it time for the United States to cease to police her country and enforce her municipal regulations in the interest of Spain? Is it not time for us to take a position of absolute neutrality? What do we do by this? We do not make war on Spain; we simply say we will have nothing more to do with your war; we will put the contest on the high plane of legitimate warfare, and there leave you to fight it out.

What is the consequence to us? The consequence to us, Mr. President, is that we at once cease a responsibility for that which has shocked and horrified all Christendom. The United States has not any right in a moral point of view to stand longer a quasi copartner with Spain in the conduct of this brutal and atrocious war. The time has come to put an end to it. It is another "covenant with sin and league with hell," and, for my part, by no word or speech or act or vote of mine shall the unholy alliance longer continue than until this resolution comes to be voted upon by the Senate. [Applause in the galleries.]

The VICE-PRESIDENT. Order must be preserved in the galleries.

APPENDIX.

DEPARTMENT OF STATE, *Washington, April 4, 1896.*

SIR: It might well be deemed a dereliction of duty to the Government of the United States, as well as a censurable want of candor to that of Spain, if I were longer to defer official expression as well of the anxiety with which the President regards the existing situation in Cuba as of his earnest desire for the prompt and permanent pacification of that island. Any plan giving reasonable assurance of that result and not inconsistent with the just rights and reasonable demands of all concerned would be earnestly promoted by him by all means which the Constitution and laws of this country place at his disposal.

It is now some nine or ten months since the nature and prospects of the insurrection were first discussed between us. In explanation of its rapid

and, up to that time, quite unopposed growth and progress, you called attention to the rainy season which from May or June until November renders regular military operations impracticable. Spain was pouring such numbers of troops into Cuba that your theory and opinion that, when they could be used in an active campaign, the insurrection would be almost instantly suppressed, seemed reasonable and probable. In this particular you believed, and sincerely believed, that the present insurrection would offer a most marked contrast to that which began in 1868, and which, being feebly encountered with comparatively small forces, prolonged its life for upward of ten years.

It is impossible to deny that the expectations thus entertained by you in the summer and fall of 1895, and shared not merely by all Spaniards but by most disinterested observers as well, have been completely disappointed. The insurgents seem to-day to command a larger part of the island than ever before. Their men under arms, estimated a year ago at from ten to twenty thousand, are now conceded to be at least two or three times as many. Meanwhile, their discipline has been improved, and their supply of modern weapons and equipment has been greatly enlarged, while the mere fact that they have held out to this time has given them confidence in their own eyes and prestige with the world at large. In short, it can hardly be questioned that the insurrection, instead of being quelled, is to-day more formidable than ever, and enters upon the second year of its existence with decidedly improved prospects of successful results.

Whether a condition of things entitling the insurgents to recognition as belligerents has yet been brought about may, for the purposes of the present communication, be regarded as immaterial. If it has not been, it is because they are still without an established and organized civil government, having an ascertained situs, presiding over a defined territory, controlling the armed forces in the field, and not only fulfilling the functions of a regular government within its own frontiers, but capable internationally of exercising those powers and discharging those obligations which necessarily devolve upon every member of the family of nations. It is immaterial for present purposes that such is the present political status of the insurgents, because their defiance of the authority of Spain remains none the less pronounced and successful, and their displacement of that authority throughout a very large portion of the island is none the less obvious and real.

When, in 1877, the president of the so-called Cuban Republic was captured, its legislative chamber surprised in the mountains and dispersed, and its presiding officer and other principal functionaries killed, it was asserted in some quarters that the insurrection had received its deathblow and might well be deemed to be extinct. The leading organ of the insurrectionists, however, made this response:

"The organization of the liberating army is such that a brigade, a regiment, a battalion, a company, or a party of twenty-five men can operate independently against the enemy in any department without requiring any instructions save those of their immediate military officers, because their purpose is but one, and that is known by heart as well by the general as the soldier, by the negro as well as the white man or the Chinese, viz., to make war on the enemy at all times, in all places, and by all means, with the gun, the machete, and the firebrand. In order to do this, which is the duty of every Cuban soldier, the direction of a government or a legislative chamber is not needed; the order of a subaltern officer, serving under the general-in-chief, is sufficient. Thus it is that the government and chamber have in reality been a superfluous luxury for the revolution."

The situation thus vividly described in 1877 is reproduced to-day. Even if it be granted that a condition of insurgency prevails and nothing more, it is on so large a scale and diffused over so extensive a region, and is so favored by the physical features and the climate of the country, that the authority of Spain is subverted and the functions of its Government are in abeyance or practically suspended throughout a great part of the island. Spain still holds the seaports and most, if not all, of the large towns in the interior. Nevertheless, a vast area of the territory of the island is in effect under the control of roving bands of insurgents, which, if driven from one place to-day by an exhibition of superior force, abandon it only to return to-morrow when that force has moved on for their dislodgment in other quarters.

The consequences of this state of things can not be disguised. Outside of the towns still under Spanish rule, anarchy, lawlessness, and terrorism are rampant. The insurgents realize that the wholesale destruction of crops, factories, and machinery advances their cause in two ways. It cripples the resources of Spain on the one hand. On the other, it drives into their ranks the laborers who are thus thrown out of employment. The result is a systematic war upon the industries of the island and upon all the means by which they are carried on, and whereas the normal annual product of the island is valued at something like eighty or a hundred millions, its value for the present year is estimated by competent authority as not exceeding twenty millions.

Bad as is this showing for the present year, it must be even worse for the next year and for every succeeding year during which the rebellion continues to live. Some planters have made their crops this year who will not be allowed to make them again. Some have worked their fields and operated their mills this year in the face of a certain loss who have neither the heart nor the means to do so again under the present even more depressing conditions. Not only is it certain that no fresh money is being invested on the island, but it is no secret that capital is fast withdrawing from it, frightened away by the utter hopelessness of the outlook. Why should it not be? What can a prudent man foresee as the outcome of existing conditions except the complete devastation of the island, the entire annihilation of its industries, an the absolute impoverishment of such of its inhabitants as are unwise or unfortunate enough not to seasonably escape from it?

The last preceding insurrection lasted for ten years and then was not subdued, but only succumbed to the influence of certain promised reforms. Where is found the promise that the present rebellion will have a shorter lease of life, unless the end is sooner reached through the exhaustion of Spain herself? Taught by experience, Spain wisely undertook to make its struggle with the present insurrection short, sharp, and decisive, to stamp it out in its very beginnings by concentrating upon it large and well-organized armies, armies infinitely superior in numbers, in discipline, and in equipment to any the insurgents could oppose to them.

Those armies were put under the command of its ablest general, as well as its most renowned statesman—of one whose very name was an assurance to the insurgents both of the skillful generalship with which they would be fought and of the reasonable and liberal temper in which just demands for redress of grievances would be received. Yet the efforts of Campos seem to have utterly failed, and his successor, a man who, rightfully or wrongfully, seems to have intensified all the acerbities of the struggle, is now being reenforced with additional troops. It may well be feared, therefore, that if the present is to be of shorter duration than the last insurrection, it will be because the end is to come sooner or later through the inability of Spain to prolong the conflict, and through her abandonment of the island to the heterogeneous combination of elements and of races now in arms against her.

Such a conclusion of the struggle can not be viewed even by the most devoted friend of Cuba and the most enthusiastic advocate of popular government except with the gravest apprehension. There are only too strong reasons to fear that, once Spain were withdrawn from the island, the sole bond of union between the different factions of the insurgents would disappear; that a war of races would be precipitated, all the more sanguinary for the discipline and experience acquired during the insurrection, and that, even if there were to be temporary peace, it could only be through the establishment of a white and a black republic, which, even if agreeing at the outset upon a division of the island between them, would be enemies from the start, and would never rest until the one had been completely vanquished and subdued by the other.

The situation thus described is of great interest to the people of the United States. They are interested in any struggle anywhere for freer political institutions, but necessarily and in special measure in a struggle that is raging almost in sight of our shores. They are interested, as a civilized and Christian nation, in the speedy termination of a civil strife characterized by exceptional bitterness and exceptional excesses on the part of both combatants. They are interested in the noninterruption of extensive trade relations which have been and should continue to be of great advantage to both countries. They are interested in the prevention of that wholesale destruction of property on the island which, making no discrimination between enemies and neutrals, is utterly destroying American investments that should be of immense value, and is utterly impoverishing great numbers of American citizens.

On all these grounds and in all these ways the interest of the United States in the existing situation in Cuba yields in extent only to that of Spain herself, and has led many good and honest persons to insist that intervention to terminate the conflict is the immediate and imperative duty of the United States. It is not proposed now to consider whether existing conditions would justify such intervention at the present time, or how much longer those conditions should be endured before such intervention would be justified. That the United States can not contemplate with complacency another ten years of Cuban insurrection, with all its injurious and distressing incidents, may certainly be taken for granted.

The object of the present communication, however, is not to discuss intervention, nor to propose intervention, nor to pave the way for intervention. The purpose is exactly the reverse—to suggest whether a solution of present troubles can not be found which will prevent all thought of intervention by rendering it unnecessary. What the United States desires to do, if the way can be pointed out, is to cooperate with Spain in the immediate pacification of the island on such a plan as, leaving Spain her rights of sovereignty, shall yet secure to the people of the island all such rights and powers of local self-government as they can reasonably ask. To that end the United States offers and will use her good offices at such time and in such manner as may be deemed most advisable. Its mediation, it is believed, should not be rejected in any quarter, since none could misconceive or mistrust its purpose.

Spain could not, because our respect for her sovereignty and our determination to do nothing to impair it have been maintained for many years at great cost and in spite of many temptations. The insurgents could not, because anything assented to by this Government which did not satisfy the reasonable demands and aspirations of Cuba would arouse the indignation of our whole people. It only remains to suggest that, if anything can be done in the direction indicated, it should be done at once and on the initiative of Spain.

The more the contest is prolonged, the more bitter and more irreconcilable is the antagonism created, while there is danger that concessions may be so delayed as to be chargeable to weakness and fear of the issue of the contest, and thus be infinitely less acceptable and persuasive than if made while the result still hangs in the balance, and they could be properly credited in some degree at least to a sense of right and justice. Thus far Spain has faced the insurrection sword in hand, and has made no sign to show that surrender and submission would be followed by anything but a return to the old order of things. Would it not be wise to modify that policy and to accompany the application of military force with an authentic declaration of the organic changes that are meditated in the administration of the island with a view to remove all just grounds of complaint?

It is for Spain to consider and determine what those changes would be. But should they be such that the United States could urge their adoption, as substantially removing well-founded grievances, its influence would be exerted for their acceptance, and it can hardly be doubted, would be most potential for the termination of hostilities and the restoration of peace and order to the island. One result of the course of proceeding outlined, if no other, would be sure to follow, namely, that the rebellion would lose largely, if not altogether, the moral countenance and support it now enjoys from the people of the United States.

In closing this communication it is hardly necessary to repeat that it is prompted by the friendliest feelings toward Spain and the Spanish people. To attribute to the United States any hostile or hidden purposes would be a grave and most lamentable error. The United States has no designs upon Cuba and no designs against the sovereignty of Spain. Neither is it actuated by any spirit of meddlesomeness nor by any desire to force its will upon another nation. Its geographical proximity and all the considerations above detailed compel it to be interested in the solution of the Cuban problem whether it will or no. Its only anxiety is that that solution should be speedy, and, by being founded on truth and justice, should also be permanent.

To aid in that solution, it offers the suggestions herein contained. They will be totally misapprehended unless the United States be credited with entertaining no other purpose toward Spain than that of lending its assistance to such termination of a fratricidal contest as will leave her honor and dignity unimpaired at the same time that it promotes and conserves the true interests of all parties concerned.

I avail myself of this opportunity to renew to you, Mr. Minister, the assurances of my highest consideration.

RICHARD OLNEY.

Señor DON ENRIQUE DUPUY DE LÔME, etc.

Mr. THURSTON. Mr. President, I will take the floor for the purpose of submitting some remarks on the pending resolution, but I do not care to go on to-night.

Mr. CULLOM. If the Senator will allow me, I move that the Senate proceed to the consideration of executive business.

Mr. HOAR. If the Senator from Nebraska does not care to go on to-night, I should like, if he will allow me, to ask the Senator from Illinois to withdraw his motion for an executive session and to renew it after I get through.

Mr. CULLOM. I will withdraw the motion with that understanding.

Mr. HOAR. Mr. President, I so far sympathize with the gentlemen who desire to conclude this discussion——

Mr. PETTUS. Mr. President——

The VICE-PRESIDENT. The Senator from Massachusetts has the floor.

Mr. PETTUS. I desire to make a point of order, Mr. President.

The VICE-PRESIDENT. The Senator from Alabama will state his point of order.

Mr. PETTUS. I do not want to interrupt the Senator, but I do not think he ought to speak until there is order in the Senate.

The VICE-PRESIDENT. The point of order is well taken. The Senate will please come to order. [A pause.] The Senator from Massachusetts will now proceed.

Mr. HOAR. Mr. President, I so far sympathize with those persons who desire to bring this discussion to a conclusion that I desire to take a few minutes to-night, instead of consuming another day, in pointing out the precise distinction between the Senator from Ohio and myself, so far as our opinion upon this matter is concerned. I think the Senate should have authoritative facts, and should set them forth in a finding like a judicial decree on which it should base action.

I think my honorable friend from Ohio does not altogether seem to dissent from that proposition, although he desires us to act, as I understand him, upon the information given to him contained in two papers, one of which the Senate is not permitted to read through. He gives us a letter from the Secretary of State and an extract only from the reply; and we are asked to vote on this great question without knowing or being able to judge for ourselves whether the sentences which the honorable Senator withholds from his associates here modify, control, or contradict anything which is said in the garbled paper. I do not use the word "garbled" as implying impropriety, but we only know what is contained in the portion of the paper which he has read to the Senate.

Mr. FORAKER. I shall append the paper to my remarks.

Mr. HOAR. The Senator says he will put in the paper on which he founds his case the whole of the letter to the Spanish minister, but he withholds part of the answer and the last sentences of a report from somebody on the ground that if he were to give that report in full, it would disclose to us the author.

Mr. FORAKER. No; on the ground that I am limited by the injunction placed upon me when I received it.

Mr. HOAR. Not to disclose to us its author?

Mr. FORAKER. That is one of the reasons, and only one. I did not give that reason, and I would not give that reason.

Mr. HOAR. I thought the Senator did. I do not mean to say that he himself would prefer not to disclose the author. What I stated was that he, not being at liberty to disclose the author, will not disclose to us the whole paper.

Mr. FORAKER. That is all right.

Mr. HOAR. Now, I say that is not the way in which great transactions in our foreign affairs should be conducted. But, Mr. President, to hasten to the principal proposition of the honorable Senator, he thinks we had better declare belligerency and stop.

Mr. FORAKER. No; I did not say that. I said I would rather have intervention, but I stopped with belligerency because that was proposed.

Mr. HOAR. The Senator says he would rather have intervention, but he stops at belligerency because that is all that is proposed either by him or by anybody else. I say the proper thing to do is to propose mediation in favor of independence.

Mr. FORAKER. Very well, then; propose it.

Mr. HOAR. I am going to do so before I get through, or somebody before we get through will propose mediation in favor of independence, and, if that is rejected, then to have the facts reported to the Senate and take the action which the facts require.

The Senator says he does not believe in calling that power into exercise, and he proposes to stop with what I think is this little mouse of a resolution following a great brass band of proclamation, because, in the first place, he says Spain has once declined. Well, that was more than a year ago.

Mr. FORAKER. It was in June.

Mr. HOAR. The proffer was made more than a year ago; and, in the next place, what Spain declined was a proposal that it strikes me every self-respecting government on earth would decline, to wit, that while she continued her authority over Cuba the United States should dictate or advise and suggest what laws she should make for a part of her Kingdom.

I do not agree with my honorable and most able friend from Ohio in thinking that the refusal to permit us to tell Spain what kind of laws she shall make involves a refusal to accept our mediation in regard to the matter of independence. But if I heard correctly—I have not had a chance to examine it carefully—the paper that the Senator read, the Spanish Government intimated that there might come a condition of things later when she might accept.

Mr. FORAKER. No; that was twenty years ago.

Mr. HOAR. That was twenty years ago. Very well. When we proposed to mediate for independence twenty years ago, the Spanish Government replied that the condition of things then did not make her willing to accept it—it seems she put down that rebellion—but that there might come a condition of things later when she would not consider such a proposal one to be rejected.

So we have got a declaration from Spain herself that there may be circumstances under which she would not consider such a proposition unfriendly, and under which she might accede to it; and if the picture drawn by the honorable Senator from Ohio be true, I should think that the gentlemen who agree with him might think that that golden moment had now come. So much for that.

Mr. FORAKER. If the Senator will allow me, I wish to suggest that the recognition of belligerency will not interfere with friendly mediation. We do not undertake by the recognition of belligerency to stop the war or to take part with either side, but simply to take a neutral position from which we can all the better interpose our friendly offices.

Mr. HOAR. I do not think we can do all of that, but I think what the Senator says is quite true, that it will not interfere.

Mr. FORAKER. I will join with you, if this be adopted, in such an effort.

Mr. DANIEL. Will the honorable Senator from Massachusetts permit me to ask him a question? I do not wish to interrupt or break the thread of his discourse.

Mr. HOAR. I will yield.

Mr. DANIEL. I observed on yesterday when the Senator was speaking—and I will quote his words from the RECORD as I find them——

Mr. HOAR. Does it relate to what I am saying now?

Mr. DANIEL. It is apropos of what the Senator is now discussing. The Senator said:

> I think the President of the United States should be asked by Congress to use his good offices with Spain to secure peace and independence in that island, and that is just what the Republican platform said.

Then the Senator goes on to suggest that, having offered our friendly offices, finally, if these mediatory steps fail, we would say to Spain, "If you do not stop that war, we will stop it ourselves." Are not those declarations of the Senator as to securing peace and his intimation that the time might come when he would say to Spain, "Stop that war," predicated upon the recognition in his own mind that there is war now in Cuba with Spain?

Mr. HOAR. Very well, suppose there is.

Mr. DANIEL. Well, supposing there is, is it not proper for us, in the first place, to recognize the condition which will be the basis of our conduct in dealing with it?

Mr. HOAR. Well, Mr. President, when we get the facts in an authoritative form, so that we can settle and affirm them, that question will become a practical one. It does not seem to me to affect the particular argument I am now making.

Mr. DANIEL. Would not the natural and orderly procedure be first to proclaim and recognize the condition of things as introductory to any method which we might see proper afterwards to employ to deal with it?

Mr. HOAR. Mr. President, I will come to that in a moment when I deal with what I understand recognition of belligerency to mean. I do not understand that by the law of nations every condition of belligerency warrants interference or recognition. Indeed, I understood the honorable Senator from Ohio to expressly affirm that belligerency exists in fact when hostilities exist too strong for the constable and where military forces are used on either side. The question for us whether a condition of things exists which, under the law of nations, makes it our duty to ourselves, having due regard to our own interests, to affirm the condition of belligerency, and if, there being a condition of belligerency, we make the affirmation—and I desire the attention of my friend from Ohio—if, there being a condition of belligerency, we affirm and recognize and declare it, not because of our own interests, but from sympathy for or desire to aid one of the parties, we are then guilty of an unfriendly and hostile act to the other. This is the law.

Mr. FORAKER. I argued, upon that very proposition, that it is a question for us to decide whether or not we will recognize belligerency, governed by our own interests.

Mr. HOAR. I cite the authority of the eminent jurist from Ohio to that proposition and in answer to the inquiry of the Senator from Virginia. But before I come to that——

Mr. FORAKER. If the Senator will allow me, I say we are to decide that from the result to the Cubans and the counter result to us. That is a beneficial and a legitimate consideration.

Mr. HOAR. Certainly. I was about, before coming to that, which was all I wish to detain the Senate about, to discuss and to point out one very instructive fact in the letter of Mr. Secretary Olney which was not read, and which Senators will find there, and which may perhaps not excuse, not perhaps even palliate, but may account for some of the transactions which some of the Senators on the other side have dwelt upon with so much eloquence and pathos. He says this war is conducted by the insurgents not by meeting their antagonists in pitched battles, but by applying the torch to the houses of peaceful citizens, destroying their industries, burning their plantations, and starving out, or attempting to starve out, the Spanish troops by destroying the entire resources of that island.

That is what the Cubans are doing, according to the information which the honorable Senator from Ohio has furnished to the Senate. Now, if that be true, and the American citizens who are caught by the Spanish armies are doing that as their method of warfare, is it or not a violation of the laws of war and the laws of humanity to punish them with death for that offense? Who knows? Who answers? I should like a report from the Committee on Foreign Relations on that particular proposition, if it shall become material.

Senators talk about this recognition of belligerency stopping these things. I shall say a word about that presently. But if we can act upon the authority which the Senator from Ohio says, we ought to act upon the Spanish Government. I am not affirming this; I do not know; but he knows, and he tells us a good deal of what he knows, and a good deal he does not tell us because it is in strict confidence.

Mr. FORAKER. I shall not keep it from the Senator.

Mr. HOAR. I do not know what is in that paper, but this one thing the Senator tells us, that the Cubans have undertaken to throw off what used to be the lawful authority of Spain by saying they will turn that island into a wilderness and will burn over the heads of peaceful, neutral, unoffending citizens, women and children, the warehouses, the sugar houses, the factories, and the dwelling houses where they dwell, and will burn the plants on their plantations, not only the crop for the existing year—that is not in the paper, however, but that everybody has heard as a fact—but will destroy the entire plant, so that there shall be no new crop made for years to come. It is that war which Spain is engaged in putting down.

Now, I do not know whether, if an American citizen or a Cuban be caught red-handed after setting that fire, it be lawful to put him to death or no. I have heard that some people, of whom the Senator from Virginia and the Senator from Alabama have heard—I will not revive any unpleasant memories—caught Northern Union soldiers burning a military bridge, and they were put to death by a drumhead court-martial, without judge or jury, and not treated as prisoners of war. There is a good deal of evidence of that fact in the archives of this body. But that is merely in passing.

My honorable friend says that he admits that our interests are affected, and to some extent injuriously, if we recognize belligerency, which we are to do for our interest, he agrees, and not for the interest of the Cubans. All the eloquence, all the denunciation of Spain, all the sympathy are admitted away by the inexorable logic of the honorable Senator from Ohio when he admits that it is not for these things we have a right under the law of nations to recognize belligerency.

The whole argument of the honorable and eloquent Senator from Utah [Mr. CANNON], the whole argument of the honorable Senator from Illinois [Mr. MASON] yesterday, the whole argument of the honorable and very polite junior Senator from New Hampshire [Mr. GALLINGER], are all gone, because none of those things, says the representative of the Committee on Foreign Relations, warrants or affects our recognition of belligerency. It is a question of the interest of the United States. Now, we have that settled from the Committee on Foreign Relations.

I say that the interest of the United States is against permitting Spain to search our vessels at sea anywhere she catches them, instead of having the flag protect any ship or cargo or crew unless Spain catches her within the 3-mile limit. Now, that is my first proposition. How does the honorable Senator answer it? He says that the right of search is bound to be very politely exercised; that only one officer is allowed on board in the beginning, and if he suspects there is anything contraband of war, arms or gunpowder, muskets or cannon, or anything else, then he can take the ship into a Spanish port, and if the Spanish judge thinks he was polite, he is not punished.

If the Spanish judge, after a trial in a Spanish court, which may last years, finds there was no probable cause for the seizure, the vessel will be dismissed with costs; and if he finds there was probable cause for the seizure, for the suspicion, although in fact the ship did not have any such things aboard, or they were not intended for Cuba, then the vessel, after a three years' detention, is to be dismissed without costs. And the Senator thinks that is not much of an injury.

It is a very polite, agreeable, and pleasant kind of proceeding. It does not hurt the United States to have it happen, and to have it happen under the control of such an authority as he has described Spain, irritated by our recognition of belligerency.

Now, I wish to put against my honorable friend's opinion, which I rate a great deal more highly than he does himself, with his great modesty, the opinion of Gen. Ulysses S. Grant, who said that the recognition of belligerency and the right of search in Spain could not exist three months and have it possible to prevent a war with that nation.

Mr. FORAKER. Where did he say that?

Mr. HOAR. Either in his message to Congress or in one of his letters.

Mr. FORAKER. I have his messages here, and he never said any such thing officially. That is sure.

Mr. HOAR. I do not remember where he said it.

Mr. FORAKER. I know what he said.

Mr. HOAR. I know he said it.

Mr. FORAKER. I know where he said what he did say, and if the Senator will allow me, I will read it.

Mr. HOAR. He said a good many things.

Mr. FORAKER. He was a great general and a great President, but not the greatest international lawyer this country has produced.

Mr. HOAR. Perhaps not. I know there are international lawyers greater.

Mr. FORAKER. Here is what he does say:

It would give rise to countless vexatious questions, would release the parent government from responsibility for acts done by the insurgents——

Mr. HOAR. If the Senator wishes to read something else that General Grant said, I will yield.

Mr. FORAKER. I was about to read upon the point to which the Senator referred.

Mr. HOAR. He said what I have said on the point I referred to.

Mr. FORAKER. In no official paper. He may have said it to the Senator when the Senator was visiting the White House. If the Senator will allow me, I will read it.

Mr. HOAR. By all means. I should like to have it.

Mr. FORAKER. Speaking of the consequences of belligerency, General Grant said in his message:

Such recognition entails upon the country according the rights which flow from it difficult and complicated duties, and requires the exaction from the contending parties of the strict observance of their rights and obligations. It confers the right of search upon the high seas by vessels of both parties; it would subject the carrying of arms and munitions of war, which now may be transported freely and without interruption in the vessels of the United States, to detention and to possible seizure; it would give rise to countless vexatious questions, would release the parent Government from responsibility for acts done by the insurgents, and would invest Spain with the right to exercise the supervision recognized by our treaty of 1795 over our commerce on the high seas.

Upon that I have commented.

Mr. HOAR. Read on.

Mr. FORAKER. I will read as much as the Senator likes, but I do not like to interrupt him unduly. General Grant goes on to say that intervention will be necessary unless they shortly desist.

Mr. HOAR. Has the Senator read all General Grant says about that point?

Mr. FORAKER. I believe so.

Mr. HOAR. Then I will resume.

Taking what General Grant says, is there any question in anybody's mind that the right of search by Spain would lead to a war in three months? We have had some experience about that. We remember when the little English middy used to come aboard our vessels to search for British seamen. It created a war, and although England did not abandon the right formally, she has never since ventured to exercise it against this country.

Now, Mr. President, another thing is suggested. It is not only the right of search, if my honorable friend from Ohio will allow me to have his attention a minute longer, but it is the right to seize on suspicion. You propose a resolution into which the law of nations writes, "We hereafter accord to Spain the right to seize any American merchant vessel, if, after search, the officer going aboard is of opinion that the vessel contains contraband of war destined for the Cuban insurgents." The consequence of the right to seize is that the vessel is taken into a Spanish port, tried in a Spanish prize court, and if the court holds that the officer had reasonable grounds for suspicion, it is discharge at the end of a long lawsuit, without costs.

If he finds that the officer was right, then the property is condemned and taken from the owner. That you are substituting for a condition of things under which the United States flag guards the vessel, except it is within 3 miles of the Cuban shore. And Senators gravely get up here and say that is not much of an inconvenience.

Mr. GALLINGER. Will it disturb the Senator from Massachusetts if I interrupt him for a moment?

Mr. HOAR. Not in the least. For what purpose does the Senator wish to interrupt me?

Mr. GALLINGER. To ask a question.

Mr. HOAR. I will yield if the question is pertinent to what I am saying.

Mr. GALLINGER. Precisely. The Senator says that if we recognize the insurgents in Cuba as belligerents, necessarily it would result in war. Spain recognized the Confederacy——

Mr. HOAR. I never said so. General Grant said it.

Mr. GALLINGER. The Senator is arguing on that line. The Senator has constantly held up the specter of war in this debate. If that be true, how did it happen that when England and Spain recognized the Confederacy we did not go to war?

Mr. HOAR. Because the Confederacy had but one war ship at sea during most of the time or a part of the time.

Mr. GALLINGER. Why did we not search the vessels of Spain or England and get into a war with those countries?

Mr. HOAR. There are a good many reasons why we did not. To some extent those vessels——

Mr. HAWLEY. If the Senator will allow me, we did seize British ships in abundance and we confiscated them.

Mr. GALLINGER. But we did not have war with those countries.

Mr. HAWLEY. We caught them carrying guns into Wilmington and Charleston and Savannah.

Mr. GALLINGER. That is all true, but we did not have war.

Mr. HOAR. I think the reflections of Senators will probably lead them, without my taking their time to answer the question, to see the distinction in those cases——

Mr. GALLINGER. I have not discovered it.

Mr. HOAR. And to see that President Grant was entirely right in that proposition.

But there is another thing which the Senator said, speaking of our rights. We now have, as he agrees, for every injury to the millions of American property in Cuba by a mob or lawlessness, a right to indemnity from Spain; but he says, "Do you not know"——

Mr. FORAKER. Those are claims for damages done by Spaniards as well as Cubans.

Mr. HOAR. Spaniards as well as Cubans. But he says, "Do you not know that we presented those claims? Spain has refused point blank to acknowledge them." I think very likely that is all true, but I think it does not at all follow that Spain will not be able to pay and will not be compelled to pay every just claim due to an American citizen. England point blank refused to pay the *Alabama* claims, and after Mr. Adams had sent them in one after another for a few months the foreign office said to Mr. Adams that they would regard it as offensive or unfriendly, or some phrase of that kind, to have the subject renewed again.

But it turned out that the subject was renewed, and it turned out that $15,000,000 went into our Treasury, and every American citizen who had a loss and had one of these claims which England point blank refused to acknowledge got his money, with interest, in his pocket, and there was some left in our Treasury when we got through. I think the power which was able to compel Great Britain to make a recompense which she had point blank refused will find itself able to make Spain compensate our citizens for every lawful obligation. So, if I am right in my view, the recognition of belligerency would be a great injury to the United States, and if we make it, we are doing it because we think that it will encourage the Cubans, and not, as all the writers whom the Senator acknowledges as authority say it is, for our own interest. Therefore it will become an offensive and unfriendly act.

But the learned Senator says that, although Spain may seize and search our vessels, if the resolution gets through, and the Spanish officer is to judge the courtesy, and the Spanish court is to judge the reasonable cause, there are other things, and that is that we shall stop, if I understood him, this policing of our coasts to prevent hostile expeditions in the interest of Cuba. The Senator cites President Cleveland's proclamation of neutrality.

Mr. FORAKER. I said stop it in the interest of only one party.

Mr. HOAR. In the interest of only one.

Now, I affirm, and I challenge contradiction from any quarter, that our duty, our obligation of neutrality, and our national conduct will be exactly in that particular the same after the recognition of belligerency as before, and that there will not be the slightest change in this particular in any respect whatever.

Mr. MASON. I desire to ask the Senator from Massachusetts a question.

Mr. HOAR. Certainly.

Mr. MASON. Does the Senator admit that after we recognize belligerency we can determine and say that prisoners of war shall be treated as prisoners of war and not be shot without trial? Does the Senator admit that to be true?

Mr. FORAKER. In legitimate warfare.

Mr. MASON. That as to prisoners taken in war we shall have a right, as one of the nations having acknowledged the belligerency of Cuba, to interfere and say, "You shall not shoot the prisoner of war?"

Mr. HOAR. I understand, he being an American citizen——

Mr. MASON. I do not care of what country he is a citizen.

Mr. HOAR. Very well. I will answer the question of the Senator, and I am glad he asked it, because I was intending to come to that matter, and I might have forgotten it.

We have affirmed that doctrine so far as relates to American citizens, and Spain has granted it. Whether by the law of nations Spain might shoot American citizens taken in arms on the side of Cuba or no, as a general proposition, it is the settled law between these two countries that she can not. So that it becomes a matter——

Mr. MORGAN. Mr. President——

Mr. HOAR. No; I can not yield now. I am answering another question. I will yield to the Senator when I have answered this question.

So, as regards American citizenship, the question is the same before or after the recognition of belligerency. So, as affects prisoners not American citizens, our right, power, duty, and obligation are exactly the same. We have the same right to interfere to put down in Spain or Armenia a government which is cruelly dealing with its own subjects, charged with rebellion, as we have to interfere if there be a war between that country and its own subjects conducted in a horrible and brutal way.

Mr. MASON. Does the Senator base that on international law?

Mr. HOAR. I base it on international law. That is the opinion of the ancient barnacle.

Mr. MASON. I admit it. I am not contradicting it.

Mr. HOAR. Very well.

So there is not one single purpose, one single circumstance, suggested by the honorable Senator from Ohio or by anyone else in which the recognition of belligerency could be of any benefit to Cuba or in which it could be anything other than a serious injury and grievance and wrong to the people of the United States.

Mr. MORGAN. I desire to ask the Senator a question, if he will permit me.

Mr. HOAR. Certainly.

Mr. MORGAN. Can the Senator recite any case in which Spain has decided, either through her courts or her military authorities, that she has no right to execute an American citizen taken with arms as a prisoner of war?

Mr. HOAR. No; I can not.

Mr. MORGAN. Very well.

Mr. HOAR. But her Government has assured our Government on its demand that it shall not be done.

Mr. MORGAN. I have not seen the assurance.

Mr. HOAR. I have, I think.

Mr. MORGAN. I know that cases have been decided the other way. She exercises the pardoning power.

Mr. HOAR. In that particular it makes no difference. The right of this Government to interpose, if there be a cruel and brutal treatment, not according to the forms of civil law, of an American citizen taken in arms against a government when his side is not recognized as a belligerent, is the same as if belligerency had been recognized. We have been interfering all along, as the Senator from Maine [Mr. HALE] suggests to me. So that impassioned argument disappears.

The Senator from Ohio ended his argument by saying we will have to police the seas if the present condition of things continues. We shall have to police the seas quite as much when we recognize belligerency. England was held to the performance of her neutral duties and to damages for failing in the performance, although she recognized the belligerency of the Confederacy almost as soon as the rebellion broke out.

Is there any doubt about that proposition? The Senator from Ohio concludes by saying that he sums up the whole thing by the fact that before the recognition of belligerency the Cuban is a rebel on land and a pirate by sea. I have shown that there is no difference in his legal status. In the first place, that would seem to be a pretty strong contradiction of the Senator's position that we are not doing these things for the benefit of the Cubans, but only for our own interest, and with which he, being entirely sane on this subject, agrees.

But, passing that by, I have shown, I think, conclusively that so far as his position on land is concerned, there is no difference in it. So far as our obligation of neutrality is concerned, there is no difference. So far as our interest is concerned, the only difference is that we expose ourselves to the right of search and lose the claims of our citizens. So far as the Cuban being a pirate at sea is concerned, I think there is very probably, as far as I have investigated or reflected upon the question, some reason for thinking that the Senator is right. I should like to reflect on it a little further before absolutely agreeing to it.

Mr. WHITE. If the Senator from Massachusetts will permit me, I think that when Mr. Frelinghuysen was Secretary of State he stated, and afterwards Mr. Bayard stated, that while this nation had the power to recognize as a pirate or to consider as a pirate a case similar to that supposed by the Senator, yet as a matter of policy we would not do it; and we have explicitly and absolutely refused to do it.

Mr. HOAR. But still I suppose it is true that Cuba not being recognized, if she should get at some time in the future a ship of war and get it to sea, as our Southern brethren did the *Alabama*, and capture some Spanish ships and take one of them into an American port, we would not admit her to hospitality, and our prize courts would not condemn for her her prize or treat the capture as a lawful prize, and to that extent she would be worse off. But I respectfully submit to my honorable friend from Ohio that that is a contingency so remote and distant that it is hardly worth while for us to go through the great discomfort to commit what seems to me, with great respect, the great folly of passing this joint resolution recognizing belligerency in order that it may

possibly benefit Cuba if at some time in the future she gets a ship of war and that ship of war happens to come into one of our ports.

I am sorry to have detained the Senate so long. I make no apology, however, to those Senators who think we are endeavoring to delay on this side of the Chamber, because I have taken the time to-night instead of waiting until to-morrow.

Mr. THURSTON. I understand that I had the floor and yielded it to the Senator from Massachusetts. I shall desire to take it to-morrow at 2 o'clock on the pending resolution.

The VICE-PRESIDENT. To-morrow at 2 o'clock the Senator from Nebraska will be recognized as entitled to the floor.

Mr. MORGAN. I move that the Senate adjourn.

The motion was agreed to; and (at 6 o'clock p. m.) the Senate adjourned until to-morrow, Thursday, May 20, 1897, at 12 o'clock meridian.

SENATE.

THURSDAY, *May 20, 1897.*

Prayer by the Chaplain, Rev. W. H. MILBURN, D. D.

The Journal of yesterday's proceedings was read and approved.

DIFFERENTIAL DUTY ON SUGAR.

The VICE-PRESIDENT laid before the Senate a communication from the Secretary of State, transmitting, agreeably to the request of the German ambassador, copies of correspondence in regard to the protest of the German Government against differential treatment of bountied sugars in the pending tariff bill; which was read, and, with the accompanying papers, referred to the Committee on Finance, and ordered to be printed.

LANDS IN GREER COUNTY, OKLA.

The VICE-PRESIDENT laid before the Senate a communication from the Secretary of the Interior, transmitting a letter from the Commissioner of the General Land Office, setting forth the necessity for an extension of the time allowed by the act of January 8, 1897, to bona fide purchasers of lands in Greer County, Okla., to place their claims of record in the local office at Mangum, together with a copy of a draft of a section prepared in the General Land Office granting an extension of time required and calling attention to the necessity of the proposed legislation; which, with the accompanying papers, was referred to the Committee on Public Lands, and ordered to be printed.

MESSAGE FROM THE HOUSE.

A message from the House of Representatives, by Mr. W. J. BROWNING, its Chief Clerk, announced that the House had passed the joint resolution (S. R. 42) appropriating $50,000 for the relief of suffering American citizens in the Island of Cuba.

PETITIONS AND MEMORIALS.

The VICE-PRESIDENT presented a petition of the Ninth Annual Convention of Railroad Commissioners, praying for the enactment of legislation effectually to prohibit the transportation evils and abuses, relating to carriers engaged in interstate commerce, such as are described in the annual reports of the Interstate Commerce Commission for the years 1890 to 1896; which was referred to the Committee on Interstate Commerce.

Mr. SHOUP presented the petition of S. D. Coulter and 49 other citizens of Boise City, Idaho, praying for the enactment of legislation for the more rigid restriction of immigration; which was ordered to lie on the table.

Mr. McBRIDE presented a petition of 48 citizens of Washington County, Oreg., praying for the abrogation of the Hawaiian reciprocity treaty; which was referred to the Committee on Foreign Relations.

He also presented a petition of 41 citizens of Multnomah County, Oreg., praying for the enactment of legislation for the more rigid restriction of immigration; which was ordered to lie on the table.

Mr. TURPIE presented a memorial of C. H. Ankeny & Co., of Lafayette, Ind., remonstrating against the proposed increase of duty on watches and watch movements; which was ordered to lie on the table.

He also presented a memorial of the Tappan Shoe Manufacturing Company, of Muncie, Ind., remonstrating against the imposition of a duty on foreign hides; which was ordered to lie on the table.

He also presented a memorial of sundry citizens of Evansville, Ind., remonstrating against the passage of the so-called Nelson bankruptcy bill; which was ordered to lie on the table.

He also presented a petition of the Art Institute, of Chicago, Ill., praying that all works of art imported into this country be admitted free of duty; which was ordered to lie on the table.

He also presented the petition of W. C. Rall, past chief conductor of Division No. 120, Order of Railway Conductors, of Huntington, Ind., praying for the passage of Senate bill No. 1479, to amend an act entitled "An act to regulate commerce," approved February 4, 1887; which was referred to the Committee on Interstate Commerce.

Mr. HOAR presented a petition of sundry citizens of Massachusetts, praying for the enactment of legislation for the more rigid restriction of immigration; which was ordered to lie on the table.

Mr. ELKINS presented sundry petitions of citizens of West Virginia, praying for the enactment of legislation restricting immigration; which were ordered to lie on the table.

He also presented sundry memorials of citizens of West Virginia, remonstrating against the enactment of legislation intended to destroy the present system of ticket brokerage; which were referred to the Committee on Interstate Commerce.

REPORTS OF A COMMITTEE.

Mr. MARTIN, from the Committee on Claims, to whom was referred the bill (S. 135) for the relief of George F. Roberts, administrator of the estate of William B. Thayer, deceased, surviving partner of Thayer Bros., and others, reported it without amendment, and submitted a report thereon.

Mr. PASCO. I am directed by the Committee on Claims to submit a supplemental report to accompany the bill (S. 415) for the relief of Anna W. Osborne. I ask that the report be printed.

The VICE-PRESIDENT. The report will be printed under the rule.

BILLS INTRODUCED.

Mr. GALLINGER introduced a bill (S. 2006) to remove the charge of desertion from the military record of Richard J. Huntoon; which was read twice by its title, and, with the accompanying papers, referred to the Committee on Military Affairs.

Mr. McBRIDE introduced a bill (S. 2007) for the relief of John Kelly; which was read twice by its title, and, with the accompanying papers, referred to the Committee on Claims.

Mr. BURROWS introduced a bill (S. 2008) granting an increase of pension to Rosa S. Webb; which was read twice by its title, and, with the accompanying papers, referred to the Committee on Pensions.

Mr. HAWLEY introduced a bill (S. 2009) to provide for the restatement, readjustment, and payment of dues to army officers or ex-officers in certain cases; which was read twice by its title, and referred to the Committee on Military Affairs.

Mr. PERKINS introduced a bill (S. 2010) to establish a new land district, to be known as the Yukon land district, in the Territory of Alaska; which was read twice by its title, and referred to the Committee on Territories.

Mr. HOAR introduced a bill (S. 2011) to place John Dolan on the retired list of the United States Army; which was read twice by its title, and referred to the Committee on Military Affairs.

Mr. WARREN introduced a bill (S. 2012) providing that the circuit court of appeals of the eighth judicial circuit of the United States shall hold at least one term of said court annually in the city of Denver, in the State of Colorado, or in the city of Cheyenne, in the State of Wyoming, on the first Monday in September in each year; which was read twice by its title, and referred to the Committee on the Judiciary.

He also introduced a bill (S. 2013) for the relief of Hattie A. Phillips; which was read twice by its title, and referred to the Committee on Claims.

TRANSPORTATION OF FOOD CONTRIBUTIONS TO INDIA.

Mr. HALE. I introduce a joint resolution, which I ask to have read. Then I shall ask unanimous consent for its consideration on a statement which I will make.

The joint resolution (S. R. 43) directing the Secretary of the Treasury to give an American register to the foreign-built steamships *Massapequa* and *Menantic*, to enable them to carry grain under the American flag to the sufferers by famine in India was read the first time by its title and the second time at length, as follows:

Whereas there is now stored in New York warehouses about 3,000 tons of grain contributed by the charitable people of the United States for the famishing inhabitants of India; and

Whereas there has been contributed about $100,000 for the purchase of additional food products for the same purpose; and

Whereas it is incumbent upon the United States Government to furnish at the earliest possible moment transportation for this grain to India to relieve the starving poor; and

Whereas it is desirable that this grain should be transported under the flag of the United States; and

Whereas there can not be chartered a sufficient number of United States registered steamships to carry this grain to India: Therefore, it is

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the Secretary of the Treasury is hereby directed to cause the foreign-built steamships *Massapequa* and *Menantic*, owned by Charles W. Hogan, of the firm of T. Hogan & Sons, of New York City, a citizen of the United States, to be registered as vessels of the United States, upon being notified by the Secretary of the Navy that a contract has been entered into between the Navy Department and said Charles W. Hogan, of the firm of T. Hogan & Sons, for the transportation of about 8,000 tons of wheat in bulk or its equivalent in space for corn to India for the famishing poor.

SEC. 2. The Secretary of the Navy is hereby authorized to accept the proposition of T. Hogan & Sons made to him in their letter dated May 13, 1897, and

to enter into a contract with Charles W. Hogan, of said firm, to carry the aforesaid wheat or equivalent of corn in bulk in the steamships *Massapequa* and *Menantic* to India, and a sufficient sum of money is hereby appropriated for said purpose out of any money in the Treasury not otherwise appropriated.

Mr. HALE. Mr. President, there is no opportunity in this emergency for any committee to consider the joint resolution. Senators will remember that by joint resolution approved by the President we provided that the Secretary of the Navy might, either in naval vessels or American vessels that he could charter, transport the gifts of grain, etc., which have been given by American citizens for the suffering people in India. The Secretary has found two things. No naval ships are adapted to such transportation. The statement of that fact will at once carry with it its demonstration. Everyone will see that the ships of the Navy are not built for any such purpose. He has also found that he can not charter any American registered ships. He can not find them. He has searched far and wide, and they are not obtainable.

Under these conditions and under the act of Congress the Secretary is unable to move the large quantities of supplies that have been given by benevolent people and are now in New York. I sent a moment ago for a letter from the Secretary of the Navy on the subject, but I will ask to have read now a letter which I have received from an American citizen in New York.

The VICE-PRESIDENT. The letter will be read.

The Secretary read as follows:

THE ARLINGTON, *Washington, D. C., May 20, 1897.*

Hon. EUGENE HALE,
Chairman Committee on Naval Affairs, United States Senate.

DEAR SIR: I am informed that the Secretary of the Navy has sent to Congress (presumably to your committee) the proposition of my firm, T. Hogan & Sons, of New York city, to carry the grain contributed by the American people for the starving poor of India. I inclose copy of my firm's proposition to Secretary Long, dated May 13th instant. I have purchased since the date of the letter containing the proposition both of the ships named in the letter from the firm, and have bills of sale for the same. I am a citizen of the United States. Both of the ships have arrived in New York harbor within the past twenty-four hours, and their cargoes can be discharged and the grain for India loaded on them and they can be ready for the voyage in one week from this date. I take the liberty of inclosing herewith for the consideration of yourself and your committee a joint resolution which I should be pleased to have you and your committee report favorably to the Senate.

The adoption of this resolution will enable the United States Government to ship this grain in ships wholly owned by a citizen of the United States, wholly officered by citizens of the United States, and carrying the flag of the United States. It is the speediest method of sending the relief to India, and would save the Government the humiliation of having to send it in vessels owned by foreigners, officered by foreigners, and carrying the foreign flag. No charter can be made for the transportation of this food in a foreign vessel as speedily as a charter can be made with us, and besides the price I have charged for the transportation, being below cost, will be largely exceeded if the transportation is made in vessels owned by foreign subjects, as there is no inducement for them to lower their rates. The editor of the Christian Herald, who has charge of the transportation of this grain, is convinced that our proposition is the only one that promises an early settlement of the transportation question. He has recommended to you and to the Secretary of the Navy the acceptance of our proposition.

In addition to the advantages to be derived in the acceptance of our proposition hereinbefore set forth, our vessels would make a very valuable addition to the auxiliary navy; and we are perfectly willing that section 4 of the act of Congress, approved May 10, 1894, entitled "An act to encourage American shipbuilding," which placed the *City of Paris* and the *City of New York* in the auxiliary navy, shall be added to the joint resolution. These vessels, as you will see by reference to my letter to Secretary Long, are first-class steamships in every respect. We could carry easily 1,000 soldiers in each ship, and having repeatedly carried over 600 head of cattle across the Atlantic, in case of war these vessels would prove valuable troop ships, and could be arranged to carry fully 600 horses in addition to 4,000 tons of coal or measurement of stores in the lower hold.

Very truly, yours,

CHAS. W. HOGAN.

P. S.—Address me care room 38, Corcoran Building, Washington, D. C.

Mr. HALE. I ask that there also be read a letter to the Secretary of the Navy, which is referred to in the communication just read.

The Secretary read as follows:

T. HOGAN & SONS, 95 BROAD STREET, *New York, May 13, 1897.*

SIR: In view of the efforts made by our Government to procure American steamers to take the cargoes of grain to the starving people of India, we would state that two of our steamers, in every way suited for the business, are due here with cargoes within the next week and could be discharged so as to be at the service of the Government within a short time thereafter.

The names of these steamers are *Massapequa* and *Menantic*, each of which will carry 4,100 tons gross weight of cargo in addition to 500 tons bunker coals, and when loaded will steam about 10 knots per hour. They were built in October, 1893, by Messrs. Jos. L. Thompson & Sons, Sunderland, England, and are first class in every respect. They are 1,935 tons net register or 3,027 tons gross register each, 322 feet in length, 42 feet 7 inches breadth, and 28 feet 6 inches molded depth, and are classed 100 A1 at British Lloyds. These steamers belong to the Menantic Steamship Company, Limited, the stock of which is owned by American citizens.

We would be willing to take a full cargo of grain in each, provided the Government would naturalize these two steamers before they leave this side. On this condition we would charge for grain in bulk $6 per ton of 2,240 pounds hence to Bombay, or $7 per ton of 2,240 pounds hence to Calcutta. Should it be requisite to ship the cargoes in bags our price would be $6.70 per ton to Bombay and $7.70 to Calcutta.

We are satisfied that these two steamers would be a valuable acquisition to the merchant marine of this country and afford the means of giving employment to quite a number of American citizens.

Trusting that this matter will receive your favorable consideration,

We are, sir, yours respectfully,

T. HOGAN & SONS.

Hon. JOHN D. LONG,
Secretary of Navy, Washington, D. C.

Mr. HALE. Now I ask that there be read a brief letter from the Secretary of the Navy.

The Secretary read as follows:

NAVY DEPARTMENT, *Washington, May 18, 1897.*

SIR: Referring to public resolution No. 8, "Authorizing the Secretary of the Navy to transport contributions for the relief of the suffering poor in India," approved April 7, 1897, I have the honor to submit the following statement:

The resolution, after reciting the fact that a famine exists in India which can readily be relieved from the surplus products of this country, now being freely contributed by the people of the United States, authorizes the Secretary of the Navy, first, to employ and place at the disposal of the collector of the port of New York any ship or vessel belonging to the Navy best adapted for such service, or, secondly, to charter and employ "a suitable American steamship or vessel" for the purpose, with a cargo capacity of 2,000 to 4,000 tons.

The use of a naval vessel for the transportation of these supplies is wholly impracticable. None of the older vessels of the Navy are in a condition to warrant their use for such an undertaking, and with respect to the modern vessels it may be said that their construction differs so radically from that of vessels of the merchant service employed in the carrying trade, the space allotted in mercantile vessels to cargo being filled in the latter with machinery, armament, and necessary quarters for officers and men, as to preclude their use for purposes of transportation. There is, therefore, no naval vessel adapted or readily adaptable to the purpose.

The utilization of a vessel of the Navy being out of the question for the reasons stated, the Department has made every effort to charter a suitable American vessel, but with little success. Indeed, it appears, unfortunately, to be a fact that at the present time few American vessels of sufficient size are available for the purposes named in the resolution. Propositions have, however, been received from the owners of vessels sailing under a foreign flag, but deemed to be otherwise suitable, offering to transport to Bombay or Calcutta the food supplies referred to, provided such vessels can be admitted to American registry and thus brought within the terms of the resolution; and it is understood that vessels owned wholly by American citizens, but not admitted to American registry because built abroad, can be chartered upon terms deemed reasonable.

This Department is in receipt of reports indicating that sufficient food supplies have been contributed to load two vessels, whereas the resolution authorizes the chartering of but one.

While it seems impossible to obtain an American vessel of 4,000 tons, it might occur that two such vessels of 2,000 tons each could be procured. Under these circumstances, and in order that the efforts of the contributors to this work of international benevolence may not fail of success for want of the necessary means of transportation, I have the honor to recommend that the authority conferred by the public resolution be so enlarged as to empower this Department to charter two vessels having a capacity of two to four thousand tons each instead of one such vessel; and, inasmuch as even these smaller vessels may not be procurable within a reasonable time, that further special authority be granted by Congress for the admission to American registry of one or two such vessels as may be required, of about 4,000 tons each, for the transportation of supplies from New York to India, in pursuance of public resolution No. 8.

It is suggested that the terms, with respect to inspection, etc., provided in section 3 of the "Act to encourage American shipbuilding," approved May 10, 1892, in pursuance of which the foreign-built steamers *New York* and *Paris* were granted American registry, might with propriety be adopted in the case under consideration.

In this connection attention is invited to the inclosed copy of a communication from Messrs. T. Hogan & Sons, offering to charter to the Government, for the purpose of transporting food supplies to India, the vessels *Massapequa* and *Menantic*, upon terms specified, if these vessels can be "naturalized."

Very respectfully,

JOHN D. LONG, *Secretary.*

The CHAIRMAN OF THE COMMITTEE ON NAVAL AFFAIRS,
United States Senate.

Mr. CHANDLER. I shall ask that the joint resolution which the Senator from Maine has introduced, sent here by the Navy Department, may go over until Monday. I think the Secretary of the Navy has made a mistake in the remedy which he proposes to apply in connection with the difficulty which he encounters. Congress should at once remove the restriction upon the Secretary in hiring a ship to transport the food products to India which requires that it shall be an American ship.

Mr. HALE. If the Senator will allow me, this is the language of the joint resolution passed April 7, 1897:

Or to charter and employ, under the authority of the United States, a suitable American steamship or vessel.

That is the trouble with the Secretary.

Mr. CHANDLER. Yes, but the Secretary should have recommended to us to strike out the word "American," which we never should have put into the original authority. When we were providing for speedily sending the contributions of the liberal people of the United States to the starving people of India, we should not have limited the means of transportation to American ships. Everyone knew perfectly well, as the Senator from Maine has stated, and as the Secretary of the Navy has stated, that there would be found no suitable naval vessel, because a ship of war is not suited to transport cargo, and the United States possesses no naval transport vessels. So that authorization was a mere form. We should have authorized the Secretary of the Navy to transport the contributions in any steamship which he could procure at short notice for a reasonable price. He has discovered that there is no American steamship promptly available, and he now proposes that we shall give an American register to one or two foreign ships in order that they may carry the contributions.

Mr. HALE. The Secretary does not enforce this remedy. He simply refers to it, and incloses the communication from the New York parties who own the ships. I do not understand that the Secretary urges Congress especially to do this.

Mr. CHANDLER. The Senator will excuse me. I thought the Senator introduced a joint resolution coming from the Secretary for the admission of these ships to an American register.

Mr. HALE. No; the Secretary only refers to the measure. It does not to any further extent than that have his indorsement. He only refers to it as suggesting a remedy.

Mr. CHANDLER. The simplest thing in the world is for the Senator from Maine to introduce a bill striking out the word "American" from that authorization. These ships ought to carry the contributions, if they are ready to go. They ought not to be detained, but there is no need of admitting them to an American register. All we need to do is to authorize the ships, with the nationality that now belongs to them, to transport under an English register, if they are English ships, these American contributions to the suffering people of English India.

Mr. PERKINS. Mr. President——

Mr. CULLOM. Will the Senator allow me to make a suggestion?

Mr. MORGAN. Mr. President, I rise to a point of order.

The VICE-PRESIDENT. The Senator from Alabama will state his point of order.

Mr. MORGAN. I understood that the Senator from New Hampshire objected to the present consideration of the joint resolution.

Mr. CULLOM. I desire to suggest, as there have been a good many documents read which we have heard only in part, that it would be as well that the whole matter should go over and let the papers be printed.

Mr. PERKINS. That was the request I rose to make, and to supplement it with the statement that a few weeks since I was the author of a similar resolution. The charitable people west of the Missouri River contributed sufficient to load the ship. We had no difficulty in finding an American ship to transport the gift of the American people to the sufferers in India. The price that is proposed here to pay for these ships, granting them an American register, I venture to say, will amount to much more in value to the owners of the vessels than will the amount of freight, if we are obliged to pay it. I believe we have American ships flying the American flag that we can charter to take this freight, and we should pay them a larger sum than we pay to any ship flying a foreign flag.

But I want to second the request of the Senator from Illinois, that all the documents may be printed in relation to this matter, and that they may lie upon the table until Monday next.

Mr. HALE. Mr. President——

Mr. MORGAN. I object to the further discussion of this subject, inasmuch as it goes over to Monday.

The VICE-PRESIDENT. The point of order made by the Senator from Alabama is sustained by the Chair.

Mr. HALE. Will the Senator let me say one word?

Mr. MORGAN. Yes.

Mr. HALE. I see the force of the points that have been made by the Senator from Illinois, the Senator from New Hampshire, and the Senator from California, and I do not object to the whole matter going over in order that we may have time to consider it, and perfect some measure that will perhaps cover the point suggested by the Senator from New Hampshire.

I ask that there also be printed the act of April 7, 1897, so that all the documents relating to the subject may appear together.

The VICE-PRESIDENT. The act will be printed in the RECORD, in the absence of objection, and also printed with the other papers in document form.

The act referred to is as follows:

[PUBLIC RESOLUTION—NO. 8.]

Joint resolution authorizing the Secretary of the Navy to transport contributions for the relief of the suffering poor in India.

Whereas a famine exists in India which is daily causing thousands of deaths among the poor, which famine can readily be relieved from the surplus products of other parts of the world; and

Whereas generous people of the United States in different States are freely giving wheat, flour, and corn for the relief of the famishing inhabitants in India: Therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the Secretary of the Navy be, and he is hereby, authorized to employ and place at the disposal of the collector of the port of New York any ship or vessel belonging to the Navy of the United States best adapted for such service for the purpose of transporting to the famishing poor of India such contributions as may be made for their relief, or to charter and employ under the authority of the United States a suitable American steamship or vessel, with a cargo capacity of 2,000 to 4,000 tons, for the same purpose. Any sum of money which may be necessary to carry out the object of this resolution is hereby appropriated out of any money in the Treasury not otherwise appropriated.

Approved April 7, 1897.

The VICE-PRESIDENT. The joint resolution introduced by the Senator from Maine lies over.

AMENDMENTS TO THE TARIFF BILL.

Mr. HALE submitted an amendment intended to be proposed by him to the bill (H. R. 379) to provide revenue for the Government and to encourage the industries of the United States; which was ordered to lie on the table and to be printed.

Mr. SEWELL submitted an amendment intended to be proposed by him to the bill (H. R. 379) to provide revenue for the Government and to encourage the industries of the United States; which was referred to the Committee on Finance, and ordered to be printed.

Mr. HARRIS of Kansas (by request) submitted two amendments intended to be proposed by him to the bill (H. R. 379) to provide revenue for the Government and to encourage the industries of the United States; which were ordered to lie on the table and to be printed.

AMENDMENTS TO DEFICIENCY APPROPRIATION BILL.

Mr. GALLINGER submitted an amendment intended to be proposed by him to the deficiency appropriation bill; which was referred to the Committee on Civil Service and Retrenchment, and ordered to be printed.

Mr. MCBRIDE submitted an amendment intended to be proposed by him to the deficiency appropriation bill; which was referred to the Committee on Appropriations, and ordered to be printed.

VICTOR H. MACCORD.

Mr. CULLOM submitted the following resolution; which was considered by unanimous consent, and agreed to:

Resolved, That the Secretary of State be, and is hereby, directed to furnish for the use of the Senate a copy of Secretary Olney's note to Mr. Richard R. Neill, No. 210, dated Department of State, December 28, 1896, and copies of all communication and correspondence between the State Department and its legation at Lima, Peru, relating to the claim of Victor H. MacCord, a citizen of Pennsylvania, late a consular agent of the United States to Peru, against the Government of Peru, in South America.

BRIDGES ACROSS THE MISSOURI, MISSISSIPPI, ETC.

Mr. CAFFERY. A few days ago the Senate passed the bill (S. 426) to authorize the construction of bridges across the Missouri River, between its mouth and the mouth of the Dakota or James River; and across the Mississippi River, between the mouth of the Minnesota River, in the State of Minnesota, and Donaldsonville, in the State of Louisiana; and across the Illinois and Des Plaines rivers, between the mouth of the Illinois and the city of Joliet, in the State of Illinois; and to prescribe the character, location, and dimensions of the same. I enter a motion to reconsider the votes by which the bill was ordered to a third reading and passed. I move that the House of Representatives be requested to return the bill to the Senate.

The motion was agreed to.

FIRST LIEUT. BENJAMIN W. LORING.

Mr. PLATT of New York. I desire to call up the bill (S. 1337) to commission First Lieut. Benjamin W. Loring a captain. The bill was passed over yesterday for the purpose of information.

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill.

Mr. BATE. That is the case I objected to yesterday. I have since read the whole of the report. It is a peculiar case. While I can not support it, I do not propose to antagonize it at this time, especially as it has come unanimously approved by the Committee on Naval Affairs, who, I suppose, investigated it thoroughly, and it did not come from the Committee on Military Affairs, as I had at first supposed.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

Mr. MORGAN. Mr. President——

Mr. HOAR. Let the title of the bill be read again.

The SECRETARY. "A bill to commission First Lieut. Benjamin W. Loring as captain."

The VICE-PRESIDENT. The Senator from Alabama is recognized.

Mr. HOAR. What became of the bill which has just been before the Senate?

Mr. MORGAN. I object to any further consideration of the bill unless upon a motion to reconsider. It has passed.

Mr. HOAR. I rose before the Chair declared the bill passed, and after the passage of the bill the question is upon the title. So I am in time. I desire simply to state to the Senator who has the bill in charge that a bill to commission a person as an officer of the United States is not certainly a bill within the power of this body, and that the title should be changed. It is a bill to authorize such a commission. I merely suggest that the words "to authorize the President" be inserted in the title of the bill.

Mr. PLATT of New York. I ask that that amendment be made in the title.

The title was amended so as to read: "A bill to authorize the President to commission First Lieut. Benjamin W. Loring a captain."

WAR IN CUBA.

Mr. MORGAN. I ask that the Senate proceed to the consideration of the joint resolution (S. R. 26) declaring that a condition of public war exists in Cuba, and that strict neutrality shall be

maintained. I desire that the Senator from Nebraska [Mr. THURSTON], who has the floor, may have an opportunity to proceed with his remarks.

The VICE-PRESIDENT. Is there objection to the request of the Senator from Alabama that the Senate proceed to the consideration of joint resolution No. 26 at this time?

Mr. HALE. The Senator proposes to take up the Cuban resolution now instead of waiting until 2 o'clock?

Mr. MORGAN. Yes; it is the regular order for 2 o'clock. I desire to take it up now so that the Senator from Nebraska may proceed with his remarks.

Mr. HALE. I do not object to that at all. I did not understand the request.

The VICE-PRESIDENT. If no objection be made, that will be the order.

The Senate, as in Committee of the Whole, resumed the consideration of the joint resolution (S. R. 26) declaring that a condition of public war exists in Cuba and that strict neutrality shall be maintained, the pending question being on the motion of Mr. HALE to refer the joint resolution to the Committee on Foreign Relations.

Mr. THURSTON. Mr. President, this is the first time I have risen in my place to speak upon the Cuban question. For two regular sessions and a part of an extraordinary session of Congress I have occupied a seat in the Senate of the United States. During all that time the Cuban question has held a foremost place. It has been considered and discussed without limit and without restriction. It has been referred and reported, referred and reported, referred and not reported, in one form or another time and time again. During all this time the Cuban situation has appealed to and has aroused the sympathy and enlisted the interest of the liberty-loving people of the United States.

During all this time it has been exploited by the great newspapers of our country, whose brave correspondents have written their dispatches from the field of battle, knowing that at any moment death might close the written page. During all this time this question has been the subject of inquiry by individual citizens and by public officials. It has been the occasion for platform declarations on the part of all the great political parties of the country in national convention assembled. The records of the Senate are filled with reports and information upon the subject, and there are volumes and volumes of testimony in the archives of the State Department.

Mr. President, after the lapse of all this time, in view of the vast and varied information as to what has taken place in a little island at our very door, it does seem to me that every man in the United States ought to be ready and must be ready for action at this time. If there is a Senator upon this floor who has not yet information enough to enable him to conscientiously, honestly, and immediately act upon this great question, I respectfully commend him to the enthusiastic suffrage of his constituents for another term in the Senate.

Mr. President, my party has shown me where my duty lies. In the great Republican national convention held in the city of St. Louis in June last, over the deliberations of which I had the distinguished honor to preside, the Republicans of the United States, with a mighty and a triumphant shout that seemed to lift the roof above our heads, ratified and adopted the following resolution:

> From the hour of achieving their own independence the people of the United States have regarded with sympathy the struggles of other American people to free themselves from European domination. We watch with deep and abiding interest the heroic battle of the Cuban patriots against cruelty and oppression, and our best hopes go out for the full success of their determined contest for liberty.
>
> The Government of Spain having lost control of Cuba, and being unable to protect the property or lives of resident American citizens, or to comply with its treaty obligations, we believe that the Government of the United States should actively use its influence and good offices to restore peace and give independence to the island.

Mr. President, the great Senator from the State of Massachusetts [Mr. HOAR] has endeavored to place an impossible interpretation upon that declaration of the Republican platform, but I ask the Senate to read it for themselves. The Senator from Massachusetts says that the pledge of our party is to actively use the influence and good offices of this Government to restore peace and give independence to the island; and the Senator from Massachusetts says—at least the Senator implies—that the duty of the Senate and of the United States is to intervene in the Cuban situation rather than to first acknowledge the belligerency of the participants in that great struggle.

I ask the Senator from Massachusetts what conditions precedent are necessary to authorize the intervention of the United States in the Cuban situation for the purpose of securing the independence of that island? Is interference for independence justifiable on our part unless a state of war exists? Is it justifiable on our part unless the revolutionists have a government of their own? Is it justifiable unless they have a territory which they hold and occupy against all comers? Is it justifiable unless they have maintained that struggle long enough so that, in the opinion of this country, their speedy overthrow is not probable or certain? Is interference on our part for independence justifiable until the revolutionists occupy a position before the world as warriors in the field, as defenders of a government of their own, and as accredited belligerents before the civilized world?

For my part, with my weaker apprehension of this great problem, it seems to me that the preliminary step of all others which would alone justify the active intervention of this country for the purpose of securing independence is to accord to those people a standing as belligerents, entitled to the treatment and the rights of belligerents. And reading that declaration of my party, as I believe aright, I insist that it can not be faithfully enforced, it can not be faithfully carried out unless, if the facts justify it, we first declare that the revolutionists in Cuba are entitled to the rights of belligerents, and thereby lay the foundation upon which we can afterwards properly and decently and lawfully intervene.

It has been whispered about the Halls of this National Capitol that we should in some way side-track the pending resolution because it comes from a Democratic source. It is said that this Administration is of the Republican party and that the Republican party should have full credit for any steps taken by the Government to settle this vexed and disturbing question.

Mr. President, I am a partisan of the ultra type. I stand by the declarations of my party. I labor for its welfare, and I glory in its success, but over and above my duty to my party, I hold my love of country, my sympathy with humanity, and my worship of Almighty God; and I would be unworthy of the further confidence of my great party if I took any action upon the pending resolution influenced in the slightest degree by party considerations. No Republican, from party considerations, can afford to vote against the pending resolution, even although it was inspired and introduced by the venerable Senator from Alabama [Mr. MORGAN], who has, unfortunately, wasted so many years of an otherwise splendid life in following the false doctrines and worshiping the false idols of the Democratic party.

Mr. MORGAN. Mr. President, if the Senator will allow me, I wish to say, as was stated by the Senator from Ohio [Mr. FORAKER] on yesterday, that this resolution, in substance, if not in exact words, was copied from a resolution twice offered in the Senate by the honorable Senator from Ohio who is now the Secretary of State, and I think before that time it was offered in the House of Representatives. So that, if there is any political origin of this resolution at all, it originated in the brain of what I suppose might be considered the leading Republican to-day in the United States next to the President. So that in merely copying this resolution I claim no sort of agency in its origination, except in the same sense precisely that the honorable Senator is now patriotically expressing, disregarding all considerations of party, and looking alone to our own duty and the welfare of our own people. I had the honor to introduce the resolution, but after it had been passed in another form by the Senate more than a year ago.

Mr. THURSTON. Mr. President, I thank the Senator for his statement; but, without regard to that, this is a great, patriotic question, and for my part I can not consent to tolerate for a single moment the idea that any party consideration should be given to it.

The eminent Senator from Massachusetts has sought to interpose against the passage of the present resolution international law and the Constitution of the United States. I do not yield to the venerable Senator in my respect for international law, that great accumulated code of centuries, under which the commerce of the world is peaceably and safely carried on; but international law was not written by any delegated body representing the peoples and the countries of the earth. It is a series of chapters that were formulated by the cannon and by the sword. It is a series of rules laid down by the power of the great maritime nations of the earth for their protection and in their interest.

Mr. President, the book of international law has been contributed to by all the great powers to secure them in particular rights. In 1812 international law permitted a man-of-war of Great Britain to stop our merchantmen on the high seas and take the sailors from our ships for impressment into the British service; but, thank God, the sailors and marines of 1812 wrote with their blood another chapter of international law that made the deck of an American ship American soil. There is yet ample room for the writing of another chapter; and, if it is necessary for the proper solution of the Cuban question, I pray to God that my country may write that chapter in harmony with the advanced spirit and civilization of the closing hours of the nineteenth century.

Mr. President, what is the requirement of international law upon the question of whether or not this Government shall accord to the Cubans belligerent rights? I will discuss it dispassionately and as clearly as I can, without any attempt to arouse sentiment or to stir up passion or prejudice. International law, as laid down by the accepted writers, requires that a people, in order to have

their belligerency acknowledged, must first set up the standard of a revolution. That has been done in Cuba. They must for a certain length of time maintain a territory against the enemy. That has been done in Cuba for two years and a half. Read the declaration that was presented by the Senator from Ohio on yesterday, wherein the fact is thoroughly established that for all the period of that revolution one province of Cuba has been maintained and held by the Cuban patriots and revolutionists.

International law says that there must be an established form of government. Has there not been in this case? Could a war of this character for two years and a half have been carried on, think you, unless it were carried on under the form of an organized government, with some central authority behind it to secure moneys to arm and equip its soldiers, to issue commissions, and to authorize and direct the movements of the army?

International law also says that there must be a seat of government, and I have heard it contended upon this floor that belligerent rights can not be accorded because there is not found upon the map of Cuba a known or a fortified or an important town wherein the seat of the revolutionary government has been established.

A seat of government need not be held within fortified walls; it need not be a place where the habitations of men are clustered together and about. Sir, it need not be held within buildings made by hands or under domes erected for the purpose of beauty and adornment. It may be that the Cubans, from the necessities of the case, have gone to the mountains and have set up their seat of government under the eternal stars.

Liberty has always fled to the mountains for its safety and its shelter. In the hilltops the spirit of liberty first knew birth. In the eternal hills the standard of revolution for liberty has always been raised, and down from the mountains have always come the sturdy patriots who have eventually wrested from tyranny and oppression the governments of many of the peoples of the earth. God bless the hills; and if there is no reason other than that the revolutionary government is held in the mountains, where Providence has given them bastions and parapets and escarpments and fortifications without cost, then I say that international law has been fully complied with and there stands no reason, so far as a seat of government is concerned, why this declaration can not now be properly made.

Mr. President, international law requires that a state of warfare shall be carried on to such an extent that the civil authorities of the dominant government are no longer enabled to preserve and maintain the peace. Is there a man on all the earth who believes that for the past two years the civil authorities in Cuba have been enabled to preserve the peace and tranquillity of that island by the ordinary civil procedure, backed up by any proper aid of the military arm? No defender of the Spanish cause, no one who apologizes for their atrocities, no one who seeks to hinder and delay action upon this resolution, has so far even suggested that Spain can hold that island in peace and tranquillity under the ordinary processes of the civil authorities.

What then, Mr. President? International law requires that the revolution must have so far progressed that there is serious doubt about the power of the mother government to suppress it or subdue it in the near future. Is there any doubt that the war in Cuba has progressed that far? Has anyone challenged it? Why, Mr. President, let me read to you the dispatch in the newspaper of this morning coming from Spain, the utterance of one of her greatest statesmen:

MADRID, *May 19.*

At a meeting of the Liberal senators and deputies to-day Señor Sagasta, former premier, made an important speech, in the course of which he said: "We have 200,000 troops in Cuba"—

And no war! No war, with 200,000 troops gathered from the farms and the hillsides of Spain, the last desperate levy of the Spanish authority upon the youth of that land. Two hundred thousand troops in Cuba, and no war! Cuba is pacified; no trouble; the day for action by the United States of America has passed away! Only 200,000 Spanish troops in that little island!—

"but we are not even masters of the territory trodden by our soldiers."

I do not take the newspaper correspondence; I do not take the unverified statements from interested parties; I take the public declaration made by the former premier of Spain on yesterday to the Spanish people in the capital of that Kingdom:

But we are not even masters of the territory trodden by our soldiers. The picture could not be gloomier. We have war in Cuba and in the Philippines.

War in Cuba, not on the authority of newspaper correspondence; not on the authority of a letter from one who is in the insurgent ranks; not on the authority of rumor or repute, but on the authority of the former premier of Spain. He says, "We have war in Cuba;" and can civilized mankind question the sincerity or propriety of the Government of the United States in saying the same? Yet we are constantly hearing that the island is pacified.

The commander of 200,000 men has sent his bulletins over all the world and announced that peace prevails. What for, Mr. President? He who runs may read. Spain has drawn upon her last available man; Spain has exhausted her credit in the money centers of Christendom. If she gets another loan with which to carry on that sanguinary war for even a few more months she must do it by satisfying the money loaners of the world that she is already within sight of ultimate victory, and that the resources of that island are within her grasp for the repayment of the loan.

Peace in Cuba! If there is peace in Cuba, it is the peace of devastated fields. Peace in Cuba! If there is peace in Cuba, it is the peace of blazing homes. Peace in Cuba! If there is peace in Cuba, it is the peace of ravished women. Peace in Cuba! If there is peace in Cuba, it is the peace of starving children; yea, and its pæans are sung alone by the silent lips of the unconfined dead, whose white, upturned faces are nightly kissed by the pitying stars. No, no, Mr. President, there is war in Cuba; bloody, sanguinary, awful war. Our ears can not be dulled to its roar; we can not lightly put aside the fact. War is in Cuba; war has been maintained in Cuba for two years and a half; and to-day Spain is no nearer the subjugation of the revolutionists than she was at the moment of the first engagement.

What then? All the conditions of international law are met. That being the case, I state as an absolute and unanswerable proposition that this Government has the right to recognize the belligerency of the revolutionists, and in availing itself of that right it does not offer any affront under the law of nations to the Government of Spain. Read what the international law writers have said upon this subject. I have not the time, nor is it my purpose to-day, to present them in detail to the Senate, but I know what the principles are. I have read them and all that has been written on the subject.

The right of deciding when a cause for recognition of belligerency exists is a right belonging solely and alone to the nation that takes the action. With that decision and that declaration no other government on earth can find fault. It is a right we exercise, recognized by the law of nations, often acted upon by the great powers of the world. When Spain recognized the belligerency of the Southern Confederacy, we neither did nor could we have taken exception to that determination and that action on her part. It was her right to decide then, and it is our right to decide now.

Why should we not act? The great Senator from Massachusetts, it seems to me, has dwarfed and narrowed the consideration of this proposition. He puts it upon purely commercial and material and monetary considerations. Why should we not act? Mr. President, Cuba lies at our very doors, within a few hours' sail from our ports. We have with her, or had with her, a great and an advantageous trade relation. Our citizens have acquired and occupied and carried on great plantations in the Island of Cuba for their own advantage and for the trade advantage of the people of this country.

Why should we not act? There is no nation, there is no place upon the face of the earth with which we have such immediate, such direct, such important commercial and other relations as with and in the Island of Cuba. Greece and Turkey may engage in war, and it matters little to us. Russia, Germany, Italy, and England may embroil themselves; Africa may become the seat of great strife and warfare; but they are distant countries; our relations with them are not relatively of the same immediate importance as our relations with the Island of Cuba.

Why should we not act? I will put it upon no other than purely commercial grounds, if you please. During the pendency of that war our trade has been practically cut off; we have lost the advantage of the Cuban market. During these two years and a half the interests of American citizens in that island have been swept away by sword and fire. During these two years and a half the citizens of our country temporarily resident therein have been subjected to the inconveniences and the dangers, and oftentimes to the horrors, of that warfare. Yea, even to-day, in the sunshine of the nineteenth century, in "a pacified island," American citizens, 800 in a group, are homeless and houseless and hungry and starving and appealing to us just for bread. Has a situation ever before arisen which has shown so great necessity for action upon the part of this Government as does the Cuban present situation?

Mr. President, why should we not grant belligerent rights to the revolutionists? We should do it, first, because every thoughtful man is convinced that Spain never can subdue that island, and that if peace comes to it, it will come in some other way. If the plantations once more bloom and blossom, it will be from some other cause. If our citizens once more have protection and shelter and food, it will be because of some other reason than any probable or anticipated triumph of the Spanish authorities over the revolutionists. Why should we not act now?

It is the abiding conviction of the American people, fortified by the solemn facts of the case, that if peace ever comes to Cuba it will come under the Cuban flag, under the government of its own people, as a part of that grand result which will drive the last

claimant of despotic authority in America to the other side of the Atlantic Ocean.

Mr. President, I am not asking or urging intervention at the present time. The grounds are not properly laid. We can not intervene in Cuba now. We can not carry out the ultimate declaration of the Republican party now. We must first lay the foundation, and that foundation can only be laid by a declaration on the part of the proper power in the United States according belligerent rights to the Cuban revolutionists.

How shall that action be taken? It has been gravely urged on the part of Senators opposing this resolution that this proposed action calls for the exercise of one of those constitutional powers exclusive in its nature and vested alone in the President of the United States. I yield to no man in my respect for the Constitution of my country—that sublime document which has stood and will stand for ages yet to come as the bulwark of human liberty—and yet we can not close our eyes to the fact that constitutions are written by statesmen in the light of the knowledge and the experience of their own times, while they are construed, as generation follows generation, by the gathered wisdom and the ripened experience of progressive and advancing civilization.

Mr. President, I propose to discuss for a few moments the question as to how the power of this Government to recognize belligerent rights can properly be exercised. I ask Senators to read the Constitution of the United States in all its provisions, and tell me in what line there is any direct grant either to the President or the Congress to recognize the belligerency of a revolutionary people. It can not be found. Criticism has been made upon the fact that there is no such direct grant in that great instrument to the Congress of the United States; neither is there any direct grant of that power to the President of the United States.

In whatever way, by whatever authority that power is to be exercised, that action taken, the right to do it must be derived from the implied and not the expressed powers conferred upon one branch or the other of this Government under the Constitution of the United States. Congress has power to regulate commerce, Congress has power to make war, Congress has power to raise armies, and it is given special power and broad authority to exercise all such other powers as are necessary to carry into force and effect the powers specifically given.

Under what provision is the claim made that the Executive alone can act in this matter? I call the attention of Senators to the effect of that proposition. If the Executive alone can act, then for four long years the one-man power in the United States may stand in the way of the unanimous desire of the people of this country in its relations to a neighboring people. I assert, in the first instance and in the broadest possible way, that neither by direct provision nor by intendment did our fathers ever vest in any one man the power to stand for four years against the wishes and the will of the American people.

There is given to the President of the United States the right to receive foreign ministers and ambassadors, but does that give the President of the United States the sole and exclusive right to determine for himself and for the whole period of his executive term what nations or what peoples are upon such relations with us that they are entitled to send ambassadors and ministers to the United States?

In the President of the United States under the Constitution is vested the executive power, and when you run this question down, it will be found that the contention of the opposition rests finally and alone upon the broad proposition that the recognition of belligerent rights or the independence of a neighboring people is a mere executive act. I deny it. I deny it for the people of this country, who have a right to participate in any such action. Executive power! What is executive power? Where shall we turn to discover that indefinite, that shifting, that transitory line of demarcation among powers purely executive and powers quasi executive, and powers partially legislative and powers partially executive? Where shall we turn? Will it be to the recorded decisions of the courts of our country?

I have read every case that has been cited on the great question of executive power as applied to a situation of this kind. I grant you—and I call the Senators' attention to the proposition—that while the courts of our country have repeatedly declared that the President of the United States may lawfully give recognition to a people under conditions similar to that of the Cubans, while the courts of our country admit that when such recognition is accorded by the action of the President of the United States, it stands as the action of the country, I challenge the Senators to find me one case, to read me one line in the decisions of the courts of the United States which, directly or indirectly, by exact statement or by intendment, denies that that same power may be otherwise exercised or that the Congress of the United States may not also act.

Where shall we turn for the definition of executive power? Shall we go to the established doctrines of monarchies under other systems? We can not safely look there. If we do, the Congress of the United States, under our Constitution, as to all those subjects over which it is given jurisdiction, has the same absolute power of action as has the Parliament of Great Britain, and the power of Great Britain through its Parliament has never been limited, but is supreme. Where shall we go? Let us go to the spirit of republican institutions which animated our fathers when they drew that sublime instrument, and going there, I insist that they did not believe in a government of any one man, and they did not intend to vest, and did not vest in any one man the sole power of action in great and important matters affecting the welfare of the whole people.

Mr. President, I grant you that this act of recognition partakes in some degree of an executive function, but not wholly and alone. It is one of those quasi executive-legislative actions that can be taken properly either by the President or by the Congress of the United States. Why not? When the Congress of the United States acts, it acts as the Senate, it acts as the House, and it acts as the President. All three branches concurring in the joint resolution exercise their full power and have their full say. Yet the Senator from Massachusetts [Mr. HOAR] has repeatedly upon this floor put the apparently posing proposition: "Suppose the Congress of the United States recognizes Cuba, and suppose that when Congress adjourns the Cuban revolution is over and the Spanish authority is supreme. Suppose in the meantime we have accepted and received an ambassador from that country. What will happen?"

When the state of facts ceases to exist the power of the ambassador is gone. You might as well tell me that because the President of the United States has received an ambassador from Greece, if Greece to-morrow should be wiped out of existence, the Congress of the United States could not, by appropriate action, declare the newly formed relations of this country with Greece and Turkey and the other European powers.

Mr. President, it is best that the Congress of the United States should act in a grave crisis like the one existing at the present time. We have the utmost confidence in our present Executive. There is no man living upon the earth who has a higher estimation of his grand and glorious qualities than the speaker of the hour. It is not a question of the present Executive. It is a question to be considered for all time and as to all Executives who may follow him. It is best that this great power of recognition and of intervention and of acknowledgment of independence should be exercised by the Congress of the United States, by the three coordinate branches of the Government acting jointly and together, rather than to trust its exercise to any living man, or any Executive we may ever have.

When it is proposed that this great power, upon which may depend the peace and happiness and prosperity of this country, the improper exercise of which may lead to bloody and disastrous war, shall rest with one man alone, I cry to the people of my country, "Take care; it is a dangerous ground to stand upon." I say to my country, "Take care; it is a dangerous place upon which to rest the welfare and the safety of our posterity."

The Senator from Massachusetts [Mr. HOAR] has sought to stop the passage of the joint resolution by pointing out that its enactment will operate entirely for the benefit of Spain and disastrously to the revolutionists of Cuba. Is it not strange that the party who is to be most benefited by the passage of the joint resolution has inspired its opposition wherever that opposition has been found?

Is it not strange that Spain, which is to be accorded the right of search of American ships, is the only power upon all the earth that is protesting vigorously against this action on the part of the Government of the United States? I judge of probable results by the anticipation of the parties in interest, and when I find one party earnestly opposing and protesting against a particular action and the other party earnestly and eagerly seeking it, I am satisfied for myself to believe that those two great parties in interest know what they want and what the effect of our action will be.

Mr. President, what will be the changed relations as to the Cuban people and the Spaniards when the revolutionists are accorded the recognition of belligerency by a great power like ours? In the first place—and I say it advisedly, and Spain knows it—from the hour that recognition is given, Spain can not borrow a dollar for her bankrupt treasury from the money loaners of the earth. She can not get another dollar to buy a sword, to load a musket, to sail a ship. Spain knows it. From the hour that recognition is accorded by a great power like ours, the Cuban revolutionists will be the parties who can find faith and credit with the money loaners of the earth. Spain knows that, too.

To-day there is no government in Cuba of a kind or character or of a recognized existence that will make a Cuban bond collectible even if independence be afterwards achieved. But from the hour that the revolutionary forces are recognized by a great nation as entitled to belligerent rights, from that hour, if they eventually achieve their independence, their securities can be enforced as the valid and existing obligations of the new government. These are the propositions: To-day Spain has the credit. After we have

recognized the Cubans, the revolutionists will have the credit in the money markets of the world. That means the settlement of the whole controversy. That means the favorable termination of the revolution. That means the independence of Cuba.

But this is not all, Mr. President. There is something else. The great Senator from Ohio [Mr. FORAKER] pointedly stated yesterday the other advantages that would accrue to the Cuban people and the other advantages that would accrue to the people of the United States in our maritime relations and at our ports by the recognition of belligerency.

To-day the Cuban cause has not even a name that is accepted in the civilized world. To-day her ships have no right upon the seas; her armies no place upon a recognized field. To-day, if a small schooner manned by Cuban sailors were to put into an American port for refuge, we could not maintain our treaty obligations with Spain and protect it in our harbor. To-day Spain can sail her ships into the harbors of the United States and load them with guns and ammunitions, with soldiers, with horses, with cannon, and freely sail out upon the high seas without surveillance, without detention, without inspection, and she can carry those munitions of war to the Cuban shores.

Mr. President, it is within the knowledge of Senators upon the other side of the Chamber that the authorities of Spain have been purchasing munitions of war and horses in the United States, taking them freely from our ports to use against the insurgents in Cuba. And yet we are compelled under our treaty, under the law of nations, under the statutes of Congress, to police our harbors, to spy upon every act of any suspected man, to chase every little vessel that sails from our shore for fear she carries a dynamite gun or a bomb of some kind to be used against the Kingdom of Spain.

I do not altogether agree with the Senator from Ohio that the acknowledgment of belligerent rights will particularly change our duty in our harbors and our ports toward the Cubans, but it will change our duties toward the Spanish people and put Spain and Cuba on the same footing in every port of the United States. That is an advantage to Cuba. That is an advantage to us.

The Senator from Massachusetts, great in all things, has argued upon this floor that we ought not to perform our plain duty because if we do Spain, under the law of nations, can search our ships upon the high seas. To-day under the law of nations Greece can search our ships upon the high seas; Turkey can search our ships upon the high seas. If Great Britain and France go to war we must maintain neutrality between them, and either party may search our ships upon the high seas. Is that inconvenience; is that right on the part of Spain a reason why this great Republic should fail in the performance of a solemn and important duty?

The Senator from Massachusetts has stated that Ulysses S. Grant—great in war and great in peace—said that the right of search of American vessels by Spanish ships would lead to war. Why lead to war? If that search were conducted in accordance with the rules of international law, there could be no provocation for war upon either side, and if that search were conducted without regard to the rules of international law by Spain, or any other power on the face of God's round globe, then there ought to be war, to maintain the honor of the nation.

Mr. President, war is an abhorrent thing. I hope that its bloody shadow may never fall athwart our sky again. War is a terrible thing, and yet no advance toward liberty has ever been made except by the bloody pathway of war. War in defense of human liberty and human right is God's thunderstorm; it clears the air for humanity's advance.

Let us have no talk of war. It is nonsensical. It is interjected in this debate for the mere purpose of delaying, of procrastinating, of defeating action in this important matter.

Mr. President, I have already occupied the time of the Senate too long. I have only sought, in a general way, to show to the people of the United States that our proposed action is right and just. I am a conservative—conservative in thought, in judgment, and in action. I hold by inheritance the stubborn conservatism of the New England hills. By my professional life I have been taught that every question should be carefully considered, scrutinized, and examined, and that hasty action is always dangerous.

I have not been hasty in reaching the conclusion to vote for the pending joint resolution. I have not resolved upon my course without the most careful and patient examination of the Constitution of my country. I have not determined what I would do without listening to all this great debate, without fortifying myself with a thorough knowledge of international law and all the facts that exist in regard to the Island of Cuba. When I vote there will be behind my vote my deliberate judgment, my conscience, and my manhood as an American citizen.

Mr. President, I am free to confess to the great Senator from Massachusetts that in the consideration of this question my sympathy, my love of country, my love of liberty have gone hand in hand with my investigation of the important facts and my study of the principles of law that govern the case. I would not divest myself in this important action from all considerations of sentiment.

Almost thirty years ago a story went the rounds of the American press, and this was it: The story said that one day a little ship was captured by the Spanish authorities in an attempt to land arms upon the Cuban shore. The crew were seized, tried by drumhead court-martial, and sentenced to be shot at the sunrise of the morrow. Among those men was one humble, simple American sailor. He had enlisted for the voyage without knowing the destination of the vessel or the character of the cargo carried; yet he was, seized and tried, if you may so call it, and sentenced to be shot at the sunrise of the morrow.

In some way late at night word reached the American consul at the nearest seaport town. He had no opportunity to wait upon the authorities of Spain; he had no chance to appeal for official action; but, as a representative of the United States, at daylight of the morning he mounted his horse and hastened away to the scene of the execution. When he arrived he found these sailors, and among them the American sailor, drawn up in line, and opposite them, with guns in their hands ready to shoot them down, were the soldiers of Spain.

Our consul went to the officer in charge and said, "Sir, that man is a citizen of the United States. He has committed no intentional crime against the King of Spain. In the name of my country I demand that he be given an opportunity in the civil courts of Cuba to establish and maintain his innocence." The officer said, "Sir, I have the warrant of the King of Spain to shoot that man at the rising of the sun, and he will surely die."

The sun came over the sea, kissing the distant billows with a tinge of glory. That same ray of sunshine, it may be, shone through the window of a little cottage in the northern land, upon the sleeping face of a devoted wife and the curly head of the innocent babe that lay at rest upon her holy breast.

The sun came over the sea and fell upon the brow of this American citizen condemned to die. The order was given, "Ready! Aim!" The American consul, seeing that no other effort would avail, drew from his bosom a silken flag of our own free land, and, springing forward, wrapped its glorious folds around this man condemned to die, and turning to the soldiery of Spain cried out, "Shoot if you dare; but if you shoot that man, you shoot the flag of the greatest nation of the earth!" And the flag saved him.

Mr. President, that story may have been but the merest fancy of a romancer's brain, but I have loved to believe it true. I have loved to believe that the flag of my country would protect its citizens on land and sea the wide world round. I have loved to believe that the power and prestige of my country would be recognized by all of the potentates of all the earth. I have loved to believe, I do believe, that the United States of America readily accepts that supreme position of power and leadership assigned her by Providence as the one great nation of the Western Hemisphere, the one great republic of the earth. I have loved to believe that the friendly offices, the divine sympathy of our people would go readily and speedily forth to give succor and aid and comfort and assistance to every people struggling to achieve freedom for themselves. These to the selfish and sordid and grasping spirit of mercenary times may seem but dreams, but on their realization hangs the welfare of mankind.

Mr. President, I love the Constitution. I observe the laws of my country. But under the Constitution and by the laws of my country I insist that this Government can now at this time give the Cuban revolutionists a proper standing before the world. Under the Constitution and by the law we can give them the right to float a flag on land and sea; we can give them a right to insist upon the ordinary and recognized usages of civilized warfare; we can give them a right to stand side by side with Spain in the money markets of the world, and we can see to it that from this day on in the Island of Cuba no American citizen shall be deprived of his property, his liberty, or his life without due process of the law.

Mr. President, these things the United States of America can constitutionally, lawfully, and properly do. Let us do them now. Yea, Mr. President, and as an earnest of our sincerity and good faith, let us dispatch the most powerful battle ship of the United States to Cuban waters. Let us station her there in the harbor of Habana—in the harbor of Habana, where her frowning guns may disturb the spirit of tyranny by night, and where by day the shining stars of her floating flag may gladden the eyes and inspire the hearts of those who struggle to be free. [Applause in the galleries.]

Mr. ELKINS obtained the floor.

The PRESIDING OFFICER (Mr. PERKINS in the chair). The Chair will ask the Senator from West Virginia to suspend a few moments while the Chair lays before the Senate a message from the President of the United States.

Mr. ELKINS. Certainly.

PACIFIC COAST DEEP-WATER HARBOR.

The PRESIDING OFFICER laid before the Senate the following message from the President of the United States; which was

read, and, on motion of Mr. WHITE, was, with the accompanying papers, ordered to lie on the table, and to be printed.

To the Senate of the United States:

I transmit herewith, in response to the Senate resolution of the 10th instant, addressed to the Secretary of War, a report from that officer, and accompanying map and papers, relating to the completion of the improvement of the harbor for commerce and of refuge at Port Los Angeles or at San Pedro, Cal., under the provisions of the river and harbor act of June 3, 1896.

WILLIAM MCKINLEY.

EXECUTIVE MANSION, *May 20, 1897.*

MANUFACTURE OF ARMOR PLATE.

Mr. BUTLER. With the permission of the Senator from West Virginia, I ask unanimous consent for the present consideration of the resolution I send to the desk.

The resolution was read, as follows:

Resolved, That the Secretary of the Navy be, and he is hereby, directed to inform the Senate the amounts of armor plate purchased by the Government at various times from the Bethlehem Iron Company and the Carnegie Steel Company, respectively, and the price paid per ton, and how much financial assistance, if any, the Government has given these companies, either by extra price per ton for armor plate or in any other way to assist them in building and equipping and conducting their armor-making plants.

Mr. HALE. All of that information is contained in the reports that have come from the previous investigation made by the Committee on Naval Affairs. The Senator can find in those volumes every item of information that he seeks for; but if he prefers to go over the ground again and oblige the Navy Department to make a new report, I have no objection. There is no need of the resolution.

Mr. BUTLER. I would prefer to have the information together in the form of a report from the Department just at this time, inasmuch as the question will come before Congress at an early day.

The PRESIDING OFFICER. Is there objection to the present consideration of the resolution?

Mr. CHANDLER. I dislike to object, but what the Senator from Maine states is exactly true. The report of the committee and the report of the Secretary of the Navy, Secretary Herbert, give every single fact that the Senator from North Carolina asks for.

Mr. HALE. And in very compact form.

Mr. CHANDLER. And it can be collated and put together in five minutes. I can take, and so can the chairman of the Committee on Naval Affairs take, the resolution, and from the documents already printed by the Senate in document form, and inserted in the RECORD by the Senator from Pennsylvania [Mr. QUAY] as a special number of the CONGRESSIONAL RECORD, I can in five minutes write out the answers to the questions put by the Senator in his resolution.

Mr. BUTLER. Then certainly it will not give the Department very much trouble, and it will be very valuable information to the Senate. We shall get it in a very compact form, and it will give the Department very little trouble to collate it.

Mr. CHANDLER. I ask that the resolution go over.

The PRESIDING OFFICER. The resolution will go over, under objection.

Mr. BUTLER. I hope the Senator from New Hampshire will not object, inasmuch as the matter is now before the committee.

Mr. CHANDLER. If the Senator wants to have the resolution passed on Monday next, I shall not make any objection; but I do think that, when we have from a Department every fact that can be given, certainly every fact the Senator asks for and which ought to be made public, we ought not to ask them to duplicate the information merely to gratify the notion of one Senator. However, if the Senator wants it passed on Monday next, I shall not object. I do object now, Mr. President.

The PRESIDING OFFICER. Objection is made, and the resolution goes over.

ENROLLED BILL SIGNED.

A message from the House of Representatives, by Mr. W. J. BROWNING, its Chief Clerk, announced that the Speaker of the House had signed the enrolled joint resolution (S. R. 42) appropriating $50,000 for the relief of suffering American citizens in the Island of Cuba.

WAR IN CUBA.

The Senate, as in Committee of the Whole, resumed the consideration of the joint resolution (S. R. 26) declaring that a condition of public war exists in Cuba, and that strict neutrality shall be maintained, the pending question being on the motion of Mr. HALE to refer the joint resolution to the Committee on Foreign Relations.

Mr. ELKINS. Mr. President, it is not my purpose to detain the Senate with a discussion of the merits of the pending resolution. I want to speak more particularly to the motion to refer the resolution to the Committee on Foreign Relations, so that it may have full consideration, be reported upon, and the facts, findings, and conclusions of law be made fully to appear for the information of Senators before they vote on this most important and far-reaching subject.

The joint resolution was introduced on the 1st day of April, and there is not officially before the Senate one fact in its support. There is no report containing the evidence and the facts whatever before the Senate that would enable the Senate to reach a conclusion. There is no finding of facts, as there should be, to support the statements in the resolution. There is no information from the Foreign Relations Committee or any other committee as to the effect of the resolution, nor are there any reasons before the Senate, except the able speeches of Senators in its behalf, to show why it should pass.

Ordinarily any joint resolution of moment or any bill is referred to a committee. What for? To have it investigated, considered, and passed upon, and a report made for the information of the Senate. We can not take out of the Treasury of the United States a hundred dollars without having the report of a committee upon the subject. Now, here is a joint resolution which promises to be, and perhaps is, the most important subject which the Senate will be called upon to consider during the present session. It is a great transaction taking place in the Senate of the United States, in the presence of the country and the whole world looking on, which will either assist in the birth of a new nation or lead to war, or possibly both, and yet it does not have the consideration of a committee.

It is not treated in the usual and ordinary way that joint resolutions and bills are treated in the Senate. There is nothing to establish, prove, or support in any way the statements set forth in the resolution. I may remark just here that this extraordinary session of Congress was called for one purpose only, to look after the interests of the country, provide revenue for a bankrupt Treasury, and revive languishing industries. We have trials, troubles, and difficulties at home, the welfare of our people to care for, and we ought not to take on ourselves the burdens of other people. People out of employment, hunting for work to support worthy families, need our care quite as much as the Cubans.

The joint resolution recites—

That a condition of public war exists between the Government of Spain and the government proclaimed and for some time maintained by force of arms by the people of Cuba.

Now, Mr. President, Senators are here in a double capacity, legislative and judicial. We are called upon to vote whether this is a fact or not, and I insist there is nothing before the Senate to prove or establish the fact that there is a public war in Cuba. Senators have their own information and their own ideas on the subject; but there is nothing before the Senate that wears the stamp of authority to support the statement.

If there is a public war there, we are entitled to know, before we vote upon the joint resolution, all about the war. We are entitled to know the number of soldiers on either side. We are entitled to know where the insurrectionary government has its capital or headquarters. We are entitled to know if battles have ever been fought there of any moment, and if so, where. We are entitled to know the number of insurgents, so as to judge how respectable their claims are to be called an army. But there is not one word; and I challenge the Senators on the other side advocating the immediate passage of the joint resolution to show, in proper form, any fact in support of these statements. I mean facts officially ascertained and determined in a proper way.

Has this resolution been referred to the State Department for report, information, and advice? The State Department has all needed information on the subject. The usual rule of the Senate is to refer all bills and resolutions to the proper Department for report and suggestions, so that Senators may be advised and have all the facts before them. If, as claimed, all the facts are in favor of the Cuban insurgents and support this resolution, why not bring them into the Senate in the ordinary way?

Mr. CHANDLER. Mr. President, will the Senator from West Virginia allow me to answer that challenge?

Mr. ELKINS. I will be interrupted for that purpose.

Mr. CHANDLER. The Senator, on the 28th day of February, 1896, last year, voted himself, on two or three roll calls, in support of a resolution in the exact language of the resolution which he has just read. Now, that is something of authority. But there were also before the Senator at that time the report of Senator Cameron from the Committee on Foreign Relations, and the papers accompanying the report in two documents, Fifty-fourth Congress, second session, Report No. 1160, Senate Document——

Mr. ELKINS. I understand the Senator.

Mr. CHANDLER. Wait a minute. Those documents were before the Senator then to justify his vote at that time and they are before him now. When the Senator challenges the Senators who desire to vote upon the joint resolution without referring it to a committee for some evidence, here is the evidence backed up by his own vote one year ago.

Mr. ELKINS. That resolution was a concurrent resolution and this is a joint resolution; one has the force of law, and the other is only advisory, and the Senator knew it when he interrogated

me. I tell the Senator now there is not a scintilla of evidence, there is not a fact before the Senate wearing the stamp of authority, in support of the pending resolution. There never was a resolution like this in this Senate before. The other resolution was quite different. This resolution means a great deal more. This means the coercion, the embarrassment of the President of the United States in the performance of a duty that belongs to him alone, and compels him to do what perhaps he may not want to do, namely, veto the joint resolution or approve it. I want the Senator now to make good his statement. Where is the fact that you have before the Senate under this resolution?

Mr. CHANDLER. Here they are.

Mr. ELKINS. That is not in support of this joint resolution, and you know it. Does that come from any committee?

Mr. CHANDLER. Certainly.

Mr. ELKINS. What committee?

Mr. CHANDLER. It was reported from a committee.

Mr. ELKINS. What on?

Mr. CHANDLER. A minority report from the Committee on Foreign Relations.

Mr. ELKINS. On what?

Mr. CHANDLER. On a resolution——

Mr. ELKINS. Yes, a resolution, but not the one now under consideration. This resolution proposes, in my judgment, to take from the President his rightful prerogative under the Constitution. It proposes to embarrass him in the discharge of a delicate duty that belongs to the Executive under the Constitution, and not to Congress.

If you want to help the Cuban cause or do justice between Spain and the insurgents, this is not the proper way. This is not the way to restore peace to that unhappy island, but it is the direct way to intensify the war and imbitter at least one of the parties to it.

Mr. CHANDLER. If the Senator will allow me, and not get excited, in the exact language of the joint resolution that he is now talking against, except that one was a concurrent and the other is a joint resolution. But that makes no difference in the assertion nor in the facts upon which the Senator gave his vote two years ago, and now for some reason or other has changed his vote.

Mr. ELKINS. The Senator admits that that was in support of a concurrent resolution before the Senate two years ago.

Mr. CHANDLER. A year ago.

Mr. ELKINS. A year ago, then. The Senator has not made good his proposition that there is anything officially before the Senate in support of this resolution. Senators are not permitted to know anything officially. The distinguished Senator from Ohio [Mr. FORAKER] let in a little official light in the debate yesterday. How eager the Senate was to get this mite of official information which he had, and one other Senator, as I know. Why not give the facts to the Senate and to the country? Let me tell Senators who advocate this resolution that this question is of tremendous importance to the whole country, and the facts should not rest with a few Senators, who are permitted to know all about the case when others are not. This question concerns deeply the people of the United States; they are entitled to know the facts.

I repeat with emphasis that you have produced nothing here in support of the joint resolution. Bringing out the report on another and different resolution passed a year ago, I hold, proves nothing. Courts in the trial of an ordinary case would not proceed in this way. A judge who had to pronounce judgment or give a decision would require the facts to be presented.

It is evident that the resolution is going to pass. Why can it not be passed in the orderly and dignified way? The Senate is engaged in an important and serious transaction. Why can not the resolution be referred to the Foreign Relations Committee, and this great committee bring in a report Monday, Tuesday, or Wednesday, giving all the facts, their findings, and the law, stating as well the rights of all parties in interest if the resolution should become a law? There is no disposition to delay a vote upon this question. It is evident that Senators are going to vote for the joint resolution. Ought we not to inform the people of the United States and the world upon what we based our judgment and action? Should we not leave recorded in the Senate the reasons that moved Senators to vote for the resolution?

History will be made up in this matter after this fashion: A resolution of five lines recognizing the belligerency of the insurgents in Cuba passed the Senate on such a day; no facts given; no reasons assigned. Those who follow us in the Senate will look in vain for something, for some reasons for this strange precedent, this departure from the orderly procedure of the Senate in such cases. Those who come after us can not hear and be captivated and fascinated by the oratory we have listened to from the distinguished Senators who have spoken in the last two or three days. The people are entitled to know, and posterity is entitled to know, and the world should know, why and how the Senate reached a conclusion on this subject. Called on to vote, I have no light or information on this subject that is authoritative, only vague rumor.

The resolution says:

> A state of public war maintained by force for some time, etc.

How long? First, we ought to have knowledge as to the character and duration of the war. We should know where the capital of the insurgents is situate. Where and to whom will you send this resolution when it is passed? How is the President of the United States to find the post-office address of the president of the Cuban Republic? Who knows where it is? You will have to send General Miles with the Army to deliver this joint resolution. You can not find the Cuban officials. So far as we know, under this resolution, there is no proof of their existence.

The contest in Cuba has been likened to our civil war. Why, the Confederate government had a capital. It had a congress. It had courts. It exercised authority and jurisdiction through civil and military power over a third of the Republic and a third of the inhabitants.

You always knew where to find the Confederate army, Confederate generals, the Confederate government, its president and officers. This government maintained itself for four years. Its armies and generals were as fine as the world ever saw, and the people engaged in the revolt against the United States were brave, courageous, intelligent; nearly everything favored their success but the cause for which they struggled, and notwithstanding all this, we denied the right of European nations to recognize their independence. And the Cuban insurrection is cited as a parallel. Why did not the distinguished Senator who drafted the resolution say how long the war has been maintained—for two years, or three years, or one year, or long enough to authorize us to believe and feel it is an actual and public war? The resolution goes on to say further:

> And that the United States of America shall maintain a strict neutrality between the contending powers, according to each all the rights of belligerents.

Mr. President, the Senate ought to be advised by the Foreign Relations Committee as to what these belligerent rights are and how far and in what way the resolution will affect or help the Cuban insurgents; how far it will affect the people of the United States, and how far it will affect the Spanish Government, and present our relations with each and all of those people. We are entitled to know this at the hands of the Foreign Relations Committee and to be advised on all these points. Then we could vote knowingly and perhaps wisely on this subject.

The question of belligerent rights is a legal question. The Senator from Ohio differs from the distinguished Senator from Massachusetts on this subject, but if we had the report of the Foreign Relations Committee, matured, well digested, fortified by authorities, then we would know, or feel we knew, what the law is in this case, as well as all the important facts necessary to reach a conclusion.

Mr. President, we do know, from the speech of the Senator from Ohio yesterday, that there is danger of war if the joint resolution passes, so far as the United States is concerned. I have some patriotism left in me, and I love liberty, but I stand here as the trustee of a great nation, not to be moved by my sympathies nor by pure sentiment, nor to work myself up into a frenzy about oppression and outrage on the part of a people struggling for independence and forget the true interests of my country.

Sympathy and sentiment should have no part or place in the treatment of foreign questions. We can only be guided by justice, international law, and the interests of our own Government.

The distinguished Senator from Illinois [Mr. MASON], in his great speech, said the Spaniards taxed children immediately after birth and brides at the altar. Listening to him and his lurid eloquence, I wondered why Spain did not tax grown-up men and women.

Mr. MASON. Very few of them grow up.

Mr. ELKINS. And he reasoned from this unjust taxation a state of war existed in Cuba, and therefore we must recognize belligerency. The peroration of the distinguished Senator from Nebraska [Mr. THURSTON], which moved the Senate, as his glowing periods always do, is in keeping with the line of argument of the Senator from Illinois. He declares he loves liberty, and therefore we must pass this resolution.

That is not the way to proceed in a dignified transaction which may involve this country in war and the possible expenditure of a thousand million of dollars of the people's money. There is danger of war; but one of the Senators favoring this resolution says, "In case of war, what can Spain do?" Even if Spain is weak and could do nothing, we should proceed with caution and justice on our side. I will tell you what Spain can do. She can declare war and not fire a gun, and it would cost this Government $500,000,000 to even get ready to meet Spain.

We know Spain can not conquer us; we know that we are powerful and in the end must conquer Spain. But after spending thousands of millions to do this, we would in the end have Cuba,

and we do not want Cuba. Mr. President, we can not pass this resolution without the danger of war. The Senator from Ohio brought out this fact in his able speech. The moment that this resolution is passed the right will vest in the Spanish Government to search our ships. With the inflamed popular mind in this country and with the feeling in the Senate, Spain could not take a sailing vessel of a hundred tons into port without our gunboats going down there and taking it away. We would not wait for any proceedings in her courts.

There is danger of war; and I insist that we should proceed with caution and be fortified with facts; that we should be advised. Why should the Senator from Ohio not let us have all the light he has on the subject? He read a long letter of Secretary Olney and a part of the reply from the Spanish minister. Why not have both of these letters in full, and all other facts, before the Senate? We are entitled to them, and the people of the United States are entitled to them. If we are not entitled to them, then the President of the United States should say we are not entitled, and not Senators.

In my judgment, Mr. President, this proceeding should be initiated by the Executive. He has the power and the jurisdiction under the Constitution. He is in possession of all the facts and has all the information. He has his hand on the pulse. He knows every hour what is going on in Cuba. He is as patriotic as any of the Senators who become frenzied with patriotism and love of liberty. He can be trusted. I am willing to follow where he leads. He knows when this Government should take action. His oath is as solemn as ours, and the interests and dignity of the Government are safe in his hands. Leave this great question with him, where it belongs; in his own way and at the proper time he will act and act wisely. It does seem to me to proceed in this way is a sort of impeachment of the wisdom and patriotism of the President of the United States.

As yet he has advised no course of action; he has said nothing on this question to us; no message from him has reached us that the time has come in his judgment for action. Responding to popular clamor, the Senate proposes to pass a resolution which coerces the President, forces him to take action before he may desire to do so. The passage of this resolution can only embarrass him and possibly bring him into conflict with Congress. He has sent his own agent to Cuba. I am satisfied he is giving this question the best and wisest consideration. Congress is powerless to control his action.

Mr. President, there is no precedent for this proposed action. Nothing of the kind has ever been attempted before. I doubt if anything like this proceeding has ever occurred in the history of the Government—forcing the Executive to take action that may involve the country in war, and against his judgment. We can not go on in this way, with a conflict between the executive and legislative branches of the Government.

I have not had time to examine this question. I do not belong to the Foreign Relations Committee. Senators can not pursue all great questions coming before the Senate to proper conclusions. We are charged with different duties, and we must rely on the great committees of the Senate. The Foreign Relations Committee makes no report; is not asked to make any.

Mr. FORAKER. The resolution has not yet been referred to the committee.

Mr. ELKINS. No; and it is not intended to be referred. That is what I am speaking about. It has been for a month before the Senate and not referred to the Foreign Relations Committee. I ask, in common fairness to Senators who have to vote on this question; I ask, in the name of the people of the country, who are entitled to the confidence of the Senate in this great transaction. Why not have a report? I do not assume to deny anything that is charged or alleged here for or against the Cubans or Spain.

There is nothing said about the indignities perpetrated by the insurgents; they are not accused here in the Senate of the United States, and I do not know that they can be accused; but I know that in another revolution in that island General Quesada, it is said, shot down 680 Spanish prisoners. Nobody has tried to bring out such facts. It is the cruelties of Spain all the time of which we hear. I favor the Republican platform on the subject of Cuba; I am for peace on the Island of Cuba; I am for doing ample justice to Cuba, but I do not believe that this resolution will reach these ends. I think the President can and should be trusted to do what is right, and in due season he will act.

I am not here to make any charges against the insurgents in Cuba; I am not here to excuse or to assail; but I am here as an American Senator to say that I am not advised either by the Executive of the United States or by the Foreign Relations Committee, or by anyone else, as to just what is the best course to pursue. I am not against doing justice to Cuba and bringing to a speedy termination the contest going on in Cuba, but before I act or undertake to say what should be done I want to know the facts.

We are asked as judges to pronounce judgment. Give us something to pronounce it on more than oratory—even good oratory. What we want is information. If you want to make one of these overpatriotic liberty-loving Senators angry, just ask him for facts. One of them stated that 800 of our people were impounded in Cuba. Who impounded them? Did he learn that from the State Department?

Mr. MASON. May I ask the Senator a question?

Mr. ELKINS. Yes.

Mr. MASON. Have you read the President's message on that subject?

Mr. ELKINS. I have.

Mr. MASON. Does it not state that from six to eight hundred Americans were confined in the towns there?

Mr. ELKINS. He did not say "impounded." The Senator proves a state of war in Cuba by the fact that Americans are in towns, and somebody must have driven them there, and therefore there is war. That is the argument of the Senator from Illinois.

Mr. MASON. Who do you think put them there?

Mr. ELKINS. I think a lot of the Americans put themselves in the towns of Cuba. They can get no work, and are therefore destitute. I suppose if I were an American down there, and did not have work, and was in need, I should try to get some money from the United States; but this would not be a good argument to prove a state of war.

Mr. MASON. Does not the Senator believe that war exists? Does not the President state the people there are not permitted to go out to work?

Mr. ELKINS. Well, Mr. President, that is the Senator's argument——

Mr. MASON. That is the fact.

Mr. ELKINS. That these poor Americans can not get work, and therefore there is a state of war, and we must recognize the insurgents as belligerents. Many of these facts are in the imagination of these Senators.

Mr. CHANDLER. Will the Senator allow me?

The VICE-PRESIDENT. Does the Senator from West Virginia yield to the Senator from New Hampshire?

Mr. ELKINS. Always. That Senator does not occupy much of the time of the Senate, and I always like to hear him.

Mr. CHANDLER. The Senator says this is all in the imagination and that we are sensitive when we are asked for facts. When the Senator, on the 28th day of February, 1896, voted that, in the opinion of Congress, a condition of public war existed between the Government of Spain and the Republic of Cuba, what facts did he have to warrant that vote of his?

Mr. ELKINS. Because just such allegations were made from newspaper reports as are now made I was led to believe that they were; but it was not upon such a proposition as this. Besides, Mr. President, I was misled as to the facts then, and I do not intend to be again deceived. I want official information, not newspaper reports

Mr. CHANDLER. Then the Senator admits he was mistaken in his vote of a year ago?

Mr. ELKINS. No. I do not admit anything. I did not vote upon such a resolution as this; one entirely different. Of course a majority can force anything through. But really, Mr. President, I do not think this is the best procedure, even for the insurgents. If the insurgents have the good case that Senators claim they have, why not make out the case, and make it out not only to the satisfaction of the Senate, but to the people of the United States and the world.

If the facts exist, this can be easily done. Let the Foreign Relations Committee make out the case, so that this action of ours, whatever it may be, and the record we are about to make, will be justified in the eyes of the world.

This is no trifling matter. It is a great transaction, as I have said, and the world looks on.

Mr. President, I did not feel that I ought, as a Senator, to allow this vote to be had without making my protest against action being taken here without light, without knowledge, and without the facts.

I am just as good a friend of Cuba as any of the Senators favoring this resolution. I favor Cuba as much as they. I desire peace on the island and the independence of Cuba as much as they. I believe in the Republican platform and love liberty and hate oppression as much as they; but I believe in a different method of procedure to make plain all these things than the one proposed by this resolution. I believe in leaving this question where it belongs, to the President of the United States, and trusting in him and his good judgment.

Mr. WHITE. Mr. President, those who are opposed to the adoption of this resolution, and those who, while favoring its ultimate passage, believe that it should be referred in any event, have been listening here patiently, by the hour and day, to the remarks of those who hold the affirmative. We are astonished as we stand in the presence of the obstructive tactics of those who allege in lengthy oratorical effort that they favor the pending proposition.

I am persuaded, unless this obstruction be continued by the alleged friends of the resolution, we can have a vote upon it this afternoon and can dispose of the entire subject.

I propose to make a very few remarks. I am not aware that more than one or two Senators intend to submit additional views. But if the Senator from New Hampshire [Mr. CHANDLER], who, I observe, is looking at me, does not obstruct us further, I have no question that he will have the opportunity of recording himself, so that the public may know just where he stands.

Mr. CHANDLER. I am always grateful to the Senator for what he accords to me, whether it be a bottle of California wine or his attention when I speak, and I will not interrupt him in the remarks that he is about to make, except, as he has said he is to speak a little while and then help us to a vote, I should like to ask him a question.

Mr. WHITE. There it is, Mr. President; obstruction already. But still the Senator may proceed.

Mr. CHANDLER. Certainly the Senator is willing to have a question asked him?

Mr. WHITE. I have listened so long to obstructive tactics that I am willing for the continuance. I do not feel competent to prevent the misfortune.

Mr. CHANDLER. The Senator's waggery is irresistible. The Senator a year ago proposed a substitute for the resolution, which then passed, which declared that a state of war existed in Cuba and recognized belligerency; and it was the opinion of the Senator that the Executive should recognize the belligerency of those who were maintaining themselves in Cuba in armed opposition to Spain. Now, if the Senator please—I do not ask him to speak, but I hope I have not frightened him from speaking—will he be kind enough to enlighten the Senator from West Virginia [Mr. ELKINS] as to the facts which led him to propose one year ago that the United States, by its Executive, should recognize the belligerency of the Cuban insurgents?

Mr. WHITE. Mr. President, I do not shrink from the task of attempting to enlighten the Senator from West Virginia [Mr. ELKINS], because I feel that he can absorb a sensible suggestion; but I am glad the Senator from New Hampshire [Mr. CHANDLER] has not put upon me the burden of bringing about a similar result as to himself. [Laughter.] I also feel, though it is somewhat foreign to this subject, that I ought to correct the Senator in reference to a personal remark. He referred to me as having in his case donated some California wine.

I heretofore supposed that there was not anything about the transaction referred to by him to indicate that the Senator from New Hampshire was not able to make the proper discrimination or to appreciate the exact character of my gift; and I wish to remark, as the Senator from Ohio [Mr. FORAKER] would say regarding a diplomatic message not fit for the public ear, that it was brandy, not wine, which I contributed to my friend from New Hampshire. [Laughter.]

Mr. President, the Senator from New Hampshire forgets the resolution which I offered some time ago in the Senate. It expressed an opinion favorable to the recognition of belligerency. It did not purport to declare, but merely advised belligerency. It was not adopted. I afterwards voted for a resolution which was adopted, and which I attempted to quote two or three days ago in the absence of the original, but I find, by referring to the RECORD, that I did not quote it correctly. So I will now refer to the actual resolution which was passed. It reads:

Resolved by the Senate (the House of Representatives concurring), That, in the opinion of Congress, a condition of public war exists between the Government of Spain and the government proclaimed and for some time maintained by force of arms by the people of Cuba; and that the United States of America should maintain a strict neutrality between the contending powers, according to each all the rights of belligerents in the ports and territory of the United States.

Resolved further, That the friendly offices of the United States should be offered by the President to the Spanish Government for the recognition of the independence of Cuba.

The Senator from New Hampshire seems to think that I am about to say something inconsistent with my attitude then, and, if I have that Senator's attention, I may express to him, in rather sorrowful mood, too, that he has evidently not listened to anything I have heretofore uttered upon this topic.

I took the position then, and attempted to enforce it by such argument as I was capable of making, that the recognition of belligerency and of independence was, in each case, purely an Executive function. I am attempting to do the same now. I have not made any argument, and do not intend to make any argument, with reference to the fact of war in Cuba, or as to whether there is or is not sufficient basis for Executive action.

It seems to me somewhat singular that my friends upon the other side of the Chamber, who have led the credulous American people to believe that much confidence should be reposed in the present Executive, are now casting in his pathway the serious obstructions apparent here, many of which are projected by the Senator from New Hampshire and by others equally ardent in the Republican cause.

I do not intend to repeat what I have heretofore stated upon the question of jurisdiction. If I understood the Senator from Nebraska [Mr. THURSTON] aright, he declared that he had examined all the decisions upon this subject, and that nowhere was there a case stating that the Executive had exclusive jurisdiction. I shall not run over precedents again. I have collected many and furnished them to the Senate. I will refer him to an authority which he and his associates may deem indifferent. I mean Judge Story. That great lawyer and judge said:

It is very clear that it belongs exclusively to the executive department of our Government to recognize, from time to time, any new governments which "may arise in the political revolutions of the world; and until such new governments are so recognized they can not be admitted by our courts of justice to have or to exercise the common rights and prerogatives of sovereignty."

That phraseology will be found in 3 Sumner, page 372, and a similar interpretation of the Constitution will be discovered in Judge Story's Commentaries on the Constitution, wherein he considers the construction placed upon the ambassador clause of the organic law by Mr. Rawle, and dissents from the latter view. But it will serve no useful purpose to continue this discussion upon this line. The matter has been fully covered, and I rise principally for the purpose of saying a word or two with reference to misconceptions, as it seems to me, which prevail in some quarters regarding the effect of the passage of this resolution.

I have said that I do not intend to run over the facts regarding the question of the existence or nonexistence of war. Perhaps if I needed much evidence as to the existence of a war I could find it in the statement of the Senator from Illinois [Mr. MASON], who stated that a newspaper correspondent from Chicago had been killed in Cuba, and the Senator asked, "Will anybody now doubt that there was war?" Of course it must have been a very serious situation which could have resulted in the taking away of any life, and perhaps nothing less than a large army, estimated, I believe, at 200,000, would have succeeded in troubling a Chicago newspaper man. [Laughter.]

But apart from the question of belligerency, I will respond to a few suggestions made yesterday. I understood the Senator from Ohio [Mr. FORAKER] to say that each insurgent so-called can be considered a pirate or should be considered a pirate or traitor. The law upon that subject is not in a very clear condition. But I think our policy is plainly demarked. It is very well stated in a late compilation—Glenn on International Law. On page 101 that author says:

Acts of rebels or insurgents, if done under the sanction of an organized community or sovereign state, would be considered as acts of war. After belligerency has been recognized they in fact become lawful as acts of war, but previous to such recognition they possess all the characteristics of piracy, or at least would be technically so classed. It is true that the test of piracy is the want of competent authority, but the acts of insurgents are performed for the purpose of establishing a new order of things, or a new community, and are undertaken for a public end in contradistinction to a private pursuit for the satisfaction of personal greed or personal vengeance by means of murder or robbery on the high seas.

Such persons are not and should not be considered as enemies of the human race, but simply as enemies of the particular country against which their acts are directed. If, therefore, the insurgents limit their acts to such as are recognized as pertaining to belligerents, they should not be considered as piratical. If, on the other hand, their acts are not limited as stated, but they are guilty of indiscriminate plunder and other acts of violence, or the society which they represent is not sufficiently stable to hold out guaranties that their acts will be so limited and controlled, they can be treated as pirates.

The right to treat these people as pirates when they overstep the bounds of recognized belligerency must be recognized, because, if denied, the commerce of all nations would be at the mercy of all marauders and irresponsible insurgents, under the cloak of war. In the case of United States *vs.* The Ambrose Light it was held that a vessel on the high seas, in the hands of insurgents who have not been recognized as belligerents by any independent nation, may be regarded as piratical; but the decision in this case has been very much criticised, and in Wharton's Digest (section 381) the author not only severely criticises it, but cites letters to the same effect from Fiore, Martens, Baron de Neumann, Calvo, and others. As illustrating the foregoing, certain cases arose during the civil war in this country in 1861-1865.

Then follows a discussion of the subject, and the author concludes that under our system and practice we can not recognize or claim insurgents to be piratical. Senators who may desire to examine this subject more fully will find in 3 Wharton, page 468, a very full discussion, with references to Woolsey, Calvo, Phillimore, and all modern authors upon international law. There seems to be a practical consensus of opinion that parties contending who are recognized not as belligerents, but whose insurgency has been admitted, can not be justly treated as pirates, and such recognition of insurgency (not belligerency) has been accorded here. There is, therefore, no danger that the Cuban insurgents can be adjudged pirates by our courts.

Said the Supreme Court in the *Three Friends* case:

The distinction between recognition of belligerency and recognition of a condition of political revolt, between recognition of the existence of war in a material sense and of war in a legal sense, is sharply illustrated by the case before us; for here the political department (in this case the President) has not recognized the existence of a de facto belligerent power engaged in hostility with Spain, but has recognized the existence of insurrectionary warfare prevailing before, at the time, and since this forfeiture is alleged to have been incurred.

So that we have a decision by the court that the President, styled in this opinion the political department, had recognized the existence of insurgency. It is clear, therefore, that we will not treat the

insurgents of Cuba as pirates. But we can not, as to the subjects of a foreign state, control domestic action unless we intervene and take possession of the country. This we may do in any case if we have the inclination and the power combined.

Again, yesterday the distinguished and honorable Senator from Ohio [Mr. FORAKER], in the course of his very eloquent and instructive remarks, referred to the Revised Statutes of the United States. The sections which he named, as he stated, constitute our neutrality law. Under these particular provisions of our municipal law we find the definition of crime and the punishment prescribed not only as to insurgents, but also as to those who, being recognized belligerents, engage in fitting out military enterprises or organizing expeditions here.

These provisions of our Federal law are as applicable to recognized belligerents as they are to insurgents. It was claimed some time ago that the sections read here had no application to insurgency. This contention was overthrown in the *Wiborg* and *Three Friends* cases. It was determined, particularly in the latter case, that these sections apply equally in cases of belligerency as in cases of insurgency, and, indeed, so thoroughly is the distinction heretofore attempted to be made demolished by these adjudications that it is now immaterial in a libel or in an indictment to aver belligerency at all. It is not a matter upon which the court is called upon to make a finding, and it is a recitation which would be stricken from a pleading as irrelevant and redundant, because it is of no importance legally as to whether or not belligerency has been conceded.

What rights have the insurgents, then, under prevailing conditions? What rights will they have if belligerency is accorded? The enactments under consideration, as I remarked, apply equally to both cases. Section 5286 of the Revised Statutes is in these words:

> Every person who, within the territory or jurisdiction of the United States, begins, or sets on foot, or provides or prepares the means for, any military expedition or enterprise, to be carried on from thence against the territory or dominions of any foreign prince or state, or of any colony, district, or people, with whom the United States are at peace, shall be deemed guilty of a high misdemeanor, and shall be fined not exceeding $3,000 and imprisoned not more than three years.

Under that law Captain Hart was indicted in the eastern district of Pennsylvania, and on the trial before Judge Butler, in the United States district court, that distinguished jurist charged the jury in effect as follows:

> (1) Setting on foot, within the United States, a military expedition, to be carried on from thence against the territory or dominion of any power, etc., with whom the United States are at peace; (2) providing the means for such an expedition, as, for instance, means for transportation.
>
> To justify a conviction of preparing or providing means for such a military expedition, it must be proved (1) that a military expedition was organized in this country, and (2) that defendant, in the district of his trial, provided means for it, as charged, with knowledge that it was such an expedition.
>
> It is lawful for men, many or few, to leave this country as individuals, without combination or organization here, to go abroad, even by the same vessel, with the purpose of enlisting with a body of insurgents to fight against a foreign government; and it is immaterial that the vessel also carries arms, as merchandise, which are to be carried on shore in packages, as merchandise, by the men, who so intend to enlist. And the transportation of such persons, knowing their intent, constitutes no offense.

That is the decision of the United States court, rendered on the 22d of February of this year.

This, Mr. President, disposes of the proposition that was made here by the Senator from Illinois [Mr. MASON], to the effect that it is impossible to transport arms or ammunition from here to Cuba unless there is a recognition of belligerency. I assert that the indictment which was so framed in the Hart case would be good in the presence of the recognition of belligerency, and that no additional word would in that event be necessary to its legal efficacy.

In other words, recognition or nonrecognition is immaterial as far as the transportation of supplies is concerned. So true is this that if we adopt this joint resolution, if the House adopts it, if it is signed by the President and becomes a valid declaration of belligerency, it will be impossible to test its legal effect, for no case will, under existing conditions, be framed to challenge it. No issue can be presented to the courts of the United States as to the Cuban insurgents which will test the validity of this recognition, because it will be practically without legal force.

True, I concede that it may have a moral force. Senators who favor the joint resolution are right as to that. It may stimulate and assist the Cubans by encouraging them, and perhaps give them some status abroad not based upon any potentiality in law, but predicated, possibly, upon the notion that the adoption of the joint resolution discloses the possibility or probability of intervention upon the part of the United States.

Mr. BACON. Will the Senator from California permit me to ask him a question?

Mr. WHITE. Certainly.

Mr. BACON. I ask it because I know the Senator has given very careful investigation to this question not only as it affects the question before the Senate, but in matters of business in his profession. As the law now is, it would be a violation for any party to fit out in this country an expedition for the aid of the insurgents in Cuba.

Mr. WHITE. Yes.

Mr. BACON. It is not unlawful for the Spaniards to fit out an expedition here for the purpose of putting down that insurrection. Am I correct? If the right of belligerency were granted to the Cubans, would it still be lawful for the Spaniards to fit out expeditions in this country for the purpose of putting down the insurrection in Cuba?

Mr. WHITE. The question addressed to me by the Senator suggests a matter which I was just about to consider, and I will consider it immediately.

As a practical proposition, there is nothing in the suggestion. If it were possible for Spain to organize an expedition in this country, or to use this country as a basis of warlike supply, there would be a practical side to the suggestion, but as it is now no one pretends that Spain is equipping any force here. How can she do so? She has no sympathy and can expect no comfort or assistance here. Public sentiment is so universally against her that the proposition of the Senator from Georgia is relieved of any practical character and becomes no more than a theory—perhaps a legal distinction such as the Senator indicates.

Mr. BACON. If the Senator will permit me, I will say that the question was suggested by the statement which I understood the Senator to make that the legal status of the parties would be in no wise changed. I think in that important particular the legal status would be very materially and radically changed.

Mr. WHITE. I spoke of this country and the insurgents. To those parties I alluded. There is no difference at all in the status of this country toward insurgents as between themselves, and no practical difference as to Spain, because Spain fits out no expeditions, and, as I say, in the nature of the situation can fit out no expeditions in this country. Perhaps the effect of the *Three Friends* case may be to prevent Spain, even where there is no recognition, fitting out expeditions here. As to this, I am not prepared to fully express myself. It is not important.

I have said that there is nothing to prevent the insurgents loading arms upon a ship and sending the same as merchandise to Cuba except the danger of capture. We can not prevent this, and if there is any officer of any gunboat or vessel who assumes to impede such traffic he is violating the law as laid down on the 22d day of February by the district court for the eastern district of Pennsylvania and long the law of the United States.

Mr. MASON. Will the Senator from California yield to me for a question?

Mr. WHITE. Certainly.

Mr. MASON. What are the men in prison for now in Baltimore?

Mr. WHITE. I will say to the Senator that if he had honored me by being in the Chamber a few moments ago it would not be necessary for me to say what I will now repeat. Captain Hart—I suppose he is the person to whom the Senator refers—was indicted for violation of section 5286 of the Federal statutes, for fitting out and organizing an expedition, and the court in that case charged the jury (I will read from the charge again):

> It is lawful for men, many or few, to leave this country as individuals, without combination or organization here, to go abroad, even by the same vessel, with the purpose of enlisting with a body of insurgents to fight against a foreign government; and it is immaterial that the vessel also carries arms as merchandise, which are to be carried on shore in packages, as merchandise, by the men who so intend to enlist. And the transportation of such persons, knowing their intent, constitutes no offense.

Now, a conviction was had because it appeared from the testimony that the defendant organized a military expedition; that the vessel was fitted out to fight; that the men upon it were prepared for war, and in one of the cases heretofore tried the parties charged actually engaged the Spaniards upon the sea. If we recognize belligerency, and if Captain Hart does the very things which he has done in the past, he will be subject to indictment and punishment under the section of the Revised Statutes read by me, regardless of whether the Cubans are insurgents or belligerents.

Mr. CHANDLER. Will the Senator allow me to help him a little?

Mr. WHITE. I am always thankful for the assistance of the Senator from New Hampshire, although I hope he will not prolong the debate.

Mr. CHANDLER. I merely wish to ask the Senator a question. The Senator is quite right, as I concede, in his statement about the law. The neutrality laws are the same, whether the insurgents remain insurgents or are recognized as belligerents. We pledge ourselves by those laws not to allow expeditions to be fitted out in our ports against a power with which we are at peace; and we shall remain at peace with Spain after the passage of the joint resolution. So it makes no difference, as the Senator from Massachusetts said yesterday and as the Senator from California states now.

Under those circumstances, I wish to ask the Senator why a year ago he wanted the United States to recognize the belligerency of the Cuban insurgents?

Mr. WHITE. I will say to the Senator that at the time I remarked—and I regret that my remarks then made had only passing effect upon the Senator from New Hampshire—that I did not believe the adoption of the resolution would have any real result beyond such moral benefit as might be derived therefrom by the insurgents, but that, as the sentiment was in favor of such a resolution, I would vote for it. Notwithstanding the somewhat injurious effect which the declaration of belligerency would have upon the country, I was willing to go that far. I did not, however, vote to declare belligerency, but only to advise the Executive, which is not the proposition before the Senate.

Mr. CHANDLER. But the Senator did not vote to advise the Executive to do a thing which the United States ought not to do. He voted to advise the President to do what he thought he ought to do. Now, the Senator did that to help Cuba, as I understand him to say——

Mr. WHITE. Yes.

Mr. CHANDLER. Because of the moral effect upon the Cuban cause of the resolution which he proposed, and which was voted down, and the resolution which we adopted, and for which he voted. Why is he not now willing to vote to give Cuba the same moral assistance which he wanted to give her a year ago?

Mr. WHITE. Is it possible that the Senator from New Hampshire has not arisen to the fact that the present is an attempt by Congress to declare belligerency? Does he not know that he is not presenting the same proposition? Let him present in lieu of the pending joint resolution the resolution proposed by me before, and I will vote for it; but I will not, with my views of the jurisdiction of this body, vote for the pending proposition.

Mr. CHANDLER. The Senator voted for the resolution that was passed before, which is in the exact language, I repeat—it seems to be hard to get it into the heads of some Senators—of the resolution proposed to-day, except that one was a concurrent resolution——

Mr. WHITE. Yes; "except."

Mr. CHANDLER. And the other is a joint resolution. But the declaration that it was advisable to recognize belligerency was the same a year ago that it is now. A year ago the Senator was for it, to-day he is against it.

Mr. WHITE. The Senator does not state the facts. I admit that it is very hard to penetrate the minds of some Senators, and that there are obstructions to the entrance of ideas into the heads of those who do not wish to learn. The effect of the pending resolution, if it pass as a joint resolution and receives Executive sanction, will be, according to the Senator, the absolute recognition of belligerency.

We do not make a suggestion here of our opinion to the Executive, as we did before. There we passed a concurrent resolution with the explicit understanding on the part of those who voted for it, and our words are of record here, that it was nothing more than an expression of opinion, that it was a concurrent resolution, which had no effect as law, and was nothing more than advisory to the Executive, who treated it as such, negatively.

Now you assert that the Congress itself has the power to pass the joint resolution as an original proposition and to declare belligerency, and, passing it over the Executive's veto, to make it an efficacious announcement of belligerency. That I deny, and denying it, I am against the proposition. The argument of the Senator that I am inconsistent is not warranted by the facts and is not sound in reason, and I am astonished that the Senator should have interrupted me for the purpose of making a suggestion so utterly void of merit.

Mr. CHANDLER. I should like to ask the Senator whether he is just as much in favor of having belligerency recognized now as he was a year ago, and only objects to having Congress and the President do it by joint resolution instead of having it done by the President and upon the advice of Congress by a concurrent resolution? Is that the only difference?

Mr. WHITE. This utterly irrelevant question will be answered by me as follows: As I am not as intimate with the political powers now in possession of the Government as is the Senator from New Hampshire, I do not care to advise those powers with reference to the discharge of their constitutional duty, unless the condition shall become so flagrant as to warrant me in saying something. I hope the Senator from New Hampshire will not continue thus to hamper the progress of his own party on the way to good times. [Laughter.] I trust that the joint resolution will get out of the way of the tariff bill, because we know that when that measure passes, there will be no shortage in our funds, no end to our pleasure, and we can then, perhaps, afford to declare war with profit to ourselves and disadvantage to our enemies.

Mr. President, the law as laid down in the district court of Pennsylvania is not inconsistent with previous decisions. All are in the same line. I had occasion heretofore, probably a couple of years ago, to call attention to the circumstance that when the Chilean difficulty was on hand, we refused to recognize the insurgents. Our executive department and the legislative department utterly ignored the existence of the party there which finally became dominant. At the time that party controlled the navy, had with it nearly all the representatives of the house and the senators, possessed a large part of the Chilean territory, and finally succeeded.

During the progress of that revolution the Chilean insurgents sent a vessel to a port of the United States convoyed by a ship of war as far as Cape San Lucas. The vessel thus convoyed—the *Itata*—came within our waters and shipped $80,000 worth of arms, purchased in the city of New York and sent by rail to San Francisco and then transferred by schooner on board this vessel. Our Government, having refused to recognize the insurgents, conceived the idea that its duty led to the prosecution of the men who had purchased the arms and to libel the vessel. We sent the *Charleston* down to the harbor of Iquique and seized the *Itata* and brought her back to the United States. The United States filed a libel in the southern district of California against the vessel, and, under the criminal laws of the United States, tried a Chilean congressman who had purchased the arms; and yet the court of appeals, in passing upon the case, said:

"It will thus be seen that the cases relied upon are clearly distinguishable from the case of the *Itata*. It is true that in this case there were criminating circumstances sufficient to arouse suspicion as to a hostile intent on the part of the *Itata*. The sending of the war ship *Esmeralda* as a convoy for a part of the way, the *Itata* being under the command of a captain of the navy, with soldiers, cannon, and muskets on board; the concealment of the cannon; the change of dress of a part of the crew; the failure to give the bond required by law; the circuitous methods adopted to take the arms and ammunition from the schooner *Robert and Minnie*, are all proper circumstances to be considered, and were perhaps sufficient to cast the burden of proof upon the *Itata* to establish her innocence by showing, as she did, that notwithstanding these suspicions and incriminating circumstances, she was not a war vessel; that she had done nothing, and did not intend to do anything, contrary to the provisions of section 5283; that she was not fitted out or armed, or attempted to be fitted out or armed, or procured to be fitted out or armed or furnished, with intent that she should be employed "in the service of any foreign prince or state, or any colony, district, or people, to cruise or commit hostilities against the subjects, citizens, or property of any foreign prince or state, or of any colony, district, or people with whom the United States were at peace."

The case of *The Florida* (4 Ben., 432) was a libel against the vessel for an alleged forfeiture claimed to have been incurred by a violation of section 5283 of the Revised Statutes, and in its facts bears a closer analogy to the facts of this case than any of the other cases to which our attention has been called. The court said:

"Admitting that persons acting as agents of the insurrectionary party in Cuba—

This was a former Cuban war—

"were the real owners of the vessel and her cargo of arms and munitions of war, and that the transaction of the borrowing by Darr from Castillo of the money wherewith the vessel and her cargo were purchased was a sham, and that the vessel was to proceed with her cargo to Vera Cruz, and there the vessel and cargo were to be transferred by Darr, their nominal owner, to persons acting for the insurrectionary party in Cuba, and that thence the vessel was to take the cargo to some point off the coast of Cuba, and land it on the shore by the use of rafts made out of the lumber on board, towed by the steam launch on board through shallow water to the shore, and that Darr and such real owners of the vessel and cargo had intent to do all this in fitting out the vessel and putting her cargo on board, still a violation of the third section of the act of 1818 is not thereby made out."

A perusal of that case, decided in 4 Benedict, will reaffirm everything I have said.

The issues in the *Itata* case were practically determined in United States *vs.* Trumbull, 48 Federal Reporter, 107.

When Mr. Trumbull, the Chilean congressman, was under indictment for his admitted participancy in loading the *Itata* with arms, ammunition, and other supplies for the Chilean insurgents, Judge Ross, then district, and now circuit, judge of the United States, said:

There is nothing in the evidence tending to show that any of the arms or ammunition were intended for use by the *Itata*. On the contrary, the whole case shows that the defendants caused them to be put on board of her with the intention that she should transport them to Chile for the use of the insurrectionary party there.

This does not constitute the fitting out, arming, or furnishing of the *Itata* with intent that she should be employed to cruise or commit hostilities in the service of the insurrectionary party against the then Government of Chile. In principle the case is, I think, much like that of the *Florida*, decided by Judge Blatchford in 1871 and reported in 4 Ben. 432.

Judge Ross proceeds to show that Judge Blatchford in that case adopted the view which justified the purchase and shipment by the insurgents of arms and supplies.

The following are the sections of the Revised Statutes to which I have alluded:

SEC. 5281. Every citizen of the United States who, within the territory or jurisdiction thereof, accepts and exercises a commission to serve a foreign prince, state, colony, district, or people, in war, by land or by sea, against any prince, state, colony, district, or people, with whom the United States are at peace, shall be deemed guilty of a high misdemeanor, and shall be fined not more than $2,000 and imprisoned not more than three years.

SEC. 5282. Every person who, within the territory or jurisdiction of the United States, enlists or enters himself, or hires or retains another person to enlist or enter himself, or to go beyond the limits or jurisdiction of the United States with intent to be enlisted or entered in the service of any foreign prince, state, colony, district, or people, as a soldier, or as a marine or seaman, on board of any vessel of war, letter of marque, or privateer, shall be deemed guilty of high misdemeanor, and shall be fined not more than $1,000 and imprisoned not more than three years.

SEC. 5283. Every person who, within the limits of the United States, fits out and arms, or attempts to fit out and arm, or procures to be fitted out and

armed, or knowingly is concerned in the furnishing, fitting out, or arming, of any vessel, with intent that such vessel shall be employed in the service of any foreign prince or state, or of any colony, district, or people, to cruise or commit hostilities against the subjects, citizens, or property of any foreign prince or state, or of any colony, district, or people, with whom the United States are at peace, or who issues or delivers a commission within the territory or jurisdiction of the United States for any vessel, to the intent that she may be so employed, shall be deemed guilty of a high misdemeanor, and shall be fined not more than $10,000, and imprisoned not more than three years. And every such vessel, her tackle, apparel, and furniture, together with all materials, arms, ammunition, and stores, which may have been procured for the building and equipment thereof, shall be forfeited, one half to the use of the informer, and the other half to the use of the United States.

SEC. 5284. Every citizen of the United States who, without the limits thereof, fits out and arms, or attempts to fit out and arm, or procures to be fitted out and armed, or knowingly aids or is concerned in furnishing, fitting out, or arming any private vessel of war, or privateer, with intent that such vessel shall be employed to cruise, or commit hostilities, upon the citizens of the United States, or their property, or who takes the command of, or enters on board of any such vessel, for such intent, or who purchases any interest in any such vessel, with a view to share in the profits thereof, shall be deemed guilty of a high misdemeanor, and fined not more that $10,000, and imprisoned not more than ten years. And the trial for such offense, if committed without the limits of the United States, shall be in the district in which the offender shall be apprehended or first brought.

SEC. 5285. Every person who, within the territory or jurisdiction of the United States, increases or augments, or procures to be increased or augmented, or knowingly is concerned in increasing or augmenting the force of any ship of war, cruiser, or other armed vessel, which, at the time of her arrival within the United States, was a ship of war, or cruiser, or armed vessel, in the service of any foreign prince or state, or of any colony, district, or people, or belonging to the subjects or citizens of any such prince or state, colony, district, or people, the same being at war with any foreign prince or state, or of any colony, district, or people, with whom the United States are at peace, by adding to the number of the guns of such vessels, or by changing those on board of her for guns of a larger caliber, or by adding thereto any equipment solely applicable to war, shall be deemed guilty of a high misdemeanor, and shall be fined not more than $1,000 and be imprisoned not more than one year.

SEC. 5286. Every person who, within the territory or jurisdiction of the United States, begins, or sets on foot, or provides, or prepares the means for, any military expedition or enterprise, to be carried on from thence against the territory or dominions of any foreign prince or state, or of any colony, district, or people with whom the United States are at peace, shall be deemed guilty of a high misdemeanor, and shall be fined not exceeding $3,000 and imprisoned not more than three years.

Mr. President, I am opposed to the passage of the joint resolution, because I believe this subject-matter to be within the exclusive authority of the Executive, and I base this conclusion upon the reasons heretofore assigned. When the Executive refuses to act, and whenever Congress concludes that a time has come for war, we may discuss that momentous problem. No such issue is tendered. It appears to me that when Senators standing in their places here assert that the declaration of belligerency is not or should not be offensive, and then, in the same breath, proceed to make statements in connection with their reasons for that declaration which are in themselves grossly offensive, the motive is at once disclosed, and that the real object is ultimately to bring about a war, though they do not venture the direct announcement.

Mr. President, I know that it is easy to incite the fervid imaginations and patriotic sentiments of the American people. I know, and glory in the thought, that every American loves right. Liberty is cherished by each of our people. In the generosity of their hearts they wish universal freedom. But the man who appreciates true liberty knows how to conserve it. He knows that in desperate conflict liberty is not always ultimately victorious. He knows that though this Government is powerful enough to subvert Spain, and powerful enough to wrench Cuba from her hands, when that end has been accomplished it is exceedingly dubious whether the cause of liberty will have been promoted here or our interests favorably affected.

I said a day or two ago that grave problems confront us now. Let us not be diverted from their consideration. Let us defend our citizens. Our Executive has the power to do so. He has behind him the sentiment of the American people, and whenever he appeals to Congress for any aid in that direction he will receive a ready response. But a few days have passed since Mr. McKinley took charge. He has sent his own messenger to Cuba to investigate. He is acting within the power conferred upon him by the Constitution, and though he were not so acting, I should not feel myself at liberty to disregard constitutional obligations.

We must each decide this question for ourselves; but it is satisfactory to me to feel that the Executive will not fail in his duty here, but will meet the situation properly and wisely.

The Senator from New Hampshire [Mr. GALLINGER] showed us a copy of a resolution which had been offered here by the present Secretary of State, and to-day the distinguished and honorable Senator from Alabama again informed us that after all the pending resolution was either a copy or a paraphrase of one or two that had been offered by the present Secretary of State.

Have we any doubt of his feelings in this matter? Have we any question as to what his sentiments are? Why is it that Senators who say that they are really anxious to know the facts are not willing to submit this proposition to a man whose views, when he was a Senator, have been often expressed, who is as familiar with this subject as anyone in this Chamber, and who has the facilities which are given him by law enabling him to know more about it than any member of this body? Why is it that they are unwilling to trust him or to trust the Executive elected by their own votes?

Though I am opposed politically to both, though I regard the policies which they have stated to be theirs as fraught with disaster to the American people, nevertheless I do not intend to permit my political views or prejudices to enter into the consideration of this grave subject; and whatever may be done by others, my vote will be cast first for reference. If that motion fails, my vote will be cast against the joint resolution. If the joint resolution passes, we may be relieved from responsibility, as far as anything direct is concerned, but I could not avoid responsibility in the presence of my construction of the Constitution if I voted affirmatively in this regard. I know the sentiment of Senators who are antagonistic to the joint resolution. They do not desire delay. We have taken comparatively little time in this debate, and I believe there is nothing to prevent a vote this afternoon.

Mr. HAWLEY. Mr. President, I wish to say merely a few words. I suppose every man sometimes wonders why the rest of the world does not think precisely as he does. I am to some extent in that situation now. I wonder why the majority of the body does not see that it is the wiser course to refer the joint resolution. I wonder why the friends of the joint resolution do not see how clearly it would be an advantage to their cause if the resolution should come back from the Committee on Foreign Relations accompanied by a report which should clearly and distinctly set forth to us what is meant by a declaration of belligerency; what is meant technically in this connection by a state of war, with a codification of the valuable papers or extracts from the papers submitted by the Senator from Ohio [Mr. FORAKER], adding to it some suggestions made to us by the Senator from Nebraska [Mr. THURSTON], and especially his statement of the remarkable and applicable declaration of Sagasta, late prime minister, that a state of war does now exist.

I submit that all of us, though supposed to know these things, are not ready with an answer to the legal questions which might be asked of us. Such a report would do justice to the Committee on Foreign Relations and justice to the Senate in this very important and perhaps very serious emergency. Of course most of this can be found, if one will read the RECORD for two or three weeks, but it might be put in six or eight pages of an ordinary miscellaneous document. It would strengthen the cause of the people with whom I shall not vote, but I should be glad to send to my constituents a clear, legal statement of the views which in the minds of other Senators justify the passage of such a joint resolution. I think it would be better for all of us, on whichever side we may be, to have such a report made, and it can be well done. The speeches made by members of that committee are such, and the character of the men who have not made speeches is such, that we know the report may easily be made complete, logical, legal, instructive, and brief.

The VICE-PRESIDENT. The question is on agreeing to the motion of the Senator from Maine [Mr. HALE] to refer the joint resolution to the Committee on Foreign Relations, upon which the yeas and nays have been ordered. The Secretary will call the roll.

The Secretary proceeded to call the roll.

Mr. BERRY (when his name was called). I have a general pair with the Senator from Colorado [Mr. TELLER]. Being advised that he would vote the same way that I shall, I will cast my vote, I vote "nay."

Mr. CLAY (when his name was called). I am paired with the junior Senator from Massachusetts [Mr. LODGE]. Were he present, he would vote in favor of referring the resolution and I should vote "nay."

Mr. CULLOM (when his name was called). I am paired with the senior Senator from Delaware [Mr. GRAY]. If he were present, I should vote "yea."

Mr. ELKINS (when his name was called). I am paired with my colleague [Mr. FAULKNER]. If he were present, I think he would vote "nay," and I should vote "yea."

Mr. WALTHALL (when Mr. GEORGE'S name was called). My colleague [Mr. GEORGE] has a general pair with the junior Senator from Colorado [Mr. WOLCOTT].

Mr. GORMAN (when his name was called). I am paired with the Senator from Maine [Mr. FRYE].

Mr. BATE (when the name of Mr. HARRIS of Tennessee was called). My colleague [Mr. HARRIS] is paired with the senior Senator from Vermont [Mr. MORRILL], neither of whom is in the Chamber.

Mr. KENNEY (when his name was called). I have a general pair with the junior Senator from Pennsylvania [Mr. PENROSE]. I do not know how he would vote. He not being here, I withhold my vote. Were he present and voting, I should vote "nay."

Mr. KYLE (when his name was called). I am paired upon this question with the Senator from Connecticut [Mr. PLATT]. The Senator from Nebraska [Mr. ALLEN] is absent, and would vote "nay" were he present. I should like, with the consent of the

director of pairs on this side, to transfer my pair to the Senator from Nebraska [Mr. ALLEN] and vote.

Mr. MILLS. The Senator from South Dakota can do it.

Mr. STEWART. There is no objection.

Mr. KYLE. I should like to ask the Senator from Florida [Mr. PASCO] if the Senator from Nebraska [Mr. ALLEN] is paired with any Senator?

Mr. PASCO. I do not now know of any arrangement to pair him. If I learn that one has been made, I will advise the Senator from South Dakota.

Mr. KYLE. Then I transfer my pair to the Senator from Nebraska [Mr. ALLEN] and will vote. I vote "nay."

Mr. LINDSAY (when his name was called). I have a general pair with the senior Senator from Michigan [Mr. MCMILLAN]. If he were present, I should vote "nay."

Mr. MCENERY (when his name was called). I am paired with the junior Senator from New York [Mr. PLATT]. If he were present, I should vote "nay."

Mr. MANTLE (when his name was called). I have a general pair with the junior Senator from Virginia [Mr. MARTIN]. I do not see him in the Chamber. If he were here, I should vote "nay."

Mr. NELSON (when his name was called). I am paired with the Senator from Missouri [Mr. VEST].

The roll call was concluded.

Mr. FORAKER. I have a pair with the junior Senator from South Carolina [Mr. EARLE]. I am told that if he were here he would vote "nay." Therefore I withhold my vote. If I were at liberty to vote, I should vote "yea."

Mr. DANIEL. I beg leave to state that if my colleague [Mr. MARTIN] were here he would vote "nay." Therefore the Senator from Montana [Mr. MANTLE], who is paired with my colleague and would vote the same way, is at liberty to vote.

Mr. MANTLE. I thank the Senator from Virginia for the information. I will vote. I vote "nay."

Mr. BURROWS. My colleague [Mr. MCMILLAN] is paired with the Senator from Kentucky [Mr. LINDSAY]. If my colleague were present and at liberty to vote, he would vote "yea."

Mr. PASCO. The senior Senator from West Virginia [Mr. FAULKNER], who is absent, desired me to announce that he is paired with his colleague [Mr. ELKINS]. If the senior Senator from West Virginia were present, he would vote "nay," against the reference of the joint resolution.

Mr. COCKRELL. My colleague [Mr. VEST], as has been announced, is paired with the junior Senator from Minnesota [Mr. NELSON]. If my colleague were present, he would vote "nay."

Mr. PASCO. I wish to announce the pair of the Senator from Rhode Island [Mr. ALDRICH] with the Senator from Colorado [Mr. TELLER]. If the Senator from Rhode Island were present, he would vote "yea," and the Senator from Colorado would vote "nay."

Mr. HOAR. I think a pair has been announced with the Senator from Colorado.

Mr. PASCO. To what pair does the Senator from Massachusetts refer?

Mr. HOAR. I do not remember now. Another pair has been announced, I believe.

Mr. PASCO. I think no other pair has been arranged for the Senator from Colorado. I was authorized to make the pair I have announced.

The result was announced—yeas 19, nays 34; as follows:

YEAS—19.

Allison,	Gear,	Hoar,	Wellington,
Burrows,	Hale,	McBride,	Wetmore,
Caffery,	Hanna,	Perkins,	White,
Davis,	Hansbrough,	Shoup,	Wilson.
Fairbanks,	Hawley,	Spooner,	

NAYS—34.

Bacon,	Clark,	Mason,	Stewart,
Baker,	Cockrell,	Mills,	Thurston,
Bate,	Daniel,	Morgan,	Tillman,
Berry,	Gallinger,	Pasco,	Turner,
Butler,	Harris, Kans.	Pettigrew,	Turpie,
Cannon,	Heitfeld,	Pettus,	Walthall,
Carter,	Jones, Ark.	Pritchard,	Warren.
Chandler,	Kyle,	Rawlins,	
Chilton,	Mantle,	Roach,	

NOT VOTING—35.

Aldrich,	Frye,	McEnery,	Platt, N. Y.
Allen,	George,	McMillan,	Proctor,
Clay,	Gorman,	Martin,	Quay,
Cullom,	Gray,	Mitchell,	Sewell,
Deboe,	Harris, Tenn.	Morrill,	Smith,
Earle,	Jones, Nev.	Murphy,	Teller,
Elkins,	Kenney,	Nelson,	Vest,
Faulkner,	Lindsay,	Penrose,	Wolcott.
Foraker,	Lodge,	Platt, Conn.	

So the Senate refused to refer the joint resolution to the Committee on Foreign Relations.

Mr. FAIRBANKS. Mr. President, it has not been my purpose until now to invite the attention of the Senate in this debate, and it is my present intention to add but a few words. I shall not indulge in criticism upon the Senate or its members, for my brief presence here has but increased my respect for both. My observation is that there is no one here who possesses more patriotism or love of liberty than others; that in that respect there is an absolute equality here. I further observe, Mr. President, as this debate has progressed, that there is no difference among the honorable Senators with respect to their desire for the freedom of Cuba. All wish to see peace reign and liberty established in the desolated island. The difference arises, sir, with regard to the means which shall be employed to attain the hoped-for end.

The immediate division of opinion has been with reference to the motion of the distinguished Senator from Maine [Mr. HALE] to refer the resolution of the honorable Senator from Alabama [Mr. MORGAN] to the Committee on Foreign Relations. Those who opposed the reference felt that they had adequate information upon which to act, while those who favored the reference desired in an orderly and usual way to secure information in the State Department bearing upon the subject under consideration; and they also desired to have the deliberate judgment of the able Committee on Foreign Relations with respect to it. Their desire in this regard was intensified by the partial disclosures made yesterday by the distinguished Senator from Ohio [Mr. FORAKER].

Mr. President, it seems to me that those who favored the reference for the reasons indicated are not wanting in humanity and love of country and are not unreasonable in their demands. Few questions can arise in this Chamber more momentous than this, and it should have that consideration which comports with its magnitude. Some Senators may be satisfied with the fragmentary information of affairs in Cuba, which they have from private sources, from the public press, and from the State Department, but others may not be.

It would seem that as a predicate for action upon this question, so important in its immediate results and which shall become a notable precedent, there should be upon the table of every Senator all the official information obtainable and a well-considered report from the appropriate committee. Each Senator must act upon the solemnity of his oath, and a nice regard for the obligation he has taken upon his entrance to this Chamber demands that he have the essential facts officially ascertained before he records his deliberate potential judgment.

I observe that this course was adopted by the Senate at the last session. The resolution concerning Cuba was referred to the Committee on Foreign Relations. The committee, after mature deliberation, reported it back to the Senate with substitute resolutions. The majority report was presented by the honorable Senator from Alabama, who now opposes the reference of his own resolution upon the same subject in the same manner to the same committee. If deliberation and orderly procedure was observed then, why not now? What exigency has arisen which demands the present departure from the practices of the Senate in the past?

Mr. President, I shall not stop to discuss the question as to whether, under the Constitution, the recognition of belligerency is an executive or legislative function, or whether the executive and legislative branches of the Government should act conjointly. But it seems to me that in the conduct of our foreign affairs the practice has been for the Committee on Foreign Relations to act upon these international questions to some degree in conjunction with the executive department of the Government. If such has not been the practice heretofore now is the time to set a good precedent.

A new Administration is in power, not yet three months old—an Administration charged with great responsibility. Shall we act in this grave matter regardless of its views or policies respecting foreign affairs? Shall the Congress take one position and the Executive another upon a question of such moment and obvious delicacy? If so, what will be the effect, not only upon the fortune of Cuba, but upon our domestic affairs, sensitive and unsettled as they are?

Mr. President, if I correctly apprehend those who favor the resolution of the Senator from Alabama, one of the chief purposes to be accomplished by the recognition of belligerency is to legitimatize the war in Cuba; it is to change barbarous warfare into civilized warfare. The immediate purpose is not to stop the war, but to alter its character.

Sir, I hold to the opinion that all war is barbarous. I am against war, civilized or uncivilized, except it be necessary to redeem people from oppression, or be for national defense, or to sustain the national honor in the protection of American citizenship. I preferred a reference of the joint resolution to the Foreign Relations Committee, that it might determine whether under all the facts, according to the official information in the possession of the Government, it could not report a resolution which will accomplish what the resolution offered by the Senator from Alabama fails to secure, and that is, peace and the independence of Cuba.

Upon the recognition of belligerent rights, Mr. President, we

do not stop the war; we merely dignify it. When will it cease? How much longer will the slaughter continue? How much longer will the sword and torch devour? No one can tell; no one can measure the loss.

I would prefer a policy more certain, more direct. Let us come out into the open and be for war or against it. If a great moral responsibility rests upon us, as I believe it does, let us discharge it squarely and fairly.

Sir, I would forthwith tender the good offices of this Government to the Spanish cabinet, to the end that war cease. And further, I would open amicable negotiations to secure the independence of Cuba, which, under the providence of the Almighty, is its manifest destiny. If these peaceful and honorable methods fail and the war should continue, I would have no hesitancy in reaching out the mighty arm of this Government and saying, "This war shall cease." But, sir, such an extreme measure will not be necessary to accomplish an honorable peace.

Some of the distinguished Senators who belong to the party which holds my loyal allegiance have professed to support the resolution of the Senator from Alabama because, as they hold, it is in consonance with the platform adopted at St. Louis. I heard the distinguished Senator from Nebraska [Mr. THURSTON], who presided over the deliberations of that great congress of American citizens assembled at St. Louis with such conspicuous ability, read the platform this morning and declare his approval of it. With due deference to the honorable Senator, I must utterly and entirely repudiate the suggestion that the resolution proposed by the Senator from Alabama is in accord with the Republican platform, for, in my judgment, it is against it. The platform upon the Cuban question declared that—

From the hour of achieving their own independence the people of the United States have regarded with sympathy the struggles of other American people to free themselves from European domination. We watch with deep and abiding interest the heroic battle of the Cuban patriots against cruelty and oppression, and our best hopes go out for the full success of their determined contest for liberty.

The Government of Spain having lost control of Cuba, and being unable to protect the property or lives of resident American citizens, or to comply with its treaty obligations—

Note carefully what follows—

we believe that the Government of the United States should actively use its influence and good offices to restore peace and give independence to the island.

This language is free from ambiguity. Its meaning is not involved in the slightest doubt. Peace and independence are to be obtained through the active agency of the United States.

Let me read the resolution offered by the Senator from Alabama:

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That a condition of public war exists between the Government of Spain and the government proclaimed and for some time maintained by force of arms by the people of Cuba, and that the United States of America shall maintain a strict neutrality between the contending powers, according to each all the rights of belligerents in the ports and territory of the United States.

The policy to which this resolution commits the Government is one of—

Strict neutrality between the contending powers, according to each all the rights of belligerents in the ports and territory of the United States.

I yield to no Senator, I yield to no Republican in my attachment to the doctrines of the Republican party. I believe that when the platform was adopted at St. Louis it was a covenant to be executed honestly, fearlessly, faithfully, and I am here, Mr. President, to execute it to the best of my humble ability.

The scope and purpose of the resolution and the Republican platform are totally dissimilar. The former recognizes the rights of belligerency and maintains an attitude of strict neutrality—nothing more—while the platform requires the Government to tender its good offices to restore peace and give independence to the island. The distinction between tendering the good offices of the Government and acknowledging belligerency, according to international law, is broad and marked.

I believe the golden moment of which the honorable Senator from Massachusetts [Mr. HOAR] has spoken has arrived. The condition in Cuba, except the horrors in the pestilential camps, which the President's message has wisely attempted to mitigate, seems to be worse than ever; the hold of Spain on Cuba is less certain; her revenues have decreased; the burdens of war have increased. The rainy season is at hand, when the march must stop. A large army is to be maintained at heavy cost until the seasons permit a new campaign. The issue is in the balance. Sir, it would seem that the highest considerations which can move men or nations would suggest the tender and acceptance of the good offices of this Government.

Mr. President, before closing, I wish to say that I am deeply sensible of the distress in Cuba. I have no doubt of the substantial accuracy of the reports of the press of the country with respect to it. I am also conscious of the distress and suffering in our own country. Every hour the pathetic appeals of our own countrymen come to us. Over 2,000,000 good and loyal American workmen are walking the streets and highways of our country asking for work; seeking not charity, but a chance to labor. Their eyes are on this Chamber. Every hour is precious to them. They are not threatened by the barbarity of Weyler, but by the cruelty of want.

For every soldier that falls on the fields of Cuba a hundred fall in the ranks of labor. The manufacturers have been discouraged and the merchants have been idle in the marts of trade. In the name of these, sir, I protest against delay in the consideration of the matters for which we were convoked in this extraordinary session. "Pass the tariff; pass the tariff" comes from our expectant countrymen night and day. A tariff law and a currency commission are the imperative demands of the hour. Whatever will interfere with early securing them, no matter how important it is, I shall steadfastly oppose.

I offer as an amendment to the resolution of the Senator from Alabama what I send to the desk.

The PRESIDING OFFICER (Mr. CHANDLER in the chair). The Secretary will state the amendment proposed by the Senator from Indiana to the joint resolution.

The SECRETARY. It is proposed to strike out all after the resolving clause and insert:

That the Congress of the United States views with deep solicitude the deplorable civil strife in the Island of Cuba, which is so destructible to life and property, and which is embarrassing and destroying the commerce of the United States with Cuba. The highest motives of humanity and public interest require the cessation of hostilities and the establishment of peace, and that the President shall, in a friendly spirit, tender the good offices of the United States to Spain, to the end that bloodshed may speedily cease and that honorable and permanent peace may be established in the Island of Cuba; and further,

That the President, in a spirit of amity, tender the good offices of the United States to Spain in an endeavor to secure the independence of Cuba upon terms alike honorable and just to all powers concerned. And if the President shall be unable by such friendly intercession to secure the independence of Cuba, within a reasonable time, he shall communicate the facts to Congress, with his recommendations thereon.

Mr. CAFFERY. Mr. President, I do not propose to take up any considerable time of the Senate after the question has been so thoroughly discussed and so ably discussed on both sides. I will say to the Senator from Indiana [Mr. FAIRBANKS] that from the vote upon the motion to commit the joint resolution to the Committee on Foreign Relations it is very easy to perceive what will be the fate of his substitute. It will be voted down likewise.

While we all sympathize with the Cubans, and while we all respect and admire their efforts to obtain independence, it appears to me that there is a consideration of much more moment which has been entirely lost sight of in this discussion. It is whether or not this joint resolution of the Senator from Alabama [Mr. MORGAN] is in conformity with the Constitution of our country, and, if it is, whether we have pursued, in the matter of the consideration of that resolution, the ordinary form of procedure that we apply to any matter of the commonest business before the Senate.

The contention has never been successfully met that the prerogative or power of recognizing the independence of a new nation or the fact of belligerency rests with the Executive. There have been general assertions, but there has been nothing, in my opinion, in the way of argument to show that the Congress of the United States is charged with the power of recognizing a new state or recognizing a condition of belligerency. That first point has not been met.

The precedents of one hundred years have been adduced to the Senate to show that the lawmaking branch of the Government is without authority in the premises for recognizing belligerency or recognizing independence. The uniform custom and practice of the Government, if the matter were of doubtful construction, would settle the point in favor of the recognition of the independence or the condition of belligerency by the executive branch of the Government. So the first point, in my opinion, largely transcends any question of sympathy for a struggling people, for the question of a flagrant violation of our Constitution would have a much more far-reaching consequence than the question of promoting the interests of the Cubans in their struggle for liberty.

But, Mr. President, it has been shown with as much potency as possible that even the recognition of belligerency would do the Cubans no good. So we are confronted with the proposition that the precedents of a hundred years and the plain deductions from the Constitution itself must be violated in order that this Senate may express its views upon a question of fact being enacted in a distant country. If there was anything more needed to show the utter inability of this body as a mass to properly consider questions of fact, we have that evidence in the disclosures of yesterday. It appears that several Senators, members of the Foreign Relations Committee, visited the Secretary of State in order to glean some information as to what was going on in Cuba. This information was detailed by them, filtered out by them to the Senate of the United States, after a series of questions amounting to almost cross-examination.

What did we glean? We gleaned the statement from the honorable Senator from Alabama that the communications between the United States consuls in Cuba and the Secretary of State ought

not to be given out to the public or to the Senate with the names of the consuls attached for fear of massacre—I suppose of those consuls. The distinguished Senator from Ohio filters out information to the purport or to the extent that if this information is given out there would be some fear of violence somewhere. He does not go to the extent of the massacring of General Lee or our consuls; and upon this testimony, delivered before the Senate, we are called upon to recognize a condition of belligerency in Cuba!

First, the testimony has nothing to do as to the matter of fact; second, it does not come to us in proper form. If it be true that the lives of American consuls in Cuba are threatened with violence, that would be an occasion for us to sever diplomatic relations with Spain, which probably, with the strained relations existing between the United States and Spain to-day, would develop into war. But that does not signify that there is a case of belligerency in Cuba.

Mr. President, it is easy to inflame the patriotic disposition of the American people. It is a much more difficult task in times of excitement to curb the erroneous patriotic sympathies of a large mass of people, and that, in my opinion, is what we ought to do to-day. There is no sentiment which will create applause, there is no remark which will create enthusiasm in regard to this matter, unless it is in an exaltation of the Cubans and in condemnation of the Spaniards. Our sympathy for liberty ought not to lead us to undertake, first, a province that we can not fill—the province of finding matters of fact; and, second, of passing upon matters of fact without the power and the capacity to procure all the evidence.

It leaked out in the communication yesterday that the Secretary of State did not want even to give the names of the consuls. The Secretary of State can withhold and has withheld the information, and it is absolutely prerequisite to forming a judgment upon a matter of this sort that we should have the evidence, and all the evidence, in the most official way; and we have none.

General Grant had this case, or a similar one, under consideration for ten years. His then able Secretary of State, Mr. Fish, after investigating every condition surrounding the insurrection in Cuba, rightly declared that there was no cause or no pretext for the United States recognizing belligerency in Cuba.

The last Administration had this matter under consideration, and from the testimony adduced before Mr. Olney he concluded that there was not such a condition of affairs as would warrant the recognition of public war in Cuba. The present Administration has had it in hand, and likewise, with all the information gathered in advance, and with the fresh information before them, with every desire and opportunity to do justice in the premises and keep the United States within the lines of international law, they have not seen fit to recognize a state of belligerency in Cuba.

Who, Mr. President, is to recognize such a question of fact? I propounded to the honorable Senator from Virginia [Mr. DANIEL] the question, when he was debating this matter before the Senate a day or two ago, whether the province of a legislative body was to find matters of fact or to enact legislation, and from what article of the Constitution he implied the authority upon the part of this body to go into investigations of matters of fact. You can not deduce it from the general power of legislation; it does not flow as a natural or as a necessary consequence. We enact laws for this great nation; we prescribe the rule of conduct of these 70,000,000 people; but we have no authority or power to go outside of the United States and to establish any matter of fact of any kind or character whatever; and the question of belligerency is a pure question of fact.

International law writers differ as regards some of the immaterial facts necessary to exist before you can recognize; but they generally agree, on the whole, and they universally agree, so far as I know, and the practice of nations is in accord with it, that it is purely a question of fact, to be deduced from a congeries of facts, to be deduced from the surrounding facts; and it is a question which a great nation ought to approach with a great deal of care, a great deal of circumspection, and a great deal of caution; and here we are to plunge into a possible collision with Spain without having even the evidence upon which you could send a man to the penitentiary for stealing a ginger cake.

No sort of evidence of any kind has been adduced to this body which a jury would consent to take and arrive at a proper solution and a proper finding of a matter of fact. Our evidence has been entirely ex parte; it has been altogether on one side. Inflammatory newspaper articles, sensational newspaper reports, unauthenticated and irresponsible, are gravely cited as establishing a matter of fact. That sort of evidence, Mr. President, does not satisfy me. I have no doubt that some of the gentlemen who give these startling statements in regard to Cuba believe what they stated, if they were a hundred miles off from the scene; but these statements have been controverted by the facts themselves.

Some of these newspaper correspondents have proven more than their case. They have established the fact of a triumphant insurrection; they have established the fact of the Cuban insurgents holding possession of the country and chasing and locking up the Spaniards in fortified towns. If that be so, Mr. President, their independence is already achieved.

Then, again, pronunciamentos from Weyler are heard, and Spanish sympathizers come into the press and make their statements. Upon statements, we may say, of interested parties, statements largely emanating from the Cuban junta, which fights its battles at a safe distance, the Senate of the United States is called upon to pass upon this international fact of very considerable and grave moment.

I protest against this action. I deny the authority of the Senate of the United States to sit as a commissioner to find a fact. If it has that authority, bring your evidence from both sides; let all sides be heard; let there be a patient, careful, and patriotic consideration of the question, and let not our minds be carried away with exaggerated sympathy or with simulated patriotism.

The PRESIDING OFFICER. The question is on the amendment proposed by the Senator from Indiana [Mr. FAIRBANKS].

Mr. MORGAN. I move to lay the amendment on the table.

The PRESIDING OFFICER. The question is on the motion of the Senator from Alabama to lay the amendment on the table.

Mr. HALE. Let us have the yeas and nays on that, Mr. President.

The yeas and nays were ordered.

Mr. HALE. Now, let the Chair state the question, so that Senators may understand it.

The PRESIDING OFFICER. The question is on the motion to lay on the table the amendment proposed by the Senator from Indiana.

Mr. HALE. Let the amendment be read.

The PRESIDING OFFICER. The amendment will be stated.

The SECRETARY. It is proposed to strike out all after the resolving clause and insert:

That the Congress of the United States views with deep solicitude the deplorable civil strife in the Island of Cuba, which is so destructible to life and property, and which is embarrassing and destroying the commerce of the United States with Cuba. The highest motives of humanity and public interest require the cessation of hostilities and the establishment of peace, and that the President shall, in a friendly spirit, tender the good offices of the United States to Spain to the end that bloodshed may speedily cease, and that honorable and permanent peace may be established in the Island of Cuba; and, further,

That the President, in a spirit of amity, tender the good offices of the United States to Spain in an endeavor to secure the independence of Cuba upon terms alike honorable and just to all powers concerned. And if the President shall be unable by such friendly intercession to secure the independence of Cuba within a reasonable time, he shall communicate the facts to Congress, with his recommendations thereon.

The PRESIDING OFFICER. The pending question is on the motion to lay the amendment which has just been read upon the table, upon which the yeas and nays have been ordered.

The Secretary proceeded to call the roll.

Mr. CLAY (when his name was called). I am paired with the junior Senator from Massachusetts [Mr. LODGE], but I transfer that pair to the senior Senator from Virginia [Mr. DANIEL] and vote "yea."

Mr. ELKINS (when his name was called). I am paired with my colleague [Mr. FAULKNER].

Mr. FORAKER (when his name was called). I am paired with the junior Senator from South Carolina [Mr. EARLE], but I understand that, if here, he would vote "yea." I therefore vote "yea."

Mr. WALTHALL (when Mr. GEORGE's name was called). I again announce that my colleague [Mr. GEORGE] is paired with the Senator from Colorado [Mr. TELLER]. I ask that this announcement may apply to any other yea-and-nay votes taken during the day.

Mr. GORMAN (when his name was called). I have a general pair with the Senator from Maine [Mr. FRYE], and therefore withhold my vote.

Mr. KENNEY (when his name was called). I again announce my pair with the junior Senator from Pennsylvania [Mr. PENROSE]. He not being present, I withhold my vote. If he were present, I should vote "yea."

Mr. KYLE (when his name was called). I transfer my pair with the Senator from Connecticut [Mr. PLATT], as before, to the Senator from Nebraska [Mr. ALLEN], and vote "yea."

Mr. LINDSAY (when his name was called). I have a general pair with the senior Senator from Michigan [Mr. MCMILLAN]. If he were present, I should vote "yea," but he being absent, I withhold my vote.

Mr. MCENERY (when his name was called). I am paired with the junior Senator from New York [Mr. PLATT], and therefore withhold my vote. If he were present, I should vote "yea."

Mr. MANTLE (when his name was called). I desire to again announce my pair with the junior Senator from Virginia [Mr. MARTIN]; but with the statement made upon the other vote by the senior Senator from Virginia [Mr. DANIEL], I think that I am at liberty to vote upon this question. I therefore vote "yea."

Mr. NELSON (when his name was called). I am paired with

the Senator from Missouri [Mr. VEST], and therefore withhold my vote.

Mr PERKINS (when his name was called). I have a general pair with the junior Senator from North Dakota [Mr. ROACH], who is absent from the Senate Chamber, and therefore I withhold my vote.

The roll call was concluded.

Mr. CULLOM. I have a general pair with the senior Senator from Delaware [Mr. GRAY], and shall therefore withhold my vote.

Mr. BATE. I desire to announce that my colleague [Mr. HARRIS of Tennessee], who is not present, is paired with the Senator from Vermont [Mr. MORRILL].

Mr. CAFFERY (after having voted in the negative). I am paired on this question with the Senator from Virginia [Mr. DANIEL], who is absent. I voted inadvertently, and therefore desire to withdraw my vote.

The PRESIDING OFFICER. The Senator's vote is withdrawn.

The result was announced—yeas 35, nays 15; as follows:

YEAS—35.

Bacon,	Clark,	Jones, Ark.	Rawlins,
Baker,	Clay,	Kyle,	Shoup,
Bate,	Cockrell,	Mantle,	Stewart,
Berry,	Davis,	Mason,	Thurston,
Butler,	Foraker,	Mills,	Tillman,
Cannon,	Gallinger,	Morgan,	Turner,
Carter,	Hansbrough,	Pasco,	Turpie,
Chandler,	Harris, Kans.	Pettigrew,	Walthall.
Chilton,	Heitfeld,	Pettus,	

NAYS—15.

Allison,	Hale,	McBride,	Wetmore,
Burrows,	Hanna,	Pritchard,	White,
Fairbanks,	Hawley,	Spooner,	Wilson.
Gear,	Hoar,	Wellington,	

NOT VOTING—38.

Aldrich,	George,	Martin,	Quay,
Allen,	Gorman,	Mitchell,	Roach,
Caffery,	Gray,	Morrill,	Sewell,
Cullom,	Harris, Tenn.	Murphy,	Smith,
Daniel,	Jones, Nev.	Nelson,	Teller,
Deboe,	Kenney,	Penrose,	Vest,
Earle,	Lindsay,	Perkins,	Warren,
Elkins,	Lodge,	Platt, Conn.	Wolcott.
Faulkner,	McEnery,	Platt, N. Y.	
Frye,	McMillan,	Proctor,	

So the motion to lay the amendment on the table was agreed to.

The joint resolution was reported to the Senate without amendment, ordered to be engrossed for a third reading, and was read the third time.

The PRESIDING OFFICER. The question is, Shall the joint resolution pass?

Mr. HALE. Upon that I demand the yeas and nays.

The yeas and nays were ordered.

Mr. HALE. Mr. President, I do not think anything further that can now be said or done can stay the march of the joint resolution. The votes already taken in the Senate show that so far as this body goes the foreign policy of the present Administration has been taken possession of and is to be shaped by its political opponent. I believe that to be an unprecedented thing in the history of all Administrations. I believe the passage of the joint resolution involves the United States possibly, and I fear probably, in the danger of actual war in the near future, and I call attention—and that is why I have risen—to the record which the roll call has made to-day.

The solid opposition vote against the Republican party, including Democrats and Populists, with two exceptions, have declared, by a vote of 34 to 19, against even arresting this measure long enough to send it to the committee of this body which, by its rules, has authority over the subject-matter. That vote is made up, as I have said, by the solid opposition to the Republican party, with two exceptions—the Senator from California [Mr. WHITE] and the Senator from Louisiana [Mr. CAFFERY]—and nine Republicans; and to-day the Administration stands before the country with its foreign policy, and a possible war involved, mapped for it by practically the solid vote of the opposition and a fraction of Republicans.

I lament that most remarkable condition. I grieve that at the outset of President McKinley's Administration this is to be done, without deliberation of a committee, without the act of the President in any way suggesting it, nay, in the face of the fact that the President has shown his interest in the subject by communicating to us a special message in which he has asked for relief and in which he has carefully excluded every other suggestion. We have the President of the United States, elected lately as its President, new in office, on record as submitting to the Senate his judgment of the extent to which Congress should go at present, and that recommendation is to be ignored by literally going beyond anything he has suggested, a result to be accomplished in this body by the solid votes of our opponents and a fraction of Republicans.

I can not hinder that. No Senator sympathizing with me can hinder it. No amount of speaking can deter the Senators from voting finally on the subject-matter. It is a fact that here in the Senate seems to be the center of this determination to drive Congress and the United States on to the perilous edge of war, and that can not be hindered with the constitution of the Senate, as is manifest by the votes we have had this afternoon. Contenting myself with the fear—I will not say prophecy—that at no distant day regrets will arise in many Senators' minds for the action of to-day, and with my protest against this action, I shall take no more of the time of the Senate.

Mr. GALLINGER. Mr. President, I have said very little in the course of this debate, and I propose to say but little in its closing hours. We have heard all sorts of reasons given why the joint resolution should not be adopted, and now that we are about to take the final vote we have had a new reason thrust upon us, and that is a political one.

I do not share in the apprehensions which seem to fill the mind of the distinguished Senator from Maine [Mr. HALE] so far as the Republican party is concerned in the record it is making to-day. I was at the great convention in St. Louis, and I heard the platform read, I think, by the distinguished Senator from Ohio [Mr. FORAKER], who addressed us so eloquently yesterday, and who was chairman of the committee on resolutions; and I remember, as I sat there in that auditorium, with probably 10,000 people, interested and earnest, with what acclaim the resolution relating to Cuba was accorded the approbation of that great audience. Sir, from that time to the present I have stood consistently upon the record we made in St. Louis and upon that plank of the Republican platform. If I as a Republican violate to-day any tenet of my political faith because I stand upon that platform now as I did then, I am willing to take my individual responsibility so far as my individual act is concerned.

I think those of us who believe the time has arrived to say a word and cast a vote for Cuba need not fear the indignation either of the American people or of the political party to which we belong. I am ready, sir, to risk my interests in the hands of that party upon the platform I occupy and upon the vote I cast, and I am willing that the distinguished Senator from Maine should square his account with the people whom he so ably represents in this Chamber.

Mr. President, what have we said to-day; what are we trying to say to-day? We are trying to say to the American people and to the world that a state of war exists on the Island of Cuba; and that is all we are trying to say. I have in my desk extracts from almost every writer upon international law which justify me in saying upon their authority that a state of flagrant, wicked, murderous war exists in the island, and yet we hesitate to declare it.

What are those 200,000 Spanish soldiers doing in the Island of Cuba? Are they there for their health? [Laughter.] Have they gone there for a holiday excursion? Are they there for any other purpose than to wage a relentless war upon the people who are trying to establish the principles of freedom and independence in that once beautiful and now desolate isle? And yet all we are trying to say to-day, supported by facts incontrovertible, and which every Senator can ascertain for himself, if he will take the trouble, is that those 200,000 Spanish soldiers with cannon and with muskets and with murderous implements of warfare are waging in that island a war against the people who are trying to establish their independence and to become a free republic.

Mr. President, that is all I care to say. I have no apologies to make, either to the distinguished Senator from Maine, to the Republican party, or to the country, for the action I have taken, and which I propose further to take upon the votes on this great question. I am willing to risk my political faith; I am willing to risk anything that may come to me politically or otherwise, when the conscience of the American people is aroused as it is aroused on this great question; and I shall cast my vote for the passage of the joint resolution with the sincere conviction that I am doing my duty to myself, to my State, and the nation I love as well as the Senator from Maine or any other Senator in this Chamber loves it.

Mr. WELLINGTON rose.

Mr. GALLINGER. Does the Senator from Maryland desire to interrupt me?

Mr. WELLINGTON. May I ask the Senator from New Hampshire a question?

Mr. GALLINGER. Certainly.

Mr. WELLINGTON. The Senator has said something about loyalty to the platform of the party adopted in St. Louis. I wish to ask him whether he does not recognize the fact that to-day we have voted upon this floor against a resolution presented by the Senator from Indiana [Mr. FAIRBANKS] that was couched in the exact language of the Republican platform adopted at St. Louis?

Mr. GALLINGER. When I am in a battle, I do not permit the enemy to furnish me with my ammunition. [Applause in the galleries.]

Mr. WELLINGTON. Upon this occasion, however, the Senator from New Hampshire has allowed the enemy to furnish him with his ammunition.

Mr. GALLINGER. If I had allowed the Senator from Maryland to furnish the ammunition, it would certainly have come from the enemy. There is no doubt about that. [Applause in the galleries.]

Mr. HOAR. Mr. President, are we to have order in the galleries, or are we to proceed without order?

The PRESIDING OFFICER. At the suggestion of the Senator from Massachusetts, it is the duty of the Chair to notify the occupants of the galleries that demonstrations of any kind are not permitted. If they continue, the galleries will be cleared.

Mr. HOAR. It was the duty of the Chair to do that without my suggestion.

Mr. THURSTON. I suggest to the Senator from New Hampshire that the amendment proposed by the Senator from Indiana was not in the exact language of the platform of the Republican party and, in my judgment, was not in harmony therewith.

Mr. GALLINGER. There is no question about that, but I do not care to take a single moment of the time of the Senate beyond what I have occupied, and which has been so courteously granted to me. I am done. I stand upon my individual responsibility and record as a Republican and as a member of this body, and I shall esteem it one of the grandest privileges of my life, an opportunity such as will seldom come to me, to cast my vote in behalf of the same principles that underlie our own grand Republic and that go to make up the highest possible privilege of American citizenship, that of independence as a nation and liberty as a people.

Mr. SPOONER. Mr. President, I am constrained by my view of duty to vote against the joint resolution. I had intended to address the Senate with some elaboration—I supposed I should have an opportunity on Monday—against the power of Congress to exercise what I consider an executive function. My memoranda are not accessible, and I am ill, and shall content myself simply with a statement of the reasons which impel me to record my vote against the joint resolution.

I think the President of the United States, without any aid from Congress, has the power to proclaim neutrality and to recognize the belligerency of Cuba. President Washington did it in the war between England and France, and his action drew upon him great criticism, for England had oppressed and made war upon us, while France had been our friend.

Mr. COCKRELL. Was there any belligerency in that case? Were they not two established nations?

Mr. SPOONER. That fact is of no consequence. He did it, and as an executive act.

Mr. COCKRELL. He recognized belligerency?

Mr. SPOONER. He recognized belligerency.

Mr. COCKRELL. The belligerency of which one?

Mr. SPOONER. It was a proclamation of neutrality, and the consensus of opinion has sustained his power. Essentially, what is the recognition of belligerency but a declaration of neutrality? What follows from a recognition of belligerency except neutrality? There is nothing in the pending joint resolution——

Mr. HOAR. "The United States shall maintain a strict neutrality," is the language of the joint resolution.

Mr. SPOONER. There is nothing in the joint resolution, in fact and in law, but a mere declaration of belligerency. All that follows it is surplusage, because, the fact of belligerency being recognized or declared, rights of belligerency follow, not from any law of ours, not from our Constitution, but from the law of nations.

A ship flying the flag of the Cuban Republic would have a right to enter one of our harbors, not by virtue of any act of Congress, but because of the law of nations. Senators have asked here in a sneering way, "What is the law of nations?" The Supreme Court of the United States, in the Prize Cases, answered that question through Mr. Justice Grier thus:

> The law of nations is also called the law of nature. It rests upon the common consent and the common sense of nations.

I doubt not the Senator from Alabama will concede that if every word of his joint resolution were stricken out except the declaration that a state of public war exists between the Cubans and Spain, all the rights or declarations which follow would result from international law. The resolution, if passed and valid, would be efficient for no other purpose save that of recognizing belligerency.

Mr. President, as I have said, the President has the power to recognize the belligerency of Cuba without any action of Congress. President Lincoln blockaded the Southern ports. The Supreme Court of the United States held it to be valid. Recognition of belligerency by executive act being valid, I am led to say that there is one thing in all this discussion which I have not been able to understand, and that is how it can be an executive act, as all Senators seem to admit, and at the same time be a legislative act and within the constitutional competency of Congress.

It must be one or the other. It can not be both. From my understanding of the theory of our Government and the Constitution under which we live, the President has the power, and I think the sole power, to recognize, sometimes in conjunction with the Senate, independence. Under the Articles of Confederation the Congress had the power to send and receive ambassadors. Under the Constitution of the United States the power is given to the President to send ambassadors and other ministers and to receive them.

That involves in its very nature and its essence the power to recognize independence. If he accepts an ambassador or minister, that recognizes by an Executive act the independence of the government which sends him. If he accredits one to another government, that recognizes the independence of that government.

It has been argued that Congress has the power to overrule that. I deny it. Congress has the power, I admit, to repeal every act creating the office of consul or minister or ambassador to a particular country; Congress has the power to repeal every act fixing a salary to be paid to ambassadors, to ministers, and to consuls, if it chooses to exercise the power; but notwithstanding all that, the power is lodged in the President of the United States, and no Congress can deprive him of it, to send envoys and ministers if they go without salary, and he has the power to receive them from their governments and to conduct our foreign relations through them here.

Congress has power to declare war. That power is conferred by the Constitution upon Congress. Congress can declare war against the Republic of Cuba, using that phrase, and thereby recognize the existence of the Republic of Cuba; but that will be a result, an incident in the exercise of a clearly conferred and indisputable power resting in Congress. It is another matter to declare the fact, for independence is a fact, substantively by Congressional action. Congress has power to pass an act regulating our commerce with the Republic of Cuba. That would recognize in legislation the Republic of Cuba; but it would be an incident in the exercise of a clear legislative power, and only that.

Congress might by act regulate commercial intercourse with the "Republic of Cuba," and still the President might decline to receive a minister from the Republic of Cuba or to send one there. Congress can pass an act fixing the value of the coins of the "Republic of Cuba" for circulation throughout our country, and in that way recognize the existence of the Republic of Cuba; but it would be a mere incident in the exercise of a power which confessedly is legislative, conferred upon the Congress.

I repeat, that I do not see how the power in question can be at once executive and legislative. The Constitution provides, in my view, no such anomaly. If it be legislative, it is for Congress to take the initiative and Congress alone. If it is executive, it is for the President to take the initiative and the President alone. If it is legislative, Congress could not delegate the power to the President. If executive, the President can not turn it over to Congress. Congress has the power to abrogate a treaty the day after it is made, but that does not in the slightest degree deprive the President, in conjunction with the Senate, the President taking the initiative, of course, from exercising the treaty-making power given by the Constitution. I discover in the Constitution no power, express or implied, to pass this measure.

What is this proposition? It is a proposition to recognize in a qualified way the government of Cuba. I do not stand here to contend that there is, in fact, no Republic of Cuba. There may be. The President, in the exercise of his functions, using all the facilities which from the foundation of the Republic have been given into the hands of the President, may ascertain facts which will justify him a month hence in recognizing the independence of a "Republic of Cuba." I say that a recognition of belligerency is a qualified recognition, because you can only accord belligerent rights to an entity, a governmental entity, supported in a manner by force of arms.

I can not persuade myself to believe that the framers of the Constitution intended to give to the President the power of recognizing independence, and yet to give to the Congress the power to exercise this qualified recognition of belligerency. The one is no more or less simply a fact than is the other.

Now, Mr. President, upon what possible theory is it that this can be called legislation? What is it? Senators will not question that it is nothing more than the declaration of a fact, or that, the fact being lawfully declared, international law gives certain rights. Where does Congress obtain under the Constitution the power to simply declare a fact, or, if you choose to say so, to simply recognize a fact? Is that legislation? An act passed by Congress within the power conferred upon it by the Constitution is a rule of conduct. It is not a rule of conduct which lasts only a week. It is not a rule of conduct which is to be binding only in the daytime. It is a rule of conduct which lasts until the power which made it unmakes it.

When there is a changed condition of facts, when there is no longer occasion for such a law, when the public interest no longer

demands its operation, the Congress can and will repeal it. No other power can repeal it. But how about the assertion of a fact, something that may be true to-day and false next week? War changes from day to day the condition of affairs. To-day there may be a condition of public war in Cuba. Sixty days from now, notwithstanding this attempted recognition of belligerency, there may be none.

But you will have what our friends call a law upon the statute book declaring the fact of belligerency. How long is this to be operative? Six months later a new rebellion may have been organized and carried to a condition of public war. Would this thing you call a law be operative? Would it impose any duty upon the Executive? Would Congress have to pass a new law declaring the new fact or would this answer the purpose?

Mr. President, I stand by the Republican platform at St. Louis, although I never yet have been willing to admit that a party platform can constrain a Senator on either side of this body upon a question of constitutional law. But I yield to no man in my loyalty to the Republican party or in my loyalty to its platform declarations. I deny, however, that this platform commits the party to this proposition.

It is said that the people of the United States demand this action of the Senate.

It is unquestioned that the people of the United States deeply sympathize with Cuba. So do I. I hope for her independence and prosperity. I am not in my heart any friend of Spain in her relation to Cuba. She has in that regard forfeited any claim to sympathy or friendship by long years of misrule, oppression, and broken promises in Cuba. Senators have no right to say, if a Senator thinks it his duty to vote against this joint resolution, that he is in hostility to Cuba, that he is friendly to Spain, that the spirit of liberty does not dwell in his heart. Not at all.

The people of the United States have not been advised that this proposition is a novel one, and that never in the history of the Republic has it been carried into effect before, although the power has been by different public men sometimes asserted. If this were a concurrent resolution expressing the opinion of Congress as to what the action of the Executive ought to be, that would be one thing. It is not that. It would then only be advisory. That might strengthen the hands of the Executive in a moral way. This would tie them in a legal way, if it be law, Mr. President. Congress before has passed resolutions expressive of its opinion upon such questions.

It is proper that Congress should do it in certain circumstances. This is a proposition to go beyond any precedent, so far as I know, and to compel the President to express his public approval or disapproval of this Congressional declaration of a fact.

Recognition of belligerency is not only to my mind executive in its nature, proper only to be exercised by an Executive who can gather in an authentic way the facts upon which his action should be predicated, but it is exclusively executive. This is a proposition designed necessarily to force the hand of the President in a grave matter of our foreign policy. Never from the foundation of the Government, as I understand it, has the Senate, although a part of the treaty-making power, claimed the right to demand of the President papers in the Department of State relating to our foreign relations.

President Washington denied that right. The Senate has always recognized the right of the President to decline. Not so as to matters which we have a right to know in order to discharge intelligently our duty in passing laws. It can not be possible that the Senate can demand of the present Administration—demand, I use the word advisedly—that there shall be transmitted here for the use of the public, or use in public, the reports of our consuls in Cuba, and the correspondence between Secretaries Olney and Sherman and Spain.

If the President should decline upon the ground that in his judgment it was incompatible with the public interests, no Senator would insist that it was discourteous to the Senate. The right to withhold such information must, in the very nature of things, rest with that department of the Government which, under the Constitution and in accordance with our traditions, has charge of our foreign relations.

If the Congress of the United States, or the Senate, had possessed and successfully exercised the power during the war to bring out by a resolution into the light of day the correspondence which was going on between Mr. Seward and the British Government in relation to the *Trent* affair, we would have had war between Great Britain and the United States. There might be to-day a negotiation well along, initiated by the executive department with Spain, for the independence of Cuba. If Congress could and should pass a law interfering with our relation to Cuba, changing the attitude of the United States to Cuba, that negotiation would inevitably be embarrassed or defeated.

Negotiation with foreign nations, as negotiations among business men, requires unity of action. There can not be too many engaged in negotiation at once. It must be confidential; it must be, in order to be successful, in a measure secret. It is hardly possible, I submit to Senators, although I know that I submit it vainly, that if this were a legislative power under the Constitution, neither House of Congress would have had from the beginning, unchallenged, the right to demand information from the State Department essential to enable it to legislate intelligently upon a subject within its constitutional legislative capacity.

And yet there is not a writer upon our constitutional law—Story, Pomeroy, Kent, and all—who does not concede that communications sent and received in the course of our intercourse with foreign nations may, in the discretion of the President, be kept away from the public, or, what is nearly the same thing in these days, from the Senate.

Mr. President, I beg leave to repeat that I can not conceive it possible that this power can be a concurrent power, that it can be lodged in the Executive and at the same time lodged in the Houses of Congress. The concurrent jurisdiction and the principle which regulates it we all understand. That jurisdiction which first attaches goes on to the end. Two jurisdictions can not be efficiently exercised at the same time.

The conclusion and action of each might differ, and this would practically destroy the power. The principle of concurrent jurisdiction can not possibly apply to coordinate departments of the Government; otherwise we might have the Houses of Congress passing a joint resolution one way, and the President acting in another—Congress declaring a fact one way, and the President declaring it another way. This joint resolution, if it be passed, and it will pass this body, will be a vicious precedent, in my judgment, and a fruitful source of weakness and friction in the conduct of our foreign relations.

We have had in all the years of our history little cause to criticise the management of our foreign affairs by the executive department. As a rule, from the beginning to to-day they have been managed with discretion, with ability, and with true American spirit.

There is no occasion now for any innovation. There is no occasion, if there be warrant, for Congress to attempt to force the President into an unwilling partnership in the conduct of our foreign relations, the most sensitive, the most far-reaching, and at times the most delicate and dangerous of any function devolved upon any department of the Government.

Mr. Clay went as far as anyone in asserting the power of Congress jointly with the Executive to recognize independence; but Congress never passed anything but an advisory resolution. Scattered all through the books are the utterances of the ablest statesmen of both parties denying the power of Congress to trench in this wise upon the power of the Executive.

Mr. President, no Senator will doubt that if this practice is now inaugurated it will be pursued. No Senator who stops to think will doubt that there is danger at least that in this most difficult and delicate relation and transaction of the Government the Congress will at inopportune times for the interest of the people intervene in the conduct of our foreign affairs. The President would be likely to wait for Congress. Congress would not be as likely to wait for the President. In such matters there is obvious weakness in divided responsibility. I am not afraid of "one-man power" in the President in this regard.

He is responsible to the people, and is subject to impeachment. We heard during the war much about "one-man power." We heard Abraham Lincoln denounced from one end of the land to the other as usurping and exercising legislative and judicial functions, that we were living under a "one-man power;" but to-day all the people from ocean to ocean rise up and bless him, and his memory throughout the world is fragrant, and to be fragrant forever.

General Grant was permitted by Congress to pursue his way with reference to the recognition of Cuba through many years. He was a liberty-loving man; he was a soldier; he was an American; he was in favor of the Monroe doctrine. No Congress sought to force him in what was then and what is now a situation of danger by compelling him to sign or veto a declaration of belligerency. Shall we do it with our new President? The power must at least be considered doubtful, as eminent lawyers in this body differ about it.

If it be a doubtful question whether Congress possesses the power to pass such a resolution, should one be passed and the President forced to sign it or veto, except under extraordinary circumstances, evincing either blindness or indifference to the popular will?

A President might and would likely be placed at a very unfair disadvantage by such action. He might, from information in his possession which he could not make public, feel it a duty to withhold approval and be disabled from giving to Congress frankly and fully his reasons for disapproval.

Senators on the other side waited a great many months for Mr. Cleveland to act in the Cuban matter, fourteen, I think, or more. He was not perhaps very greatly beloved at times by his party in

the Senate. Yet you did not insist upon forcing his hand by such action upon the Cuban question. The Senate did not vote to force him to sign or to veto a joint resolution—the same in legal effect as a bill—declaring belligerency.

Yet now, when this Administration has been in power only since the 4th of March, it is proposed to force the hand of President McKinley by compelling him to sign or disapprove a bill declaring that public war exists in Cuba. I deny the power thus to act and I deny the justice of such action.

He has sent a messenger of his own choice to Cuba to investigate. He may employ and send there agents known and unknown. He has facilities for investigation which we have not. He will be able to furnish to the Senate after a little, if it is in his opinion wise to do it, the result of his investigation, and he will be able to act upon full and authentic information in adopting a policy with reference to Cuba not only as to belligerency, but in general.

I ask again, Why attempt to force the hand of the President in this way, within ninety days after he has taken the oath of office, in the absence of any desire expressed on his part for Congressional action? Is it fair to a President? Is it fair to the country? Is it a good precedent, Senators? I do not doubt the sincerity of any colleague in this body; I do not doubt his love of liberty; I do not think because he chooses to speak upon a question he is a legislative filibuster.

I believe every Senator in this body wishes to do in a calm and deliberate way his duty. I say to Senators on the other side: The time may come when the political situation will be changed. You may have another Democratic President. I hope you will not, but you may have another Democratic President. You may at the same time have a Republican Congress, and your President may be confronted with a situation of delicacy and danger, as the present President is, and as was President Grant.

I doubt if you would think it statesmanship, I doubt if you would think it wise, when he was performing in a confidential way, as he must in such affairs, his duty, when he was seeking that information upon which alone he could intelligently base Executive action, to force him by a joint resolution.

I suspect that if William McKinley had been defeated at the last election, if Mr. Bryan had been chosen and occupied the White House, and it was proposed by a Republican Congress to take away from him this important phase of the conduct of our foreign relations, to force him to approve or to disapprove a Congressional declaration of fact, to put upon him in this way a policy with reference to a great and delicate matter which he did not believe to be right or in the interest of the American people without further information, which he was seeking, Senators on the other side would make the rafters shake in this building with their eloquent denunciation of it as unjust to the Executive.

I deny, Mr. President, that the people are demanding the establishment of any new precedent of this kind in the legislative history of our Republic. They sympathize with Cuba. They wish to see Cuba free, as I wish to see Cuba free. But I believe, Mr. President, that the American people have implicit confidence in the present occupant of the White House. They chose him in the constitutional way to be their President. They placed in his hands, under the Constitution, the executive power, and I firmly believe, if this matter were submitted to them to decide, they would say, "Give him a fair chance."

There is no reason to doubt his sentiment in regard to Cuba. There is no reason to doubt his patriotism. He testified his love of liberty under our flag on many a battlefield. He never has made an utterance or done an act in public or in private life not in harmony with liberty and true, patriotic, American policy. He did not falter in his duty as a soldier. He will not falter in his duty as a President. Give him a fair chance.

Mr. President, I rose simply to explain in a few words the reasons why I can not, with my conviction of duty, vote for the pending joint resolution. I am painfully aware that I have spoken in a desultory way, and I have taken very much longer time than I intended, for which I apologize to the Senate.

Mr. GORMAN. Mr. President, during the entire consideration of the Cuban question I have contented myself with remaining quiet and not taking part in the discussion, recognizing, as I have, the delicacy of the question involved, and with a desire to see the executive branch of the Government take such action as the facts presented to them would warrant. We have waited for months and months, and, so far as we are advised, no action looking to the relief of those people, the settlement of that controversy, or the protection of American interests has been had.

I had preferred, in view of the conditions in our own country, the distress among our people commercially, that nothing should intervene to prevent a steady progress to a better condition of affairs. Nor would I now say one word but for the utterances of the distinguished Senators from Maine and Wisconsin, who seek to make somewhat a party matter of the consideration of the pending resolution, and to arraign, as the Senator from Maine has done, nearly all of those who are in opposition to the Republican party in the Senate as being actuated by motives intended to embarrass the present Administration.

Mr. HALE. Mr. President, did I in the least wise either arraign or refer to any motive? Did I indicate that I suspected any improper motive? I only brought out the remarkable fact that the resolution here, brought in by the oldest Democratic Senator, was supported by every Democrat except two and carried by that solid vote of the other side, and a fraction, nine only, of Republicans. Did I anywhere, may I ask the Senator, arraign the other side or intimate an arraignment; and should the Senator be sensitive on that point unless there is something to make him sensitive? I did not suggest it. He is the first who has suggested any political motive why it is that he and his fellows are found solidly voting to force the President's hand. Neither the Senator from Wisconsin nor I charged any improper motive. But it is a picturesque fact that the country will take notice of.

Mr. GORMAN. If the Senator from Maine did not intend to convey the impression to the country that a solid vote on this side and of all in opposition to the present Administration was a political movement, I have no idea what he meant; and the Senator from Wisconsin follows it by the plain statement that if Mr. Bryan had been elected President of the United States instead of Mr. McKinley, we would have found a different condition of affairs on this side of the Chamber. What can it mean, I ask the Senator in all fairness, if it was not simply intended to convey the impression to the country that political sentiments enter into the matter of votes upon this question? He denies it. He says he does not intend to make such a statement. Of course I accept it, but I could not permit such a statement to go out without entering my protest against it.

Mr. President, I know how serious a matter we are dealing with. I could not be found to cast my vote, no matter who was President, for a resolution of this character unless the case was an exceptional one. President Cleveland, during his Administration, and in the last message which he delivered to Congress, informed us of the serious condition in Cuba as he understood it. He asked Congress not to take action to precipitate further and graver affairs, and Congress waited. But with true statesmanship he informed Congress that the time might come (and he intimated that it might come within a reasonably short period) when some action would be required to protect life and liberty and our commercial interests, which are great, in that island. Have we reached that period? I was never satisfied in my own mind until yesterday that a case was before us where I could not hesitate longer to act. That was the most remarkable spectacle that has ever been presented to the Senate of the United States.

The Senator from Wisconsin [Mr. SPOONER] and the Senator from Maine [Mr. HALE] say that no such action as is contemplated by this resolution has ever been taken by Congress from General Washington's day until this. No such case has ever been presented to the Senate of the United States as was presented here yesterday with the statement from the Senator from Alabama [Mr. MORGAN] and the Senator from Ohio [Mr. FORAKER], both members of the Committee on Foreign Relations, that the President of the United States and the Secretary of State had informed them that they could not communicate to Congress the information which they had officially from our representatives on the Island of Cuba for fear that those representatives would be assassinated or that their lives would be in danger. Yet this Administration, with that message delivered in that extraordinary way, so far as we are advised has taken no action whatever to protect the lives of the honored men who represent the United States in the Island of Cuba.

With a fleet of magnificent vessels lying in Hampton Roads and along the coast as far as New Orleans, not a gunboat has been ordered to Cuba to protect the lives of our representatives, to say nothing of the property interests and the commerce which are involved. When such a case arises, it is the duty, in my judgment, Mr. President, of Congress to take some action; and it seems that the only action that is feasible is the passage of this resolution. I shall vote for it not with any hostility to the Administration, but because I believe the Administration, if the message which comes to us through our own members be true, is derelict in its duty. It has not protected American interests or the lives of our representatives, and whether the Administration be Democratic or Republican, I want the opportunity to give my expression that that condition shall no longer continue.

Is there a Senator here who represents the Administration, who is in political accord with it, who will say that the President and the Secretary of State, having the powers they have, have taken the proper action to protect our people? If so, then I believe that Congress ought to wait; but in the absence of such an assurance, in the face of the fact that we know protection has not been given, what should be done? Remain silent and permit these interests to be sacrificed? No, no, Mr. President. Pass the resolution as it is, if nothing better can be had, and, if it amounts to nothing more, it will be a declaration to the country that at least the

Senate of the United States insists in the present condition that some action shall be taken.

Mr. HOAR. I desire to ask the Senator, before he proceeds to his next sentence, whether I clearly understand his last, because I should like to know that. Do I understand the Senator to say that he puts his support of this resolution and asks for its passage on the ground of the delinquency of the present President of the United States, and that he would not vote for it but for that delinquency?

Mr. GORMAN. I say in the present condition, as communicated to us by Senators, members of the Foreign Relations Committee, it becomes, in my opinion, my duty to vote for a resolution which expresses the opinion of this body that some vigorous action should be taken to protect life, liberty, and property in the Island of Cuba.

Mr. HOAR. Do I understand the Senator to say further that the President has been delinquent, and but for that belief he should not have supported the resolution? I so understand him, and I want him to make it distinct to the Senate.

Mr. GORMAN. I say if it be true that the State Department possesses information which has convinced the Secretary of State and the President of the United States that they can not with safety give the names of our consuls in Cuba who gave the information, then the Executive is delinquent when he fails to send a vessel of war to protect our representatives. No great nation on the face of the earth that I know of in any case of war or insurrection would permit its own representatives to be thus in jeopardy when they had the power to protect them. Does the Senator from Massachusetts deny that proposition? Does not the Senator from Massachusetts agree with me that our representatives ought to be protected? The Senator nods his head.

Mr. HOAR. I do not agree with the Senator from Maryland in the fact that there has been any delinquency on the part of the President, and I do not propose to vote for a resolution which is based by nine-tenths of its supporters, speaking through their leader, upon that proposition.

Mr. MASON. Whether it is right or not?

Mr. HOAR. Does the Senator from Illinois think it is?

Mr. MASON. I think it is.

Mr. GORMAN. Mr. President, I should have regarded it as most unfortunate in this or in any other case where questions between this country and foreign nations were involved that this Chamber should ever be divided by that aisle. No such division has ever existed heretofore when we have dealt with the rights of American citizens in any country on the face of the globe, and I do not believe it exists now. I resent the suggestion that there is any political advantage or any political pressure or sentiment which influences a single vote on this side of the Chamber, so far as I know, and I trust it may always be so. I hope, during the present Administration, to follow President McKinley in every act of his that looks to promoting the welfare of this people abroad. He shall have as earnest support from me as had his two predecessors. But in view of this failure, as I view it, on their part, I believe that it becomes my duty to support this resolution, though it may not be more than an expression of the opinion of the Senate of the United States.

Mr. HALE. Failure by whom? The Senator says in view of their failure. Failure by whom?

Mr. GORMAN. By the executive branch of the Government.

Mr. HALE. I supposed so.

Mr. MILLS. By both the President and the Secretary of State.

Mr. GORMAN. The Senator asked me to whom I applied the remark. I applied it to the President of the United States and the Secretary of State, who sent this message to the Senate of the United States by two or three Senators. I assume that what has been said here is the literal truth; and coming from those, too, who have the power, and who, being clothed with the power by the Constitution, ought to have acted. Because of their failure, I am ready to take my share of the responsibility of having the Senate say that American interests must be protected.

Mr. President, as to party advantage in this question, there is none. I know that the great business interests of the country centered in our section upon the seaboard are hostile to anything being done in Congress which would put in jeopardy for a moment their languishing trade, and I am in sympathy with their desires to an extent; but I can not permit that to control me when I believe the honor of the country and the lives of our representatives in a foreign land are in jeopardy.

Mr. CAFFERY. Before the Senator sits down, I should like to make an inquiry of him. I desire to know whether any danger to the lives of our consuls in Cuba has any relation whatever as evidence to establish the fact of public war; and, if so, in what direction?

Mr. GORMAN. I have no idea that we shall have a war, Mr. President.

Mr. CAFFERY. No; that is not my question. My question is, whether the fact of the danger of assassination by somebody, whether by the insurgents or by the Spaniards, of our consuls in Cuba, is any evidence of the fact of public war, and whether or not that danger may not arise from murderous people in a state of profound peace as well as in a state of public war?

Mr. GORMAN. The Senator and I both know, and everybody knows, that there is war in Cuba of very great proportions. There is no doubt that it exists. To what extent the Cubans have a government in a fixed place is a question which has been debated, and I do not intend to go into it. The country is satisfied upon that point. It is true there is a difference of opinion in this body, but the underlying fact that the President and the Secretary of State of this great nation of 70,000,000 people are afraid to intrust to the Senate of the United States the names of our consuls who give the President information is enough, in my opinion, to warrant the sending of war vessels to Cuba, and saying to the world that that condition shall not continue. In my judgment, such action will not produce war, but if it shall, we have gone to war, Mr. President, for very much less cause.

Mr. CAFFERY. Mr. President, I did not intend by the question I asked the Senator from Maryland to say that our action would produce war or get us into war; but the point of my question was simply whether, with this evidence before us, which the Senator says has convinced his mind to vote for this resolution, this evidence that there is danger to life of the American consul in Habana from some murderous gang or band of assassins, is any proof whatever of such a condition of public war as would authorize the United States to recognize it as a national affair? The lives of those gentlemen, or of any consul, can be in danger in any lawless community from attacks of mobs.

If the fact that the lives of those gentlemen, or any of them, are in danger is conceded, that does not by any means establish the fact of international war or public war. Some time ago I read in the newspapers that there had been an American envoy or consul shot somewhere in Central America. That is no evidence of public war in that country. It is a very slim basis for Congress to predicate the fact of public war on. It might be a case of declaration of war on the part of the United States against Spain for not protecting the lives of its citizens; but it would not establish at all the case of belligerency in Cuba, even if it existed. So I say that we are apt to run off at a tangent in this matter, and not apt to consider the real question before the body. Is there that sort of proof before this body—conceding its jurisdiction—to justify any Senator in voting to establish by his vote a case of public war between Spain and her revolting colony?

The PRESIDING OFFICER. The question is, Shall the joint resolution pass?

Mr. HALE. The yeas and nays, I think, have been heretofore ordered on that question.

The PRESIDING OFFICER. The yeas and nays have been ordered. The Secretary will call the roll.

The Secretary proceeded to call the roll.

Mr. CLAY (when his name was called). I have a general pair with the junior Senator from Massachusetts [Mr. LODGE], but he stated to me before he left here that if the resolution came to a vote he would vote for it, and I was authorized to vote. I therefore vote "yea."

Mr. ELKINS (when his name was called). I am paired with my colleague [Mr. FAULKNER], and therefore withhold my vote.

Mr. PASCO (when Mr. FAULKNER'S name was called). The Senator from West Virginia [Mr. FAULKNER] is not in the city. He desired me to announce that if present he would vote "yea" on the passage of the resolution. His pair with his colleague has already been announced.

Mr. FORAKER (when his name was called). I am paired with the junior Senator from South Carolina [Mr. EARLE], but I am informed that if he were present he would vote "yea." I therefore vote "yea."

Mr. GORMAN (when his name was called). I have a general pair with the Senator from Maine [Mr. FRYE], which I have observed on all the votes leading up to this final vote, but I understand from the Senator's colleague and from members of the committee that the Senator from Maine is in favor of the joint resolution. Therefore I take the liberty to vote.

Mr. HALE. I can say to the Senator that, while my colleague left no message of that kind, it is my impression that he would vote that way; but I do not know, and I would not claim to state how he would vote if present.

Mr. MORGAN. I think I know that he would vote "yea."

Mr. GORMAN. Then I vote "yea."

Mr. BATE (when the name of Mr. HARRIS of Tennessee was called). This being the final vote on the joint resolution, I desire to say that my colleague [Mr. HARRIS of Tennessee] has a pair with the Senator from Vermont [Mr. MORRILL], and that my colleague, if present, would vote "yea."

Mr. KENNEY (when his name was called). Under the terms of my pair with the junior Senator from Pennsylvania [Mr. PENROSE] I am at liberty to vote on the joint resolution, and therefore I vote "yea."

Mr. LINDSAY (when his name was called). I have a general pair with the senior Senator from Michigan [Mr. MCMILLAN], and therefore withhold my vote. If he were present, I should vote "yea."

Mr. GALLINGER. The Senator from Utah [Mr. CANNON] was compelled to leave the Chamber a moment ago. He is very earnestly in favor of the resolution, and requested me as a special courtesy to him to secure a pair. If agreeable to the Senator from Kentucky, the Senator from Utah might be paired with the Senator from Michigan [Mr. MCMILLAN] with whom the Senator from Kentucky is paired, and that would allow the Senator to vote.

Mr. LINDSAY. With that understanding I vote "yea."

Mr. MCENERY (when his name was called). I am paired with the junior Senator from New York [Mr. PLATT]. If he were present I should vote "yea," but being paired, I withhold my vote.

Mr. MANTLE (when his name was called). I have a general pair with the Senator from Virginia [Mr. MARTIN], but I am informed that he would vote in favor of this resolution, if present, and I shall therefore vote. I vote "yea."

Mr. PERKINS (when his name was called). I have a general pair with the junior Senator from North Dakota [Mr. ROACH]. As he is absent, I shall withhold my vote.

Mr. CLARK (when Mr. WARREN's name was called). My colleague [Mr. WARREN] is unavoidably absent from the Chamber. He asked me to announce that, if present, he would wish to be recorded in favor of the passage of the resolution.

The roll call was concluded.

Mr. CULLOM. I have a general pair with the Senator from Delaware [Mr. GRAY]. I understand that the Senator from Louisiana [Mr. CAFFERY] has a pair with the Senator from Virginia [Mr. DANIEL]. I suggest that we transfer our pairs, so that we can both vote, and the Senator from Virginia will stand paired with the Senator from Delaware. Is that agreeable?

Mr. CAFFERY. I will inform the Senator that I voted inadvertently, but intended to withdraw it, the Senator from Virginia [Mr. DANIEL] with whom I am paired not having voted; but under the arrangement suggested by the Senator from Illinois I will let my vote stand.

Mr. CULLOM. I vote "yea."

Mr. HAWLEY. My colleague [Mr. PLATT of Connecticut] is absent and paired with the Senator from Nebraska [Mr. ALLEN]. If my colleague were present and at liberty to vote, he would vote "nay."

Mr. COCKRELL. My colleague [Mr. VEST] is unavoidably detained upon important work outside of the Senate Chamber. He is paired with the junior Senator from Minnesota [Mr. NELSON]. If my colleague were present, he would vote "yea."

The result was announced—yeas 41, nays 14; as follows:

YEAS—41.

Bacon,	Cullom,	Lindsay,	Rawlins,
Baker,	Davis,	McBride,	Shoup,
Bate,	Deboe,	Mantle,	Stewart,
Berry,	Forakor,	Mason,	Thurston,
Butler,	Gallinger,	Mills,	Tillman,
Carter,	Gorman,	Morgan,	Turner,
Chandler,	Hansbrough,	Nelson,	Turpie,
Chilton,	Harris, Kans.	Pasco,	Walthall.
Clark,	Heitfeld,	Pettigrew,	
Clay,	Jones, Ark.	Pettus,	
Cockrell,	Kenney,	Pritchard,	

NAYS—14.

Allison,	Gear,	Hoar,	White,
Burrows,	Hale,	Spooner,	Wilson.
Caffery,	Hanna,	Wellington,	
Fairbanks,	Hawley,	Wetmore,	

NOT VOTING—33.

Aldrich,	Gray,	Morrill,	Sewell,
Allen,	Harris, Tenn.	Murphy,	Smith,
Cannon,	Jones, Nev.	Penrose,	Teller,
Daniel,	Kyle,	Perkins,	Vest,
Earle,	Lodge,	Platt, Conn.	Warren,
Elkins,	McEnery,	Platt, N. Y.	Wolcott.
Faulkner,	McMillan,	Proctor,	
Frye,	Martin,	Quay,	
George,	Mitchell,	Roach,	

So the joint resolution was passed. It is as follows:

Resolved by the Senate and House of Representatives, etc., That a condition of public war exists between the Government of Spain and the government proclaimed and for some time maintained by force of arms by the people of Cuba, and that the United States of America shall maintain a strict neutrality between the contending powers, according to each all the rights of belligerents in the ports and territory of the United States.

EXECUTIVE SESSION.

Mr. HALE. I move that the Senate proceed to the consideration of executive business.

The motion was agreed to; and the Senate proceeded to the consideration of executive business. After thirteen minutes spent in executive session the doors were reopened, and (at 5 o'clock and 48 minutes p. m.) the Senate adjourned until Monday, May 24, 1897, at 12 o'clock meridian.

NOMINATIONS.

Executive nominations received by the Senate May 20, 1897.

GOVERNOR OF ARIZONA.

Myron H. McCord, of Phœnix, Ariz., to be governor of Arizona, vice Benjamin J. Franklin, removed.

SECRETARY OF ARIZONA.

Charles H. Akers, of Prescott, Ariz., to be secretary of Arizona Territory, vice Charles M. Bruce, removed.

UNITED STATES ATTORNEY.

Joseph H. Gaines, of West Virginia, to be attorney of the United States for the district of West Virginia, vice Cornelius C. Watts, resigned.

ASSISTANT COMMISSIONER OF PATENTS.

Arthur P. Greeley, of Concord, N. H., now an examiner in chief in the patent office, to be Assistant Commissioner of Patents, vice Samuel T. Fisher, resigned.

EXAMINER IN CHIEF, PATENT OFFICE.

Thomas G. Steward, of Piano, Ill., now a principal examiner in the Patent Office, to be an examiner in chief in the Patent Office, vice Arthur P. Greeley, nominated to be Assistant Commissioner of Patents.

POSTMASTERS.

Earle E. Doud, to be postmaster at Sheffield, in the county of Colbert and State of Alabama, in the place of James R. Crowe, removed.

Daniel E. Sherman, to be postmaster at Montrose, in the county of Montrose and State of Colorado, in the place of James F. Kyle, removed.

Charles F. Douglass, to be postmaster at Ashland, in the county of Cass and State of Illinois, the appointment of a postmaster for the said office having, by law, become vested in the President on and after January 1, 1897.

Samuel H. Watson, to be postmaster at Mount Vernon, in the county of Jefferson and State of Illinois, in the place of Allen C. Tanner, removed.

Hiram Yerkes, to be postmaster at Fairmount, in the county of Vermilion and State of Illinois, in the place of Samuel H. Gunder, removed.

Jasper H. Thornburg, to be postmaster at Boonville, in the county of Warrick and State of Indiana, in the place of Jacob B. Ashley, resigned.

James L. Berry, to be postmaster at Humeston, in the county of Wayne and State of Iowa, the appointment of a postmaster for the said office having, by law, become vested in the President on and after January 1, 1897.

C. N. Marvin, to be postmaster at Shenandoah, in the county of Page and State of Iowa, in the place of George C. Pearce, removed.

James A. Wilson, to be postmaster at Williamsburg, in the county of Iowa and State of Iowa, the appointment of a postmaster for the said office having, by law, become vested in the President on and after October 1, 1896. Richard H. Mobley, appointed by the President, and by him nominated to the Senate, not having been confirmed.

Joe Carey, to be postmaster at Garnett, in the county of Anderson and State of Kansas, in the place of J. T. Highley, resigned.

William E. Hogueland, to be postmaster at Yates Center, in the county of Woodson and State of Kansas, in the place of Harrison C. Rollins, resigned.

Edward U. Fordyce, to be postmaster at Bowling Green, in the county of Warren and State of Kentucky, in the place of John B. Gaines, resigned.

J. D. Wilson, to be postmaster at Cloverport, in the county of Breckinridge and State of Kentucky, in the place of Lela Henley, whose commission expired April 12, 1897.

David M. Donaldson, to be postmaster at South Hadley Falls, in the county of Hampshire and State of Massachusetts, in the place of John Kirkpatrick, removed.

William G. Earp, to be postmaster at Swampscott, in the county of Essex and State of Massachusetts, in the place of George W. Marshall, deceased.

John T. Lovett, to be postmaster at Little Silver, in the county of Monmouth and State of New Jersey, in the place of J. Elwood Harvey, removed.

Emmett B. Hawkins, to be postmaster at Huntington, in the county of Suffolk and State of New York, in the place of Camillus P. Rogers, removed.

Ellsworth Sweet, to be postmaster at Waterloo, in the county of Seneca and State of New York, in the place of Samuel R. Welles, removed.

J. H. Porter, to be postmaster at New Wilmington, in the county of Lawrence and State of Pennsylvania, the appointment of a postmaster for the said office having, by law, become vested in the President on and after January 1, 1897.

WITHDRAWAL.

Executive nomination withdrawn from the Senate May 19, 1897.

Simon S. Matthews, whose nomination was delivered to the Senate on April 20, 1897, to be register of the land office at Jackson, Miss.

CONFIRMATIONS.

Executive nominations confirmed by the Senate May 20, 1897.

ASSISTANT SECRETARY OF THE TREASURY.

Frank A. Vanderlip, of Illinois, to be Assistant Secretary of the Treasury.

PROMOTION IN THE ARMY.

General officer.

Brig. Gen. Zenas Randall Bliss, to be major-general.

SOLICITOR OF INTERNAL REVENUE.

George Morgan Thomas, of Kentucky, to be Solicitor of Internal Revenue.

UNITED STATES CIRCUIT JUDGE.

William W. Morrow, of California, to be United States circuit judge for the ninth judicial circuit.

SECRETARY OF LEGATION.

Stanton Sickles, of New York, to be secretary of the legation of the United States at Madrid.

PROMOTION IN THE NAVY.

P. A. Engineer Frank H. Eldridge, to be a chief engineer.

SURVEYOR OF CUSTOMS.

Richard S. Bostwick, of Illinois, to be surveyor of customs for the port of Galena, in the State of Illinois.

INDIAN AGENT.

Samuel G. Morse, of Port Angeles, Wash., to be agent for the Indians of the Neah Bay Agency, in Washington.

REGISTER OF THE LAND OFFICE.

David C. Fleming, of Sterling, Colo., to be register of the land office at Sterling, Colo.

POSTMASTERS.

H. S. McGiffin, to be postmaster at Edgerton, in the county of Rock and State of Wisconsin.

E. S. Goodell, to be postmaster at Viroqua, in the county of Vernon and State of Wisconsin.

Daniel Gunn, to be postmaster at Kinmundy, in the county of Marion and State of Illinois.

Frederick Chapman, to be postmaster at Woodstock, in the county of Windsor and State of Vermont.

A. E. Kincaid, to be postmaster at Walnut, in the county of Pottawattamie and State of Iowa.

Marion Bruce, to be postmaster at Rolfe, in the county of Pocahontas and State of Iowa.

Fletcher W. Boyd, to be postmaster at Covington, in the county of Fountain and State of Indiana.

James E. Zook, to be postmaster at Ballard, in the county of King and State of Washington.

Alfred Cruse, to be postmaster at Iron Mountain, in the county of Dickinson and State of Michigan.

Henry R. Huntington, to be postmaster at Benton Harbor, in the county of Berrien and State of Michigan.

HOUSE OF REPRESENTATIVES.

THURSDAY, *May 20, 1897.*

The House met at 12 o'clock m. Prayer by the Chaplain, Rev. HENRY N. COUDEN.

THE JOURNAL.

The Journal of Monday last was read, omitting the text of the conference report on the Indian appropriation bill, Executive communications referred, bills, resolutions, memorials, and petitions introduced and referred.

Mr. SIMPSON of Kansas. Mr. Speaker——

The SPEAKER. Without objection, the Journal will be considered as approved.

Mr. SIMPSON of Kansas. The Journal has not all been read, has it? I would like to have it all read.

The SPEAKER. It has been read in the usual manner.

Mr. SIMPSON of Kansas. I want it all read.

The SPEAKER. The gentleman has a right to ask for the reading of the entire Journal; and the Clerk will read the parts that have not been read.

The Clerk then read the parts of the Journal omitted in the first reading.

The SPEAKER. Without objection, the Journal will be considered as agreed to.

Mr. SIMPSON of Kansas. Mr. Speaker, I rise to correct the Journal.

The SPEAKER. The gentleman will state his correction.

Mr. SIMPSON of Kansas. I notice here the introduction of bills of different kinds, and particularly bills introduced in pension cases. Here is a bill introduced by Mr. BOTKIN of Kansas, which was referred to the Committee on Invalid Pensions. Now, Mr. Speaker, the correction I want made is this: That there is no such committee. The Speaker not having appointed the committee, there is no Committee on Invalid Pensions; and consequently a bill can not be referred to a committee that does not exist.

Now, the RECORD goes to the public libraries and the newspapers, and the people out in my State have access to them. There are many old soldiers who are desirous of having their claims acted upon in this House who write to me about this matter——

Mr. PAYNE. I rise to a point of order.

Mr. SIMPSON of Kansas. And I have to reply to them, "You can not get any action on the claim, because there is no such committee appointed;" and therefore I——

The SPEAKER. The gentleman has made no proposition.

Mr. PAYNE. I rise to a point of order.

The SPEAKER. The gentleman from New York rises to a point of order.

Mr. PAYNE. The gentleman from Kansas stated that he rose to correct the Journal, and there is nothing before the House. I move, therefore, that the Journal be approved, and on that I wish to say a word or two.

Mr. SIMPSON of Kansas. My correction, Mr. Speaker, is this.

The SPEAKER. The gentleman did not state any proposition.

Mr. SIMPSON of Kansas (continuing). That this is a false record, and that the record ought to be corrected. I said there is no such committee——

The SPEAKER. The gentleman has stated no proposition, and the gentleman from New York [Mr. PAYNE] moves that the Journal be approved.

Mr. PAYNE. Mr. Speaker, I want to say a word or two upon that, because I think it better that debate be had before the previous question is ordered than afterwards. The Journal has been read to the House, not only what is usually read, but the whole thing has been read in extenso; and it does not seem that there is anything of criticism to be offered upon the Journal itself. The gentleman from Kansas has occupied some five or ten minutes, and has not been able to suggest any mistake made in the Journal itself. Therefore I move the previous question upon the approval of the Journal.

Mr. SIMPSON of Kansas. Mr. Speaker, the gentleman from New York——

Mr. BLAND. I rise to a point of order.

The SPEAKER. The gentleman will state it.

Mr. BLAND. The gentleman from Kansas was on the floor, and the gentleman [Mr. PAYNE] can not take him off the floor.

The SPEAKER. The gentleman from New York made a point of order that the gentleman from Kansas had made no proposition for the House to discuss.

Mr. BLAND. He made a point of order, but he can not take him off the floor on a point of order. The gentleman from Kansas has the right to make a motion to strike out matters.

The SPEAKER. The question is on ordering the previous question.

The question was taken; and the Speaker announced that the ayes seemed to have it.

Mr. SIMPSON of Kansas. Division, Mr. Speaker.

The House divided; and there were—ayes 120, noes 36.

Mr. SIMPSON of Kansas. No quorum, Mr. Speaker.

The SPEAKER. There is evidently a quorum present.

So the previous question was ordered.

The SPEAKER. The question now is on the approval of the Journal.

The question was taken; and the Journal was approved.

ORDER OF BUSINESS.

Mr. DALZELL. Mr. Speaker, I submit a privileged report. After the reading I shall demand the previous question.

Mr. BAILEY. How is that? I understood the gentleman from Pennsylvania made some observation about the previous question.

Mr. DALZELL. I shall demand the previous question as soon as it is read.

Mr. BAILEY. Then, of course, it must be read.

The Clerk read as follows:

The Committee on Rules, to whom was referred House resolution No. —, have had the same under consideration, and ask leave to report it with the recommendation that it do pass.

Resolved, That upon the adoption of this resolution the House shall proceed to the consideration of Senate resolution 42, and at the end of the debate, which shall not exceed two hours, a vote shall be taken thereon to its final disposition.

Mr. DALZELL. I ask for the previous question on the adoption of the resolution.

Mr. BAILEY. I desire, Mr. Speaker, to submit the views of the minority of the Committee on Rules.

Mr. DALZELL. I submit to my friend from Texas that I have the floor, and I do not yield it.

The SPEAKER. The Chair thinks they would have to be filed with the Clerk.

Mr. BAILEY. Does the gentleman from Pennsylvania insist that he has the floor?

Mr. DALZELL. I do.

Mr. BAILEY. Then I insist that he has not the floor until the Speaker has first stated the question. The gentleman who introduces a proposition in this House can not retain the floor while the Speaker is stating the question; and so the gentleman from Pennsylvania——

Mr. DALZELL. The Clerk had read the report.

Mr. BAILEY. The gentleman from Pennsylvania must certainly have yielded the floor.

The SPEAKER. The Chair recognized the gentleman from Pennsylvania, and the gentleman from Pennsylvania has asked for the previous question.

Mr. DALZELL. I gave notice prior to the reading of the report that I should do so.

Mr. BAILEY. And that evinced your unseemly haste. The Chair can undoubtedly, in his discretion, recognize the gentleman from Pennsylvania as often as he pleases, but the Chair must exercise that discretion as often as the gentleman from Pennsylvania seeks recognition. We are not willing to have it ruled that when a gentleman rises for one purpose and submits a proposition, he still retains the floor while the Speaker is stating the proposition. And if I needed to enforce that observation, I need only invoke the ruling of the Chair the other day, when the gentleman from Missouri [Mr. BLAND] had appealed from the decision of the Chair and the gentleman from New York promptly rose and moved to table the appeal. The gentleman from Missouri contended that he had not yielded the floor. The Chair ruled that he must have yielded the floor while the Chair was stating the question on the appeal.

The SPEAKER. The gentleman from Texas is correct. The gentleman from Pennsylvania [Mr. DALZELL] is recognized. [Laughter.]

Mr. BAILEY. Now, Mr. Speaker——

Mr. DALZELL. I move the previous question.

Mr. BAILEY. Mr. Speaker——

Mr. DALZELL. I decline to yield the floor to the gentleman from Texas. I do not want to be guilty of any discourtesy.

Mr. BAILEY. Then I rise to a parliamentary inquiry.

The SPEAKER. The gentleman will state it.

Mr. DALZELL. I have the floor.

Mr. BAILEY. I do not infringe the right of the gentleman from Pennsylvania when I submit a parliamentary inquiry.

Mr. DALZELL. I did not hear the remark of the gentleman; I beg his pardon.

Mr. BAILEY. The gentleman ought to be listening. I know he is determined upon his course; but let him pursue it in an orderly way.

Mr. DALZELL. We will try to do so.

Mr. BAILEY. And with some fair degree of decency. [Applause on the Democratic side.]

Mr. Speaker, I submit as a question of order that it is not competent for the Speaker, with the assistance of a majority, to deny the minority on this floor an opportunity to be heard. It is power enough that the Speaker bestows recognition.

The SPEAKER. Will the gentleman from Texas state his parliamentary inquiry?

Mr. DALZELL. This is not a parliamentary inquiry.

Mr. BAILEY. I will state it. I was proceeding to lay the predicate for stating it——

The SPEAKER. The Chair thinks that the question hardly needs a predicate. [Laughter.]

Mr. BAILEY. Well, it needs it in order to make gentlemen on the other side understand. If they were disposed to be fair, there would be no need of it. [Applause on the Democratic side.]

Now, Mr. Speaker, as I was proceeding to say——

The SPEAKER. Will the gentleman state his parliamentary inquiry?

Mr. BAILEY. It would appear that the minority are going to be denied the opportunity to present every proposition——

The SPEAKER. The gentleman from Texas is not in order.

Mr. BAILEY. Then I say to the gentleman from Pennsylvania that if he will withdraw the demand for the previous question and permit us to offer our proposition——

The SPEAKER. The question is on the demand for the previous question.

Mr. DALZELL. I must decline to withdraw the demand.

The SPEAKER (after putting the question). The ayes seem to have it.

Mr. BAILEY and Mr. LEWIS of Washington called for a division.

The question being again taken, there were—ayes 123, noes 84.

Mr. BAILEY. I call for tellers.

Mr. DALZELL. Let us have the yeas and nays.

The yeas and nays were ordered.

The question was taken; and there were—yeas 117, nays 81, answered "present" 25, not voting 130; as follows:

YEAS—117.

So the previous question was ordered.

The following pairs were announced:
Until further notice:
Mr. McCALL with Mr. McLAURIN.
Mr. JENKINS with Mr. STOKES.
Mr. PITNEY with Mr. CARMACK.
Mr. OVERSTREET with Mr. DE ARMOND.
Mr. BRUMM with Mr. COX.
Mr. McINTIRE with Mr. HOWARD of Georgia.
Mr. BINGHAM with Mr. DOCKERY.
Mr. KERR with Mr. ROBB.
Mr. MESICK with Mr. PETERS.
Mr. LORIMER with Mr. BERRY.
Mr. MILLER with Mr. CLARDY.
Mr. STEVENS of Minnesota with Mr. JONES of Washington.
Mr. WHITE of Illinois with Mr. SIMS.
Mr. BISHOP with Mr. BREWER.
Mr. HENDERSON with Mr. BRANTLEY.
Mr. SPALDING with Mr. CRANFORD.
Mr. DORR with Mr. MADDOX.
Mr. LYBRAND with Mr. LENTZ.
Mr. DAVIDSON of Wisconsin with Mr. NORTON.
Mr. HOPKINS with Mr. McALEER.
Mr. BELKNAP with Mr. MAGUIRE.
Mr. HAGER with Mr. ALLEN.
Mr. YOUNG of Pennsylvania with Mr. BENTON.
Mr. WILLIAMS of Pennsylvania with Mr. ROBERTSON of Louisiana.
Mr. MORRIS with Mr. WHEELER of Kentucky.
Mr. JOY with Mr. MARSHALL.
Mr. HAMILTON with Mr. TODD.
Mr. WRIGHT with Mr. ADAMSON.
Mr. WM. ALDEN SMITH with Mr. BRUCKER.
Mr. CHICKERING with Mr. BRADLEY.
Mr. DAYTON with Mr. PIERCE of Tennessee.
Mr. FOSS with Mr. DAVEY.
Mr. McEWAN with Mr. VEHSLAGE.
Mr. BELDEN with Mr. SULZER.
Mr. BELFORD with Mr. SWANSON.
Mr. SIMPKINS of Massachusetts with Mr. LESTER.
Mr. PUGH with Mr. SUTHERLAND.
Mr. BARHAM with Mr. LITTLE.
Mr. LOVERING with Mr. FITZGERALD.
Mr. SPERRY with Mr. GRIGGS.
Mr. STEWART of New Jersey with Mr. TAYLOR of Alabama.
Mr. POWERS with Mr. GAINES.
Mr. REEVES with Mr. BALL.
Mr. MILLS with Mr. SULLIVAN.
Mr. SULLOWAY with Mr. TALBERT.
Mr. MAHON with Mr. BENNER of Pennsylvania.
Mr. SAUERHERING with Mr. STRAIT.
Mr. DOVENER with Mr. DAVIS.
Mr. BARNEY with Mr. BANKHEAD.
Mr. HILL with Mr. LATIMER.
Mr. ACHESON with Mr. WILSON of South Carolina.
Mr. HOOKER with Mr. CATCHINGS.
Mr. SHELDEN with Mr. RIXEY.
Mr. BOUTELLE with Mr. CLARK of Missouri.
Mr. FISCHER with Mr. CUMMINGS.
Mr. JOHNSON of Indiana with Mr. MOON.
Mr. BROSIUS with Mr. ERMENTROUT.
For this day:
Mr. HEPBURN with Mr. STALLINGS.
Mr. GILLETT of Massachusetts with Mr. TERRY.

Mr. COOPER of Texas. Mr. Speaker, on political questions I am paired with the gentleman from Iowa, Mr. PERKINS. This appears to be a political question, and therefore I desire to withdraw my vote.

Mr. TERRY. I wish to inquire whether the gentleman from Massachusetts, Mr. GILLETT, is recorded as voting?

The SPEAKER. He did not vote.

Mr. TERRY. Then, having voted "no" on this question, I desire to withdraw my vote, being paired with the gentleman from Massachusetts.

Mr. JENKINS. I have voted in the affirmative; but I wish to withdraw my vote, being paired with the gentleman from South Carolina, Mr. STOKES.

Mr. SIMS. I supposed that the pair I have had with the gentleman from Illinois, Mr. WHITE, expired to-day; but as that pair has just been announced, I presume it continues. I will therefore withdraw my vote. I voted in the negative.

Mr. GAINES. As I find that I am paired with the gentleman from Vermont, Mr. POWERS, I desire to withdraw my vote.

Mr. ADAMSON. Mr. Speaker, I wish to inquire whether the gentleman from Massachusetts, Mr. WRIGHT, voted on this question?

The SPEAKER. He did not.

Mr. ADAMSON. I am paired with that gentleman. I have voted in the negative, but desire to withdraw my vote.

Mr. BALL. Mr. Speaker, I have voted "no" on this question; but finding that I am paired with the gentleman from Illinois, Mr. REEVES, I withdraw my vote.

Mr. MILLS. I wish to inquire whether the gentleman from Mississippi, Mr. SULLIVAN, has voted?

The SPEAKER. He has not.

Mr. MILLS. I am paired with that gentleman, and therefore withdraw the vote that I cast in the affirmative.

Mr. BINGHAM. Mr. Speaker, I thought that the gentleman from Missouri, Mr. DOCKERY, with whom I have been paired was present and had voted. I am paired with him, and therefore desire to withdraw the vote which I have cast in the affirmative, and to be recorded as "present."

Mr. BRUCKER. Mr. Speaker, I am paired with my colleague, Mr. WM. ALDEN SMITH. I voted "no," and desire to withdraw my vote and be marked "present."

Mr. DORR. Mr. Speaker, as I find I am paired with the gentleman from Georgia, Mr. MADDOX, I will withdraw the vote which I have cast in the affirmative.

The result of the vote was announced as above stated.

The SPEAKER. The gentleman from Pennsylvania [Mr. DALZELL] is entitled to the floor for twenty minutes, and the gentleman from Texas [Mr. BAILEY] is entitled to the floor for twenty minutes.

Mr. DALZELL. Mr. Speaker, I do not propose to occupy any great length of time. I will simply restate the terms of the resolution. It provides that the House shall now proceed to consider Senate resolution No. 42, and that there shall be debate thereon, if the House so desires, for two hours. Senate resolution No. 42 passed the Senate on Monday last, and is in these words:

That the sum of $50,000 be, and the same is hereby, appropriated, out of any money in the Treasury not otherwise appropriated, for the relief of destitute citizens of the United States in the Island of Cuba, said money to be expended at the discretion and under the direction of the President of the United States in the purchase and furnishing of food, clothing, and medicines to such citizens and for transporting to the United States such of them as so desire and who are without means to transport themselves.

This resolution was passed by the Senate, I may say, without debate, pursuant to a message from the President of the United States to Congress, which advised Congress that, according to official reports, there are some six or seven hundred Americans in the Island of Cuba who are destitute, poverty stricken, and in disease. The House will observe, therefore, that the only question before the House is whether or not the House will join the Senate in its action, whether the American Congress will respond to the call of the American President and come to the relief of suffering Americans in the Island of Cuba, whether we shall provide the means that shall take food to the hungry and medicine to the sick. No other question, so far as I can see, is before the House for discussion, outside of this one.

I do not apprehend—I think the Committee on Rules did not apprehend at the time—that there was any necessity for two hours' debate; but lest there should be any criticism of the committee's action, that provision was inserted. And I assume, Mr. Speaker, that the time will be divided between the two sides of the House, although I assume also that there will be only one side when the question comes to a vote.

I reserve the balance of my time.

Mr. OGDEN. Before the gentleman from Pennsylvania [Mr. DALZELL] sits down, will he be pleased to give the House some information as to the cause of this suffering of these six or seven hundred American citizens in Cuba? Will he state what is the necessity for our appropriating this money?

Mr. DALZELL. The question under discussion now is the adoption of this rule. When we come to debate the resolution, the gentleman will probably receive information upon that question, if he goes to the proper sources. They are just as open to him as they are to me.

Mr. BAILEY. Mr. Speaker, I agree with the gentleman from Pennsylvania [Mr. DALZELL] that the only question now before the House is the adoption of the Senate resolution, but he must not mislead the country into believing that that is the only question which ought to be before the House.

I desire to read a proposition which does not conflict with, but which is supplemental to, the proposition now before the House, and which itself would be before the House except for the opposition of the Republican members. I ask the Clerk to read the resolution which I attempted to offer.

The SPEAKER. The Clerk will read.

The Clerk read as follows:

Resolved, That upon the adoption of this resolution the House shall proceed to the consideration of Senate resolution 42, and at the end of the debate, which shall not exceed two hours, a vote shall be taken thereon, to its final disposition; and upon the final disposition of the Senate resolution, the House shall proceed to consider the following resolution, to wit:

Joint resolution declaring that a condition of public war exists in Cuba, and that strict neutrality shall be maintained.

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That a condition of public war exists between

the Government of Spain and the government proclaimed and for some time maintained by force of arms by the people of Cuba, and that the United States of America shall maintain a strict neutrality between the contending powers, according to each all the rights of belligerents in the ports and territory of the United States.

Mr. BAILEY. That, Mr. Speaker, is the resolution which I sought to offer this morning and the reading of which was prevented by the demand for the previous question. Last Monday the majority of this House evidenced to the country that they would suffer American citizens in Cuba to starve rather than permit this House to vote on a resolution recognizing the belligerency of the Cuban patriots. To-day they have shown themselves willing to trample upon the rights of the minority and to disregard the ancient and well-established methods of procedure rather than be brought face to face with a vote on this proposition.

It is well enough for the majority to execute its will, but it ought to do so frankly and fairly. There is not a gentleman on that side of the Chamber who does not know that, if this House were once permitted to vote upon the direct proposition to recognize the belligerency of Cuba, it would carry by an overwhelming majority. [Applause on the Democratic side.]

And so it is, Mr. Speaker, that when we are denied the opportunity to bring that question before the House it is not the will of the majority which you are enforcing, but it is the will of the majority which you are suppressing. [Applause on the Democratic side.] If you believe you can vote it down, why not meet it like men and vote it down? The country would have vastly more respect for you if you faced it in that way than it will have for you when you refuse to face it at all, and run from it every time it is presented to you.

Mr. Speaker, it is a singular course which the majority have determined to pursue. They have resolved to take $50,000 from the public Treasury to relieve the distress of American citizens in Cuba. They admit that the distress which they seek to relieve is due to the war which now desolates that unhappy island, and yet, while they recognize that great distress has been produced by this war, they blindly refuse to recognize the existence of the war.

If war does not exist in Cuba, Spain has no right to confine American citizens in overcrowded towns and cities, thus exposing them to the horrors of pestilence and famine; and her resort to such an extreme measure is a confession before all the world that war wages between her and her revolted colony. If war does not exist between Spain and Cuba, then war ought to exist between the United States and Spain [applause on the Democratic side], because the cruelties which have been practiced upon our people are defensible only upon the ground that they are the necessities of war.

There are two, and only two, manly and self-respecting courses open to us. Either we ought to demand of Spain an immediate and a complete reparation for the wrongs which she has inflicted upon our citizens, or else it is our duty to recognize the existence of a war, which alone can excuse those wrongs.

The attitude of the Republican members of this House upon this question must greatly surprise the Republican masses throughout the country. But a short time ago you were eager to assist Cuba, and you bitterly denounced a former Administration for its inactive and indifferent policy. When the Republican party assembled in its national convention last summer, it went far beyond the resolution upon which we are asking you to vote. You were not then content to let the people of Cuba fight their own battles and win their own victories, but, pretending a zeal for liberty which you do not cherish, you professed yourselves willing to help them. You declared that it is the duty of the United States not merely to recognize that a war existed, but you went further and declared that it was our duty to terminate that war. Without being asked to recognize the independence of the Cuban Republic, you went to the extent of committing yourselves to aid in the establishment of its independence. Here is your platform. It declares that—

> We watch with deep and abiding interest the heroic battle of the Cuban patriots against cruelty and oppression, and our best hopes go out for the full success of their determined contest for liberty. The Government of Spain having lost control of Cuba, and being unable to protect the property or lives of resident American citizens, or to comply with its treaty obligations, we believe that the Government of the United States should actively use its influence and good offices to restore peace and give independence to the island.

[Applause on the Democratic side.]

Those are fine words; but they are in strange contrast with your actions to-day. Then you promised more than the deliberate judgment of the country would have sanctioned; now you perform less than the dictates of reason and justice demand. You have halted—not because conditions have changed, for the changes have simply aggravated the conditions—but because powerful influences have been exerted to prevent your proceeding. The stock gamblers have become alarmed, and they would rather see their country insulted than to have their operations disturbed. The immensely rich, always and naturally on the side of power, have appealed to you to desist; and preferring, as you always have, the interests of wealth above the rights of humanity, you are endeavoring to evade and postpone this question. Gentlemen, you may escape it here by violating your rules and overriding the minority, but you can not escape it before the American people. To them you must answer, and neither a demand for the previous question nor a point of order will save you from their indignant judgment. [Applause on the Democratic side.] They understand as well as we do the real question which we are trying to settle here to-day. They know that we will join with you in relieving American citizens from destitution and hunger, and that we only ask you to join with us in affording to the Cuban people the right to relieve themselves from Spanish despotism.

We do not ask you to declare war against Spain, or to do anything which will justify Spain in declaring war against us. Our recognition of Cuban belligerency can not constitute a just cause of offense to Spain; and if that nation should be so rash as to provoke a war with us because we had exercised a right conceded by all of the authorities on international law, the responsibility, sir, will be upon them and not upon us. And much as I should deplore a war, even under such circumstances, I would not shrink from it; for bad as war is, its calamities can not be compared with the loss of national self-respect; nor would I weigh its dreadful consequences against the performance of our duty toward a weak and struggling nation. [Applause on the Democratic side.]

We do not call upon you now to redeem your promise to assist in the establishment of Cuban independence; we simply ask you to recognize the right of the Cuban people to fight for their own independence; and surely this Government ought to be swift to recognize that sacred right wherever a brave and an oppressed people are striving to assert it. [Applause on the Democratic side.] I do not forget that when our fathers were engaged in their glorious struggle for independence, men of other nations were gladly welcomed to their ranks; and, remembering that, I shall never vote to leave the sentence of a pirate's death suspended over those who give to Cuba the same aid which America so gladly received from France. [Applause on the Democratic side.]

Mr. DALZELL. I yield so much of my time as he may want to the gentleman from Illinois [Mr. HITT].

Mr. HITT. Mr. Speaker, the necessity for the measure that is before the House, appropriating $50,000 for the relief of our suffering fellow-citizens in Cuba, is abundantly shown by the President's message, and in detail, as he states, by the reports of our officers. Its urgency is apparent to any man who is an American and capable of sympathy with suffering human beings. We have done the like often before for our fellow-citizens; and in this case it is necessary that Congress should act, because there is no fund within the reach of the Department that can be used for this purpose without action of the Legislature. We had a fund that I thought was available for such purposes, called the "emergency fund," and the President proposed to use it, but the law officers have given an opinion that it can not be used in this specific case.

The method of employing this $50,000 is simple and evident. The men who need it are many of them personally named in the dispatches. Those who are American citizens, who are destitute and suffering, are personally known and reported by the various consuls and consular agents. They are scattered in many places in the Island of Cuba. A telegraphic dispatch from the Secretary of State, by direction of the President, to those consuls to immediately draw for the money necessary to give relief by the purchase of food for men who are in want, to procure medical attendance for the sick—all that can be done in a few hours in most cases; and it is urgent, it is pressing. It ought to have been done when the message came into this House Monday, and it would have been done if a gentleman had not attempted, for pure politics, to bring in an old resolution passed a year ago, passed twice, and changed from the form of a concurrent resolution or expression of the opinion of the country into a joint resolution which is a law, by which we might peremptorily interfere and embarrass the President by a sudden intrusion of legislative power into a negotiation. [Applause on the Republican side.]

That is the point of it all. The amendment that the gentleman proposes, bear clearly in mind, is not an expression, such as resolutions ordinarily are. It is to be a law; and that in the midst of negotiations; at a time when a new Administration has come into power and is actively engaged, and with strong sympathies, in a cause in which all our hearts are sympathetic. Already, only a few weeks installed in power, it has secured the liberation of all Americans who were imprisoned except those who were charged with being seized with arms in their hands. More than fifty liberations of American citizens have been granted under the energetic and firm demands of this Administration. Even the individuals who were claimed to be liable to martial law, taken in arms, have been accorded civil procedure as in ordinary cases.

In the meanwhile it is proposed to suddenly take the subject out of the President's hands by declaring recognition of belligerency, while the whole great subject is under discussion, and the President not aiming at any further war or belligerency by anybody,

but at peace and the independence of Cuba. That is the declaration of the Republican party, that is the purpose of the Republicans in power—to secure peace with independence. [Loud applause on the Republican side.]

The state of affairs in Cuba has greatly changed since a year ago. The comparative force and respective resources and hopes of the Cubans and of the Spaniards have changed. The war is clearly becoming hopeless to Spain. Did you read the last telegraphic dispatches from Spain giving declarations of a man who will within a few days probably be the prime minister of Spain? Far different from the confident, repelling, arrogant assertions of Mr. Canovas, the present minister, who is conducting this war.

Mr. Sagasta said on yesterday that the war was substantially hopeless. That utterance is from Spain—Spanish opinion at the center, from the man who very soon will be charged with power. That impression has been produced by the facts in Cuba and by the position of the Executive of the United States; and while this is actively going on a gentleman who desires to play politics comes in and proposes by a law to interfere with negotiations by legislative action declaring a recognition of belligerency, which must be decided within ten days from the time it reaches the President, with all the consequences, giving Spanish naval vessels the immediate right to search all our ships, with risks of "perilous collision" and war. He said he did not want war, nor did he court it.

Now, the declaration of belligerency is a serious step which will entail many consequences. I have believed that the Cubans were belligerents, because they were in fact carrying on war. That was my opinion. I have declared it here; and last year urged it upon Democrats to try to get as many votes as I could on that side for that declaration of opinion. But I am not charged, nor was I then charged, with executive power, and did not then assume to interfere by more than this expression of the opinion of the House. [Laughter on the Democratic side.] The Executive is in possession of all the facts, with the whole state of negotiations, and is directly responsible for the result of the action taken. We know the general facts known to the world, not what ends the Executive is securing, or how it is being done. That makes a great difference. Gentlemen think that is amusing. Do they not know that the declaration of an opinion on a general view of a case as to what the general line of action should be is very different from attempting by law to fix each step that must be taken by the Executive, moving all the parts of the power with which he is charged, in the presence of any exigency. [Laughter on the Democratic side.]

Mr. RICHARDSON. Then you admit you are speaking "in a Pickwickian sense?"

Mr. HITT. I do not. I was speaking from the standpoint of common sense—the practical and successful conduct of grave public business.

Now, there was undoubtedly a great deal known to the President and his advisers then—many facts and details that we did not know. But on the face of things there was, we believed, a genuine belligerency, a state of war in Cuba. And we think so now.

The question of recognizing that belligerency is for our Government purely one of expediency. It is our duty to act in view of the interests of the people of the United States. That is a duty devolving upon the Executive. In this question we know well the disposition of the Executive. We know by many declarations—by the evidence of many acts thus far in these few weeks—the purpose, the spirit on the part of the Executive. We know the view that was in the mind of the Secretary of State, why he brought in this very resolution and advocated it as an expression of the opinion of the people in warm sympathy with the Cubans. But he has to consider all sides, all facts, the whole outlook of the question. And, really, no one among us all wants any belligerency at all. We want peace, and we want the independence of Cuba. That is the real purpose in view. That is what we should seek to attain.

I do not pretend to know all the facts connected with the negotiations that may be in progress, but I do know that no negotiation can be forwarded by having another part of the Government interfere, and by legislative acts—by law—suddenly change the situation. Does anybody believe that our President or the Secretary of State will sacrifice the rights of Americans or abandon them anywhere, will abate one jot or tittle of demand for everything that concerns our interests; that he or any of those with him will forget the high faith that we have so long cherished in the Monroe doctrine, the sympathy that our people feel for every people in the world struggling for liberty, and our belief that this continent is destined to freedom and self-government forever?

It has been stated so often as the policy of the Government that you may believe—everyone ought to believe—that our Executive is earnestly exerting every force to practically succeed in that purpose. And I think the best thing we could do just now would be to act upon his request for the means to relieve the American citizens who are starving. As he has already secured relief for American citizens who were in prison, we hope and believe that soon he will solve, as far as the powers within his reach, the circumstances that surround the case, will admit, and as speedily as possible, the whole Cuban question; and then we shall have free Cuba by our side.

Mr. BLAND. I should like to ask a question for information. I understood the gentleman to say a few moments ago that the war was about at an end, that the Cubans were all whipped.

Mr. HITT. I have made no such suggestion.

Mr. BLAND. I understood the gentleman to say that the war was about at an end.

Mr. HITT. I did not say so; I said nothing of that kind as to the Cubans. A Spanish statesman says the Spanish cause is substantially hopeless.

Mr. DALZELL. Mr. Speaker, how much time have I left?

The SPEAKER pro tempore (Mr. PAYNE). Five minutes.

Mr. DALZELL. How much time has the gentleman from Texas remaining?

The SPEAKER pro tempore. Ten minutes.

Mr. DALZELL. I hope my friend from Texas will now occupy his time.

Mr. BAILEY. I yield my time to the gentleman from Alabama [Mr. WHEELER].

Mr. WHEELER of Alabama. As I am informed by the gentleman from Texas that he desires to reply to the remarks of the gentleman from Illinois [Mr. HITT], I yield the time back to the gentleman from Texas and will take time on the general debate.

Mr. BAILEY. Mr. Speaker, I occupied more time than I had first intended, and in doing so I left less time than the gentleman from Alabama desired. Inasmuch, however, as it suits him better to occupy the ten minutes which will be required to complete his remarks at a later stage of the proceedings, I will avail myself of the time remaining to call the attention of the House and the the country to some remarkable admissions which have been made by the gentleman from Illinois [Mr. HITT].

The gentleman from Illinois declares that my whole purpose in this procedure is to raise a political question, and thus obtain some political advantage. Is the gentleman from Illinois ready to admit that whether or not we shall recognize the right of the Cuban people to fight for their own independence is a political question? I am more than ready to accept that test. And let it be understood that every Democrat is in favor of recognizing their right, and that all Republicans are against it. [Applause on the Democratic side.]

The gentleman unwittingly said that in the last Congress, when he and his party were not charged with the Executive power, he played politics——

Mr. HITT. No.

Mr. BAILEY. And voted for a resolution identical with that I am trying to force this House to vote upon to-day.

Mr. HITT. May I interrupt the gentleman?

Mr. BAILEY. Here is the record.

Mr. HITT. May I interrupt the gentleman?

Mr. BAILEY. Certainly.

Mr. HITT. That the gentleman may do me no injustice, I will say that instead of my "playing politics" a year ago, I refused then to amend the resolution, which was concurrent and expressive of the opinion of the American people, to do what the gentleman is doing now and which I was asked to do—to put a trap for Cleveland and make the resolution a law, so as to force diplomacy and take diplomacy in the hands of the House.

I refused to do it because I did not believe it was a patriotic act on the part of an American legislator to invade the proper constitutional function of another branch of the Government because the President was a Democrat.

Mr. BAILEY. Mr. Speaker, I am ready to confess that I have not reached such skill in diplomacy that I am willing to vote an opinion which I would not crystallize into a law. [Applause on the Democratic side.] If I believed that the Cuban people are entitled to belligerent rights, I would vote to accord such rights to them by joint resolution, by concurrent resolution, or by a statutory enactment. The difference between the gentleman from Illinois and myself is that he will say what he means, but he will not make it effective. [Applause on the Democratic side.] If the gentleman desires to assume that position, I do not envy him the attitude he voluntarily takes.

The truth about it is that the Democratic party—no, not the Democratic party, but a President elected by the Democratic party—was then responsible for the executive administration of the Government. We had been compelled to repudiate him on other questions; and it was charitable enough on the part of the gentleman from Illinois to come to his rescue on this question. [Laughter and applause on the Democratic side.] He had done the Republican party so many favors that it was a poor return for the gentleman to do him that. [Renewed laughter and applause.] Yet, Mr. Speaker, we are told that for two years this question has been avoided, and although these people have been entitled to this

recognition, they have been made to wait until, waiting, they have almost despaired.

We do not oppose sending provisions to the starving Americans in Cuba. We favor doing so; but while we are anxious to send bread to our own people, we desire to send with it a message to the Cuban patriots that this great Republic is not indifferent to their noble aspirations for freedom. [Applause.] The Republicans desire to send the bread without the message. We desire to send both, because the message will do more to relieve their sufferings than all the bread your ships can carry. [Applause.]

Mr. DALZELL. I yield the remainder of my time to the gentleman from Ohio [Mr. GROSVENOR].

Mr. GROSVENOR. Mr. Speaker, while the gentleman from Texas has been masquerading before the people of the country no human wisdom can tell how many men of the United States have died of starvation in the Island of Cuba. While he has been masquerading here no estimate can be given of how many women and children have been turned naked and hungry out under the pitiless storms of that tropical country. He has delayed the relief sought to be extended three days.

No greater exhibition of unmixed demagogy ever was presented to the American Congress than the declaration of the gentleman from Texas that he desires in good faith to lead a great movement of a great nation to settle a great controversy between the United States and the Government of Spain. When did this zeal of his become manifest? When was it that he first was seized by this desire to be a leader of a great crusade on behalf of the people of Cuba? He stood silently by while the then President of the United States defied the expression of Congress and refused to act under its declaration.

I heard then no protest from the eloquent gentleman. I did not understand at that time that he felt clothed with such responsibility as demanded that he should rise up here and, at the head of the various factions of the army that somebody else has at last secured solid action from [laughter], should proclaim his undying allegiance to liberty and the cause of free Cuba.

Let me say to the gentleman that the Republicans of the United States were born and raised in sympathy with Cuba—free Cuba. It was a Republican President who, against the protest of the Democratic party, sought to relieve Cuba of her troubles long ago. And it is the Republicans on this floor who feel a genuine and honest sympathy for Cuba. And when the right time comes, in the right order of things and upon their own motion they will be found voting not only for belligerent rights to Cuba, but they will be found demanding liberty and national independence for the men of Cuba who have suffered. [Applause on the Republican side.]

But, Mr. Speaker, they will do it in their own way. [Renewed applause.] The minority may shift their commanding officers. [Laughter.] The minority may retire their failing generals and bring into action new men to take charge of their conglomerate organization [renewed laughter], but the Republicans on this floor will stand together behind the great leader of their party, and when the proper time comes they will march to the music of the Union, and liberty, and free Cuba. [Applause.]

But we will not be put into line of battle by the enemy. The note of the bugle that will sound the rallying cry will not be blown by the breath of a Democrat. [Applause.] The current Administration in the brief two months of its existence has done more for the liberation of Cuba than was ever done in the four years of Cleveland's Administration—ten thousand times to one. It has organized a public sentiment in this country in favor of action, and is ready to lead that sentiment. [Derisive laughter on the Democratic side.]

Mr. WHEELER of Alabama. When did that sentiment commence? I thought it had existed a long time.

Mr. GROSVENOR. Now, if the gentleman will not put four pages of that remark into the CONGRESSIONAL RECORD, I shall be greatly obliged to him. [Laughter.] This Republican Administration, by its course of procedure, has liberated more than fifty American citizens from the prisons of Cuba and is moving in its own way to greater results.

The SPEAKER. The time of the gentleman has expired.

A MEMBER (on the Democratic side). Regular order.

The SPEAKER. The regular order is demanded. The question is on agreeing to the resolution reported by the Committee on Rules.

Mr. BAILEY. I move to recommit the resolution reported by the Committee on Rules to the Committee on Rules, with instructions to report back that resolution with an amendment providing for the consideration of the resolution recognizing the belligerent rights of the Cuban people.

Mr. DALZELL. Mr. Speaker, I make the point of order that the amendment is not germane to the pending resolution.

The SPEAKER. The Chair thinks that is very clear, but will hear the gentleman from Texas.

Mr. BAILEY. I recognize, Mr. Speaker, that no amount of argument will change the ruling of the Speaker, and I appeal from that decision, and on that I demand the yeas and nays.

The SPEAKER. The Chair has not made any ruling, but the Chair will make a ruling in accordance with what the gentleman from Texas [Mr. BAILEY] evidently thinks is the proper parliamentary ruling, which is that the amendment is in no wise in order.

Mr. BAILEY. I do it on the assurance of the gentleman from Pennsylvania [Mr. DALZELL] that the Chair would so hold.

The SPEAKER. The Chair thinks the gentleman from Texas [Mr. BAILEY] probably had a more "inner light" than that. [Laughter.]

Mr. BAILEY. I demand the yeas and nays upon the appeal.

Mr. DALZELL. I move to lay the appeal on the table.

Mr. BAILEY. But when I demand the yeas and nays, Mr. Speaker, what purpose—even admitting that the gentleman could have the right to do that—what purpose is there in doing it? We do not delay it, and I insist upon the yeas and nays upon the appeal.

Mr. DALZELL. I have the right to make the motion which I have made.

The SPEAKER. The gentleman from Pennsylvania [Mr. DALZELL] moves that the appeal be laid on the table. The Chair has decided that the motion to recommit is not in order. The gentleman from Texas [Mr. BAILEY] takes an appeal from that, and the gentleman from Pennsylvania [Mr. DALZELL] moves that the appeal be laid on the table.

Mr. BAILEY. But before the gentleman from Pennsylvania [Mr. DALZELL] moved to lay the appeal on the table "the gentleman from Texas" had demanded the yeas and nays upon it.

The SPEAKER. Precisely; and if the appeal is not laid on the table, the House will either order or not order the yeas and nays, as it pleases.

Mr. BAILEY. I simply wanted to demonstrate to the country that the majority are not willing to face this question.

Mr. DALZELL. This does not demonstrate anything of the kind.

The SPEAKER. The question is on the motion to lay the appeal on the table.

The question being taken, on a division (demanded by Mr. BAILEY) there were—ayes 109, noes 79.

Mr. BAILEY. Tellers, Mr. Speaker.

Mr. DALZELL. Yeas and nays, Mr. Speaker.

The yeas and nays were ordered.

The question was taken; and there were—yeas 114, nays 83, answered "present" 12, not voting 144; as follows:

YEAS—114.

So the motion to lay the appeal on the table was agreed to.

Mr. TERRY. If there are no additional pairs, I desire to say that I voted "no" on this call; but, being paired with the gentleman from Massachusetts, Mr. GILLETT, I desire to withdraw my vote.

The result of the vote was then announced as above recorded.

The SPEAKER pro tempore. The question now is on the adoption of the resolution.

The question was put; and the resolution was agreed to.

The SPEAKER pro tempore. The Clerk will now report the joint resolution.

The Clerk read as follows:

Joint resolution (S. R. 42) appropriating $50,000 for the relief of destitute citizens of the United States in the Island of Cuba.

Resolved, etc., That the sum of $50,000 be, and the same is hereby, appropriated, out of any money in the Treasury not otherwise appropriated, for the relief of destitute citizens of the United States in the Island of Cuba, said money to be expended at the discretion and under the direction of the President of the United States in the purchase and furnishing of food, clothing, and medicines to such citizens, and for transporting to the United States such of them as so desire and who are without means to transport themselves.

The SPEAKER pro tempore. Under the special order, debate on this resolution is limited to two hours. The Chair will recognize the gentleman from Illinois [Mr. HITT] to control the time in the affirmative and the gentleman from Texas [Mr. BAILEY] to control the time in the negative. If no one desires to debate, the Chair will put the question.

Mr. WHEELER of Alabama. We all desire to debate. [Laughter.]

The SPEAKER pro tempore. The gentleman from Texas is recognized.

Mr. BAILEY. I yield fifteen minutes to the gentleman from Mississippi [Mr. WILLIAMS].

Mr. WILLIAMS of Mississippi. Mr. Speaker, it is said that times change and men change with them—whole bodies of men change with them. It was but a little time ago when the Republican party was boasting in loud tones that it was the party of "courage" in this country; above all things, that it was the party of "courage." But we have become so accustomed of late to see the Republican party run away from great public questions that it has ceased to be a novelty. We saw it at the beginning of this session run away from the Pacific railroad bill; we saw it later on run away from the consideration of the bankruptcy bill as it came from the Senate, and we see it now running away from the consideration of the Cuban question. When we come to examine more closely, Mr. Speaker, we find, however, that the Republican party has not changed its skin, nor the leopard its spots; we discover that back of each of these questions lies a plutocratic influence which is interested in nonaction.

Not only do whole bodies of men change as times change, but even the Speaker of this House, unchangeable, like the laws of the Medes and Persians, as we fondly imagined, changes with the times, too. There was a time a little while ago when, if he had been the chief of some Indian tribe, they would have called him "Big Man Defiant of Everything;" and now, to-day, they would add another title, and call him "Big Man Afraid of His Following." He is wiser than Epimetheus. He does not want to open Pandora's box. He is afraid to allow you men upon that side of the House to consider almost any great public question for fear chaos would follow in council; and upon this particular question he knows that American manhood, whether Democratic or Republican, would assert itself in favor of freedom wherever freedom's battle flag was hung to the breeze, whether in Cuba or elsewhere.

Now, Mr. Speaker, there are some other changes of more importance to the world than these; and the change that I note as the saddest is the change in the spirit of the great English-speaking race on both sides of the Atlantic. Time was when the names of Kossuth and Bolivar, or the cause of freedom in South America, or the cause of freedom in Greece, stirred every Anglo-Saxon heart in the world. But to-day it must be said of this great race, the greatest that the world ever saw and perhaps ever will see, that the British branch of it is aiding the despotisms of Europe in preserving the power of the barbarous Turk, while it manacles the sea power of Greece in the Mediterranean, while the American branch of the race is refusing even a hearing to the cause of freedom at their very back doors, in the very center of the American Mediterranean, where a people are struggling for the common right which every people possesses to change their form of government when old governments are unsatisfactory to civilization or do not answer to the public welfare.

In the great American House of Congress, where once Clay thundered, and where Benton and Mason and men of their type thundered in behalf of freedom everywhere, we can not obtain the poor boon of having an admitted fact passed upon and recognized, if that fact is one the consideration of which would be favorable to those people. Mr. Speaker, belligerency is simply a question of fact. It is not a question of law. There is nothing mysterious about it. Belligerency is "a condition of public warfare," and when you recognize belligerency in a country you merely recognize that public warfare exists there, and that as a consequence both sides should be accorded equal treatment.

The republicans in Cuba to-day are knocking at our back door, praying only that we shall take cognizance of the fact of existing war—belligerency. They are not asking any favor of your present Administration, only equal privileges with the Spaniard. Yet the Republican House of Representatives has to-day voted down a resolution which merely recognizes the existence of the fact of belligerency. I know you will say that you have not voted it down, that you have merely refused to consider it; but when you deliberately shut your eyes to a fact, and that fact is a fact the recognition of which is necessary to neutrality, necessary to doing equal justice to belligerents, you can not fool the people long with the idea that you have not deliberately done it. I know that the gentleman from Illinois said that the President was about to interfere by "diplomacy."

By the way, Mr. Speaker, did you ever think how utterly too-too mysterious it makes a man to be on the Committee on Foreign Relations of either House of Congress? I have known gentlemen who were the very pictures of geniality and bonhomie and frankness go upon that committee and become at once afflicted with the disease of mystery. Whenever anything is touched upon which affects foreign relations, the cry goes up: "Hush, hush, hush, for this is the bogey man! The most interminable consequences will follow if you put your unholy hands upon this sacred thing!"

But there is nothing mysterious about the question of Cuban belligerency, and the idea that the President, if he is really trying to bring about a recognition of Cuban belligerency or of Cuban independence, can possibly be injured by having the world know that the legislative branch of the American Government agrees with him, is entirely too absurd for serious consideration.

Mr. Speaker, there seems an easy way in which all these House and Senate proceedings can be brought to an end. Let the gentleman who has been and who will be chairman of the Committee on Foreign Affairs in this House rise upon his feet now or at any time and say that the President has told him that he intends, by executive action, to recognize Cuban belligerency. If he will do so, there will be no other word spoken here. Let the President say it to the country, and there will be no word further spoken here.

Now, then, Mr. Speaker, as I said a moment ago, belligerency is a fact. The question is, Does a condition of public warfare exist between certain peoples, or between certain fractions of a people? If so, belligerency exists. Is it a fact, then, that a condition of public warfare exists in Cuba to-day? I want no better evidence than that which was furnished by the gentleman from Illinois, when he quoted from Signor Sagasta, the leader of the Liberal party in Spain to-day, and who will probably soon be the premier of that country.

Mr. Sagasta said in so many words, "We (the Spaniards) exercise no administration or domination in the territory of Cuba east of Sacugeunay." He says, furthermore:

We have 200,000 troops in Cuba, but we are not even masters of the territory trodden by our soldiers.

Gentlemen say that there are no facts upon which to support the recognition of Cuban belligerency. Signor Sagasta answers them.

Mr. Speaker, no facts! There are facts that would support a declaration of war upon the part of the people of America against Spain. The gentleman himself says the executive department acknowledges, everybody acknowledges, that between 700 and 800 American citizens are, under military orders, herded up like sheep in certain refuge cities in Cuba, without anyone to care for them or any ability to do anything for their own support, and without any provision being made by the Government of Spain for supporting them.

Spain has no more right to put men to death by starvation than she has to put them to death by the bullet; and yet Spain must be affected with the natural consequences of her own deliberate act when she drives men, women, and children, under penalty of military execution, from their homes, to herd them, while deprived of ability to engage in their life avocations, in certain places chosen by her, and there leaves them without food, clothing, or shelter. It is the cruelest of possible murders, and 700 or 800 of the people subjected to this treatment are American citizens!

What would have been thought during the late civil war if General Grant or General Lee had issued a proclamation, or if the government of either of the contending forces had issued a proclamation to the effect that all men, women, and children, including British subjects and French citizens, be gathered together in four cities—let us say New York, St. Louis, Memphis, and Washington—and then had made no provision whatever to feed them or clothe them, no provision even to furnish them with a local habitation while they were there?

Do you suppose that Great Britain—the other great branch of the English-speaking race—would not have spoken to us in unmistakable tones? Do you suppose that Napoleon III—at that time seated upon the imperial throne of France—would not have followed that action with action of his own which would have meant something against the power that was maltreating defenseless aliens and in favor of the power on the other side? Yet this is a fact which nobody denies: These hundreds are thus huddled and herded.

Now, what does the Republican party propose to do? Gentlemen, I ask you seriously to consider this. You propose to treat American citizens who are thus huddled, deliberately, as I believe, for starvation and for pestilence, not like American citizens, but like paupers. You propose to send them relief, you propose to deal out charity to them instead of dealing out what this magnificent race has always dealt out to its citizens everywhere, under every sun and in every clime—protection in the enjoyment of their rights. Notice of protection, intervention for protection, is the step that you ought to take here to-day.

I shall, of course, vote to send relief, but my only objection to this resolution is that it does not go far enough. Even the resolution attempted to be proposed by Mr. BAILEY of Texas, as an amendment to the one now being considered, does not go far enough, in my opinion. And why do gentlemen object to recognizing Cuban belligerency, to recognizing a plain and palpable fact—a condition of existing public warfare in Cuba? Why, sir, we have objection made based on a condition of things of which the American "middle classes" and "lower classes"—meaning by those terms the less rich and the least rich—are growing tired day by day. The only objection made is that it will "disturb business relations."

In this latter end of the nineteenth century, men seem to think not only that "the age of chivalry has gone," but that this magnificent piece of humanity that God has created and which we call man, with "an imagination to body forth the shapes of things unknown," with an intellect to probe into the very secrets of nature, with a heart to feel for suffering and for liberty everywhere in the world, is nothing but a miserable money-making machine. It is bad enough for an individual to feel that way. He sinks immediately to the contempt of all men. He sinks to the contempt of God Almighty.

Poetry goes out from him; imagination ceases to exist with him. Chivalry is dead; manhood itself is sapped. But for a nation—and, worse than all, for a great race like the two branches of this English-speaking race of ours—to come to the conclusion, as they seem to have done lately, that the only thing to be considered in their relations with the other nations of the earth is the money question, the trade question, the effect on stocks and bonds, the disturbance of business, carries degradation so far that I do not believe any man was ever gifted with power to express the contempt that a real man ought to feel for it. [Applause.]

[Here the hammer fell.]

Mr. BAILEY. I yield five minutes more to the gentleman from Mississippi.

Mr. WILLIAMS of Mississippi. Mr. Speaker, I say away with considerations like that, where justice and freedom stand before you! It was said in the old days that a Roman citizen, wherever he walked on the face of the globe, being disturbed in the exercise of his rights, held himself up proudly and said, "Civis Romanus sum." And I want to see the day when, wherever an American citizen may be, he shall hold himself proudly, and in response to all attempts at outrage shall say, "I am an American citizen."

And I want to see the time when a naturalization paper from this great Republic may be like the flag of the Republic itself, when it shall protect whatever and whoever stands under it, and when all the world shall know that no prince, power, or potentate, no nation, no sovereign's satrap, dares to question it or dares to go behind it; when it shall cover a citizen like a shield against all outrage and all infamy.

I said a moment ago that we were coming to the point where considerations of business relations prevented you from recognizing officially a fact when it was plain, patent, and acknowledged of all men. But that is not all. We seem to be coming to the point where, if civilization itself is confronted with business interests, civilization must stand aside; when outrage and rape and arson at our very doors—things that curdle the very blood when we read about them—are to be passed over lightly with the remark, "Do not put your unholy hand on this; you can not tell what may follow; this is a matter of diplomacy." And when we push the matter further, we find that behind the "diplomacy" is always some matter of business interests.

But, leaving that consideration, I hold that, from the standpoint of business even, vulgar and plebeian as that consideration is, this war ought to be put an end to, and we have the power to put an end to it. From the standpoint of political expediency we ought to intervene. Why, not long ago gentlemen cheered as if they were wild when something was said about the annexation of Hawaii and the acquirement of a little coaling station more than a thousand miles from the nearest point on the American Continent.

I am not a jingo; I am not an annexationist. I would not try to spread the wings of the American eagle all over the islands of the sea. Nor would I upon every occasion flop those wings and scream in exultant boast at our own prowess. But there is a proper sphere of influence within the view of every nation—the sphere of its own proper action; and if the Gulf of Mexico, the American Mediterranean, is not within our national sphere, then I know not what is. The Island of Cuba commands the mouth of the Mississippi River, bearing the greatest inland commerce in the world.

It will command the mouth of the Nicaragua Canal when it is dug, and it will therefore command the passage to and fro of American troops and ships from coast to coast. We want it within the hands of a friendly power, and the Cubans will be friendly. Spain is historically, traditionally, and from the very natures of the Spaniard and the Anglo-Saxon an enemy to the English-speaking race always and everywhere when she dares to show her enmity.

Therefore, as a mere matter of political expediency, while I would do no wrong, while I would start no crusade of "manifest destiny," I would take advantage of every piece of good fortune that may befall ourselves, and every piece of bad fortune that may befall any of our natural enemies, to weaken them in the American Mediterranean and to establish there, so far as we can, our own power or the power of peoples who are friendly to us, who from the very nature of things would be friendly, who, whether or not they were under our protection in a territorial government later on, as might happen, would be allies, just as Platæa and Athens were allies by reason of propinquity and by necessity of situation. [Applause.]

[Here the hammer fell.]

Mr. BAILEY. Mr. Speaker, I assume, of course, that the gentleman in charge of the time on the other side of the House will now consume some part of it.

Mr. HITT. I yield three minutes to the gentleman from Pennsylvania [Mr. ROBBINS].

Mr. ROBBINS. Mr. Speaker, having visited the Island of Cuba in January last, I wish to advocate the passage of this resolution appropriating money for the relief of American citizens on that island. In doing so I am influenced by my personal observation of the condition of affairs there.

I am somewhat surprised that this resolution should be termed in anywise political; and I know that gentlemen who are opposing its passage by filibustering are certainly not familiar with the real condition of our American citizens on that island.

I do not intend, Mr. Speaker, to enter into any argument upon the legal phases of this question—whether Congress or the President should take the initiative in passing a law to recognize the belligerency of Cuba. I propose to devote my time entirely to showing the pressing necessity of relieving American citizens in the prison pens, starving, as they were in January last, and in a condition of far greater suffering as I know they are to-day.

I visited Habana for the purpose of investigating the Cuban question. I visited the country round about Habana for 30 or 40

miles; and every case that I shall state to this House is a case that came under my own personal observation and was investigated for my own personal satisfaction. I want to state the case of Charles Govin, an American citizen, to show that Spain has no right at this time to claim from us that we are infringing upon international law or any treaty rights when we propose to relieve Americans suffering on that island.

By reason of the advantages given me, I visited the Cabanas fortress—I think on the 2d of January. A prisoner was brought out to me who exhibited the marks upon his arms, and told me that a short time before he had been captured in the insurgents' army with one Charles Govin, an American citizen. He told me that when Govin was captured he was entirely uninjured; that he exhibited to the commanding officer of the Spanish guard who took him his papers as a citizen of the United States, his appointment as a correspondent of a newspaper in the city of New York—I think it was the Journal—and his passport admitting him to that territory. And when the Spanish officer discovered what those papers were he struck them from his hands and tied him to two other prisoners for the night.

This same prisoner told me that the next morning at daybreak Charles Govin was taken out in plain view, tied to a tree, and the Spanish cavalry ordered to ride by and cut him with their machetes as they did so, which order was obeyed until the man was attually cut to pieces by the Spanish cavalry. And when this prisoner with whom I talked, Mr. Speaker, was afterwards put in the Cabanas prison, he applied to the consul-general of the United States, claiming his right as an American citizen and stating that he did not assert such right on the field because he "feared the fate of Charles Govin." The whole official correspondence is here, Mr. Speaker, published in Senate Document 30 of the Fifty-fourth Congress. The correspondence is open to all of us. That is the treatment that one American citizen received.

Mr. Speaker, it was my good fortune to meet the brother of Charles Govin at Tampa, Fla. Because the claim is made that these same people come to the United States and procure fraudulent papers and go back to Cuba, I want to say that this man was as thorough an American as I am myself—a permanent resident of the United States—as was also his brother Charles, who was so cruelly murdered by the Spanish.

Mr. SIMPSON of Kansas. Will the gentleman yield for a question?

The SPEAKER pro tempore. Does the gentleman yield?

Mr. ROBBINS. If it is not to come out of my time.

The SPEAKER pro tempore. Of course it will come out of the gentleman's time.

Mr. SIMPSON of Kansas. I wish to ask the gentleman a question.

Mr. ROBBINS. Very well.

Mr. SIMPSON of Kansas. Does the gentleman think he can change those conditions by an appropriation of $50,000?

Mr. ROBBINS. I think, Mr. Speaker, that $50,000 will relieve to that extent, and, if it is necessary, the following of it up by $100,000, the sending of food and medicine, is the very thing we want to do. This is the beginning of a great work. We do not want to quibble about forms of law and diplomacy. We want to send these people substantial relief, and send it at once.

One other case, Mr. Speaker. Here is the card of Frederic L. Craycroft, who called on me at the Hotel Ingleterre, in Habana, and who came from the State of Indiana, I believe. I am not sure but that he was a citizen of the late Judge Holman's district. By the death of a friend this young man, who was 26 years of age, was called to Cuba to settle up an estate, which consisted of a farm within 20 miles of the city of Habana. He told me that the Spanish troops came to his place early in December, under the command of a commissioned officer, troops that were sent by Spain to the Island of Cuba to enforce the law and preserve order. He told me that that commissioned officer demanded money from him, and when he refused to give it, struck him on the head with his sword.

I saw myself the mark on the young man's head and saw his clothes that were cut. I saw these at the American consulate. Mr. Speaker, when he was finally knocked down and almost kicked into insensibility, he gave the commissioned officer $100, and his soldiers grabbed up some $29, all that he had left, and took his horse and other property. On that same expedition, that same Spanish officer, with these men, went on burning up the houses and killing peaceful citizens—pacificos, as they are called—until in that raid 28 peaceful citizens were killed. This American, when I saw him, almost a month later, was a fugitive in the city of Habana, living upon the alms of the American citizens in Habana, fearing to return to his farm.

Mr. SIMPSON of Kansas. Now, what good will this $50,000 do those dead men?

Mr. ROBBINS. This man is not dead.

Mr. SIMPSON of Kansas. Will you let them be killed first and feed them afterwards?

Mr. ROBBINS. This man is starving in the city of Habana, driven from his plantation. Fifty thousand dollars, if properly expended, will at least give him bread, that he may live.

Mr. Speaker, we all know the case of Julio Sanguily, an American citizen who was tried and condemned contrary to the treaty rights with Spain. His lawyer was imprisoned. The lawyer who took his appeal at Madrid was deprived of his office. These are some ways in which Spain is treating citizens of the United States.

Mr. Speaker, after the battle of Guanabacoa, the day after that fight, I saw American citizens, whom certainly the gentleman from Kansas [Mr. SIMPSON] would say should be relieved by an appropriation of money. The day after that fight there were huddled in the little city of Guanabacoa, within 6 miles of Habana, more than 2,000 people, they told me, and the streets were crowded. They told me those people had been driven in from the provinces outside.

Spain does not make any pretense of furnishing those people with food. They have been driven from their plantations, deprived of their horses, deprived of every means of support, and among those 2,000 fugitive people from the country round about they told me, and I heard it officially at the American consulate, there were some eight or ten American citizens that were in actual want and in actual starvation.

Mr. BRUCKER. Mr. Speaker, I should like to ask the gentleman when it was that he saw all of these horrors taking place?

Mr. ROBBINS. I went to the Island of Cuba on the 24th day of December and came away in January of this year.

Mr. BRUCKER. Is not what you saw and what you describe here the legitimate result of war?

Mr. ROBBINS. To attack peaceable citizens, to kill women and children, to drive old men, defenseless women, and little children from the country, from their homes, into the towns to starve, is not "legitimate war" nor the result of "legitimate war." It is extermination; it is cold, cruel, deliberate murder.

No, this terrible condition of affairs is the result of the "brutal policy of Spain" and not the result of "legitimate war."

No, I say again, it is not the legitimate result of war, Mr. Speaker. In the treaty with Spain which I have here, Spain guarantees protection to every American citizen on the Island of Cuba, under the articles of 1795, and again in protocol of 1877, this right is guaranteed, but under this proclamation of General Weyler, issued October 21, 1896, this condition of affairs is brought about in Cuba—and I want to read just one paragraph of it for the enlightenment of gentlemen upon the other side. This proclamation reads:

> That all the inhabitants of the country districts, or those who reside outside the lines of fortifications of the towns, shall within a delay of eight days enter the towns which are occupied by the troops. Any individual found outside the lines in the country at the expiration of this period shall be considered a rebel, and shall be dealt with as such.—*Proclamation of General Weyler, dated October 21, 1896, sec. 1.*

Mr. Speaker, all the inhabitants—Americans, pacificos, noncombatants, men, women, and children—are driven into the towns by this nefarious proclamation of the butcher Weyler, to starve, as they are doing, in those fortified towns of Cuba; for to remain outside means to be shot, as these poor wretches have learned by bitter experience. To be driven into the towns means death by starvation and disease.

Mr. BRUCKER. I should like to ask the gentleman another question, Mr. Speaker.

Mr. ROBBINS. I can not be interrupted. I have only ten minutes.

Several MEMBERS. Go ahead.

Mr. ROBBINS. I do not wish to refuse. I will answer the gentleman in any way I can; but my time is so short.

The SPEAKER pro tempore. The gentleman declines to yield.

Mr. ROBBINS. Mr. Speaker, this condition of affairs existing in the Island of Cuba, this is the condition of affairs existing with reference to some 600 or 800 Americans resident in the country districts of Cuba, as we are informed by the President's message, and it ought to demand at the hands of the American people some immediate and urgent relief. If this appropriation can be expended for their relief, it ought to be granted gladly and at once. Talk about a condition of war! Here, Mr. Speaker, is the list of American prisoners confined in the Cuban prisons.

This list, which is officially furnished by the Secretary of State to the United States Senate, and is a Senate document, discloses the names of 74 American citizens. We have been told to-day by the chairman of the Committee on Foreign Affairs [Mr. HITT] that nearly all of them have, by the urgency of a Republican Executive, been liberated from those prisons since the 4th of March. We want to go further, Mr. Speaker. We want to relieve the suffering of American citizens in Cuba in these starvation pens in these fortified towns; this condition of affairs which has been brought about, not by the legitimate results of war, but by the results of an order the parallel of which is only found in the Inquisition, the order that General Weyler promulgated in the fall of 1896.

I believe Cuba should be free. I will vote to acknowledge the

Republic of Cuba at the first opportunity. Spain has broken every treaty obligation with us. She has murdered our citizens and destroyed their property. We owe her nothing now. Our duty to our own citizens demands that we protect their lives and property and relieve them from starvation. Does citizenship of the United States mean nothing? Will we not protect it? We have notified the world that we will not permit any other nation to interfere between Spain and Cuba. Yet we will not. We spend thousands of dollars guarding our ports and patrolling the high seas to prevent arms, men, and supplies from being shipped to Cuban patriots, while the Spaniards buy all these here and send them openly to Cuba. Let us grant equal rights to each. Let us acknowledge belligerency; recognize the independence of the Cuban Republic. Let us grant, Mr. Speaker, to the Cubans the Spaniard's chance.

Let us appropriate this money and appropriate it quickly, Mr. Speaker, and if that does not bring about the release of American citizens from starvation and death, let us send after it another $50,000, and if that does not bring the result, then I for one shall vote for and do all that I can to send after these donations war ships and armed troops. I believe first, Mr. Speaker, in attempting in some rational and substantial manner to relieve these starving Americans quickly and without delay. [Applause on the Republican side.]

[Here the hammer fell.]

Mr. BAILEY. I yield ten minutes to the gentleman from Georgia [Mr. LIVINGSTON].

Mr. LIVINGSTON. Mr. Speaker, we are all agreed as to the necessity for relieving these suffering Americans in Cuba, and I presume that we are all agreed upon another proposition, that there is war in Cuba. I do not think that any intelligent Republican will dare to deny that proposition.

Now, the only practical question to-day before this House and before the people of America is how best and most safely and surely to relieve these people in whom we are interested in Cuba. Your proposition is to feed them for thirty-one days with $50,000, for that is the length of time that it will suffice. At the end of thirty-one days you must repeat the appropriation, and at the end of sixty-two days you must repeat it again.

Now, I shall vote for the $50,000, but I lay down the proposition that it is not the practical way in which to get at this business. In the first place, what brought about the necessity for the expenditure of the $50,000? The simple fact that General Weyler, in a war on noncombatants, has driven them from their rural homes into the cities and villages of Cuba, without any excuse under the heavens but that he intends to exterminate every Cuban on the island.

Those he can not kill or banish he proposes to starve to death; and I want to say to my friend from Illinois [Mr. HITT], of whom I am so fond, that it came with very bad grace from him this morning to throw across onto this side of the House the charge that the gentleman from Texas [Mr. BAILEY], the leader of the minority, was delaying the provisioning of these starving people. You and your party could have done just the same thing last Monday which you did to-day. Your Committee on Rules could have brought in this rule on last Monday just as well as to-day. Why did you not do it?

But there is another thing that I want to bring to your attention. John Sherman, Secretary of State, knew just as well on the 5th of March of the existing condition of affairs as he knows them to-day.

Mr. HITT. How do you know that?

Mr. SHAFROTH. The gentleman from Illinois scarcely needs to ask that question, for he was chairman of the Committee on Foreign Affairs in the last House.

Mr. LIVINGSTON. Why, of course he was. Now, Mr. Speaker, since the 5th day of March he has had access to the private files and correspondence from Cuba, that have been kept from Congress, and intentionally kept from the public, for fear of creating a feeling which would have compelled decided action in behalf of these Cuban people. Much was and is expected of this Administration. The last did not meet the demands so urgently pressed upon it by Congress and the public. This should have and, if acceptable to the people, must have more Americanism and less Spanish and less English.

There should be Americanism in it sufficient at least to insure safety to Americans in Cuba. You have an Administration that for sixty days, since Mr. McKinley and Mr. Sherman came in, know that there were starving Americans in Cuba; John Sherman for sixty days know that these people were starving, and yet you charge on this side, upon the minority leader of this House, that he purposely delayed this provision for four days, when you have simply deliberately and knowingly delayed it for more than sixty days.

Now, let me suggest that it would have been delayed sixty days more if it had not come to the knowledge of the Republican Administration that the Morgan resolution in the Senate had just dragged itself along for thirty days and could drag no longer, that the Senate was bound to act upon it, and that they were going to pass it; and just at the very threshold or doorway of its passage you come in here with a proposition and say, "Give us a little more time and the President will certainly do it."

Oh, I remember these promises from the Executive, made when the question was up for the repeal of the purchasing clause of the Sherman Act, that gave so many Democrats on this side so much trouble, and that from that day to this made them cover their faces in shame. Now, Mr. Speaker, I want to suggest, in all candor, to that side of the House one way out of this whole business. Vote the $50,000 to feed these starving American citizens, and send along with it a notice to General Weyler that he must turn these noncombatants loose and let them go back to the rural districts where they can get fruits and roots and meat to live upon, and get rid of the $50,000 appropriated hereafter. Why not?

Mr. STEELE. Who will live on roots?

Mr. LIVINGSTON. The gentleman says, Who would live on roots? For gentlemen over there, I would not be sure but that it would be a very good thing for them to live on roots for a while. [Laughter and applause on the Democratic side.] It might cause them to have a little more Americanism if they had to live on roots for a while in Cuba. [Renewed laughter.]

But, Mr. Speaker, let me suggest in all candor a removal of the cause that brought on these existing conditions that call for this appropriation; and I know, sir, that you will agree with me, and I know that my friend from Illinois will agree with me, that the only way to practically and permanently get rid of this thing is to remove the cause that brought about this necessity. Now, the necessity is brought about by Weyler's order. I should notify him that it must be revoked.

Mr. HITT. May I ask the gentleman a question?

Mr. LIVINGSTON. Certainly.

Mr. HITT. Do you not think the better way to remove the cause would be to have the President, with all his authority and with all the ability of his advisers, to secure the independence of Cuba instead of the belligerency or anything else? [Applause on the Republican side.]

Mr. LIVINGSTON. Yes. Will you answer one question for me? Will the President do that? [Applause on the Democratic side.] Now, answer. That is fair. When will he do it? My friend is an honest man; let him answer that.

Mr. HITT. Mr. Speaker, I have no right to speak by any authority.

Mr. LIVINGSTON. Then you have no right to make that proposition to me. [Laughter on the Democratic side.]

Mr. HITT. I asked you a question, and you have asked me one.

Mr. LIVINGSTON. Yes.

Mr. HITT. Do you want an answer?

Mr. LIVINGSTON. I do want an answer.

Mr. HITT. Then I will answer the gentleman. As one member, and speaking for myself, I have reason to believe that the President is taking as active——

Mr. LIVINGSTON. This comes out of my time. Be in a hurry and go ahead.

Mr. HITT. The President is taking as active and as effective steps as he can looking to securing the independence of Cuba. I just stated to you a fact showing the outlook in Cuba, that that conviction is shared at headquarters in Spain, that the minister who will probably be in charge of that Government in a few days has said as to the Cuban struggle that the prospect is substantially hopeless for Spain. [Applause on the Republican side.]

Mr. LIVINGSTON. Let me ask the gentleman one further question. Have you any confidence, to any extent, in Spanish promises? Now, come down to it, honestly.

Mr. HITT. I do not think that there is any promise in question.

Mr. LIVINGSTON. Now, from the same process of reasoning, we can reason all along the other side, and I know you are candid. I have a great deal of faith in Mr. McKinley, although he is a Republican. I am afraid, however, that he is in the hands of the Philistines, as Cleveland was. [Laughter and applause on the Democratic side.]

I am afraid they will manipulate him, and I would rather act so to give him more backbone, so that he would send a declaration: "To General Weyler: For once and forever that order of yours must be revoked; these noncombatants must go back to their homes in the rural sections, so that they can get their own food. We will not submit to it, by the eternal!" That is what we ought to do; and why not amend your resolution? Why not do that?

The SPEAKER pro tempore. The time of the gentleman has expired.

Mr. BAILEY. I yield ten minutes to the gentleman from Alabama.

Mr. WHEELER of Alabama. Mr. Speaker, the highest parliamentary body of the greatest Government on earth is called upon to determine from the evidence before it whether war does or does not exist on the Island of Cuba.

That is the only question, Mr. Speaker.

Only on yesterday, at the very time prominent Republican statesmen were asserting that war did not exist on that island, the distinguished Spanish senator and ex-premier, Señor Sagasta, was making a speech in Madrid, in which he asserted in the most positive terms that war did exist; that Spain had 200,000 troops in Cuba, but he painfully admitted that Spain was not master even of the territory trodden by her soldiers. I read his exact words as they appear in the cablegram from Madrid in the Post of this morning:

MADRID, *May 19.*

At a meeting of Liberal senators and deputies to-day Señor Sagasta, former premier, made an important speech, in the course of which he said:

"We have 200,000 troops in Cuba, but we are not even masters of the territory trodden by our soldiers. At the same moment Carlism is organizing itself in the peninsula and menaces us with a new war, thanks to the impunity it enjoys, while the seeds of separatism are germinating in some of the provinces.

"The picture could not be gloomier. We have war in Cuba and in the Philippines, and we have attempts at civil war at home."

Two hundred thousand Spanish soldiers in arms and in line of battle in the Island of Cuba, and an official report before us stating that

EIGHT HUNDRED AMERICANS DESPOILED, IMPOUNDED, AND STARVING.

Eight hundred American citizens are driven from their homes, deprived of their property, despoiled of their estates, impounded and corralled and starving in the towns and villages of Cuba, and yet men who have forgotten that honor and chivalry are the priceless heritage of the American people would make us believe that the Island of Cuba is blessed with profound peace.

For three years the Spanish bulletins have been reporting frequent engagements with superior bodies of insurgents. They have told us of the slaughter of the insurgents in battle, and the sound of musketry shooting down helpless prisoners, including combatants and noncombatants, including Cubans and Americans, has been heard every day of the reign of the Nero of the nineteenth century; "King Weyler the First;" and yet, after all this slaughter, the distinguished Spanish senator and ex-premier proclaims in Madrid, Spain's beautiful capital:

We have 200,000 troops in Cuba, but we are not even masters of the territory trodden by our soldiers.

This is an important statement from a Spanish senator and ex-premier, and the gentleman from Illinois [Mr. HITT] who has just taken his seat informs us that Señor Sagasta will in a few days again become the premier of that Government, and this fact gives even more significance to his words. He tells the people of Spain that because of an insurgent army of superior numbers the 200,000 Spanish troops are not even masters of the territory they stand upon, and the gentleman from Pennsylvania who spoke half an hour ago told us that the warfare carried on by these 200,000 soldiers was brutal, cruel, and atrocious.

The statement by Señor Sagasta that—

Spain is not even master of the territory trodden by her 200,000 soldiers—

is an admission that the Cubans have practically the control of the entire island. This alone entitles the struggling patriots to the rights of belligerents.

All works on international law assert that actual possession of the territory is sufficient.

Wildman, quoted approvingly by Halleck, pays 68, says:

When, in the result of a civil war, a state changes its government, or a province, or colony, that before had no separate existence, is in the possession of the rights of sovereignty, the possession of sovereignty de facto is taken to be possession de jure; and any foreign power is at liberty to recognize such sovereignty by treating with the possessor of it as an independent state. In international transactions possession is sufficient.

Davis in international law, page 200, says:

The parties to a war are called belligerants. The recognition of such rights by foreign governments in no way involves the recognition of the rebellious government as a separate political recognition. It only implies that the laws of war are to prevail in the military operations.

Lorimer, Vol. 1, page 142, says:

By recognizing belligerent rights neutral powers pronounce no judgment whatever, either on the merits of the claim or the probability of its ultimate vindication. Belligerent recognition is a mere declaration of impartiality. To withhold from the claimant for recognition the rights of belligerency, whilst we extend them to the parent state, would plainly be to take part against it in the war.

Notwithstanding all this, the money changers and owners of Spanish bonds tell the people that there is no war in Cuba, and that we must not recognize Cubans as entitled to belligerent rights.

SPANISH ARMY IN CUBA FIVEFOLD OUR ARMY OF 1776 OR 1812.

From 1776 to 1781 the average enrolled force of our continental soldiers was 38,263, while the average force of British troops in America during that time, which I take from eleven different official reports, was 82,208, to which force should be added their American adherents, which at one time numbered 8,954 men, making the average British force somewhat in excess of 40,000 soldiers; yet all historical works, including our school histories, tell us that the period from Lexington and Concord, April 19, 1775, to Yorktown, October 19, 1781, was a condition of bloody, cruel, and desolating war.

Our losses during that seven-years conflict was but 2,200 killed and 6,500 wounded, a less number than the Spaniards claim are killed in a single season, either killed in battle or shot down in Weyler's slaughter pens. In the war of 1812 we had 1,877 killed and died of wounds, and 3,737 were wounded and recovered; and in the war with Mexico 1,049 were killed and died from wounds, and 3,928 were wounded and recovered.

MANY TIMES GREATER THAN THE ARMIES IN MEXICO.

The greatest force commanded by General Taylor, with which he won the victories of Palo Alto, Resaca de la Palma, and Monterey, was 6,650, and his great victory at Buena Vista was accomplished with a force of 4,733 men, and Santa Anna's entire army at that battle was reported on paper as 19,993 men.

General Scott carried the Stars and Stripes from Vera Cruz to the halls of Montezuma with an army whose maximum strength was 12,776 men, and the entire force brought against him by Santa Anna was estimated to be 30,000 strong [applause]; and yet American history has dignified these occurrences as real, actual, bloody warfare. Mr. Speaker, we have to either stop Fourth of July celebrations and undo the elections of Old Hickory in 1848 and Pierce in 1852, who the people elected because they were told that old Zach Taylor and Franklin Pierce were both heroes in actual war, or else we have got to admit that the array of hostile armies more than five times as formidable as those which fought the campaign in Mexico or the battles of the Revolution have created a condition of actual war in Cuba.

TEN TIMES JACKSON'S ARMY IN THE VALLEY.

Stonewall Jackson in his campaign in the Valley had less than 17,000 men, and much less than that number in his engagements at Kernstown with General Shields, at McDowell with General Milroy, at Front Royal and Winchester with General Banks, and at Cross Keys and Port Republic with Generals Frémont and Shields, and yet all these gallant soldiers, driven from these fields by the sagacity, skill, and courage of the superb Jackson, hastened forward couriers, dispatches, and telegrams assuring the Government that the once peaceful valley of Shenandoah had become a theater of actual war.

If we are to vote that war does not exist in Cuba, we must also vote that there was no war in the Shenandoah Valley.

LESS THAN TWO HUNDRED THOUSAND CONFEDERATES UNDER ARMS IN 1863.

Again, Mr. Speaker, the War Record Reports tell us that in 1863 the total effective of all the Confederate force east of the Mississippi River was only 153,780 men, and it must be remembered that in 1861, before half that number of soldiers were in the field, the Spanish Cortes declared that war existed between the United States and the Confederate government. If we now decide that there are not a sufficient number of Spanish troops in Cuba to create a condition of war, we must also decide that war did not exist in this country from 1861 to 1865, and we must follow up that by repealing all the pension laws, bringing the dead to life, making the lame to walk, revising history, and teaching the children that there were no such persons as Lincoln, McClellan, Grant, Sherman, Sheridan, Hancock, Schofield, or Lee, Jackson, and Jefferson Davis. We must do one of these things, Mr. Speaker, or else admit that the same facts which created a condition of war in one country does not create it in another.

FRANCE HAD BUT 195,801 SOLDIERS IN 1815.

The returns of all the armies of France of June 1, 1815, show that their entire strength was 195,801 men. This included the Army of the North with which the Emperor fought the battles of Ligny, Quartre Bras, and Waterloo; Army of the Rhine, under Rapp; Army of the Alps, under Suchet; Army of the Jura, under Lecourbe; Army of the Var, under Brune; Army of the Eastern Pyrenees, under Decaen; Army of the Western Pyrenees, under Clauzel, and Army of the La Vendee, under Lamarque. The entire force under arms in France was therefore less in number than the strength of the Spanish army which Señor Sagasta tells us is now fighting a war of oppression and conquest in Cuba.

If Republican statesmen are right that war does not now exist in Cuba, then war did not exist in Europe, and the stories of Napoleon and Wellington and Blucher and Waterloo are fairy tales which should be blotted out of history.

The SPEAKER. The time of the gentleman from Alabama has expired.

Mr. WHEELER of Alabama. I ask two minutes more.

Mr. BAILEY. I have yielded all the time under my control.

Mr. WHEELER of Alabama. I ask unanimous consent for an extension of two minutes.

There was no objection.

Mr. WHEELER of Alabama. I thank the House for this courtesy.

The trouble is, Mr. Speaker, that the controlling element in this country has changed.

HONOR THE DOMINANT SPIRIT ONCE; GOLD THE CONTROLLING POWER NOW.

From 1776 to 1865 the dominant spirit which controlled in this Republic was one of honor, glory, chivalry, and patriotism. The dominant spirit of to-day is the pride of gold, of palaces, of marriage alliances with dukes, and princes, and counts, and an exercise of the whole power of the Government in the interests of money changers, millionaires, and monopolies, and this, too, whether they are Astors, Goulds, Vanderbilts, or Rockefellers of America, or Barings and Rothschilds from across the sea.

I do not know what others may say or how others may vote, but I for one proclaim on this floor that war, cruel, brutal, murderous war, does exist in that "gem of the ocean"—that beautiful "Queen of the Antilles"—and I here assert that it is our duty as the representatives of the greatest people upon earth to so declare in the highest councils that exist under the canopy of heaven. [Applause.]

If this declaration will aid our brethren struggling for liberty, we are only doing what we promised to do when God vouchsafed victory and liberty to us. If we fail to do this, we are recreant to our pledges, to Christianity, to civilization, to humanity, and to God. [Loud applause.]

Mr. HITT. I yield five minutes to the gentleman from Pennsylvania [Mr. ADAMS].

Mr. ADAMS. Mr. Speaker, as I entered the House a moment ago, I heard a gentleman from Georgia making an appeal to this side of the Chamber to pass these belligerent resolutions to "stiffen the backbone" of the man to whom the American people have just intrusted the charge of this Government.

I wish to say, in reply to the gentleman from Georgia, that the man who within thirty days after taking his seat in the executive chair forced open the prison doors of Cuba and set free the sixty Americans who had been languishing in prison cells, owing to the weakness of the Democratic Administration, needs no strengthening at the hands of either side of this Chamber. [Applause.]

Mr. Speaker, there have been some comments made here upon the Committee on Foreign Affairs of the last House. As the chairman of the subcommittee that had charge of the subject of Cuba in that Congress, I wish to say that, while not occupying that official position now—while, in fact, not a member of any committee—I wish to state that we reported to this House a resolution which called for the protection of American property and the protection of the liberty of American citizens to the point of armed intervention. And we need no suggestion now from the Democratic side of the Chamber as to what the Republican party hould do.

Our position on this subject is declared in our platform. We stand pledged to that position, and we will carry it out. But, sir, we will do it in our own way and in our own time, and upon the suggestion of the executive branch of this Government, not at the dictation of a minority party whom the people of this country have just sent to the rear. We hold ourselves responsible, and we will meet the issue. When our Executive sends to this Congress a message asking us to provide for feeding starving Americans, we ask no suggestion from the other side of the Chamber.

We will feed starving Americans; and if gentlemen on the other side want to go on record against it on a parliamentary quibble, let them do so at their peril, and the people will hold them accountable for their actions. The people of the North and of the South will ask, Was there any objection when it was proposed to send food to Russia? Was there any objection when it was proposed to send food to India?

Nay, more. Coming right to our own homes, was there any objection when, in view of the floods in the Mississippi Valley, aid was sought here? And yet gentlemen from the other side, coming from that very section, have the effrontery to stand in this Chamber and to oppose by a parliamentary quibble, for the sake of a small political advantage, the sending of food to starving Americans in Cuba.

Mr. Speaker, this is not a question of international law. The question is not whether our country is in danger of being involved in any difficulty. Spain, that has kept at arm's length any propositions from the last Administration, has received this proposition cordially—has offered no opposition to feeding these people. Where is the necessity for any action on the part of this House to "strengthen the backbone" of the Executive? Has Spain ever accepted any proposition of any kind from the last Administration? No, sir; for she knew the weakness of the Executive; she knew she had the sympathies of the Executive and the Secretary of State on the Cuban question; and she would not have dared to hold out her hand so that this might be done. The "backbone" is there in the present Executive; and if Spain had dared to refuse this offer of America to feed her sons residing in a foreign land, the force would have been there and food would have gone, if we had been obliged to fire it down the throats of the hot-headed Spaniards. [Applause.]

[Here the hammer fell.]

Mr. BAILEY. I yield ten minutes to the gentleman from Alabama [Mr. CLAYTON].

Mr. CLAYTON. Mr. Speaker, to a plain and average American citizen it seems to be strange, if not anomalous, for time to be so precious here that this House can devote but two hours to the consideration of the important question now before us, when it is remembered that under the rule of the Republican majority we adjourned last Monday, when this matter was first presented, over until to-day. But in the brief time allowed me I can advert only to this offense against proper legislative deliberation, this prevention of free speech, and the injustice done here to the minority. And I can not hope to do more than refer to some of the features of the Cuban question.

Mr. Speaker, in the discussion indulged in here to-day, brief as it has been, there have been made some remarkable utterances. Some members of the majority who are charged with the responsibility of acting or of defeating action have said repeatedly that this Administration would extend to the Cuban patriots and to the suffering Americans in the Island of Cuba a complete remedy and a complete cessation of the ills which they endure. But when these self-constituted witnesses are cross-examined by gentlemen on this side of the Chamber and are called upon for their authority to make any such statement, they disclaim their authority; and, in the language of the gentleman from Illinois [Mr. HITT], they each say: "I have no right to speak by any authority. As one member, and speaking for myself, I have reason to believe," etc.

The country has heard too often the language of diplomacy and evasion. It has so often heard in respect to the great economic question—that of the currency—which has agitated this country for several years past, the old, old cry of "Wait, wait; don't discuss, don't agitate, and confidence, prosperity, and happiness will come to the people," until now confidence has been lost in your professions. [Applause on the Democratic side.] Let us not longer delay, but let us give the Americans in Cuba some evidence, some action, that will assure them that this great Government is not only willing to contribute the means to alleviate their present suffering, but intends to see to it that other atrocities shall not be committed.

The resolution proposed by the gentleman from Texas would doubtless do all this, while the isolated proposition embodied in the joint resolution reported by the Republican members of the Committee on Rules extends temporary succor only. The complaint against the resolution reported by the committee is not that the proposed relief is not timely and proper, but that it falls short of meeting the whole exigency of the case.

The question involved in the resolution which the gentleman from Texas, the leader on this side, attempted to offer, and has had read, is not a new one. Its favorable disposition here ought not to admit of any further delay. Is there any man in this House, is there any American anywhere, who can read the newspapers, the great disseminators of intelligence, is there anyone thus blessed who can doubt the situation in Cuba and doubt our duty to-day? I say that the proposition is not new. If you of the majority have voted down the amendment offered by the gentleman from Texas upon the ground that you have not information of a state of war in Cuba, you stultify the former House of Representatives, including the members here present who were members of that House; you stultify the Senate of the United States.

In the time of President Cleveland Congress knew of a state of war existing there. The Senate and the House by a formal concurrent resolution so declared. That resolution was reported to the Senate by Mr. Sherman, who is now Secretary of State. Since then the evidence has accumulated. So that the existence of a war in Cuba can no longer be doubted. The disclosures made in the Senate on yesterday furnish overwhelming and indisputable proof that a war does exist in Cuba. I ask that if there be any doubting Thomas let him thrust his hand into the gaping wounds laid bare by the members of the subcommittee of the Senate Foreign Affairs Committee on yesterday.

These startling and interesting disclosures are here in the RECORD and are doubtless familiar to the gentlemen on the Republican side, who tell us to wait and say to us that the President ought to postpone action until he is in possession of fuller and better information from the special agent he has sent to Cuba. I shall not consume time to read these disclosures. Suffice it to say that reports now on file in the State Department—and they have been there for some time past—show that the Island of Cuba is, in the main, not pacified, but in a state of war; that two-thirds of its territory is in possession of the Cuban insurgents; that Spain, with her vast number of soldiers—about 200,000—sent to that unhappy land within the last three years, has not been able to subdue the unconquerable patriots in that stricken island.

I am glad that the gentleman from Illinois [Mr. HITT] has added to this discussion the statement that Mr. Sagasta, who will shortly be the new prime minister of Spain, said on yesterday that the war in Cuba was substantially hopeless for Spain. Then why not pass the resolution proposed by the gentleman from Texas, a resolution that may induce the President to take some immediate and active steps toward protecting American property and interests

and American lives? Why delay when we are now informed that if the State Department should publish to the world the names of the American consuls in Cuba who have by official reports told of the conditions and horrors there it would probably bring upon these officers, entitled to all the protection that this great country can afford, Spanish violence, and perhaps death by means of the Spanish stiletto or the Spanish dagger?

I appeal to you, my Republican countrymen, not to let the center aisle in this Chamber be a dividing line between Americans for Americans in Cuba on this side and Republicans for Spain, with her bloody atrocities, on the other. No, gentlemen, when you now delay, we doubt you; and when I say we, I speak for this side of the Chamber. I say that the great common people of America, that make America great, to whom we belong, doubt your sweet and fervent pretensions.

More than two years ago this war began in Cuba. But not until yesterday did we get the fullest authentic information in the case, and we are indebted to the Senate of the United States and not to the President for this information. I might refer to the Senate of the United States as that great popular branch of the American National Legislature. [Applause on the Democratic side.] It responds more readily in these latter days to the popular will than this supposed popular branch, under Republican domination.

It is that Senate which stands to-day as the one deliberative body of the Congress; that Senate which has in the past, when all else failed, been the last refuge of the people of my beloved Southland when political passion and persecution sought to nullify their self-government; that Senate which now is our only hope against the organized rapacity of the insolent money power. No longer ago than yesterday, and I might say, I trust with propriety, in that same Senate, there was a disclosure of the attitude of the last Administration in regard to Cuba, and its offer to Spain of friendly mediation, and the rejection of that mediation. The correspondence showing what that Administration announced as its policy was furnished there. I desire to read a part of what Mr. Olney, as Secretary of State, said to the Spanish minister on April 4, 1896:

It is now some nine or ten months since the nature and prospects of the insurrection were first discussed between us. In explanation of its rapid and, up to that time, quite unopposed growth and progress, you called attention to the rainy season, which from May or June until November renders regular military operations impracticable. Spain was pouring such numbers of troops into Cuba that your theory and opinion that, when they could be used in an active campaign, the insurrection would be almost instantly suppressed seemed reasonable and probable. In this particular you believed, and sincerely believed, that the present insurrection would offer a most marked contrast to that which began in 1868 and which, being feebly encountered with comparatively small forces, prolonged its life for upward of ten years.

It is impossible to deny that the expectations thus entertained by you in the summer and fall of 1895, and shared not merely by all Spaniards but by most disinterested observers as well, have been completely disappointed. The insurgents seem to-day to command a larger part of the island than ever before. Their men under arms, estimated a year ago at from ten to twenty thousand, are now conceded to be at least two or three times as many. Meanwhile, their discipline has been improved and their supply of modern weapons and equipment has been greatly enlarged, while the mere fact that they have held out to this time has given them confidence in their own eyes and prestige with the world at large. In short, it can hardly be questioned that the insurrection, instead of being quelled, is to-day more formidable than ever and enters upon the second year of its existence with decidedly improved prospects of successful results. Whether a condition of things entitling the insurgents to recognition as belligerents has yet been brought about may, for the purposes of the present communication, be regarded as immaterial.

The Spanish Government then asked for delay on account of the rains. The rainy season has come and gone, and there is yet no peace. To-day you ask for delay on the plea of desiring to procure information. What more information do you want? You do not want to delay in this matter for the purpose of recognizing the independence of that country, but the belief is entertained by many that you wish to delay so that Spain may carry on, not the process of pacification, not the process of liberating imprisoned Americans, not the process of protecting American interests, not the process of stopping her bloody butcheries, but that you want to delay in order that the Spanish Government may carry on a war of extermination. Then, when a war of butchery shall have done its worst, the "diplomats" will come before Congress and say: "The situation has changed. We were once in favor of recognizing the belligerent rights of that country, we were once in favor of recognizing its independence, but the situation has changed." And indeed it will change, perhaps, if the United States longer submit to the outrages that are daily perpetrated upon our own citizens and are threatened against our consuls.

This resolution, proposed by the distinguished gentleman from Texas, identical in form, has been under the public eye and in the public prints and under discussion since the 1st day of April last, when it was introduced in the Senate. I will read what the author of this Senate resolution, a distinguished Senator, Mr. MORGAN of Alabama, whose learning has adorned the pages of our legislative history for nearly twenty years, said in regard to such resolution:

But our people have suffered in one respect a degree of mortification and humiliation as well as a degree of personal distress that it has always been within the power of our Government to prevent. If the Government of the United States had taken care of its own people in the Island of Cuba according to the full measure of its duty, many a life would have been saved in the former struggles and in the present one, much property would have been spared from destruction, great anguish of feeling would have been spared to our people, both native born and adopted. But the Government of the United States has not taken proper care of her own people in Cuba, and it is time that we begin to do so.

The object of the introduction of the joint resolution which is before the Senate to-day is to put the Government of the United States in a proper legal attitude toward the Government of Spain in Cuba, and to enable us simply to take care of our own citizens. I have always declared that this was my leading motive, and in fact my exclusive motive, as a Senator of the United States, in whatever support I have given to measures here in respect of our controversies and difficulties with Spain in the Island of Cuba. I have kept my mind fixed firmly and exclusively upon the duty of the Government of the United States to the citizens of the United States in the presence of this state of facts. I am trying to get from the Congress of the United States—and I hope the Executive will concur with us—a definition and statement of a legal status or situation which makes it possible for us, under the laws of nations, to protect the lives and property of our people in the Island of Cuba.

In accomplishing this result, Mr. President, it may turn out—and I would be very glad that it should—that assistance will be given to the people of the Island of Cuba in the establishment of their independence, in freeing themselves from an abominable yoke, which, so far as they are concerned, has never resulted in any benefit to the people there at all, but has been imposed upon them and maintained over them for the mere purpose of leeching out of them their substance and of keeping them as serfs and feudatories to the Crown of Spain and to the nobility and gentry of that country. I should be very glad that a result of that sort should follow; but whether that result shall follow, or one still more disastrous to the people of Cuba, nevertheless it is a duty that we can not abdicate to take care, so far as in us lies, of our people in that island.

We are willing on this side to give this relief or remedy as far as it may go, but we want some expression and some action, if need be, that will prevent further atrocities. In the one hand you offer charity, but in the other hand you ought to offer assurance that these atrocities shall not again be perpetrated. The world ought to understand, and Spain, with all her cruelties and barbarities, ought to understand, that there is an American conscience that has been quickened in behalf of suffering human beings, whether they be citizens of the United States by nativity or adoption, or patriots in the Cuban Republic. [Applause on the Democratic side.]

But, Mr. Speaker, some gentlemen on that side of the Chamber have said that the President has been in office but a few weeks; therefore let us delay any expression other than what may be implied from this appropriation of money. You did not talk that way at your convention last summer at St. Louis. You then comprehended the situation. Your President was elected upon a platform that comprehended the situation. The country understood it. Instead of affairs growing better they have grown worse. So we say, now that you have the opportunity to fulfill your promises, do not give the country more promises, but relieve the necessities of suffering Americans and give some guaranty that these atrocities shall not be repeated, that these six or eight hundred American people may return to their peaceful occupations, that they may be protected in their lives, liberty, and the pursuit of happiness.

Also, give the Cuban patriots the kindly assurance that this great Republic recognizes the march of republicanism; that on the Western Hemisphere monarchy is out of place; that it is our belief that only republics should grow and flourish on this side of the world. Let the Cuban flag float upon the high seas without danger to the Cuban patriots of being condemned as pirates and hanged from the yardarms of their vessels. Let the Cuban flag unfold to the breezes on every high sea in every clime. Let it be planted among the banners of nations. Let the Cuban patriots have their Yorktown, if they can win it by their own swords. Let them have their George Washington, and add another illustrious name to those of the apostles of human liberty. [Applause on the Democratic side.]

Mr. Speaker, I need not say that this resolution for the recognition of belligerency should not be a dividing line between the political parties, for, sir, in their conventions last summer, these parties declared for a vigorous American foreign policy, expressed sympathy for the Cuban patriots, and announced for the protection of Americans in foreign lands.

The gentleman from Illinois [Mr. HITT] has suggested that the declaration of belligerency is a serious one, and so it is. But my reply is that the gentleman himself voted for such a declaration in the last Congress, and that if the declaration is serious now it was serious then. Besides, sir, if the condition of affairs in Cuba then were such as to justify the declaration then, they more abundantly justify the declaration proposed by the gentleman from Texas now, for the conditions in that war-cursed land have not been modified by the vast army of Spain, but those conditions have been aggravated beyond the point of exaggeration.

If we were concerned a year ago in ending the war, we are much more concerned now. Behold the spectacle of the Spanish fleet guarding that little island, situated, as it is, within about 100 miles of our own shores! Witness the long and ineffectual effort of Spain to conquer the Cubans. No one on this side of the House wants war, but we wish to terminate a war which Spain can never terminate until she acknowledges the birth of the new Republic of

Cuba. We are forced to protect our own rights where Spanish impotency has failed.

Look at the Administration of Mr. Cleveland and that of Mr. McKinley sedulously and vigilantly taking care that this Government does not permit its citizens to furnish aid to the Cubans! We see monarchy endeavoring to suppress liberty by murdering its devotees. Absolutism warring for subjugation and continued oppressive taxation. Power impotent against the right. Power that can not conquer the unconquerable, and that now confessedly is unable to make secure the rights, interests, and lives of the citizens of a great and hitherto friendly nation. We can not be indifferent to the spectacle. Our country and its citizens first, and our country and its citizens in every emergency forever. Let us love the immortal sentiment of Webster, "Our country to be cherished in all our hearts; our country to be defended by all our hands." [Applause.]

APPENDIX.

We reassert the Monroe doctrine in its full extent, and we reaffirm the right of the United States to give the doctrine effect by responding to the appeals of any American state for friendly intervention in case of European encroachment. We have not interfered and shall not interfere with the existing possessions of any European power in this hemisphere, but those possessions must not, on any pretext, be extended. We hopefully look forward to the eventual withdrawal of the European powers from this hemisphere and to the ultimate union of all English-speaking parts of the continent by the free consent of all of its inhabitants.

From the hour of achieving their own independence the people of the United States have regarded with sympathy the struggles of other American people to free themselves from European domination. We watch with deep and abiding interest the heroic battle of the Cuban patriots against cruelty and oppression, and our best hopes go out for the full success of their determined contest for liberty. The Government of Spain having lost control of Cuba, and being unable to protect the property or lives of resident American citizens or to comply with its treaty obligations, we believe the Government of the United States should actively use its influence and good offices to restore peace and give independence to the island.—*From the Republican Platform* adopted at St. Louis in 1896.

The Monroe doctrine, as originally declared, and as interpreted by the succeeding Presidents, is a permanent part of the foreign policy of the United States, and must at all times be maintained.

We extend our sympathy to the people of Cuba in their heroic struggle for liberty and independence.—*From the Democratic Platform* adopted at Chicago in 1856.

We tender to the patriotic people of Cuba our deepest sympathy in their heroic struggle for political freedom and independence, and we believe the time has come when the United States, the great Republic of the world, should recognize that Cuba is, and of right ought to be, a free and independent state.—*From People's Party Platform* adopted at St. Louis in 1896.

Mr. BAILEY. I yield ten minutes to the gentleman from Tennessee.

The SPEAKER pro tempore. The gentleman has nine minutes remaining.

Mr. MCMILLIN. That is as much as I shall want.

Mr. BAILEY. I yield it to the gentleman.

Mr. MCMILLIN. Mr. Speaker, if anything can show the importance of this Congress being organized or in condition to do business, it is the fact that we are in such a disorganized state—committees not appointed—that if every man on this side of the House, and two-thirds of the men on the other side of the House wanted to pass a resolution or to adopt measures concerning Cuba or anything else, it could not be done as a matter of right.

If every man who is to be on the next Committee on Foreign Affairs were to-day here and were in favor of the adoption of a resolution recognizing the belligerency of Cuba, they could not find any way to express it. Let it not be forgotten at any stage of these proceedings that the House of Representatives, as at present constituted, is one man and two committees, and that the other members might just as well not be in Congress for the power they can have in originating or putting through legislation that does not meet with favor elsewhere.

The session drags along; important questions arise daily; the country is in a desperate condition, and yet the House is unorganized, and business can only be done by special rules, and then without any investigation by or report from a committee.

Now, sir, as to the merits of the resolution. Mr. Speaker, this is a proposition to send to destitute citizens in a foreign country supplies, without which it is said they will starve. It is a function peculiarly governmental.

It can not be done by individuals, because Spain might refuse to allow individuals to send supplies. It can not be done by the several States, because she could exercise the same authority as to the States that she could as to the individual. But when 70,000,000 American people, with the American flag, and, if need be, with an American squadron along with that flag, send those supplies, the Government of Spain dare not refuse to let us feed our starving. It is work that individuals and States can not do. What has brought about this condition of affairs in Cuba?

The Spanish Government has ordered all the inhabitants in a certain territory to come within the Spanish lines or be treated as outlaws and public enemies. This has filled the towns with half-naked or half-starved people who have been forced to leave their supplies at their deserted homes. Some here question our right to acknowledge the belligerent rights of the struggling Cubans. I can not see how they can do it. We clearly have the right, and ought without further parley to do it.

A war exists there that has taken from 150,000 to 200,000 soldiers from Spain, and they have not thus far been able to suppress what they call an insurrection.

Two hundred thousand soldiers mustered, the biggest army Spain has mustered since the Napoleonic wars, the mother country almost exhausted and impoverished, and yet we are told that no state of belligerency exists there! Suppose that the same action that has characterized us had characterized France in our war for independence, as was stated in the eloquent appeal of my friend from Alabama [Mr. CLAYTON] who has just said, "Give Cuba her Yorktown." We could not do so, because America would have had no Yorktown, and independence would at least have been deferred.

Sir, I believe in the doctrine of Thomas Jefferson, "Peace, commerce, and honest friendship with all nations, and entangling alliances with none." But I believe in that further doctrine of which he was the magnificent exponent, that the American Government has the power and the American Government ought to exercise the authority to protect every American citizen, whether he is in the Occident or in the Orient; and if I were President of the United States, there would be an American armed vessel in sight of the Cuban coast to-day. [Applause on the Democratic side.]

So far as I am concerned, I would be glad to vote for a resolution that I understand the Senate is now voting on, to recognize the belligerency of Cuba. Not belligerents, when the man, as has been told us by the gentleman from Illinois, who is to be the next premier has admitted that the war is a failure! Not belligerents, when they control two-thirds or three-fourths of all the territory of the country now! Not belligerents, when the Spaniards have been forced to drive American citizens and other citizens into the towns and herd them so that they are reduced to a state of starvation like a lot of sheep! Not belligerents, when 200,000 troops can not suppress them!

When the gentleman from Pennsylvania has the facts that have been detailed within his knowledge to-day, how can he hesitate to recognize the belligerency of Cuba? How can the gentleman from Illinois, the distinguished gentleman who was chairman of the Committee on Foreign Affairs in the last Congress, fail to support a resolution of that kind, when every intimation he has made here to-day is that the war there is a failure?

Oh, but they say that the Government of the United States ought not to declare belligerency in that territory. What, gentlemen, in your opinion, does constitute belligerency? When, in your opinion, may we declare the Cubans belligerents?

Some reference has also been made to the fact that during the Administration of Mr. Cleveland we passed a resolution here through both Houses of Congress favorable to Cuba and that he disregarded the expressed will of the people. Our friends on the opposite side criticise him for it.

I beg the gentleman to remember that the resolution faces Mr. McKinley, the present President, and ought to be just as potent with him as his predecessor. It is just as obligatory, morally and otherwise, on President McKinley to-day as it was on President Cleveland at any time.

Mr. Speaker, I do not propose to speak for other people. I do not know how others may feel upon this question; but I for one, believing that a republican form of government is that which is wisest and best for men, seeing the great progress that this great Republic has made under our free institutions, seeing what its influence has brought about in France, and that it is moving on in other countries, never expect to see the day when Cubans think they ought to be free and exhibit the power they now exhibit that I would not say Cuba is entitled to belligerent rights along with Spain. [Loud applause on the Democratic side.]

Let them have equal rights and an equal chance among our people along with Spain. Let us not help to crush Cuba by showing favoritism to Spain.

Who has not seen with sorrow the bombardment of the Christians in Crete? Who has not heard the sad wail of the dying Christians whom the oriental invaders have put to the sword? The Turk aspires to pull down the cross and raise the crescent over Mars Hill, where the lion-hearted Paul preached Christ nearly two thousand years ago. To-day the Turk has barely been halted this side of Athens. In these struggles of might against right will we sit silent?

Month after month we have sat here and allowed the cries of our citizens in Cuba to go unheeded. We have allowed the patriotic voice of a suffering and aspiring people to go unheard. We have given no greedy ear, as we should have done, to the cry that Cuba should be accorded belligerent rights and given a fair chance in her struggles for freedom. Let us make haste to undo this wrong.

Let us do what Jefferson would have done; let us do what Jackson would have done; let us do what Polk would have done, and what we will be inexcusable for if we do not do; not simply send supplies to those of our citizens who are suffering there, but, as

far as a neutral power may do, send words of good cheer to the aspiring Cubans and wish them godspeed in their great struggle. [Loud applause on the Democratic side.]

Mr. Speaker, if I have any time, I yield it to the gentleman from Arkansas [Mr. McRAE].

Mr. BAILEY. Mr. Speaker, I ask unanimous consent that fifteen minutes be allowed to gentlemen on the floor who represent the Populist party. I think it ought to be done in all fairness. I had intended to yield that much time myself, but in computing the time I found that I have made a mistake. I have conferred with the gentleman from Illinois, and he agrees that this is a reasonable request, and I therefore ask for fifteen minutes for them.

The SPEAKER pro tempore. The gentleman from Texas asks unanimous consent that the time for debate be extended fifteen minutes, that time to be controlled by representatives of the Populist party.

Mr. ODELL. I object.

Mr. BAILEY. Mr. Speaker, I appeal to the gentleman's sense of fairness. There are twenty-one members of the Populist party on the floor; and I appeal to him not to do that.

Mr. DINGLEY. I hope the gentleman will not put it on any such ground as that. Here is a question on which there is but an affirmative and negative side. The time has been equally divided, and the gentleman from Texas has controlled the time of the opposition. Now, I am entirely willing to grant this request as a matter of courtesy, that gentlemen shall have that time, but I am not willing that the gentleman shall put it on the ground of fairness.

Mr. BAILEY. Mr. Speaker, the gentleman from Maine can say that in fairness I ought to have granted the time.

Mr. DINGLEY. I agree in that.

Mr. BAILEY. But I insist that in all fairness these gentlemen are entitled to recognition.

Mr. DINGLEY. But the gentleman himself has deprived them of their right.

Mr. BAILEY. I make no point on that. My simple request is that they may be allowed fifteen minutes. I repeat the request.

The SPEAKER pro tempore. Is there objection to the request that the time for debate be extended fifteen minutes?

Mr. SHATTUC. May I ask what is the name of the Populist who is to occupy the time?

Mr. BAILEY. I ask that the gentleman from Kansas [Mr. SIMPSON] be permitted to control that time.

Mr. SHATTUC. I object.

The SPEAKER pro tempore. The gentleman objects.

Mr. BAILEY. Mr. Speaker, I ask, then, that the time for debate be extended fifteen minutes, and that I be permitted to control the additional time.

Mr. SIMPSON of Kansas. As one of the interested parties, I would like to say just one word in regard to this matter. The gentleman from Texas [Mr. BAILEY] asked me what time we wanted as the Populist party. I told him fifteen minutes. He said he would give us fifteen minutes. It seems he has already given his hour away to his side of the House, and that leaves us outside of the breastworks, so to speak. Now, Mr. Speaker, I do not want to be under obligation to the gentleman from Texas [Mr. BAILEY] or the Democratic party in this matter.

Mr. BAILEY. Then I withdraw the request. [Laughter and applause on the Republican side.]

Mr. SIMPSON of Kansas. And therefore, Mr. Speaker, I ask unanimous consent for fifteen minutes.

[Cries of "Regular order!"]

The SPEAKER pro tempore. The gentleman from Kansas asks unanimous consent that the time for this debate be extended fifteen minutes, and that the time be controlled by himself.

Mr. LACEY. Is that to be used in opposition to this resolution?

Mr. SIMPSON of Kansas. Well, I can not say. I have not consulted with all the members of my party.

Mr. ODELL and others. I object.

Mr. HITT. Mr. Speaker, if the gentleman from Kansas [Mr. SIMPSON] will accept it, I will yield to him. How much time does he desire?

Mr. SIMPSON of Kansas. Fifteen minutes.

Mr. HITT. How much does the gentleman wish for himself alone?

Mr. SIMPSON of Kansas. Ten minutes.

Mr. HITT. I yield the gentleman that much time. [Applause.]

Mr. SIMPSON of Kansas. If the gentleman from Illinois [Mr. HITT] does not object, I will yield five minutes to the gentleman from Colorado [Mr. BELL].

Mr. HITT. I have no objection.

Mr. BELL. Mr. Speaker, it occurs to me that we are about to do something that is of great importance and ought to be thoroughly considered. In the first place, it is admitted that we have about 800 impoverished American citizens in a foreign country. This fact we all deplore. We come forward and in harmony with the American spirit say we should relieve their distress. With that proposition I agree; but I want to suggest this for consideration: We are making a great many appropriations, and in this case we are making an appropriation that, unless things change, must be repeated and repeated over and over again.

Now, my friends, I want you to look at this proposition. I have information as to the condition of affairs in Cuba from an eye-witness, a man who has been in Cuba for over two months. He tells me there is no scarcity of provisions on the Island of Cuba. He ridicules the idea of our proposition to send provisions there. He says that the Americans with whom he associated (and his associations were mostly with them) ridicule the idea of Americans here trying to benefit them by sending them provisions.

He says there is no famine of provisions on the Island of Cuba; but he says there is a famine of guns and powder among the insurgents, and what they want is not to be fed in prison. And you must bear in mind, gentlemen, that if an American citizen is forced from his plantation, where he has been living in plenty, into the circumscribed military limits of a city, he is as much in prison as though he were in the stockade of the Spanish Government.

Seven hundred or eight hundred American citizens are in prison; they are not at liberty. But what they ask—so say the men who give us information from there—is that the American people shall so aid them that they may return to their plantations, where they have abundance, and enjoy the liberties of American citizens. They are noncombatants and entitled to return to their peaceful homes.

Now, suppose we make this appropriation. You contribute $50,000 to the Spanish cause. You do nothing else with this money, as they are Spanish prisoners, and Spain should be forced to care for them, feed and clothe them, until permitted to return to their homes. And bear in mind, I am going to vote for this proposition.

Mr. CANNON. Why?

Mr. BELL. Because of the fact that, as you say, our people are in distress there and must have immediate relief.

Mr. CANNON. But you say they are not.

Mr. BELL. And your party is doing this simply to avoid doing something substantial and in order to distract the attention of the American people from the real cause of the distress.

Mr. CANNON. Then why should you help us to do that?

Mr. BELL. I am willing to give those people this temporary relief, hoping that the American people will be strong enough to withstand the commercial spirit and the demands of the vested interests which are seeking to put this measure through this House to-day in order to prevent a recognition of the belligerent rights of Cuba. In this proposition nothing else speaks but those interests.

Gentlemen may talk of the backbone of their President—and I have the highest regard for him; but when it was announced in the newspapers that there would be a conference with the Cabinet preparatory to sending a message to Congress, practically every paper in this city, as well as papers throughout the country, teemed with the information that Mr. Atkinson and others came speedily to Washington to see that nothing in that message should interfere with vested rights in Cuba.

It is not any principle of humanity that actuates this resolution. There is nothing in it but a little temporary relief. It does not take the men out of prison in Cuba. And I care not what you say, a man forced within the limits of the lines of the military of Spain within an incorporated city is in a Spanish prison. Now, are you willing to say that the American people will stand by and feed those paupers in the Spanish prison? I will vote for a proposition of this kind once, but I hope I shall never have to do so again.

[Here the hammer fell.]

Mr. SIMPSON of Kansas. Mr. Speaker, in the first place, I want to acknowledge the generosity of the gentleman from Illinois [Mr. HITT] in granting me ten minutes, without which I would not have had the opportunity to be heard on this question.

I have listened to the speeches on this resolution; but I have heard very little as to the question before the House. This, as I understand it, Mr. Speaker, is a proposition to take $50,000 out of the Treasury of the United States, gathered by taxation from the people, and to give it to some supposed starving Americans in Cuba. Ordinarily I am very ready to vote for propositions of this kind for charitable purposes. I voted to send relief to the sufferers along the Mississippi. But, Mr. Speaker, that was at home. I contend that charity should at least begin at home. We have many thousands of people on the verge of starvation in this country, and it seems to me we ought first to address ourselves to their needs.

Mr. Speaker, I picked up a leading Republican newspaper the other day, in which I read an interview with ex-Postmaster-General Wanamaker, in which he gets off somewhat of a "calamity howl." At least it would be called a "calamity howl" if I should utter such words. He said:

> I confess that five years of listening to a steady stream of people passing through this office with their tales of woe, suffering, and starvation have worn upon me, and I confess, also, that I am alarmed by the increase in the numbers of that procession the last few months.

That is in the great city of Philadelphia—the City of Brotherly Love. And certainly, if anywhere in the United States, charity ought to begin there.

The gentleman from Pennsylvania [Mr. ADAMS] intimated to this House that the Republican party here want no suggestions from the minority; that in good time they will attend to all these matters concerning Cuba. That is the explanation of the violation of their platform declarations and the promises of their speakers on the stump. They promise not alone to relieve the people of Cuba, but "in their own good time" to bring prosperity to the country. When will that time come, gentlemen? You know to-day that you are in power under false pretenses. You went before the country and you said: "Elect the Republican party and you will get prosperity at once." Yet here is that prominent member of your own party, ex-Postmaster-General Wanamaker, declaring—

The country is not prosperous. Since the outset of the last Presidential campaign the party press and political leaders generally fixed the November election of 1898 as the date of the beginning of good times. A full half of the year has expired since the will of the Republican party was declared. Thus far but one of the important issues of the campaign is nearing settlement, and hardly any noticeable improvement of the wretched times is manifest.

Mr. RICHARDSON. Mr. Wanamaker does not say that.

Mr. SIMPSON of Kansas. That is the language of Mr. Wanamaker, one of the great Republican leaders, who goes down into his "bar'l" and contributes to the campaign fund every Presidential year.

Gentlemen on the other side suggest that "in good time" they will attend to all these matters. When will that bugle note be blown? Gentlemen, I want to make here and now the prophecy that that note will never be sounded until it comes from some back-stairs office of some of the sugar syndicates or bondholders' conventions. Whenever the great "property interests," as you are pleased to call them, give consent that the belligerent rights of struggling Cuba shall be recognized, then the Republican party will fall in line, will march in step to their music, and not before. [Applause.]

[Here the hammer fell.]

Mr. HITT. I yield three minutes to the gentleman from Iowa [Mr. HULL].

Mr. HULL. Mr. Speaker, of course I do not expect or desire, in the course of three minutes, to enter into any discussion of the Cuban question. I am for all proper measures looking to the establishment of a republic in Cuba. I also want to say that the zeal of our Democratic friends for the immediate recognition of Cuba is something that rather astonishes me, in view of the fact that for four years they had absolute power in the executive branch of the Government, and for a large part of that period absolute power in Congress, and yet took no steps to secure the recognition of Cuba at the hands of their own Executive.

I want to say further that this measure of relief for starving Americans should not be coupled with anything which does not relate to its distinct purpose—the immediate relief of suffering Americans in Cuba. This relief must be given out under the authority of Spain, and would be inoperative if coupled with a practical declaration of war.

Mr. Speaker, I believe that the Republicans of the United States are in favor of extending belligerent rights to Cuba after our Executive has made the fullest effort to learn all the facts on which to base action, and then it will be done in a proper and substantial way and at the proper time. Within the last three weeks the President of the United States has sent to Cuba a man of highest character and ability to gather information to be laid before the President. When this information, showing the true situation in Cuba, is submitted, we shall hear from the Executive in a special message, and the Republicans of the House of Representatives will respond by granting appropriate relief to the struggling patriots of Cuba. I believe that relief will be the recognition of belligerent rights at least.

I wish to say further, Mr. Speaker, that to expect our Republican President in sixty days to take up this question, reverse the foreign policy of the previous Administration, and enter upon an entirely new line of policy is asking something unreasonable. Our Democratic friends claim to have faith in the Americanism of President McKinley. Why not trust him? If my friend from Tennessee [Mr. MCMILLIN] is correct in his statement that no matter how strong the sentiment of this House may be on any question we can not get consideration of it when the House desires to consider it, I want to suggest to him that we need liberty here about as much as they need it in Cuba. [Laughter and applause.]

Such a statement from so able and experienced a Representative is an absurdity. The majority of the members of this House can absolutely control its action. The majority has the right and the power to block all other legislation and force the consideration of any measure at any time such majority may desire.

Mr. Speaker, this House has never yet been unable to obtain consideration of any question where the dominant sentiment of the House demanded its consideration. That dominant sentiment may not be on the Democratic side, and it certainly is not at this time. So that their failure to secure consideration is no evidence of lack of power in the majority. To say that we can not get consideration of a resolution at the proper time is nonsense, and such statements do not deceive any member of the House or any citizen of the country. [Applause on the Republican side.]

[Here the hammer fell.]

Mr. HITT. I yield ten minutes to the gentleman from Ohio [Mr. BROWN].

Mr. BROWN. Mr. Speaker, I can not fully excuse myself for seeking an opportunity to add a single word to this discussion; and I would not be willing to consume one moment of time now but for the position assumed in the speech made this morning by the Democratic leader of this House, the gentleman from Texas [Mr. BAILEY].

What, Mr. Speaker, is the subject-matter before the House? It is something coming to us in the message from the President of the United States. The statement in that message is:

Official information from our consuls in Cuba establishes the fact that a large number of American citizens in the inland are in a state of destitution, suffering for want of food and medicines. This applies particularly to the rural districts of the central and eastern parts.

The agricultural classes have been forced from their farms into the nearest towns, where they are without work or money.

Mr. Speaker, it is a source of some humiliation to me, and certainly it must be to all the members of this House who think rightly upon a question like this, that we are here to-day consuming two hours of time in the discussion of a proposition to vote relief, not to Cubans, but to American citizens in the Island of Cuba. It certainly would have been a source of pride to every member of this House if this resolution had been agreed to to-day without the adoption of any rule, and without the consumption of one minute of time. And yet such was not the fact. It would have been the source of still greater gratification if this resolution had been agreed to in this House on Monday last.

Mr. Speaker, why was it not agreed to on Monday last? It was not agreed to then for the reason that objection was made to its consideration. From which side of the House did that objection come? From this side? No, sir; it came from the other side of this House. Who was it that objected on the other side of this House to the consideration of this resolution on Monday last? Was it some gentleman who spoke for himself simply? No, sir; the objection to the consideration of this resolution on Monday last came from the Democratic leader in this House. He has seen fit here to-day, as have other gentlemen on his side of the House, to charge that this side of the House is running away from a great and important American question.

Mr. Speaker, the question that came to this House on Monday last was a question of bread, not for starving citizens of another country, but for hungry and starving American citizens. On this side of the House no member raised a voice against the immediate consideration of a question to vote bread to starving American citizens. The objection, as I say—and we all understand it, and it must go to the country in that way—the objection that came to the consideration of that question, a question of bread to starving Americans, came from the Democratic side of this House and from the Democratic leader on the other side of this House.

Now, Mr. Speaker, the resolution will be agreed to. There will be no dissenting voice; but I simply wish that it may be well understood by the country that the reason why this beneficent measure was not acted upon and agreed to on Monday last was because of the fact that it was Democratic objection that interposed.

Mr. BARTLETT. Who made the motion to adjourn on Monday, and who voted for it—Democrats or Republicans?

Mr. BROWN. The motion was made and carried for the reason that your side of the House said that we should not vote bread to starving Americans unless we at the same time engaged to take up the consideration of the question of belligerency. [Applause on the Republican side.] We were ready then to vote bread. We are ready now to do it. The responsibility for the delay rests upon you. The country understands that the reason why this resolution was not agreed to three days ago was because of your objection.

Mr. FITZPATRICK. Will the gentleman yield for a question? Are you not ready to vote for the belligerency of the Cubans?

Mr. BROWN. I shall be ready in my own good time and in the good time of this Republican Administration to meet that question.

Mr. FITZPATRICK. One other question. When will that good time come?

Mr. BROWN. That good time will speedily come, in my opinion. This Republican Administration, this American Administration, is at this moment considering the question of some sort of action with reference to Cuba, and I have no doubt, Mr. Speaker, that within its good time and within our good time——

Mr. FITZPATRICK. How long, oh, how long!

Mr. BROWN (continuing). Within our good time we will have an opportunity to express ourselves in a manner consistent with our character, as the friends of men struggling for liberty anywhere on earth. [Applause on the Republican side.]

Mr. HITT. Mr. Speaker, I ask for a vote.

The SPEAKER. The question is on the third reading of the joint resolution.

The joint resolution was ordered to a third reading; and it was accordingly read the third time, and passed.

On motion of Mr. HITT, a motion to reconsider the last vote was laid on the table.

MESSAGE FROM THE SENATE.

A message from the Senate, by Mr. PLATT, one of its clerks, announced that the Senate had passed bills and joint resolutions of the following titles; in which the concurrence of the House was requested:

A bill (S. 927) for the erection of a public building at Aberdeen, S. Dak.;

A bill (S. 995) for the relief of George M. Anderson, of the State of Nebraska;

A bill (S. 1896) to provide for the purchase of a site and the erection of a public building thereon at Salt Lake City, the capital of the State of Utah;

A bill (S. 27) for the relief of Isaac Marsh;

A bill (S. 390) to authorize the Secretary of the Treasury to settle the mutual account between the United States and the State of Florida, heretofore examined and stated by said Secretary under the authority of the Congress, and for other purposes;

A bill (S. 629) to confer jurisdiction on the Court of Claims in the case of the book agents of the Methodist Episcopal Church South against the United States;

A bill (S. 1310) making an appropriation for the benefit of the estate of William Moss, deceased;

A bill (S. 438) for the relief of the estate of Charles M. Roberts, deceased;

A bill (S. 712) for the relief of the estate of Thomas Sherwin;

A bill (S. 693) for the relief of John Veeley;

A bill (S. 240) to authorize Joseph J. Kinyoun, passed assistant surgeon of the Marine-Hospital Service, to accept a medal from the President of the Republic of Venezuela;

A bill (S. 931) to construct a road to the national cemetery at Dover, Tenn.;

A bill (S. 433) for the relief of Clara A. Graves, Lewis Smith Lee, Florence P. Lee, Mary Sheldon, and Florence P. Lee, legal representative of Elizabeth Smith, deceased, heirs of Lewis Smith, deceased;

A bill (S. 977) for the relief of Fanny B. Randolph and Dora L. Stark;

A bill (S. 956) to amend an act entitled "An act to authorize the construction of a steel bridge over the St. Louis River between the States of Wisconsin and Minnesota," approved April 24, 1894, as amended by an act approved August 4, 1894, entitled "An act to amend an act to authorize the construction of a steel bridge over the St. Louis River between the States of Minnesota and Wisconsin;"

A bill (S. 426) to authorize the construction of bridges across the Missouri River between its mouth and the mouth of the Dakota or James River; and across the Mississippi River between the mouth of the Minnesota River, in the State of Minnesota, and Donaldsonville, in the State of Louisiana; and across the Illinois and Des Plaines rivers between the mouth of the Illinois and the city of Joliet, in the State of Illinois; and to prescribe the character, location, and the dimensions of the same;

A bill (S. 665) for the relief of the heirs of certain seamen lost in the foundering of light-vessel No. 37;

A bill (S. 673) to provide for light-houses and other aids to navigation;

A bill (S. 966) providing for the establishment of a quarantine station at or near Astoria, Oreg.;

A bill (S. 1106) for the relief of the Cumberland Female College, of McMinnville, Tenn.;

A bill (S. 675) for the relief of Nancy E. Day, administratrix of James L. Day, deceased;

Joint resolution (S. R. 16) providing for estimate of cost of certain improvements of Bridgeport Harbor, Connecticut;

A bill (S. 869) for the relief of Rev. J. A. Gilfillan;

A bill (S. 536) for the relief of the trustees of the German Evangelical Church, of Martinsburg, W. Va.;

A bill (S. 1163) for the relief of Pearson C. Montgomery, of Memphis, Tenn.;

A bill (S. 262) for the relief of Calvin Gunn;

A bill (S. 226) for the relief of Napoleon B. Giddings;

A bill (S. 227) for the relief of George A. Orr;

A bill (S. 228) for the relief of Joseph W. Carmack;

A bill (S. 229) for the relief of John S. Neet, jr.;

A bill (S. 230) for the relief of John M. Davis;

A bill (S. 231) for the relief of Ezra S. Havens;

A bill (S. 232) for the relief of A. F. Fleet, superintendent of the Missouri Military Academy, Mexico, Mo.;

A bill (S. 1565) to amend and make certain the intent of section 714 of the Revised Statutes, providing for salaries of judges in certain cases after retirement;

A bill (S. 252) for the relief of William P. Buckmaster;

A bill (S. 251) for the relief of William Wolfe, of Shelbina, Shelby County, Mo.;

A bill (S. 261) for the relief of Henry J. Hewitt;

A bill (S. 677) for the relief of Richmond College, located at Richmond, Va.;

A bill (S. 273) for the relief of John F. W. Dette;

A bill (S. 272) for the relief of the heirs of James Bridger, deceased;

A bill (S. 253) to permit Anna M. Colman, a widow, to prosecute a claim;

A bill (S. 1269) for the relief of Olivia and Ida Walter, heirs and children of Thomas U. Walter, deceased;

A bill (S. 249) for the relief of St. Charles College;

A bill (S. 714) for the relief of L. Robert Coates & Co., of Baltimore, Md.;

A bill (S. 1010) for the relief of the Potomac Steamboat Company;

A bill (S. 437) for the relief of the residuary legatees of Mark Davis, deceased;

A bill (S. 936) for the relief of C. B. Bryan & Co.;

A bill (S. 374) extending relief to Indian citizens, and for other purposes;

A bill (S. 937) for the relief of James Sims, of Marshall County, Miss.;

A bill (S. 1559) for the relief of Martha A. Bagwell, executrix of Sally Hardmond, deceased;

A bill (S. 1557) to grant medals to the survivors and heirs of volunteers of the Port Hudson forlorn-hope storming party;

A bill (S. 1464) for the relief of Christopher Schmidt;

A bill (S. 1115) for the relief of the legal representatives of John Roach, deceased;

A bill (S. 661) to regulate the pay of noncommissioned officers in the Army;

A bill (S. 660) for the relief of John Stull;

A bill (S. 136) to provide for the payment of the claim of Christian M. Kirkpatrick for paving the street adjacent to the United States arsenal at Indianapolis, Ind.;

A bill (S. 436) for the relief of the Continental Fire Insurance Company and others;

A bill (S. 659) to place Francis W. Seeley on the retired list of the Army;

A bill (S. 1594) for the relief of Bvt. Col. Thomas P. O'Reilly;

A bill (S. 809) for the relief of Orin R. McDaniel;

A bill (S. 394) for the relief of Charles Fletcher, alias James H. Mitchell;

A bill (S. 1340) for the relief of John Clyde Sullivan;

A bill (S. 1194) for the relief of the estate of Richard Lawson;

A bill (S. 400) for the relief of Dorence Atwater;

A bill (S. 1273) for a public building at Altoona, Pa., and appropriating money therefor;

A bill (S. 422) to provide for the erection of a public building for the use and accommodation of the post-office at Mammoth Hot Springs, in the Yellowstone National Park;

A bill (S. 134) to provide for the purchase of a site and the erection of a public building thereon at Evanston, in the State of Wyoming;

A bill (S. 377) for the relief of Dr. S. A. Brown;

A bill (S. 432) for the relief of the heirs of Sterling T. Austin, deceased;

A bill (S. 1687) to authorize the construction and maintenance of two railroad bridges across the Mississippi River at or near the city of St. Paul, Minn.;

A bill (S. 1716) making Greatfalls, Mont., a port of entry;

A bill (S. 1357) for the relief of the legal representatives of Edwin De Leon, deceased, late consul-general of the United States in Egypt;

A bill (S. 706) to provide for the purchase of a site for and the erection of a public building at Oakland, in the State of California;

A bill (S. 1233) extending the time allowed the Blue Mountain Irrigation and Improvement Company for the construction of its reservoirs and canal in and through the Umatilla Indian Reservation, in the State of Oregon;

A bill (S. 468) authorizing the Commissioners of the District of Columbia to accept the bequest of the late Peter Von Essen for the use of the public white schools of that portion of said District formerly known as Georgetown;

A bill (S. 467) for the regulation of cemeteries and the disposal of dead bodies in the District of Columbia;

A bill (S. 1153) for the relief of John W. Lewis, of Oregon;

A bill (S. 1451) to authorize the construction of a bridge across the Red River of the North at Drayton, N. Dak.;

A bill (S. 1492) providing for the selection of the lands within Fort Pembina Military Reservation, N. Dak., by the State of North Dakota;

A bill (S. 537) for the relief of the executor of C. M. Shaffer, deceased;

A bill (S. 475) to remove the charge of desertion from the military record of Patrick Larkin;

A bill (S. 1979) to authorize the construction of a bridge across Pearl River, in the State of Mississippi;

A bill (S. 1788) to provide an American register for the barkentine *Sharpshooter*, of San Francisco, Cal.;

A bill (S. 1038) for the relief of Mobile Marine Dock Company;

A bill (S. 109) for the erection of a public building at Aberdeen, S. Dak.; and

A bill (S. 674) to provide for aids to navigation.

The message also announced that the Senate still further insisted upon its amendment numbered 10 to the bill (H. R. 15) making appropriations for the current and contingent expenses of the Indian Department and for fulfilling treaty stipulations with various Indian tribes for the fiscal year ending June 30, 1898, and for other purposes, disagreed to by the House of Representatives, had agreed to the further conference asked by the House on the disagreeing votes of the two Houses thereon, and had appointed Mr. PETTIGREW, Mr. TELLER, and Mr. COCKRELL as the conferees on the part of the Senate.

The message also announced that the Senate had passed without amendment the following resolution:

Resolved by the Senate (the House of Representatives concurring), That the President of the United States be requested to bring to the attention of the Government of Brazil the claim of Helen M. Fiedler, executrix of Ernest Fiedler, deceased, against the Govern ment of Brazil, growing out of a contract, alleged by said claimant to be obligatory on that Government, for the hire of the ship *Circassian* to transport emigrants from the United States to Brazil in the year 1867, with the view to ask said Government to consider the said claim and to provide for the allowance and payment of such sum as shall be found just to such claimant.

The message also announced that the Senate had agreed to the report of the committee of conference on the disagreeing votes of the two Houses on the amendment of the Senate to the bill (H. R. 15) making appropriations for the current and contingent expenses of the Indian Department and for fulfilling treaty stipulations with various Indian tribes for the fiscal year ending June 30, 1898, and for other purposes.

SENATE BILLS AND JOINT RESOLUTIONS REFERRED.

Under clause 2 of Rule XXIV, the following Senate bills were taken from the Speaker's table and referred to their appropriate committees, as indicated below:

A bill (S. 927) for the erection of a public building at Aberdeen, S. Dak.—to the Committee on Public Buildings and Grounds, when appointed.

A bill (S. 995) for the relief of George M. Anderson, of the State of Nebraska—to the Committee on Private Land Claims, when appointed.

A bill (S. 1896) to provide for the purchase of a site and the erection of a public building thereon at Salt Lake City, the capital of the State of Utah—to the Committee on Public Buildings and Grounds, when appointed.

A bill (S. 27) for the relief of Isaac Marsh—to the Committee on Private Land Claims, when appointed.

A bill (S. 380) to authorize the Secretary of the Treasury to settle the mutual account between the United States and the State of Florida, heretofore examined and stated by said Secretary under the authority of the Congress, and for other purposes—to the Committee on Claims, when appointed.

A bill (S. 374) extending relief to Indian citizens, and for other purposes—to the Committee on Indian Affairs, when appointed.

A bill (S. 937) for the relief of James Sims, of Marshall County, Miss.—to the Committee on War Claims, when appointed.

A bill (S. 1557) to grant medals to the survivors and heirs of volunteers of the Port Hudson forlorn-hope storming party—to the Committee on Military Affairs, when appointed.

A bill (S. 1115) for the relief of the legal representatives of John Roach, deceased—to the Committee on Claims, when appointed.

A bill (S. 661) to regulate the pay of noncommissioned officers in the Army—to the Committee on Military Affairs, when appointed.

A bill (S. 660) for the relief of John Stull—to the Committee on Military Affairs, when appointed.

A bill (S. 136) to provide for the payment of the claim of Christian M. Kirkpatrick for paving the street adjacent to the United States arsenal at Indianapolis, Ind.—to the Committee on Claims, when appointed.

A bill (S. 436) for the relief of the Continental Fire Insurance Company and others—to the Committee on Claims, when appointed.

A bill (S. 659) to place Francis W. Seeley on the retired list of the Army—to the Committee on Military Affairs, when appointed.

A bill (S. 1594) for the relief of Bvt. Col. Thomas F. O'Reilly—to the Committee on Military Affairs, when appointed.

A bill (S. 809) for the relief of Orin R. McDaniel—to the Committee on War Claims, when appointed.

A bill (S. 394) for the relief of Charles Fletcher, alias James H. Mitchell—to the Committee on Military Affairs, when appointed.

A bill (S. 1340) for the relief of John Clyde Sullivan—to the Committee on Naval Affairs, when appointed.

A bill (S. 400) for the relief of Dorence Atwater—to the Committee on Military Affairs, when appointed.

A bill (S. 1273) for a public building at Altoona, Pa., and appropriating money therefor—to the Committee on Public Buildings and Grounds, when appointed.

A bill (S. 422) to provide for the erection of a public building for the use and accommodation of the post-office at Mammoth Hot Springs, in the Yellowstone National Park—to the Committee on Public Buildings and Grounds, when appointed.

A bill (S. 134) to provide for the purchase of a site, and the erection of a public building thereon, at Evanston, in the State of Wyoming—to the Committee on Public Buildings and Grounds, when appointed.

A bill (S. 377) for the relief of Dr. S. A. Brown—to the Committee on Claims, when appointed.

A bill (S. 432) for the relief of the heirs of Sterling T. Austin, deceased—to the Committee on War Claims, when appointed.

A bill (S. 1687) to authorize the construction and maintenance of two railroad bridges across the Mississippi River at or near the city of St. Paul, Minn.—to the Committee on Interstate and Foreign Commerce, when appointed.

A bill (S. 1716) making Greatfalls, Mont., a port of entry—to the Committee on Ways and Means.

A bill (S. 1357) for the relief of the legal representatives of Edwin De Leon, deceased, late consul-general of the United States in Egypt—to the Committee on Claims, when appointed.

A bill (S. 706) to provide for the purchase of a site for and the erection of a public building at Oakland, in the State of California—to the Committee on Public Buildings and Grounds, when appointed.

A bill (S. 1233) extending the time allowed the Blue Mountain Irrigation and Improvement Company for the construction of its reservoirs and canal in and through the Umatilla Indian Reservation, in the State of Oregon—to the Committee on Indian Affairs, when appointed.

A bill (S. 468) authorizing the Commissioners of the District of Columbia to accept the bequest of the late Peter Von Essen for the use of the public white schools of that portion of said District formerly known as Georgetown—to the Committee on the District of Columbia, when appointed.

A bill (S. 467) for the regulation of cemeteries and the disposal of dead bodies in the District of Columbia—to the Committee on the District of Columbia, when appointed.

A bill (S. 629) to confer jurisdiction on the Court of Claims in the case of the book agents of the Methodist Episcopal Church South against the United States—to the Committee on War Claims, when appointed.

A bill (S. 1310) making an appropriation for the benefit of the estate of William Moss, deceased—to the Committee on Claims, when appointed.

A bill (S. 712) for the relief of the estate of Thomas Sherwin—to the Committee on War Claims, when appointed.

A bill (S. 693) for the relief of John Veeley—to the Committee on Claims, when appointed.

A bill (S. 240) to authorize Joseph J. Kinyoun, passed assistant surgeon of the Marine-Hospital Service, to accept a medal from the President of the Republic of Venezuela—to the Committee on Foreign Affairs, when appointed.

A bill (S. 931) to construct a road to the national cemetery at Dover, Tenn.—to the Committee on Military Affairs, when appointed.

A bill (S. 433) for the relief of Clara A. Graves, Lewis Smith Lee, Florence P. Lee, Mary Sheldon, and Florence F. Lee, legal representative of Elizabeth Smith, deceased, heirs of Lewis Smith, deceased—to the Committee on War Claims, when appointed.

A bill (S. 956) to amend an act entitled "An act to authorize the construction of a steel bridge over the St. Louis River between the States of Wisconsin and Minnesota," approved April 24, 1894, as amended by an act approved August 4, 1894, entitled "An act to amend an act to authorize the construction of a steel bridge over the St. Louis River between the States of Minnesota and Wisconsin"—to the Committee on Interstate and Foreign Commerce, when appointed.

A bill (S. 426) to authorize the construction of bridges across the Missouri River between its mouth and the mouth of the Dakota or James River; and across the Mississippi River between the mouth of the Minnesota River, in the State of Minnesota, and Donaldsonville, in the State of Louisiana; and across the Illinois and Des Plaines rivers between the mouth of the Illinois and the city of Joliet, in the State of Illinois; and to prescribe the character, location, and the dimensions of the same—to the Committee on Interstate and Foreign Commerce, when appointed.

A bill (S. 665) for the relief of the heirs of certain seamen lost

in the foundering of light vessel No. 37—to the Committee on Claims, when appointed.

A bill (S. 673) to provide for light-houses and other aids to navigation—to the Committee on Interstate and Foreign Commerce, when appointed.

A bill (S. 966) providing for the establishment of a quarantine station at or near Astoria, Oreg.—to the Committee on Interstate and Foreign Commerce, when appointed.

A bill (S. 675) for the relief of Nancy E. Day, administratrix of James L. Day, deceased—to the Committee on Claims, when appointed.

Joint resolution (S. R. 16) providing for estimate of cost of certain improvements of Bridgeport Harbor, Connecticut—to the Committee on Rivers and Harbors, when appointed.

A bill (S. 869) for the relief of Rev. J. A. Gilfillan—to the Committee on Claims, when appointed.

A bill (S. 536) for the relief of the trustees of the German Evangelical Church, of Martinsburg, W. Va.—to the Committee on War Claims, when appointed.

A bill (S. 1168) for the relief of Pearson C. Montgomery, of Memphis, Tenn.—to the Committee on War Claims, when appointed.

A bill (S. 262) for the relief of Calvin Gunn—to the Committee on Claims, when appointed.

A bill (S. 226) for the relief of Napoleon B. Giddings—to the Committee on Claims, when appointed.

A bill (S. 227) for the relief of George A. Orr—to the Committee on War Claims, when appointed.

A bill (S. 228) for the relief of Joseph W. Carmack—to the Committee on War Claims, when appointed.

A bill (S. 229) for the relief of John S. Neet, jr.—to the Committee on War Claims, when appointed.

A bill (S. 230) for the relief of John M. Davis—to the Committee on Military Affairs, when appointed.

A bill (S. 231) for the relief of Ezra S. Havens—to the Committee on War Claims, when appointed.

A bill (S. 232) for the relief of A. F. Fleet, superintendent of the Missouri Military Academy, Mexico, Mo.—to the Committee on Claims, when appointed.

A bill (S. 1565) to amend and make certain the intent of section 714 of the Revised Statutes, providing for salaries of judges in certain cases after retirement—to the Committee on the Judiciary, when appointed.

A bill (S. 252) for the relief of William P. Buckmaster—to the Committee on War Claims, when appointed.

A bill (S. 251) for the relief of William Wolfe, of Shelbina, Shelby County, Mo.—to the Committee on Claims, when appointed.

A bill (S. 261) for the relief of Henry J. Hewitt—to the Committee on War Claims, when appointed.

A bill (S. 677) for the relief of Richmond College, located at Richmond, Va.—to the Committee on War Claims, when appointed.

A bill (S. 273) for the relief of John F. W. Dette—to the Committee on Claims, when appointed.

A bill (S. 272) for the relief of the heirs of James Bridger, deceased—to the Committee on War Claims, when appointed.

A bill (S. 253) to permit Anna M. Colman, a widow, to prosecute a claim—to the Committee on War Claims, when appointed.

A bill (S. 1289) for the relief of Olivia and Ida Walter, heirs and children of Thomas U. Walter, deceased—to the Committee on Claims, when appointed.

A bill (S. 249) for the relief of St. Charles College—to the Committee on War Claims, when appointed.

A bill (S. 714) for the relief of L. Robert Coates & Co., of Baltimore, Md.—to the Committee on Claims, when appointed.

A bill (S. 1010) for the relief of the Potomac Steamboat Company—to the Committee on Claims, when appointed.

A bill (S. 437) for the relief of the residuary legatees of Mark Davis, deceased—to the Committee on War Claims, when appointed.

A bill (S. 1153) for the relief of John W. Lewis, of Oregon—to the Committee on Claims, when appointed.

A bill (S. 1451) to authorize the construction of a bridge across the Red River of the North at Drayton, N. Dak.—to the Committee on Interstate and Foreign Commerce, when appointed.

A bill (S. 1492) providing for the selection of the lands within Fort Pembina Military Reservation, N. Dak., in the State of North Dakota—to the Committee on Military Affairs, when appointed.

A bill (S. 537) for the relief of the executor of C. M. Shaffer, deceased—to the Committee on War Claims, when appointed.

Concurrent resolution:

Resolved by the Senate (the House of Representatives concurring), That the President of the United States be requested to bring to the attention of the Government of Brazil the claim of Helen M. Fiedler, executrix of Ernest Fiedler, deceased, against the Government of Brazil, growing out of a contract, alleged by said claimant to be obligatory on that Government, for the hire of the ship *Circassian* to transport emigrants from the United States to Brazil in the year 1867, with the view to ask said Government to consider the said claim and to provide for the allowance and payment of such sum as shall be found just to such claimant—

To the Committee on Foreign Affairs, when appointed.

A bill (S. 475) to remove the charge of desertion from the military record of Patrick Larkin—to the Committee on Military Affairs, when appointed.

A bill (S. 109) for the erection of a public building at Aberdeen, S. Dak.—to the Committee on Public Buildings and Grounds, when appointed.

A bill (S. 1038) for the relief of Mobile Marine Dock Company—to the Committee on War Claims, when appointed.

A bill (S. 1106) for the relief of Cumberland Female College, of McMinnville, Tenn.—to the Committee on War Claims, when appointed.

A bill (S. 1788) to provide an American register for the barkentine *Sharpshooter*, of San Francisco, Cal.—to the Committee on the Merchant Marine and Fisheries, when appointed.

A bill (S. 674) to provide for aids to navigation—to the Committee on Interstate and Foreign Commerce, when appointed.

A bill (S. 1979) to authorize the construction of a bridge across Pearl River, in the State of Mississippi—to the Committee on Interstate and Foreign Commerce, when appointed.

A bill (S. 1559) for the relief of Martha A. Bagwell, executrix of Sally Hardmond, deceased—to the Committee on War Claims, when appointed.

INDIAN APPROPRIATION BILL.

Mr. SHERMAN. Mr. Speaker, I present a conference report on the Indian appropriation bill.

The SPEAKER. The gentleman from New York [Mr. SHERMAN] presents a conference report.

The Clerk read as follows:

The committee of conference on the disagreeing votes of the two Houses on the amendment of the Senate numbered 10 to the bill (H. R. 15) making appropriations for the current and contingent expenses of the Indian Department and for fulfilling treaty stipulations with various Indian tribes for the fiscal year ending June 30, 1898, and for other purposes, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses as follows:

That the House recede from its disagreement to the amendment of the Senate numbered 10, and agree to the same with an amendment as follows:

In lieu of the matter inserted by said amendment insert the following:

"The Secretary of the Interior is hereby directed to at once allot agricultural lands in severalty to the Uncompahgre Ute Indians now located upon or belonging to the Uncompahgre Indian Reservation in the State of Utah; said allotments to be upon the Uncompahgre and Uintah Reservations or elsewhere in said State. And all the lands of said Uncompahgre Reservation not theretofore allotted in severalty to said Uncompahgre Utes shall, on and after the 1st day of April, 1898, be open for location and entry under all the land laws of the United States."

And the Senate agree to the same.

J. S. SHERMAN,
CHARLES CURTIS,
Managers on the part of the House.

R. F. PETTIGREW,
F. M. COCKRELL,
Managers on the part of the Senate.

The SPEAKER. The Clerk will read the statement.

The statement of the House conferees was read, as follows:

This report deals with the only remaining matter of difference between the two Houses, to wit, amendment No. 10, relating to the lands on which the Uncompahgre Indians are located.

The amendment is self-explanatory, and, as it is embodied in the report, it need not be repeated here.

Mr. SHERMAN. Mr. Speaker, I ask for the previous question on the report.

The previous question was ordered.

The SPEAKER. The gentleman from New York [Mr. SHERMAN] has twenty minutes. Does the gentleman from Iowa [Mr. LACEY] rise to oppose it?

Mr. LACEY. I rise to oppose it.

The SPEAKER. The gentleman from Iowa [Mr. LACEY] has twenty minutes.

Mr. SHERMAN. Mr. Speaker, this proposition is different from any that has yet been brought in. The first proposition submitted was for the opening of these lands, immediately upon the passage of the bill, for settlement under the mineral laws of the United States. That did not at any time meet my approval or the approval of the House conferees, Mr. Speaker, because it in no way provided for the Indians now located in that reservation. Under this amendment the Secretary is given until the 1st day of next April to locate the Indians now situated upon the Uncompahgre Reservation, and thereafter all the lands, mineral and otherwise, are open for entry under all the land laws of the United States.

After the first proposition was brought in some weeks ago the House seemed to desire that a royalty proposition should be submitted, and the conferees on the part of the House, in obedience to its apparent wish, brought in the other day a royalty proposition, which was quite promptly rejected by the House. Another royalty proposition, submitted by my friend from Iowa [Mr. LACEY], and somewhat more stringent, was offered as an instruction to the House conferees, and that was rejected; so that the conferees went back to meet with the Senate conferees uninstructed.

Mr. Speaker, the Uncompahgre Indians are located on this land in Utah under an executive order of the President. In 1880 a treaty was entered into between the United States and these Indians, then located in Colorado, under which they agreed to move from their Colorado lands over into Utah, and eventually to take allotments. Pending the time when allotment should be made to them in severalty, they were located by an Executive order on this Uncompahgre Reservation, so that they have no absolute title to that land.

Now, the proposition here is that the Secretary of the Interior shall use the lands of the Uncompahgre "Executive-order reservation," as it is called, to locate these Indians, so far as the land is sufficient, so far as it is agricultural land, and then to locate them on other land on the Uintah Reservation, the title of which is still in the United States, never having been ceded to the Uintahs. They simply have been allowed to go there under the act of 1864. There is no treaty providing for their location on that reservation.

It ought not to be a difficult matter to locate them all in severalty prior to the 1st day of April, 1898. When these Indians have all been taken care of, with their rights protected as they will be by this amendment, I believe this amendment proposes that all the lands be opened up under the mineral-land laws of the United States. It seems to me a very proper way to dispose of the matter, Mr. Speaker, and I trust that the House will take this view of the proposition.

Mr. CANNON. Will the gentleman allow me?

Mr. SHERMAN. Certainly.

Mr. CANNON. As to the so-called gilsonite lands, if this conference report is adopted, they would be subject to entry under the mineral laws, as I understand.

Mr. SHERMAN. Certainly.

Mr. CANNON. What amount could one man enter?

Mr. SHERMAN. The number of his claims is not limited under this proposition. If he located a so-called "lode claim," the size of his claim would be precisely 10 acres, if I recollect aright.

Mr. CURTIS of Kansas. Will the gentleman permit me?

Mr. SHERMAN. Certainly.

Mr. CURTIS of Kansas. I think that under the act of 1892 the number of claims was limited to two.

Mr. SHERMAN. It was by that act, and if that act is not repealed, by implication the number of claims will be limited to two. The size of the claim would be either 10 or 20 acres, depending upon the law under which the entry was made.

I reserve the balance of my time, Mr. Speaker.

Mr. LACEY. Mr. Speaker, I shall consume the time of the House but for a few minutes. This matter has been thoroughly debated in the Committee of the Whole, and the House instructed the committee of conference, or at least indicated its desire that the committee of conference should secure some sort of an agreement to prevent a monopoly of these mines, and also that the lands should be opened up under some form of lease, with a royalty coming to the Government.

The last conference report came in obedience to this instruction, or suggestion, made by the Committee of the Whole, although not made by the House; but there were some defects, in my judgment, in the form in which the amendment of the conference report came here, and therefore I, in conjunction with a number of other gentlemen in the House, opposed the amendment. There were, however, others who were in favor of giving this property away, or opening it under all the general mineral-land laws, which amounts to that.

In view of the limited quantity of this mineral, and its richness, or rather in view of the limited area in which it is found, it seemed to me that we ought to limit the amount that any individual could hold, and that there should be some royalty growing out of it to the Government. In ordinary mineral claims the discovery entitles the claimant to certain rights, and it ought to do so. He goes and finds the mineral and exploits it, and therefore he is entitled to it in compensation for his discovery, his expenditure, and his risk. In this case the mineral has already been examined.

A Government survey has been made by the Geological Survey, and all that a claimant has to do is to take possession of that part which has been pointed out under the Geological Survey as containing this valuable mineral. The last Administration refused to open up this land because of that fact, and the act of 1894 limited the claimant to two lots of 10 acres each.

This present amendment proposes to open it up without any limitation, and possibly, under the coal and stone act, the claimant could take 160 acres; and there would be nothing to prevent the Barber or any other company, by purchase, or by assignment, or by location of claims, to take all of it. Now, that ought to be avoided. The House has already fully discussed this question and understands it, and I want, in the limited time that I have, to yield some to the gentleman from Arkansas.

Mr. HARTMAN. Will the gentleman yield to me for a question?

Mr. LACEY. Certainly.

Mr. HARTMAN. The gentleman says there is some danger of this land being taken under the coal-land act. I wish the gentleman would explain to the House in what way gilsonite can be taken up as coal.

Mr. LACEY. This proposition is that all these lands shall be taken up under all the mineral-land laws of the United States.

Mr. HARTMAN. Oh, no.

Mr. LACEY. Oh, yes; it says so in terms.

Mr. HARTMAN. I think not.

Mr. LACEY. The gentleman may be right. It may be that I am not sustained in this construction. We ought not to legislate in a way so as to leave it open to any such possible construction as this. Whether that be true or not, it makes no difference—there is absolutely no difference whatever in the fact.

It says that anybody, at midnight on the night before the 1st day of April, may go on that land and take it, and I think it is well that they have designated the 1st day of April. [Laughter.] They may go on the 1st day of April and take possession of just as many claims as they can stake off, or take the whole body of it if they happen to be in ahead of others. It makes no matter whether it is 160 acres or 10 acres.

Mr. HARTMAN. Without using it in any offensive sense, does the gentleman think anybody would be fool enough to go in and take one-half of it or even one-tenth of it?

Mr. LACEY. Very well; there are a great many "fools" in this country trying to do that.

Mr. HARTMAN. Undoubtedly that is true.

Mr. LACEY. Let us "protect them against themselves."

Mr. SAYERS. I want to ask the gentleman whether or not it is his judgment that the agreement reached by the conferees is more vicious than that of any of the agreements that have been made?

Mr. LACEY. I will not say "vicious," but I think it is more——

Mr. SAYERS. I did not mean that in an offensive sense.

Mr. LACEY. I understand the gentleman did not mean that in an offensive sense; but I think this amendment as it now comes as a proposition to this House is the most objectionable form in which it has come, because the other propositions provided some limit of the number of claims, and this provides none.

Mr. HARTMAN. Will the gentleman yield to me for another question?

Mr. LACEY. I can not yield. I must yield some time to the gentleman from Arkansas.

Mr. HARTMAN. I just wanted to ask the gentleman one question. Does not the act of 1894 apply to these claims, and would not that limit them to two claims?

Mr. LACEY. I think not. I think this repeals the act of 1894.

Mr. GAINES. What is to prevent a monopoly from getting the whole of this gilsonite land?

Mr. LACEY. Nothing whatever. This proposition would encourage a monopoly. I think we would make a very great mistake to allow them such an opportunity. This matter was very fully discussed before.

Mr. GAINES. We have been trying to avoid a monopoly, and now it seeks to create one.

Mr. SHAFROTH. There is no more a monopoly in this than there is under other mineral laws. I am against a monopoly all the time.

Mr. GAINES. I am trying to prevent its being controlled by a monopoly, and I want to see what is right done.

Mr. LACEY. I want to say to our friends, there is no limit over the control of these lands which is imposed by this proposition. This land is in a peculiar situation, and I think where the tract is small, and it is of so very great richness, it should be made exceptional. While I agree with my friend from Colorado [Mr. SHAFROTH] on the general mineral-land laws, I think we are confronted with an exceptional case, and that it would be a great mistake if we did not recognize the peculiar circumstances surrounding these lands and make an exception with reference to them.

Mr. GAINES. What sort of an exception do you want to make?

Mr. LACEY. I have prepared one that I want to offer if we can vote down this conference report.

Mr. GAINES. If we vote for this proposition, then it leaves it in the hands of a monopoly to control.

Mr. LACEY. If we vote for this conference report, it would place a monopoly in control, in my judgment. I think that would be the result, and therefore we should not adopt the conference report. I yield five minutes to the gentleman from Arkansas [Mr. MCRAE].

Mr. MCRAE. Mr. Speaker, we have so often discussed this matter that I do not wish to go at length into the consideration of it to-day; but of all the propositions that have been presented by the several conference reports on this bill and its predecessor in

the last House this, in my judgment, is the worst. In the act of August 15, 1894, there is a limitation as to the area that can be located by any person. I will read it:

That no person shall be entitled to locate more than two claims, neither to exceed 10 acres, of any land containing asphaltum, gilsonite, or like substance.

The Senate amendment numbered 10, that the House disagreed to, and which disagreement we have insisted upon more than once, is as follows:

That the mineral lands of the Uncompahgre Indian Reservation, in the State of Utah, are hereby declared open to public entry under the mineral-land laws of the United States, and no one person shall be allowed to make more than one claim on lands containing gilsonite. And on and after January 1, 1898, all of said reservation unallotted to Indians shall be open to public entry under the land laws of the United States.

The pending report, if adopted, will strike out that amendment and insert the following:

That the House recede from its disagreement to the amendment of the Senate numbered 10, and agree to the same with an amendment as follows: In lieu of the matter inserted by said amendment insert the following:

"The Secretary of the Interior is hereby directed to at once allot agricultural lands in severalty to the Uncompahgre Ute Indians now located upon or belonging to the Uncompahgre Indian Reservation, in the State of Utah, said allotments to be upon the Uncompahgre and Uintah reservations or elsewhere in said State. And all the lands of said Uncompahgre Reservation not theretofore allotted in severalty to said Uncompahgre Utes shall, on and after the 1st day of April, 1898, be open for location and entry under all the land laws of the United States."

And the Senate agree to the same.

It will be seen from this that the result will be that all limitations upon the locations and holdings are to be removed. Except that the original Senate amendment does not provide for allotment to the Indians, it is a better provision than this one, and I would prefer to vote to concur in it than to adopt this report. Some gentlemen do not appear to understand that under the general mining laws there is no limit to the number of claims that can be located by each claimant. Each claim is limited in area to about 20 acres, but as many locations can be made as the applicant is willing to work or pay for.

The amount of work required on each claim each year is $100 worth. If the assessment work, which is exacted as evidence of good faith on the part of the locator, is performed, he can hold it indefinitely without the payment of anything for the land. And so under this proposition the Government may never get anything for this deposit which was discovered by its officers in their official capacity.

If, however, the locator of the land sees fit to take the title from the Government by a patent to him, he is only required to pay $5 an acre, but that is not necessary if he is willing to go on with his operations. So you see there is no limit as to the number of claims that any individual can take; there is no requirement that he shall pay for the land unless he prefers to do so. It is true that the most of the rich mines are patented, but never until shown to be valuable.

Mr. GAINES. Is there anything to prevent one person from going there and making claim of a large quantity of land for himself and others?

Mr. McRAE. There is nothing to prevent that being done if desired. I state as my deliberate judgment that this provision, if passed, will repeal the act of August 15, 1894. It will do what it undertakes to do—open the lands containing this particular deposit to entry under the general mining laws, and will repeal all laws inconsistent with them. As I said last Monday, I am not much in favor of renting these lands for royalty or in any way. And yet, in view of the fact that the discovery has been made, and the value of the deposit is known, and in view of the fact that a monopoly can be easily secured under the operation of the general law, I am not willing to see this particular reservation opened in that way.

I shall, therefore, if this report is voted down, support the amendment in the nature of instructions proposed by the gentleman from Iowa, providing for the leasing of these lands upon a rental to be fixed by the Secretary of the Interior. It vests a large discretion in that officer, but I think that better than to give the land away for nothing.

Mr. GAINES. Does that amendment arrange matters so that the monopolists can not get hold of the property?

Mr. McRAE. Certainly; at least that has been our purpose in formulating it, and if honestly administered and fairly construed I think it will prevent monopoly. I appeal to gentlemen here who want fairness and justice done to the Government in this important matter and who want these deposits protected for all the people to defeat this conference report.

Mr. LACEY. I now yield three minutes to the gentleman from Illinois [Mr. COOKE].

Mr. COOKE. Mr. Speaker, I hope the House will vote down the conference report, for the reason that it allows this very peculiar and limited body of mineral to be so disposed of that it may fall into the hands of private monopolies. We ought to guard the interests of the Government in this matter, because this product, in the nature of asphaltum, is very limited in quantity and may become exceedingly valuable to the various cities and towns of the United States that may want to use it in paving their streets.

As there is no other known deposit of gilsonite having a commercial value in the United States, the region containing it being only about 10,000 square acres, its total market value, however, being many millions of dollars, as it is alleged, and as it is almost certain to find its way into the hands of a monopolizing company if the lands are allowed to be acquired in fee, it ought not to be open to purchase under the land or mineral laws of the United States. It ought to be preserved from the hands of monopolists, that the product may find its way at as low a price as possible into the open markets.

The gentleman from Iowa [Mr. LACEY] has prepared an amendment which he intends to offer if the report is voted down, giving full authority to the Secretary of the Interior to lease the lands containing gilsonite, etc., without much restriction of the power so given. That amendment, I think, ought to prevail over the conference report. It is a safe provision, though it places large power in the hands of the Secretary. I should really prefer, however, to prescribe by law certain limitations for the leases, as to the main features thereof, at least. On account of the hoarse condition of my voice, I am unable to continue my remarks in explanation of the amendment I should prefer to see adopted. I will therefore send to the desk to be read in my time the amendment itself, which I shall be glad to have adopted, unless the House shall prefer that to be offered by the gentleman from Iowa [Mr. LACEY].

The Clerk read as follows:

Provided, That the title to all lands containing gilsonite, elaterite, asphaltum or other like substances shall remain in the United States; and the Secretary of the Interior is authorized to lease said lands, in legal subdivisions of not to exceed 160 acres to any one tenant, for a term of not to exceed ten years, to the highest and best bidders therefor, upon such security for the payment to the United States of the rental of such lands as shall be prescribed and approved by the Secretary of the Interior; and the Secretary of the Interior is authorized to make regulations for the offering of said reserved lands to bidders for such leases, and for the enforcement of the terms of such leases: *And provided further*, That no person, partnership, or corporation shall hold or enjoy by assignment or otherwise the right to the use or possession of more that 160 acres of such reserved lands under or by virtue of the leases hereby authorized to be made.

Mr. LACEY. I now yield three minutes to the gentleman from Alabama [Mr. UNDERWOOD].

Mr. UNDERWOOD. Mr. Speaker, I have already stated to the House my objection to opening this land under the general mineral-land laws. Some days ago the conference committee brought in a proposition that was far more acceptable than this one to those of us who are unwilling to perpetuate a monopoly in what are practically the only asphaltum beds in this country. In pursuance of the mineral laws, under which it is proposed now to open these lands, these companies who may desire them can go there and take not only one claim, but every claim.

There is no provision whatever for preventing or limiting monopoly control of these lands, which are to furnish the asphaltum needed for paving our streets. I feel that as long as we have cities to develop, as long as we want to beautify and decorate our towns, we have no right to thus give away these deposits; for that is what it means. If you open these lands under the mineral laws, as proposed in this report, you practically give away a tract of land which a Government expert has said is worth a million of dollars—you give it away to certain syndicates or combinations of persons when the people of your different districts or communities need this material for cheap paving. I understand that the gentleman from Iowa [Mr. LACEY] will introduce a resolution which will have a tendency to prevent any monopoly from getting hold of this property.

As a general proposition, I do not believe that the leasing system is a good one for the Government. I do not contend that it is wise for us to put our gold and silver mines under a leasing system. But all good rules have their exceptions; and when we find a tract of land containing mineral deposits so useful and beneficial to the people of the United States as will be this asphaltum deposit, I say that, even though it be an exception to our general policy, Congress, instead of throwing this land open to monopolies or syndicates, should look to the interest of the people of the United States and establish safeguards for the development of this property so as properly to care for the people of future generations.

Mr. LACEY. Mr. Speaker, how much time have I remaining?

The SPEAKER pro tempore. Three minutes.

Mr. LACEY. I yield the remainder of my time to the gentleman from Wisconsin [Mr. COOPER].

Mr. COOPER of Wisconsin. Mr. Speaker, the statement made by the chairman of the committee, that this amendment is a great improvement on what was originally proposed, seems to me, while not intentionally misleading, to be a clear misstatement of the facts. The original amendment was to this effect:

That the mineral lands of the Uncompahgre Indian Reservation, in the State of Utah, are hereby declared open to public entry under the mineral-land laws of the United States, and no one person shall be allowed to make

more than one claim on lands containing gilsonite. And on and after January 1, 1898, all of said reservation unallotted to Indians shall be open to public entry under the land laws of the United States.

By this provision the asphaltum land to be taken by any one individual was limited to one claim—two, I think, in the original amendment, and one as it came back to us. Under the amendment as now agreed upon by the conference committee, the amount of asphaltum land which may be taken up under any one claim or by any one monopoly is unlimited.

Moreover, this allotment of the Indians has been characterized by Lieutenant-Colonel Randlett, in speaking of an amendment which was supposed to have been passed by the last Congress, as calculated to work an outrage upon the Indians because there was not, as he said, enough of agricultural lands there to be allotted in proper proportions to the Indians on this reservation; and while there might be enough land on the other, yet time ought to be given for the Government to make inspection and to ascertain the facts; that to go to work and allot lands to the Indians on those reservations, without regard to their rights, would be, in fact, an outrage upon their rights.

The gentleman from Colorado interrupted a moment ago to propound the question whether we wanted any such laws with regard to the gold mines of the country as we now propose to apply to these gilsonite deposits. I say no, because there can not be any monopoly of the gold mines. They are scattered here, there, and everywhere, all over the Western country. But this is the only body of gilsonite or asphaltum land in the United States; it can be acquired by a very few persons, and an absolute monopoly of it secured and maintained. In making this statement I rely upon official reports of Government officers.

Mr. SHAFROTH. Does not the gentleman know that there are gilsonite beds in California and in Colorado and in the Indian Territory, besides these in Utah?

Mr. COOPER of Wisconsin. I am surprised that the gentleman from Colorado keeps asking a question which has no relevancy or pertinency. If the facts are as he states, there has not been anything for years and years to prevent anybody opening up those asphaltum mines in Colorado and California. They stand in a different situation from the mineral deposit on this reservation. Why have not those deposits in Colorado and California been opened up years ago?

Mr. SHAFROTH. The reason is that they are not worth development.

Mr. COOPER of Wisconsin. But we are talking about these deposits in Utah, which are worth much, according to the statements of agents of the Government. These deposits amount to 23,000,000 tons, making a valuation of over $30,000,000, as stated by the gentleman from Maine [Mr. DINGLEY].

[Here the hammer fell.]

Mr. SHERMAN. I now yield five minutes to the gentleman from Kansas [Mr. CURTIS].

Mr. CURTIS of Kansas. Mr. Speaker, I hope this conference report will be agreed to. I disagree with gentlemen who say that there is no difference between the amendment as now proposed and the amendment as it first came from the Senate. This amendment proposes to prevent any monopoly from taking possession of the gilsonite beds on this reservation in Utah. The other amendment provided for the opening of the lands in such a way as would permit a monopoly to take possession of all of them.

By this amendment one year is allowed for the opening of these lands, giving the poorest man in the country ample opportunity to go there and take a claim. The very fact that the time for opening this reservation is put off one year gives every man in the country an opportunity to take a mining claim.

Mr. McRAE. Does not the gentleman know that the Senate amendment, upon which all this controversy arose, fixes January, 1898, as the date for opening this reservation?

Mr. CURTIS of Kansas. It was not the mineral lands that were to be opened, but the agricultural lands.

Mr. McRAE. No. I have the provision here. The last clause reads:

And on or after January 1, 1898, all of said reservation unallotted to Indians shall be open to public entry under the land laws of the United States.

Mr. CURTIS of Kansas. But that never was passed.

Mr. McRAE. That is the amendment now pending.

Mr. CURTIS of Kansas. I beg the gentleman's pardon.

Mr. McRAE. The gentleman will find that I am correct.

Mr. CURTIS of Kansas. I think not. Now, another thing. In the first place, the conferees on the part of the House objected to the original amendment because it made no provision for the Indians. The Indians on that reservation are entitled to take allotments. By this amendment about one year is given the Department in which to allot the lands to the Uncompahgre Indians. After that is done, the remainder of the reservation is to be opened up for settlement under the mineral laws of the United States.

I do not agree with the lawyers on this floor when they say that this amendment repeals the act of 1894. In our practice out West I have always understood that where there are two different laws applying to the same subject they are to be construed together if possible. There is nothing in this amendment which directly repeals the act of 1894. Therefore the claims which may be taken by any one individual are limited in number to two—virtually to one—because the act of 1894 contains a limitation of two 10-acre claims.

The gentlemen are surely mistaken when they claim that these are the only asphalt beds in the country.

Mr. UNDERWOOD. On what authority does the gentleman make the statement that under the general laws a party will be entitled to two 10-acre claims?

Mr. CURTIS of Kansas. Under the act of 1894, which applies to this reservation.

Mr. UNDERWOOD. But this proposition repeals the law of 1894.

Mr. CURTIS of Kansas. Oh, I beg your pardon; I do not believe that it repeals the law of 1894. The provision of that law of 1894 is that no person shall be entitled to take more than two claims.

Mr. UNDERWOOD. Where does the gentleman get his authority for the belief that the Government has ever classed asphaltum as coming within the mineral laws that provide for the location of fissure veins?

Mr. SHAFROTH. Because it is found in true fissure veins.

Mr. CURTIS of Kansas. The gentleman from Colorado has answered the question.

Mr. UNDERWOOD. Well, but a coal seam may be in a fissure vein. It is not the shape of the vein that determines the law under which it may be located.

Mr. SHAFROTH. The law expressly limits a coal-mining claim to 160 acres, but the asphaltum, being found in true fissure veins, must be located under the mineral laws applicable to gold and silver mining.

Mr. CURTIS of Kansas. Further, Mr. Speaker, there are beds of gilsonite in Utah outside of this reservation. It is found in Texas, Colorado, and in the Indian Territory. A treaty has just been made with the Chickasaws and Choctaws, wherein they provide for the disposition of gilsonite on their reservations. It is there in vast amounts. It is found in California and in Montana, and within a week it has been discovered in southern Kansas. The gentleman says, "Why were not these beds opened up before?" I might ask the same question in regard to the gilsonite in this Indian reservation.

The SPEAKER pro tempore. The time of the gentleman has expired.

Mr. SHERMAN. I yield five minutes more to the gentleman.

ENROLLED JOINT RESOLUTION SIGNED.

The SPEAKER announced his signature to an enrolled joint resolution of the following title:

Joint resolution (S. R. 42) appropriating $50,000 for the relief of suffering American citizens in the Island of Cuba.

INDIAN APPROPRIATION BILL.

The consideration of the conference report on the Indian appropriation bill was resumed.

Mr. CURTIS of Kansas. The gilsonite beds in these other places were not worked for the same reason that those on the Uncompahgre Reservation were not prior to 1880. These Indians were not placed upon this reservation until after 1880. The reason was that people did not know about it. It is being discovered now in various parts of the country.

I do not believe in the Government exacting a royalty. I do not believe in the system of leasing mineral lands by the Government. I believe that the gilsonite beds should be opened just the same as the gold and silver mines of this country are.

I want to say to Republicans and Democrats alike, if you adopt the policy of leasing the gilsonite lands of this country, that policy will stare you in the face ever after, and the people will come here, Congress after Congress, and ask you to apply it to the coal mines of the country, to the gold mines of the country, to the silver mines of the country, and to all other mineral lands.

Now, the conference committee has worked hard to get an agreement. We believe that this is the best that can be done, and, speaking for myself, I want to say that from the first I have believed that this matter should be settled in this way: First the Indians should be taken care of, and then after reasonable notice the gilsonite lands should be opened for settlement, and all should be given an equal opportunity to secure a claim.

Mr. COOKE. Then the gentleman has not struggled very hard against the other conferees.

Mr. CURTIS of Kansas. We have had several meetings and brought in two or three reports. One of the amendments was along the line suggested by the House, but it was not accepted. The result of the vote on the last conference report showed that the House did not desire to instruct us. I hope this conference report will be agreed to.

Mr. SHERMAN. Just one word, Mr. Speaker. I will not detain the House long. The gentleman from Wisconsin [Mr. COOPER] says that I said this report was better than the last. I did so state, Mr. Speaker, that it was better for the Indians. He quotes the report of Major Randlett, in which he says that the original proposition, as passed by the Senate, was an outrage upon these Indians. I thought so, Mr. Speaker, and that is why I opposed it just as strenuously as I could, all the way through. It was an outrage upon the Indians. This report is not. This provision takes ample care of all the rights of the Indians before it disposes of a foot of this land, and that is what we want; that is what we of the Indian conference committee of this House have been contending for all the way through.

By this amendment the rights of the Indians are cared for. Every single Indian is given his allotment in severalty before the balance of this land is opened up under the general land laws of the United States. Now, my friend from Alabama [Mr. UNDERWOOD] says that this proposition that is now here is not so good as the one that came in the other day. Perhaps my friend is right about that; but let me call his attention to the fact that the proposition which came in the other day was rejected by this House by a majority of more than two to one, and that thereafter, when the gentleman from Iowa [Mr. LACEY] offered a proposition as an instruction, which I believed was better even than what we succeeded in getting in the conference committee—when he offered his instruction to the conferees, the House rejected that.

Mr. Speaker, the conferees have done their best to carry out the wishes of the House, and have brought back here a proposition which we thought was in accord with their wishes, and have seen it stricken down by a vote of two to one. We have seen on two different occasions the House refuse us instructions as to what we should do; and we have done the very best we could and have finally come here with a proposition which opens these lands under all the land laws of the United States; and for the life of me I see no reason why this particular body of land in the State of Utah should be opened up differently from what all the other lands of the United States have been opened up in the last twenty-five years. I think the proposition is a fair one, Mr. Speaker, and I hope the House will adopt it; and I ask for a vote.

The SPEAKER. The question is on agreeing to the conference report.

The question was taken; and the Speaker announced that the noes seemed to have it.

Mr. SHERMAN. Division, Mr. Speaker.

The House divided; and there were—ayes 56, noes 64.

So the conference report was disagreed to.

Mr. SHERMAN. Mr. Speaker, I move that the House concur in the Senate amendment; and I desire to say in making that motion that I do not make it in the hope that the House will pass it in just that form, but I do it in the hope that the proposition will be so amended that something will be agreed upon, so that the Senate will recede and accept the desires of the House.

Mr. CANNON. May I ask the gentleman a question?

Mr. SHERMAN. Certainly.

Mr. CANNON. I desire to know if the conferees of the House believe that the Senate would accept an amendment ceding these lands to the State of Utah?

Mr. SHERMAN. I will say this, Mr. Speaker, that the chairman of the conference committee on the part of the Senate said to us the other day that if this report was returned, that whatever came back to the Senate as the will of the House he should move that the Senate accede to it, and then, if that motion failed, he would then move that the Senate recede from the entire proposition.

Mr. LACEY. Now, Mr. Speaker, I move to substitute for the motion of the gentleman from New York the following.

The SPEAKER. The gentleman from New York moves to recede from the disagreement and concur in the Senate amendment, and the gentleman from Iowa moves to concur with the following amendment, which the Clerk will read.

The Clerk read as follows:

Concur in Senate amendment numbered 10 by striking out the same and substituting the following inlieu thereof:

"The Secretary of the Interior is hereby directed to allot agricultural lands in severalty to the Uncompahgre Ute Indians now located upon or belonging to the Uncompahgre Indian Reservation in the State of Utah, said allotments to be upon the Uncompahgre and Uintah reservations or elsewhere in said State. And all the lands of said Uncompahgre Reservation not theretofore allotted in severalty to said Uncompahgre Utes shall, on and after the 1st of April, 1898, be open for location and entry under all the land laws of the United States; excepting, however, therefrom all lands containing gilsonite, asphalt, elaterite, or other like substances.

"And the title to all of the said lands containing gilsonite, asphaltum, elaterite, or other like substances is reserved to the United States.

"And the Secretary of the Interior is authorized to lease the said reserved lands containing said minerals; said leases to be upon such royalty as the said Secretary may determine to be reasonable, and said leases to be for such periods, not exceeding ten years, as he may determine; and regulations and limitations shall be provided by the Secretary as to the amount of lands embraced in each lease, or as to assignments of said leases, so as to prevent any monopoly of said minerals; and the Secretary will make all such rules and regulations as may be necessary for the purpose of carrying out the objects of this act."

The SPEAKER. The question is on agreeing to the amendment proposed by the gentleman from Iowa.

Mr. CANNON. Is that in the nature of an instruction?

The SPEAKER. As the Chair understands it, it is a motion to recede and concur with the following amendment, to strike out and insert.

Mr. CANNON. Is that open to discussion? I would like to have just a minute to say——

Mr. SAYERS. Mr. Speaker, I should like to ask the gentleman from Iowa if there is anything in that amendment which he proposes that would prevent either two, three, or four men from combining together and obtaining control of the whole tract?

Mr. LACEY. The amendment proposes, and expressly says, the Secretary of the Interior shall make such regulations as will prevent a monopoly. That leaves the question as to the size of the leases in his discretion, to make them large enough to work, and yet divide them sufficiently to prevent a monopoly. After a consultation with the gentleman from Arkansas [Mr. MCRAE] and others who have given this matter thought, it was deemed best to not attempt to define the exact size of these claims, that there are many things that we can hardly understand with respect to this legislation, and it will be safer to leave a wider discretion in the Secretary than would be involved in the proposition to give a certain number of acres, that may not be enough for them to proceed to do the work, and the leases have been limited to ten years, so that if there is any mistake it can be corrected. It is not as irremediable as would be the effect of adopting the amendment proposed by the conference committee.

Mr. SAYERS. I understand the gentleman to say that he has submitted it to the gentleman from Arkansas [Mr. MCRAE], and it has his approval.

Mr. LACEY. I submitted this to him, and made some alterations at his suggestion.

Mr. CANNON. I only want a minute to say——

Mr. LACEY. I yield such time as the gentleman desires.

Mr. CANNON (continuing). That this is the Indian appropriation bill. There seems to be no difference about the House and Senate agreeing upon the amount of money for the Indian service for the coming fiscal year. The House very wisely has provided by its rules that appropriation bills shall not carry legislation. Now, the history of this bill shows the absolute wisdom of that rule. It goes to the Senate, and they proceed to put legislation upon it. It comes back to the House, is considered, and the difference between the House and the Senate is touching legislation. Time and again the conference report is turned down.

Now, what ought to be done, in my judgment, is that the House and Senate should stop this matter of general legislation upon supply bills; and in this case, if an agreement is not practical, I should be very glad indeed to see all legislation stricken out of this bill touching this matter. Now, there is no one who has a greater respect for the gentleman from Iowa than I have. I know of his industry and ability, and also that of the gentleman from Arkansas, but they can not, sir, know all things. No committee that originates a general appropriation bill can be equipped all along the line touching matters of legislation that should come from forty or fifty different committees.

I do not know what is to be the end of this controversy. I must confess——

Mr. LACEY. Will the gentleman yield for a suggestion?

Mr. CANNON. Yes, sir.

Mr. LACEY. Possibly the remarks of my friend from Illinois may be misunderstood. The action of the gentleman from Arkansas [Mr. MCRAE] and myself, in taking active interest in this Indian bill, was not intended as an intrusion into a subject which we had not been considering or had not acted upon in the past. But land legislation—legislation which would appropriately have gone to the Committee on Public Lands, of which we were members in the last Congress—was incorporated in this bill by the Senate. Therefore, at the suggestion of gentlemen who were members of the former Indian Committee, we have conferred and acted upon this subject with them, endeavoring to aid them. Unfortunately they and we have not agreed. They have taken one view—the view adopted by the Senate—while we have taken a different view. And the House has thus far agreed with us, or rather, we have agreed with the House. I only make this statement because the remark of the gentleman from Illinois might otherwise be misunderstood by some gentlemen not familiar with the situation.

Mr. CANNON. I am not criticising the gentleman from Iowa. On the contrary, I concede his knowledge and good judgment, especially touching matters of which the Committee on Public Lands of the last Congress had jurisdiction. I am simply trying to emphasize the impropriety of loading up these various supply bills with legislation. I should be glad indeed if in this matter the conference committee could agree to strike out from the bill all legislation, allowing the various committees which had charge of these several matters in the House and the Senate to perform their appropriate functions.

I appreciate the ability of the gentlemen. I have the honor to be serving as a conferee of this House on the sundry civil bill, carrying provisions under existing law which run into almost every branch of the public service, that could have been agreed to and would have been agreed to promptly were it not that the Senate, in defiance of the rules of that body and of this House, has placed upon the bill legislation about which the House conferees, charged with matters of appropriations purely, have no adequate knowledge, so that in our weakness and ignorance we have been compelled to turn to the eminent gentlemen from Iowa [Mr. LACEY] and Arkansas [Mr. MCRAE] for counsel; and with their help we are proceeding as best we can.

But under these circumstances a great bill, carrying forty or fifty million dollars, is held up upon items of legislation which the committees on appropriations of the House are not charged with and of which they have not sufficient knowledge to deal with them properly. I trust the time is not far distant that this House, as a matter of practice, when its bills come back loaded with general legislation, which is sought to be put through by reason of the need of the Government for appropriations, will lay such bills on the table. [Applause.]

Mr. LACEY. I yield five minutes to the gentleman from Arkansas [Mr. MCRAE].

Mr. MCRAE. Mr. Speaker, I indorse what the gentleman from Illinois [Mr. CANNON] has said with respect to new legislation on appropriation bills. This Senate amendment has no business here. I have repeatedly stated in this House what I believe is true, that almost all the objectionable land legislation which has passed Congress, and about which they have complained since I have been in Congress, has been such as has been, like this proposition, put upon appropriation bills contrary to the rules of the House and the Senate.

I believe that the best and most speedy solution of this whole matter would be that the Senate recede from its amendment and leave the law as it now is, and let the Interior Department proceed with the allotments. There is no necessity for any haste about this matter. The allotments have not been made and the reservation ought not to be opened until this is done. The provisions of the act of August 15, 1894, on this subject are better than anything that has been proposed by the conferences; yet it is not as good as it ought to be.

There would come no great calamity to the people if this whole provision should fail by the Senate receding from its amendment, because the reservation will still be there; the gilsonite will remain untouched, and can be disposed of under that act as soon as the allotments are made.

If that could be accomplished, it would, in my opinion, be a good solution to this controversy; and if any further legislation is needed, let it be formulated by the Public Lands Committee when appointed. At any rate, this bill ought not to be held up for such propositions that have no business upon it.

Mr. LACEY. I now yield five minutes to the gentleman from Utah [Mr. KING].

Mr. KING. Mr. Speaker, it does seem to me that some misapprehension exists on the part of the distinguished gentleman from Iowa and some other members of this House in regard to the manner of operating mines. If the amendment suggested by the gentleman from Iowa should prevail, if this instruction should be given and the provision proposed by him be embodied in the bill, it means the absolute destruction of that branch of the mining business to which it applies.

No person will lease mineral lands and incur expense in their development when the title is not in them and when such restrictions are imposed as suggested in the proposed amendment. I come from a mining State and I am somewhat familiar with mining operations, and I can assure gentlemen from a knowledge of the system of mining and the methods which prevail among mining men that you can not upon leased public lands have such developments made as will be advantageous to the public and bring to the people the mineral wealth which the lands contain.

Persons will be reluctant, if not unwilling, to spend ten, twenty, or one hundred thousand dollars to develop a mine when the title is not in them, and if they do lease a portion of the public domain for the purpose of extracting ore, they will obtain the ore without providing proper protection for the mine. If it needs timbering, as many mines do, they will gopher (to use a mining expression) from the ground as quickly as possible and at the least possible expense the ore which is in sight; and when the lease expires there remains a mine that can not be operated unless tens of thousands of dollars perhaps are expended in order to put it again in workable condition.

If the proposition of the gentleman from Iowa should prevail, it will mean this: Assuming that the mines are as valuable as my friend from Alabama represents them to be, a man will go upon the public domain and will extract as quickly as possible all the ore that is in sight. He will not timber the mine; he will not protect it; he plans only for the present, treats the property as belonging to another, is willing to sacrifice and destroy if only immediate profits are obtained, and when his lease expires the Government will have a mine that is despoiled and robbed and plundered handed back, valueless and bankrupt. And before it can be leased again to any advantage or profit—before anybody else will undertake to develop it further—thousands and tens of thousands of dollars must be expended in order to make mining operations safe or to perform the necessary development work before the mineral wealth can be extracted.

Mr. UNDERWOOD. If the Government makes the lease, has it not the power to provide in the lease protection against the very difficulty which the gentleman anticipates?

Mr. KING. I take it that the Government will not exercise greater care over mining property than an individual usually does. I have known mines to be leased by private persons, and in the leases most drastic provisions would be inserted for the preservation of the mines.

But almost invariably, when the mine was turned back to the landlord or lessor, it proved to be "gutted" and "gophered" and unprotected, so that a large expenditure was necessary in order to prepare it for safe and profitable explorations and development. And when you place in the hands of the Secretary of the Interior lands two or three thousand miles away, when you attempt to operate those mines under the surveillance of the Government, can you expect better results than accrue when mines are operated under the direct supervision of the owner?

With officials constantly changing, with the mutations coming to governments, with the ignorance of Government employees, can you predict for this obnoxious, infamous, damnable system of leasing advantage or revenue to the Government or benefit to the public?

Besides, sir, the amendment offered by the gentleman from Iowa imposes no restriction upon the Secretary of the Interior. He can create a monopoly; he can indulge in favoritism; and we know too well that the interests of the people have not been subserved or guarded by committing to administrative and executive officers such unlimited powers.

Let me tell you, gentlemen, that in my humble opinion it is a slander upon the American Congress to say that it can not legislate upon these matters, but must relegate to executive officers the control of this property of the Government. Can not the American people be trusted? Are not the treasures of earth and the broad domains of our great nation the inheritance of the people? Open these lands to the American people.

Do not introduce feudalism. Do not revive mediævalism. These lands are the patrimony of the people, and it is violative of the spirit of our institutions to treat them as tenants and vassals, paying tribute to the petty minions of the law that harass and annoy or abuse their powers, and uphold nepotism and introduce favoritism, so that the select and chosen may obtain possession and the worthy and poor be rejected and driven out.

I had the honor a few days ago to refer to eminent statesmen like Frémont, of California; Seward, of New York, and Benton, of Missouri, who had condemned in unmeasured terms the system of leasing mineral lands, and who had stated that wherever that system had prevailed the most disastrous results had accrued. In the Senate in 1851 they animadverted upon the evils of the leasing system, and in an elaborate discourse showed conclusively, as did other Senators, that when the Government undertakes to lease the public domain and undertakes to go into the mining business in partnership with private individuals, scandals, frauds, and wrongs are perpetrated, to the disgrace of the Government and the injury of the people. [Applause.]

[Here the hammer fell.]

Mr. LACEY. I ask for the previous question.

The previous question was ordered.

The SPEAKER. The question is upon the amendment of the gentleman from Iowa.

Mr. BARTHOLDT. I rise to a parliamentary inquiry.

The SPEAKER. The gentleman will state it.

Mr. BARTHOLDT. I raise the question whether a conference report is amendable.

The SPEAKER. The conference report has been rejected and is no longer before the House. A motion has been made that the House recede from its disagreement and concur in the Senate amendment, to which the gentleman from Iowa offered the amendment which has been reported to the House. The question is upon agreeing to that amendment.

Mr. BARTHOLDT. My impression is that the only thing in order would be instructions to the conference committee. This is not an instruction; this is an amendment.

The SPEAKER. This is not an amendment to the conference report. It is a proposition that the House recede from its nonconcurrence and concur with an amendment, and the question is on the amendment.

The question being taken, on a division (demanded by Mr. KING and Mr. HARTMAN) there were—ayes 74, noes 42.

Mr. KING. I make the point of no quorum.
Several MEMBERS. Oh, no.
The SPEAKER. The gentleman makes the point that there is no quorum present.
Mr. KING. I withdraw the point.
The SPEAKER. The point is withdrawn; the ayes have it, and the amendment is agreed to. The question recurs on the original motion to recede and concur with the amendment which the House has already adopted.
The motion was agreed to.
Mr. DALZELL. I move that the House do now adjourn.
The SPEAKER. One moment. The Chair thinks if the House desires to finish it up——
Mr. LACEY. I move to reconsider and to lay that motion upon the table.
The SPEAKER. The point the Chair wished to suggest was that the House might wish to ask another conference.
Mr. SHERMAN. Why, Mr. Speaker, we have receded and agreed to concur with an amendment. I think it is hardly necessary to ask for another conference.
Mr. RICHARDSON. All that would be necessary now would be for the Senate to concur in the amendment which the House has adopted.
The SPEAKER. The gentleman is right.
On motion of Mr. LACEY, a motion to reconsider the last vote was laid on the table.
Mr. CANNON. Did the Senate ask for a conference?
The SPEAKER. No; the Senate did not ask for a conference.
Mr. CANNON. I will ask the gentleman from New York [Mr. SHERMAN] if he is going to ask for a conference?
Mr. SHERMAN. I am not.
Mr. CANNON. I will suggest to the gentleman that while perhaps it should go to the Senate under the ordinary parliamentary usages, yet there are many precedents for the House on the one hand, or the Senate on the other, asking for a conference, anticipating the action of the other House; in other words, for the purpose of forwarding legislation. If the gentleman thinks there will be another conference——
Mr. SHERMAN. Well, I anticipate, Mr. Speaker, that the Senate will either accept this amendment or recede entirely from the whole proposition. That is what I anticipate.
Mr. CANNON. That would take a conference, however, to recede entirely.
Mr. SHERMAN. Not at all. That would not need a conference.
Mr. McRAE. Mr. Speaker, I wish to make a further parliamentary inquiry.
The SPEAKER. Will the gentleman state it?
Mr. McRAE. In view of the fact that we have only two meetings a week, and no other session until Monday next, if the gentleman from New York is not entirely satisfied that the Senate will terminate this controversy by either receding from its amendment or agreeing to the amendment we have adopted, I suggest to him that we will save time by asking for a conference and appointing the conferees now; because whatever disagreements there may be, if there be any more, could be gone over between now and the next meeting, in the light of this action of the House, while, upon the other hand, if we do not and the Senate insists upon the amendment, the bill will be hung up in the air, as it were, with nobody to consider it until our next meeting, when we will be required to agree to a conference they may ask.
Mr. LACEY. The conference can subsequently be ordered.
Mr. McRAE. But that delays consideration, and we are all interested in getting this bill on the statute book. Of course, the Senate will ask for a conference if they disagree to our amendment, or it can agree to one we ask. It is only a question of time. It can just as well do what the gentleman from New York [Mr. SHERMAN] suggests, if we ask a conference, as if we did not. It seems to me that, as a matter of safety, it would be better to ask it. There will then be one of three things for the Senate to do: Recede from its amendment, agree to our amendment, or consent to further conference.
Mr. McMILLIN. Otherwise it hangs up the whole bill.
Mr. SHERMAN. Mr. Speaker, the conferees on the part of the House have spent so much time in this matter now—most of the winter and most of the summer—that the matter of a month or two does not "cut much ice" with them. I do not think we will move for another conference. We will wait and see if this proposition is rejected, and then perhaps we will move for another conference; but we will not ask for a conference until it is absolutely essential.
Mr. KING. Mr. Speaker, a parliamentary inquiry. Will the Speaker recognize me to move the appointment of a conference committee at this time?
The SPEAKER. The Chair will do so.
Mr. KING. I move the appointment of a conference committee to confer with a like committee from the Senate, and that the House ask for a further conference.
The SPEAKER. The gentleman moves that the House ask for a further conference on the disagreeing votes of the two Houses.
Mr. LACEY. In view of the suggestion made by the conferees, it seems to me that we had better give the Senate an opportunity to consider this without ordering a conference.
Mr. SHERMAN. I think so.
The SPEAKER. That is for the House to determine. As many as favor the motion of the gentleman from Utah [Mr. KING]——
Mr. FLEMING. Mr. Speaker, I rise to a point of order.
The SPEAKER. Will the gentleman allow the Chair to state the proposition?
Mr. FLEMING. Certainly.
The SPEAKER. The proposition of the gentleman from Utah [Mr. KING] is that the House ask for a further conference with the Senate on the disagreeing votes of the two Houses.
Mr. FLEMING. Mr. Speaker, my parliamentary inquiry is whether it is in order for one body to ask for a conference with the other body unless they have disagreed in some way to action which the other body has had an opportunity to vote upon? It seems to me that under parliamentary law we are not in a position to ask a conference with the Senate until they have had an opportunity to accept or reject our proposition.
The SPEAKER. Still, the practice has been otherwise.
Mr. FLEMING. I was going to suggest, in that connection, that the only parliamentary motion would be to authorize the Speaker to appoint a conference committee during the recess, in the event that the Senate should disagree to our proposition.
The SPEAKER. The Chair thinks it has been the custom to take the action suggested by the gentleman from Utah, but the Chair is ready to be informed about it, if anybody has any information. The question is on the motion of the gentleman from Utah, that the House ask a further conference with the Senate.
The question was taken; and the Chair announcing that he was in doubt, on a division there were—ayes 49, noes 48.
Accordingly, the motion of Mr. KING was agreed to; and the Speaker appointed as conferees on the part of the House Mr. SHERMAN, Mr. CURTIS of Kansas, and Mr. ALLEN.

LEAVE TO EXTEND REMARKS.

Mr. CLAYTON. Mr. Speaker, I ask unanimous consent to extend in the RECORD my remarks made to-day on Senate resolution 42.
The SPEAKER. The gentleman from Alabama asks leave to extend in the RECORD his remarks made to-day on Senate resolution 43. Is there objection?
There was no objection.

LEAVE OF ABSENCE.

By unanimous consent, leave of absence was granted as follows:
To Mr. MARTIN, indefinitely, on account of important business.
To Mr. PITNEY, indefinitely, on account of important business.
To Mr. HAGER, indefinitely, on account of sickness.
To Mr. JENKINS, for ten days, on account of business.
To Mr. PERKINS, until further notice, on account of illness in his family.
To Mr. NORTHWAY, indefinitely, on account of sickness in his family.
To Mr. ZENOR, for three weeks, on account of important business.
To Mr. HAMILTON, for ten days, on account of important business.
To Mr. MESICK, indefinitely, on account of illness in his family.
And then, on motion of Mr. DALZELL (at 5 o'clock and 20 minutes p. m.), the House, under the order heretofore adopted, adjourned until Monday next at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS.

Under clause 2 of Rule XXIV, the following executive communications were taken from the Speaker's table and referred as follows:
A letter from the Secretary of the Interior, transmitting a letter from the Commissioner of the General Land Office, inclosing a communication from the officers of the land office at Mangum, Okla., recommending relief for certain settlers in Greer County, with draft of a section of an act therefor—to the Committee on the Public Lands, and ordered to be printed.
A letter from the Secretary of the Navy, recommending legislation to admit temporarily to American registry a vessel or vessels to transport food to those starving in India, and transmitting communication from T. Hogan & Sons recommending certain vessels—to the Committee on the Merchant Marine and Fisheries, and ordered to be printed.
A letter from the Secretary of the Navy, recommending an emergency appropriation for the repair of the dry docks at the

Brooklyn Navy-Yard—to the Committee on Naval Affairs, and ordered to be printed.

A letter from the Secretary of the Interior, transmitting an agreement between the commissioners of the United States and those of the Choctaw and Chickasaw Indians, together with a communication from the Commissioner of Indian Affairs—to the Committee on Indian Affairs, and ordered to be printed.

PUBLIC BILLS, RESOLUTIONS, AND MEMORIALS INTRODUCED.

Under clause 3 of Rule XXII, bills, resolutions, and memorials of the following titles were introduced and severally referred as follows:

By Mr. HILBORN: A bill (H. R. 3288) to provide an American register for the barkentine *Sharpshooter*, of San Francisco, Cal.—to the Committee on the Merchant Marine and Fisheries.

By Mr. GAINES: A bill (H. R. 3289) to create retrenchment commission, to reorganize Departments, to abolish unnecessary bureaus, to reduce the number of employees in the service of the Government, to reduce salaries and expenses, to reform pension list, to regulate our system of internal improvements, and for other purposes—to the Committee on Reform in the Civil Service.

By Mr. QUIGG: A bill (H. R. 3290) to incorporate the National Association of Manufacturers—to the Committee on Manufactures.

By Mr. HARTMAN: A bill (H. R. 3291) ceding to the respective States the public lands situate therein—to the Committee on the Public Lands.

By Mr. MAXWELL: A bill (H. R. 3292) to abolish the distinction between actions at law and suits in equity in all actions and suits in the United States courts, and to simplify the procedure in such courts—to the Committee on the Judiciary.

By Mr. ELLIOTT: A bill (H. R. 3293) to establish a depot for the Sixth light-house district and to make appropriation for the same—to the Committee on Interstate and Foreign Commerce.

By Mr. CRUMPACKER: A bill (H. R. 3294) making all pensions of minors commence with the accrual of the right—to the Committee on Invalid Pensions.

Also, a bill (H. R. 3295) providing for the distribution of Government publications to State universities and colleges—to the Committee on Printing.

Also, a bill (H. R. 3296) fixing a rule of evidence in certain pension cases and providing pensions for increased disabilities—to the Committee on Invalid Pensions.

By Mr. DALZELL: A resolution (House Res. No. 45) fixing time to consider S. R. 42, appropriating $50,000 for the relief of American citizens in Cuba—to the Committee on Rules.

PRIVATE BILLS AND RESOLUTIONS INTRODUCED.

Under clause 1 of Rule XXII, private bills and resolutions of the following titles were introduced and severally referred as follows:

By Mr. BABCOCK: A bill (H. R. 3297) to remove the charge of desertion from the military record of William Henry Woodward—to the Committee on Military Affairs.

By Mr. BINGHAM: A bill (H. R. 3298) granting a pension to Rebecca Paulding Meade, widow of Rear-Admiral Richard W. Meade, late of the United States Navy—to the Committee on Invalid Pensions.

By Mr. BROMWELL: A bill (H. R. 3299) granting a pension to Ellen Day, stepmother of Albert L. Day—to the Committee on Invalid Pensions.

By Mr. CONNELL: A bill (H. R. 3300) granting an honorable discharge to T. C. Kennedy, late of Company B, One hundred and forty-third Regiment Pennsylvania Volunteer Infantry—to the Committee on Military Affairs.

By Mr. CRUMPACKER: A bill (H. R. 3301) to correct the military record of Croton Kitchell—to the Committee on Military Affairs.

Also, a bill (H. R. 3302) to correct the military record of George W. Johnston—to the Committee on Military Affairs.

Also, a bill (H. R. 3303) to correct the military record of Samuel Horner—to the Committee on Military Affairs.

Also, a bill (H. R. 3304) to correct the military record of John Fagin—to the Committee on Military Affairs.

By Mr. HENRY of Mississippi: A bill (H. R. 3305) for the relief of William M. Dotson, alias William M. Ilsley—to the Committee on Claims.

By Mr. LACEY: A bill (H. R. 3306) granting a pension to Whipple Handy—to the Committee on Invalid Pensions.

Also, a bill (H. R. 3307) to increase the pension of Andrew S. Evans—to the Committee on Invalid Pensions.

By Mr. LYBRAND: A bill (H. R. 3308) to revoke the order dismissing Sergt. Eli Metcalf, Company F, Twelfth Ohio Volunteer Cavalry, from the service, and to grant him an honorable discharge—to the committee on Military Affairs.

Also, a bill (H. R. 3309) granting an increase of pension to Samantha M. Slater—to the Committee on Invalid Pensions.

Also, a bill (H. R. 3310) granting an increase of pension to Emma Leiter—to the Committee on Invalid Pensions.

Also, a bill (H. R. 3311) granting an increase of pension to Solomon Love—to the Committee on Invalid Pensions.

Also, a bill (H. R. 3312) to remove the charge of desertion from the military record of Frederick Hugo Steger—to the Committee on Military Affairs.

Also, a bill (H. R. 3313) granting an increase of pension to Ann E. Bishop—to the Committee on Invalid Pensions.

Also, a bill (H. R. 3314) to revoke the order dismissing Lieut. Lanson Zane, Tenth Independent Battery Ohio Light Artillery, from the service, and to grant him an honorable discharge—to the Committee on Military Affairs.

Also, a bill (H. R. 3315) granting a pension to Silas Brown—to the Committee on Invalid Pensions.

Also, a bill (H. R. 3316) to amend the military record of John A. Maddox—to the Committee on Military Affairs.

Also, a bill (H. R. 3317) to correct the military record of Shannon S. Bailey—to the Committee on Military Affairs.

By Mr. McDOWELL: A bill (H. R. 3318) for the relief of Nathan Finnegan—to the Committee on Claims.

By Mr. OLMSTED: A bill (H. R. 3319) for the removal of the charge of desertion standing against the name of John Keys—to the Committee on Military Affairs.

By Mr. SHAFROTH: A bill (H. R. 3320) granting an increase of pension to Mrs. Kate Ezekiel—to the Committee on Invalid Pensions.

By Mr. YOUNG of Pennsylvania: A bill (H. R. 3321) for the relief of the heir of General Count Casimer Pulaski—to the Committee on War Claims.

By Mr. ZENOR: A bill (H. R. 3322) to remove the charges of desertion from the records of the War Department against Richard F. Parker—to the Committee on Invalid Pensions.

Also, a bill (H. R. 3323) granting an increase of pension to John Hoffman, late a corporal of Company D, Fifth Regiment United States Artillery—to the Committee on Invalid Pensions.

By Mr. BOOZE: A bill (H. R. 3324) for the relief of Mrs. Margaretha Engelhardt—to the Committee on War Claims.

By Mr. LOUD: A bill (H. R. 3325) to refund illegal internal-revenue tax collected of the late Alexander W. Baldwin as United States district judge for the district of Nevada—to the Committee on Claims.

By Mr. RUSSELL: A bill (H. R. 3326) granting a pension to Thomas S. Hancox—to the Committee on Invalid Pensions.

By Mr. BOTKIN: A bill (H. R. 3327) granting a pension to Constantine Breneman—to the Committee on Invalid Pensions.

By Mr. HOWARD of Alabama: A bill (H. R. 3328) for the relief of Stephen Balcomb—to the Committee on Invalid Pensions.

PETITIONS, ETC.

Under clause 1 of Rule XXII, the following petitions and papers were laid on the Clerk's desk and referred as follows:

By Mr. ACHESON: Petition of Dr. R. S. Reagan and other citizens of Broadford, Fayette County; also petition of George Cannon and others, of Mount Morris, Greene County; also petition of O. J. Sturgis and others, of Uniontown; also petition of John J. Lutton, of Pittsburg, Pa., praying for the passage of an act restricting immigration—to the Committee on Immigration and Naturalization.

Also, petition of Washington Lodge, No. 33, of the Amalgamated Association of Iron and Steel Workers, against the provision of the Dingley bill allowing drawbacks to importers—to the Committee on Ways and Means.

Also, resolutions of the Allegheny War Veterans' Association, in relation to the civil-service law—to the Committee on Reform in the Civil Service.

By Mr. ADAMS: Resolution of the Trades League of Philadelphia, in favor of maintaining civil service—to the Committee on Reform in the Civil Service.

By Mr. BARTLETT: Petition of the Trades League of Philadelphia, in reference to coastwise canals—to the Committee on Rivers and Harbors.

Also, petition of the Trades League of Philadelphia, relating to civil service—to the Committee on Reform in the Civil Service.

Also, memorial of railway trainmen, in relation to the arbitration bill—to the Committee on the Judiciary.

Also, petition of Bryn Mawr College, in reference to the tariff on books—to the Committee on Ways and Means.

Also, memorial of the Pennsylvania Academy of Fine Arts of Philadelphia, concerning the tariff on works of art—to the Committee on Ways and Means.

By Mr. BELDEN: Petition of the Young Men's Christian Association, Methodist Preachers' Meeting, and the First Methodist Church congregation, all of Syracuse, N. Y., for the passage of the anti-prize fight bill, to prohibit kinetoscope representations of pugilistic encounters—to the Committee on Interstate and Foreign Commerce.

By Mr. BINGHAM: Petition of citizens of Philadelphia, Pa., urging the restriction of immigration—to the Committee on Immigration and Naturalization.

Also, petition of Rebecca Paulding Meade, widow of the late Rear-Admiral Richard W. Meade, United States Navy, praying for a pension of $100 per month—to the Committee on Invalid Pensions.

Also, resolutions of the Thirtieth Ward Republican executive committee; also resolutions of the Grays Ferry (Thirty-sixth Ward) Republican Club, Philadelphia, Pa., condemning the civil-service law, and urging its repeal—to the Committee on Reform in the Civil Service.

By Mr. BLAND: Petition of S. D. Bliss and other citizens of Miller County, Mo., for the relief of Dorcas Conner—to the Committee on Invalid Pensions.

By Mr. BULL: Petitions of Henry S. Wilbur and 60 others and George W. Chase and 30 others, citizens of Providence, R. I., for a more rigid restriction of immigration—to the Committee on Immigration and Naturalization.

By Mr. BUTLER: Petition of citizens of Phœnixville, Pa., for the passage of a more rigid restriction law relating to immigration—to the Committee on Immigration and Naturalization.

By Mr. COCHRANE of New York: Petition of citizens of Troy, N. Y., asking that the President be authorized to appoint a monetary commission—to the Committee on Banking and Currency.

By Mr. DALZELL: Sundry petitions of citizens of Pittsburg, Braddock, and Wilkinsburg and vicinity, in Pennsylvania, in favor of the passage of a bill restricting immigration—to the Committee on Immigration and Naturalization.

Also, resolutions of the Wholesale Liquor Dealers' Association of St. Louis, in favor of a reduction of tax on beer—to the Committee on Ways and Means.

By Mr. ERMENTROUT: Petitions of citizens of Reading and Birdsboro, Pa., for a more rigid restriction of immigration—to the Committee on Immigration and Naturalization.

Also, protest of the Trades League of Philadelphia, against the repeal of the civil-service law—to the Committee on Reform in the Civil Service.

By Mr. FITZGERALD: Resolution of the Indianapolis Board of Trade, relating to legislation on bankruptcy bills—to the Committee on Banking and Currency.

By Mr. GARDNER: Petition of Excelsior Council, Junior Order United American Mechanics, of Pleasantville, N. J., for the passage of a bill restricting immigration—to the Committee on Immigration and Naturalization.

By Mr. HARMER: Petitions of citizens of Philadelphia, Pa., asking for the restriction of immigration to protect American citizenship, and for the passage of a bill similar to that passed in the Fifty-fourth Congress and vetoed by President Cleveland—to the Committee on Immigration and Naturalization.

By Mr. HENDERSON: Resolutions of the Trades' League of Philadelphia, Pa., favoring the maintenance of the civil-service law—to the Committee on Reform in the Civil Service.

Also, petition of C. N. Bennett and other citizens of Lamont, Iowa, favoring the passage of a graded pension bill—to the Committee on Invalid Pensions.

By Mr. HILBORN: Sundry petitions of John Milton and 328 citizens of Massachusetts; J. H. Swinser and 27 citizens of Kentucky; James W. Reid and 21 citizens of Connecticut; Erwin C. Ganss and 316 citizens of Jersey City, N. J.; William E. Barries and 96 citizens of New Hampshire; W. J. Pollard and 77 citizens of New Orleans, La.; B. C. Smith and 189 citizens of Nebraska; G. W. Bell and 19 citizens of Idaho; Frank Jones and 400 citizens of Texas; Herman Haasch and 412 citizens of Wisconsin; R. N. Ramsey and 1,117 citizens of New York; G. E. Niles and 132 citizens of California; Joseph W. Hall and 107 citizens of Missouri; W. P. Campbell and 34 citizens of Kansas; S. L. Nelson and 120 citizens of Chicago, Ill., favoring the passage of the proposed amendment to the Constitution of the United States prohibiting sectarian appropriations—to the Committee on the Judiciary.

Also, petition of 91 citizens of the State of California; also resolutions adopted by the common council of San Jose; also resolution of the Board of Trade of San Jose; also resolution of the Board of Trade of Santa Cruz, Cal., asking for the abrogation of the reciprocity treaty with Hawaii—to the Committee on Foreign Affairs.

Also, memorial of the trustees of the Chamber of Commerce, San Francisco, Cal., reaffirming its adherence to the principle of reciprocity and territorial annexation—to the Committee on Foreign Affairs.

Also, petition of borate and borax miners and manufacturers of California and Nevada, asking that a higher duty be imposed on borax and borates—to the Committee on Ways and Means.

Also, petition of sundry citizens of Oakland, Cal., for the passage of an act which will more effectually restrict foreign immigration—to the Committee on Immigration and Naturalization.

Also, petition of 8 clergymen of Oakland, Cal., for the relief of book agents of the Methodist Episcopal Church South—to the Committee on War Claims.

By Mr. HOWELL: Petitions of citizens of Milltown, Jamesburg, Marlboro, and Dunellen, State of New Jersey, urging the enactment of legislation restricting immigration—to the Committee on Immigration and Naturalization.

By Mr. LACEY: Affidavit of F. M. Cooper, M. D., to accompany House bill to increase the pension of Andrew S. Evans—to the Committee on Invalid Pensions.

By Mr. LEWIS of Georgia: Petitions of citizens of Oglethorpe and Butler, Ga., for the passage of a bill for the relief of book agents of the Methodist Episcopal Church South—to the Committee on War Claims.

By Mr. LINNEY: Petition of the Tobacco Board of Trade of Statesville, N. C., protesting against any increase of the tax on tobacco—to the Committee on Ways and Means.

By Mr. LOUD: Memorial of the San Francisco Chamber of Commerce, relative to the appointment by the President of a non-partisan national monetary commission—to the Committee on Banking and Currency.

By Mr. LYBRAND: Petition of citizens of Urbana, West Liberty, and Mingo, in the State of Ohio, for a more rigid restriction of immigration—to the Committee on Immigration and Naturalization.

By Mr. McEWAN: Petition of J. R. Foden, H. S. Wood, and other citizens of Jersey City, N. J., for greater restriction of immigration—to the Committee on Immigration and Naturalization.

By Mr. MILLER: Petition of H. B. Turner and other citizens of Barboursville, and J. D. Donohoe and other citizens of Roanoke County, W. Va., praying for the passage of an immigration law—to the Committee on Immigration and Naturalization.

By Mr. MOODY: Petition of Albert S. Haynes and 52 other citizens of Haverhill, Mass., favoring the enactment of a law for the more rigid restriction of immigration—to the Committee on Immigration and Naturalization.

By Mr. OLMSTED: Petition of W. H. H. Smith and sundry other citizens of Annville, Pa., praying for the passage of a law to restrict immigration—to the Committee on Immigration and Naturalization.

Also, petition of Dr. John C. Bucher and other citizens of Pennsylvania, for a law granting a rebate of the tax upon alcohol used in the arts, and in medicinal and other like compounds—to the Committee on Ways and Means.

By Mr. ROBBINS: Sundry petitions of citizens of Youngwood, Neal, Irwin, Latrobe, Madison, Sutersville, New Stanton, Jeannette, Cokeville, Cribbs, and Bolivar; also petitions of citizens in various townships in Jefferson and Westmoreland counties, all in the State of Pennsylvania, favoring the restriction of immigration—to the Committee on Immigration and Naturalization.

By Mr. ROBINSON of Indiana: Petition of E. W. Imhoff, of Butler, Ind., asking for a reduction in the tariff on tobacco—to the Committee on Ways and Means.

By Mr. CHARLES W. STONE: Petition of 41 citizens of Goodwill Hill, Warren County, Pa., in favor of a more rigid restriction of immigration—to the Committee on Immigration and Naturalization.

Also, resolution of the Massachusetts State Board of Trade, in favor of the adoption of the metric system—to the Committee on Coinage, Weights, and Measures.

By Mr. VEHSLAGE: Petition of 70 citizens of Princebay, Richmond County, N. Y., asking for legislation restricting immigration—to the Committee on Immigration and Naturalization.

By Mr. WANGER: Petition of Alexander Loughin, Charles C. Lear, and other residents of Port Kennedy and vicinity; also petition of H. P. Raysor, D. E. F. Geist, and others, of Royersford, Pa., and vicinity, for the more rigid restriction of immigration—to the Committee on Immigration and Naturalization.

By Mr. YOST: Petition of the Board of Trade of Martinsville, Va., protesting against the increase of tax on tobacco—to the Committee on Ways and Means.

Also, petition of Edward Moore and other citizens of Waynesboro and Basic City, Va.; also petition of W. A. Higgs and others, of Staunton and Augusta County, Va., praying for the enactment of a law restricting immigration—to the Committee on Immigration and Naturalization.

By Mr. YOUNG of Pennsylvania: Sundry petitions of citizens of Philadelphia, Pa., favoring a more rigid restriction of immigration—to the Committee on Immigration and Naturalization.

Also, petitions of the M. S. Quay Club of the Thirty-fourth Ward, and of the First Blaine Club, of the city of Philadelphia, Pa., condemning the present civil-service law—to the Committee on Reform in the Civil Service.

By Mr. ZENOR: Paper to accompany House bill to correct the military record of Richard F. Parker—to the Committee on Military Affairs.

Also, paper to accompany House bill No. 2957, for the relief of Charles S. Beeler—to the Committee on Invalid Pensions.

Also, papers to accompany House bill to increase the pension of John Hoffman, alias William Long—to the Committee on Invalid Pensions.

SENATE.

MONDAY, *May 24, 1897.*

The Chaplain, Rev. W. H. MILBURN, D. D., offered the following prayer:

O Thou in whose hand our breath is and whose are all our ways, as in thought we stand by a new-made grave, to which has been consigned all that was mortal of the late junior Senator from South Carolina, we pray that Thy holy spirit may soften, hallow, and exalt our hearts with the assurance of resurrection and immortal life granted unto us in Thy Son our Saviour.

Let Thy pity and help be vouchsafed to all the mourners left by this bereavement; and upon these his colleagues may the grace of our Lord Jesus Christ descend and abide, so that in their daily life and conversation, in the performance of their public duties, they may keep in mind the thought that our day of departure is not far off. So may we walk before Thee in pureness of living, in holiness and lovingness, and when the hour for us to quit the earth has come may we gather up our feet in peace and depart in the faith and hope which Thou hast granted us through Thy Son our Saviour Jesus Christ. Amen.

The Secretary proceeded to read the Journal of the proceedings of Thursday last, when, on motion of Mr. QUAY, and by unanimous consent, the further reading was dispensed with.

ENROLLED BILL SIGNED.

The signature of the Vice-President was announced to the joint resolution (S. R. 42) appropriating $50,000 for the relief of suffering American citizens in the Island of Cuba; which had previously been signed by the Speaker of the House of Representatives.

MESSAGE FROM THE HOUSE.

A message from the House of Representatives, by Mr. W. J. BROWNING, its Chief Clerk, announced that the House had disagreed to the report of the committee of conference on the disagreeing votes of the two Houses on the amendment of the Senate numbered 10 to the bill (H. R. 15) making appropriations for the current and contingent expenses of the Indian Department and for fulfilling treaty stipulations with various Indian tribes for the fiscal year ending June 30, 1898, and for other purposes; receded from its disagreement to amendment numbered 10, and agrees to the same with an amendment; asks a conference with the Senate on the disagreeing votes of the two Houses thereon, and had appointed Mr. SHERMAN, Mr. CURTIS of Kansas, and Mr. ALLEN managers at the conference on the part of the House.

DEATH OF SENATOR EARLE.

Mr. TILLMAN. Mr. President, since the adjournment of this body last Thursday death has entered our midst and taken from among us one of our colleagues. Thursday afternoon, at 6 o'clock, JOSEPH H. EARLE, a Senator from South Carolina, passed from earth.

I offer the resolutions which I send to the desk, and ask for their immediate consideration.

The VICE-PRESIDENT. The resolutions will be read.

The Secretary read the resolutions, as follows:

Resolved, That the Senate has heard with profound sorrow the announcement of the death of the Hon. JOSEPH H. EARLE, late a Senator from the State of South Carolina.

Resolved, That the Secretary communicate these resolutions to the House of Representatives.

Resolved, That, as a mark of respect to the memory of the deceased, the Senate do now adjourn.

Mr. TILLMAN. I will not say anything on this occasion except to ask that the prayer of the Chaplain be printed in the RECORD.

The VICE-PRESIDENT. Such will be the order. The question is on agreeing to the resolutions submitted by the Senator from South Carolina.

The resolutions were unanimously agreed to; and (at 12 o'clock and 7 minutes p. m.) the Senate adjourned until to-morrow, Tuesday, May 25, 1897, at 12 o'clock meridian.

HOUSE OF REPRESENTATIVES.

MONDAY, *May 24, 1897.*

The House met at 12 o'clock m. Prayer by the Chaplain, Rev. HENRY N. COUDEN.

The Journal of the proceedings of Thursday last was read.

The SPEAKER. Without objection, the Journal will be considered as approved.

Mr. SIMPSON of Kansas. Mr. Speaker, I want to correct the RECORD.

The SPEAKER. The gentleman will state his correction.

Mr. SIMPSON of Kansas. On page 1496 it appears the gentleman from Missouri [Mr. BLAND] filed the petition of S. D. Bliss and other citizens of Miller County, Mo., for the relief of Dorcas Conner, which was referred to the Committee on Invalid Pensions. I want to move to strike that out, there being no such committee. I want the RECORD to be a record; and therefore I move to strike that out.

The SPEAKER. To strike it out of the RECORD?

Mr. SIMPSON of Kansas. To strike out the reference to the Committee on Invalid Pensions. There being no Committee on Invalid Pensions, I want to strike that part out.

Mr. DINGLEY. Out of the RECORD, or the Journal?

Mr. SIMPSON of Kansas. Out of the Journal. I suppose the RECORD is a copy of the Journal.

The SPEAKER. The question is on the motion of the gentleman to strike out.

Mr. HENDERSON. Mr. Speaker, I raise the point of order upon that. The rules temporarily adopted by the House provide for a Committee on Invalid Pensions, and although not appointed, it has been usual to introduce such bills awaiting the action of the Speaker in the appointment of the committee. Therefore I make the point of order against that motion.

The SPEAKER. It is for the House to determine whether that shall be stricken out.

Mr. DALZELL. I make the further point of order that the rules provide a method to correct references.

The SPEAKER. The gentleman moves to strike it out.

The question was taken on the motion of Mr. SIMPSON of Kansas; and the Speaker announced that the noes seemed to have it.

Mr. SIMPSON of Kansas. Division, Mr. Speaker.

The House divided; and there were—ayes 49, noes 84.

So the motion was rejected.

Mr. DINGLEY. Mr. Speaker, I move that the Journal be approved, and on that I ask for the previous question.

The question was taken on ordering the previous question; and the Speaker announced that the ayes seemed to have it.

Mr. SIMPSON of Kansas. Division.

The House proceeded to divide.

Mr. SIMPSON of Kansas. A parliamentary inquiry. Do I understand the division is on ordering the previous question or the approval of the Journal?

The SPEAKER. On ordering the previous question.

The House divided; and there were—ayes 92, noes 18.

So the previous question was ordered.

The question was taken; and the Journal was approved.

DEATH OF HON. JOSEPH H. EARLE.

Mr. ELLIOTT. Mr. Speaker, it becomes my sad duty to announce to the House the death of Hon. JOSEPH H. EARLE, one of the Senators from the State of South Carolina, which occurred at Greenville, in that State, on the 20th instant. The circumstances of Judge EARLE'S death were almost tragic in their nature. Apparently in the enjoyment of perfect health, in the full maturity of his powers, surrounded by a devoted and loving family, just exalted through the direct vote of his people to the highest office in the gift of his State, he was suddenly cut off upon the threshold of a career that must have been most useful and honorable. From every standpoint, public and private, his death is an unmeasured calamity.

Later on, Mr. Speaker, the Representatives from South Carolina will ask this House to set apart a day for the commemoration of the virtues and services of the deceased. For the present, I ask the adoption of the resolutions which I send to the desk.

The Clerk read as follows:

Resolved, That this House has learned with profound sorrow of the death of Hon. JOSEPH H. EARLE, a Senator of the United States from the State of South Carolina.

Resolved, That as a further tribute and mark of respect to the memory of the deceased the House do now adjourn.

The resolutions were agreed to unanimously.

And accordingly (at 12 o'clock and 17 minutes p. m.), the House adjourned until Thursday next.

EXECUTIVE COMMUNICATIONS.

Under clause 2 of Rule XXIV, the following executive communications were taken from the Speaker's table and referred as follows:

A letter from the Secretary of War, transmitting, with a letter from the Chief of Engineers, report of survey of St. Croix River, between Maine and New Brunswick—to the Committee on Rivers and Harbors, and ordered to be printed.

A letter from the Secretary of the Treasury, requesting the withdrawal of certain amendments previously recommended to the bill (S. 1896) to adopt regulations for preventing collisions upon certain harbors, rivers, and inland waters of the United States, and recommending, in lieu thereof, the adoption of amendments indicated in an inclosed copy of the bill—to the Committee on the Merchant Marine and Fisheries, and ordered to be printed.

PUBLIC BILLS, RESOLUTIONS, AND MEMORIALS INTRODUCED.

Under clause 3 of Rule XXII, bills, resolutions, and memorials of the following titles were introduced and severally referred as follows:

By Mr. BARTLETT: A bill (H. R. 3329) to regulate the trial of contempts of courts—to the Committee on the Judiciary.

By Mr. KING: A bill (H. R. 3330) granting and ceding to the State of Utah the public lands within the State of Utah—to the Committee on the Public Lands.

By Mr. McDONALD: A bill (H. R. 3331) to increase the pay of post quartermaster-sergeants of the Army—to the Committee on Military Affairs.

By Mr. WALKER of Massachusetts: A bill (H. R. 3333) to so change the national-bank act as to secure to the people in all sections of the country an equal opportunity to freely use paper money—to the Committee on Banking and Currency.

By Mr. McRAE: A resolution (House Res. No. 46) relative to the consideration of Senate joint resolution No. 26, declaring that a condition of public war exists in Cuba—to the Committee on Rules.

By Mr. McMILLIN: A resolution (House Res. No. 47) providing for the consideration of resolution No. 26, concerning Cuba—to the Committee on Rules.

By Mr. WHEELER of Alabama: A resolution (House Res. No. 48) asking that when the House adjourns on Thursday next (the Senate consenting) it will adjourn to meet on the following Monday at 12 o'clock—to the Committee on Rules.

By Mr. SHAFROTH: A memorial of the legislature of the State of Colorado, favoring the erection of a United States Government building at Glenwood Springs, Colo.—to the Committee on Public Buildings and Grounds.

By Mr. OTJEN: A memorial of the legislature of the State of Wisconsin, in favor of an amendment to the Constitution of the United States relating to trusts—to the Committee on the Judiciary.

By Mr. BARNEY: A memorial of the legislature of the State of Wisconsin, favoring an amendment to the Constitution relating to trusts—to the Committee on the Judiciary.

PRIVATE BILLS AND RESOLUTIONS INTRODUCED.

Under clause 1 of Rule XXII, private bills and resolutions of the following titles were introduced and severally referred as follows:

By Mr. BARLOW: A bill (H. R. 3332) to grant a pension to Mrs. Alice A. Hines—to the Committee on Invalid Pensions.

By Mr. BOTKIN: A bill (H. R. 3334) granting a pension to John N. D. Brown, of Huntsville, Ala.—to the Committee on Invalid Pensions.

By Mr. BULL: A bill (H. R. 3335) for the relief of Mrs. Hepza Hobson Werden—to the Committee on Invalid Pensions.

By Mr. COOPER of Wisconsin (by request): A bill (H. R. 3336) to increase pension of Frederick Higgins, late of Company G, Thirty-first Wisconsin Volunteer Infantry—to the Committee on Invalid Pensions.

By Mr. KING: A bill (H. R. 3337) granting a pension to Mary E. Haines, of Leamington, Utah, widow of Claiborn L. Haines, deceased, late of Company B, Thirty-ninth Illinois Infantry—to the Committee on Invalid Pensions.

By Mr. McDONALD: A bill (H. R. 3338) for the relief of David C. Winebrener—to the Committee on War Claims.

Also, a bill (H. R. 3339) to refund to corporate authorities of Frederick City, Md., the sum of $200,000, exacted of them by the Confederate army in 1864—to the Committee on War Claims.

Also, a bill (H. R. 3340) for the relief of the crew of the United States steamship *Wyoming*—to the Committee on Claims.

By Mr. MIERS of Indiana: A bill (H. R. 3341) granting pension to John D. Allen—to the Committee on Invalid Pensions.

Also, a bill (H. R. 3342) granting pension to Mary Case—to the Committee on Invalid Pensions.

Also, a bill (H. R. 3343) for the relief of William McCormick—to the Committee on Invalid Pensions.

Also, a bill (H. R. 3344) granting pension to John W. Morgan—to the Committee on Invalid Pensions.

Also, a bill (H. R. 3345) granting increase of pension to Margaret Jane Wright—to the Committee on Invalid Pensions.

By Mr. MOODY: A bill (H. R. 3346) granting a pension to Julia C. Jenkins—to the Committee on Invalid Pensions.

By Mr. RIXEY (by request): A bill (H. R. 3347) for the relief of Thomas Lee—to the Committee on War Claims.

Also (by request), a bill (H. R. 3348) for the relief of Edgar E. Matthew—to the Committee on War Claims.

By Mr. SHAFROTH: A bill (H. R. 3349) to increase the pension of William H. Brown—to the Committee on Invalid Pensions.

By Mr. SLAYDEN: A bill (H. R. 3350) for relief of Calvin Johnson, late first lieutenant Company D, Forty-second Missouri Infantry Volunteers—to the Committee on Military Affairs.

Also (by request), a bill (H. R. 3351) granting a pension to Mrs. Mary G. Williams—to the Committee on Invalid Pensions.

By Mr. LITTAUER: A bill (H. R. 3352) increasing the pension of James B. Skinner—to the Committee on Invalid Pensions.

Also, a bill (H. R. 3353) for the relief of Kate A. Hill—to the Committee on Claims.

PETITIONS, ETC.

Under clause 1 of Rule XXII, the following petitions and papers were laid on the Clerk's desk and referred as follows:

By Mr. ADAMS: Resolution of the Board of Trade of Philadelphia, relating to the pooling bill—to the Committee on Interstate and Foreign Commerce.

Also, petition of Harvey J. Bachart, Alonzo Moser, and other citizens of Quakake, Pa., for a more rigid restriction of immigration—to the Committee on Immigration and Naturalization.

By Mr. BRUMM: Petition of Frank Houser and other citizens of Oneida and Sheppton, Pa., for the restriction of immigration—to the Committee on Immigration and Naturalization.

By Mr. DORR: Petition of Hon. J. M. Hensley and others; also of M. B. Chapman and others, residents of Mason County, W. Va.; also petitions of Ash M. Prince and others, of Bluefield, and T. J. Cowgill and others, of Cowan, W. Va., for a more rigid restriction of immigration—to the Committee on Immigration and Naturalization.

By Mr. ERMENTROUT: Petition of John F. Fair and other citizens of Reading, Pa., for a more rigid restriction of the immigration laws—to the Committee on Immigration and Naturalization.

By Mr. HARMER: Petition of Elmer Steinmetz and other citizens of Philadelphia, Pa., favoring legislation for the restriction of immigration, and for the protection of American citizenship, by the passage of a bill similar to that passed in the Fifty-fourth Congress, vetoed by President Cleveland—to the Committee on Immigration and Naturalization.

By Mr. HULL: Petition of S. F. Schuler and 400 other citizens; also petition of Mrs. M. J. Black and 36 other ladies of Des Moines, Iowa, asking for the passage of the Terry anticigarette bill—to the Committee on the Judiciary.

By Mr. KLEBERG: Petition of William T. Eichholz and other citizens of Cuero, Tex., favoring the abrogation of the treaty with Hawaii, and asking for a duty on Hawaiian sugar—to the Committee on Ways and Means.

By Mr. OTJEN: Petition of the Merchant Tailor Exchange of Milwaukee, Wis., in favor of paragraph 666 of House bill No. 379, relating to the free entry of wearing apparel, etc.—to the Committee on Ways and Means.

By Mr. ROBBINS: Petition of Daniel D. Stewart and other citizens of Quakake, Pa.; also petition of William B. Dewees and others, of Cowansburg, Pa., for a more rigid restriction of immigration—to the Committee on Immigration and Naturalization.

By Mr. ROBINSON of Indiana: Petition of Federal Labor Union of Fort Wayne, Ind., for the reduction of the proposed tax on tobacco—to the Committee on Ways and Means.

By Mr. WM. ALDEN SMITH: Petition of Iron Molders' Union No. 213, of Grand Rapids, Mich., protesting against the passage of House bill No. 30, restricting the right to buy and sell railroad tickets—to the Committee on Interstate and Foreign Commerce.

By Mr. YOUNG of Pennsylvania: Petition of the M. S. Quay Club, of Philadelphia, Pa., protesting against the so-called civil-service law and requesting its suspension or repeal—to the Committee on Reform in the Civil Service.

Also, petitions of George Stieber and others and George H. Wilson and others, citizens of Philadelphia, Pa., for a more rigid restriction of immigration—to the Committee on Immigration and Naturalization.

SENATE.

TUESDAY, *May 25, 1897.*

Prayer by the Chaplain, Rev. W. H. MILBURN, D. D.

The Journal of yesterday's proceedings was read and approved.

SENATOR FROM FLORIDA.

Mr. PASCO. I present the credentials of Stephen R. Mallory, elected a Senator from the State of Florida by the legislature of that State. I ask that the certificate be read.

The VICE-PRESIDENT. The Secretary will read the certificate of election.

The Secretary read the credentials, as follows:

STATE OF FLORIDA, *Executive Department.*

By his excellency William D. Bloxham, governor of Florida:

Be it known that Stephen R. Mallory, of the county of Escambia, in the State aforesaid, qualified according to the Constitution of the United States for a Senator in the Congress thereof, was by the legislature of said State, in conformity with law, on the 14th day of May, A. D. 1897, elected Senator from said State in the Congress of the United States.

In testimony whereof I have hereto set my hand and caused the great seal of the State of Florida to be affixed at Tallahassee, the capital, this the 15th day of May, A. D. 1897, and of the Independence of the United States of America the one hundred and twenty-first year.

W. D. BLOXHAM,
Governor of Florida.

By the governor. Attest:
[SEAL.]
JNO. L. CRAWFORD,
Secretary of State.

Mr. CHANDLER. The certificate does not state that the election was made to fill an existing vacancy. It simply states that the person named in the certificate has been elected a Senator of the United States. The customary form would require a statement that the election was to fill an existing vacancy. It would be better if the certificate contained that statement; but I do not think it an omission that is deserving of sufficient notice to delay the swearing in of the Senator-elect. Therefore I make no objection on that account, although there is a slight defect in the certificate as compared with the usual form adopted.

The VICE-PRESIDENT. If there be no objection, the certificate will be placed on the files.

Mr. PASCO. If it is necessary, to perfect the records of the Senate, a new certificate can be filed at a later day. I understand the Senator from New Hampshire makes no objection to the immediate admission of Mr. Mallory. He is in waiting, and I ask that the usual oath be administered to him.

The VICE-PRESIDENT. If there is no objection, the Senator-elect from Florida will take his place at the Vice-President's desk and the oath of office will be administered to him.

Mr. Mallory was escorted to the Vice-President's desk by Mr. PASCO, and the oath prescribed by law having been administered to him, he took his seat in the Senate.

DEFICIENCY APPROPRIATIONS.

The VICE-PRESIDENT laid before the Senate a communication from the Secretary of the Treasury, requesting that the sum of $1,803 be included in the general deficiency appropriation bill, $1,303 being necessary to supply post-office lock boxes, etc., for the public building at Pawtucket, R. I., and $500 to meet such exigencies in the service as may arise, requiring expenditures, at the various completed public buildings under the control of that Department; which was referred to the Committee on Appropriations, and ordered to be printed.

DISTRICT PARK LIGHTING CONTRACTS.

The VICE-PRESIDENT laid before the Senate a communication from the Secretary of War, transmitting, in response to a resolution of the 19th instant, a report from the Chief of Engineers, United States Army, and accompanying report of Col. Theodore A. Bingham, the officer in charge of public buildings and grounds, relative to accepted bids and contracts for park lighting in the District of Columbia; which, on motion of Mr. FAULKNER, was, with the accompanying papers, referred to the Committee on the District of Columbia, and ordered to be printed.

PAYMENTS AS DRAWBACKS OR REFUNDS.

The VICE-PRESIDENT laid before the Senate a communication from the Secretary of the Treasury, transmitting, in response to a resolution of the 3d instant, certain information relative to the nature and extent of the supervision and control of the materials imported subject to duties and stored in bonded warehouses of individuals or corporations, exercised by the officers of the United States; which, with the accompanying papers, was referred to the Committee on Finance, and ordered to be printed.

INDIAN APPROPRIATION BILL.

The VICE-PRESIDENT laid before the Senate the action of the House of Representatives disagreeing to the report of the committee of conference on the disagreeing votes of the two Houses on the amendment of the Senate numbered 10 to the bill (H. R. 15) making appropriations for the current and contingent expenses of the Indian Department and for fulfilling treaty stipulations with various Indian tribes for the fiscal year ending June 30, 1898, and for other purposes, and requesting a conference with the Senate on the disagreeing votes of the two Houses thereon.

Mr. PETTIGREW. I move that the Senate further insist upon its amendment, and agree to the conference asked on the part of the House.

The motion was agreed to.

By unanimous consent, the Vice-President was authorized to appoint the conferees on the part of the Senate; and Mr. PETTIGREW, Mr. TELLER, and Mr. COCKRELL were appointed.

VISITOR TO WEST POINT.

Mr. PERKINS. Mr. President, you did me the honor a few days since to name me as one of the Visitors to attend the annual examination of the military cadets at West Point. My official engagements are such that it is impossible for me to attend on that auspicious occasion. Therefore, expressing my hearty appreciation of the compliment conferred, I respectfully tender my resignation and ask to be excused.

The VICE-PRESIDENT. Is there objection to excusing the Senator from California? The Chair hears none, and his resignation is accepted.

PETITIONS AND MEMORIALS.

The VICE-PRESIDENT presented a petition of the ninth annual national convention of railroad commissioners, praying for the passage of Senate bill No. 775, directing the Interstate Commerce Commission to prepare and publish a classification of freight articles and rules, regulations, and conditions for freight transportation, to be known as the "National freight classification;" which was read, as follows, and, with the accompanying paper, referred to the Committee on Interstate Commerce:

NINTH ANNUAL NATIONAL CONVENTION OF RAILROAD COMMISSIONERS.

At the ninth annual national convention of railroad commissioners, which was held at Planters' Hotel, St. Louis, Mo., on May 11 and 12, 1897, the following resolution reported by the committee on uniform classification of freights was unanimously adopted:

"*Resolved*, That this convention hereby respectfully recommends the passage by Congress of Senate bill No. 775, now pending before the Senate Committee on Interstate Commerce, and that properly attested copies of the foregoing report be sent to the presiding officers of the Senate and House of Representatives."

In accordance with said resolution, a copy of the report of the committee on uniform classification is also transmitted.

EDWARD A. MOSCLUF,
Secretary.

To the PRESIDENT OF THE SENATE.

Mr. CAFFERY presented a memorial of the Manufacturers' Association of the United States, remonstrating against the increase of tariff taxation and praying that such discrimination in the imposition of taxes be made as will most fully promote domestic industry and protect American labor; which was ordered to lie on the table and to be printed in the RECORD, as follows:

Petition of the Manufacturers' Association of the United States in opposition to the increase of tariff taxation now pending in the Senate, and in support of such discrimination in the imposition of taxes as will most fully promote domestic industry and protect American labor.

"All taxes that the people pay the Government should receive."

To the honorable Senate of the United States:

The undersigned respectfully state that a bill is now pending for a very great increase in tariff taxation on which they desire to be heard. When a part of the Committee on Ways and Means in the House of Representatives was framing this measure, the short time assigned to hearings was almost wholly taken up by the promoters of tariff taxation on specific articles, whose chief motive was to raise prices of their own products, upon the ground that in this way domestic industry would be promoted and better employment given to American labor. To the representatives of domestic industry and the employers of American labor, whose manufactures will be greatly increased in cost and whose ability to employ American labor will be greatly impaired if this pending measure of taxation should become a law, no equal opportunity to be heard was offered or allowed.

This bill was carried through the House of Representatives without any sufficient time for its full consideration and without any adequate debate upon its terms.

The same measure has since been considered by the Finance Committee of the Senate without hearings of any kind. It is now before the Senate.

Being well assured that if this bill should become a law it will not promote but will greatly obstruct and retard domestic manufactures, and that it will not protect American labor but will restrict employment, we now request that a sufficient time be given to ourselves and others to examine the bill which has been reported before the debate begins. This bill is of a very complex character, and not less than six weeks would be required by us to find out how it would affect us and to enable us to give the facts and to prove our case.

We also ask that in this interval before debate begins such members of the Senate as may desire to promote domestic manufactures, to foster domestic industry, to enlarge the markets for American manufactures, and thus to give opportunity for the largest employment of American labor, will devise a way by which they may receive from us such statements of the facts as we wish to present, and also hear our reasons for our protest against unjust, unequal, and unnecessary taxation.

We hold that in justice to the public welfare this pending bill should be kept before the Senate until our statements in opposition to its enactment

have all been submitted and spread before the country in the record of the proceedings.

We respectfully submit that on the authority of the United States census of manufactures of 1890 this branch of domestic industry is divided among 355,415 establishments, under 363 separate titles of specific branches, then giving employment to 4,711,902 persons and now more than 5,000,000.

An analysis of this census of manufacturing industries has been made on our behalf, of which we submit a preliminary statement, subject to such correction as may be found suitable when it is dealt with by those not in full agreement with our conclusions, to whom we are prepared to submit the complete details on which this summary is based.

This analysis has been made upon the following plan:

Class 1. Occupations of a mechanical order of which no product of like kind could be imported from a foreign country, but of which very large quantities of domestic products are exported, including six subclasses:

1a. Occupations which have rather the nature of the individual work of mechanics than of the collective work of the factory.

1b. Occupations mainly consisting in the conversion of the crude products of the farm into their secondary product for domestic consumption or foreign export.

1c. Timber and its conversion into the secondary or final products.

1d. Metal working of certain kinds.

1e. Petroleum.

1f. Miscellaneous arts.

Class 2. Occupations existing of necessity throughout the country of which no product of like kind in any considerable quantity could be imported from a foreign country, but of which large quantities of the product are exported.

Class 3. Occupations of a very similar character to class 2, representing products of which none of the common or more useful kinds could be imported from foreign countries and of which large quantities are exported, but subject to the import of some special qualities or kinds, mainly of a very high class, usually representing hand work.

Class 4. Occupations in arts of which certain products of the same general class may be and are imported from foreign countries, representing a moderate competition in some branches of work.

Class 5. Occupations of which products of like kind can be and are imported in large or considerable measure from foreign countries.

In making this classification Canada is not counted as a foreign country either in respect to agriculture or manufactures, there being no quantitative exchange of products with Canada or any very large amount compared to commerce with other countries; also because our more southern position giving us so great advantage over Canada that our exports of the products of agriculture largely exceed our imports from Canada, while our exports of manufactures to Canada are proportionately very large.

Summary.

	Materials used.	Number employed.	Amount earned.	Average earnings.	Value of product.
Class 1, mechanics, etc	$2,436,176,836	1,606,793	$943,377,287	$506	$4,028,806,879
Class 2, necessary domestic arts	1,619,658,977	1,437,373	665,400,223	463	2,309,433,370
Class 3, almost wholly domestic arts	1,435,881,553	796,730	451,231,209	566	1,835,985,425
Class 4, subject to moderate foreign competition	757,508,944	616,273	249,367,499	405	859,330,903
Class 5, subject to active foreign competition	272,060,659	194,733	73,297,495	377	334,281,004
	6,521,286,974	4,711,902	2,282,673,713	484	9,307,837,581

The average earnings include those of officers and clerks; if they are deducted, average wages become $445.

The result of this analysis was a surprise to us in the very small proportion found in classes 4 and 5, who are now subject in any considerable measure to foreign competition. The judgment of experts should be taken on the separation of these two classes from the three preceding, and also to determine what number, if any, should be moved from class 3 to class 4. We are, however, prepared to prove that unless the progress of manufactures should be obstructed by taxation upon the materials used in these arts not one-fifth of those who are now occupied in them are now subject to foreign competition, and we are also prepared to prove that if many articles now dutiable were put in the free list the progress of manufactures would be further promoted and the number with whom foreign manufacturers could compete in the supply of our home market would be steadily lessened.

We do not make these suggestions for the purpose of securing any special advantage, privileges, or preferences ourselves.

We ask only to be relieved from obstructive taxes and that the same policy shall govern legislation affecting agriculture and commerce.

We also suggest that an analysis should be made of the products of the farm, the forest, and the mine, to the end that the fact may be made plain that not 5 per cent of the persons occupied in these arts can be made subject to foreign competition, while 15 to 20 per cent depend wholly upon a demand for export in the disposal of their products.

We are convinced that in the present stage of nearly every branch of mining, manufacturing, and agriculture the paramount position of this country is assured, and that the futile effort to control or regulate prices and wages by misdirecting the power of taxation should now cease. We may rightly demand, in any event, that we shall not be obstructed in our own work by any perversion of the power of taxation.

The undersigned claim to be representatives of manufacturing industries, as officially classed in the census, who belong chiefly in the first three classes, whose work can not be promoted by tariff taxation on foreign products, but will be greatly obstructed by any measure which tends to raise the price either of the machinery or the crude or partly manufactured materials, whether of domestic or foreign origin, which are necessary in the conduct of their work.

They also protest against such measures of tariff taxation as will put them at a disadvantage in their undertaking to export the excess of our own products in competition with other countries whose manufactures are not subjected to obstructive taxes on similar materials.

Having thus put before you a summary of our reasons for opposing the pending measures of tariff taxation, we again ask you to grant hearings, official or unofficial, at which we may present proofs, orally or in print, of the substantial accuracy of this statement, holding ourselves ready to submit to any examination and to correct any errors which may be shown in our computation.

A. B. FARQUHAR CO., LIM.
A. B. FARQUHAR, *Chairman.*

Mr. TILLMAN presented a petition of sundry citizens of Walterboro, S. C., praying for the adoption of the lumber schedule in the pending tariff bill as passed by the House of Representatives; which was ordered to lie on the table.

He also presented sundry memorials of citizens of Alcolu, S. C., remonstrating against placing lumber on the free list or reducing the duty below $2 per thousand feet on rough lumber or less than 20 per cent ad valorem while the duties on all other products and manufactures are much higher; which were ordered to lie on the table.

Mr. QUAY presented a petition of the Thirtieth Ward Republican Club, of Philadelphia, Pa., praying for the repeal of the present civil-service law; which was referred to the Committee on Civil Service and Retrenchment.

He also presented a petition of the Trades League of Philadelphia, Pa., praying for a continuance of the present civil-service law; which was referred to the Committee on Civil Service and Retrenchment.

He also presented a petition of the Board of Trade of Philadelphia, Pa., praying for the enactment of a law equally protective of the rights of shippers and of railroads; which was referred to the Committee on Interstate Commerce.

He also presented sundry memorials of citizens of Jamison City, Niles Valley, Hillsgrove, Westfield, and Grover, all in the State of Pennsylvania, remonstrating against the imposition of a duty on hides; which were ordered to lie on the table.

He also presented sundry petitions of citizens of Pitcairn, Huntingdon, Steelton, Philadelphia, Reading, and of Capital City Council, No. 327, Junior Order United American Mechanics, of Harrisburg, all in the State of Pennsylvania, praying for the enactment of legislation for a more rigid restriction of immigration; which were ordered to lie on the table.

Mr. PLATT of New York presented a petition of sundry citizens of Bay Shore, Long Island, New York, praying for the enactment of legislation for a more rigid restriction of immigration; which was ordered to lie on the table.

He also presented a petition of 100 kindling wood factory employees of Carrollton, N. Y., praying for the imposition of a duty upon kindling wood; which was ordered to lie on the table.

He also presented a petition of sundry citizens of Salamanca, N. Y., praying that a duty of 30 cents per 100 be placed upon kindling wood; which was ordered to lie on the table.

He also presented a petition of members of the First Methodist Episcopal Church, and of the Methodist Preachers' Meeting, of Syracuse, N. Y., praying for the enactment of legislation raising the age of protection of females to 18 years in the District of Columbia and the Territories; which was referred to the Committee on the District of Columbia.

He also presented petitions of the Young People's Society of Christian Endeavor of the Thirteenth Street Presbyterian Church, of New York City; of the First Methodist Episcopal Church and Preachers' Meeting, of Syracuse; of the Young People's Society of Christian Endeavor of the Reform Church of Stuyvesant, and of the Lake Keuka Baptist Church, of Crosby, all in the State of New York, praying for the enactment of a Sunday-rest law for the District of Columbia; which were referred to the Committee on the District of Columbia.

He also presented a petition of the Lake Keuka Baptist Church, of Crosby, N. Y., praying for the enactment of legislation prohibiting interstate gambling by telegraph, telephone, or otherwise; which was referred to the Committee on Interstate Commerce.

He also presented petitions of the First Methodist Episcopal Church and Preachers' Meeting, of Syracuse; of the Young Men's Christian Association of the First Methodist Church and the Methodist Preachers' Meeting, of Syracuse; of the Young People's Society of Christian Endeavor of the Thirteenth Street Presbyterian Church, of New York City; of the Lake Keuka Baptist Church, of Crosby, and of the Young People's Society of Christian Endeavor of the Reform Dutch Church, of Stuyvesant, all in the State of New York, praying for the enactment of legislation prohibiting the transmission by mail or interstate commerce of pictures or descriptions of prize fights; which were ordered to lie on the table.

He also presented petitions of the Young People's Society of Christian Endeavor of the Thirteenth Street Presbyterian Church, of New York City; of the Young People's Society of Christian Endeavor of the Reform Dutch Church of Stuyvesant; of the Lake Keuka Baptist Church, of Crosby; of the Methodist Episcopal Church of Shortsville; of the Christian Endeavor Society of the Congregational Church of Northville; of the First Methodist

Episcopal Church and Preachers' Meeting, of Syracuse; of the Young People's Society of Christian Endeavor of Poplar Ridge and Sherwood, and of the delegates of the thirteenth semiannual Chemung County convention of Christian Endeavor of Elmira, all in the State of New York, praying for the enactment of legislation prohibiting the sale of intoxicating liquors in the Capitol building and all Government buildings; which were referred to the Committee on Public Buildings and Grounds.

Mr. McMILLAN presented the petition of Edgar Petell and sundry other citizens of Saginaw, Mich., praying for the imposition of a two-dollar duty on lumber; which was ordered to lie on the table.

He also presented the memorial of W. B. Mershon and sundry other box-shook manufacturers of Saginaw Valley, Michigan, remonstrating against the rebate clause in the pending tariff bill as applied to lumber; which was ordered to lie on the table.

He also presented a memorial of Broadwell & Wolff and sundry other dealers in musical instruments, of Detroit, Mich., remonstrating against an increase of the duty on musical instruments; which was ordered to lie on the table.

He also presented a memorial of the Council of Trades and Labor Unions, of Detroit, Mich., remonstrating against an increase of the duty on raw tobacco; which was ordered to lie on the table.

He also presented a memorial of Iron Molders' Union No. 213, of Grand Rapids, Mich., remonstrating against the enactment of legislation intended to destroy the present system of ticket brokerage; which was ordered to lie on the table.

He also presented the petition of Hermann H. Schoeneweg and sundry other citizens of Detroit, Mich., praying for the enactment of legislation for a more rigid restriction of immigration; which was ordered to lie on the table.

He also presented the petition of Mrs. Alfred Russell, president, and 37 other members of the United States Daughters of 1812, praying that an appropriation be made for the erection of a bronze statue to the memory of Maj. Gen. Alexander Macomb, formerly Commander in Chief of the United States Army, to be placed in some public square in the city of Detroit, Mich.; which was referred to the Committee on the Library.

He also presented the petition of W. H. S. Wood and 30 other citizens of Livingston County, Mich., praying for the adoption of the resolution requesting the Secretary of the Treasury to procure and furnish to the Senate certain information regarding the correct amount of stock and bonds of the United States or its people held in foreign countries; which was referred to the Committee on Finance.

He also presented sundry petitions of citizens of Michigan who earn their living by producing lumber and shingles, praying for the imposition of a two-dollar rate upon lumber and a 35-cent rate on shingles; which were ordered to lie on the table.

He also presented petitions of the Young People's Society of Christian Endeavor of the Congregational Church of Fremont, of the Woman's Christian Temperance Union of Ishpeming, of the Young People's Society of Christian Endeavor of the Reformed Church of Fremont, and of the Young People's Society of Christian Endeavor of the Church of Christ, of Fremont, all in the State of Michigan, praying for the enactment of legislation prohibiting the sale of intoxicating liquors in the Capitol building or on ground owned or controlled by the United States Government; which were referred to the Committee on Public Buildings and Grounds.

He also presented the petition of Rev. W. Bishop Johnson and 8 other clergymen of the city of Washington, praying that the Freedmen's Hospital be accorded all the rights enjoyed by the other hospitals in that city; which was referred to the Committee on the District of Columbia.

He also presented a petition of the officers and members of the Merchant Tailors' Exchange of Milwaukee, Wis., praying Congress to pass without amendment paragraph 666 of the pending tariff bill, relating to the free entry of wearing apparel, personal effects, etc.; which was ordered to lie on the table.

Mr. PRITCHARD presented a memorial of the Liquor Dealers' Association of Rockingham County, N. C., remonstrating against an increase of the duty on beer; which was ordered to lie on the table.

Mr. GALLINGER. I present the memorial of Hon. L. F. Liscom and 32 other tobacco growers of Hinsdale, Cheshire County, N. H., remonstrating against the adoption of Schedule F in the pending tariff bill, relating to leaf tobacco, as reported by the Senate Committee on Finance, and praying that the rate of $2 per pound provided by the House be restored. I move that the memorial lie on the table, and that it be printed as a document for the use of the Senate.

The motion was agreed to.

Mr. SPOONER presented a petition of the legislature of Wisconsin, praying for the adoption of an amendment to the Constitution of the United States giving Congress concurrent jurisdiction with the several States for the suppression of trusts and other combinations to control production, stifle competition, and to regulate for their own benefit the price of products and the wages of labor; which was read, and referred to the Committee on the Judiciary, as follows:

Memorial to Congress for an amendment to the Constitution of the United States to give to Congress concurrent jurisdiction with the several States for the suppression of trusts and other combinations to control production, stifle competition, and to regulate for their own benefit the price of products and the wages of labor.

The memorial of the legislature of Wisconsin to the Congress of the United States respectfully shows that in the opinion of the legislature the multiplicity and growing power of trusts and other combinations of capital, for the purpose of controlling the markets for various products, including the necessaries of life, is not only a menace to the interests of the people, but is the cause of widespread popular discontent. This evil is almost universally admitted, as is the difficulty of devising methods for its eradication. The Congress is limited in its legislation to subjects confessedly within the Federal jurisdiction. There is, in the nature of things, no uniformity in the legislation of the States upon the subject. Indeed, some of the States, it is believed, are entirely without adequate legislation for the protection of their citizens in this respect.

The act passed by Congress some years ago has been pronounced by the Attorneys-General of the United States to be inadequate. The great trust or combination prosecuted in one State, by legislative investigation or otherwise, seeks and finds refuge in another. It is believed that the only sure remedy for this evil will be found in giving to the Congress of the United States power to legislate upon the subject, to provide for civil suits in the name of the United States and in the courts of the United States, and for such criminal prosecutions as may be found necessary, even if these corporations are State corporations, and even if they adopt devices, as they have in the past, to carry on their large commerce, keeping technically beyond the pale of interstate commerce and the Federal jurisdiction.

It is not the purpose of this memorial to ask that any State be deprived of jurisdiction which it now possesses in this behalf, but it is respectfully prayed that there shall be promptly submitted to the legislatures of the respective States an amendment to the Constitution of the United States which shall give Congress full and complete concurrent jurisdiction to enact legislation for the suppression of this evil, regardless of State lines.

Resolved, That the governor be, and he is hereby, requested to transmit a copy of this memorial to the President of the Senate and to the Speaker of the House of Representatives, and to each of the Senators and Representatives from the State of Wisconsin.

EMIL BAENSCH,
President of the Senate.
G. A. BUCKSTAFF,
Speaker of the Assembly.

Mr. MITCHELL presented a petition of the legislature of Wisconsin, praying for the adoption of an amendment to the Constitution of the United States giving Congress concurrent jurisdiction with the several States for the suppression of trusts and other combinations to control production, stifle competition, and to regulate for their own benefit the price of products and the wages of labor; which was referred to the Committee on the Judiciary.

He also presented a petition of the Merchant Tailors' Exchange of Milwaukee, Wis., praying Congress to pass without amendment section 666 of the pending tariff bill, relating to the free entry of wearing apparel, personal effects, etc.; which was ordered to lie on the table.

Mr. WILSON presented a petition of the Chamber of Commerce of Seattle, Wash., praying for the annexation by the United States of the Islands of Hawaii; which was referred to the Committee on Foreign Relations, and ordered to be printed in the RECORD, as follows:

To the honorable the Senate and House of Representatives in Congress assembled:

The Chamber of Commerce of the city of Seattle presents this petition for the annexation to the United States of the Islands of Hawaii. The relations of our Republic with that country have always been of the most intimate and interesting character, and the feelings of the two peoples have been more near and more friendly than have been those of any other people with our own. In consequence of this good feeling and of these near relations, and of our mutual, reciprocal wants, the commercial intercourse between the peoples of the two countries has increased year by year until it has become enormous in proportions, exceeding in value anything of the kind to be found in any other part of the world, amounting to $150 per annum for every inhabitant of the islands. Were our trade with Canada in like proportion it would exceed $750,000,000 per annum instead of about $80,000,000, as at present.

Did we trade with Mexico, our next-door neighbor, in like ratio, our purchases from and sales to our friends on the south would amount to $1,800,000,000 in a single year, instead of one-sixtieth of that figure, or $30,000,000, as they actually are in value, and would equal the entire foreign commerce of the United States. Were we so intimately connected with Great Britain and Ireland, our relations with the shrewd, clever traders of that Kingdom would amount in dollars to nearly six thousand millions per annum, a figure 1,000 per cent above the real money value of the trade in question. Did the United States deal with all foreign people upon the same basis as the Hawaiians do with us, our exports and imports would exceed the enormous figure of ten thousand million dollars and would be six times greater than they are at present.

But not only is the American Hawaiian trade so great per capita, but it is great also in volume, amounting to $15,000,000 per annum, and its destruction would be a serious and severe blow to even so numerous and strong a people as those of the United States. And not only that, but the great bulk of the trade of these friendly Hawaiians is given to the United States, upward of 90 per cent of the whole. Further, this trade is and always has been chiefly in the hands of American citizens, who in the islands have vast interests, and who either there or at home control the shipping and all other elements that go to constitute this enormous, unequaled, and lucrative trade. There they have been nearer home and nearer to the old flag than they could have been in any other spot outside of our own national limits. They have taken with them their schools, their churches, their fraternal societies, and they have long contemplated the day when the national emblem will wave over them undisputed and alone.

The people of Washington are vastly interested in this island group. On

the 3d of May, 1897, a single ship, bound for Honolulu, took out of the port of Seattle 4,000 tons of American coal, lumber, lime, flour, and other native products. She will return in a few weeks with fruit and other produce of the islands. Hundreds of millions of feet of Puget Sound lumber have in the past gone into that friendly country, and the trade of our people is now larger than ever before. The first legislature that met in this Territory of Washington—that of 1854—asked the Federal Government to take steps necessary to secure the annexation of these islands to the United States. The importance of the matter was recognized then and has been since by succeeding legislatures and lesser bodies of a commercial and public character. We can not do better than reiterate their statements and request, which we now do formally, earnestly, and hopefully. The acquisition of this group of islands, so considerable in extent, so rich in resources, so vast in trade, so promising for the future, so situated opposite our coast, would be, it is believed, a tower of strength to the United States, which our Government should not longer delay in establishing for the protection and benefit of our own country and people.

By EDWARD O. GRAVES, *President.*

Attest:
EMMET SIMMS, *Secretary.*
Adopted May 12, 1897.

Mr. PETTIGREW presented a petition of sundry citizens of Deadwood, S. Dak., praying for the enactment of legislation for a more rigid restriction of immigration; which was ordered to lie on the table.

Mr. NELSON presented a petition of the Board of Trade of Minneapolis, Minn., praying for the passage of a national bankruptcy law; which was ordered to lie on the table.

He also presented the petition of Frank McCleary and sundry other citizens of Duluth, Minn., and the petition of C. M. Simpson and sundry other citizens of Duluth, Minn., praying for the enactment of legislation for a more rigid restriction of immigration; which were ordered to lie on the table.

He also presented a petition of the Minneapolis (Minn.) Exchange, praying Congress to pass without amendment section 666 of the pending tariff bill, relating to the free entry of wearing apparel, personal effects, etc.; which was ordered to lie on the table.

He also presented a memorial of the Minneapolis Board of Trade, of Minneapolis, Minn., remonstrating against any delay in the work already commenced on Lock and Dam No. 2; which was referred to the Committee on Commerce.

Mr. CULLOM presented a memorial of the Graduate Club of the University of Chicago, Illinois, remonstrating against the proposed duty on books and other publications not published in the United States; which was ordered to lie on the table.

He also presented a memorial of the Travelers' Protective Association, of Peoria, Ill., remonstrating against the enactment of legislation intended to destroy the present system of ticket brokerage; which was referred to the Committee on Interstate Commerce.

He also presented a petition of the Wholesale Liquor Dealers' Association of St. Louis, Mo., praying for a reduction of the duty from $1.10 to 70 cents on proof spirits and also to shorten the present bonded period from eight years to one year; which was ordered to lie on the table.

Mr. TURPIE presented a memorial of Federal Labor Union No. 6620, of Fort Wayne, Ind., remonstrating against an increase of the internal-revenue tax on tobacco; which was ordered to lie on the table.

He also presented a petition of the Indianapolis Musicians' Protective Association, of Indianapolis, Ind., praying for the retention of the present duty on musical instruments, parts thereof, etc.; which was ordered to lie on the table.

He also presented the memorial of Philip Goetz, treasurer of the Indiana Bicycle Company, of Indianapolis, Ind., relative to the duty on emery ore and corundum; which was ordered to lie on the table.

He also presented a memorial of the Madison Brewing Company, of Madison, Ind., remonstrating against an increase of the duty on beer; which was ordered to lie on the table.

He also presented a memorial of John R. Hall & Co., of New York City, relative to the duty on linen thread; which was ordered to lie on the table.

He also presented a memorial of United Diamond Workers' Union No. 6476, of New York, remonstrating against the adoption of Schedule N, paragraph 425, of the pending tariff bill, relating to the duty on diamonds; which was ordered to lie on the table.

He also presented a memorial of John Brower & Co., of New York City, relative to the duty on pot and curl ashes; which was ordered to lie on the table.

He also presented a memorial of the M. S. Pacholder Company, of Baltimore, Md., relative to the duty on cigars and tobacco; which was ordered to lie on the table.

He also presented a memorial of L. A. Salomon & Bro., of New York City, relative to the duty on fuller's earth; which was ordered to lie on the table.

He also presented a memorial of Justice, Bateman & Co., wool commission merchants, of Philadelphia, Pa., relative to the wool schedule in the pending tariff bill; which was ordered to lie on the table.

Mr. BATE presented a petition of sundry citizens of Elizabethton, Tenn., praying for the enactment of legislation for a more rigid restriction of immigration; which was ordered to lie on the table.

Mr. HANSBROUGH presented sundry memorials of citizens of North Dakota, remonstrating against the proposed increase of duty on imported Habana filler and Sumatra wrapper tobacco; which were ordered to lie on the table.

He also presented the memorial of R. E. Fleming and sundry other citizens of North Dakota and a memorial of sundry citizens of Buffalo, N. Dak., remonstrating against the proposed duty of $2 per thousand feet on rough white pine lumber; which were ordered to lie on the table.

Mr. COCKRELL. I present a resolution adopted at a meeting of the board of directors of the St. Louis Cotton Exchange, favoring the passage by Congress of a bill to establish a new department of the Government, to be entitled the "department of commerce and industry," for the general purpose of fostering a wider and more systematic development of our commerce, domestic and foreign, and the various industrial interests throughout the country, and of concentrating in one department the several matters pertaining to commerce and industry which are now included in separate and inappropriate departments. They are also in favor of including in such department a tariff bureau. I move that the resolution be referred to the Committee on Finance.

Mr. FRYE. The Committee on Commerce have that subject now under consideration.

Mr. COCKRELL. Then let the resolution be referred to the Committee on Commerce.

The VICE-PRESIDENT. In the absence of objection, it will be so ordered.

Mr. COCKRELL presented a memorial of Cigar Makers' Union No. 44, of St. Louis, Mo., and a memorial of the Central Trades and Labor Union, of St. Louis, Mo., remonstrating against the enactment of legislation intended to destroy the present system of ticket brokerage; which were referred to the Committee on Interstate Commerce.

PREVENTION OF CRUELTY TO ANIMALS.

Mr. COCKRELL. I present a memorial signed by S. C. Busey, M. D., representing the Medical Society of the District of Columbia; George M. Sternberg, M. D., representing the Biological Society; D. E. Salmon, D. V. M., representing the Agricultural Department; Walter Reed, M. D., representing the Medical Department of the United States Army; D. S. Lamb, M. D., representing Howard University; C. W. Stiles, Ph. D., representing the Georgetown Medical School; E. A. De Schweinitz, M. D., representing the Columbian Medical School; H. N. Stokes, Ph. D., representing the Chemical Society of Washington; W. M. Sprigg, M. D., representing the National University, and Frank Baker, M. D., representing the Anthropological Society, remonstrating against the passage of Senate bill No. 1063, for the further prevention of cruelty to animals in the District of Columbia, and in part answering the report of the Senate Committee on the District of Columbia upon that bill, Report No. 116. I move that the memorial lie on the table and that it be printed as a document.

The motion was agreed to.

Mr. COCKRELL subsequently said: I move that Senate Document No. 31, Fifty-fourth Congress, second session, in regard to the prevention of cruelty to animals in the District of Columbia, and Senate Document No. 31, part 2, Fifty-fourth Congress, second session, relating to vivisection in the District of Columbia, be printed in connection with the memorial of the representatives of the medical and other scientific societies of the District of Columbia which I presented to the Senate during the morning hour.

The motion was agreed to.

REPORTS OF COMMITTEES.

Mr. VEST, from the Committee on Commerce, to whom was referred the bill (S. 1944) to authorize the construction of a bridge across the Clinch River, Kingston, Tenn., reported it with amendments.

He also, from the same committee, to whom was referred the bill (S. 1978) extending the time for the commencement and completion of the railroad bridge across the Illinois River, near Grafton, Ill., by the St. Louis, Perry and Chicago Railroad, reported it without amendment.

Mr. STEWART, from the Committee on Claims, to whom was referred the bill (S. 546) for the relief of the estate of A. H. Herr, deceased, late of the District of Columbia, reported it without amendment, and submitted a report thereon.

He also, from the same committee, to whom was referred the bill (S. 466) for the relief of the administrators of Isaac P. Tice, deceased, and others, reported it without amendment, and submitted a report thereon.

Mr. HANSBROUGH, from the Committee on the Library, to whom was referred the joint resolution (S. R. 23) amending Senate resolution of May 13, 1886, providing for marble busts of those who have been Vice-Presidents of the United States to be

placed in the vacant niches of the Senate Chamber, reported it with an amendment making the joint resolution a Senate resolution, and submitted a report thereon.

He also, from the Committee on Public Lands, to whom was referred the bill (S. 1123) to provide for the examination and classification of certain lands in the State of California, reported it without amendment.

FUNERAL OF SENATOR EARLE.

Mr. GALLINGER, from the Committee to Audit and Control the Contingent Expenses of the Senate, reported the following resolution; which was considered by unanimous consent, and agreed to:

Resolved, That the expenses incurred by the committee appointed by the Vice-President on the 21st instant to make arrangements for and attend the funeral of the Hon. JOSEPH H. EARLE, late a Senator from the State of South Carolina, at Greenville, S. C., be, and they hereby are, directed to be paid out of the "miscellaneous items" of the contingent fund of the Senate.

CORRESPONDENCE RELATING TO FUR SEALS.

Mr. MORGAN, from the Committee on Foreign Relations, reported the following resolution; which was considered by unanimous consent, and agreed to:

Resolved, That the President is requested, if in his opinion it is not incompatible with the public interests, to send to the Senate the correspondence in the Departments of State and of the Treasury, not heretofore printed, relating to the fur seals in the Bering Sea and the North Pacific Ocean.

PAY OF STENOGRAPHER.

Mr. PERKINS, from the Committee on Naval Affairs, reported the following resolution; which was referred to the Committee to Audit and Control the Contingent Expenses of the Senate:

Resolved, That the stenographer employed to report statements before the Committee on Naval Affairs relative to armor for the Navy be paid from the contingent fund of the Senate.

BILLS INTRODUCED.

Mr. GALLINGER introduced a bill (S. 2014) to provide for the sprinkling of the streets of the District of Columbia, and thereby to better promote the health and comfort of the people, and for other purposes; which was read twice by its title, and referred to the Committee on the District of Columbia.

He also introduced a bill (S. 2015) granting a pension to Lillian M. Yost; which was read twice by its title, and referred to the Committee on Pensions.

He also introduced a bill (S. 2016) for the relief of David D. Smith; which was read twice by its title, and, with the accompanying papers, referred to the Committee on Claims.

Mr. ELKINS introduced a bill (S. 2017) granting to the New Mexico and Arizona Railroad Company right of way and lands for station grounds; which was read twice by its title, and referred to the Committee on Public Lands.

Mr. CULLOM. I introduce a bill proposing to amend the act regulating commerce, which has been forwarded to me from a business organization in Chicago. I do not know the contents of the bill very fully, but as the organization requests that I introduce it and have it printed, I do so, and I also ask that it be referred to the Committee on Interstate Commerce.

The bill (S. 2018) to amend an act entitled "An act to regulate commerce," approved February 4, 1887, was read twice by its title, and referred to the Committee on Interstate Commerce.

Mr. TURPIE introduced the following bills; which were severally read twice by their titles, and, with the accompanying papers, referred to the Committee on Pensions:

A bill (S. 2019) granting a pension to Eliza J. West; and

A bill (S. 2020) restoring to the pension rolls Mrs. Damsell J. Davis.

Mr. DEBOE introduced a bill (S. 2021) for the relief of Joseph W. Pomfrey; which was read twice by its title, and referred to the Committee on Military Affairs.

Mr. WARREN introduced a bill (S. 2022) for the relief of Louis Miller; which was read twice by its title, and, with the accompanying papers, referred to the Committee on Military Affairs.

Mr. HARRIS of Kansas introduced a bill (S. 2023) removing the charge of desertion from the name of Alfred Rebsamen, of Olathe, Kans.; which was read twice by its title, and referred to the Committee on Military Affairs.

Mr. ROACH introduced a bill (S. 2024) to provide for the erection of a public building in the city of Grand Forks, N. Dak.; which was read twice by its title, and, with the accompanying paper, referred to the Committee on Public Buildings and Grounds.

Mr. GORMAN introduced a bill (S. 2025) for the relief of M. Cansin Waring; which was read twice by its title, and referred to the Committee on Claims.

Mr. WHITE introduced the following bills; which were severally read twice by their titles, and, with the accompanying papers, referred to the Committee on Pensions:

A bill (S. 2026) granting a pension to Harriett A. Tappan; and

A bill (S. 2027) granting a pension to John Bryan.

AMENDMENTS TO THE TARIFF BILL.

Mr. FAULKNER submitted an amendment intended to be proposed by him to the bill (H. R. 379) to provide revenue for the Government and to encourage the industries of the United States; which was ordered to lie on the table and be printed.

Mr. PROCTOR submitted two amendments intended to be proposed by him to the bill (H. R. 379) to provide revenue for the Government and to encourage the industries of the United States; which were ordered to lie on the table and be printed.

Mr. BURROWS (by request) submitted two amendments intended to be proposed by him to the bill (H. R. 379) to provide revenue for the Government and to encourage the industries of the United States; which were ordered to lie on the table and be printed.

Mr. PETTIGREW submitted an amendment intended to be proposed by him to the bill (H. R. 379) to provide revenue for the Government and to encourage the industries of the United States; which was ordered to lie on the table and be printed.

AMENDMENTS TO DEFICIENCY APPROPRIATION BILL.

Mr. CARTER. In accordance with the request of the Secretary of the Interior, embodied in a communication addressed to the President of the Senate on the 19th instant, found in Senate Document No. 95, and by direction of the Committee on Public Lands, I submit an amendment to the deficiency appropriation bill, providing for an extension of the time for the exercise of the preference right of entry to settlers in Greer County, Okla. I move that it be referred to the Committee on Appropriations and printed.

The motion was agreed to.

Mr. WARREN submitted an amendment intended to be proposed by him to the general deficiency appropriation bill; which was referred to the Committee on Appropriations, and ordered to be printed.

Mr. TILLMAN submitted an amendment intended to be proposed by him to the general deficiency appropriation bill; which was referred to the Committee on Appropriations, and ordered to be printed.

WITHDRAWAL OF PAPERS.

On motion of Mr. COCKRELL, it was

Ordered, That leave be given to withdraw from the files of the Senate the papers relating to Senate bill 2232 of the first session Fifty-fourth Congress, "to vacate Sugar Loaf Reservoir site in Colorado," there being no adverse report.

TRANSPORTATION OF FOOD CONTRIBUTIONS TO INDIA.

Mr. CHANDLER. In the absence of the senior Senator from Maine [Mr. HALE], the chairman of the Committee on Naval Affairs, I ask that consideration may be given to the joint resolution (S. R. 43) directing the Secretary of the Treasury to give an American register to the foreign-built steamships *Massapequa* and *Menantic*, to enable them to carry grain under the American flag to the sufferers by famine in India. The joint resolution was introduced by him on Thursday last, and I desire to offer a substitute for it.

Mr. MORGAN. Will the Senator from New Hampshire allow morning business to be transacted?

The VICE-PRESIDENT. Morning business is not yet completed. The Senator from New Hampshire desires to call up the joint resolution for consideration?

Mr. CHANDLER. I desire to call it up as a part of the morning business.

Mr. QUAY. I trust the Senator will withhold his request for the consideration of the joint resolution until original resolutions have been gone through with.

The VICE-PRESIDENT. The Chair understands that the joint resolution is on the Calendar and is not a part of the morning business.

Mr. CHANDLER. The Chair is technically right; but the Chair will remember that immediate consideration was asked for the joint resolution when it was introduced, and it went over under objection. I have no objection to waiting until the routine morning business is disposed of. I shall then ask for the consideration of the joint resolution.

The VICE-PRESIDENT. The request for its consideration will be temporarily deferred.

LIQUOR TRAFFIC IN THE DISTRICT OF COLUMBIA.

Mr. GALLINGER. On the 13th day of the present month I reported from the Committee on the District of Columbia, under instructions from that committee, the bill (S. 1800) to further amend an act entitled "An act regulating the sale of intoxicating liquors in the District of Columbia," approved the 3d day of March, A. D. 1893. When that report was made the committee were laboring under the impression that the bill is identical in terms with the bill that had been reported in the last Congress. Upon an examination it is found to be different in many particulars, and I move that it be taken from the Calendar and recommitted to the Committee on the District of Columbia.

The motion was agreed to.

WICHITA INDIAN LANDS.

Mr. QUAY. I submit a resolution, to which I invite the attention of the chairman of the Committee on Indian Affairs [Mr. PETTIGREW]. If he has no objection, I should be glad to have it passed this morning. If he objects to the resolution, it can go over under the rule.

The resolution was read, as follows:

Resolved, That the right to compensation on the part of the Wichita and affiliated bands of Indians for their possessory right in and to the lands ceded to the United States by said Indians, under the agreement made and entered into between said Indians and the United States at Anadarko, in the Indian Territory, on the 4th day of June, A. D. 1891, should be considered and adjusted at the same time and by the same tribunal which shall determine the alleged claim of the Choctaw and Chickasaw nations in and to the said lands, and that the President is hereby requested to suspend the allotments to said Indians now in progress until the compensation to be allowed and paid to said Indians for the lands in excess of allotments shall be finally determined.

The VICE-PRESIDENT. Is there objection to the present consideration of the resolution?

Mr. PETTIGREW. Let the resolution go over until to-morrow. I do not know that I have any objection to it, but it is quite an important matter, and I should like to look at it.

The VICE-PRESIDENT. The resolution lies over.

EXCLUSION OF AMERICAN CITIZENS FROM RUSSIA.

Mr. PERKINS submitted the following resolution; which was read:

Whereas a refusal by the chargé d'affaires of the Russian legation to visé a passport duly issued by the Department of State by an American citizen has raised the question of invidious distinction by the Russian Government against certain Americans who are among the most useful, intelligent, and patriotic of the people of the United States; and

Whereas Prince Lobanow, imperial minister of foreign affairs, under date of August 12, 1895, informed the minister of the United States at St. Petersburg that "the Imperial Government having already many millions of Jewish subjects, only admits their congeners of foreign allegiance when they seem to present a guaranty that they will not be a charge and a parasite element in the State, but will be able, on the contrary, to be useful to the internal development of the country;" and

Whereas the citizen refused admission to Russia is one of the wealthiest, most progressive, and most public spirited of the residents of California, and in no way liable to become a charge upon the Russian Government, but able, if a resident, to be useful to the internal development of that country; and

Whereas said citizen desired simply to visit Russia for the purpose of seeing relatives and not for the purpose of permanent residence; and

Whereas refusal to visé his passport seems to have been based on the single fact that he professes the Jewish and not the Christian faith, which is contrary to the definition given by the imperial minister of foreign affairs of the class of persons who are prohibited from entering the Russian dominions; and

Whereas the apparent contradiction between the theory and the practice of the Russian Government gives rise to the suspicion that a certain class of our citizens are excluded from the benefits of travel and temporary sojourn in Russia simply because of their religious belief; and

Whereas such distinction would be abhorrent to all people who believe in the right of men to worship according to the dictates of conscience: Therefore,

Resolved, That this Government request the Imperial Government of Russia to specifically declare whether American citizens are excluded from Russia on account of their religious faith, and if so, that said Imperial Government of Russia be requested to remove such prohibition and to permit Americans of whatever religious faith to visit Russia, if they are not liable to become a charge upon the Empire by reason of poverty or an inability to support themselves by honest labor.

Mr. PERKINS. Mr. President, I ask unanimous consent to explain in a very few words my object in introducing this resolution, and then I shall ask its reference to the Committee on Foreign Relations.

A few days since Mr. Adolph Kutner, a respectable and influential merchant and banker of California, came to this city en route to Europe for the purpose of visiting his friends in Russian Poland. He has been a resident of California for more than forty years and for thirty years or more a citizen of the United States. He has the respect and confidence of all who know him.

He arrived in this city, visited the State Department, and there obtained his passport, to which he was entitled. He then visited the Russian legation and asked to have his passport viséed. The chargé d'affaires asked him if he was a Christian. His reply was no; that he was a Hebrew. "Then," said the chargé d'affaires, "the laws of my country do not permit me to visé your passport. We have no use for you or your class of people in our country."

As I stated, he was en route to Russian Poland, to Warsaw, the capital city of that country, where there is a population of 450,000, I think, one-third of whom are Jews. He wished to visit his aged sister and relatives, who are unable to come to him. For thirty years or more he had contributed money and sent it to them from month to month and year to year, assisting them in their own country, and his desire again to return was prompted by the filial affection well known to the Hebrew race. He wished to erect a monument to the memory of those who had died and to pay a last tribute of respect and filial affection to those who are living.

It seems to me that in these days, when we are extending our sympathy by resolution to the Armenians, the Greeks, the Cubans, and every other nationality, we ought to pay some consideration to American citizens. It appears to me that in a land where we all worship at the same shrine, that is, American citizenship—the highest honor and the most noble shrine that anyone can bow in admiration to—where as to a man's religion it is a question between his own conscience and his God whether he be Jew or Gentile, Protestant or Catholic, whether he is a follower of Confucius or of Buddha, and we do not ask that question if he is a good American citizen and believes in the dignity and honor of American citizenship, we ought not to pass over such a case in silence.

I was not content when this gentleman returned to my office and reported to me that he had been denied the right to have his passport viséed, but I waited upon the Department. There I was courteously referred to the correspondence that had passed between our Government and Russia under the previous Administration, and which is printed in our publication upon foreign relations. I found that correspondence in a similar case had taken place, and the representative of the Russian Government claimed that the religion of the Jews is a political question. I am unable to find any such interpretation in any of the modern lexicons of the day.

As I said before, it seems to me that we should not permit this matter to rest without further negotiations, so that we may follow an American citizen, whether he be Jew or Gentile, with our arm of protection into whatever country he may wish to go. Therefore, prompted by this patriotic reason alone, and I can conceive of none higher, I think we should ask the committee to investigate this question carefully and make such recommendation to the State Department as will relieve our citizens who desire to visit foreign countries from being obliged to subscribe to some particular religious faith in order to gain admission into another country.

The VICE-PRESIDENT. Is there objection to the present consideration of the resolution?

Mr. PLATT of Connecticut. The motion is to refer it.

Mr. PERKINS. Yes; to the Committee on Foreign Relations.

The VICE-PRESIDENT. It can only be referred to-day by unanimous consent. Is there objection to its consideration? The Chair hears none. The question is on the motion to refer the resolution to the Committee on Foreign Relations.

The motion was agreed to.

PAY OF STENOGRAPHER.

Mr. PETTIGREW submitted the following resolution; which was referred to the Committee to Audit and Control the Contingent Expenses of the Senate:

Resolved, That the stenographer employed to report the hearing before the Committee on Indian Affairs May 19, 1897, in relation to the Osage Indians, be paid out of the contingent fund of the Senate.

PACIFIC RAILROADS.

Mr. PETTIGREW. I offer the resolution which I send to the desk, and ask for its immediate consideration.

The VICE-PRESIDENT. The resolution will be read.

The Secretary read as follows:

Resolved, That the President is hereby requested to inform the Senate what action, if any, has been taken, and with what result, under sections 3 and 4 of a joint resolution, approved April 10, 1869, entitled "A joint resolution for the protection of the interests of the United States in the Union Pacific Railroad Company and the Central Pacific Railroad Company, and for other purposes." Also, what action has been taken under section 4, page 509, volume 17, United States Statutes at Large. Have suits been commenced and the other provisions of said section enforced, and with what result? Have mortgages been made or dividends declared by said company in violation of said section, and what has been done in relation thereto? Also, what action has been taken to enforce the provisions of the act of May 7, 1878, known as the Thurman Act? And have the provisions of sections 10 and 11 of said act been enforced, or any steps taken to forfeit the charters of said companies? And has the amount paid to the Pacific Mail been first deducted from the gross earnings before the amount due and paid into the sinking fund was determined? Also, what steps have been taken to protect the interests of the United States, as required by section 4 of the act of March 3, 1887, chapter 345, volume 24, United States Statutes at Large? Also, inform the Senate if said Union Pacific Railroad was, at the time it went into the hands of a receiver, insolvent. And were the earnings of said company sufficient to pay its operating expenses and interest on its indebtedness, which was a prior lien to that of the United States?

The VICE-PRESIDENT. Is there objection to the present consideration of the resolution?

Mr. PETTUS. Mr. President, it seems to me that the resolution involves a vast amount of reporting from the President. I should like to have the resolution explained by the Senator who offers it. I can not understand how so much as that could be needed; in other words, I think we have in our possession a good deal of the information called for.

Mr. PETTIGREW. I could not hear all that the Senator said, but I judge he desires to know why the resolution is introduced. I introduced the resolution for the purpose of securing information with regard to the steps which have been taken to protect the interests of the Government under the various laws in relation to the Pacific railroads. I suppose before this session closes the question of extending the time for the payment of this debt, or the question of the foreclosure of the lien of the Government upon those roads, will be considered by Congress, and the information desired, as expressed in this resolution, is essential, I think, to a proper and clear understanding of the question on the part of the Senate; at least, I desire very much that the information shall be furnished before the question of settling with these railroad companies shall be disposed of by the Congress of the United States.

The VICE-PRESIDENT. Is there objection to the present consideration of the resolution? The Chair hears none, and the question is on its adoption.

Mr. GEAR. I would suggest to the Senator from South Dakota that there is no legislation pending with regard to the Union Pacific Railroad. There is a suit for foreclosure on account of the nonpayment of bonds and interest. The matter is in the hands of the Government. Everybody knows that a certain deposit has been put up and placed in the hands of the Government, amounting to three-quarters of a million, to guarantee some bid or bids which it is proposed to make. The matter is entirely in the courts at present.

Mr. CHANDLER. I do not object to the resolution if it can be disposed of without debate; but if there is to be debate upon it, I must object to its consideration.

The VICE-PRESIDENT. The question is on the adoption of the resolution.

The resolution was agreed to.

PAYMENTS TO CHEROKEE FREEDMEN.

Mr. PETTIGREW submitted the following resolution; which was considered by unanimous consent, and agreed to:

Resolved, That the Secretary of the Interior is hereby directed to inform the Senate the reason why the payment to the Cherokee freedmen was stopped, and also send to the Senate a copy of all papers in relation to said payment.

MANUFACTURE OF ARMOR PLATE.

Mr. CHANDLER. I now ask that Senate joint resolution No. 43, in relation to the transportation of food contributions to India, may be considered.

Mr. BUTLER. I should like to state before that is done that on Thursday last I offered a resolution calling for information which I desire to have considered. I do not think it will lead to discussion, and it properly comes within the morning business.

The VICE-PRESIDENT. The resolution will be taken up in regular order.

Mr. BUTLER. The resolution to which I refer is a simple resolution calling for information from the Secretary of the Navy.

Mr. CHANDLER. The joint resolution which I desire to have considered is to provide a ship to take contributions to the destitute poor of India.

Mr. BUTLER. Does the Senator think it will lead to any debate? If it does, I shall have to insist on the consideration of my resolution.

Mr. CHANDLER. If the Senator insists upon his right, I can not object, Mr. President.

The VICE-PRESIDENT. The Chair lays before the Senate the resolution submitted by the Senator from North Carolina [Mr. BUTLER] on Thursday last, which will be read.

The Secretary read the resolution, as follows:

Resolved, That the Secretary of the Navy be, and he is hereby, directed to inform the Senate the amounts of armor plate purchased by the Government at various times from the Bethlehem Iron Company and the Carnegie Steel Company, respectively, and the price paid per ton, and how much financial assistance, if any, the Government has given these companies, either by extra price per ton for armor plate or in any other way, to assist them in building and equipping and conducting their armor-making plants.

Mr. BUTLER. I desire to modify the resolution by adding to it what I send to the desk.

The VICE-PRESIDENT. The modification proposed by the Senator from North Carolina to his resolution will be stated.

Mr. BUTLER. I ask to have the entire resolution read as it will stand when modified.

The VICE-PRESIDENT. The resolution, as modified by the Senator from North Carolina, will be read.

The Secretary read as follows:

Resolved, That the Secretary of the Navy be, and he is hereby, directed to inform the Senate the number of tons of armor plate bought from the Bethlehem Iron Company and the Carnegie Steel Company, respectively, and the amount per ton paid for each separate lot, and the vessels on which the armor plate was used, and how much financial assistance the Government has given each of these companies by the extra price per ton paid for armor and for gun steel for the Army and Navy, and in any other way. And also all correspondence, memoranda, contracts, or reports bearing on the cost of armor plate under the first agreements, and showing the nature of such agreements between the Government and each of the companies. Also why, after the Government had contracted with one company to make and furnish armor plate, the Navy Department thought it necessary to contract with another company for the same purpose.

The VICE-PRESIDENT. The question is on the adoption of the resolution as modified.

The resolution as modified was agreed to.

TRANSPORTATION OF FOOD CONTRIBUTIONS TO INDIA.

Mr. CHANDLER. I now ask that Senate joint resolution No. 43, in relation to the transportation of food contributions to India, may be considered.

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the joint resolution (S. R. 43) directing the Secretary of the Treasury to give an American register to the foreign-built steamships *Massapequa* and *Menantic*, to enable them to carry grain under the American flag to the sufferers by famine in India.

Mr. CHANDLER. I now ask that the amendment, which I offer in the nature of a substitute, may be read.

The VICE-PRESIDENT. The amendment proposed by the Senator from New Hampshire will be stated.

The SECRETARY. It is proposed to strike out all after the resolving clause of the resolution and insert:

That the joint resolution of April 7, 1897, authorizing the Secretary of the Navy to transport contributions for the relief of the famishing poor of India, be, and the same is hereby, amended by striking out the word "American" before the words "steamship or vessel;" and the Secretary is hereby authorized to charter and employ any suitable steamships or vessels, not exceeding two in number, to carry out the object of said resolution.

The VICE-PRESIDENT. The question is on the adoption of the amendment.

The amendment was agreed to.

Mr. MORGAN. I should like to hear the effect of that amendment explained by the Senator from New Hampshire. I do not exactly understand it.

Mr. CHANDLER. Mr. President, the original resolution proposed to grant an American register to two English steamships to transport the contributions of grain and other food from New York City to India. Inasmuch as there were no American vessels which could be hired at this time to start promptly with the contributions, the Secretary of the Navy, in his communication of May 18, read in the Senate on last Thursday, seemed to give countenance to that proposition; but I am now informed by the Secretary that he prefers the method which I then suggested upon the floor of the Senate; that is to say, to strike out the limitation of the original resolution, which required that the contributions should be transported in an American ship, and to allow any ship of any nationality to be hired for this purpose. That is now the Secretary's wish, and it is the wish of the benevolent citizens who have furnished the contributions.

I have here a letter written to the Secretary of the Navy by Mr. Louis Klopsch, proprietor of the Christian Herald, from which I will read a few words. He says:

This matter is so intensely urgent that, personally, I would be willing to make almost any sacrifice within my power to bring it to a speedy and successful conclusion. Notwithstanding all reports to the contrary, the famine conditions in India are worse to-day than they were three months ago, and it seems almost criminal, in view of the thousands that are dying daily, to have the shipment of this corn longer delayed. I wish to say here that I am confident that your Department has done everything in its power to afford us the required facilities. Of course you can not furnish what is not to be obtained, and therefore I would not even imply any remissness on the part of the honorable Secretary of the Navy or his Department, but if American ships are not to be had, then the insertion of the word "American" was a mistake which ought to be speedily corrected, and were I to see you to-morrow the burden of my remarks would be: "Inasmuch as there are no American ships to be obtained, and as there is a decided opposition manifested toward the naturalization of two British vessels, why not speedily get Congress to strike out of the resolution to grant us the transportation the word 'American,' and thus, without establishing any precedent or affecting any shipping interests, solve the problem in the twinkling of an eye?"

If that could be accomplished on Monday, we would begin to load Tuesday, and by Thursday, or the very latest, Saturday next, 150,000 bushels of corn would be off on their life-saving mission, and this chapter of one of the greatest international charities would be successfully closed, to the credit of our country.

I think it is clear that this joint resolution ought to pass, and it ought to pass promptly and without objection.

Mr. MORGAN. I wish to ask the Senator what was the date of the passage of the original resolution?

Mr. CHANDLER. The original resolution was passed April 7, and the Navy Department, as stated by the correspondence submitted to the Senate on Thursday last, has been endeavoring to secure an American ship or American ships; but, as is well known, we have not many available cargo-carrying American steamships. Therefore it will be necessary to send these contributions of food, if they are to go promptly, in English ships now lying in the harbor of New York.

Mr. MORGAN. Did that resolution originate in the House of Representatives or in the Senate?

Mr. CHANDLER. I am not able to answer the Senator. I am not certain.

Mr. CARTER. It originated in the Senate, having been introduced by the Senator from Maine [Mr. HALE].

Mr. CHANDLER. The original resolution, which was offered on last Thursday by the Senator from Maine, recites:

Whereas there is now stored in New York warehouses about 3,000 tons of grain contributed by the charitable people of the United States for the famishing inhabitants of India; and

Whereas there has been contributed about $100,000 for the purchase of additional food products for the same purpose.

A ship can be loaded, or two ships can be loaded, immediately if this resolution promptly becomes a law, and of course it is preferable to do it in this way rather than to let the original resolution stand and grant an American register to two British ships, which, after they have transported this food to India, will come back to this country and have the privilege of engaging in our coasting trade.

Mr. MORGAN. I believe, Mr. President, we have reached an

era in our history in which it appears to be necessary, before we can count upon any measure being acted upon at all in the direction of its becoming a law, to consult somebody at the other end of the Capitol as to whether it can be allowed to be taken up and passed, and I should like to know of the Senator from New Hampshire, as this is a matter apparently of considerable urgency, whether any arrangements have been made for the passage of this joint resolution through the House of Representatives?

Mr. CHANDLER. The Senator knows that I can give but one answer to that. The Senate is an independent body; it legislates according to its own judgment, and never makes arrangements, so far as I know, for the passage of any measure through the other House before acting upon it in this. I would ask the Senator whether he has made any arrangement for the passage in the other House of the Cuban resolutions which passed the Senate by such a large majority last week?

Mr. MORGAN. None at all. I think the people are arranging for that. The people have got that matter in hand, and they will very soon bring it about one way or the other. Something will have to give way—either the Senator from New Hampshire and myself with the people and the Almighty on one side or the Speaker of the House of Representatives on the other; and I think on that count we are in a majority. The Speaker, I hope, will be prudent and give way. I have not arranged for anything.

Mr. CHANDLER. If the Senator will allow me to say so, I shall be very glad to do anything we may to get that resolution acted upon in the House of Representatives, but I do not believe we had better now indulge in a habit which we are too much inclined to indulge in, of mixing things in the Senate. We disposed of the Cuban resolution, and the responsibility is now upon the House of Representatives. We have here the case of sending a little aid to the starving people of India. Now let us act upon that, and put the responsibility upon the House of Representatives, where I have no doubt it will be promptly met. I think if the Senator will refrain from speaking upon this resolution with his usual eloquence and ability, and let the resolution be passed and go to the House of Representatives, and then help us with the consideration of the tariff bill, he will be doing as great a public service as he did last week in securing the action which the Senate thought proper for the suffering people of Cuba.

Mr. MORGAN. Mr. President, I am not trying to mix these things, but I am trying to get them unmixed and get them back on the old lines. We used to be confronted with theories we thought we understood. Now we are confronted with conditions which we think we do not understand, and I thought it was quite a legitimate inquiry to make of the Senator as to whether this proposed relief, which appears to be very urgent, could be obtained by the action of the House of Representatives. I am very happy to know that anything that originates in the Senate has the possibility of going through the other House, though the Senator does not know any more about it, it appears, than I do.

There is a feature of the resolution we are about to amend here which has great charm for the people of the United States, and particularly for those gentlemen who have been always in favor of having American-built ships and letting them carry an American register—that is, that the ships that are to carry this corn, this sweet benevolence of the people of the United States to the suffering Empire of Great Britain, should be American ships, sailed by American men, under the American flag.

There is a very beautiful sentiment connected with that, in my opinion, and, I think, a very grand line of policy associated with it, that we should have this American benevolence carried to the shores of India, to those poor starving wretches, the subjects of Her Majesty Victoria, in our own national ships and under our national flag, and that this kind of benevolence should be extended in the name of our nation, and with all of the insignia of our national authority and pride around it. It strikes my mind as being something very splendid just at this moment of time. It indicates that the course the Senate has taken on the subject of arbitration was a wise course, because we expect to convince the British people that we intend to live with them upon terms of charity and benevolence and kindness, which need not be constrained by any treaty obligations at all. When left to our own free will and our own convictions of duty to God and to man, the American people, Mr. President, have not been and will not be delinquent in the performance of any duty that is incumbent upon them.

Now we propose to strike out of that resolution the words "American ships," and that suggests a very important inquiry as to why those words should be stricken out. Is it a fact that we have not got American ships at the port of New York or elsewhere in reach of the port of New York, by telegram or by cable, that we can summon to that city for the purpose of taking out this splendid charity to the people in India? Is that true; and if it is true, what has been the cause of it? From what situation, legal or otherwise, has this very unfortunate fact been revealed to us in this moment, when it would be so gratifying to the people of the United States to know that we had ships that could sail under the American flag and carry this beautiful charity to the shores of India?

There must be some fault in our legislation, or in the enterprise of our people, or in the poverty of their resources in respect of capital, to produce that calamitous situation, that humiliating situation, that we can not find an American ship which can wear the American flag to take this American bounty to the shores of India. That is a subject that requires investigation and examination. It is thrust upon us here at a moment of time when it becomes very significant indeed in respect of our standing amongst the nations of the earth as a great maritime or commercial power. We have no American ships, we are informed by the honorable Secretary of the Navy and also by the Senator from New Hampshire [Mr. CHANDLER], that can be found to carry these supplies to India.

What is the reason for that national humiliation? What has provoked it or caused it? It must be that there is some bad law upon the statute books, because we are not absolutely stricken with poverty, we are not altogether without enterprise. It must be, therefore, that there must be some bad legislation that has brought us to this direful situation. What is that law?

I think, Mr. President, it is our navigation laws. I think it is the law which prohibits us from naturalizing or domesticating a ship that is built in any foreign country, notwithstanding it is owned by our own people, and officered by Americans. I would respectfully suggest that some substitute ought to be found for this condition of things at the present moment of time by a relaxation of our navigation laws to the extent, at least, of permitting certain American citizens—who do own ships that were built in Great Britain, it is true; but they own them, and they are good ships—of permitting them now to come and take this cargo and give them American registry and the flag, and let them go along and take this corn over to the people of India.

Now I know, Mr. President, that our exclusive and seclusive system has built up in the United States certain monopolies of navigation which appear to be very much in our way occasionally. They appeared to be very much in our way when we wanted to establish a great international steamship line to carry the mails between the United States and Great Britain. We provided then that those ships upon certain conditions should have American registers, and those people have gone on, I believe, to make a very profitable arrangement for the transportation of the mails and also have built up a very fine traffic in the transportation of merchandise and passengers. I am disposed to look upon that line of steamships as being a great national success, and I am glad to observe that every American who crosses the Atlantic Ocean and has the money to pay his fare patronizes those vessels in preference to any other. I think it is a fine start we are making in the direction of getting a commercial marine in the United States.

Encouraged by that example, I am in favor of the proposition which has been submitted to the Senate in behalf of a genfleman by the name of Hogan, who, I understand, makes an offer to the Secretary of the Navy, which is printed in these papers. He proposes to furnish immediately two ships, steamers, properly adapted to the transportation of the grain, well ventilated steamers, that will protect the grain against sweating and rotting on its passage across to the hot climate of India, which can be loaded and ready for the sea by Friday night, and the rate of transportation at which he proposes to take the freight will be about one-half the rate we have already engaged to pay to steamers to carry the contributions that are being sent from the port of San Francisco to Bombay. The guaranty of performance, of course, is absolute in the character of Mr. Hogan. His ships are sufficient guaranty for that, and I do not see why we should refuse to grant him that request.

It is very true that it would introduce his steamers to the American registry, and would give them the right to participate in the coastwise trade along with a number of others that are now operating in the same way, some of them ships that have been built up from foreign wreckages and some of them ships built in America. I think the Senate ought not to agree to the amendment, but ought, on the other hand, to accept the proposition of Mr. Hogan, and to that end I will, at the proper moment, offer an amendment to the joint resolution as it was introduced by the Senator from Maine [Mr. HALE].

Now, I will read the statement of facts upon which Mr. Hogan predicates his claim. The ships *Massapequa* and *Menantic* are now ready to receive the grain, and can be ready to sail in forty-eight hours after the joint resolution is passed and they are chartered. There are no other vessels, so far as known, that can take the cargo and sail as speedily as these. Each steamer can carry about 153,000 bushels of wheat or about 164,000 bushels of corn, whether in bulk or in bag. These vessels are fitted with an exceptional number of ventilators, with the object of carrying full cargoes of grain, to insure as far as possible the landing of such in good condition. If the original joint resolution is passed to-day,

all of the grain contributed can be on its way to India not later than Friday evening next, in speedy freight ships, entirely safe, and in every way suitable for the purpose, and carrying our flag, and charging the United States Government less than cost for the freight.

These ships are in the regular trade of carrying cattle to Europe and returning with cargoes to the United States. The ordinary tramp foreign steamships are slow; very few of them can exceed 7 or 8 knots per hour. Hogan's boats can average 10 knots an hour. As the distance is about 9,000 miles, the saving in time would be enormous. Besides, the tramps are not immediately available. Another point to be considered is, namely, that Mr. Hogan offered to carry this grain below cost to the United States, while these British tramp steamers will charge excessive prices. Mr. Hogan's proposition is simply this: He will carry the whole of this grain, about 8,000 tons, more speedily than any other proposition that has been received, at cost price to the United States Government, in first-class ships, owned by United States citizens, officered by United States officers, and carrying the flag of the United States, and the vessels will become a part, and a valuable part, of the auxiliary navy of the United States.

One of the amendments which I propose to offer to the resolution offered by the Senator from Maine is that these vessels may become a part of the auxiliary navy of the United States.

It has been said that the Red Star Line will carry the grain. Upon that subject, here is an extract from the Washington Times, a very accurate and able paper, one upon which I rely confidently for the truth in every case. It is dated May 25, 1897, and headed "Food for starving India:"

> The Navy Department has been informed by an agent in San Francisco that the steamer *City of Everett* will be in that port within six days, prepared to take a load of supplies to India for the starving population there. The steamer is an American, of 2,600 tons capacity, and the owners want $40,000 for making the voyage. The Government will probably charter her.
>
> There are now at San Francisco nearly 700 tons of supplies, and enough to load the vessel can be collected in a short time. So far as can be ascertained, the Navy Department is no nearer to providing a vessel to take the supplies from New York to India than it was a month ago.

Now, this ship of United States register is about to be paid by the Government $15 a ton to carry 2,600 tons of grain to India, making the cost to the Government $39,000. The Hogans propose to take the same amount of grain to India for $6 per ton, or $15,600—less than half. The Hogans propose to take 8,000 tons, at $6 per ton, making the cost to the Government only $48,000, whereas if the same price should have to be paid as is charged by the San Francisco ship it would cost the United States $120,000. The acceptance of the Hogans's proposition would in that case save the United States Treasury $72,000.

Those facts are furnished to me by a gentleman of very high credibility, in whose statements I repose entire confidence. I am obliged to do so from my knowledge of his character. If they are true, then there ought to be some statement made here as to the cost of carrying the grain that will devolve upon the Government of the United States in the event we change the existing law by amendment or repeal so as to strike out the words "American ships." The law providing for this transportation is indefinite as to the amount to be expended. It exposes the Treasury of the United States to an unlimited demand for carrying the grain. No rate per ton is fixed, no amount is prescribed in the law itself, but so much as may be necessary is the requirement of the law which is now upon the statute book.

Now, I am not in favor of paying to British tramps, or to any other tramp, or any competitive line between this country and Europe or elsewhere, any sum of money that they may choose to impose upon the Navy Department for the transportation of the grain, when we have from Americans, who are able to respond to their guaranties and obligations, a definite proposition to carry the grain for about one-half that it already has cost the Government of the United States to make similar shipments from the port of San Francisco to the port of Bombay.

In view of the practical situation, can there be any reason why we, for the sake of getting rid of a question that ought to be settled, at least for the occasion, as to the effect of our navigation laws, should refuse a register to this American citizen for his ship, although it was built abroad? When you charter a ship to take a cargo from an American port to a British port, of course you own the ship for that voyage. It is a limited ownership, a limited title. You therefore, by the joint resolution as you propose to amend it, give the right to a subject of Great Britain, or Germany, or France, or any other foreign country, to come here, draw his drafts upon our Treasury for money taxed out of the people of the United States, in order to carry grain to India to feed the starving poor there.

If our circumstances are really so desperate that we have no American ships to carry this grain abroad, let us get some American ships. Our people buy ships and put them under a British flag, as Hogan's ships are now, and yet we refuse to give them an American register and turn right around and for this voyage charter British ships, without requiring them to take out an American register to carry this food to India. Why does Congress make that sort of discrimination against our own people? We virtually buy the ships to carry the food to India. That is the practical result. And yet, because American citizens have bought British ships which are now under British registry, we refuse to allow them to take out American registry, although the provision we propose to make in their behalf is not a general repeal of the navigation laws, but, like other cases that have occurred, is an exception in favor of these men for the particular emergency.

Why did we authorize British-built ships to come into the passenger and mail line between New York and Southampton? It was because we wanted to make them the nucleus around which should be built up an American line—a very good idea. But those men would not go into it; they would not undertake it at all unless we would allow certain British ships which they then owned or could purchase to come in under American registry. There was an emergency, there was an occasion that required us to depart from this ironclad rule, which I was very glad to see broken up. If it ought to have been departed from in that case and upon that emergency and for that particular reason, why can we not now, with equal justice and propriety, depart from the ironclad rule and allow these two ships to have an American registry? That would arrange the whole business.

The Senator from Maine brought in his joint resolution with the express approbation of the Secretary of the Navy. The Senator from New Hampshire now tells us that the Secretary of the Navy has changed his mind. Why has he changed his mind? I should like to have some communication from the Secretary of the Navy to inform us why he has changed his mind after sending here a report recommending this resolution, which was read the other day in the Senate and is now in the RECORD. The report of the Secretary of the Navy sustains the joint resolution of the Senator from Maine as it was introduced here. His project was to give American register to these ships; but now suddenly everything is changed. Why is it changed? Of course I do not know, but I feel that it is a subject of legitimate inquiry, and that the Secretary of the Navy ought to inform us officially and by a letter sent to us as to the reasons for changing his ground upon the subject.

I do not know anything about it; but, taking all the circumstances together, I have no doubt there are rivalry and competition amongst the different lines which are now conducting the coastwise trade of the United States, and some favorite is to be benefited. For instance, there is the Clyde Line, an established line—I believe established for many years—and various other lines of steamers and other ships engaged in conducting the coastwise trade of the United States. They do not want any more ships to take an American registry, particularly if they were built abroad. They do not want them whether they were built abroad or at home.

No man engaged in business, no matter how legitimate it is, wants that business controlled in any sense by competition. Competition is always averse to him and always repugnant to his interests. But the people of the United States can not get along without competition in all these matters, particularly in the matter of transportation, for whenever we build up by our system of laws what is virtually a monopoly in favor of any class of American citizens in the business of transportation, we tax the whole American people to pay the damages. It comes right out of the people.

There may be, and I have no doubt there is, some feeling about this business because of the very fact that those two ships, when they are admitted to American register, will come in competition with other established lines in our coastwise trade, and will probably cut down the income of some of those lines. If that is the reason—I do not charge it, but I assume that is a legitimate argument upon the facts—it is nothing but selfishness, and no man can claim or ought to be allowed to claim a benefit, of a peculiar and monopolistic character, under the laws of the United States, when his claim is founded upon pure selfishness and is without a just and adequate return to the people of the United States, who granted the privileges.

Certainly our coastwise trade is not overcrowded, because if it were overcrowded, the gentlemen engaged in the trade would at once go to the city of New York to take the valuable opportunity that is afforded here of carrying the grain, in pursuance of the joint resolution as it was originally adopted, on an American ship, under American colors, officered by Americans. It is curious to me, if the coastwise trade is at all embarrassed with an excess of facilities for transportation that they do not at once offer their ships to take the grain to the foreign country.

It would be a high tribute from them to our system of laws and to the honor of our country. But they seem to be unwilling to do it, or else unable, I do not know which. But certain it is that that deplorable fact has been revealed here since the adoption of the joint resolution, now, I believe, nearly two months ago. The

whole of the commercial and shipping circles of the world have been hunted out to ascertain whether American ships under the American flag could be found to carry this American contribution to India.

I would not be willing to endure the humiliation of having the British Government send over here and take the grain to their suffering people, because that would be only a half gift. It would be a gift upon conditions, and our people do not give these benevolences upon conditions. The Government of the United States in responding to that noble generosity of the people has attached no condition except one that belongs to the nature of the case, that, being an American contribution, we want it carried in American ships, and we do not want either to implore Great Britain to send here to get the grain or to hire ships flying the British flag for its carriage.

The British Government is very quiet about the matter. It seems to look upon our efforts to relieve its starving and suffering people with complacency, a proper and dignified treatment of a courtesy that is splendid and excellent. Perhaps Great Britain does not wish to be understood as even accepting this gratuity from our people or as having any official connection with it whatsoever. I should not wonder if they felt some reproach, for the reason that the bubonic plague now in India is very largely the result of poverty, and the poverty in India does not seem to have been a visitation from on high.

It seems to have been a visitation of the lawmakers more than anything else, and the poverty out of which has been bred the bubonic plague and the laws which have created that poverty can be traced directly to the privy council in London and also to the Parliament of Great Britain. So I should not wonder if Great Britain did not want to analyze the subject in a moral way and to ascertain the causes which have led her people into this terrible condition of starvation, which is so horrid that it has emptied the pulpits of the United States of the very greatest clergymen to go out among our benevolent and kind-hearted people to seek contributions to send to the starving and perishing millions of people in India.

Now, while we are doing this, I insist that it is only just to ourselves, just to our own Government, that not being able to find American ships to take the freight, when an American comes here and offers to carry it at a lower rate than the Government can get it done by anybody else, upon the mere condition that you will give his ships the benefit of the flag and an American register, to lay aside our prejudices in respect of our navigation laws at least for this one time and to act in accordance with the suggestions I have been making. I therefore oppose the striking out of the word "American" from the law as it exists, and if it shall not be stricken out I will propose an amendment to the joint resolution of the Senator from Maine, which I will take occasion now to read, in order to indicate what it is. Leaving sections 1 and 2 of the joint resolution to stand just as they are, with the prefixes and whereas, I propose to insert as a new section in the resolution of the Senator from Maine [Mr. HALE] the following:

SEC. 3. That the steamships so registered may be taken and used by the United States as cruisers or transports upon payment to the owners of the fair actual value of the same at the time of the taking, and if there shall be a disagreement as to the fair actual value at the time of taking between the United States and the owners, then the same shall be determined by two impartial appraisers, one to be appointed by each of said parties, who, in case of disagreement, shall select a third, the award of any two of the three so chosen to be final and conclusive: *Provided*, That the Secretary of the Navy is hereby authorized, in his discretion, to charter such foreign-built steamers as may be necessary to carry the grain to India, if, in his judgment, the grain can be shipped and delivered without more delay than the chartering of the *Massapequa* and *Menantic*, hereinbefore provided for, and in vessels as suitable for the safe transportation of the grain as the Hogan steamships, and without any excessive or unreasonable freight rates over and above the offer made by the owner of the *Massapequa* and the *Menantic*.

The proviso covers the amendment proposed now by the Senator from New Hampshire, because it leaves it at least discretionary with the Secretary of the Navy, if he can make arrangements that are better than those proposed by Hogan, or as good, to make such arrangements with vessels of any nationality, and it seems to me that we can save ourselves the unnecessary humiliation of changing our ground upon this question and striking out the word "American" from the existing law by the adoption of the amendment which I shall suggest, if upon voting the pending amendment is rejected.

The joint resolution was reported to the Senate as amended.

The VICE-PRESIDENT. The question is on concurring in the amendment made as in Committee of the Whole.

Mr. MORGAN. I ask for a yea-and-nay vote in the Senate on concurring in the amendment made as in Committee of the Whole. That amendment, which was offered by the Senator from New Hampshire, proposes to strike the word "American" out of the former joint resolution. I am opposed to it.

The VICE-PRESIDENT. The question is, Shall the amendment made as in Committee of the Whole be concurred in?

It is practically a substitute for the joint resolution.

Mr. COCKRELL. Let it be read.

The SECRETARY. It is proposed to strike out all after the resolving clause and insert:

That the joint resolution of April 7, 1897, authorizing the Secretary of the Navy to transport contributions for the relief of the famishing poor of India, be, and the same is hereby, amended by striking out the word "American" before the words "steamship or vessel," and the Secretary is hereby authorized to charter and employ any suitable steamships or vessels, not exceeding two in number, to carry out the object of said resolution.

Mr. MORGAN. I ask for the reading of the joint resolution of the Senator from Maine for which this is a substitute. The amendment is offered by the Senator from New Hampshire as a substitute for the joint resolution offered by the Senator from Maine.

The VICE-PRESIDENT. The Secretary will read as requested.

The SECRETARY. Omitting the preamble, the joint resolution reads as follows:

Resolved, etc., That the Secretary of the Treasury is hereby directed to cause the foreign-built steamships *Massapequa* and *Menantic*, owned by Charles W. Hogan, of the firm of T. Hogan & Sons, of New York City, a citizen of the United States, to be registered as vessels of the United States, upon being notified by the Secretary of the Navy that a contract has been entered into between the Navy Department and said Charles W. Hogan, of the firm of T. Hogan & Sons, for the transportation of about 8,000 tons of wheat in bulk or its equivalent in space for corn to India for the famishing poor.

SEC. 2. The Secretary of the Navy is hereby authorized to accept the proposition of T. Hogan & Sons made to him in their letter dated May 13, 1897, and to enter into a contract with Charles W. Hogan, of said firm, to carry the aforesaid wheat or equivalent of corn in bulk in the steamships *Massapequa* and *Menantic* to India, and a sufficient sum of money is hereby appropriated for said purpose out of any money in the Treasury not otherwise appropriated.

Mr. COCKRELL. I understand that is the original joint resolution which was introduced by the Senator from Maine.

Mr. MORGAN. Yes.

Mr. COCKRELL. The Senator from New Hampshire offered the amendment which was first read as a substitute for the joint resolution.

Mr. MORGAN. That is correct.

Mr. COCKRELL. I did not catch exactly the objection which the Senator from Alabama made to the original joint resolution, authorizing the chartering of these two vessels for the purpose of transporting the grain.

Mr. MORGAN. I have no objection to the original joint resolution which is now a law; but the Senator from New Hampshire proposes to amend that law by striking out the word "American," so as to leave to the Government of the United States and the Navy Department——

Mr. COCKRELL. Excuse me one moment. I want to understand it. Why does the Senator say it is a law when it is only a joint resolution introduced or reported from the committee?

Mr. MORGAN. No; it is a law.

Mr. JONES of Arkansas. It was passed.

Mr. MORGAN. Early in April we passed a law.

Mr. COCKRELL. Which law?

Mr. MORGAN. I have not a copy of the joint resolution here.

Mr. COCKRELL. I beg pardon. This is Senate joint resolution No. 43, introduced by the Senator from Maine [Mr. HALE] on the 20th day of May, 1897, and brought in for the purpose of being enacted into a law. It is not a law.

Mr. MORGAN. I do not pretend that it is a law, but I say there is another law now, which is already on the statute book, that the Senator from New Hampshire is trying to amend, and he is trying to amend it by offering a substitute for the pending joint resolution. He offers as a substitute for the resolution an amendment to the original resolution or law so as to strike out of that law the word "American" and leave the Secretary of the Navy at liberty to hire any ships that he can get in order to transport the grain to India.

Now, I say I am opposed to striking the word "American" out of that statute. Let it stand, and let the resolution of the Senator from Maine be passed, to which I propose an amendment as a third section, which third section is that when these ships receive an American registry they shall be used at the option of the Government of the United States as cruisers or transports, just as the mail steamers are subject to the same conditions that run now between Southampton and New York, and with a further proviso that in the event the Secretary of the Navy can make more advantageous arrangements with ships that do not bear an American registry he may have an opportunity of doing so.

That proviso would leave the Secretary of the Navy precisely in the condition the Senator's amendment would leave him in, by giving to him the option to hire British ships, or American ships, or French or German ships, if he can make more advantageous arrangements. But if he can not do that, then he must accept Mr. Hogan's proposition, which is, "Give me a registry for my ships, and I will carry this freight at certain rates and by a certain time. I am ready to do it. I will take my steamers off the line on which they are now finding first-rate employment. I want to get them under an American registry, and I will put them in this trade and carry this corn and wheat to India, in order to secure

American registry. I will then submit my vessels, when they come back, precisely like the steamers from New York to Southampton, to all the objects and uses of the United States for the purpose of getting them into the Navy when there is need for such things. More than that, I am entirely content; if you can make a better arrangement with any foreign ship, no matter where built, go and do it; but I make this offer to you."

Mr. BACON. Will the Senator from Alabama please state what is the difference between the offer of the gentleman to whom he refers, the owner of these ships, and of the owners of other vessels? What is the difference in money.

Mr. MORGAN. The difference is in favor of Mr. Hogan, it is stated, by about one-half of the freight.

Mr. CHANDLER. Will the Senator from Alabama allow me to interrupt him for a moment?

Mr. MORGAN. Certainly.

Mr. CHANDLER. The object of my amendment is to allow the Hogan ships to be taken. The Secretary is to hire them and use them, notwithstanding their English nationality, if they are the best and the cheapest ships that he can get. Now, the Senator from Alabama ought not to delay this great relief here by a discussion about the wisdom of our navigation laws, which keep our coastwise trade for American ships. He ought not to delay the famishing poor of India from getting relief while he makes a speech in the United States Senate on this great subject upon which there is so much difference of opinion.

We can not use the Hogan ships now, because the word "American" is in the former resolution. We can use the Hogan ships either by striking out the word "American," which is a limitation, or by giving those two ships an American registry; that is to say, after they have made one voyage to India under these charter parties they can come back to the United States and they are admitted, and they are admitted for all time, into our coasting trade.

I do not believe that there is a Senator here who wants to do that. If the navigation laws are to be changed and we are to take away from American ships our coasting trade, Senators want to do it deliberately and not do it while people are starving in India for want of the food which we can send them to-morrow in these ships if you will only remove the limitation. No, they say, do not remove the limitation, but grant them American registry.

I submit that if the Senator from Alabama will think this subject over candidly he will see that the simplest method is the best, to take Mr. Hogan's ships, send this grain in those ships to India, and take up the question of our navigation laws at some other time.

Mr. MORGAN. I have already stated that Mr. Hogan's assertion is that the two ships in which he proposes to carry this grain are cattle ships, arranged for carrying cattle across the ocean, very well ventilated and thoroughly adapted to carrying grain safely across the ocean. Mr. Hogan has a profitable trade in a regularly established cattle line and he does not want to abandon it, but is willing to do so if he can thereby get an American registry for his ships.

Mr. CHANDLER. I want to say that there are other ships in New York City that can go. There do not happen to be at this moment any American ships of sufficient carrying capacity, but there are ships of other nationalities, and we want to take one or two of them and carry the grain at once.

Mr. MORGAN. What the Senator from New Hampshire calls this moment has spread itself in an indefinite number of moments, over about thirty-five days. We have been for that length of time now trying to hunt up American ships to carry the grain, and we have not been able to find them. That is the sad report sent to us by the Secretary of the Navy. Mr. Hogan comes in and says, "I will take off two of my cattle ships here; I will put them in this trade, and I will carry your grain for less than half the money you will pay British ships to carry it on, or other American ships. I will do that for you if you will give me an American register. I can not afford to do it unless you give me an American register; I can not afford to break up my line of trade, but I will do it if you will give me an American register." Then comes in the private and competitive interests and say, "No, Mr. Hogan, we have got a good thing over here in the coasting trade, and we do not propose to allow you to crowd into it at all."

Mr. CHANDLER. I say the Senator from Alabama ought not to insist on a revision of our navigation laws on this one transaction. Common sense is against it.

Mr. MORGAN. I would not for anything in the world stand in the way of this beautiful benevolence of ours to the great Empire of Great Britain. I want to cultivate good relations with them. I want to show them that we are a very friendly and a very kind-hearted people, and that our friendship is not constrained in any way.

Mr. CHANDLER. They have that feeling about the Senator now.

Mr. MORGAN. I have no doubt they have. I have no doubt I enjoy a great amount of it. Certainly I would enjoy even a very small amount of it very greatly.

Now, Mr. President, that disposes of that part of it. That exonerates Mr. Hogan from any culpability in respect to this transaction, because he comes in and says, "Give me the register and I will carry the food; or if you can do better, go and do it, and I will keep on with my cattle trade." That is where Mr. Hogan stands. I am told that he is a very highly respectable gentleman.

Now, about the delay, Mr. President. The resolution which the Senator from New Hampshire is trying to amend was passed forty-odd days ago—forty-five, I think.

Mr. COCKRELL. It was passed on April 7.

Mr. MORGAN. Well, April 7. That is the law he proposes to amend. The delay that has occurred from April 7 down to the present time, I repeat, has been a humiliating delay to us, because it brought out the statement from the Secretary of the Navy, which is in the RECORD of last Thursday, that he has not been able to find American ships to carry this grain. That shows one of two things, either that we have no American ships that are available for this purpose engaged in foreign commerce, or else it shows that there has been some delinquency in trying to find them. I do not believe that there has been any delinquency. It is our poverty in ships that prevents us as a nation from carrying out the splendid boast with which we set out when we passed the joint resolution of relief, that we would carry the American grain with American hands under the American flag in American ships. That was our boast.

Now, in the lapse of the moments that the Senator from New Hampshire speaks of we have come down from that position. We haul down our flag and we say that we can not do it. We have overcalculated our resources. Well, our commercial marine is in a dreadful condition if that is true, and it ought to be relieved from it. I propose to relieve it so far as two ships are concerned, to put two more ships into the American marine, and we find occasion for it in the execution of this public charity.

Now, about the delay. The Senator from Maine introduced this joint resolution on the 20th day of May, and he supported it by a number of statements which were put into the RECORD, showing the necessity for its passage. That joint resolution, introduced by that honorable Senator, who knows so much about the navigation laws and who is such a firm, steadfast friend of the navigation laws as they are, introduced on the 20th day of May, has been before the Senate from that time to this.

Of course we have had a short interim of adjournment. I propose to pass it just as this great and well-understood friend of the navigation laws framed it; and to make it still more easy of application and still more just, I propose that the two ships of Hogan named in the joint resolution now before the Senate shall become a part of the naval force of the United States, either as cruisers or transports, whenever the Government of the United States may find any necessity to have their services as such, and also with a proviso that if we can make as good an arrangement with ships bearing the flags of other countries as Hogan proposes, then we may discard his proposition and accept the offer of ships under any flag.

Now, the Senator from New Hampshire comes in with an amendment which alters a statute that was passed early in April, and yet he complains of me for delay. The Senator ought to be satisfied with this joint resolution from his own part of the country and from the friends of the navigation laws. I can see no reason why he is not satisfied with it. That resolution, accompanied by Mr. Hogan's proposition and the recommendations of the Secretary of the Navy, make a complete case for the passage of the resolution as offered by the Senator from Maine. But the Senator from New Hampshire says, "No; let us change it." How? By striking the word "American" out of the original resolution.

I notify the Senate of the United States that this argument and this proposition, if it is carried, will come back to plague us after a while. We will after a while take up the navigation laws in due season for investigation and examination, and it will be found then that they have received such a stringent construction here by the Senator from Maine as that they would receive only two ships for registry, whereas the Senator from New Hampshire wants to abolish the whole system, it appears.

If it is proper to strike the word "American" out of the pending joint resolution and thereby invade the navigation laws of the United States to that extent, it will be proper, in a general sense, and for the benefit of the whole people of the United States, to dispense with those navigation laws.

If our navigation laws can not be relaxed from their monopolistic rigor so far as to admit two ships to registry as American ships to carry bread to the starving subjects of Great Britain from our generous people, it is time we had abolished them.

The VICE-PRESIDENT. The hour of 2 o'clock having arrived, it becomes the duty of the Chair to lay before the Senate the Calendar of General Orders.

Mr. ALDRICH. I move that the Senate proceed to the consideration of the bill (H. R. 379) to provide revenue for the Government and to encourage the industries of the United States.

The motion was agreed to.

Mr. CHANDLER. I desire to give notice that immediately after the remarks of the Senator from Rhode Island are concluded I shall move to proceed to the consideration of the joint resolution the consideration of which has just been interrupted.

THE TARIFF BILL.

The Senate, as in Committee of the Whole, proceeded to consider the bill (H. R. 379) to provide revenue for the Government and to encourage the industries of the United States, which had been reported from the Committee on Finance with amendments.

Mr. ALDRICH. Mr. President——

Mr. VEST. Will the Senator from Rhode Island permit me? I desire to give a notice before the Senator from Rhode Island commences his remarks.

The VICE-PRESIDENT. The Secretary will read the notice.

The Secretary read as follows:

Mr. VEST gives notice that, when reached, he will move that sections 4, 5, 6, and 7, on pages 196, 197, 198, 199, and 200 of the bill, providing for an increase of the internal-revenue taxes upon beer, manufactured tobacco, snuff, cigars, and cigarettes, be stricken out.

Mr. QUAY. Will the Senator from Rhode Island yield to me a moment? I wish to ask a question of the Senator from Missouri.

Mr. ALDRICH. Certainly.

Mr. QUAY. I presume that the Senator from Missouri will have no objection to a division of the question upon his motion to strike out, because on at least one branch of his proposition I propose to vote with him; on the others to vote against him. As I understand his notice, it is a consolidated motion to strike out the entire internal-revenue feature of the bill.

Mr. VEST. I assume that under the rules of the Senate any Senator would have the right to call for a division of the question when it comes up. Under the rules of the Senate I could not move to strike out these sections until they are reached, but would be compelled to move that the whole bill be recommitted and then that the sections be stricken out. Therefore I am forced to content myself with giving this notice. When the sections are reached, as a matter of course, the Senator from Pennsylvania can secure a division.

Mr. ALDRICH. Before the discussion of the bill is proceeded with, I ask unanimous consent that the formal reading of the bill may be waived and that the bill be read, when we shall proceed paragraph by paragraph, for amendment, the committee amendments to be considered first, and then the paragraph to be open to general amendment.

Mr. VEST. There is no objection to that course.

Mr. ALDRICH. That is the usual course, I think.

Mr. JONES of Arkansas. The Senator from Rhode Island means that the committee amendments to a pending paragraph shall be considered first?

Mr. ALDRICH. Certainly.

Mr. JONES of Arkansas. And that then the paragraph shall be open to amendment in the Senate?

Mr. ALDRICH. Exactly.

The VICE-PRESIDENT. Is there any objection to the course proposed? The Chair hears none, and that will be the order.

Mr. ALDRICH. Mr. President, the business of the entire country is in a state of suspension awaiting the action of the Senate upon the bill under consideration. I believe that the anxiety to secure action upon this important measure at the earliest possible day is shared by every member of the Senate. I can say for Senators sitting on this side of the Chamber that no time will be spent in the academic discussion of the principles of protection.

It is my purpose to keep the bill continuously before the Senate, to the exclusion of all other legislative business, until it is finally disposed of, and in this I shall expect the hearty cooperation of Senators on both sides of the Chamber. In the discussion of the bill, the members of the majority of the committee will content themselves with such brief explanations as may be found necessary of the various paragraphs as they are reached.

It seems desirable that at the beginning of this discussion the majority of the Finance Committee should present to the Senate in detail their estimate of the effect which the bill would have upon the revenue, and that they should explain, in a general way, the character of the amendments they have suggested.

The majority of the committee believe that if a thorough revision of our revenue laws, such as is contemplated by the House bill, is necessary, it should be carried out in a conservative spirit, and that such a moderate and reasonable measure should be adopted as will insure a much greater degree of permanence to our tariff legislation. Frequent revisions of the tariff are productive of long periods of uncertainty and arrested development. The radical change in policy in 1894 proved disastrous to the business interests of the country.

It was, I believe, thoroughly understood throughout the country in the last political campaign that if the Republican party should be again intrusted with power no extreme tariff legislation would follow. It was believed that in the changed conditions of the country a return to the duties imposed by the act of 1890 would not be necessary, even from a protective standpoint.

It was with these facts constantly in view that the majority of the Finance Committee prepared the amendments which they have submitted for your consideration. Nothing could be more conducive to the return and maintenance of real prosperity in this country than the well-grounded belief that there were to be no violent changes in our revenue policy for some years to come. The true friends of a protective policy do not insist upon extreme rates, or any that are not necessary to equalize conditions. While it is true that rates above this line are often inoperative, yet it must be admitted that they furnish needless opportunities for destructive attacks.

The committee believe that in the reductions they have suggested from the rates imposed in the House bill they have not gone in any instance below the protective point, and if the bill should become a law in the form presented by them every American industry would be enabled to meet foreign competition on equal terms; that is, so far as this equality can be secured by tariff legislation. The rates suggested by the committee's amendments are considerably below those imposed by the House bill, and in most instances below those contained in the act of 1890.

In suggesting these reductions the members of the majority of the committee reaffirm and emphasize their position as friends of the protective policy. The ultimate purpose of this policy is to secure, as far as this is possible by wise and conservative legislation, the steady growth and development of all interests—agricultural, manufacturing, and commercial. The provisions of a tariff law affect all these interests in numberless ways, and unless there can be stability in tariff policy there can be no assurance of continuous prosperity.

Industrial conditions in this country, with very few exceptions, do not demand a return to the rates imposed by the act of 1890. The bitter contest which is going on among the leading nations of the world for industrial supremacy has brought about improvements in methods and economies in production to an extent which was not thought possible a few years ago. These new conditions must be taken into account in considering the rates to be imposed.

Without relinquishing one particle of our devotion to the cause of protection, we feel that we have a right to ask that the cause shall not be burdened by the imposition of duties which are unnecessary and excessive. In the readjustment of rates suggested the committee have tried in every instance to make them sufficiently protective to domestic interests without being prohibitive.

REVENUE.

The framers of the House bill estimate a total revenue from the bill of $269,105,710 based upon importations of 1896. This would be the largest revenue ever received from customs duties, and an increase of $113,479,793 over the customs revenue of 1896, and of $70,732,254 over that of 1893.

The report of the Ways and Means Committee of the House recognizes the fact that anticipatory importations will largely reduce the expected revenues of the first fiscal year under the new tariff; but after making allowance for these importations, the report estimates an increased income of $76,000,000 for the year 1898, provided the law should be passed by May 1. If its enactment were delayed until July 1, the report added that $15,000,000 additional would easily be lost to the public Treasury.

This estimated increase of $76,000,000 was distributed as follows among the several schedules:

Schedule.	Estimated increase.	Schedule.	Estimated increase.
A	$4,000,000	I	$1,500,000
B	3,000,000	J	5,000,000
C	2,000,000	K	24,000,000
D	1,500,000	L	1,800,000
E	20,000,000	M	882,000
F	3,000,000	N	5,000,000
G	3,000,000		
H	1,500,000	Total	76,182,000

It is not my purpose at this time to enter upon an analysis of the estimated revenue for the years subsequent to 1898. In estimating the revenue likely to accrue from the passage of the bill the committee are compelled to take into consideration the existence of conditions which render it impossible to reach a safe conclusion by applying the proposed rates of duty, item by item, to the imports of the year 1896. It will be apparent from a critical examination of the provisions of the House bill that the estimate of $80,000,000 increase of revenue, if the bill should become a law by the 1st of July, is excessive.

To indicate the grounds upon which this judgment is based, we may take the wool and woolen schedule, from which $24,000,000

out of $76,000,000 increase is expected. The fact is well known that there have been unusual importations of wool in anticipation of the reimposition of a duty—enough, according to the trade reports, to supply all the foreign wool needed by the domestic manufacturers for more than a year. Some experts have estimated the supply as sufficient for our needs for a much longer period.

The total imports of wool into the three principal ports for the first four months of the year 1897 were 203,451,434 pounds, as against total imports of 224,803,620 pounds in the entire fiscal year 1896, when the imports of wool were larger than ever before. Of class 1 wool, the importations for these four months reach an aggregate of 135,163,760 pounds, against 117,533,750 pounds for the entire fiscal year 1896. The imports of wool of class 1 into these three ports for the month of April alone aggregated 70,885,265 pounds, nearly double the largest importation of class 1 wools ever imported into the country in any one year under dutiable wool.

These statistics justify the belief that there can be no revenue from the wool duties during the fiscal year 1898, except possibly a small amount from third-class wools. The estimate of $14,000,000 increase from woolen goods is equally erroneous, not simply for the reason that there have been large importations of woolens, but for the additional reason that during the fiscal year 1898 the domestic manufacturers will use supplies purchased on a free-wool basis, and will have so great a temporary advantage over foreign manufacturers on this account that it is reasonable to expect that the imports of woolens in 1898 will be less in value than in any recent year, and that so far from an increase in revenue from this source, by reason of increased duties, we must look rather for an actual decrease.

The same condition exists, in lesser degree perhaps, with reference to other schedules. Instead of an increased revenue from tobacco, we may more safely count upon a small decrease in the first year; the increase from sugar will be much less than the Ways and Means Committee's estimate, owing to the fact that one-quarter of the year's supplies of raw sugar will probably be imported before any new rates of duty can be applied to them.

The Secretary of the Treasury estimates the expenditures for all purposes for the fiscal year ending June 30, 1898, at $466,946,047.28. The Finance Committee estimate the revenue to be derived in the same fiscal year from customs, if the provisions of the bill reported by them be enacted into law, at $182,744,000. This includes an estimated revenue from the temporary duty on tea of $8,000,000. The estimate of receipts by schedules is as follows:

Schedule.	Senate estimate.	Schedule.	Senate estimate.
A	$6,695,000	K	$23,028,000
B	9,741,000	L	13,623,000
C	12,869,000	M	1,404,000
D	1,494,000	N	13,500,000
E	38,000,000		
F	13,797,000		174,744,000
G	7,860,000	Tea	8,000,000
H	7,935,000		
I	9,330,000		182,744,000
J	15,468,000		

The committee estimate the receipts from internal revenue for the same period at $170,700,000. If we add to this the Treasury estimate for miscellaneous receipts, $20,000,000, and the receipts on account of the Post-Office, $96,227,076, we have a total estimate of receipts for the fiscal year 1898 of $469,671,076, or an estimated excess of receipts over expenditures for that year of $2,725,028.72.

In estimating the receipts from internal revenue for this year, we have added to the usual receipts from this source $23,900,000, which is the estimate of the Internal Revenue Bureau of the additional revenue which will be derived from the increase in taxes on fermented liquors, cigarettes, tobacco, and snuff, provided by the suggested amendments. The additional tax on fermented liquors and the duties on tea are imposed until January 1, 1900, by which date it is believed the business of the country will have adjusted itself to the new tariff, and the customs receipts and internal-revenue taxes will supply ample revenue to meet the expenses of the Government.

If the estimated revenue from the duty on tea and the additional internal-revenue taxes should be omitted from the committee's estimates of receipts, there would be an estimated deficiency of $29,175,000 instead of a surplus of $2,725,028.72. The committee believe it to be the imperative duty of Congress to provide in the measure under consideration for a revenue which will certainly meet the requirements of the Government for the next fiscal year. The adoption of a revenue bill which should fail in this purpose, and which should create an additional deficiency in the immediate future, which would require a further issue of bonds to meet current expenditures, would certainly be fatal to the hopes of future success of any political party responsible for such legislation.

In selecting the sources for additional revenue, the committee decided to increase temporarily the tax on articles of voluntary use, rather than to assess additional duties, which might prove inoperative, upon articles of necessity or upon those which enter into our manufactured products. Assuming that the necessity for additional revenue exists, and of this we believe there can be no question, there is no economic reason, and none that affects the public interests, why beer and tobacco should not bear their share of additional taxation. The committee believe that the duty proposed on tea will not prove a serious burden upon the consumers of that article.

Nothing in the theory of protection interferes with the imposition of further internal-revenue taxes by protectionists whenever such a course is found desirable for revenue purposes. In the future it is almost certain that we shall be obliged to depend more and more upon taxes of this nature for necessary revenue.

In the years to come we must expect a decrease rather than an increase in the customs revenue to be derived under the principal schedules of the tariff. Take the revenue from the metal schedule as an illustration. In 1883 the revenue from manufactures of iron and steel was more than $29,000,000. In the year 1896 this was reduced to $10,000,000, and a large portion of this sum was paid out as drawbacks upon tin plate.

With duties adequately protective upon manufactures of cotton, wool, silk, and flax, we may expect a constantly diminishing revenue from the importations of these products. If the rates imposed by this bill on sugar should be found to lead to the rapid development of the beet-sugar industry in the United States, we may expect large reductions year by year in the contemplated revenue from sugar. Some of the most sanguine advocates of the policy of encouraging beet-sugar production in this country believe that we shall within ten years produce a sufficient quantity to supply the domestic demand.

The legitimate result of a protective policy is to give the American market to American producers. When this becomes an accomplished fact, the revenue growing out of protective duties disappears. It must be evident, therefore, that we must look for other sources of revenue. Whether it should be along the line of an increase of internal-revenue taxes, such as we have suggested, or whether some other sources of revenue should be sought, it is not necessary now to determine.

It is safe to assume that numerous objectors will always be found to any plan for increased taxation. In this particular case the committee are only strenuous that a wise public policy requires that our revenues should at all times be equal to our expenditures, and that the people of the United States will not be satisfied with any revenue measure that does not provide adequate income for this purpose.

If we examine in detail the changes suggested by the committee, we shall find that the rates in the chemical schedule are lower than those in the act of 1890.

In Schedule B, the earthenware schedule, at the earnest solicitation of the manufacturers in this country, we have recommended a compound rate of duty on all manufactures of earthenware, china, porcelain, etc. The destructive reduction in rates on these articles made by the act of 1894 resulted in the complete demoralization of the business, and manufacturers and workmen have alike suffered.

The rates suggested are much lower than the manufacturers believe to be necessary. They are, in a certain sense, experimental. Other countries levy a specific duty upon manufactures of earthenware, china, and porcelain, but none of them assess as high a duty as that suggested by the committee. The rates in the glass schedule are reduced somewhat below the rates of 1890, but they are still higher than those of the act of 1894.

In the metal schedule the rates of the act of 1894 have been largely retained; in a few cases they have been reduced.

Among the reductions is the reduction of the duty upon steel rails from $7.84 per ton to $6.72 per ton. The progressive reduction which has taken place on this important manufacture within the last fifteen years furnishes one of the most striking illustrations of the beneficent character of the protective policy and the rapid development of American industry. Prior to 1883 the rate of duty imposed upon steel rails was $28 per ton. It was reduced by the act of 1883 to $15.68 per ton; it was reduced by the act of 1890 to $13.44 per ton; it was reduced by the act of 1894 to $7.84 per ton, and we now suggest, as a rate of duty amply protective, $6.72 per ton.

What is true of this article is true, perhaps to a lesser extent, of many other articles in these schedules. They show that gradually but surely the American manufacturer is taking the American market; and, as in the case of steel rails, it will not be a long time before these manufacturers will be able to go out into the neutral markets of the world and compete with the great industrial nations of Europe, vindicating, as my friend from Connecticut [Mr. HAWLEY] suggests, completely the doctrine of protection.

In the miscellaneous manufactures of iron and steel, the paragraph relating to pocket cutlery has been reduced to a point somewhat below the act of 1890 and considerably below the House rates. The committee suggests an increase in the duty on lead ore of one-half cent per pound, in deference to the wishes of the lead producers of the intermountain States.

In Schedule D the provisions of the House bill on sawed lumber are retained, with a slight reduction of the duties on planed lumber. The committee found a great difference of opinion existing in different parts of the country in regard to the proper rate to be imposed upon the articles in this schedule. Many hearings were given to Senators interested on one side or the other of the question, with the result I have indicated.

SUGAR.

In the sugar schedule, E, we have suggested a change in rates and in the manner of assessing the duties. As the schedule is a very important one, it seems proper that I should explain definitely the effect of the provisions we recommend.

The annual consumption of sugar in the United States is about 2,000,000 gross tons of 2,240 pounds each, with a value, based on foreign prices, approximating $90,000,000. If the high duties proposed in either the House or Senate bill should be adopted, the annual cost of sugar to consumers would be more than $160,000,000. Of the consumption of 1896, 40,000 tons, or 2 per cent, were beet sugars produced in the United States, and 243,000 tons, or 12 per cent, were domestic cane sugars, and 157,000 tons, or 8 per cent, were sugars admitted from the Hawaiian Islands free of duty under our treaty with the Hawaiian Government. The 2,000,000 tons of sugar consumed in the United States constitute nearly 30 per cent of the total consumption of the world, the total sugar crop of 1896 being approximately 7,000,000 tons, of which 4,300,000, or about 61¼ per cent of the whole, were beet sugars.

The large amount of sugar consumed by every family in the United States makes the question of the proper treatment of sugar in a tariff bill a very important one. The pressing necessity for securing greatly increased revenues seems to render a return to the Republican policy of free sugar adopted in 1890 an impossibility. The demand for revenue purposes, and the belief that every reasonable effort should be made to encourage the production of beet sugar in the United States, led a majority of the Finance Committee to recommend the high rates upon sugar which are contained in the bill now before the Senate.

It is believed by the friends of the beet-sugar industry that we can successfully imitate the example of Germany in the rapid development of beet-sugar production. Germany has within four years increased her product by 50 per cent, and, as the result of her system of bounties, is now successfully invading the sugar markets of the world. She apparently has no natural advantages over the United States in the production of sugar, and it is quite reasonable to suppose that we may be able, by the maintenance of a high duty, or by a judicious system of bounties, within a comparatively short time to supply a considerable portion of the domestic demand.

The bill, as it came to us from the House of Representatives, contains provisions which levy a specific duty, based upon polariscopic test, upon imported sugar, varying from 1 cent per pound at 75 degrees, to 1¼ cents per pound on all sugars above No. 16 Dutch standard in color, and refined sugars. The effect of these rates, as applied to the total importations at the port of New York for the month of January, 1897, is shown by a table, which I submit to the Senate, which has been prepared by the customs officers in New York. The rates suggested show a range of ad valorem equivalents from 78.2 to 144.3 per cent. An examination of the table will show that the scale of rates adopted bears very unequally upon low-grade sugars. The character and extent of this discrimination led your committee to believe that the schedule should be modified. The committee determined, after a careful examination of the whole subject, to recommend rates which would be in their effect as high, at least, as the House bill, but which would be levied in a manner that would make the ad valorem equivalents more uniform.

The sugars of the world are divided into two very important classes, with two others of much less and constantly diminishing importance. As I have already shown, beet sugars, which constitute one class, comprise about 60 per cent of the total production. Of the cane-sugar crop of, say, 2,700,000 tons, more than 2,000,000 tons, or nearly 30 per cent of the total crop of all sugars, are centrifugals, sold on a basis of 96 degrees test. We have, therefore, approximately 90 per cent of the sugars of the world covered by these two great classes. The remainder is made up of Muscovado sugars, testing about 89 degrees, and sun-dried, clayed, and molasses sugars, testing not above 87 degrees.

The appraiser's office in New York estimates that the amount of sugars imported below 80 degrees is but little over 1 per cent, hardly enough to take into consideration, while the sugars imported below 84 degrees, the first real basis of value, is under 4 per cent.

We believe that the imposition of the high specific rates upon low-grade sugars testing 87 degrees or below would have the effect to exclude them from the markets of the United States. The total amount of these low grades produced is, as I have already stated, unimportant as compared with the total sugar crop, but their continued importation into the United States is very important when viewed from the standpoint of our trade and commerce with other countries. The sugars referred to are imported from the Philippine Islands, Java, China, Brazil, the British West Indies, Puerto Rico, Haiti, Santo Domingo, Mauritius, Egypt, and the Argentine Republic. They are largely brought to the United States, especially from countries in the East, as return cargoes of American ships that take from the United States cotton cloth, petroleum, and other American manufactured products, the principal article of export in many cases being cotton goods, and these countries furnish practically the only foreign market for the export of these goods. To exclude from the American market all the low-grade cane sugars from near-by countries, and sugars of all grades from distant countries, would confine American purchasers to beet sugar and to centrifugals from points nearest the United States, and send all other sugars to free markets, like Canada and England. They are not important to refiners. In fact, refiners do not seek them, as they destroy machinery, unless it be specially adapted for the purpose. Upon investigation it will be found that few refiners use them.

This policy would undoubtedly increase the price of sugars from near-by countries and necessarily add to the cost of sugar to consumers in the United States. These are the reasons which led your committee to suggest an ad valorem rate of 75 per cent on all sugars testing not above 87 degrees. But this rate can never apply to but a very small portion of the sugars of the world, as from obvious causes the proportionate amount of such sugars is constantly decreasing.

This is owing to the fact that it is never profitable for any sugar producer to produce low-grade sugars if he has the machinery to make the high grades. In one case the percentage of sugar extracted from the cane is very much less than in the other, and that percentage is absolutely wasted to the producer.

There are no considerations, in our opinion, affecting the revenue or the interests of domestic producers that should lead Congress to adopt a policy of exclusion with reference to these sugars.

Of the cane sugars testing above 87 degrees, very much the larger portion, as I have already stated, are centrifugals, testing about 96 degrees.

Perhaps I ought to say a word about what "centrifugals" are. Centrifugal sugars get their name from the centrifugal machine, which, by a revolving process, excludes the moisture and dries the sugars in the process of their manufacture. These sugars are boiled in a vacuum pan instead of an open kettle.

The committee, in considering the question whether they should adopt the specific scale contained in the House schedule for sugars testing above 87 degrees, were confronted with the fact that these rates would discriminate in favor of the sugars of certain localities and values against those of others. The detailed tables furnished us by the appraisers' office in New York, showing the value of the importations for the month of January, 1897, disclose the fact that sugars of substantially the same polariscopic test vary considerably in value. With high specific duties, approximating 75 per cent in ad valorem equivalents, serious inequalities would result, unfairly discriminating against the sugars of some countries. The extent of the variations of rates I have alluded to would not be important when applied to most articles of imported merchandise. Sugar is, however, probably sold at a smaller margin of profit than any other article in general use.

The large quantity of sugar consumed in the United States renders it all the more important that there should be no discrimination or inequality in the rates levied upon this article which would result in restricted markets and higher prices.

The committee, after full consideration, reached the conclusion that the essential elements of a certainty of revenue and an adjustment of rates that would lessen discriminations could best be secured by the adoption of compound rates. While we, as protectionists, are strongly in favor of the policy of adopting specific rates everywhere where they can be applied, we are not unmindful of the fact that when they are applied to articles varying widely in value inequalities are certain to arise. The use of compound rates is common in every tariff bill. Compound rates are adhered to in this bill. They are applied in many, if not in most, of the important paragraphs of the House bill, and have been retained by the Senate committee. By their adoption in this case rates much more equitable in their application to sugars of varying values with the same test are best secured. The committee therefore adopted the suggestion, which is contained in the bill we have reported to the Senate, of imposing a specific duty, which is equivalent to about 40 per centum ad valorem, with an additional duty of 35 per centum ad valorem on all sugars from

87 to 100 degrees, with thirteen-hundredths of a cent per pound additional on all sugars above No. 16 Dutch standard in color, and on refined sugars.

We are satisfied from the statements submitted to us by the appraising and executive officers in New York that there will be no difficulty in the administration of ad valorem rates on sugar in the limited form which we have recommended, and no danger of undervaluations to any appreciable extent. The prices of all the leading grades of sugar in all the markets of the world are transmitted by telegraph daily to the principal markets of the United States. The difficulties which have been encountered in the administration of a law imposing specific rates based upon polariscopic test have been much greater than in the case of ad valorem rates. In the case of the former the safety of the revenue depends largely, if not solely, upon the skill and honesty of the samplers and the examiners who use the polariscope. During the time the act of 1883 was in force it was found that the tests of sugars imported at the different cities from the same localities were by no means uniform. With compound rates, one method of assessing duties acts as a check upon the other, and we believe there can be no valid objection, from a public standpoint, to the mixed specific and ad valorem rates suggested.

More than 90 per cent of the sugar which is imported into the United States has heretofore been imported in a raw condition, and has been refined here, and it is therefore of importance that we should consider carefully the effect which the schedule proposed by the Senate committee would have upon the refining industry. I assume that it will be admitted in all quarters that this industry is entitled to fair treatment. The fact that the business, as conducted to-day, is in comparatively few hands, and that a large portion of it is carried on by one company, while it furnishes a reason for unusual care in the adjustment of rates in order that no undue or unfair advantage shall be given to sugar refiners, should not be allowed to furnish a pretext in the preparation of a tariff bill constructed upon protective lines for the destruction of a great industry. In other words, it is important from every economic standpoint that we make it possible that the refining of sugar can be successfully carried on here, and that the business be not turned over by legislative discrimination to German refiners.

It is therefore incumbent upon us to show that no protection is given the refining interests by the proposed schedule beyond that which is adequate for the continued existence of the business in the United States. For this purpose I have prepared a series of statements, which I submit for your consideration, showing the actual difference between the rates imposed by the schedule upon raw sugars of different grades and refined.

The first of these tables to which I will call your attention shows the rates imposed upon each grade of sugar testing above 87 degrees by the House bill and the Senate bill. It shows further the actual differential on each grade in both the House and Senate bills.

The actual differential between the rates on raw and refined sugar must be in every case the difference between the sum which the refiner has to pay as duty on a sufficient number of pounds of sugar of the given grade necessary to produce 100 pounds of refined and the sum which his competitor has to pay as duty on 100 pounds of refined. This statement must, it seems to me, meet with universal acquiescence.

These tables are based upon prices of sugar in the month of March, 1897. We have taken the foreign value of centrifugals testing 96 degrees at 2.25 cents per pound. We have taken the scale of variations in value up and down from this point that was used by the Ways and Means Committee of the House in their computation of the effect of the rates suggested by them on the various grades of sugar.

The scale to which I refer was based upon variations in value in bond in New York, but the value at the 96-degree test happens to be the same as the foreign dutiable value of centrifugals for the month of March. The variation in the scale between the price of 96 test centrifugals and 89 test Muscovados is not the actual market variation of to-day. The table, however, shows the actual value in March at 96 degrees, and the variation at 89 degrees would not affect the differentials appreciably.

It should be borne in mind that nearly two-thirds of the cane sugars imported test 96 degrees, and about 25 per cent test 89 degrees. The difference between the value of 96 test and 89 test in January was thirty-six hundredths of a cent per pound. The difference shown in the scale is twenty-four hundredths. If the difference in March had been thirty-six hundredths, the differential shown on 89 test by the table would have been 4.2 cents per 100 pounds greater than that shown in the table, while the differential on centrifugals would have been the same.

As a basis for ascertaining the rate of duty on refined sugars imposed by the Senate proposition, I have taken the average value, f. o. b. Hamburg, of first marks, German granulated, for the month of March. I submit a table of daily quotations for the month. This value is equivalent in our currency to 2.30 cents per pound. These prices are taken as a basis for all tables and calculations.

As a basis for the calculation of the number of pounds of sugar of each polariscopic test required to make 100 pounds of refined sugar, I have taken the statement of the Treasury Department, promulgated June 25, 1896, Department Circular No. 102. I assume there will be no question as to its accuracy. The computations have been confirmed by various statements furnished by the appraiser's office in New York.

For illustration, I will take an analysis of sugar testing 88 degrees, made by the chemist in charge of the sugar laboratory in New York. This sugar contained $\frac{74}{100}$ per cent of ash, 4.13 per cent of invert sugar, and an outturn of 81.85 per cent of crystallizable sugar. Of this sugar it would take 122.17 pounds to make 100 pounds of refined sugar. The Treasury estimate is 122.41 for this test. It will be noticed that this sugar contained 4.13 per cent of invert sugar. This invert sugar becomes sirup in the process of refining, and is worth from one-half to three-fourths of a cent per pound. The result in this case would probably be a fair estimate of the average result of the value of the residuum of invert sugar contained in all cane sugars testing in the neighborhood of 89 degrees. The value of this sirup would not appreciably affect differentials.

The same chemist made at the same time a test of 94 degrees centrifugals, which showed $\frac{44}{100}$ per cent of ash and 2.47 per cent of invert sugar and an outturn of 90.27 per cent of refined sugar. In this case the amount of 94-degree test sugar required to make 100 pounds of refined would be 110.77 as against 111.20, the amount named in the table, with 2¼ pounds of sirup.

It must be evident from these examples that the Treasury statement shows the entire amount of crystallizable sugar that can be obtained in each case from 100 pounds of raws.

The table is as follows:

Degrees.	Price.	Rates.		Rates on number pounds necessary to produce 100 pounds refined.		Differential.	
		House.	Senate.	House.	Senate.	House.	Senate.
88	197	139	79 and 35 % = 147.95	170.15	181.10	17.85	15.40
89	201	142	81 and 35 % = 151.35	171.17	182.44	16.33	14.06
90	205	145	83 and 35 % = 154.75	172.07	183.64	15.43	12.86
91	209	148	85 and 35 % = 158.15	172.88	184.74	14.62	11.76
92	213	151	87 and 35 % = 161.55	173.55	185.69	13.95	10.81
93	216	154	89 and 35 % = 164.60	174.12	186.11	13.38	10.39
94	219	157	91 and 35 % = 167.65	174.58	186.42	12.82	10.08
95	222	160	93 and 35 % = 170.70	174.94	186.64	12.56	9.86

Above No. 16 D. S. in color—House 187.50, Senate 196.50.

This table shows that the differential between raw and refined sugars by the Senate proposition varies from 9.77 to 15.40 cents per 100 pounds, while the differential in the House bill varies from 12.20 to 17.85 cents per 100 pounds. It will be seen from an examination of this table that the differential between granulated sugar and 96-degree centrifugals—this being by far the most important class of raw sugars and in amount two-thirds of the total imports of raw cane—is 9.87 cents per 100 pounds; on 94-degree centrifugals the differential is 10.08 cents; on 89-degree Muscovados the differential is 14.6 cents per 100 pounds. The only possible variation from these differentials in any case would be where there is a difference in the foreign value of sugars of the same polariscopic test. For instance, a variation of one-tenth of a cent per pound in this value, up or down, would produce an increase or reduction, as the case might be, of the differential of 3½ cents per 100 pounds. A difference of two-tenths of a cent per pound in such value—and this is probably the extreme limit of the variation in any case—would result in an increase or reduction of 7 cents per 100 pounds.

In order to show that the committee's proposition does not give undue advantage to beet sugars as compared with cane sugars, the following statement has been prepared by me to show the differential between raw and refined beet sugars, in comparison with the differential of the same sugars, based on the rates imposed by existing law:

Differential rates on raw beet sugar, 88-degree analysis, and on German granulated.

	Refined.	Raw.	Differential.
Present law	104.50	89.53	14.98
Senate bill	196.50	181.703	14.797

I have also taken March figures, shown by table submitted, as a basis for this computation, these being 197 for raw beets, 88 per cent analysis, and 230 for German granulated, the prices in each case being f. o. b. Hamburg. It will be seen that the differential on beet sugars by the Senate proposition is slightly less than that of the existing law.

I have taken first marks German granulated for the comparison, as this is the sugar that competes with our refiners and furnishes the proper basis for comparison. If I had taken fine German granulated, which costs thirteen-hundredths of a cent per pound more, as a basis, the differential would be 15.36 cents per 100 pounds on 96 degrees test, and if I had taken Dutch cane granulated, that costs thirty-hundredths of a cent per pound more, the differential would be 21.3 cents per 100 pounds.

The following statement shows what the differentials would be in case the values of sugars were one-half a cent per pound higher than those in March, 1897, and if the values were one-half a cent lower than these figures:

Basis of $2.75 per 100 lbs. 96-degree test.

Degrees.	Price.	Rate.	Rates on number pounds necessary to produce 100 pounds refined.	Differential.
88	$2.47	165.45	202.52	11.48
92	2.63	179.05	205.80	8.20
96	2.75	191.25	205.53	8.47
Granulated			214.00	

Basis of $1.75 per 100 lbs. 96-degree test.

88	$1.47	130.45	159.68	19.32
92	1.63	144.05	165.58	13.42
96	1.75	156.25	167.92	11.08
Granulated			179.00	

Senate and House differentials based on $2.25, $1.75, and $2.75, respectively, per 100 pounds, 96 degrees.

Degrees.	Price.	Differential.	
		Senate.	House.
88	$1.97	15.40	17.35
	1.47	19.32	17.35
	2.47	11.48	17.35
92	2.13	10.81	13.95
	1.63	13.42	13.95
	2.63	8.20	13.95
96	2.25	9.77	12.33
	1.75	11.08	12.33
	2.75	8.47	12.33

Greater fluctuations up or down would not affect these figures materially.

I have taken the March figures as a basis for all comparisons, as I believe they fairly represent normal conditions. Within the past week, however, strangely enough, the foreign value of German granulated has been less than that of 96 degree test centrifugals.

This fact shows clearly the character of the competition which the American refiner of cane sugars is now obliged to meet. Under existing law German refined receives thirty-eight hundredths of a cent per pound export bounty. The countervailing duty here is but one-tenth of a cent per pound. The German refiner, therefore, receives a net bounty of twenty-eight hundredths of a cent per pound. This enables him to sell his product at a less price than the American refiner has to pay for 96-degree centrifugals. It is this kind of competition which is driving the cane-sugar producers and refiners of the world to the wall.

The anomalous state of prices to which I have called your attention is liable to occur at any time until there is an equalization of existing conditions.

My attention has been called to a statement published over the signature of the Hon. William L. Wilson, late chairman of the Committee on Ways and Means and Postmaster-General under Mr. Cleveland's Administration, in which he estimates the difference in the rates imposed by the Senate committee's proposition on raw sugars of 92 degrees test and those on granulated of 38.8 cents per 100 pounds, not including the difference imposed by bounty provisions, to which I will allude hereafter. Mr. Wilson's statement is as follows:

If we take raw sugar testing 92 degrees as the basis, and Mr. Benjamin Oxnard's testimony before the Dingley committee that sugar at 91 degrees produces 85 pounds of crystallized or granulated sugar to the hundred pounds, we are not far wrong in assuming that 107 pounds of raw sugar at 92 degrees will produce 100 pounds of refined. Now, the specific duty on 107 pounds of raw sugar testing 92 degrees under the Aldrich bill would be 95.2 cents. The specific duty on 100 pounds of "sugars above No. 16 Dutch standard and sugar that has gone through any process of refining"—which is the definition of refined sugars in the bill—is $1.16. This gives 20.8 cents more protection to the 100 pounds refined than was given to the 107 pounds raw of which it was made. Both grades of sugars are further dutiable 35 per cent ad valorem. The average value per pound of all the dutiable raw sugars imported in 1896, as assessed at the custom-house for taxation, was 0.02135; of all refined, 0.0277. The ad valorem duty on 100 pounds of refined sugar at 35 per cent would be 97 cents; on 107 pounds of raw would be 79 cents. This gives 18 cents more protection to the 100 pounds of refined than was given to the 107 pounds of which it was made.

PILING UP THE BENEFITS.

The refiner has 20.8 cents protection on a hundred pounds under the specific duty and 18 cents under the ad valorem—in all, 38.8 cents—after he is compensated for the duties he has paid on his raw sugars.

On account of Mr. Wilson's great reputation and the fact that his statement has been used as a basis for criticisms of the proposed Senate amendment, it seems proper that I should point out its strange inaccuracies. Mr. Wilson, after stating that 100 pounds of sugar testing 91 degrees by the polariscope would produce 85 pounds of crystallized or granulated sugar, assumes that 107 pounds of raw sugar of 92 degrees test will produce 100 pounds of granulated. It must appear at once, upon an examination of this statement, that Mr. Wilson has made a serious mistake in his figures. If, as he states, 100 pounds of 91-degree sugar will produce but 85 pounds of granulated, it must evidently require more than 117 pounds of such raw sugar, instead of 107, to produce 100 pounds of granulated. If we take the Treasury figure of the number of pounds of 92-degree sugars necessary to produce 100 pounds of refined, which is 114.94, we shall reach a widely different result. It should be remembered that the Treasury calculations were adopted by the Administration of which Mr. Wilson was at the time a conspicuous member.

Mr. Wilson takes as a basis for his computation of the ad valorem duty on refined sugars the value of 2.77 cents per pound. Now, it is well known by everyone familiar with the facts that the only refined sugar which comes in serious competition with the American product is German granulated, the price of which, as I have already shown, in the month of March was 2.3 cents per pound. Taking this value, as we are bound to do if we desire to treat the question fairly, we shall have a differential between 92 degree test raw sugars and granulated sugars of 10.81 cents per 100 pounds, instead of 38.80 cents, as suggested by Mr. Wilson.

The claim has been made that the committee's schedule would give the sugar refiners great advantages when compared with the present law or the House proposition. In order to show the absurdity of these claims, we have prepared with great care the tables submitted. If we compare the committee's proposition with the present law, we find that, instead of the 40 per cent ad valorem and one-eighth cent per pound additional therein imposed, the Senate proposal is 35 per cent ad valorem and one-eighth cent additional on refined, and also a specific rate on raws varying from seventy-nine hundredths to 1.08 cents per pound on sugars testing from 88 to 100 degrees. The specific rates in this case would clearly give no advantage whatever to the refiners, but, on the contrary, would impose a great burden on them, as a much larger investment would be required to the purchasers of sugars and the greater risk of loss incident to business.

The ultimate value of any grade of raw sugar must be based upon the crystallizable sugar that can be extracted from it, less the cost of extraction and transportation to a market. It must be evident that a specific duty, arranged on a scale that bears equally upon all these grades of raw sugar, can under no circumstances afford any protection to refiners. The ad valorem rates and differential contained in the committee's suggestion certainly can not therefore be more favorable to refiners than existing law.

It is undoubtedly true that every sugar refiner of the United States would greatly prefer the existing law to either the House or the Senate proposition.

In the tables I have submitted no allusion is made to the bounty provisions contained in both the Senate and House proposals. The adoption of these or similar provisions for countervailing duties seems to be a necessity if we are to develop the beet-sugar industry in the United States. Otherwise it will be possible for any foreign country, by extension of its bounties, to neutralize entirely the effect of our protective duties. These bounty provisions can not, I believe, be of any practical advantage to sugar refiners. Germany pays an export bounty on raw sugars equivalent to 27 cents per 100 pounds, and on refined sugars to 38 cents per 100 pounds. The American refiner would be obliged to pay 30.07 cents additional duty on the amount of raw beet sugar which is necessary to produce 100 pounds of granulated sugar. There would be no possible escape from this payment. Whether it would be possible to successfully collect the 38 cents or 27 cents per 100 pounds on any imported refined is very problematical. It would be extremely difficult to enforce the provisions of the act as against refined sugars from Holland or Great Britain in which bounty-paid German raw sugars had been used in whole or in part. The possibility of securing 7.33 cents per 100 pounds differential between the bounty on raw and refined sugar is so uncertain that, in my judgment, it should not be given any considerable value in the discussion of this proposition.

WHAT THE EFFECT WOULD BE.

In considering the important question whether the differential proposed by either the House or the Senate bill is greater than it should be, we are bound, in fairness, to take into consideration existing conditions and the changes which have taken place since the enactment of the act of 1894. When that act was under discussion in the Senate, the difference in the foreign value of German granulated and raw beets, 88 per cent analysis, was fifty-seven hundredths of a cent per pound. In March the difference was thirty-three hundredths of a cent per pound. The importations of refined sugars into the United States amounted in 1891 to 4,000,000 pounds, and in 1892 to 14,000,000 pounds. The importations in 1896 amounted to 187,000,000 pounds, while the importations in the single month of April, 1897, amounted to nearly 32,000,000 pounds. German refiners have driven the sugar-refining industry of Great Britain almost entirely out of existence. There are only two sugar refineries now in operation in that country. As I have already stated, the Germans are invading every sugar market of the world with their product. Most of the German granulated imported is the result of a continuous process of refining.

For months raw beet sugar and German granulated have sold on an absolute parity of value, taking only into account the percentages of pure sugar contained in each. If we assume the cost of refining sugar in the United States to be approximately one-half a cent per pound, and if German refined can be sold without loss on the same basis with German raws, it must be evident that the differentials suggested in the Senate proposition are not only not excessive, but they are quite likely in the near future to prove inadequate to secure the continuance of the business of sugar refining in the United States. If the importations of German granulated should increase at the same ratio that they have since the act of 1894 was adopted, the Germans will certainly secure at an early day a large part of the American market. The protection afforded by the differentials proposed by the Senate committee is, I believe, not only less by percentage, but less with reference to the actual requirements of the industry, than that afforded by the rates imposed upon any other important industry by the terms of the bill.

HAWAIIAN TREATY.

The committee will also prepare and present an amendment to the House provisions in regard to the Hawaiian treaty. The existing commercial treaty between the United States and the Government of these islands provides for the free admission of raw sugars, the product of the islands, into the United States. If this treaty should remain in force, it would result in giving a bounty to the Hawaiian sugar producers amounting to more than $8,000,000 per annum. It was not contemplated, when the original treaty was made or when it was extended, that any possible advantage of this kind could ever result from its terms to the people of the Sandwich Islands.

The effect of this bounty would undoubtedly be to stimulate enormously the production of sugar in the Hawaiian Islands. While we can not fairly abrogate a treaty of this kind with a friendly country without notice, we believe that negotiations should at once be entered into looking to such a modification of the treaty as will reduce the bounty to be paid Hawaiian sugar producers to a reasonable sum, and the committee will present an amendment looking in this direction at an early day.

There should be no difficulty in securing through the treaty-making power such modifications of the treaty as will be satisfactory to both countries without injury to either. It certainly can not be expected that the United States will continue for any length of time to pay a bonus of seven or eight millions of dollars per annum as an inducement to any foreign country to trade with us. I assume there will be no difficulty in securing proper modifications of the treaty so that it will not be necessary for the Government of the United States to give the one year's notice of the abrogation of the treaty, which is provided for by its terms.

In Schedule F we have suggested a return to the rates imposed by the act of 1894 on leaf tobacco. This action is far from satisfactory to the growers of wrapper tobacco in the United States. There is a very wide difference of opinion among those whose interests are affected as to what rates should be adopted.

In Schedule G the rates imposed on agricultural products are practically those levied by the act of 1890.

In Schedule H, the liquor schedule, but few changes are made from existing law, the only changes being in the nature of slight increases.

In the cotton schedule the rates, which are practically those of 1894, have not been changed from the House schedules, except in the paragraphs relating to hosiery, underwear, and corduroys and velveteens. On these the rates are somewhat lower than the House provisions.

Some changes of importance have been made in Schedule J, flax and hemp, the rates of duty remaining practically the same as in the House bill, and the change being rather in the nature of new classifications.

WOOL.

Important changes have been made in Schedule K, both on the rates on wool and on manufactured woolens.

In dealing with the wool schedule, the committee have suggested more liberal rates to the domestic woolgrower than they recommended for the producer of any manufactured article in the schedule; they have also suggested for him a more effective protection than he has ever received under any tariff law of the United States at the time of its enactment. The woolgrower is given the benefit of a specific duty upon all classes of wool. Under the operation of this fixed specific duty, the amount of protection afforded will increase with each new decline in the foreign value of this raw material.

The statistics of the world's wool markets show that there has been a constant, steady decline in the prices of class 1 and class 2 wools, dating from about the year 1868, and equaling in the interval fully 50 per cent. The greater part of this decline has accrued within a comparatively few years, and since the passage of the tariff act of 1890. It is due to the enormous expansion of the woolgrowing industry in the newly settled countries of the Southern Hemisphere, where the energies of the agriculturists are chiefly devoted to this industry. Whether this decline has reached its limit is a matter of speculation; but no student of the subject believes that the old prices can ever be permanently reestablished, for the production is increasing faster than the consumption.

It is difficult to make an exact statement of the average percentage of protection afforded by the Senate bill because of the wide variations in the values of different grades of merino wools. These values run all the way from 8½ cents for a heavy Cape wool up to 24 cents a pound for the lightest shrinkage and finest fibered Australian fleece, of which the supply is limited. The ad valorem equivalent of the proposed 8-cent duty will vary, therefore, all the way from 33 per cent up to 100 per cent, and the average ad valorem equivalent of the proposed rates, based upon to-day's prices of the leading grades of class 1 and class 2 wools, is 66 per cent.

All the high-priced wools are skirted, and are made subject to 9 cents duty, and upon the skirted wools the average ad valorem equivalent is even higher. The lowest ad valorem equivalent falls upon the class of Australian wools, which do not compete with our domestic clip. The quantity of these very fine merino wools grown in the United States is constantly decreasing and entirely inadequate to meet our manufacturing requirements. Moreover, this grade of Australian wool possesses certain peculiarities not present in our domestic wools, and necessary to produce certain effects in certain goods; and unless our manufacturers can secure a limited quantity of this wool, to use with their domestic supplies, the goods requiring them will be imported, irrespective of the rates of duty they must pay, thus making a competition from foreign wools in the manufactured form more serious for our woolgrowers than any imports of these grades of raw wool can possibly be.

The great bulk of the foreign wools of class 1, the wools which directly compete with our domestic clip, range in value from 6d. to 8d.—from 12 to 16 cents—in the foreign markets. These are the prevailing prices of the wools of the world which are used for the same purposes as our domestic wools, whether merino or crossbred; and upon these wools the proposed duties of 8 and 9 cents are equivalent to from 50 to 80 per cent ad valorem. This protection is found by examination to be higher by percentage than under any previous tariff.

Under the tariff of 1867 the ad valorem equivalents on class 1 wools averaged about 56 per cent and on class 2 wools about 40 per cent. Under the tariff of 1883 the class 1 duties averaged 45 per cent and the class 2 wools averaged 43 per cent. Under the act of 1890 the class 1 duties averaged from 50 per cent to 59 per cent and the class 2 duties from 50 per cent to 56 per cent. The committee have now aimed to give the woolgrowers a rate of duty which will average from 10 per cent to 20 per cent higher than the rates of either of these earlier tariffs. In doing this, they have given a higher protection upon the raw material than upon the manufactured product in every case.

Very careful consideration has been given to the compensatory duty on woolen goods, with the result of reducing the compensatory rates on low-grade goods, into whose manufacture more or less of other materials than wool enter. On the high-grade goods the compensatory duties are fixed on the same basis that has obtained in all previous tariffs. The more closely the question is examined the plainer it becomes that the preservation of this relationship between the wool duties and the goods duties is equally vital to the woolgrower and the wool manufacturer.

In dealing with class 3, or carpet wools, the Senate bill makes a departure from previous tariffs, in deference to the widespread impression among the woolgrowers that a considerable quantity of these coarse native wools is imported for other uses than the carpet manufacture. The House bill rate of 32 per cent on carpet wools costing less than 13 cents a pound has created more agitation and opposition than any other feature of the wool schedule.

It is alleged by the woolgrowers that this low rate of duty on carpet wools destroys the effectiveness of the protection afforded upon the higher grades of wool, by reason of the temptation it offers to import these low wools to be used in cheviots, golf suitings, and other popular fabrics which do not require fine wools.

Without undertaking to affirm the correctness of these allegations regarding the extensive use of these carpet wools for clothing purposes—and they are very emphatically denied by the carpet manufacturers—the committee recognized the fact that there is some such use made of them. To remove all possible ground for complaint on this score they have fixed the duties on class 3 wools at 4 cents a pound under 10 cents in value and at 7 cents a pound over that valuation. Under these duties the ad valorem equivalents will range on the various clips from 35 per cent up to 60 per cent, and in some instances 70 per cent, and they are higher than in any previous law. It is certain that under these duties foreign carpet wools can not be imported to take the place of domestic wools in the cloth manufacture.

Taking this feature of the wool schedule into account, it is a fact definitely demonstrated by the market reports that the protection given the American woolgrower under the Senate bill is greater and more effective than he has ever before received in an American tariff.

Under this schedule woolgrowing should become in time one of the most profitable branches of American agriculture.

In Schedule L the committee recommend the adoption of a new paragraph fixing specific duties on silk piece goods. The remaining portions of the schedule are not materially changed. It is believed that the rates suggested will give better protection to some classes of silk manufacturers than they have heretofore enjoyed.

In Schedule M the paragraphs have been amended and the rates reduced in most instances.

Many changes are made in Schedule N. The one which will attract most attention is the placing of a duty upon hides of cattle. Representatives of the Western States in which cattle are raised have been for many years insisting that a duty on hides should find a place in a tariff bill which was intended to protect all American interests. This contention has been resisted by the tanners of the country, who believed that it would place an unnecessary burden upon their important industry.

I shall not attempt to enter in detail into the reasons which led the committee to suggest the imposition of the duty. Speaking for myself, I believe that the fears which have been so emphatically expressed as to the injurious effects of the duty have been largely overestimated, and that no very serious burden will be placed upon either the tanning, the leather, or the boot and shoe industry if the amendment should be adopted.

Many changes are suggested in the free list. Among the more notable of these is a recommendation to return to the liberal provisions of existing law with regard to the free importation of books, works of art, etc., under certain conditions.

RECIPROCITY.

At the time the bill was reported from the committee I stated in their behalf that an amendment looking to the more rapid development and extension of reciprocal trade with foreign countries would be reported from the committee at a later day. The committee have not yet found the opportunity to prepare such an amendment. It seemed to them that the provisions of the House bill in this respect would not prove effective. It is the purpose of the committee to prepare a provision which will enable the Government of the United States, within certain fixed limits and without further legislative action, to enter upon arrangements or to negotiate reciprocity treaties looking to an extension of our foreign trade.

In suggesting the striking out of the House provision, the committee had no purpose of abandoning the Republican reciprocity policy. They hope to be able to suggest such provisions as will enable our Government to greatly extend that policy and make its adoption permanent.

CUSTOMS ADMINISTRATIVE LAW.

The committee also hope, before the bill passes from the consideration of the Senate, to be able to present certain needed amendments to the administrative customs law. The act of 1890 has, in the main, answered the expectations of the gentlemen who framed it. It brought about a radical change in the methods of assessing duties. Experience has shown some defects in its provisions, some of which it is the purpose of the committee to try to remedy.

The industrial system of the United States is growing more and more complex every year. It is becoming more difficult every year to satisfy, in a tariff revision, conflicting claims of sections, or to so adjust rates as to do no injustice to any of the varied interests of this great country. The revisions of paragraphs and rates recommended by the committee are undoubtedly far from satisfactory in many cases to interested parties. The amendments reported represent the consensus of opinion of a majority of the members of the committee. We have no pride of opinion or authorship in regard to any of the provisions reported. We have given careful consideration to the numerous important questions involved in the various schedules. We present to the Senate the result of our labors, and shall cheerfully accept your judgment as to the wisdom of our conclusions.

APPENDIX.

Extract from Treasury Department Circular No. 102, June 26, 1896, showing the number of pounds of various tests which equal 100 pounds of hard refined.

Degrees.	Number pounds required to make 100 pounds granulated.	Degrees.	Number pounds required to make 100 pounds granulated.

Mr. PETTIGREW. I wish at this time to offer an amendment to the pending bill and ask to have it printed in the RECORD. I will state that at the proper time I shall call it up for the consideration of the Senate.

The VICE-PRESIDENT. The amendment will be read.

The Secretary read as follows:

That all articles on the dutiable list mentioned in this act shall be admitted free of duty if said articles or articles of a like character of domestic production are manufactured or their sale controlled or the price affected by a trust or combination to increase the cost of said articles to purchasers by preventing competition or otherwise. Every contract, combination in the form of a trust, or association or corporation whose effect is to restrict the quantity of production or increase the price of any article, or any conspiracy in restraint of trade shall be deemed a trust within the provisions of this act.

Any citizen of the United States may file a petition, verified by oath or affirmation, in any district court of the United States where the defendant has an office or place of business or may reside, alleging the existence of a trust as herein defined, and that articles or products subject to duty under this act, or articles or products of like character of domestic production are manufactured, or their sale controlled, or the price affected by said trust; whereupon a summons shall be immediately issued from said court directing the defendant to appear and answer said petition, the case to be governed as to time and manner of service, the pleadings and all proceedings had therein, as is now provided by law in civil causes instituted in the district courts of the United States.

If any citizen of the United States shall file with any district attorney for said district the petition herein set forth, it shall be the duty of said attorney to institute proceedings forthwith in the district court for said district in the name of the United States for the purpose of determining the issues made by said petition, like proceedings to be had in such case as hereinbefore prescribed.

The summons to the defendant or defendants herein required shall be served upon the president or chief officer, if a corporation, or upon all the members, if an association or partnership, and the Secretary of the Treasury shall also be notified of the existence and nature of the suit.

All cases instituted as herein provided shall be advanced upon the docket of the court so as to have precedence of trial over all civil causes thereon, and an appeal may be taken from the decision of the district court to the circuit court of the United States for the district, under the same rules as are prescribed for like appeals in other civil cases, but the judgment of the circuit court shall be final.

If the decision of the court shall be that the allegations of the petition are true, an order directing the customs officers of the United States to thereafter permit the importation of such article or articles free of duty shall at once issue: *Provided*, That where a duty is levied upon raw material or any article that is improved by any process after being imported, the duty on the raw material or unrefined or unimproved article shall be collected and a like amount of duty upon the refined or improved article, as provided by this act; but the differential or additional duty shall not be collected if the improved or refined product is found to be the subject of a trust, as hereinbefore set forth: *Provided*, That at any time after judgment the Secretary of the Treasury, upon written grounds, or any party to the proceedings upon petition, verified by oath or affirmation, may move the court to set aside or suspend the enforcement of such judgment. If upon hearing it shall be adjudged that the trust has ceased to exist, it shall be the duty of the Secretary of the Treasury to withdraw or cancel his orders to the customs officers, and such officers shall immediately resume the collection of the duties imposed by this act. The parties to the original proceeding who do not join in the motion shall have reasonable notice thereof, and the motion shall be advanced and have precedence of trial over all civil causes. Appeals may be taken as in the original proceeding to the circuit court, but the judgment of that court upon the motion shall be final.

Mr. ALDRICH. I suppose the Senator from South Dakota merely gives notice that at the proper time he will offer this amendment.

Mr. PETTIGREW. I wish to say now that immediately upon the disposal of the amendments offered by the committee, which I understand are first in order, I shall ask the Senate to take up and dispose of this amendment.

Mr. ALDRICH. When the proper sections are reached, of course it will be in order.

Mr. PETTIGREW. I do not accept the amendment offered by the Senator from Rhode Island as to when I shall offer the amendment. I shall ask to have the Senate consider it immediately after disposing of the committee amendments.

Mr. ALDRICH. Oh, the committee amendments.

Mr. President, for the committee I offer certain amendments or give notice that I shall offer amendments to certain sections and paragraphs. These amendments are largely changes in phraseology, changes in punctuation, or amendments which were left out of the final preparation of the bill to be reported. I ask that they may be printed, and I shall offer them to the respective paragraphs as they are reached. I now ask that the bill be proceeded with, and that the first——

Mr. STEWART. Before the Senator quits, I should like to ask him at what time the amendment of which I gave notice the other day, with regard to the reserve, will be in order. That is a very important amendment, and the action of some Senators with regard to the whole bill might be materially affected by the question whether we are to be denied a large amount of circulating medium or whether we shall have the reserve regulated so that we shall not have a vast amount of money locked up and paying interest.

Mr. ALDRICH. The Senate is now acting under an order to take the bill up by paragraphs subject to amendment. Whenever a paragraph is reached to which that provision would be germane, or certainly whenever the tariff schedules are disposed of, that amendment will be clearly in order.

Mr. STEWART. It is certainly germane to this measure.

Mr. VEST obtained the floor.

Mr. QUAY. Mr. President——

Mr. VEST. I yield to the Senator from Pennsylvania if he desires.

Mr. QUAY. Unless the Senator from Rhode Island intends to proceed with the bill at to-day's session, I wish to make a motion to proceed to the consideration of executive business. If he does, I will defer the motion.

Mr. CHANDLER. I hope the Senator will allow the joint resolution which was under consideration this morning to be disposed of.

Mr. ALDRICH. I am anxious to proceed with the bill to-night, if possible. Of course, I desire to consult the wishes of members of the committee on the other side as to whether they desire to proceed to-night with any remarks or whether we shall take up the schedules.

Mr. VEST. I would prefer to say now what little I have to say on the subject.

Mr. QUAY. I desire merely to say that I wish to have an executive session before we adjourn to-day. It is immaterial whether it comes now or later.

Mr. VEST. I shall not detain the Senate very long. It will not interfere with the Senator's purpose.

The VICE-PRESIDENT. The Senator from Missouri will proceed.

Mr. VEST. Mr. President, there is no disposition upon my part or that of my colleagues to make factious opposition to the passage of the pending measure. We fully appreciate the desperate condition of the country. We know how many ruined homes, how many broken hearts, how many blasted hopes now surround the Congress of the United States, and if prosperity can come from any source, even from our political opponents, we shall welcome it, and not only welcome it, but bless the moment in which it comes.

I do not believe that the imposition of larger taxation, either in the shape of import duties or internal-revenue taxes, will lift the cloud that now rests upon the people of the United States. I do not believe that higher tariff duties will bring back sunshine and illuminate this whole country, as we have been told over and over again by our Republican opponents.

It is frequently said that adversity came with the advent of the Democratic party to power, and that with the return of Republican methods and Republican measures there would be again hope and prosperity and joy in the land.

Sir, adversity did not come to this country with the advent of the Democrats to power. I bring to the stand the best witness that can be produced upon that subject, the President of the United States, Maj. William McKinley. When the bill that bears his name was pending before the House of Representatives, on the 1st day of April, 1890, he declared that the farming interests of this country were then prostrate and ruined, and that higher tariff taxation was necessary in order to bring back prosperity to the farmer. I will ask the Secretary to read what was said by Major McKinley at that time to show when this cloud of adversity came upon the farmers of the United States.

The VICE-PRESIDENT. The Secretary will read as requested.

The Secretary read as follows:

The committee have given months of investigation to the existing conditions of agriculture and matters connected therewith. This great industry is foremost in magnitude and importance in our country.

Its success and prosperity are vital to the nation. No prosperity is possible to other industries if agriculture languish. In so far as the fostering care of Government can be helpful, it must be faithfully and forcefully exerted to build up and strengthen agriculture.

That there is widespread depression in this industry to-day can not be doubted. Every remedy within the scope of practical legislation known to your committee has been recommended in the proposed measure to meet the urgent requirements of the situation.

Mr. VEST. That, I repeat, was on the 1st of April, 1890. The farmers of the country, according to Major McKinley, were then suffering under the same depression that rests upon them to-day. How do you expect by increasing tariff taxation to enable the farmers of this country to purchase manufactured goods? How do you expect to give them the means with which to buy the articles the price of which you propose to increase by your tariff imposition?

The Senator from Rhode Island, an expert in regard to the tariff, has been very careful not to speak of the condition of the Treasury of the United States when he alludes to the want of revenue to pay the expenses of the Government. All admit that there must be sufficient revenue to carry on the Government; that its honor must be maintained; that its obligations must be met; that its flag must be untarnished. But, Mr. President, every dollar taken from circulation among the people, and without necessity hoarded in the Treasury of the United States, is a crime against the people of this country, no matter by whom it may be perpetrated.

If there be to-day enough money to carry on the Government, why the necessity of increasing taxation? Why does the Republican party leave now all its precedents, all its historic traditions in regard to raising revenue necessary for the country by the imposition of tariff taxation, and resort now to the imposition of a

duty upon tea? Why do they now abandon all the arguments, all the eloquent appeals they have hitherto made upon this subject, and come to the position which their political opponents have assumed, that tariff taxation should be upon the basis of revenue, and not for the purpose of putting money into the pockets of favored classes and manufacturers?

Mr. President, what is the condition of the Treasury of the United States? Let us see what the necessity is for increasing tariff taxation.

On May 21, 1897, the cash balance in the Treasury available was $229,350,650.50. Taking from this the gold reserve of $100,000,000, it leaves, as a matter of course, $129,350,650.50 idle money in the Treasury available for any governmental purpose. Yet we are told that in order to avoid repudiation and dishonor we must impose upon the suffering and depressed people of the United States additional taxes.

When the Government of the United States was turned over by President Harrison to President Cleveland, the balance in the Treasury, including $20,000,000 of fractional or subsidiary coin, was $24,128,087. If the subsidiary coin be deducted from that amount, it showed in the Treasury of the United States available for ordinary expenses $4,128,087. There is to-day in the Treasury of the United States $105,222,573.50 available for the expenses of the Government more than there was at the time President Harrison turned over the Government to his successor, President Cleveland.

How do our Republican friends evade this absolute statement of fact? Governor DINGLEY, the author of the bill which we are now considering, admitting the fact that there was this balance in the Treasury, undertook to dispose of it by saying that there was $20,000,000 subsidiary coin unavailable for the general purposes of defraying the expenses, and that $16,000,000 was necessary in order to pay the anticipated deficit up to the 1st day of July next, making $36,000,000; and deducting this from the amount in the Treasury would leave a balance of $93,222,573.50 available for any of the purposes of the Government.

In order to meet the balance of this surplus, or to dispose of it, Governor DINGLEY then says that we ought to increase the gold reserve from $100,000,000 to $150,000,000, without law, without any other excuse except the exigency that confronted him when he framed his bill and introduced it into the House. One hundred million dollars of gold reserve in the Treasury to-day is there by a statutory enactment which simply provides that whenever there should be not $100,000,000 of gold reserve in the Treasury no more gold certificates should be issued.

Mr. COCKRELL. Will my colleague allow me to suggest that the law does not specify that $100,000,000 shall be kept there?

Mr. VEST. I did not say that $100,000,000 should be kept there, but I say that it is there by virtue of that enactment.

Mr. ALLISON. Nor does it say that more than $100,000,000 may not be there.

Mr. VEST. The law simply provides that when there is not $100,000,000 of gold reserve in the Treasury the Secretary of the Treasury shall issue no more gold certificates. That law has been nullified. Although Secretary Carlisle had one hundred and fifty or one hundred and sixty millions of gold in the Treasury, fifty to sixty millions over the gold reserve, he issued no gold certificates and declared that he would not issue them. The Secretary of the Treasury to-day, Mr. Gage, has more than $150,000,000 of gold in the Treasury, yet he does not propose to issue any gold certificates. And yet with this flimsy basis for the $100,000,000 of gold reserve now existing, we are told by the author of this bill that in order to dispose of the surplus in the Treasury $150,000,000 should be retained there as a reserve.

Mr. President, even if there be a deficit of $65,000,000 for the next fiscal year, as calculated by Mr. DINGLEY, giving the largest possible amount that has been named, there is enough money in the Treasury to-day to pay that off and still leave a surplus for the next, if a deficit should occur again.

Why should we hurry to put taxes on the people of this country with idle money in the Treasury? What intelligent man does not know that the curse of the country to-day is the consolidation and hoarding of money in the great financial centers whilst the people of the country at large are suffering for currency to transact the ordinary business of life? Every dollar unnecessarily hoarded is a crime against the people of the country, and especially in the terrible condition in which we now find them.

It is unfortunate for purposes of discussion upon this side of the Chamber that our friends who have charge of the bill, and especially the Senator from Rhode Island, have not seen proper to give us estimates of the amount that will be produced by the bill as they have now reported it to the Senate.

We were told some weeks ago that a comparative statement would be furnished which would be the most perfect that ever had been seen in any tariff debate that has occurred in this Chamber. We have waited patiently for that exhibit, but it has never come. We inquired of Mr. Ford, the statistician who was to prepare the comparative statement, and he told us that he had made out such a statement, that it had passed from his hands into those of the Senator from Rhode Island, and that he was not able to furnish it to us.

Mr. ALDRICH. Will the Senator from Missouri permit me to interrupt him?

Mr. VEST. Certainly.

Mr. ALDRICH. I suppose the Senator from Missouri is quite willing to admit that with the exception of an estimate of revenue the tables furnished by Mr. Ford are the most complete which have ever been presented in regard to a tariff measure. The Senator knows as well as I do that an estimate of revenue is not simply a question of mechanical figuring upon the importations of a certain year, but it must be an estimate based upon the judgment of the particular person who is making it; and such an estimate we presented to the Senate to-day, which was the first occasion we had to submit it.

Mr. VEST. But, Mr. President, that does not answer my statement. We had a right, I take it, in all fairness of debate, to know what the estimates of the framers of the bill were in regard to the amount of revenue it would produce. That has always been done. Yet when the comparative statement is furnished to us it contains no such statement, and for the first time to-day we have heard from the other side of the Chamber what they believe the bill would produce in the way of revenue, both upon import duties and upon internal-revenue taxation. Let me ask the Senator from Rhode Island whether there ever was an estimate made by Mr. Ford in regard to the amount that would be produced by the bill?

Mr. ALDRICH. Mr. Ford made no specific and definite estimate as to the amount that would be produced by the bill. He stated to us that in his opinion neither the House bill nor the Senate bill would provide for the next year sufficient revenue to pay the expenditures of the Government or revenue greatly in excess of that produced under the act of 1894 in the year 1896. He did not furnish us any definite estimate by schedules and paragraphs as to the revenue to be derived from the bill.

Mr. VEST. I do not know, as a matter of course, with what duties Mr. Ford was charged. I do know that the very essence of this debate, the very essential thing that was to be determined, should be the amount of revenue that this proposed enactment would produce. I must be permitted to say, in all fairness, that the framers of the House bill did not evade that responsibility, but did make an estimate repeatedly, and published it to the world, in regard to the amount that the House bill would produce. I could not distinctly understand the Senator from Rhode Island in regard to the amount that he says this Senate bill will now produce in the shape of revenue, but as I heard him, it amounted to something like $50,000,000.

Mr. ALDRICH. One hundred and eighty-two million dollars from customs and $177,000,000——

Mr. VEST. I mean excess over the Wilson bill, as it is called—over the existing law.

Mr. ALDRICH. About $50,000,000.

Mr. VEST. There is a vast difference of opinion between the leaders of the Republican party in the House and the Senate upon this question, and we are entitled to know exactly upon what basis these calculations are made.

I hold in my hand an authorized statement made by Governor DINGLEY widely differing from the estimate of the Senator from Rhode Island. Governor DINGLEY states, allowing for the decrease of importations by reason of delay in the passage of this bill, that for the first year it would produce $75,000,000 in excess of existing law, and after that at least $100,000,000 a year. In order that I may do him no injustice, I will ask the Secretary to read that statement, an authoritative statement published in the press and given to the country at large.

The Secretary read as follows:

Chairman DINGLEY, of the Ways and Means Committee, in response to a request that he furnish a synopsis of the new tariff bill presented by him in the House yesterday, makes the following statement:

"The bill has two purposes, namely, to raise additional revenue and to encourage the industries of the United States.

"On the basis of the importations for the last fiscal year, the bill would increase the revenue about $112,000,000, divided among the several schedules, roughly, as follows:

"A—Chemicals, $3,500,000; B—Crockery and glassware, $4,000,000; C—Metals, $4,000,000; D—Woods, $1,750,000; E—Sugar, $21,750,000; F—Tobacco, $7,000,000; G—Agricultural, $6,300,000; H—Liquors, $1,800,000; I—Cottons, $1,700,000; J—Jute, linen, and hemp, $7,800,000; K—Wool, $17,500,000; manufactures of wool, $27,000,000; L—Silks, $1,500,000; M—Pulp and paper, $58,000; N—Sundries, $6,200,000.

ESTIMATED REVENUE FROM WOOL.

"This estimate is on the supposition that the imports of each class of goods would be same the next fiscal year as in the fiscal year ended last June. But as the imports of wool were three times as great, and those of woolen goods more than twice as great in pounds as in 1893, the committee assume that this excessive importation would be largely reduced by the proposed bill, although the fact that our domestic production of wool has diminished 8,000,000 pounds since 1893 will necessitate the importation of much more wool now than in the latter year. Assuming that the importations of wool will fall off at least one-third from those of 1896, on account of anticipatory imports to avoid

duties, we place the increased revenue from this source at $11,000,000. Anticipating also that the imports of woolens will fall off nearly 50 per cent from the enormous imports of 1896, we estimate the increased revenue from this source under the proposed rates at about $14,000,000. From sugar we estimate $20,000,000 additional revenue. Anticipating a considerable falling off of imports of Habana tobacco, because of the revolution in Cuba, we reduce the estimates of additional revenue to be derived from the tobacco schedule to $4,000,000.

DIMINISHED IMPORTS EXPECTED.

"The remaining schedules would afford a revenue of about thirty-nine and a half millions on the basis of the imports of 1896, but as there would probably be diminished imports at some points, although the gradual restoration of business activity would offset this by increasing the consumption of imported luxuries, we reduce the estimates of these to $31,000,000. These would aggregate an additional revenue of $80,000,000 the first year.

"A further reduction of five or ten millions for contingencies would leave $70,000,000 to $75,000,000 as the probable increased revenue from this bill the first year, which would undoubtedly rise to $100,000,000 the second year.

"These estimates are below rather than above the probable result, unless a considerable delay in the enactment of the bill should greatly enlarge the opportunity for imports of articles on which duties are to be raised—particularly wool and woolens—for speculative purposes. Undoubtedly, any delay beyond the 1st of May in placing the bill on the statute book would result in a large loss of revenue."

Mr. VEST. Mr. President, I had that paper read in justice to the distinguished author of this bill and for the purpose of showing the wide difference of opinion between the framers of the bill in the House of Representatives and the framers of the bill in the Senate.

With great respect to the Senator from Rhode Island, I distrust his estimates in regard to what will be the result of tariff legislation. I remember very well in 1894, when that Senator upon this floor declared that the Wilson bill, as it was termed, then pending in the Senate, would produce $100,000,000 surplus annually, and that every intelligent man must come to that conclusion.

It is true that the Wilson bill at that time contained the provision for an income tax, but no one ever estimated the proceeds of the income tax would be more than from $40,000,000 to $50,000,000 at the outside by the year, and yet the Senator from Rhode Island was confident that the Wilson bill, now so defective, and to meet the deficits of which he now resorts to internal-revenue taxation, would produce $100,000,000 annually as a surplus.

Mr. President, the deficits—recurring again to that subject—as shown by the official statements, are for 1894, $43,805,223; for 1895, $25,263,246; for 1897, estimated at $65,000,000. At this time the deficit is $35,000,000, and in the statement which I have made here I gave to the opponents of the Democratic party the full benefit of the estimate of $65,000,000 for the next fiscal year. I assert as a matter of fact that there will be no such deficit. There will not be a deficit of more than $40,000,000 for this fiscal year. We are now within a little more than a month of the end of the fiscal year, and it is impossible that the deficit should swell now to $65,000,000. Yet with this enormous surplus in the Treasury we are told that, in order to avoid repudiation and dishonor, and to meet the obligations of the Government, we must resort to a tax upon tea, increase the tax upon beer, and increase the tax upon manufactured tobacco and cigarettes, and enormously increase the import duties, as I shall show directly from the different schedules.

Mr. President, it is unfair to assume that this deficit will be increased, as has been done in the estimates heretofore made in other places. One material question that comes before us in this discussion is as to the expenditures of the Government. It is not fair to assume that the expenditures of the last Congress will continue. They were abnormal. They were admitted to have been beyond all sort of reason by fair men in all parties. For the last eighteen years the average expenditure in this country has been $5 per capita, according to the number of our citizens, and we have no right to assume, and it is unfair to the representatives of the people to assume, that there will be the enormous and excessive and profligate expenditure which has obtained in the two preceding Congresses.

I have in my hand an interesting statement in the nature of a review of an article published in the Scientific Monthly by David A. Wells. Whatever we may think about him in regard to his position upon financial and other economic questions, his great ability, his integrity of opinion, can not be questioned by the most bigoted partisan opponent in the land. This is a criticism by Edward Atkinson upon that article, to which I beg the earnest attention of the Senate, because, in my judgment, it discusses an element in this debate of the most serious and important character. I ask that it may be read.

The Secretary read as follows:

The average expenditures from 1879 to 1896, inclusive, have been a fraction under $5 per head, which sum, assessed upon 73,000,000 people, would come to $365,000,000.

The average expenditures under President Cleveland's first Administration were less than $4.50 per head, which sum, assessed on 73,000,000, would come to $328,500,000.

The average expenditures under the Harrison Administration, with the two first years of Cleveland's second, on which excessive contracts lapped over (six years in all), were $5.30 per head, which, assessed on 73,000,000, would come to $386,900,000.

In the last two years of Cleveland's term the expenditures have again been brought below $5 per head. It would therefore appear that on the experience of eighteen years of the Republican and Democratic Administrations of Hayes, Garfield, and Arthur, Cleveland, Harrison, and Cleveland, a rule had been established that $5 per capita is all that is needed. This rate has covered the cost of the new navy, the refund of direct taxes, the sugar bounty, the extinction of titles to Indian lands, and an expenditure for pensions in 1893 greater by 50 cents per head than it now is. Any expenditure above $5 per head must, therefore, be considered useless and wasteful.

The true problem therefore presented is how to raise a revenue of $5 per head from 73,000,000 people, say	$365,000,000
With a fraction under 50 cents per head added, to be applied to the reduction of debt, say	35,000,000
Total	400,000,000

Mr. Wells points out that the British budget is $450,000,000, assessed on less than 40,000,000 people.

During the same period of eighteen years, 1879 to 1896, the normal cost of government—civil, military, naval, Indians, and postal deficiency—has varied but a fraction from $2.50 per head	$2.50
Interest, pensions, sugar bounties, refund of direct taxes, and purchase of Indian lands	2.50
	5.00

The last three items are nonrecurrent; the interest and pensions are now less than $2.40, and are diminishing. We may, therefore, deal with the problem of how to raise a revenue of $400,000,000, or a fraction less than $5.50 per head, for expenditures and reduction of debt. At this rate, we provide $1 a head more than sufficed under Cleveland's first Administration.

SOURCES OF REVENUE.

For eighteen years, 1879–1896, the revenue from liquors and tobacco—domestic and foreign—has been, per head	$2.50
The miscellaneous permanent receipts have been more than	.25
The revenue from sugar for twelve years preceding 1890, when its abatement caused the subsequent deficiency, was per head	.90
Total	3.65

The sugar duties are by common consent now to be restored. With this assured revenue of $3.65 we have but $1.85 left, which sum assessed on 73,000,000 amounts to $135,500,000.

It will be remarked that the present tariff yields that sum substantially even after deducting liquors and tobacco.

That is to say, if the expenditures are limited to the average sum of $5 per head, which has sufficed for eighteen years, the present system of taxation with the proposed increase on sugar only will yield all the revenue needed, and in addition $35,000,000 for reduction of debt.

Mr. VEST. Mr. President, I take it that no one can successfully contradict the statements made in that paper. As a matter of course, if the Congress of the United States proposes to enter into profligate and unnecessary expenditure, then no human intellect can base any argument upon what will be done in the future; but I repeat, that in two Congresses the expenditures have been abnormal and beyond all precedent. I am not here making a personal or a partisan attack; I simply allude to historical truth when I say that the expenditure of a billion dollars in a Congress is abnormal, outrageous, and, with two exceptions, without precedent in the history of this country.

Are we to assume that this profligacy is to continue? Are we to assume that, in the face of the general distress in the country, the representatives of the people in both Houses will come here and indulge in all sorts of unnecessary expenditures of the public money? It would be a confession that our Government is a failure. It would be an announcement to the world that the people were unfit to choose their representatives and the representatives unfit to represent a free people. I take it for granted that if you will bring back the Government, no matter what party is in power, to an honest, fair, and economical expenditure of the public money, it will not exceed the average for the last eighteen years of $5 per capita, assuming we have 73,000,000 people.

If that be true, there is no necessity for increased taxation in the shape of import duties or internal taxes. It is an outrage upon the people of this country to take more money out of circulation to put it into the Treasury for spectacular purposes when the people of the whole country, and especially of the West and South, are pleading for additional money with which to transact the ordinary affairs of life.

What does this bill propose to do in its departure from the historic precedents of the party whose leaders have framed it? It is proposed to impose a tax upon tea of $9,389,140.70—and this is an official statement—upon beer, by the increase of 44 cents upon the barrel, of $14,541,222.63; upon snuff of $250,976.97; upon smoking tobacco of $5,073,342.75; upon cigarettes, under 3 pounds, $2,021,195.82, making an aggregate of the tax upon tea and internal-revenue taxes of $31,587,832; and yet we are told by the Republican party that this bill is framed to obtain revenue to protect the producers and manufacturers of the United States. Where is the protection to any manufacturer in the United States in the imposition of these taxes? What inference can there be, except that this is a naked and bald attempt to abandon the traditions of the Republican party upon the tariff question and resort to a tax upon articles simply for revenue, without regard to any protection at all?

But, Mr. President, I am more interested, I must confess, and naturally, in the effect of such legislation upon the people whom I immediately represent. My State is a large agricultural State; one of the largest in the Union. In my life, now verging upon threescore years and ten, I have never seen in that land of plenty

such depression and ruin as exists to-day. With abundant harvests, with a soil responding gladly to the labor of the husbandman, the people are without money and appealing to Congress for assistance from present conditions caused by they know not what. Have high tariffs brought them prosperity? Did the act of 1890 bring sunshine again to the homes of the farmers of the West and South? Mr. President, who believes that the imposition of these taxes will bring relief to the people whom President McKinley tells us are the great substratum of prosperity in this country?

Let me call your attention to some remarkable statistics which thrust themselves upon us and from which there is no escape. If we have heard anything ad nauseam for years from the advocates of a high protective policy, it is that whenever the manufacturing interests of the country were sufficiently protected prosperity would come to all the people. We have been told that it followed as light comes from the sun; that all the people of the country would be happy and prosperous if the manufacturers were placed upon the proper basis and sufficiently protected. We have heard it stated that under the Democratic policy there was no balance of trade in our favor, but it was always against us. We have been told that whenever the manufacturers of the United States were given the domestic market they could then reach out and take the foreign market, the farmer would have a market for his produce, and there would come, instead of depression and ruin, joy and happiness and prosperity.

I sent to the Treasury Department this morning and obtained an official account of the balance of trade in favor of the United States for the nine months ending March 30, 1897. The balance of trade in our favor for those nine months is $323,381,519.50. In other words, after supplying our own people, we shipped abroad and sold to foreigners this enormous amount of $323,381,519.50 more than we bought from them in the nine months ending March 30. Where is the prosperity that comes from the balance of trade? If to sell more than you buy be national prosperity, why does it not exist in this country? I think the balance of trade in our favor for the last year was $102,000,000, and now it is three times as much, or more than that, and yet the farmers of the country are in the same condition of depression——

Mr. COCKRELL. Worse.

Mr. VEST. And appealing in vain to the legislators of the United States for relief.

I have here a very remarkable statement—I am not intending to make a rhetorical address, for the tariff is essentially a business and economic question—I have here a very remarkable statement showing the condition of our export trade, which I propose to put in the RECORD and ask the attention of the Senate to it.

The Secretary read as follows:

The exports of manufactured goods during March, 1897, were $25,874,469, over $6,500,000 more than during the same month in 1896, and more than twice as much as during March, 1895. It is estimated that the value of the exports of manufactures during the fiscal year ending June 30, 1897, will be $261,000,000. This is some $32,500,000 more than the total for last year. A computation of the gain has been made by Government statisticians, the periods compared being the nine months ending March, 1897, as compared with the nine months ending March, 1896.

The exports of printing presses have gained 50 per cent during the term specified; locomotive engines show an increase of over half a million; stationary engines an increase of $65,000; boilers an increase of $147,000; all other classes of machinery large increases; steel rails show a marvelous upbound to $1,729,299. To sum up the total of manufactures of steel and iron (not including ores), the increase during the term specified is more than $12,000,000. Corresponding increases are noticed in other lines. For instance, bags, twine, cordage, an increase from $1,350,198 to $1,647,030; glassware, $785,143 to $889,626; greases, etc., from $1,084,325 to $1,500,021; scientific instruments and apparatus, $1,892,925 to $2,197,105. The exports of lead and manufactures of lead have about quadrupled. Starch has jumped from $573,978 to $983,841; varnish from $257,615 to $304,477.

The manufactures of wood show an increase of nearly $1,000,000; chemicals, drugs, dyes, medicines, etc., an increase from $6,647,154 to $7,318,474; clocks, watches, etc., from $1,036,927 to $1,291,129; brass and manufactures thereof, from $595,056 to $847,349. American bicycles show an increase during the nine months mentioned from $670,357 to $4,165,680. Cotton cloths have increased 60 per cent; builders' hardware, 21 per cent; paper and its manufactures, 10 per cent; boots and shoes, more than 20 per cent; electrical and scientific apparatus, about 15 per cent. There were other notable gains in the amounts of exports, but these were the most important. And it is to be remembered that the fiscal year 1896 was considered a remarkable year, showing a voluminous gain in the amount of manufactured goods sent out of the country over 1895. In most of the cases, which were not numerous, where a loss instead of a gain is noted this year, exporters find specific local causes leading thereto.

Not only has the bulk of exports increased remarkably, but the scope of manufactured goods for foreign consumption has been widened considerably during the last few years. A printed list of the articles now sold in foreign lands includes more than 2,500 items, and the demand for new lines is constantly on the increase. The number of firms catering to the export trade is largely on the increase. The representative of a prominent New York exporting firm says that the last few years have seen an awakening among merchants and manufacturers in the matter of the possibilities of foreign trade. Three years ago, out of 260,000 manufacturers, only 4,000 of them were making any palpable effort to effect a distribution of their wares in foreign markets. The rest of them seemed unaware that in New York City alone there existed 325 firms the business of which was the purchase of goods for export and the daily practice of which was to pay cash for the goods bought, taking the risk with the foreign client. Since then many thousands of firms have discovered that they not only have a foreign market, but that it is an eminently lucrative one, even when business is done through a middleman exporter.

Mr. VEST. Mr. President, in that connection, I ask permission to insert a table, for the correctness of which I have the highest official authority, showing the enormous increase in the exports of our metallic manufactures from the year 1886 to the year 1896, the increase being conspicuous under this derided Wilson law, of which we hear so many anathemas from so many different quarters. I do not care about it being read, but I shall insert it in the RECORD.

The table is as follows:

Value of exports of finished articles of manufactures of iron and steel, progressed above the crude and half-manufactured state, and of other manufactures of similar character where metals are the component material of chief value, in 1886, 1891, and 1896.

Articles.	Fiscal year.		
	1886.	1891.	1896.
Agricultural implements:			
Mowers and reapers	$1,288,000	$1,587,000	$2,889,000
Plows and cultivators	322,000	597,000	680,000
All other and parts of	757,000	1,035,000	1,075,000
Total	2,367,000	3,219,000	4,644,000
Brass, and manufactures of	150,000	297,000	1,026,000
Carriages, cars, and parts	1,928,000	4,911,000	2,747,000
Clocks and watches	1,366,000	1,580,000	1,659,000
Copper manufactures	109,000	190,000	819,000
Cycles, and parts of	.....	.....	3,796,000
Instruments and apparatus for scientific purposes	480,000	1,576,000	2,717,000
Iron and steel manufactures:			
Cutlery	112,000	146,000	188,000
Firearms	1,779,000	859,000	734,000
Builders' hardware, etc	2,466,000	3,858,000	6,140,000
Machinery, sewing	2,585,000	2,869,000	3,051,000
Other machinery	4,469,000	13,425,000	22,513,000
Nails	294,000	440,000	821,000
Scales and balances	281,000	318,000	377,000
Stoves and ranges	196,000	248,000	304,000
Wire	335,000	860,000	1,788,000
All other	2,284,000	3,987,000	8,193,000
Total	14,801,000	27,010,000	44,109,000
Lamps, chandeliers, etc	546,000	509,000	730,000
Musical instruments	871,000	1,336,000	1,269,000
Total	22,618,000	40,618,000	63,516,000

Mr. VEST. Mr. President, I think I have shown, for I am very certain of it myself, that there is no necessity for the imposition of more taxation in order to meet the demands upon the Treasury of the United States. But even if that necessity existed, experience teaches us that our friends upon the other side have taken the wrong road, at least so far as import duties are concerned, in order to bring about increased revenue.

I have before me the official statement of the estimates that were made in 1890, which I happen to have found among the papers pertaining to that debate, as to the amount that would be put into the Treasury of the United States by the passage of the McKinley bill. The estimate, which was based, of course, upon the importations of 1889, was $201,689,907. In 1891, after the act had taken effect enormously increasing tariff taxation, the amount collected by the Government was $215,790,686, which is a few million dollars over the estimate made by the framers of the bill. But now mark the sequel. In 1892, the next year, the receipts fell off under the enormous taxation of the McKinley Act from $215,790,686 to $173,098,400, and in 1893 to $198,373,452. So increase of taxation does not always produce increase of revenue.

For the purposes of my argument, I care not whether the Senator from Rhode Island be correct in his estimates or the author of the House bill, Governor DINGLEY, in his. I answer both of them that there is no necessity for increased taxation, because there is money enough in the Treasury, and it is a crime to increase the dead capital of the nation.

Mr. CHANDLER. Will the Senator from Missouri allow me to interrupt him at this point?

Mr. VEST. Certainly.

Mr. CHANDLER. He began his remarks by stating that there is an enormous surplus in the Treasury. The Senator did not allude to the reason for the existence of that surplus.

Mr. VEST. I care not.

Mr. CHANDLER. I think it would be a mistake if his speech went to the country with that important omission. The Senator says it is there, and that it is a crime to increase it, and yet he has made no allusion to the way in which it got there. I understood the Senator to be comparing revenue systems one with another. Did the Senator mean that the great surplus in the Treasury is the result of the operation of the revenue system of the Government created under the Wilson Act, or will he state how the surplus got there before he calls it a crime to have it there?

Mr. VEST. It does not matter in the slightest degree how the

money got there, provided it got there lawfully; and if it did not, the Senator from New Hampshire would be the first to detect the illegality and to denounce it. We all know it came there from the sale of bonds. For myself, I am not responsible for that action of the Government.

Mr. CHANDLER. Ought not the Senator to have stated that when he began his arraignment?

Mr. VEST. The money is there. It is just as illogical to refer to the source of that money as it would be in any business calculation to leave out what any man receives from inheritance and without working for it.

Mr. CHANDLER. Will the Senator allow me? He began a comparison of revenue systems. He began to arraign this side of the Chamber for bringing in a revenue bill——

Mr. VEST. I beg the Senator's pardon.

Mr. CHANDLER. And contrasted it with the Wilson Act.

Mr. VEST. I beg the Senator's pardon.

Mr. CHANDLER. And he went on to make a political speech on the revenue question. Was it fair for the Senator, with his known fairness, to fail to allude to the source of the $139,000,000 which he says is in the Treasury, and which he says it is a crime for this side of the Chamber to increase by a revenue law to the extent of a dollar?

Mr. VEST. We are confronted with a status. We have got so much money in the Treasury of the United States, and a legislator who would go back and quibble about the place from which the money came, when considering the question of meeting the obligations of the Government, is unworthy to be called a legislator. The money is there, and because it came there from the sale of bonds we are precluded from discussing what shall be done now to meet the obligations of the Government for the future. There it is; so much money. Do you propose to give it away, to throw it away, or to use it? What right have the representatives of the people to impose more taxes upon them when the people's money is already there to meet the obligations that come upon the Government? If I am correct in my statement as to the amount of money, whether it came from the sale of bonds or from taxes or from any other legitimate source is entirely outside of the proposition I am considering. "It is unfair!" It is entirely legitimate and entirely logical for me to ask, Why do you put more taxes upon the people when this money is there?

But, Mr. President, let me ask a question. If we are exporting more than we are buying to the amount of $321,000,000 in nine months—and I have seen the statement, by estimate, that for the fiscal year our balance of trade, as it is termed, would amount to $325,222,000—and if the manufacturers of this country, who are furnishing more than 26 per cent of the articles that are carried abroad, are filling the demands of the home market and then sending abroad this surplus, where is the necessity for protecting them? Where is the necessity for the increase of tariff taxes? It would seem to me, unversed as I am in the science of protection, that that would be an ideal condition. They have not only filled the demands of the home market, but they are now sending abroad 26 per cent of the exports, the proceeds of their manufactured goods, and competing with foreigners.

Mr. GALLINGER. May I interrupt the Senator from Missouri?

Mr. VEST. Certainly.

Mr. GALLINGER. I know of an instance where a very large invoice of goods went abroad from Manchester, N. H., that was sold for less than cost. The fact is that under the Wilson law our people are too poor to purchase for themselves, and our manufacturers have to sell their goods for just what they can get abroad, which they have been doing.

Mr. VEST. I suppose the remedy would be to increase the price of goods to the American consumer. I see no other remedy from the standpoint of the Senator from New Hampshire.

Mr. GALLINGER. I will say frankly to the Senator that I think a tariff law might occasion a little increase in the price of goods to the American consumer, but, inasmuch as he would get something for his labor and be better able to buy goods, he would be better off than he is now.

Mr. VEST. Let us deal frankly with this question. The only possible argument that explains the enormous balance of trade in favor of the United States in these times of depression is that frankly given by some of the protection papers—I have never heard it yet in Congress—that the abnormally low prices of all articles, not only the products of agriculture, but manufactured goods, have caused and necessitated exportations from this country, because the people here are not able to buy.

The farmers of the United States have nothing with which to buy manufactured goods. They receive nothing, comparatively, for their own products. When they ship abroad, they ship, as a matter of course, at a loss; and it is possible that the manufacturers ship at a loss. This balance of trade, then, is produced by the terrible depression that exists in this country. And what is the cause of that depression? Does any man believe that a high tariff will give relief? Did the McKinley tariff give it? Did the tariff of 1894, which was high enough, in all conscience, to satisfy almost any protectionist, give relief?

How are you to increase your home market by putting up tariff taxes, when the home market is already supplied and this enormous surplus is going abroad? Can any Senator answer that question in the course of this debate?

Mr. GALLINGER. If the Senator from Missouri will permit me, I will state that the six little New England States consume 3,000,000 barrels of flour per annum when they are prosperous, when the mills are running, and it all comes from the West. Almost every bushel of corn that is consumed there comes from the West, and so as to almost every pound of beef. If our mills are silent, or if our operatives are getting wages much less than they have been accustomed to receive, they can not consume the products of the West, and hence the Western farmer suffers in common with the Eastern manufacturer and the Eastern operative.

Mr. VEST. We are obliged to the people of New England for giving us even a limited market for our agricultural products, but it is not in New England that the price of our products is fixed. The price is fixed in Liverpool and in foreign markets, and I will tell you what, in my judgment, is the matter with the farmers of the West and of the South, and why the terrible depression rests like a pall of gloom upon the country to-day. It is because the agricultural exporter and producer, the farmer of the United States, is brought in competition with the gold premium. He is confronted with the products of agriculture where the labor is paid for in silver. The products are paid for at gold prices, and we, being upon the gold standard, are competing now with silver-using countries, always with the gold premium against us.

Mr. GALLINGER. Will it interrupt the Senator if I make a statement?

Mr. VEST. No.

Mr. GALLINGER. We have heard that argument on this floor a great many times during the past year, the Senator from Nevada [Mr. STEWART] being the one who has usually made it. He has compared this country with Japan, saying that Japan was much more prosperous, because she was on the silver standard while we were on the gold standard. But Japan very recently has repudiated the silver standard and has adopted the gold standard.

Mr. STEWART. The Senator from New Hampshire means that Japan has been bought out.

Mr. GALLINGER. Ah, that is all right.

Mr. VEST. I take it the answer will never be made during this debate, here or elsewhere, to the question how you are to increase the prosperity of the farmers of this country by increasing tariff or internal-revenue taxes. What we need is to put money into the hands of the purchasers of the country, the farmers of the country. You can never have prosperity with a falling market. If any Republican friend of mine will relieve us of the falling market, I will follow him and fight under his flag and never ask to what political faith he belongs. You may pass tariff laws from morn till night, until we are exhausted, but until you stop the falling prices you can not have prosperity in the United States.

Men with money will not invest when the market is going down; men without money can not buy, and men can not obtain money unless they can sell for remunerative prices. You are confronted to-day with a condition of things obvious to every man, and yet you are seeking for a remedy which the experience of the past and the logic of the present, it seems to me, absolutely prove is utterly futile.

Mr. President, I do not intend to discuss the financial question, for I have spoken now longer than I intended, and only under a sense of profound duty on account of my position on the Finance Committee. As I say, I do not intend to discuss the financial question, but I am just as sure as I am of anything that can possibly be determined that the proposed tariff law will not relieve the country, and that your imposition of import and internal-revenue taxation will simply increase the trouble and not bring relief to the people.

I do not propose to go into the schedules. There is time enough to discuss them when they are reached. Incidentally I am compelled to notice one or two observations made by the Senator from Rhode Island. In the first place, the salient feature of every tariff bill is the sugar schedule. It has always produced more discussion than any other, not even excepting wool, and it always will. If there is any schedule in any tariff bill almost impossible of comprehension, it is the sugar schedule. Ingenious statements can be framed and are framed every day from different standpoints showing the differential between the raw and the refined sugar.

The Senator from Rhode Island ingeniously has presented to us one showing his conclusion in regard to the differential in the bill as reported by the Finance Committee. The whole tax turns upon one single question, in my judgment, and nobody but an expert inside of a refinery is able to determine it: How many pounds of

a certain grade of raw sugar will make 100 pounds of refined sugar, and what will be the waste, as they call it, or the excess after the 100 pounds are made?

Take the testimony of the experts before the Ways and Means Committee of the House and the numberless publications in newspapers, and what do they prove? One witness testifies that as to sugar at 75 degrees polariscopic test it will take 147 pounds of raw sugar to make 100 pounds of refined, and then that there will be some twenty-odd pounds of soft sugar and 2 or 3 gallons of molasses left in the waste, and then the refiner gets his drawback for the 147 pounds of sugar which he has purchased from the importer. Of some grades of sugar by polariscopic test it requires, according to one expert, 117 pounds, another 100 pounds, another 107, and another 122 pounds. How much the waste is, how much the drawback is, is known only to the initiated and to the experts inside the refinery, and never will be known to us.

One of the officers of the sugar trust testified in the Lexow examination that their profit last year was 21 per cent net. How was it made? You know it could not have been made upon the face of any of the tables presented to us. It is made upon the drawback; it is made upon the waste, as they call it, the molasses and soft sugar, which, after making 100 pounds of refined sugar, then becomes the clear profit of the refiner.

I do not now care to discuss the question of the Hawaiian treaty; whether the sugar from Hawaii should come in free or dutiable. Upon that question I do say to my friends upon the other side, who inserted the provision we find in the bill, that it would have been much better and fairer if they had undertaken to repeal directly the treaty between this country and Hawaii. Congress, as a matter of course, has a right to repeal any treaty stipulation it may please, but we ought not to attempt to do it by indirection. We are told that another provision will be suggested, and I await it before I further express myself upon the subject.

Mr. President, taking the lead schedule, to which the Senator from Rhode Island alluded, how is it possible to defend an increase in the duty upon lead? We export millions upon millions of pounds. The State of Missouri is more largely interested possibly in galena ore than any other State in the Union. I undertake to say we need no protection. When we supply the home market, when the lead trust is making millions and millions of dollars and declaring its enormous dividends of 12 per cent upon its stock, why should we put up the duty half a cent a pound, double the duty upon lead, and nearly double it upon white lead, which goes upon the cottage of every poor man in the land.

It seems to me that the increase is utterly indefensible. At a time of great adversity and great depression, we reach into the hovel and the humble homes of the poor people of the whole country and impose taxes upon them in order to feed the cormorant greed of this trust and monopoly. I stand here to-day representing a State which I say is more largely interested in galena ore than any other State in the Union and disclaim any desire for such taxation.

But take another schedule. I do not propose to go into it, but take the crockery and earthen ware schedule, to which my friend the Senator from Rhode Island alluded. The increases in that schedule, I was about to say, are appalling. They were too high in the Wilson Act, by far too high, and none of us upon this side attempted to defend them. We were then in the condition the Senator from Rhode Island is in now, when he says that in order to obviate certain difficulties upon this floor he had to put in certain duties. The crockery and earthenware schedule, under the Wilson Act, as it is termed, is an enormous one, and I am bound to say never should have been put there. But our friends have increased it. They have made the duties absolutely prohibitory, and I will undertake to prove it mathematically when the schedule is reached.

The duties are put up on common earthenware, white, plain earthenware, that goes into the homes of the poor men and the mechanics of the country, until it is absolutely impossible that any should come in from abroad. Is that revenue? Is that protection to American manufactures, or is it oppression, outrageous oppression, upon the poor and common people of the country?

Now I come to the enormous duty on wool. There, again, our Republican friends are hopelessly divided. Upon one day I read the appeals of Justice, Bateman & Co., who represent the woolen manufacturers. They want the Senate bill.

Mr. ALDRICH. The House bill.

Mr. VEST. No; they want the Senate bill, so far as the taxation upon the third-class wool is concerned, but to put back the taxes upon first and second class wool to where they were under the Dingley bill, so called. They would be satisfied with the McKinley Act, according to their last communication. About the time I have come to the conclusion that I know what the wool manufacturers and the wool people in the United States want, I receive a communication from Mr. Lawrence, the shepherd king, president of the Wool Growers' Association of the United States, and he denounces the McKinley Act, and says it was outrageous on the woolgrower; he denounces the Wilson Act, and then he denounces the Dingley bill and the Senate bill, and says that none of them will give relief to the woolgrowers of this country; that all the duties should be put higher.

About the time I think I understand something about wool, and am considering third-class or carpet wools, I am told by the very highest authority, General GROSVENOR of Ohio, representing a wool State, that there is no such thing as carpet wool raised in this country. Mr. Lawrence says there is. Justice, Bateman & Co. say there is.

Now, I have a statement to make—and I do not propose to go into the intricacies of the wool schedule this afternoon—and on it I challenge contradiction. The only era, the only time, in which there was a stop or a hesitation in the downward fall and grade of wool prices was after the enactment of the derided Wilson bill. From 1867, when the ideal wool tariff was enacted, according to Mr. Lawrence—and I believe Justice, Bateman & Co. say the same thing—the price of wool commenced declining. Of course it went up in 1872 and 1873 under abnormal speculation, but it went down again, and it resumed its downward grade under the highest possible tariff.

When the McKinley Act was enacted the wool manufacturers and the woolgrowers said, "Io triomphe! At last we have reached the haven of rest, and we will now have the highest prices for wool and woolen goods." Wool never stopped an instant in its downward grade. It continued to fall, and the woolgrowers of the United States were still complaining until the derided Wilson bill was passed, and it had then fallen to something like 17½ or 18 cents for XX Ohio wool. The fall stopped when we put wool upon the free list. There was an increase of 2 cents a pound in the price, and I believe to-day, or the last time I looked, it is 21 or 21½ cents for the same grade.

I know we are told that Port Philip wool, which is the same grade of Australian wool, did not keep pace with the XX Ohio wool, that being sold in the English market and here; but it can be shown, and I will show, that whilst there were ordinary fluctuations here and abroad in both grades of wool, the fact remains that, for the first time in the history of the wool market, after the enactment of the Wilson bill, which put wool upon the free list, the fall in the price of American wool was stopped. As a matter of course, there has been no great increase, because there has been no increase in the price of any commodity; but there was an increase between the date of the passage of that act and from day to day since, with the exception of a very few days when there were the ordinary fluctuations in the market, until to-day XX Ohio wool is higher in the market than it was when the Wilson bill was enacted.

Now, my friend the Senator from Rhode Island alluded to the duty upon hides. A good deal could be said in regard to that duty, and some of it of a very highly interesting historical character. I remember in 1890 the hide duty had a history. If any Senator will turn—I believe I have it here—to the report of Mr. McKinley, now President of the United States, upon the McKinley bill, he will find that he reported that a duty had been placed upon hides. When the bill was published, it was found that hides were still on the free list.

It is said—I do not know anything about the secret history of the transaction—that after the Committee on Ways and Means in the House, of which Mr. DINGLEY was also then a member, had agreed to put a duty upon hides, certain distinguished members of the Massachusetts delegation called upon them and informed them very graphically and distinctly that if a duty were put upon hides the hide of the McKinley bill would be found upon the fence. It was concluded to put back hides upon the free list, and it was done; but in the hurry and confusion of the change Mr. McKinley forgot to change his report, and to-day we have the report reading one way and the act of Congress reading the other.

I do not possess the gift of prophecy, nor do I claim it, but I do undertake to say that the duty will not remain upon hides. Our Western friends who are clamoring for a duty may possess their souls in such patience as they can; hides will go back on the free list. I do not pretend to say that I shall resist their going back. I believe that they should be free. But those Republican Senators who think they can coerce New England and the boot and shoe manufacturer of that very thrifty and energetic section of the Union into putting a duty upon hides have not read accurately the history of this country, and especially of political parties.

Mr. President, great changes have come since 1890 upon this tariff question. None of us who were here then can forget the constant refrain, repeated so often in the Halls of Congress, about a free breakfast table. The Democratic party was told the Republican party proposed to give the honest laboring man free coffee, free tea, free sugar. We had the most graphic, pathetic, and eloquent picture of the poor man's family sitting down to an untaxed breakfast table, and, in connection with that, we were told upon the highest authority that there should be never any duty upon

sugar, because that duty was paid strictly by the consumer. In some cases they said it was possible that the importer paid a portion of the tax, but it was never the case in regard to sugar.

I happened, in looking over an old debate and the accompanying reports, to find a declaration of the President of the United States, which I ask to have read.

Mr. COCKRELL. The present President?

Mr. VEST. The present President of the United States, Governor McKinley. It goes very far to settle some disputed points in regard to the tariff question.

The Secretary read as follows:

"So large a proportion of our sugar is imported that the home production of sugar does not affect the price, and the duty is therefore a tax, which is added to the price not only of the imported, but of the domestic product, which is not true of duties imposed on articles produced or made here substantially to the extent of our wants."—*McKinley's report on bill of 1890.*

In the CONGRESSIONAL RECORD of September 8, 1890, volume 21, page 9878, Senator ALDRICH said:

"Whatever duty we remove from raw sugars will be for the benefit and the direct benefit of the people of the United States. We are dealing with an article which cost our people $150,000,000 last year. We will by this legislation save to the people who purchase sugar, and it is very nearly a per capita tax, because the poor man uses almost as much as the rich, $50,000,000 that is now levied upon them by direct tax."

Senator HALE said:

"The reciprocity amendment, adopted by a Republican Congress and signed by a Republican President, was based upon the determination of the Republican party to put upon the tables of the American people untaxed sugar and to reduce the surplus revenue of the country to the extent of $60,000,000 per year."

In the CONGRESSIONAL RECORD of July 30, 1890, volume 21, page 7888, the Senator from Vermont [Mr. MORRILL] said:

"The question of adding free sugar to the breakfast table presents even a stronger case than tea and coffee presented in 1872 for like treatment. Every dollar of the duty imposed comes out of the poor as well as of the rich. If we can prudently do without the revenue of over $50,000,000, clearly it should be done without hesitation. There is no article so largely and so equally consumed by the people."

Mr. VEST. It would be unjust not to supplement those statements by one made by my distinguished friend from Iowa [Mr. ALLISON], from the CONGRESSIONAL RECORD, volume 26, part 6, Fifty-third Congress, second session, page 5697, June 4, 1894:

I pause here—

He said—

to call attention to the fact that the sugar schedule, as it is now proposed, is in its essence a capitation tax, a tax upon every man, woman, and child in the United States of $1.

Mr. President, I do not know that it would add much to the debate if the opinions of eminent Republicans in regard to the pending Senate tariff bill should be placed before us. The bill has been denounced for various reasons; but it is enough for me to say that, in my judgment, there is no necessity for increased taxes, and especially is there no necessity at this time, when great depression exists throughout the country.

We do not propose, as I said in the beginning, to make factious opposition to this measure. We intend to discuss it fairly, earnestly, and justly. We do not expect to put unnecessary obstacles in the way of its being enacted. I think that I state the feelings of everyone upon this side of the Chamber when I say that if our friends can bring relief, if they can shed light upon our darkened path, I shall hail that light with joy, no matter in whose hands the lamp may be. I can say honestly and truly, even to the Senator from New Hampshire or the Senator from Rhode Island, that—

> Keep thou my feet;
> I do not ask to see the distant scene;
> One step's enough for me.

Give prosperity to the country, relieve the people, and for myself I shall give the meed of praise where it belongs, and shall gladly accept the result, no matter from what source it comes.

Mr. QUAY. I move that the Senate proceed to the consideration of executive business.

Mr. CHANDLER. Will the Senator from Pennsylvania allow me to make one remark?

Mr. CANNON. Will the Senator from Pennsylvania withdraw the motion for an executive session pending the presentation by me of an amendment with a few observations thereon?

Mr. QUAY. I will do so with the understanding that the motion will be renewed at the expiration of the remarks of the Senator from Utah.

Mr. CHANDLER. Will the Senator from Utah allow me to give a notice?

Mr. CANNON. Certainly.

Mr. CHANDLER. During the morning hour to-morrow I shall ask the Senate to take up the joint resolution to provide for sending the contributions to India and seek to obtain a vote upon it. I hope at that time the Senator from Alabama [Mr. MORGAN] will be ready to agree with me as to the time when a vote may be taken.

Mr. CANNON. Mr. President, I send to the desk and ask the Secretary to read a proposed amendment to the pending tariff bill.

The Secretary read as follows:

Amendment intended to be proposed by Mr. CANNON to the bill (H. R. 379) to provide revenue for the Government and to encourage the industries of the United States.

And from and after sixty days from the passage of this act there shall be paid, out of any moneys in the Treasury of the United States not otherwise appropriated, to any exporter of wheat or wheat flour, rye or rye flour, corn, ground or unground, cotton, hops, or tobacco produced wholly in the United States and exported by sea from any port in the United States to any port of any other country, the following export bounty, by way of an equalization to agriculture of the benefits of this act to encourage the industries of the United States, to wit: Ten cents per bushel on wheat; 50 cents per barrel on wheat flour; 10 cents per bushel on rye; 50 cents per barrel on rye flour; 5 cents per bushel on corn; 10 cents per cental on corn, ground; 1 cent per pound on cotton; 2 cents per pound on hops; 2 cents per pound on tobacco. And all payments of bounty under this act shall be made upon negotiable vouchers, issued by the collector of customs at the port of clearance, upon presentation at the Treasury or any subtreasury of the United States; and the Secretary of the Treasury is hereby charged with making and enforcing such regulations as may be necessary for the full protection of the exporters and of the Government according to the true intent and meaning of this law.

Mr. CANNON. Mr. President, I do not rise at this time to antagonize the protective-tariff principle, nor shall I occupy the attention of the Senate at this late hour in the afternoon in any general or detailed criticism of the bill which has been presented here. On the contrary, the proposition of the amendment is directly in the interest of the protective principle and its equitable application to the people of the United States. It was with great surprise, upon an examination of the measure, I found that the great class of our population who have from the beginning not only supported the protective-tariff party by their votes, but have supported the protective-tariff principle by their industry from the beginning of its operation, were in a large degree excluded from any of its benefits. It is, I say, to supply a very patent omission from the measure as it now stands that the amendment is proposed and will be advocated here until a vote shall be had thereon.

The bill as it is offered to-day affords no protection to agricultural staples. There is remaining, I presume, no advocate of the protective-tariff system who will contend that in this bill with these import duties there is afforded any protection or benefit of increased price arising from import duties upon any of those commodities of which we export our surplus. Nor are there remaining at the present time in the school of protection very many men who will contend, and none who will prove, that the indirect protection afforded to the farmer by the tariff on manufactured goods is sufficient compensation to him for the vast cost entailed upon him in carrying the protective-tariff system upon manufactured goods.

The day was, Mr. President, when the American farmer, with free soil to all, with the most advanced agricultural machinery known in the world, could not only pay the cost of his production, but could carry the weight of the great civilization of this country. But a new world condition has arisen. There are vast areas of agricultural land opened in the steppes of Russia, in Argentina; and the Hungarian peasant and the peon of South American countries to-day have machinery only one year behind the most advanced in use in the United States, and the producer of staples in America must sell in competition with these lands. It has become apparent to all thoughtful observers, and certainly it is known to all who have any direct connection with the agricultural industry of the United States, that the farmer can not, and the man who reads him well knows that the farmer will not, much longer bear this burden.

There are three remedies possible, Mr. President. One, and the right remedy, is a restoration of money conditions, by which we will get a world's rise in prices particularly beneficial to the agricultural producer, particularly applicable to the present situation in the United States. But I venture to say that such remedy will not be adopted by this Congress. It will scarcely be proposed here. The second remedy, and one which I, as a believer in protection, would be ready to accept rather than to hold to and vote for an inequitable bill, would be absolute free trade, by which the farmer might buy as cheaply as he is compelled to sell; and that remedy this Congress will not seek to enforce. There remains, then, but the third—the application of an export bounty which shall in a measure give restitution to the farmer for the higher prices which he is compelled to pay in protected markets.

No proposition based upon the declaration of equal protection to all the industries of the United States is complete, nor can there be successfully made a contention that it is just, unless it gives to the exporter of agricultural staples from the United States an equivalent benefit to that given to the manufacturer by the imposition of an import duty.

A duty of 25 cents a bushel upon wheat is a delusion and a snare. The farmer of the United States gets no benefit from it. The imposition of duty upon cotton, if that were attempted, would be of no value to the cotton producer. The imposition of a duty on rye is of no value to the farmer of the United States. Every other protected industry has a direct benefit from this

tariff, because where we do not produce in the United States sufficient for our own consumption and a quantity considerable in extent for export, the import duty serves as a means whereby the local producer can enhance the price to the local consumer.

We have the highest testimonials in behalf of this proposition. Some of the purest and best statesmen the United States has had have been its advocates. Hamilton and Albert Gallatin gave their voice to it. Hamilton went so far as to say that every dollar of duty collected for the protection of manufactures should be given back to agriculture through the medium of an export bounty, because it was inevitably taken from agriculture. Webster and Clay inferentially indorsed the same proposition, and the people of the United States are giving their approval to it now.

I am in receipt of communications from State and Pomona granges, shipping organizations, boards of trade, and clergymen, all advocating that this principle shall be inaugurated at this time in behalf of equitable protection to the people of the United States.

Mr. David Lubin, who in recent years has been the unceasing advocate of this principle among the people, has found within the last eighteen months scarcely any opposition even among the laborers of the United States, who at first imagined that the price of breadstuffs was to be increased to them by this means.

The rates are not excessive. They are scarcely equal to the imposition of tariff upon manufactured goods. The cost to the Treasury of the United States will not be burdensome. If we shall take out from the Treasury and distribute among the farmers of the United States the $48,129,546 per annum which this system will cost, based upon our exports of agricultural staples in the year ending June 30, 1896, we will only have given back to the channels of trade some portion of that surplus which the pending bill will otherwise pile up in the Treasury, according to its advocates.

At the rates proposed, and taking our staples exported during the year ending June 30, 1896, the United States Treasury would pay for wheat and wheat flour sent abroad annually $13,375,440; for rye and rye flour $100,734; for corn, ground and unground, $5,055,018; for cotton $23,352,263; for hops $335,305, and for tobacco $5,910,786.

The immediate benefit to the farmer derived from the Treasury of the United States would not be all. For this comparatively small expenditure to him he would receive for these staples more than $225,000,000 in higher prices than he now receives. It is true that this would increase the price of breadstuffs to the consumers in the cities; but under the declaration made here to-day that with higher prices the people will be more able to buy, we will have a larger consumption of wheat and wheat flour and other agricultural staples in the cities of the country than we have now at the low prices.

The Senator from Missouri inquired to-day if the remedy for the people's inability to purchase was to tax the people and make goods higher, so that they who could not buy to-day might be able to buy at higher prices; and he was answered that if prices were elevated by means of the imposition of a tariff the people would get better wages and thus have the greater power to buy the product of Western farms. It is a noticeable fact that the consumption of staple agricultural products has fallen off in the United States per capita. This remedy, under the argument, will restore that consumption to its normal figure; and if there be any virtue in protective tariffs, this will give to every man bread enough, because a sufficient tariff on woolen goods will give him clothes enough.

Mr. BUTLER. Mr. President, the Senator from Utah said he was in favor of about $13,000,000 export duty on wheat at 10 cents a bushel. If we pay an export bounty of 10 cents a bushel, that will raise the price of every bushel of wheat, whether exported or consumed at home, that much, will it not?

Mr. CANNON. Certainly it will.

Mr. BUTLER. Then, for an investment of $13,000,000, which the Government would pay out in the shape of an export bounty, the wheat farmers of the country would get their protection of sixty or seventy million dollars, would they not?

Mr. CANNON. They would, if there be any truth in the protective principle.

Mr. BUTLER. That would be a very good investment.

Mr. CANNON. It would be a very good investment if it were to be made in behalf of any manufacturing industry or any trust in the United States, but anything in behalf of the farmer is looked upon with scorn and is considered a doubtful investment by the Legislature of the United States.

Mr. SEWELL. Will the Senator allow me to ask him where this $49,000,000 will come from? In what schedule would our friend from Rhode Island [Mr. ALDRICH] put it? Where are you going to raise it?

Mr. CANNON. Mr. President, according to the statements made concerning this bill by its friends, it will raise a sufficient surplus to enable the Treasury of the United States to bear this comparatively small charge. If it shall not, under the ordinary expenditures of the Government, I would recommend that Congress limit the amount of money paid for armor plate to an honest figure, and the amount of money paid out for other expenditures to an economical basis, and thereby the Treasury will have enough means with which to discharge this debt of honor.

In addition, Mr. President, it is a very poor argument, when you have been robbing some man for years and he asks you for justice, to say that you propose to continue to rob him of more, and say that you do not know where you are going to get the money with which to restore that which you have unrighteously taken. It is the very first duty of the Congress of the United States to provide a bill which shall not only be honest in its present application, but which shall pay back some portion of that which has been taken from the pockets of the toilers of this land. I believe we can cut the billion-dollar expenditures of this country down to $900,000,000 for each Congress, and that will provide ample means with which to discharge the obligations raised by this amendment.

I have voted most cheerfully for war ships, for armament, for all kinds of expenditures desired by the Eastern Representatives and Senators in Congress, but, rather than to leave the farmer of the United States much longer without hope, I would be willing that we should skip two or three years in the ordering of war ships. I would rather see both the Carnegie and Bethlehem armor-plate works closed down than to see a million farms sold out in the United States.

I think, Mr. President, that if we shall adopt this amendment, and if the House of Representatives shall agree to it, the wise financiers connected with the Finance Committee of this body and the Ways and Means Committee of the House of Representatives will devise a plan whereby, without taking anything from the necessary appropriations for ships of war and other proper and sacred expenditures of the Government, this little obligation to the farmers may be met.

Mr. QUAY. Mr. President——

Mr. CANNON. One word more, with the permission of the Senator from Pennsylvania.

Mr. QUAY. I beg pardon. I thought the Senator had concluded.

The VICE-PRESIDENT. The Senator from Utah will proceed.

Mr. CANNON. If we do not adopt an amendment of this character, or if we do not give to the farmer of the United States some remedy, he will at the first opportunity overturn this tariff.

The distinguished Senator from Rhode Island made a plea, which I believe every man in this Chamber echoed, as I believe that same plea is echoed from every industrial center of the United States, that we should, so far as possible, establish at this time a tariff which will endure, so that the country may not be agitated by the shock of tariff revision every two or three years. I have talked with the farmers in twenty States of the Union since last fall, and I firmly believe that this tariff will no longer endure than until the farmers of the United States can have a chance to revise it at the polls, if you do not give to them some portion of its benefits.

The farmer is bending beneath a burden which he can not carry longer; he has been the backbone of the integrity of the United States; but there comes in the place of the free and independent farmer of this country a race of tenantry, to reap servilely where he sowed nobly, men who receive their opinions from others instead of giving their own independent voice at the polls and in all their declarations to their fellow-men.

The Senate of the United States can afford to be absolutely just. I believe the amendment should be adopted. On some future occasion, when we reach a schedule which, with the permission of the Senator from New Jersey and some other Senators, may be deemed the appropriate one to which to append this measure, I and perhaps some other Senators may make some remarks at greater length.

Mr. TILLMAN. Put it on the sugar schedule.

Mr. CHANDLER. May I ask the Senator from Utah a question?

Mr. CANNON. Certainly.

Mr. CHANDLER. I heard the Senator speak of robbery a little while ago with reference to the tariff. Does the Senator mean that the farmer has been robbed all these years by the tariff? Is that the Senator's argument?

Mr. CANNON. Yes, sir; decidedly.

Mr. CHANDLER. When did the Senator first think that the American tariff system was a robbery of the farmer?

Mr. CANNON. Just so soon as the Senator gave sufficient attention to the subject to understand the truth of it. I advocated Republican tariffs as earnestly and as faithfully in my humble way as the Senator from New Hampshire, and I believed exactly what I taught. I believe in a protective-tariff system in the United States to-day, because I think that any nation which will not guard its own must perish; and I believe the world is engaged at this time in a fight the result of which will be the survival of the unfittest if America does not protect herself; but I am not disposed any longer to advocate a system by which one portion of

the population is taxed for the benefit of another portion of the population.

I think that it is unfair to cherish only one class, and that the class which has already the most power of self-protection. If the Senator from New Hampshire will go across the plains of Kansas, as I have gone, and across the plains of Nebraska, if he will see the people there who toil "from early morn till dewy eve," seeking to build up those States; if he will witness their struggles, if he will see farms abandoned because men can not pay the mortgages thereon, I believe in him sufficiently to think he will come back and say that this bill is robbery of the American farmer.

Mr. CHANDLER. Mr. President, I sympathize with the class to whom the Senator has referred. I have always believed that a properly adjusted tariff would help them instead of harming them; but I did not know until to-day that the Senator, who has advocated the tariff all this time, thought all the while that it was robbery of his people.

Mr. CANNON. Why, Mr. President, the Senator from New Hampshire is scarcely fair. I have stated that I am in favor of a protective-tariff system. I stated that in the guilelessness of my soul, being a Republican, I went out and advocated the Republican idea of a protective tariff. I never was brought quite so close to responsibility concerning it before as I am to-day. Heretofore I have discussed it on the stump, advocating it in general terms; but as soon as I am confronted with responsibility which obliges me to look more closely into its application to all the people, I am simply discharging my duty when I seek to amend this measure so that it shall be honest to all.

The Senator ought to know if the agricultural classes of the United States do not thrive in good contentment there is no safety to the Republic. There was another nation in its day as mighty as this Republic, the greatest upon which the sun then shone, and its people engaged in agriculture sunk lower and lower, until the freeholder who was obliged to borrow money had to give a mortgage not only upon his land, but upon his crops, and upon himself and his wife and his children, and the unborn child in its mother's womb, in order to satisfy the usurer. When that time came, the Roman eagles were enclouded in the darkness of the Middle Ages, and unless we shall do something to arrest this robbery—I say it deliberately, Mr. President, the robbery of this bill for protective tariff—we, too, will have our bitter lesson.

FOREST POLICY OF THE UNITED STATES.

The VICE-PRESIDENT laid before the Senate the following message from the President of the United States; which was read, and, with the accompanying papers, referred to the Committee on Forest Reservations and the Protection of Game:

To the Senate and House of Representatives:

I transmit herewith for the information of the Congress the report of the committee appointed by the National Academy of Sciences upon the inauguration of a forest policy for the forested lands of the United States.

WILLIAM MCKINLEY.

EXECUTIVE MANSION, *May 25, 1897.*

LYNCHING OF THREE ITALIANS.

The VICE-PRESIDENT laid before the Senate the following message from the President of the United States; which was read, and, on motion of Mr. FRYE, was, with the accompanying papers, referred to the Committee on Foreign Relations, and ordered to be printed:

To the Senate of the United States:

I transmit herewith, in response to the resolution of the Senate of May 6, 1897, calling for correspondence regarding the lynching in Louisiana of certain Italian subjects, a report from the Secretary of State, with accompanying papers.

WILLIAM MCKINLEY.

EXECUTIVE MANSION,
Washington, May 24, 1897.

BOUNDARY LINE BETWEEN VENEZUELA AND BRITISH GUIANA.

The VICE-PRESIDENT laid before the Senate the following message from the President of the United States; which was read, and, on motion of Mr. FRYE, was, with the accompanying papers, referred to the Committee on Foreign Relations, and ordered to be printed:

To the Senate of the United States:

I transmit herewith, in response to the resolution of the Senate of May 4, 1897, regarding the work of the special commission appointed by the President on January 4, 1896, to examine and report upon the true boundary line between Venezuela and British Guiana, a report from the Secretary of State, with accompanying papers.

WILLIAM MCKINLEY.

EXECUTIVE MANSION,
Washington, May 24, 1897.

VISITOR TO WEST POINT.

The VICE-PRESIDENT. The Senate this morning accepted the resignation of the Senator from California [Mr. PERKINS] as one of the visitors to the West Point Military Academy. The Chair announces the appointment of the Senator from Rhode Island [Mr. WETMORE] to fill the vacancy.

SUNDRY CIVIL APPROPRIATION BILL—CONFERENCE REPORT.

Mr. ALLISON. I desire to have placed before the Senate the report of the committee of conference on the sundry civil appropriation bill.

The VICE-PRESIDENT. The Chair lays before the Senate the report of the committee of conference on the bill referred to by the Senator from Iowa, which will be read.

The Secretary proceeded to read the conference report, but before concluding was interrupted by

Mr. ALLISON. Inasmuch as this is a long report and I do not expect to have it acted upon to-night, I suggest that it be printed in the RECORD without being read in full at the Secretary's desk, and I give notice that late to-morrow I shall ask the Senate to consider it.

The VICE-PRESIDENT. If there be no objection, the conference report will be printed as a document and also printed in the RECORD. The Chair hears no objection, and it is so ordered.

The report is as follows:

The committee of conference on the disagreeing votes of the two Houses on certain amendments of the Senate to the bill (H. R. 16) making appropriations for sundry civil expenses of the Government for the fiscal year ending June 30, 1898, and for other purposes, having met, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its amendments numbered 7, 21, 22, 25, 26, and 27.

That the House recede from its disagreement to the amendments of the Senate numbered 4, 5, 8, 9, 19, 35, 36, and 37, and agree to the same.

Amendment numbered 16: That the House recede from its disagreement to the amendment of the Senate numbered 16, and agree to the same with an amendment as follows:

In lieu of the matter inserted by said amendment insert the following:

"For the survey of the public lands that have been or may hereafter be designated as forest reserves by Executive proclamation, under section 24 of the act of Congress approved March 3, 1891, entitled 'An act to repeal timber-culture laws, and for other purposes,' and including public lands adjacent thereto, which may be designated for survey by the Secretary of the Interior, $150,000, to be immediately available: *Provided*, That to remove any doubt which may exist pertaining to the authority of the President thereunto, the President of the United States is hereby authorized and empowered to revoke, modify, or suspend any and all such Executive orders and proclamations, or any part thereof, from time to time as he shall deem best for the public interests: *Provided*, That the Executive orders and proclamations dated February 22, 1897, setting apart and reserving certain lands in the States of Wyoming, Utah, Montana, Washington, Idaho, and South Dakota as forest reservations, be, and they are hereby, suspended, and the lands embraced therein restored to the public domain the same as though said orders and proclamations had not been issued: *Provided further*, That lands embraced in such reservations not otherwise disposed of before March 1, 1898, shall again become subject to the operations of said orders and proclamations as now existing or hereafter modified by the President.

"The surveys herein provided for shall be made, under the supervision of the Director of the Geological Survey, by such person or persons as may be employed by or under him for that purpose, and shall be executed under instructions issued by the Secretary of the Interior; and if subdivision surveys shall be found to be necessary, they shall be executed under the rectangular system, as now provided by law. The plats and field notes prepared shall be approved and certified to by the Director of the Geological Survey, and two copies of the field notes shall be returned, one for the files in the United States surveyor-general's office of the State in which the reserve is situated, the other in the General Land Office; and twenty photolithographic copies of the plats shall be returned, one copy for the files in the United States surveyor-general's office of the State in which the reserve is situated; the original plat and the other copies shall be filed in the General Land Office, and shall have the facsimile signature of the Director of the Survey attached.

"Such surveys, field notes, and plats thus returned shall have the same legal force and effect as heretofore given the surveys, field notes, and plats returned through the surveyors-general; and such surveys, which include subdivision surveys under the rectangular system, shall be approved by the Commissioner of the General Land Office as in other cases, and properly certified copies thereof shall be filed in the respective land offices of the districts in which such lands are situated, as in other cases. All laws inconsistent with the provisions hereof are hereby declared inoperative as respects such survey: *Provided, however*, That a copy of every topographic map and other maps showing the distribution of the forests, together with such field notes as may be taken relating thereto, shall be certified thereto by the Director of the Survey and filed in the General Land Office.

"All public lands heretofore designated and reserved by the President of the United States under the provisions of the act approved March 3, 1891, the orders for which shall be and remain in full force and effect, unsuspended and unrevoked, and all public lands that may hereafter be set aside and reserved as public forest reserves under said act, shall be as far as practicable controlled and administered in accordance with the following provisions:

"No public forest reservation shall be established, except to improve and protect the forest within the reservation, or for the purpose of securing favorable conditions of water flows, and to furnish a continuous supply of timber for the use and necessities of citizens of the United States; but it is not the purpose or intent of these provisions or of the act providing for such reservations to authorize the inclusion therein of lands more valuable for the mineral therein or for agricultural purposes than for forest purposes.

"The Secretary of the Interior shall make provisions for the protection against destruction by fire and depredations upon the public forests and forest reservations which may have been set aside or which may be hereafter set aside under the said act of March 3, 1891, and which may be continued; and he may make such rules and regulations and establish such service as will insure the objects of such reservations, namely, to regulate their occupancy and use and to preserve the forests thereon from destruction; and any violation of the provisions of this act or such rules and regulations shall be punished as is provided for in the act of June 4, 1888, amending section 5388 of the Revised Statutes of the United States.

"For the purpose of preserving the living and growing timber and promoting the younger growth on forest reservations, the Secretary of the Interior, under such rules and regulations as he shall prescribe, may cause to be designated and appraised so much of the dead, matured, or large growth of trees found upon such forest reservations as may be compatible with the utilization of the forests thereon, and may sell the same for not less than the appraised value in such quantities to each purchaser as he shall prescribe, to be used in the State or Territory in which such timber reservation may be situated, respectively, but not for export therefrom. Before such sale shall take

place, notice thereof shall be given by the Commissioner of the General Land Office for not less than sixty days, by publication in a newspaper of general circulation, published in the county in which the timber is situated, if any is therein published, and if not, then in a newspaper of general circulation published nearest to the reservation, and also in a newspaper of general circulation published at the capital of the State or Territory where such reservation exists; payments for such timber to be made to the receiver of the local land office of the district wherein said timber may be sold, under such rules and regulations as the Secretary of the Interior may prescribe; and the moneys arising therefrom shall be accounted for by the receiver of such land office to the Commissioner of the General Land Office in a separate account, and shall be covered into the Treasury. Such timber, before being sold, shall be marked and designated, and shall be cut and removed under the supervision of some person, appointed for that purpose by the Secretary of the Interior, not interested in the purchase or removal of such timber nor in the employment of the purchaser thereof. Such supervisor shall make report in writing to the Commissioner of the General Land Office and to the receiver in the land office in which such reservation shall be located of his doings in the premises.

"The Secretary of the Interior may permit, under regulations to be prescribed by him, the use of timber and stone found upon such reservations, free of charge, by bona fide settlers, miners, residents, and prospectors for minerals, for firewood, fencing, buildings, mining, prospecting, and other domestic purposes, as may be needed by such persons for such purposes; such timber to be used within the State or Territory, respectively, where such reservations may be located.

"Nothing herein shall be construed as prohibiting the egress or ingress of actual settlers residing within the boundaries of such reservations, or from crossing the same to and from their property or homes; and such wagon roads and other improvements may be constructed thereon as may be necessary to reach their homes and to utilize their property under such rules and regulations as may be prescribed by the Secretary of the Interior. Nor shall anything herein prohibit any person from entering upon such forest reservations for all proper and lawful purposes, including that of prospecting, locating, and developing the mineral resources thereof: *Provided*, That such persons comply with the rules and regulations covering such forest reservations.

"That in cases in which a tract covered by an unperfected bona fide claim or by a patent is included within the limits of a public forest reservation, the settler or owner thereof may, if he desires to do so, relinquish the tract to the Government, and may select in lieu thereof a tract of vacant land open to settlement not exceeding in area the tract covered by his claim or patent; and no charge shall be made in such cases for making the entry of record or issuing the patent to cover the tract selected: *Provided further*, That in cases of unperfected claims the requirements of the laws respecting settlement, residence, improvements, etc., are complied with on the new claims, credit being allowed for the time spent on the relinquished claims.

"The settlers residing within the exterior boundaries of such forest reservations, or in the vicinity thereof, may maintain schools and churches within such reservation, and for that purpose may occupy any part of the said forest reservation, not exceeding 2 acres for each schoolhouse and 1 acre for a church.

"The jurisdiction, both civil and criminal, over persons within such reservations shall not be affected or changed by reason of the existence of such reservations, except so far as the punishment of offenses against the United States therein is concerned, the intent and meaning of this provision being that the State wherein any such reservation is situated shall not, by reason of the establishment thereof, lose its jurisdiction, nor the inhabitants thereof their rights and privileges as citizens, or be absolved from their duties as citizens of the State.

"All waters on such reservations may be used for domestic, mining, milling, or irrigation purposes, under the laws of the State wherein such forest reservations are situated, or under the laws of the United States and the rules and regulations established thereunder.

"Upon the recommendation of the Secretary of the Interior, with the approval of the President, after sixty days' notice thereof, published in two papers of general circulation in the State or Territory wherein any forest reservation is situated, and near the said reservation, any public lands embraced within the limits of any forest reservation which, after due examination by personal inspection of a competent person appointed for that purpose by the Secretary of the Interior, shall be found better adapted for mining or for agricultural purposes than for forest usage may be restored to the public domain. And any mineral lands in any forest reservation which have been or which may be shown to be such, and subject to entry under the existing mining laws of the United States and the rules and regulations applying thereto, shall continue to be subject to such location and entry, notwithstanding any provisions herein contained."

And the Senate agree to the same.

Amendment numbered 24: That the Senate recede from its disagreement to the amendment of the House to the amendment of the Senate numbered 24, and agree to the same with an amendment as follows: In lieu of the matter inserted by said House amendment, insert the following: "$2,933,333; which sum, in the discretion of the Secretary of War, may be immediately available for expenditure under contract or otherwise. And of the sum hereby appropriated $900,000 shall be deducted from the sum of $2,533,333 authorized to be appropriated and expended for the fiscal year ending June 30, 1899, by the 'Act making appropriations for the construction, repair, and preservation of certain public works on rivers and harbors, and for other purposes,' which became a law on June 3, 1896;" and the House agree to the same.

Amendment numbered 28: That the House recede from its disagreement to the amendment of the Senate numbered 28, and agree to the same with an amendment as follows:

In lieu of the matter inserted by said amendment insert the following:

"Improvement of Pearl Harbor: For expense of necessary survey of entrance to and of Pearl Harbor, Hawaiian Islands, and to enable the Secretary of the Navy to ascertain and report to Congress the amount of land necessary to be acquired in said harbor and the probable cost thereof for a coaling and repair station, $10,000."

And the Senate agree to the same.

Amendment numbered 29: That the House recede from its disagreement to the amendment of the Senate numbered 29, and agree to the same with an amendment as follows: In lieu of the sum named in said amendment insert "$25,000;" and the Senate agree to the same.

The committee of conference recommend to their respective Houses that Senate amendment numbered 10 be transferred from line 6, page 54 of the bill, and inserted after the word "available" at the end of Senate amendment numbered 12.

W. B. ALLISON,
A. P. GORMAN,
Managers on the part of the Senate.

J. G. CANNON,
WM. A. STONE,
JOSEPH D. SAYERS,
Managers on the part of the House.

EXECUTIVE SESSION.

Mr. QUAY. I renew my motion that the Senate proceed to the consideration of executive business.

The motion was agreed to; and the Senate proceeded to the consideration of executive business. After ten minutes spent in executive session the doors were reopened, and (at 5 o'clock and 30 minutes p. m.) the Senate adjourned until to-morrow, Wednesday, May 26, 1897, at 12 o'clock meridian.

NOMINATIONS.

Executive nominations received by the Senate May 25, 1897.

ENVOY EXTRAORDINARY AND MINISTER PLENIPOTENTIARY.

Edwin H. Conger, of Iowa, to be envoy extraordinary and minister plenipotentiary of the United States to Brazil, vice Thomas L. Thompson, resigned.

CONSUL.

John G. Foster, of Vermont, to be consul of the United States at Sherbrooke, Quebec, Canada, vice James R. Jackson, resigned.

INDIAN AGENT.

George B. McLaughlin, of Greatfalls, Mont., to be agent for the Indians of the Blackfeet Agency in Montana, vice George Steell, resigned.

PROMOTION IN THE ARMY.

General officer.

Brig. Gen. John Rutter Brooke, to be major-general, May 22, 1897, vice Bliss, retired from active service.

PROMOTION IN THE NAVY.

Asst. Engineer Doctor E. Dismukes, to be a passed assistant engineer in the Navy, from the 1st day of May, 1897, vice P. A. Engineer Walter S. Burke, retired.

CONFIRMATIONS.

Executive nominations confirmed by the Senate May 25, 1897.

PROMOTION IN THE ARMY.

Brig. Gen. John Rutter Brooke, to be major-general.

INDIAN AGENT.

George B. McLaughlin, of Greatfalls, Mont., to be an agent for the Indians of the Blackfeet Agency in Montana.

POSTMASTER.

A. M. Ketler, to be postmaster at Bennett, in the county of Allegheny and State of Pennsylvania.

SENATE.

WEDNESDAY, *May 26, 1897.*

Prayer by the Chaplain, Rev. W. H. MILBURN, D. D.

The Journal of yesterday's proceedings was read and approved.

JUDGMENTS IN INDIAN DEPREDATION CASES.

The VICE-PRESIDENT laid before the Senate a communication from the Attorney-General, transmitting, in response to a resolution of the 17th instant, a list of the judgments rendered by the Court of Claims in favor of claims in Indian depredation cases not heretofore reported; which, with the accompanying papers, was referred to the Committee on Appropriations, and ordered to be printed.

LIST OF JUDGMENTS.

The VICE-PRESIDENT laid before the Senate a communication from the Attorney-General, transmitting, in response to a resolution of the 17th instant, a list of all judgments rendered against the United States by the circuit and district courts of the United States under section 11 of the act of March 3, 1887, etc.; which, with the accompanying papers, was referred to the Committee on Appropriations, and ordered to be printed.

IMPROVEMENT OF ANNAPOLIS HARBOR.

The VICE-PRESIDENT laid before the Senate a communication from the Secretary of War, transmitting, in response to a resolution of the 17th instant, a letter from the Chief of Engineers, United States Army, together with the reports, exhibits, and papers referred to as having been transmitted in 1896 by the mayor, councilor, and city council of Annapolis, Md., to Col. Peter C. Hains, Corps of Engineers, in support of a project for the improvement of the harbor at Annapolis, Md.; which, with the accompanying papers, was referred to the Committee on Commerce, and ordered to be printed.

PETITIONS AND MEMORIALS.

The VICE-PRESIDENT presented a petition of the officers and members of the Kansas City (Mo.) Merchant Tailors' Exchange, praying Congress to pass without amendment section 666 of the

pending tariff bill, relating to the free entry of wearing apparel, personal effects, etc.; which was ordered to lie on the table.

Mr. SEWELL. I present a memorial numerously signed by liquor dealers' associations of New Jersey, representing several thousand retail liquor dealers, and by citizens of different cities and towns in that State, remonstrating against the proposed increase of the tax on beer. I move that the memorial be referred to the Committee on Finance.

The motion was agreed to.

Mr. GALLINGER presented the petition of Joseph C. Pettigrew and 45 other citizens of Portsmouth, N. H., and the petition of W. H. White, jr., and 35 other citizens of Portsmouth, N. H., praying for the enactment of legislation for a more rigid restriction of immigration; which were ordered to lie on the table.

Mr. PERKINS presented a petition of the Chamber of Commerce, of San Francisco, Cal., praying for the passage of the pending tariff bill at the earliest day possible; which was ordered to lie on the table.

He also presented a memorial of the Chamber of Commerce of San Francisco, Cal., reaffirming its adherence to the policy of Hawaiian reciprocity and territorial annexation; which was referred to the Committee on Foreign Relations.

He also presented a petition of sundry citizens of California, praying for the free delivery of mails in the rural districts; which was referred to the Committee on Post-Offices and Post-Roads.

He also presented a petition of the Chamber of Commerce of San Francisco, Cal., praying for the enactment of legislation authorizing the appointment of a nonpartisan monetary commission; which was referred to the Committee on Finance.

He also presented petitions of W. T. Wallace, F. W. Slaughter, Jacob Marhoffer, U. Larreba, Olvin Duffy, and 306 other citizens of California, praying for the adoption of the lumber schedule in the pending tariff bill as passed by the House of Representatives; which was ordered to lie on the table.

He also presented sundry petitions of citizens of Alameda and Oakland, in the State of California, praying for the abrogation of the reciprocity treaty with Hawaii; which were referred to the Committee on Foreign Relations.

Mr. QUAY presented the petition of M. Connell and sundry other citizens of Downingtown, Pa., praying for the enactment of legislation for a more rigid restriction of immigration; which was ordered to lie on the table.

Mr. LODGE presented a petition of the Massachusetts Tailors' Association, of Springfield, Mass., praying Congress to pass without amendment section 666 of the pending tariff bill, relating to the free entry of wearing apparel, personal effects, etc.; which was ordered to lie on the table.

He also presented a petition of the Thirty-first Annual Encampment of the Department of Massachusetts, Grand Army of the Republic, favoring the adoption of military instruction in the public schools of the country; which was referred to the Committee on Military Affairs.

He also presented a petition of 53 citizens of Haverhill, Mass., and a petition of 50 citizens of Ipswich, Mass., praying for the passage of the so called Lodge bill relating to immigration; which were ordered to lie on the table.

Mr. SMITH presented a memorial of the Retail Liquor Dealers' League of New Jersey, remonstrating against the proposed increase of the tax on beer; which was ordered to lie on the ta le.

Mr. DAVIS presented a petition of 115 citizens of Duluth, Minn., and a petition of 113 citizens of Duluth, Minn., praying for the enactment of legislation restricting immigration; which were ordered to lie on the table.

He also presented a petition of the American Chamber of Commerce of Paris, France, praying the Government of the United States to make provision for a full and adequate representation of the interests of the United States at the Paris Exposition of 1900; which was referred to the Select Committee on International Expositions.

Mr. PLATT of New York presented a petition of sundry citizens of Utica, N. Y., praying for the enactment of legislation for a more rigid restriction of immigration; which was ordered to lie on the table.

Mr. PENROSE presented the petition of P. A. Becker and sundry other citizens of Pennsylvania, praying for the enactment of legislation granting a rebate of the tax upon alcohol used in the arts and in medicinal and other like compounds; which was ordered to lie on the table.

He also presented a petition of the Board of Trade of Reading, Pa., praying for the speedy passage of the pending tariff bill; which was ordered to lie on the table.

He also presented a memorial of 20 citizens of Pennsylvania, remonstrating against the enactment of legislation intended to destroy the present system of ticket brokerage; which was referred to the Committee on Interstate Commerce.

He also presented petitions of the anticombine executive committee of the Twenty-second Ward of Philadelphia, of the Thirtieth Ward Republican executive committee of Philadelphia, and of the Belmont Republican Association of Philadelphia, all in the State of Pennsylvania, praying for the repeal of the present civil-service law; which were referred to the Committee on Civil Service and Retrenchment.

He also presented petitions of 146 citizens of Upper Turkeyfoot Township, 23 citizens of Wooddale, 50 citizens of Vanderbilt, 26 citizens of Boston, 24 citizens of Stroudsburg, 21 citizens of Wanamie, 52 citizens of Duquesne, 52 citizens of Petersburg, 53 citizens of Easton, 140 citizens of Carbondale, 61 citizens of Port Kennedy, 81 citizens of Philadelphia, 90 citizens of Riverton, 10 citizens of Pennsylvania, 43 citizens of Connellsville, 24 citizens of Wilkesbarre, 82 citizens of Braddock, 219 citizens of Pitcairn, 33 citizens of Versailles, 52 citizens of Steelton, American Council, No. 30, Junior Order United American Mechanics, of Philadelphia; 32 citizens of Philadelphia, 34 citizens of Minersville, 50 citizens of Philadelphia, 26 citizens of Quakake, 59 citizens of Cowansburg, 52 citizens of Reading, 98 citizens of Columbia, 81 citizens of Fayette County, 25 citizens of Steelton, 13 citizens of Philadelphia, 53 citizens of Oneida, 55 citizens of Shamokin, 52 citizens of Columbia, 106 citizens of Birdsboro, 31 citizens of Bedford, 28 citizens of Freedom, 33 citizens of Bunola, 32 citizens of Warminster, 66 citizens of Pitcairn, 177 citizens of McDonald, 93 citizens of Irwin, 93 citizens of Philadelphia, 103 citizens of Birdsboro, 75 citizens of Philadelphia, 15 citizens of Quakake, 46 citizens of Reading, 17 citizens of New Stanton, 227 citizens of Canonsburg, 52 citizens of Pennsylvania, and of 21 citizens of Downingtown, all in the State of Pennsylvania, praying for the enactment of legislation restricting immigration; which were ordered to lie on the table.

DEFICIENCY APPROPRIATIONS.

Mr. ALLISON presented a communication from the Secretary of the Treasury, transmitting a letter from the Secretary of the Interior submitting an item of appropriation for inclusion in the general deficiency appropriation bill of $1,000 for the purpose of rearranging, indexing, and preserving the records of the recorder's office of the General Land Office; which, with the accompanying papers, was referred to the Committee on Appropriations, and ordered to be printed.

He also presented a communication from the Secretary of the Treasury, transmitting a letter from the Auditor for the Navy Department submitting estimates of deficiencies in the appropriations necessary to reimburse "General account of advances" created by the act of June 19, 1878, for pay of the Navy and for pay of the Marine Corps; which, with the accompanying papers, was referred to the Committee on Appropriations, and ordered to be printed.

He also presented a communication from the Secretary of the Treasury, transmitting a letter from the Postmaster-General requesting that the appropriation for "fuel, lights, and water for public buildings" under the control of that Department be amended so as to permit of its use for the operation of pneumatic tubes for the transmission of mail matter; which, with the accompanying papers, was referred to the Committee on Appropriations, and ordered to be printed.

He also presented a communication from the Secretary of the Treasury, transmitting a letter from the Commissioners of the District of Columbia submitting an estimate of appropriation, for inclusion in the general deficiency appropriation bill, to pay certain judgments against the District of Columbia amounting to $1,115.30, together with costs and interest; which, with the accompanying papers, was referred to the Committee on Appropriations, and ordered to be printed.

He also presented a communication from the Secretary of the Treasury, transmitting a letter from the Commissioners of the District of Columbia submitting an estimate of appropriation, for inclusion in the general deficiency appropriation bill, of $5,725.24 for repairs and improvements to the Lovejoy school building; which, with the accompanying papers, was referred to the Committee on Appropriations, and ordered to be printed.

He also laid before the Senate a communication from the Secretary of the Treasury, transmitting a letter from the chief of division of public moneys of that Department in relation to the necessity of an additional appropriation of $500 for examinations of subtreasuries and depositories for the fiscal year 1897; which, with the accompanying papers, was referred to the Committee on Appropriations, and ordered to be printed.

PREVENTION OF CRUELTY TO ANIMALS.

Mr. PROCTOR. I present a communication from the Secretary of Agriculture relative to Senate bill No. 1063, for the further prevention of cruelty to animals in the District of Columbia. I move that the communication lie on the table, and that it be printed as a document.

Mr. GALLINGER. I take it that the Senator from Vermont desires to have the letter printed as a document. Am I correct?

Mr. PROCTOR. Yes, sir.

Mr. GALLINGER. Before that order is made, I feel it incumbent upon me to make a brief observation concerning the matter. During the last Congress a bill was presented for regulating the so-called subject of vivisection in the District of Columbia. "For the better protection of animals" was the title of the bill. That bill was referred to a subcommittee of the Committee on the District of Columbia, of which I was chairman. That subcommittee gave a hearing to the parties interested, occupying many hours. The opponents of the bill had every facility afforded them for presenting their side of the case. Not only that, but a young gentleman connected with the Department of Agriculture was given a reasonable time to present his views, and, in addition to what he presented, thirty-five closely printed pages were given to him by the subcommittee as space in which to further elaborate his views and to present documents bearing on the subject. Others who were heard in opposition to the measure were treated with equal courtesy and generosity, and so far as I know no complaint whatever was made that the hearing was not fair to all parties interested. A report was made. The bill went to the Calendar, and for one reason and another it was not reached for consideration.

Immediately upon that report being made, the opponents of the bill sent protests and memorials to the Senate, and through Senators they were presented and printed as documents. Those protests, for the most part, reviewed the report of the committee, taking exceptions to the findings, and in many instances they were misleading, if not absolutely false.

At the present session a similar bill has been introduced, and by direction of the Committee on the District of Columbia I have reported it to the Senate. Immediately these same gentlemen sent letters and protests and memorials to the Senate, again reviewing that report and taking exceptions to the findings of the committee. Yesterday papers of that kind were presented, and again to-day a paper is presented, I take it, arguing against the findings of your committee.

Mr. President, I am not going to object to the printing of this paper as a document, notwithstanding I ought to do so, but I want to call the attention of the Senate to the fact that there ought to be some limit to this matter. For instance, suppose the advocates of the bill should present a very formidable paper reviewing the views held by these memorialists, and the memorialists who presented their documents yesterday, and again to-day, should think it incumbent upon them to review the opinions of those advocates of the bill, where are we going to stop in printing documents at the expense of the Government regarding a matter that has been fairly considered by a committee, the hearings on which have been printed, and which are available to all?

I shall not, Mr. President, object to the printing of this particular paper, but I want to put on record the fact that in my opinion it is a vicious practice, after a committee of this body has given a fair hearing and printed the views of both sides, that then either side to the controversy should burden our records and take money out of the public Treasury in having printed, at public expense, lengthy documents either for or against the proposed legislation. I say the practice is utterly vicious and indefensible, and it ought to be stopped.

The VICE-PRESIDENT. There being no objection, the communication will lie on the table and be printed as a document.

REPORT OF A COMMITTEE.

Mr. STEWART, from the Committee on Claims, to whom was referred the bill (S. 514) for the relief of Warren Hall, reported it without amendment, and submitted a report thereon.

MARBLE BUSTS OF THE VICE-PRESIDENTS.

Mr. HANSBROUGH. Yesterday I reported from the Committee on the Library the joint resolution (S. R. 23) amending Senate resolution of May 13, 1886, providing for marble busts of those who have been Vice-Presidents of the United States, to be placed in the vacant niches of the Senate Chamber. It was reported as a joint resolution, but to be changed to a Senate resolution. I see that it appears on the Calendar as a joint resolution. I ask that the joint resolution be indefinitely postponed, and that I be permitted to substitute a simple Senate resolution for the same. It should be a Senate resolution instead of a joint resolution.

The VICE-PRESIDENT. The question is on the indefinite postponement of the joint resolution.

The joint resolution was indefinitely postponed.

Mr. HANSBROUGH. Let the resolution take the place of the joint resolution.

The VICE-PRESIDENT. The resolution will be taken up when the order of resolutions is reached.

BILLS INTRODUCED.

Mr. COCKRELL introduced a bill (S. 2028) granting a pension to Thompson B. Moore; which was read twice by its title.

Mr. COCKRELL. I present in connection with the bill the petition of Thompson B. Moore, with the affidavits of Rolen Gooch, Mark Arnold, G. W. Phillips, and Dr. J. Gooch. I move that the bill and accompanying papers be referred to the Committee on Pensions.

The motion was agreed to.

Mr. PASCO introduced a bill (S. 2029) granting a pension to Margaret E. Cobb, of Madison County, Fla.; which was read twice by its title, and, with the accompanying papers, referred to the Committee on Pensions.

Mr. McMILLAN introduced a bill (S. 2030) for the relief of the administrators of William B. Moses, deceased, and of Lebbeus H. Rogers; which was read twice by its title, and referred to the Committee on the Judiciary.

Mr. BAKER introduced the following bills; which were severally read twice by their titles, and referred to the Committee on Pensions:

A bill (S. 2031) granting a pension to Lydia M. Cutshall, of Caldwell, Kans.;

A bill (S. 2032) granting an increase of pension to John W. Craig, of Arlington, Kans.; and

A bill (S. 2033) granting a pension to Cora L. Robinson, of Centralia, Kans. (with accompanying papers).

Mr. PETTIGREW (by request) introduced a bill (S. 2034) to enable the Secretary of Agriculture to enter into a contract for the construction of an air navigating machine of a certain description for the exclusive use of the Weather Bureau, and for other purposes; which was read twice by its title, and referred to the Committee on Agriculture and Forestry.

Mr. DAVIS introduced a bill (S. 2035) for the remuster of Francisco V. De Coster as captain of Companies A and D, Mississippi Marine Brigade Cavalry Volunteers; which was read twice by its title, and, with the accompanying papers, referred to the Committee on Military Affairs.

AMENDMENT TO THE TARIFF BILL.

Mr. MITCHELL submitted an amendment intended to be proposed by him to the bill (H. R. 379) to provide revenue for the Government and to encourage the industries of the United States; which was ordered to lie on the table and to be printed.

AMENDMENT TO DEFICIENCY APPROPRIATION BILL.

Mr. DAVIS submitted an amendment intended to be proposed by him to the general deficiency appropriation bill; which was referred to the Committee on Appropriations, and ordered to be printed.

INDIAN APPROPRIATION BILL.

Mr. PETTIGREW submitted the following report:

The committee of conference on the disagreeing votes of the two Houses on the amendment of the Senate numbered 10 to the bill (H. R. 15) making appropriations for the current and contingent expenses of the Indian Department and for fulfilling treaty stipulations with various Indian tribes for the fiscal year ending June 30, 1898, and for other purposes, having met, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its disagreement to the amendment of the House to the amendment of the Senate numbered 10, and agree to the same with an amendment as follows: In lieu of the matter proposed to be inserted by said House amendment insert the following:

"The Secretary of the Interior is hereby directed to allot agricultural lands in severalty to the Uncompahgre Ute Indians now located upon or belonging to the Uncompahgre Indian Reservation in the State of Utah, said allotments to be upon the Uncompahgre and Uintah reservations or elsewhere in said State. And all the lands of said Uncompahgre Reservation not theretofore allotted in severalty to said Uncompahgre Utes shall, on and after the 1st day of April, 1898, be open for location and entry under all the land laws of the United States, excepting, however, therefrom all lands containing gilsonite, asphalt, elaterite, or other like substances. And the title to all of the said lands containing gilsonite, asphaltum, elaterite, or other like substances, is reserved to the United States."

And the House agree to the same.

R. F. PETTIGREW,
F. M. COCKRELL,
Managers on the part of the Senate.

J. S. SHERMAN,
CHARLES CURTIS,
Managers on the part of the House.

Mr. PETTIGREW. I desire that the report shall lie over and not be acted upon at this time. I shall call it up later.

The VICE-PRESIDENT. If there be no objection, the report will lie over.

WICHITA INDIAN LANDS.

The VICE-PRESIDENT. The Chair lays before the Senate the resolution submitted yesterday by the Senator from Pennsylvania [Mr. QUAY]. The resolution will be read.

The resolution was read, as follows:

Resolved, That the right to compensation on the part of the Wichita and affiliated bands of Indians for their possessory right in and to the lands ceded to the United States by said Indians, under the agreement made and entered into between said Indians and the United States at Anadarko, in the Indian Territory, on the 4th day of June, A. D. 1891, should be considered and adjusted at the same time and by the same tribunal which shall determine the alleged claim of the Choctaw and Chickasaw nations in and to the said lands, and that the President is hereby requested to suspend the allotments to said Indians now in progress until the compensation to be allowed and paid to said Indians for the lands in excess of allotments shall be finally determined.

Mr. QUAY. I desire to have the resolution passed at this time.

The VICE-PRESIDENT. The question is on agreeing to the resolution.

The resolution was agreed to.

MARBLE BUSTS OF THE VICE-PRESIDENTS.

The VICE-PRESIDENT. The Chair lays before the Senate the resolution reported by the Senator from North Dakota [Mr. HANSBROUGH] from the Committee on the Library, amending Senate resolution of May 13, 1886, providing for marble busts of those who have been Vice-Presidents of the United States to be placed in the vacant niches of the Senate Chamber.

Mr. HANSBROUGH. I desire the resolution to remain on the Calendar. That is the request I made.

The VICE-PRESIDENT. The resolution will take its place on the Calendar.

PRESIDENTIAL APPROVAL.

A message from the President of the United States, by Mr. O. L. PRUDEN, one of his secretaries, announced that the President had on the 24th instant approved and signed the joint resolution (S. R. 42) appropriating $50,000 for the relief of destitute citizens of the United States in the Island of Cuba.

PORT OF FERNANDINA, FLA.

Mr. PASCO submitted the following concurrent resolution; which was considered by unanimous consent, and agreed to:

Resolved by the Senate (the House of Representatives concurring), That the Secretary of War be requested to furnish the Senate with such information as he may have in his possession with reference to the present condition of the harbor of Cumberland Sound, and to inform the Senate whether any immediate action is necessary to protect the entrance from being closed against the commerce usually entering the port of Fernandina.

VICTOR H. MACCORD.

The VICE-PRESIDENT laid before the Senate the following message from the President of the United States; which was read, and, with the accompanying papers, referred to the Committee on Foreign Relations, and ordered to be printed:

To the Senate of the United States:

I transmit herewith, in response to the resolution of the Senate of May 20, 1897, relating to the claim of Victor H. MacCord against the Government of Peru, a report from the Secretary of State, with accompanying papers.

WILLIAM MCKINLEY.

EXECUTIVE MANSION,
Washington, May 26, 1897.

ILLINOIS RIVER BRIDGE.

Mr. COCKRELL. I ask unanimous consent that the Senate now consider the bill (S. 1978) extending the time for the commencement and completion of the railroad bridge across the Illinois River, near Grafton, Ill., by the St. Louis, Perry and Chicago Railroad. The bill merely extends the time for the commencement and completion, and it is only a few lines long. I hope it will be now considered.

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

WICHITA INDIAN LANDS.

Mr. PETTIGREW. A resolution was agreed to this morning with regard to the Wichita Indians in the Indian Territory. I wish to call the attention of the Senator from Pennsylvania [Mr. QUAY] to the matter. I desire to have the resolution reconsidered. I therefore move to reconsider the vote by which the resolution was agreed to. My attention was not called to it at the time and it slipped through without my notice.

The VICE-PRESIDENT. The Senator from South Dakota enters a motion to reconsider the vote by which the resolution submitted by the Senator from Pennsylvania was this morning passed. Is that all the Senator desires at this time?

Mr. PETTIGREW. I desire to have the motion entertained at this time. I simply want to amend the resolution.

The VICE-PRESIDENT. The resolution has been sent for and will be at the desk in a moment.

Mr. QUAY. I object to a reconsideration unless some reason is given for it.

Mr. PETTIGREW. I was present in the Chamber, but I did not know that the resolution was under consideration. It went through without my notice. I intended to offer an amendment to it. I now desire that it shall be reconsidered, so that I can offer the amendment. The Senator from Pennsylvania certainly will not under those circumstances object to a reconsideration.

Mr. QUAY. What is the proposed amendment?

Mr. PETTIGREW. A reconsideration will leave the matter exactly where it was when it came up this morning.

Mr. QUAY. In what respect does the Senator propose to amend the resolution?

Mr. PETTIGREW. After it is reconsidered I will present my amendment.

Mr. QUAY. I have no objection to a reconsideration.

The VICE-PRESIDENT. The Senator from South Dakota moves to reconsider the vote by which the resolution submitted by the Senator from Pennsylvania [Mr. QUAY] was passed this morning.

The motion to reconsider was agreed to.

The VICE-PRESIDENT. The resolution is before the Senate and will be again read.

The resolution submitted yesterday by Mr. QUAY was read, as follows:

Resolved, That the right to compensation on the part of the Wichita and affiliated bands of Indians for their possessory right in and to the lands ceded to the United States by said Indians, under the agreement made and entered into between said Indians and the United States at Anadarko, in the Indian Territory, on the 4th day of June, A. D. 1891, should be considered and adjusted at the same time and by the same tribunal which shall determine the alleged claim of the Choctaw and Chickasaw nations in and to the said lands, and that the President is hereby requested to suspend the allotments to said Indians now in progress until the compensation to be allowed and paid to said Indians for the lands in excess of allotments shall be finally determined.

Mr. PETTIGREW. I desire to amend the resolution by striking out the words:

And that the President is hereby requested to suspend the allotments to said Indians now in progress until the compensation to be allowed and paid to said Indians for the lands in excess of allotments shall be finally determined.

I move to strike out those words from the resolution. They are the last three lines of the resolution as it appears in the RECORD.

The VICE-PRESIDENT. The question is on agreeing to the amendment proposed by the Senator from South Dakota.

Mr. QUAY. Mr. President, that is all there is in the resolution. The resolution may as well be voted down if the Senator from South Dakota is going to have that amendment inserted.

Mr. PETTIGREW. I will make a statement in regard to the resolution. In 1891 these Indians, who were residing upon lands in the western part of the Indian Territory, made an agreement with the Government by which they agreed to take 160 acres of land apiece in severalty—in other words, 640 acres for each family of four. The rest of the lands were to be opened up to settlement and occupation.

There is a question as to the ownership of those lands. The lands were in what is called the leased district of the Choctaw and Chickasaw nations. The question as to who owns the land in excess of the allotments was sent to the Court of Claims and is now pending. If the Court of Claims decide that it belongs to the Choctaws and Chickasaws, then the price received for the land will go to those Indians. If the court decide that it does not belong to the Choctaws and Chickasaws, then the compensation for the land not allotted will go to the Wichita Indians and affiliated bands.

Therefore the question of allotment has nothing to do with this question. That has been commenced, and I insist that it shall go on if the Secretary of the Interior deems it wise. He can be as slow or as fast as he chooses about finishing the allotment, but why the allotments shall be delayed is more than I can understand. It is true that those Indians have for years resisted the encroachments of civilization upon their habits, their customs, their lives, and their beliefs, and the resistance will go on among most of the Indians in this country until they are amalgamated into the population of the United States. If we are going to change our policy and cease to allot lands to Indians and cease to try to make citizens of them, then this is a step in that direction.

I am perfectly willing that the compensation which these Indians shall receive shall be determined at the time it is determined whether the Choctaws own the land or not. That is entirely proper, and the resolution goes to that extent; but that we shall take out of the hands of the Secretary the enforcement of a law already enacted by Congress is not proper, it is not right, and it is not in the interest of the Indians themselves.

Furthermore, Mr. President, this is an exceedingly important question. It has not been submitted to the Committee on Indian Affairs. The resolution is brought in here without notice for the purpose of checking the action of the Executive Department in enforcing an act of Congress. It has not come to the Committee on Indian Affairs; it has not been considered by the committee; and until it is considered by that committee and there are reasons shown which are pertinent and important, and which will cause the Senate to act in this important matter, I shall certainly object to this phase of the resolution.

Mr. QUAY. Mr. President, the resolution was not submitted to the Committee on Indian Affairs. Some three weeks ago a bill to the same purport was sent to that committee, and it has not been heard from since; and I feared if this resolution took the course of the bill, the Committee on Indian Affairs might incubate upon the question until the resolution rotted. Therefore it was not submitted to the committee.

I am not so well versed in the history of the legislation affecting this resolution, or the facts connected with it, as is the Senator from South Dakota. The Senator from Connecticut [Mr. PLATT], who is a member of the Indian Committee, I believe understands the question pretty thoroughly, and if I go wrong he will correct me.

The facts in connection with it are about as I shall state them.

Many years ago the Government of the United States bought from the Quapaw Indians then living on the Arkansas River, near its mouth, a large territory, covering the present Indian Territory. The Quapaws were a small band, and it is doubtful whether at the time of the purchase a Quapaw Indian could have set his foot within the limits of the present Indian Territory without losing his scalp. These Wichita Indians were the indigenous Indians; they have lived there ever since the white man first set foot upon the continent, and the land was sold from under their feet without their knowledge and consent. That at least is their allegation. They were found three hundred years ago exactly where they are to-day.

After securing a paper title to the property, while God's title rested in the Wichitas, the United States Government ceded this territory to what are known as the Five Civilized Tribes, and removed them from Georgia, Alabama, and Mississippi and settled them there. The question of title is now being tried in the Court of Claims and, I believe, is passing, through legislation heretofore had, from the Court of Claims to the Senate of the United States, and we are to determine what amount is due to the two Southern civilized tribes from the United States on a recent treaty, owing to the occupancy by the United States of their land. The Wichitas are no party to the treaty, and unless they are brought in by some sort of interpleader they will be left, when these lands are allotted and when the proceedings of the Senate are concluded, in the air with nothing but a claim against the United States Government for probably two or three million dollars, which will be ultimately paid, one-half to the Indians and one-half to some attorney or lobbyist.

It is thought by those who profess to understand the facts that in order to leave the whole proceedings just where they are and allow the Wichitas to be treated as the Choctaws and Chickasaws are being treated, who have their share of money allotted for the absolute proprietorship of the land, wherever it may belong, this resolution should be passed, and that the Wichitas should be brought into court here and the allotments should be stopped in the meantime.

Mr. PLATT of Connecticut. I wish that the resolution may go over, if possible, until to-morrow.

Mr. QUAY. I have no objection to that course, Mr. President. Let it go over.

Mr. PLATT of Connecticut. I can not recall at the moment all the facts in this complicated question. I think perhaps I would be able to make a more clear and concise statement of it to-morrow than at the present time. My impression about it is, however, that if these allotments took place of all the land which is claimed, whether properly or not, by the Wichita Indians, it will practically absorb all the territory, and therefore if it should be determined hereafter that the Wichitas were entitled, the Government would simply have to pay them over again in money for the land. That is my impression about it. The Senator from Arkansas, perhaps, is more familiar with the subject than I am just at this moment.

Mr. JONES of Arkansas. I concur in the request of the Senator from Connecticut that this matter shall go over. My recollection of the situation is somewhat confused. I think, however, that the controversy was about this way: The United States agreed to pay the Choctaws and Chickasaws for certain territory that was included in what was called the leased district by an act of Congress some years ago. The territory agreed to be paid for included the country occupied by the Wichita Indians. The Wichitas had before that time made an agreement with what was called the Cherokee Commission to cede their claim to the land. If I am not mistaken, there is now a suit pending between the Chickasaws on the one side and the Wichitas on the other to determine whether the money which the Government agreed to pay for the lands occupied by the Wichitas belongs to the Wichita Indians or to the Chickasaws and Choctaws; and that is now pending in the Court of Claims. I am not sure, however, that that is the fact.

Mr. QUAY. Will the Senator allow me to interrupt him?

Mr. JONES of Arkansas. Certainly.

Mr. QUAY. Was not the agreement the Commission had with the Indians challenged for fraud and held up in the Interior Department and never ratified?

Mr. JONES of Arkansas. I do not think there was ever an allegation of fraud as to the execution of the agreement.

Mr. PETTIGREW. I will answer the question if the Senator desires. The agreement was ratified by Congress and the surplus land, after allotment to the Indians of 160 acres to each person, was to be sold at $1.25 an acre and the proceeds to go to the Indians, to whichever tribe owned the country. If it was decided that the Chickasaws and Choctaws owned the country, then the money would go to them. But that did not disturb the allotments to the Wichitas. If it was decided that the Wichitas owned the country, then the money received for the surplus not allotted went to the Wichitas.

Mr. JONES of Arkansas. And that question is before the Court of Claims to be determined.

Mr. PETTIGREW. It is before the Court of Claims. It does not interfere at all with the question of allotments. The question of determining what amount of money they shall have is the only question they are interested in.

Mr. JONES of Arkansas. My recollection agrees with that of the Senator from South Dakota, with the further fact that the Wichitas were recognized by Congress as being entitled to an allotment in the land upon which they lived; that this was recognized, no matter whether the land was held to have belonged legally to the Choctaws and Chickasaws at the time the Government leased the district or whether it belonged to the Wichitas outright. Whether it belonged to the one or the other, the Wichitas were given their improvements upon the land on which they lived; and the controversy is as to whom the money shall go for the land not used for homes, for the land not allotted, as to whether it will go under the decision of the Court of Claims to the Wichitas or to the Choctaws and Chickasaws.

Mr. PETTIGREW. That is all.

Mr. PLATT of Connecticut. That question has now been taken away from the Court of Claims.

Mr. QUAY. And is coming into the Senate.

Mr. PLATT of Connecticut. And is coming into the Senate.

Mr. JONES of Arkansas. How?

Mr. PLATT of Connecticut. Because by the agreement which has been made by the Choctaws and Chickasaws with the Dawes Commission it is agreed that their claim shall be submitted to the Senate for arbitration and decision. But the Wichita claim rests upon their suit in the Court of Claims.

Mr. JONES of Arkansas. But, Mr. President——

Mr. PLATT of Connecticut. That is as I understand it.

Mr. JONES of Arkansas. The Senator from Connecticut, I think, is in error in that statement in one respect. I do not understand that the agreement made by the Choctaws and Chickasaws would in any manner upset what has already been determined, that they were entitled to pay for the land that was occupied and owned near Oklahoma Territory, and was allotted to certain Indians, and to the Wichitas, but the lands held by the Kiowas and Comanches was not determined when the other question was determined.

The question whether the Choctaws and Chickasaws were entitled to any part of that land was left open, and that is the question which is to be determined by the Senate, the land occupied by the Kiowas and Comanches and Greer County, claimed both by Texas and by the Indian Territory. As to whether there was any claim on the part of the Choctaws and Chickasaws against the Government for those lands is the question to be determined by the Senate. It has no relation whatever to the lands occupied by the Wichitas, as I understand it. But that is a better reason why the resolution should go over.

Mr. QUAY. Let it go over.

Mr. PLATT of Connecticut. Let the matter go over, and we shall look into it.

The VICE-PRESIDENT. The resolution will go over.

Mr. PETTUS. Mr. President, it seems to me that in a matter where Senators familiar with the subject can not agree as to the facts, we ought not to be required to vote on this resolution at all until it has gone to a committee. I therefore move that it be referred to the Committee on Indian Affairs.

The VICE-PRESIDENT. The resolution has been laid over at the request of the Senator from Pennsylvania [Mr. QUAY].

Mr. QUAY. The resolution has gone over until to-morrow.

CLINCH RIVER BRIDGE.

Mr. BATE. I ask unanimous consent for the present consideration of Senate bill 1944. It is a bill for the construction of a bridge across the Clinch River, in Tennessee, and is very short. I am anxious to have it disposed of.

The VICE-PRESIDENT. Is there objection to the present consideration of the bill?

Mr. ALDRICH. Will it give rise to any discussion?

Mr. BATE. None in the world. It is just like the bridge bill which has been passed to-day. If it gives rise to debate, I shall withdraw it.

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill (S. 1944) to authorize the construction of a bridge across the Clinch River, Kingston, Tenn., which had been reported by the Committee on Commerce with an amendment, in section 1, line 5, after the words "across the," to strike out "Tennessee," and insert "Clinch;" so as to make the section read:

That the county of Roane, in the State of Tennessee, in its corporate capacity, is hereby authorized and empowered to construct and maintain a bridge over and across the Clinch River at or near the town of Kingston, so as to connect said town of Kingston with the opposite or north bank of said river.

The amendment was agreed to.

The bill was reported to the Senate as amended, and the amendment was concurred in.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

DEFICIENCY APPROPRIATIONS FOR PUBLIC PRINTING AND BINDING.

Mr. ALLISON. I ask unanimous consent to present this morning a joint resolution making provision for a deficiency in the office of the Public Printer. Unless the joint resolution shall pass between now and Monday, the Public Printer will be without funds to carry on the great operations of that office. I hope there will be no objection to the joint resolution. Nearly the whole amount of the sum here proposed to be appropriated is in the general deficiency appropriation bill, which has already passed the House of Representatives, but for various reasons, which at some time, I hope, will be satisfactorily explained to the Senate, the bill has been delayed in the Committee on Appropriations. So I propose to take this deficiency out of the general deficiency bill and ask the Senate to pass the joint resolution which I now introduce and send to the Secretary's desk.

The joint resolution (S. R. 44) making an appropriation to supply a deficiency in the appropriations for public printing and binding for the fiscal year 1897 was read the first time by its title, and the second time at length, as follows:

Resolved by the Senate and House of Representatives, etc., That the following sum be, and the same is hereby, appropriated, out of any money in the Treasury not otherwise appropriated, to supply a deficiency in the appropriations for public printing and binding for the fiscal year 1897, namely:

Public printing and binding:

For the public printing, for the public binding, and for paper for the public printing, including the cost of printing the debates and proceedings of Congress in the CONGRESSIONAL RECORD, and for lithographing, mapping, and engraving for both Houses of Congress, the Supreme Court of the United States, the supreme court of the District of Columbia, the Court of Claims, the Library of Congress, the Executive Office, and the Departments, including salaries or compensation of all necessary clerks and employees, for labor (by the day, piece, or contract), and for rents and all the necessary materials which may be needed in the prosecution of the work, $225,000.

The VICE-PRESIDENT. Is there objection to the present consideration of the joint resolution?

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the joint resolution.

The joint resolution was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

TRANSPORTATION OF FOOD CONTRIBUTIONS TO INDIA.

Mr. CHANDLER. I ask for the present consideration of Senate joint resolution No. 43, for the transportation of contributions to the poor of India; and I will ask the Senator from Alabama [Mr. MORGAN] if he will consent to a vote at this time upon my amendment, or, if not, if he will fix some hour later in the day when he will be willing to have the vote taken upon it?

I have changed the form of the resolution so as to avoid the appearance of striking out the word "American," but have made the resolution in substance just the same, authorizing the Secretary of the Navy to employ the most suitable steamships or vessels of any nationality, not exceeding two in number.

The VICE-PRESIDENT. Is there objection to the present consideration of the joint resolution?

There being no objection, the Senate, as in Committee of the Whole, resumed the consideration of the joint resolution (S. R. 43) directing the Secretary of the Treasury to give an American register to the foreign-built steamships *Massapequa* and *Menantic*, to enable them to carry grain under the American flag to the sufferers by famine in India.

Mr. CHANDLER. I now ask to have the substitute amendment read.

The VICE-PRESIDENT. The amendment will be stated.

The SECRETARY. It is proposed to strike out all after the resolving clause of the resolution and insert:

That the joint resolution of April 7, 1897, authorizing the Secretary of the Navy to transport contributions for the relief of the famishing poor of India be, and the same is hereby, so amended that the Secretary shall be authorized to charter and employ the most suitable steamships or vessels of any nationality, not exceeding two in number, to carry out the object of said resolution.

Mr. CHANDLER. Now, I ask either that there may be a vote upon the amendment at this time or that the Senator from Alabama will agree to some hour to-day when there may be a vote.

Mr. MORGAN. If the substitute offered by the Senator from New Hampshire [Mr. CHANDLER] is adopted by the Senate, that, of course, defeats the resolution which was offered here by the Senator from Maine [Mr. HALE]. I am advocating the resolution offered by the Senator from Maine as against the substitute proposed by the Senator from New Hampshire; and inasmuch as the vote on his substitute will be a final vote, I propose to have a vote upon it at fifteen minutes to 2 o'clock.

Mr. CHANDLER. Then I ask unanimous consent that the substitute may be voted on at fifteen minutes before 2 o'clock to-day.

The VICE-PRESIDENT. Is there objection to the request of the Senator from New Hampshire that his amendment be voted upon at fifteen minutes to 2 o'clock this afternoon? The Chair hears none, and that will be the order.

Mr. CHANDLER. Does the Senator from Alabama desire to debate the resolution further?

Mr. MORGAN. I desire to say something further about it, and I have no doubt the Senator from New Hampshire will desire to say something about it.

Mr. CHANDLER. No; I do not. I am trying to pass this resolution persuasively, and not argumentatively.

Mr. MORGAN. I am trying to secure the passage of the resolution offered by the Senator from Maine, and I suppose that I am involving myself in an unfortunate trouble, which always comes when a man undertakes to interfere in domestic affairs between two beloved and thoroughly wedded friends.

The Senator from Maine has offered a proposition here which I approve, and the Senator from New Hampshire has offered a proposition which I do not approve under the circumstances as a substitute for the resolution of the Senator from Maine.

Mr. CHANDLER. Will the Senator permit me a word?

Mr. MORGAN. Certainly.

Mr. CHANDLER. The senior Senator from Maine [Mr. HALE], the chairman of the Committee on Naval Affairs, now absent, introduced the joint resolution in the form in which the Senator favors it, but it was a resolution drawn by Mr. Hogan. The Senator introduced it, and after a short debate the resolution went over; but the Senator from Maine is now in favor of the resolution as I offer it. So there is no antagonism between the Senator from Maine and myself on this subject. I am acting as his representative at this moment.

Mr. MORGAN. Well, if anybody here is authorized to withdraw the resolution of the Senator from Maine, then of course the Senator from New Hampshire will have the right of way perhaps, and an open track.

Mr. CHANDLER. I move to amend the resolution, and the Senator from Maine is in favor of the amendment.

Mr. MORGAN. The Senator from Maine made a very nice speech about the joint resolution. I approve it very highly, and I will read a little part of it to show that he was entirely justified in his advocacy of his own resolution. If he has now withdrawn that support, of course I must take time to consider; at least I must have the liberty of considering whether he has not been overreached in some way or other by the genius and the persuasive powers of the Senator from New Hampshire.

The Senator from Maine [Mr. HALE] said on May 20:

I introduce a joint resolution, which I ask to have read. Then I shall ask unanimous consent for its consideration on a statement which I will make.

The joint resolution (S. R. 43) directing the Secretary of the Treasury to give an American register to the foreign-built steamships *Massapequa* and *Menantic* to enable them to carry grain under the American flag to the sufferers by famine in India was read the first time by its title and the second time at length, as follows:

Then follows the resolution. Leaving off the whereases, it reads:

That the Secretary of the Treasury is hereby directed to cause the foreign-built steamships *Massapequa* and *Menantic*, owned by Charles W. Hogan, of the firm of T. Hogan & Sons, of New York City, a citizen of the United States, to be registered as vessels of the United States, upon being notified by the Secretary of the Navy that a contract has been entered into between the Navy Department and said Charles W. Hogan, of the firm of T. Hogan & Sons, for the transportation of about 8,000 tons of wheat in bulk or its equivalent in space for corn to India for the famishing poor.

SEC. 2. The Secretary of the Navy is hereby authorized to accept the proposition of T. Hogan & Sons made to him in their letter dated May 13, 1897, and to enter into a contract with Charles W. Hogan, of said firm, to carry the aforesaid wheat or equivalent of corn in bulk in the steamships *Massapequa* and *Menantic* to India, and a sufficient sum of money is hereby appropriated for said purpose out of any money in the Treasury not otherwise appropriated.

The Senator from New Hampshire says that Mr. Hogan drew that resolution. If he did, Mr. President, he exhibits a considerable amount of skill and, I think, a valuable trait of patriotism in doing so. It is exactly in line with what I think is the proper treatment of such a subject as this. The Senator from Maine said in support of it:

Mr. HALE. Mr. President, there is no opportunity in this emergency for any committee to consider the joint resolution. Senators will remember that by joint resolution approved by the President—

The date of that was April 7—

we provided that the Secretary of the Navy might, either in naval vessels or American vessels that he could charter, transport the gifts of grain, etc., which have been given by American citizens for the suffering people in India. The Secretary has found two things. No naval ships are adapted to such transportation. The statement of that fact will at once carry with it its demonstration. Everyone will see that the ships of the Navy are not built for any such purpose. He has also found that he can not charter any American registered ships. He can not find them. He has searched far and wide, and they are not obtainable.

Under these conditions and under the act of Congress the Secretary is unable to move the large quantities of supplies that have been given by benevolent people and are now in New York. I sent a moment ago for a letter from the Secretary of the Navy on the subject, but I will ask to have read now a letter which I have received from an American citizen in New York.

The VICE-PRESIDENT. The letter will be read.

That is a letter from Charles W. Hogan, setting forth the terms of the contract he proposed to make with the Navy Department under the act of April 7, 1897, for the transportation of this grain. That act provided that the Secretary of the Navy might employ American ships, or ships with an American register, for the transportation of this grain. It did not fix the compensation per ton for carrying this grain, nor did it fix the amount that he might expend out of the Treasury of the United States for that purpose. It left that to be determined by the circumstances. The Secretary of the Navy had received a proposition from T. Hogan & Sons for the transportation of this grain, which is set forth here both in the letter of T. Hogan & Sons and in the letter of the Navy Department addressed to the chairman of the Committee on Naval Affairs, and dated May 18, 1897.

Now, to get at this matter directly, without introducing any unnecessary facts or statements, I will read a part of the letter of the Secretary of the Navy. He says:

The utilization of a vessel of the Navy being out of the question for the reasons stated, the Department has made every effort to charter a suitable American vessel, but with little success. Indeed, it appears, unfortunately, to be a fact that at the present time few American vessels of sufficient size are available for the purposes named in the resolution. Propositions have, however, been received from the owners of vessels sailing under a foreign flag, but deemed to be otherwise suitable, offering to transport to Bombay or Calcutta the food supplies referred to, provided such vessels can be admitted to American registry, and thus brought within the terms of the resolution; and it is understood that vessels owned wholly by American citizens, but not admitted to American registry because built abroad, can be chartered upon terms deemed reasonable.

This Department is in receipt of reports indicating that sufficient food supplies have been contributed to load two vessels, whereas the resolution authorizes the chartering of but one.

While it seems impossible to obtain an American vessel of 4,000 tons, it might occur that two such vessels of 2,000 tons each could be procured. Under these circumstances, and in order that the efforts of the contributors to this work of international benevolence may not fail of success for want of the necessary means of transportation, I have the honor to recommend that the authority conferred by the public resolution be so enlarged as to empower this Department to charter two vessels having a capacity of two to four thousand tons each instead of one such vessel; and, inasmuch as even these smaller vessels may not be procurable within a reasonable time, that further special authority be granted by Congress for the admission to American registry of one or two such vessels as may be required, of about 4,000 tons each, for the transportation of supplies from New York to India, in pursuance of public resolution No. 8.

It is suggested that the terms, with respect to inspection, etc., provided in section 3 of the "Act to encourage American shipbuilding," approved May 10, 1892, in pursuance of which the foreign-built steamers *New York* and *Paris* were granted American registry, might with propriety be adopted in the case under consideration.

In this connection attention is invited to the inclosed copy of a communication from Messrs. T. Hogan & Sons, offering to charter to the Government, for the purpose of transporting food supplies to India, the vessels *Massapequa* and *Menantic*, upon terms specified, if these vessels can be "naturalized."

Very respectfully,

JOHN D. LONG, *Secretary.*

The CHAIRMAN OF THE COMMITTEE ON NAVAL AFFAIRS,
United States Senate.

Now, that proposition all around is entirely congenial to my opinions and sentiments in regard to the subject of admitting foreign-built ships to American register. I know that there is very strong opposition to that; but I have at all times entertained the opinion, and it has been growing on me by the lapse of time, that this proposition is based entirely upon a disposition to monopolize the coastwise trade in favor of the owners of American-built ships. That is all well enough; but in the pursuit of the policy laid down so many years ago, now a century ago, we have finally gone to that point where we find that when our people raise supplies to be sent to India as a benevolence to the perishing people there American ships can not be found to take those supplies out to India.

In that lamentable situation of our merchant marine it certainly does seem reasonable that we ought to admit these two ships to register here, particularly as the Senator from Maine, who has been always the firm advocate of this old act, and has been very much opposed to any departure from it, brings in this resolution. I thought, of course, the matter was all settled between the different competitors for our coastwise trade and our registered foreign trade when the Senator from Maine came in with this resolution, and I was very much surprised when I found that the Senator from New Hampshire, the next-door neighbor of the Senator from Maine, and as much devoted to the act of 1792 as he, made an objection.

Mr. CHANDLER. The Senator will allow me to say to him that the Senator from Maine, who took the responsibility of introducing the resolution and the accompanying documents, nowhere says he is in favor of it, and he is not in favor of it.

Mr. MORGAN. Well, Mr. President, it rather stuns me that a Senator should get up here and offer a resolution, advocate it in a speech, and bring all the papers and documents, some official and some nonofficial, in support of it, and then it should turn out that he is not in favor of it.

Mr. CHANDLER. The Senator will permit me to say that the Senator from Maine did not advocate it.

Mr. MORGAN. I consider the introduction of such a resolution as an advocacy.

Mr. CHANDLER. It was transmitted to him by Mr. Hogan, and he put it in with Mr. Hogan's letter and the letter of the Secretary of the Navy, but immediately objection was made to the resolution, and when the Senator from Maine, the chairman of the Committee on Naval Affairs, came to consider the subject, he preferred to have the present method adopted.

Mr. MORGAN. The Senator from Maine introduced that resolution on the 20th day of May, and asked unanimous consent of the Senate for its present consideration "on a statement," he says, "which I will make." And he went on to make his statement; and the statement is what pleased me more than his advocacy of the joint resolution. I was trying, however, to avoid any personal trouble in this matter by interfering between friends on so important a question as this, but I am so ardently in favor of the naturalization or domestication of foreign-built ships on fair and proper terms as the policy of the United States Government that this attracted my attention and my support, and I was quite surprised when the Senator from New Hampshire rose and, in reply to this remark, said:

Mr. CHANDLER. I shall ask that the joint resolution which the Senator from Maine has introduced, sent here by the Navy Department, may go over until Monday.

So it appears that the resolution was sent here by the Navy Department—an official act of the present Administration.

I think the Secretary of the Navy has made a mistake in the remedy which he proposes to apply in connection with the difficulty which he encounters. Congress should at once remove the restriction upon the Secretary in hiring a ship to transport the food products to India which requires that it shall be an American ship.

Mr. HALE. If the Senator will allow me, this is the language of the joint resolution passed April 7, 1897:

"Or to charter and employ, under the authority of the United States, a suitable American steamship or vessel."

That is the trouble with the Secretary.

Mr. CHANDLER. Yes; but the Secretary should have recommended to us to strike out the word "American," which we never should have put into the original authority. When we were providing for speedily sending the contributions of the liberal people of the United States to the starving people of India, we should not have limited the means of transportation to American ships. Everyone knew perfectly well, as the Senator from Maine has stated, and as the Secretary of the Navy has stated, that there would be found no suitable naval vessel, because a ship of war is not suited to transport cargo, and the United States possesses no naval transport vessels. So that authorization was a mere form. We should have authorized the Secretary of the Navy to transport the contributions in any steamship which he could procure at short notice for a reasonable price. He has discovered that there is no American steamship promptly available, and he now proposes that we shall give an American register to one or two foreign ships in order that they may carry the contributions.

Mr. HALE. The Secretary does not enforce this remedy. He simply refers to it, and incloses the communication from the New York parties who own the ships. I do not understand that the Secretary urges Congress especially to do this.

Mr. CHANDLER. The Senator will excuse me. I thought the Senator introduced a joint resolution coming from the Secretary for the admission of these ships to an American register.

Mr. HALE. No; the Secretary only refers to the measure. It does not to any further extent than that have his indorsement. He only refers to it as suggesting a remedy.

Mr. CHANDLER. The simplest thing in the world is for the Senator from Maine to introduce a bill striking out the word "American" from that authorization. These ships ought to carry the contributions, if they are ready to go. They ought not to be detained, but there is no need of admitting them to an American register. All we need to do is to authorize the ships, with the nationality that now belongs to them, to transport under an English register, if they are English ships, these American contributions to the suffering people of English India.

And so the debate went on, other Senators then participating in it. The subject then went over until last Monday.

Now, Mr. President, I can not understand why it is that we have to go back and reform our legislation passed on the 7th day of April by striking out of that act of Congress the words "American ships." There seems to have been a sort of patriotic outburst at that moment of time, which justifies Senators in their own estimation—and the country has supported them entirely, I think—in moving to introduce this grain into India through American ships and under the American flag. I see no reason why we should tire of that patriotic effort when Mr. Hogan comes in here and says, "I will carry this grain for cost; it shall not cost the Government of the United States half as much as it would require to go into the market and hire ships or charter ships floating the British flag, the German flag, the French flag, or any other flag. I have a line of cattle ships between this country and Liverpool; my business is prosperous, and I have no reason to abandon that business and that line; but, inasmuch as the Secretary of the Navy for more than a month has made a fruitless effort to find an American ship to carry this grain, I propose to take two of my

ships off of that line and undertake this benevolent expedition at the lowest possible cost, at the actual cost to the Treasury of the United States, provided you will give me the privileges when I am carrying the grain of an American ship; that is, to wear the American flag and to have and enjoy an American register." Now, who had a right to object to that unless it is some man who is in competition with Hogan & Sons in the same line of business, some man who owns a steamship line or some other ship line?

Mr. GRAY. May I ask the Senator from Alabama a question?

Mr. MORGAN. Certainly.

Mr. GRAY. I was not here when the original debate occurred, nor have I been here when the question was up. I should like to ask the Senator whether he understands that the Secretary of the Navy can obtain from Hogan & Sons terms that are satisfactory for the carrying of the grain?

Mr. MORGAN. Entirely.

Mr. GRAY. Has an offer been made which is satisfactory to the Secretary of the Navy?

Mr. MORGAN. An offer has been made.

Mr. GRAY. Is it satisfactory to the Secretary of the Navy?

Mr. MORGAN. Yes, sir. He sent it here along with the joint resolution, which, it appears, was drafted in the Navy Department. I will read that now:

T. HOGAN & SONS, 95 BROAD STREET, NEW YORK, *May 12, 1897.*

SIR: In view of the efforts made by our Government to procure American steamers to take the cargoes of grain to the starving people of India, we would state that two of our steamers, in every way suited for the business, are due here with cargoes within the next week, and could be discharged so as to be at the service of the Government within a short time thereafter.

The names of these steamers are *Massapequa* and *Menantic*, each of which will carry 4,100 tons gross weight of cargo in addition to 500 tons bunker coals, and when loaded will steam about 10 knots per hour. They were built in October, 1893, by Messrs. Jos. L. Thompson & Sons, Sunderland, England, and are first class in every respect. They are 1,935 tons net register or 3,027 tons gross register each, 322 feet in length, 42 feet 7 inches breadth, and 28 feet 6 inches molded depth, and are classed 100 A1 at British Lloyds. These steamers belong to the Menantic Steamship Company, Limited, the stock of which is owned by American citizens.

We would be willing to take a full cargo of grain in each, provided the Government would naturalize these two steamers before they leave this side. On this condition we would charge for grain in bulk $6 per ton of 2,240 pounds hence to Bombay, or $7 per ton of 2,240 pounds hence to Calcutta. Should it be requisite to ship the cargoes in bags, our price would be $6.70 per ton to Bombay and $7.70 to Calcutta.

We are satisfied that these two steamers would be a valuable acquisition to the merchant marine of this country and afford the means of giving employment to quite a number of American citizens.

Trusting that this matter will receive your favorable consideration,

We are, sir, yours, respectfully,

T. HOGAN & SONS.

Hon. JOHN D. LONG,
Secretary of Navy, Washington, D. C.

I have no disposition at all to go over the field of debate that was occupied so thoroughly yesterday, but I will state a fact or two in regard to it which were then developed. The cost of carrying the grain to India, proposed by Hogan & Sons in the contract, is just about one-half what it would cost the Government if we strike the word "American" out of the joint resolution. We had better accept the contract, and then we will add two more ships to the meager retinue we have of American commercial marine. We have got down to the point now that when our benevolent people desire to feed the poor, famishing people of India, they can not find American ships in which to transport the goods. Our commercial marine has actually dwindled to such an extent that it is humiliating to think about it.

Now, I can not see any reason at all why we should not add these two excellent steamers, suited to this purpose, and get the benefit of this arrangement; know exactly what we are doing; how much money we are going to spend; and if it does grind upon some gentlemen who have a monopoly of the transportation trade along the coast or elsewhere in steamships, let them bear along with the rest of us the burdens of Government. They have no right to an exclusive privilege of transportation by steam along the coasts of America or across the water, and yet they enjoy it. Whenever anybody comes in and proposes to enter that trade and to become a competitor with them for the trade of the country or of the world, they say, "No, we can not admit you into the sacred circle at all. It is going to cost us some money; it is going to create competition."

Mr. President, as I stated yesterday, I am in favor of competition in respect particularly of transportation, in respect of all matters in which the American people as a body are interested. I am in favor of competition. I do not wish to exclude it, but the whole object, it seems to me, of the change in the situation and in the minds of Senators is to obtain for some company that now has monopolistic advantages a continuance of those privileges at the expense of the Treasury of the United States and at the expense of humanity.

Mr. GRAY. Mr. President, as I said a moment ago, this matter has just been brought to my attention by the remarks of the Senator from Alabama [Mr. MORGAN]. It seems to be confessed on all hands—it is admitted by the substitute offered by the Senator from New Hampshire—that it would be absurd to wait and look for American registered steamships to carry these supplies to the starving people of India, and that if anything is to be done, it can only be done efficiently if it is done quickly.

But I confess that I have something more than a sentiment about it. I think it is right that we should avail ourselves and that the Executive Department should avail itself of the quickest mode of transportation of this substantial testimonial of American benevolence to those people. I have a sentiment that the white-winged messengers who carry the supplies to the starving people should be under the American flag, and I am willing, without discussing the propriety of our navigation laws or the laws which prohibit foreign-built ships from obtaining an American register, to lift the bars now in order that these messengers of peace and good will and benevolence may sail forth under the flag of my country.

I hope on that account that the substitute offered by the Senator from New Hampshire will not be adopted and that the joint resolution of the Senator from Maine in its original form, as I understand from the Senator from Alabama, will be adopted.

Mr. CHANDLER. Will the Senator from Delaware allow me to make a suggestion to him?

Mr. GRAY. Certainly.

Mr. CHANDLER. These white-winged messengers, these ships of English nationality, can sail into Bombay or Calcutta covered all over with American flags if the masters of the ships choose to put them on.

Mr. GRAY. I understand that the steamers which the Secretary of the Navy has proposed to Congress shall be employed for this work are owned by American citizens entirely, but, having been built abroad, are not entitled under the present law to American registers. I do not see why, in sending out this testimonial of our humanity and feeling for the starving poor of India, the vessel that carries it should not sail under and be decorated with the American flag of right, and sail under that flag and under its protection wherever it may go on the long voyage, whatever waters it may traverse between here and India. That is what I think is not an unnatural feeling. It is not merely a sentimental one.

Mr. CHANDLER. May I ask the Senator whether it is not incongruous in hiring these two English ships to take the supplies, if they are hired, to enter into the transaction of virtually selling an American register? Assuming that perhaps in that way we can get the freight a little cheaper, is it not incongruous to couple with the transaction the sale of American registers to these two ships in order that they may make one voyage to India in our service, after which they can come back here and, during the whole life of the ships, enter into the American coasting trade? Is it not an undignified, senseless bargain, in which we ought not to indulge in connection with this transaction?

Mr. GRAY. I think not, so long as it has been found that there are no suitable vessels that now have the right to sail under the American flag obtainable for this mission. I think we should feel that it is incumbent upon us to see that the vessels which carry this bounty of the American people over the wide seas shall sail under the American flag. I think we all have a proper patriotic feeling in that regard, or ought to have. I certainly am not vaunting any superior patriotism to the Senator from New Hampshire, but I believe that the feeling I have and which I have tried to express is shared or will be shared by a great number of the people of the United States. I think now, as I said before, that we should let down the prohibitive bars of the present law and allow these two vessels to sail out under the ensign of the country to which their owners belong and of which they are citizens.

I do not think it would militate against the general law on that subject. If it does, personally I do not care a great deal. But I do not see how it does or how it brings that law in question. I do not think it brings in question the general policy of the law. But here is an occasion when we want to send provisions abroad, and we want to send them under the American flag, and I think the proposition of the Secretary of the Navy is a wise one, a patriotic one, and ought to be acceded to.

Mr. STEWART. Mr. President, I understand that this is a question of charity, and we are discussing what kind of a display we will make in exercising that commendable quality. I have been taught by the really charitable that the advertisement of that kind of a deed is not absolutely necessary to the good quality of the deed. I think a discussion of the question of buying steamers or floating flags is hardly becoming.

It should be remembered that the necessity for the charity comes entirely from English legislation. England confiscated $1,700,000,000 of the property of those poor people with which they had been in the habit of buying bread in times like these. It did that by suspending the coinage. They had their stores of silver. They went to the mint and could not get anything for it.

They had stored it up for the purpose, because they theretofore could go and get rupees and buy bread, and millions of poor people are dying to-day in consequence of the English legislation confiscating the savings of those who have been enslaved by English rule and dominated by English taskmasters for two or three centuries.

The pittance that each gets is so small that the economy they have to exercise is perfectly marvelous. It is natural that the American people should sympathize with their distress, but I do not think any unnecessary advertisement is essential. If we are going to give, let us give, and let it be taken. I do not think we want to advertise to the world that we are especially benevolent because we are willing to contribute to relieve such horrible suffering. I am opposed to all this discussion about ships. Let the supply go as other commerce goes. Let it go as it can go. I think the gift will be quite as much appreciated by those poor people if it comes in one way as in any other. It will have just as much effect upon us. I do not believe the advertisement or the discussion will greatly please the American people.

This being a matter of charity, send the supplies over, and send them quickly and save life. If English steamers are ready to take the supplies, let them do so. The stores ought to be there now. This delay is harmful. All the discussion about how much advertisement, how much credit, we can get by the display of the American flag, when we have no ship to carry it, and the proposition to get ships in order to make the display, it seems to me, is profitless. Let us do the charity quietly and quickly.

Mr. FRYE. Mr. President, the proposition which the Senator from Alabama is advocating is, in my judgment, the most impudent one that ever was made to the United States Senate.

Mr. MORGAN. I must protest against the Senator from Maine making such an assault upon his colleague. I did not introduce the joint resolution. It was the Senator from Maine [Mr. HALE] who introduced it.

Mr. FRYE. I will settle that controversy with my colleague later on.

Mr. MORGAN. If it is impudent, it certainly is not my impudence.

Mr. FRYE. The proposition, I repeat, is the most impudent one I have ever known to be made to the United States Senate, on the part of Hogan & Sons. Hogan & Sons are very familiar to me. They have been before the Congress of the United States a great many times.

Mr. MORGAN. Will the Senator pardon me for one second?

Mr. FRYE. Yes.

Mr. MORGAN. The Senator from Maine [Mr. HALE] stated that the joint resolution was drawn and the proposition sent here by the Secretary of the Navy. Does the Senator from Maine propose to include that officer also in his accusation of impudence for making the suggestion?

Mr. FRYE. I have no controversy with the Secretary of the Navy and can not be led into one.

Mr. CHANDLER. Will the Senator from Maine allow me? I read from Hogan & Sons' proposition:

> I take the liberty of inclosing herewith for the consideration of yourself and your committee a joint resolution which I should be pleased to have you and your committee report favorably to the Senate.

What the Senator from Maine [Mr. HALE] did was to put it in by way of starting the subject, but he nowhere said that he was in favor of it, and he is not in favor of it.

Mr. MORGAN. Then the impudence comes from the Secretary of the Navy, and not from the Senator from Maine.

Mr. FRYE. My colleague did not have nor did the Secretary of the Navy have any such knowledge of these people and of this proposition as I have. If they had, no such proposition would ever have emanated from either of them.

Now, we have a law upon our statute books by which, if a foreign ship is wrecked in our waters and is purchased by an American citizen and repairs are laid out on her to the extent of three-quarters of her cost, the Secretary of the Treasury may give her an American register. Congress has been accustomed to act upon the spirit of the law, not limiting the wrecked vessel to the 3-mile limit. If it was 6 miles out or 8 miles out, and she was wrecked, and purchased by an American citizen, and then repaired in American shipyards to the extent of three-quarters in value, Congress has been accustomed to give an American register.

Hogan & Sons, of New York, have had their eyes after wrecked ships for some time, and within my certain knowledge they have purchased two old wrecks, had them hauled into New York and repaired there in American shipyards. They are large steamers. I think I remember that one of them is estimated to have cost $47,000 and another one $61,000, and I think they are valued by Hogan & Sons to-day at $125,000 and $150,000; and Hogan & Sons have those two ships now.

Mr. MORGAN. Will the Senator from Maine allow me to make an inquiry?

Mr. FRYE. No; let me finish my sentence. Why do not Hogan & Sons let the Secretary of the Navy contract with the two ships to whom we have given American registry to carry these supplies to India at cost, as they say they will, instead of insisting upon a bargain by which they shall get two more ships (foreign built) under American registry?

Mr. MORGAN. Allow me to answer that question.

Mr. GRAY. How does the Senator from Maine know, may I ask, that the two ships to which he refers are available?

Mr. FRYE. I have no doubt they are. They may be off.

Mr. GRAY. They may be off.

Mr. MORGAN. I will say that the statement of Hogan & Sons, which I read here yesterday, shows that they are engaged in the regular cattle trade between the United States and Liverpool or Southampton—somewhere over there—a profitable trade, and they are not willing to withdraw any of their ships from that trade in order to carry the grain. They want to bring a couple more that have not been wrecked.

Let me ask the Senator from Maine if he objects that so much value has been added to these ships by the labor of American shipbuilders and their employees in the shipyards of the United States. He complains that one of these ships was bought for $47,000 and raised to $125,000.

Mr. FRYE. No; I did not say that.

Mr. MORGAN. I thought the Senator did.

Mr. FRYE. Oh, no. I said that the cost of one, to my recollection, was $47,000. I do not mean the cost of the wrecked vessel, but the cost of the complete vessel was $47,000. The cost of the other complete vessel was $61,000, and by reason of their sharp bargaining for wreckage and all that sort of thing they are enabled to value those ships to-day one at $125,000 and another at $150,000.

Mr. MORGAN. That seems to have been a fair profit, and I wonder that the Senator from Maine should object to any person from his quarter making a good bargain.

Mr. FRYE. If the Senator from Alabama will allow me, I intended to say but two or three words, and I have had a good many more interruptions now than I have said words.

The scheme on the part of Hogan & Sons is in some possible way to get a line of American steamships at half what that line would cost if they were compelled by the existing law of the country to do what Clyde & Co., or Mallory & Co., or the Red Star Line, or other existing lines are compelled to do—have the ships created in American shipyards by American labor.

That is the entire scheme. They have three ships now, I understand, admitted to American registry, old ships that were wrecked somewhere or other, and through the action of the Secretary of the Treasury and of Congress they have succeeded in getting them at half what they would have cost if built in American shipyards.

Mr. MORGAN. But then the Senator from Maine will admit, I have no doubt, that the work which was done on those ships, those wrecks, as he calls them, was done in American shipyards.

Mr. FRYE. Of course, or else they would not have been admitted to American registry, Congress recognizing the spirit of the law in so admitting them.

Mr. MORGAN. That much good, profitable labor, then, was handed out to the American shipbuilder and his employees.

Mr. FRYE. Finding that there is a scarcity of American ships for the ocean trip—there is no scarcity of American vessels in the coastwise trade—Hogan & Sons take that opportunity to say, having already secured, for half their value, an American registry for three British ships, "We now propose to make a sharp bargain with the United States and get in two more British ships." They would thus secure a line of British-built ships with American registry, and then could compete with all the American lines that have been compelled by law to have their ships built in American shipyards, and to have them built from the keel up, so that the entire cost of the ship is incurred here, instead of by a speculation purchasing an old wreck and then putting on the repairs. That is the entire purpose of Hogan & Sons—to take advantage of this opportunity to get a line of five American steamships, and probably if you put the five together they would not cost two-thirds what every other steamship in any American line that is running cost.

Now, the Senator from Alabama says that competition is valuable: that the people get the benefit of it; and that these ships ought to be admitted to compete with the ships built in American shipyards. Mr. President, does not the Senator from Alabama know that for the last three years no American ships have been running at a profit? Does he not know that the freight transportation to-day on rail and in ships is way down to the very lowest point possible? Does he not know that the lines of American ships, even running to Central and South America, have not paid dividends to the amount of 10 per cent in the last five years? Does he not know that there is just as much and just as active

competition between the American lines as there is between the line that Hogan & Sons may establish to compete with another line? Does he not know that every steamship is a competitor with every other steamship; that every American steamship is a competitor with every other American ship? Does he not know that a monopoly is an utter impossibility on the ocean? Does he not know that a trust can not found itself on the ocean, and that therefore the competition is just as active, just as vivid, and results just exactly the same between American ships built in American shipyards and ships built in foreign shipyards and competing with American ships?

Mr. MORGAN. The Senator asks me if I do not know these things. I do not know them at all, but I am willing to take the Senator's word for them, and from his account of it I suppose the reason of the want of profit in American investments in ships is because they cost too much.

Mr. FRYE. Oh, no. It costs too much to sail them. It is not the original cost of the ship. The original cost of the ships is of small account in the race.

Mr. MORGAN. There is one other point about that. Why do not some of the great number of American ships sailing under our flag, entitled to our registry, and built in our own yards, come forward and offer to take this contract; and why is it that the Secretary of the Navy for thirty-five days has not been able to find one willing to do it?

Mr. FRYE. I do not know how they are engaged. I do not know anything about that. I have been absent. I am very much surprised that American ships can not be found. I admit that.

Mr. MORGAN. It is very strange.

Mr. FRYE. But I know that our big ships, our sailing ships at any rate, are nearly all the time plying between New York and Japan or China or Australia or California, and are on the sea on every voyage at least one hundred and thirty days, so that he would not be likely to find any of them.

Charity on the part of Hogan & Sons! They propose to carry this grain to Calcutta, or wherever it may be, at cost. I venture to say that there is not an American ship going to China or Calcutta or Japan to-day that is not carrying at cost; and who knows but that Hogan & Sons have looked out for a return cargo on which they will make a profit?

Mr. GRAY. I hope they have.

Mr. MORGAN. They are entitled to it.

Mr. FRYE. Certainly they are entitled to it. They are pretty sharp men, too. I think very likely they have looked out for a return cargo.

Mr. MORGAN. I hope they have.

Mr. FRYE. Many of the ships that come from Europe bound for San Francisco come in ballast. That is not carrying at cost; that is carrying at immense expense to the ship. I presume every ship that carries oil out of the United States comes here in ballast—every single one of them. I do not believe that in the Netherlands line or in the German line there is an oil ship which does not come to the United States without a single ounce of cargo on board. They are ready not only to come here without any cost, but ready to come here and pay the entire cost, in order to take the American oil back to Europe and make their charges on it. So that the mere statement that these men are willing to carry it at cost does not amount to anything at all.

We have had on our statute books for a hundred years these navigation laws. The Senator from Alabama has tried to repeal them again and again. The Senator from Missouri has made a vigorous attempt over and over and over again to repeal the laws. They never have been repealed. They never will be repealed. The navigation laws of the United States are stronger to-day in the United States Senate and in the Congress of the United States than they ever were. If it had not been for the navigation laws, we would not have had any ships at all now.

Mr. GRAY. We have no ships in the foreign trade as it is.

Mr. FRYE. We have not, because the navigation laws do not apply to ships in the foreign trade; because on the ocean we are absolutely without any protection against anybody; because every British tramp can compete with us, paying their masters $50 or $40, while we pay ours a hundred dollars; because from Vancouver to China to-day Great Britain is simply paying her stokers and her coal men, Chinamen, $7 a month, and we are compelled on the Pacific line to pay ours $35 a month. That is the reason why we have not our ocean-carrying trade to-day.

The VICE-PRESIDENT (at 1 o'clock and 45 minutes p. m.). The Chair calls the attention of the Senate to the fact that the time has arrived when the vote is to be taken on the amendment proposed by the Senator from New Hampshire [Mr. CHANDLER].

Mr. MORGAN. In order to test the strength of the amendment of the Senator from New Hampshire, I move to lay it on the table, and on that motion I ask for the yeas and nays.

Mr. LINDSAY. I ask to have the amendment read.

The VICE-PRESIDENT. The Secretary will read the amendment of the Senator from New Hampshire.

The SECRETARY. It is proposed to strike out all after the resolving clause and insert:

That the joint resolution of April 7, 1897, authorizing the Secretary of the Navy to transport contributions for the relief of the famishing poor of India, be, and the same is hereby, so amended that the Secretary shall be authorized to charter and employ the most suitable steamships or vessels of any nationality, not exceeding two in number, to carry out the object of said resolution.

The VICE-PRESIDENT. The yeas and nays are demanded on the motion to lay this amendment on the table.

The yeas and nays were ordered.

Mr. FRYE. The motion is to lay on the table the amendment of the Senator from New Hampshire, I understand.

The VICE-PRESIDENT. That is the question.

Mr. FRYE. It should not be laid on the table.

Mr. SEWELL. I do not suppose it is a debatable question, but I should like to have the question stated.

The VICE-PRESIDENT. It has been stated.

Mr. SEWELL. I did not happen to be in the Chamber at the time. I should like to have it read for information.

The VICE-PRESIDENT. The Senator from New Hampshire [Mr. CHANDLER] proposes an amendment as a substitute for the joint resolution. The amendment has been read.

Mr. STEWART. Let it be read.

Mr. GRAY. It has just been read.

The VICE-PRESIDENT. The Senator from Alabama moves to lay the amendment on the table, on which the yeas and nays have been ordered. The Secretary will call the roll.

The Secretary proceeded to call the roll.

Mr. PLATT of New York (when his name was called). I have a general pair with the junior Senator from Louisiana [Mr. McENERY]. I therefore withhold my vote.

Mr. TILLMAN (when his name was called). I have a general pair with the Senator from Nebraska [Mr. THURSTON], but as I am told that if he were present he would vote "nay," I will vote. I vote "nay."

The roll call was concluded.

Mr. JONES of Arkansas (after having voted in the affirmative). I am paired with the Senator from Maine [Mr. HALE]. As he introduced the joint resolution, I presume he would vote "nay" on this question.

Mr. CHANDLER. If the Senator from Maine were here, he would vote "nay."

Mr. JONES of Arkansas. If the Senator from New Hampshire knows that the Senator from Maine would vote "nay," I will announce my pair and withdraw my vote.

Mr. FRYE. I know that my colleague would vote "nay."

Mr. CHANDLER. In view of the remark of the Senator's colleague, I will state that I do know it, because the Senator from Maine so informed me in writing.

Mr. JONES of Arkansas. I withdraw my vote.

Mr. GEAR. I have a general pair with the Senator from New Jersey [Mr. SMITH]. He is not present, and I will not vote.

Mr. LODGE. I will take this occasion to announce the general pair of my colleague [Mr. HOAR] with the Senator from Washington [Mr. TURNER].

Mr. BATE (after having voted in the affirmative). I desire to know if the junior Senator from Kentucky [Mr. DEBOE] has voted?

The VICE-PRESIDENT. The junior Senator from Kentucky has not voted.

Mr. BATE. I am paired with that Senator for to-day, and withdraw my vote.

Mr. BUTLER (after having voted in the affirmative). I inquire if the junior Senator from Maryland [Mr. WELLINGTON] has voted?

The VICE-PRESIDENT. He has not voted.

Mr. BUTLER. I withdraw my vote. I am paired with that Senator, and I do not know how he would vote if present.

Mr. TURNER. I vote "yea."

The VICE-PRESIDENT. The Chair will state to the Senator from Washington that a pair was announced between him and the Senator from Massachusetts [Mr. HOAR].

Mr. TURNER. Very well; I was not aware of the fact that I was paired. I withdraw my vote.

The result was announced—yeas 18, nays 40; as follows:

YEAS—18.

Bacon,	Cockrell,	Mantle,	Turpie,
Berry,	Gray,	Mitchell,	Vest,
Carter,	Kenney,	Morgan,	Walthall.
Chilton,	Lindsay,	Pettus,	
Clay,	Mallory,	Rawlins,	

NAYS—40.

Aldrich,	Caffery,	Clark,	Elkins,
Allison,	Cannon,	Cullom,	Fairbanks,
Burrows,	Chandler,	Davis,	Foraker,

Frye,	Lodge,	Perkins,	Spooner,
Gallinger,	McMillan,	Pettigrew,	Stewart,
Hanna,	Mason,	Platt, Conn.	Tillman,
Hansbrough,	Nelson,	Pritchard,	Warren,
Harris, Kans.	Proctor,	Quay,	Wetmore,
Hawley,	Pasco,	Sewell,	White,
Heitfeld,	Penrose,	Shoup,	Wilson.

NOT VOTING—30.

Allen,	George,	McBride,	Smith,
Baker,	Gorman,	McEnery,	Teller,
Bate,	Hale,	Martin,	Thurston,
Butler,	Harris, Tenn.	Mills,	Turner,
Daniel,	Hoar,	Morrill,	Wellington,
Deboe,	Jones, Ark.	Murphy,	Wolcott.
Faulkner,	Jones, Nev.	Platt, N. Y.	
Gear,	Kyle,	Roach,	

So the Senate refused to lay Mr. CHANDLER'S amendment on the table.

The VICE-PRESIDENT. The question recurs on the adoption of the amendment proposed by the Senator from New Hampshire.

Mr. SEWELL. Let the amendment be read.

The VICE-PRESIDENT. The Senator from New Jersey requests that the amendment be read again. The Secretary will read the amendment.

The Secretary again read the amendment proposed by Mr. CHANDLER as a substitute.

The VICE-PRESIDENT. The question is on agreeing to the amendment.

The amendment was agreed to.

The joint resolution was reported to the Senate as amended, and the amendment was concurred in.

Mr. SEWELL. I wish to ask the Senator from Maine [Mr. FRYE] a question for information. I understood that the joint resolution had some reference to giving the flag to foreign vessels. I do not see anything at all in the amendment that would do it.

Mr. FRYE. There is nothing in the resolution to prevent the Secretary of the Navy from employing any vessel in the world. The difference between this and the other measure was that you were obliged to admit two foreign-built ships to American registry, to make a bargain with them, and have them admitted to American registry in order to get your provisions carried to India.

Mr. SEWELL. That you and I would not do. We would not think of it.

Mr. FRYE. No; and now the Secretary of the Navy reports that he can not find an American ship, and of course we do not want the corn and wheat and all that sort of thing to spoil.

Mr. SEWELL. Do you think that he can not find an American ship?

Mr. FRYE. I think he can if he tries.

Mr. SEWELL. If we pass the joint resolution, it will allow him to charter a British ship immediately. I do not believe that we ought to send the charitable contributions under any other flag than our own, even if we have to pay a good deal more for our own ships because they are not adapted to this use. They are not tramps; they are built for passenger trade. They can not carry as large cargoes as other ships, and therefore it will cost more to send the relief supplies abroad in them, but if you are going to send the supplies as a charitable gift offering from the people of the United States, they should be covered by the American and not by the British flag.

Mr. FRYE. But that will be the case.

Mr. MORGAN. If the Senator will allow me, we are now, by this action of ours, hauling down the American flag. On the 7th of April we hoisted it with great pride and eclat and glory to carry this benevolence to India. I am not participating in the hauling down of that flag.

Mr. CHANDLER. Mr. President——

Mr. FRYE. I object to further discussion.

The VICE-PRESIDENT. The question is, Shall the joint resolution be ordered to be engrossed for a third reading?

The joint resolution was ordered to be engrossed for a third reading, read the third time, and passed.

The title was amended so as to read: "A joint resolution authorizing the Secretary of the Navy to transport contributions for the relief of the famishing poor of India."

THE TARIFF BILL.

The VICE-PRESIDENT. The hour of 2 o'clock having arrived, the Chair lays before the Senate the unfinished business, being the bill (H. R. 379) to provide revenue for the Government and to encourage the industries of the United States.

Mr. PETTIGREW. I ask that the conference report on the Indian appropriation bill may be taken up and disposed of, temporarily laying aside the tariff bill for that purpose.

The VICE-PRESIDENT. Is there objection?

Mr. CHANDLER. Before the bill is laid aside, I ask leave to offer an amendment to the tariff bill, it being an amendment to the amendment offered by the Senator from South Dakota [Mr. PETTIGREW]. I ask that the amendment be printed, and also that it be printed in the RECORD.

The VICE-PRESIDENT. That will be the order.

Mr. CHANDLER'S amendment is as follows:

Amendment to the tariff bill by Senator CHANDLER.

"Amend the amendment offered May 25 by Senator PETTIGREW by adding thereto the following:

"The act 'to protect trade and commerce against unlawful restraints and monopolies,' approved July 2, 1890, shall apply to all companies, corporations, and persons engaged as common carriers in the business of transporting persons or property; and all the penalties imposed and methods of restraint provided by said act shall take effect and be in force against such companies, corporations, and persons; and any contract between any two or more of them for the fixing of rates of transportation by the order or on the recommendation of representatives designated on behalf of the various parties to such contract, or by the order or on the recommendation of a majority of such representatives, or for the maintenance of the rates of transportation once fixed, or for the enforcement of any such contract by fines or penalties imposed upon any of the parties thereto, shall constitute an offense under said act of July 2, 1890."

INDIAN APPROPRIATION BILL.

The VICE-PRESIDENT. The Chair hears no objection to taking up the conference report on the Indian appropriation bill. The report has been read.

Mr. PETTIGREW. The report has been read. I ask the Senate to concur in the conference report.

The VICE-PRESIDENT. The question is on concurring in the report.

Mr. CANNON. Mr. President——

The VICE-PRESIDENT. Does the Senator from Utah desire to speak on the pending question?

Mr. CANNON. I do, briefly.

The VICE-PRESIDENT. The Senator from Utah will proceed.

Mr. CANNON. Mr. President, it would be an injustice to the courtesy of the Senate if we were to object to the adoption of the conference report. At the same time it would be unfair if a statement were not made at this time of the injustice which is wrought to the people living in the State of Utah and all the people of the country so long as the status shall be maintained which will exist upon the adoption of the conference report.

The most valuable minerals of the Uncompahgre Indian Reservation will be withheld from public use during the whole time of the existence of the law which will be created by the passage of this bill and its signature by the President. It is a wrong to all the people of the United States, because the development of asphaltum and gilsonite and elaterite lands in various States of the Union has resulted in a great reduction in the price of paving in this country and a further development will still further reduce that cost to the cities of the United States.

It is only with a desire to bring to the attention of the Senate the fact that the status to be created by this bill should be remedied by further legislation at the earliest possible time that I rise at the present moment. I shall vote for the adoption of the conference report because the Senate has given to us the utmost consideration, and the conferees of both Houses have dealt with this question in an understanding way, and have made various futile efforts to get the two Houses to agree upon a proposition that should be just to all.

The VICE-PRESIDENT. The question is on concurring in the conference report.

The report was concurred in.

THE TARIFF BILL.

The Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 379) to provide revenue for the Government and to encourage the industries of the United States.

The VICE-PRESIDENT. The Secretary will read the bill; and under the order of the Senate the amendments of the Committee on Finance will first be acted upon as the reading proceeds.

The Secretary proceeded to read the bill.

The first amendment of the Committee on Finance was, on page 1, line 3, after the word "of," to strike out "May" and insert "July;" so as to read:

That on and after the 1st day of July, 1897, unless otherwise specially provided for in this act, there shall be levied, collected, and paid upon all articles imported from foreign countries, etc.

Mr. ALDRICH. I suggest that this amendment may be passed over for the present.

The VICE-PRESIDENT. The amendment will be passed over.

The next amendment was, on page 1, line 6, after the word "countries," to strike out "or withdrawn for consumption;" so as to read:

There shall be levied, collected, and paid upon all articles imported from foreign countries and mentioned in the schedules herein contained the rates of duty which are by the schedules and paragraphs respectively prescribed, namely.

The amendment was agreed to.

Mr. WHITE. At this point I desire to insert in the RECORD certain tables regarding the pending bill which have been prepared under the direction of the minority of the committee. I think, in view of the information which they contain, it would be well to insert them here.

The first is a table of articles paying from 50 to 75 per cent under the present bill; the second, articles paying 75 to 100 per cent; the third, a statement, by groups, of the articles paying over 100 per cent; and fourth, "Small amounts of duty collected—Statement of the articles and the amount of duty collected thereon during the fiscal year ended June 30, 1896, in amounts of $100, $150, and $200 or less, with the rates of duty under the present law and the Senate amendments to H. R. 379," indicating prohibitive duties.

Also another table containing "Increased rates over act of 1890;" that is, this table will show the instances wherein the present bill discloses rates increased over those of the McKinley bill. That is all we care to have done now.

The tables referred to are as follows:

Articles paying from 50 to 75 per cent.

Paragraph of Senate.	Article.	Per cent.
	Chemicals, oils, and paints:	
2	Alcoholic perfumery	71.23
10	Borax, refined	71.46
16	Collodion and all compounds	70.42
	Collodion rolled in sheets	69.98
17	Coloring for brandy, wine, etc	50
18	Copperas, or sulphate of iron	62.50
35	Oil, linseed or linseed	73.16
39	Oil, peppermint	60.79
41	Opium, crude	53.48
43	Baryta, manufactured	53.51
44	Blanc-fixe, etc	55.55
53	White lead	63.96
54	Whiting and paris white, dry	69.19
57	Lead, acetate of, white	70.56
	Lead, acetate of, brown	56.54
64	Preparations, medicinal, of which alcohol is a component part	70.51
67	Preparations used as applications to, etc	60
68	Santonin, and all salts thereof, etc	67.27
69	Soap, fancy, perfumed	50
	Soda—	
70	Bicarbonate of	57.70
75	Silicate of	54.90
81	Vanillin	50
	Earths, earthenware, and glassware:	
	Glass and glassware—	
91	Bottles and vials, flint and lime, filled—	
	Holding more than 1 pint	54.28
	Holding not more than 1 pint and not less than one-fourth pint	59.55
	Bottles and vials, green and colored, filled—	
	Holding more than 1 pint	59.72
	Holding not more than 1 pint and not less than one-fourth pint	59.79
96	Glassware, all other, plain, green, etc	60
	Articles of glass, cut, engraved, painted, etc	60
	Decanters, or other vessels, etc	60
	Bottles, cut, engraved, painted, etc	60
	Chemical glassware	60
	Porcelain or opal glassware	60
99	Cylinder and crown glass, polished, above 24 by 30 and not above 24 by 60 inches	63.56
100	Plated glass, fluted, rolled, etc., all above 24 by 60 inches	74.17
102	Cylinder and crown glass, polished, silvered, above 24 by 30 and not above 24 by 60 inches	51.95
104	Cylinder and crown glass, polished, unsilvered, when ground, obscured, etc., above 24 by 30 and not above 24 by 60 inches	52.83
	Cylinder and crown glass, polished, silvered, when ground, obscured, etc., above 24 by 30 and not above 24 by 60 inches	54.67
	Plate glass, cast, polished, silvered, when ground, obscured, etc., above 24 by 30 and not above 24 by 60 inches	53.65
	Marble and stone:	
111	Marble—	
	Veined marble, sawed or dressed, etc	67.54
	Manufactures of marble	50
	Manufactures of agate	50
	Manufactures of alabaster	50
	Manufactures of jet	50
115	Freestone, granite, etc., hewn, dressed, etc	50
	Metals, and manufactures of:	
	Iron or steel—	
123	Bullet and other plate iron, iron or steel, valued above 1 cent and not above 2 cents per pound	51.70
125	Ties for baling cotton, cut to lengths, etc	53.40
127	Sheets of iron or steel, common or black, thinner than No. 25 wire gauge	55.07
128	Sheets of iron or steel, galvanized, thinner than No. 20 and not thinner than No. 25 wire gauge	57.87
129	Sheets and plates, pickled or cleaned by acids, etc.:	
	Thinner than No. 20 and not thinner than No. 25 wire gauge	59.16
	Thinner than No. 25 wire gauge	70.41

Articles paying from 50 to 75 per cent—Continued.

Paragraph of Senate.	Article.	Per cent.
	Metals, and manufactures of—Continued.	
	Iron or steel—Continued.	
	Sheets and plates of iron or steel, pickled or cleaned by acid, cold rolled, smoothed, etc.:	
	Thinner than No. 20 and not thinner than No. 25 wire gauge	67.28
	Thinner than No. 25 wire gauge	70.43
130	Tin plates—	
	Lighter than 63 pounds per 100 square feet	60.49
	All other	55.10
133	Wire, round iron or steel—	
	Smaller than No. 16 wire gauge	55.39
149	Cutlery—	
	Penknives or pocketknives, valued at more than 30 cents and not exceeding 50 cents per dozen	66.67
	Scissors and shears, valued at more than 50 cents and not more than $1.75 per dozen	54.63
151	Table and carving knives and forks	55
153	Files, file blanks, rasps, and floats, 4 inches in length and under	57.87
	Firearms—	
154	Shotguns, etc., valued at not more than $10 each	50
	Shotguns, sporting, breechloading, etc	60
	Pistols	60
156	Nails, wire, made of wrought iron or steel	60.22
164	Saws: Mill saws	50.49
166	Umbrella and parasol ribs, stretcher frames, etc	50
	Miscellaneous metals and manufactures of—	
174	Bronze or Dutch metal, in leaf	64.30
	Aluminum, in leaves	61.85
176	Gold leaf, in packages	58.24
180	Lead: Sheets, pipes, shot, etc	63.60
188	Type metal	62.50
190	Zinc, old and worn out, etc	61.34
	Sugar:	
206	Cane, above No. 16 Dutch standard	74.05
209	Sugar candy and confectionery	50
	Agricultural products and provisions:	
221	Barley malt	52.59
226	Macaroni, vermicelli, etc	58.82
229	Rice, uncleaned	51.99
242	Eggs	53.37
245	Honey	52.23
246	Hops	53.76
247	Onions	57.85
	Nuts—	
268	Almonds, shelled	53.85
269	Filberts and walnuts, not shelled	63.57
270	Peanuts or ground beans, shelled	58.82
277	Poultry, dressed	55.56
279	Chicory root, burnt or roasted, etc	62.19
280	Chocolate, valued at exceeding 35 cents per pound	50
282	Dandelion root, etc	52.03
283	Salt	72.20
285	Dextrin, burnt starch, etc	57.49
286½	Tea	71.43
	Spirits, wines, and other beverages:	
	Wines—	
294	Champagne, containing more than 1 pint and not more than 1 quart	51.68
295	Still wines, in casks, containing more than 14 per cent of alcohol	68.30
	Vermuth, in bottles, containing each more than 1 pint and not more than 1 quart	53.21
298	Malt liquors, not in bottles or jugs	67.85
	Cotton manufactures:	
301	Cotton thread—	
	Not colored, etc.—	
	Valued at over 40 cents per pound	55
	Colored—	
	Valued at over 40 cents per pound	50
302	On spools	56.05
	Cotton cloth—	
304	Exceeding 50 and not exceeding 100 threads, etc.—	
	Dyed, colored, etc., exceeding 6 and not exceeding 9 square yards to the pound	55.69
305	Exceeding 100 and not exceeding 150 threads—	
	Bleached, exceeding 4 and not exceeding 6 square yards to the pound	50.64
306	Exceeding 150 and not exceeding 200 threads—	
	Not bleached—	
	Exceeding 3½ and not exceeding 4½ square yards to the pound	54.36
	Exceeding 4½ and not exceeding 6 square yards to the pound	50.75
	Exceeding 6 square yards to the pound	55.87
	Bleached—	
	Exceeding 6 square yards to the pound	50.50
307	Exceeding 200 threads to the square inch—	
	Not bleached—	
	Exceeding 2½ and not exceeding 3½ square yards to the pound	54.15
	Exceeding 3½ and not exceeding 5 square yards to the pound	54.46
	Exceeding 5 square yards to the pound	56.17
	Bleached—	
	Not exceeding 2½ square yards to the pound	51.15
	Exceeding 2½ and not exceeding 5 square yards to the pound	50.68
	Exceeding 5 square yards to the pound	53.65
	Dyed, colored, etc.—	
	Not exceeding 3½ square yards to the pound	51.21
	Exceeding 3½ square yards to the pound	61.42
308½	Sleeve linings or other cloth	67.94

Articles paying from 50 to 75 per cent—Continued.

Paragraph of Senate.	Article.	Per cent.
	Cotton manufactures—Continued.	
311	Corsets	50
	Wearing apparel, clothing, etc	50

	Freestone, granite, sandstone, etc.:			
114	Undressed or unmanufactured	11 cents per cubic foot	10 cents per cubic foot	14 cents per cubic foot.
115	Hewn, dressed, or polished	40 per cent	40 per cent	50 per cent.
117	Polishing and burnishing stones	Free	20 per cent	20 per cent.
149	Scissors and shears and blades for the same, finished or unfinished:			
	Valued at not more than 50 cents per dozen	35 per cent	50 cents per dozen and 15 per cent.	15 cents per dozen and 15 per cent.
	Valued at more than 50 cents and not more than $1.75 per dozen	do	50 cents per dozen and 15 per cent.	50 cents per dozen and 15 per cent.
	Valued at more than $1.75 per dozen	do	75 cents per dozen and 20 per cent.	75 cents per dozen and 25 per cent.
178	Tinsel wire, lame or lahn	Free	6 cents per pound and 10 per cent.	5 cents per pound.
182	Mica	25 per cent	2 cents per pound, etc	40 per cent.
189	Chronometers, box or ship's, and parts thereof	10 per cent	40 per cent	Do.
	Watches	25 per cent	do	Do.
	Watch cases, movements, etc	do	do	Do.
	Jewels for use in the manufacture of watches or clocks	Free	15 per cent	10 per cent.
194	Railroad ties	do	20 per cent	20 per cent.
197	Clapboards	$1 per M	$1.50 per M	$1.50 per M.
201	Shingles	20 cents per M	30 cents per M	25 cents per M.
206	Molasses from Hawaiian Islands	Free	Free	4 cents per gallon; 8 cents per gallon.
	Testing above 40° and not above 56°	do	3 cents per gallon	4 cents per gallon.
	Above 56°	do	6 cents per gallon	8 cents per gallon.
	Sugars:			
	All not above No. 16 Dutch standard	do		
	Testing not above 75°		1 cent per pound, and for every additional degree $\frac{1}{10}$ cent per pound.	
	Testing above 87° and not above 88°			$\frac{1}{10}$ cent per pound, and for each degree above $\frac{1}{10}$ cent per pound and 35 per cent ad valorem.
	Testing not more than 87°			75 per cent.
206	Sugar above No. 16 Dutch standard	$\frac{95}{100}$ cent per pound	1.675 cents per pound	$1\frac{95}{100}$ cents per pound and 35 per cent.
	Sugar above No. 16 Dutch standard on which export bounty is paid	$\frac{95}{100}$ cent per pound		
207	Sugar, maple, and sirup	20 per cent	4 cents per pound	4 cents per pound.
	Glucose or grape sugar	$\frac{1}{2}$ cent per pound	1½ cents per pound	1½ cents per pound.
208	Saccharine	25 per cent	$2 per pound and 15 per cent.	$1 per pound and 10 per cent.
249	Orchids, lily of the valley, azaleas, palms, etc	Free	30 per cent	30 per cent.
252	Straw	30 per cent	$1.50 per ton	$1.50 per ton.
262	Fruits preserved in their own juice,	do	35 per cent	35 per cent.
263	Currants	Free	2 cents per pound	2 cents per pound.
	Olives, green or prepared	do	25 cents per gallon	20 cents per gallon.
	Dates	do	½ cent per pound	½ cent per pound.
265	Oranges, lemons, and limes	10 cents per cubic foot	½ cent per pound	1 cent per pound.
266	Orange and lemon peel, not preserved	Free	20 per cent	2 cents per pound.
	Cocoanut meat or copra, etc	20 per cent	2 cents per pound	Do.
267	Pineapples	Free	6 cents per cubic foot	6 cents per cubic foot.
274	Meats, dressed or undressed, etc	10 per cent	25 per cent	25 per cent.
280	Chocolate and cocoa, prepared or manufactured	2 cents per pound	3 cents per pound and 20 per cent.	5 cents per pound and 10 per cent.
282	Dandelion root, etc., prepared	1½ cents per pound	1½ cents per pound	2 cents per pound.
286½	Tea	Free	Free	10 cents per pound.
289	Ginger ale or ginger beer	13 cents per dozen	18 cents per dozen	18 cents per dozen.
300	Mineral waters, natural	Free	Estimated 30 per cent	Estimated 30 per cent.
319	All other manufactures of cotton not specially provided for	40 per cent	40 per cent	45 per cent.
324	Hemp, tow of	$11.20 per ton	Not carded, 1 cent per pound; carded, 1½ cents per pound.	$20 per ton.
331	Hemp and jute carpets	6 cents per square yard	12 cents per square yard and 40 per cent.	10 cents per square yard and 35 per cent.

Statement of articles on which the rates of duty have been increased over those of the act of October 1, 1890—Continued.

Paragraph of Senate.	Article.	Rates of duty under—		
		Act of October 1, 1890.	House bill (H. R. 379).	Senate amendments.
345	All manufactures of other vegetable fiber except flax, hemp, and ramie	40 per cent.	40 per cent.	45 per cent.
	Gunny bags and gunny cloth, old or refuse	Free.	10 per cent.	10 per cent.
375	Carpets, treble ingrain, 3-ply, etc.	19 cents per square yard and 40 per cent.	19 cents per square yard and 40 per cent.	25 cents per square yard and 40 per cent.
376	Carpets, wool Dutch and 2-ply ingrain	14 cents per square yard and 40 per cent.	14 cents per square yard and 40 per cent.	20 cents per square yard and 40 per cent.
398	Cards, playing	50 cents per pack	10 cents per pack and 50 per cent.	20 cents per pack and 20 per cent.
399	Other manufactures of paper	25 per cent.	35 per cent.	35 per cent.
400	Beads of glass, loose, unthreaded	10 per cent.	do	Do.
	Beads, beaded or jet trimmings, etc.	35 per cent.	50 per cent.	60 per cent.
401	Braids, plaits, laces, willow sheets, etc.	Free	15 per cent.	15 per cent.
405	Coal, anthracite	do	Free	75 cents per ton.
406	Corks	15 cents per pound	15 cents per pound; 25 cents per pound.	15 cents per pound; 25 cents per pound.

	Band or belting	10 per cent.	10 per cent.	20 per cent.
	All leather, not specially provided for	do	do	Do.
437	Coral, manufactures of	25 per cent.	35 per cent.	50 per cent.
	Spar, manufactures of	do	do	Do.
442	Musical instruments and parts of:			
	Metal chief value	45 per cent.	35 per cent.	45 per cent.
	Wood chief value	35 per cent.		
450	Umbrellas, etc., covered with other material than silk, wool, etc.	45 per cent.	45 per cent*	50 per cent.
	Sticks for umbrellas, parasols, or sunshades	35 per cent.	do	40 per cent.

*Estimated.

The above indicates certain changes. In Schedules I, J, K, L, M, and N, owing to the radical modifications in classification, it is impossible to define the comparisons. It is quite evident there are increased rates in the silk, flax, and paper schedules.

Mr. ALDRICH. Does the Senator from California state the authority for these tables?

Mr. WHITE. They are made by the expert employed by the minority committee. Mr. Evans, who, I believe, prepared the statement used here two years ago, prepared these tables. They are made by the same gentleman who prepared the tables before.

The VICE-PRESIDENT. The reading of the bill will be proceeded with.

Mr. JONES of Arkansas. Before leaving the question of the tables, I should like to call the attention of the Senator from Rhode Island to the fact that the tables which he submitted to the Senate yesterday, and which were not read to the Senate, but which we hoped to find in the RECORD this morning, are not printed. I should like to know from the Senator when those tables are likely to be printed?

Mr. ALDRICH. They will be printed to-morrow morning. They should have been printed this morning, but I was unable last evening to get time to look over the manuscript the second time.

Mr. WHITE. I should like to ask the Senator in charge of the bill whether he has prepared any estimate of the average ad valorem of the entire bill?

Mr. ALDRICH. I have not. That is almost an impossible thing to do.

Mr. WHITE. Can the Senator state the number of amendments which have been proposed by the Senate committee?

Mr. ALDRICH. I can not.

The reading of the bill was continued. The next amendment was, under "Schedule A.—Chemicals, oils, and paints," on page 1, line 11, after the words "acetic or pyroligneous acid," to strike out "and boracic acid, 3 cents per pound" and insert:

Not exceeding the specific gravity of 1.047, three-fourths of 1 cent per pound; exceeding the specific gravity of 1.047, 2 cents per pound.

The amendment was agreed to.

The next amendment was, on page 2, line 1, after the words "boracic acid," to strike out "wholly or partly dehydrated, four" and insert "five;" so as to read:

Boracic acid, 5 cents per pound.

Mr. VEST. I should like to make a motion in regard to that particular part of the paragraph. I move to strike out "five" and to insert "three" in line 1, page 2.

The VICE-PRESIDENT. The amendment of the Senator from Missouri to the amendment of the committee will be stated.

The SECRETARY. It is proposed to amend the amendment, in line 1, page 2, by striking out the word "five" and inserting the word "three;" so as to read:

Boracic acid, 3 cents per pound.

Mr. VEST. Mr. President, I wish to call attention to the amendment submitted by the committee, which I consider a very extraordinary one. The House bill puts the duty upon this article at 4 cents per pound. The McKinley Act put a duty of 5 cents per pound upon it, and the existing law makes the duty 3 cents per pound. If attention is directed to a subsequent paragraph in the bill, it will be seen that there is no sort of just proportion between the duty upon boracic acid and upon borax, boracic acid being the base and the principal component of borax. It will be seen by reference to line 23, paragraph 10, page 3, that the words "borax, crude, or borate of soda, or borate of lime, 2 cents per pound; refined borax, 3 cents per pound," are stricken out. That was the House provision, and in lieu of those words the following are inserted by the committee:

10. Borax, 5 cents per pound—

Whether crude or refined—

borates of lime or soda, or other borate material not otherwise provided for, containing more than 36 per cent of anhydrous boracic acid, 4 cents per pound; borates of lime or soda, or other borate material not otherwise provided for, containing not more than 36 per cent of anhydrous boracic acid, 3 cents per pound.

I have in my hand an authoritative statement by the great Pacific Borax Company, which was sent to us in 1894, and it has been repeated since. The statement made in that paper is as follows:

Boracic acid is found in the volcanic regions of Tuscany, Italy, and it is a natural deposit of the hot springs prevailing in that region. The article has been used in America chiefly for the manufacture of refined borax.

Boracic acid being the base or valuable element in the manufacture of borax, 1 pound of boracic acid being equivalent to 3 pounds of refined borax, it will be seen that after allowing for reconversion into refined borax by the addition of soda and water of crystallization, the expense of which is light, the duty as it now stands on boracic acid is not equivalent to the duty on refined borax.

We have in the present bill the anomaly of 5 cents duty on boracic acid and 5 cents duty on refined borax, when 1 pound of boracic acid is equivalent to 3 pounds of refined borax. This is an enormous tax, viewed in any light. This statement, which seems to have been very elaborately and artistically prepared, gives the uses of borax. It enters into almost all the different purposes of life.

Borax—

Says this article—

purifies water.
Borax arrests diphtheria.
Borax relieves hoarseness.
Borax is a cleanser and purifier.
Borax destroys microbes and bacteria.
Borax is a preserver of fresh meat, fish, fowl, or game.
Borax is useful in the arts, manufactures, and mines.
Borax is an antiseptic—the very best known substance to arrest decay in animal food.
Borax is a flux for all metals—iron, gold, silver, etc., enabling them to melt at a lower temperature.
Borax is a glaze used in potteries, glass factories, and by enamelers for making a brilliant polish.
Borax is an emollient—valuable for the toilet; it softens and whitens the face and hands.

Borax is uninflammable and prevents fire; can be employed for rendering muslin fireproof.
Borax is a medicine, and now enters into many pharmaceutical preparations.
Borax is a bleach, and is used in laundries for preventing clothes from turning yellow.
Borax is used to enamel porcelain-coated iron, known as "granite ware."
Borax in solution, mixed with linseed oil, may be used for cheap painting.
Borax is used as a mordant in calico printing and in dyeing, and as a substitute for soap.

I submit, Mr. President, that this is an enormous duty of 5 cents a pound placed upon boracic acid, when 1 pound of boracic acid will make 3 pounds of refined borax. I do not know why our friends upon the other side have come to the conclusion that the tax proposed by the House of Representatives, which is 4 cents a pound and which seems to me to meet all the purposes of protection and revenue, should now be increased to 5 cents.

Mr. ALDRICH. The rates in this paragraph and in paragraph 10 were imposed for the protection of the producers of borax in Nevada and California, where the native deposits are found. The statement made by the representative of these producers to the House committee shows an enormous increase of importation since the reduction of duties was made by the act of 1894, and shows, I think, conclusively that the relations between the rates, to say nothing about the rates themselves, suggested in these two paragraphs are correct. It is a harmonious relation between the different rates imposed.

As to whether the rates are too high or not, I am not able to say, except to repeat the opinion of the gentlemen who represented this industry in the two States to which I have referred. They say that, under the peculiar conditions under which the industry is carried on there, the rates proposed by the Senate committee are absolutely necessary to protect the industry. Nearly one-half the borax consumed in the United States in the year 1896 was imported; and it does seem to me that, with these enormous deposits of native borax in these two States, that state of affairs should not be allowed to continue.

Mr. JONES of Arkansas. Mr. President, in the hearings before the Ways and Means Committee of the House of Representatives there was a statement submitted by the Manufacturing Chemists' Association in which, speaking of borate of lime, they say:

The rate proposed—

That is, the rate they suggested, which was not adopted by the House. They proposed "borate of lime, 1 cent per pound." They say:

The rate proposed is less than the act of 1894 and that of 1890, the article being a crude or raw material produced by one company in the United States, which is said to have the monopoly of the same.

Mr. ALDRICH. From what page is the Senator reading?

Mr. JONES of Arkansas. I am reading from page 10 of the hearings on Schedule A.

Mr. ALDRICH. Those are not the borax producers. Those are the people who import borax.

Mr. JONES of Arkansas. That was the statement of the Manufacturing Chemists' Association, and that statement was made before the Ways and Means Committee of the House of Representatives. I have no doubt they stated what they thought was correct.

Borate of lime, borate of soda, borax, and boracic acid must all be considered together, as they are kindred products.

I hold in my hands the prospectus of an English company, which states a number of facts which I think ought to be entitled to some consideration at the hands of the Senate. This prospectus was issued on the 19th of June, 1896. It reads:

PROSPECTUS.

The subscription list will be opened this day (Monday), 22d instant, and will be closed on or before Wednesday next, the 24th instant.

The Pacific Borax and Redwood's Chemical Works, Limited.

Incorporating the Pacific Coast Borax Company, of San Francisco, and Redwood & Sons, chemical manufacturers, of Cornwall Works, Kennington Green and Belvedere, Kent, England. (Incorporated under the companies acts, 1862 to 1893.)

Capital £510,000.

Divided into 20,000 6 per cent cumulative preference shares of £10 each (preferred also as to capital)	£200,000
And 31,000 ordinary shares of £10 each	310,000
	510,000

In addition to which will be issued £100,000 first-mortgage 5 per cent debentures in bonds of £100 each, which will be secured by a trust deed vesting all the immovable property of the company in the trustees, and containing a floating charge on the other assets of the company.

Redeemable by annual drawings at 110 (extending over a period of about twenty-three years), by the operation of an accumulative annual sinking fund of 2½ per cent in addition to the premium.

Interest payable half yearly on January 1 and July 1.

The vendors will accept, in part payment of the purchase money, the whole of the ordinary shares and 6,666 (the largest proportion allowed by the rules of the stock exchange) of the preference shares, leaving the whole proceeds of the debenture issue available for improvements and for working capital.

The Indian and General Investment Trust, Limited, through Messrs. Brown, Janson & Co., 32 Abchurch lane, E. C., and Messrs. Charles Hopkinson & Sons, 3 Regent street, S. W., are authorized to receive subscriptions for the balance, viz, 13,334 6 per cent cumulative preference shares of £10 each, and the whole of the debentures, payable as follows:

	Preference shares.	Debentures.
On application	£2	£20
On allotment	4	40
One month after allotment	4	40
	10	100

Or the whole amount may be paid on allotment, ranking for dividend and interest from dates of payment.

Trustees for the debenture holders.—The Indian and General Investment Trust, Limited, 308 Winchester House, E. C.

Solicitors for the trustees.—Messrs. Sanderson, Holland, Adkin & Co., 46 Queen Victoria street, E. C.

Directors.—Sir Alexander Wilson, director of the Indian and General Investment Trust, Limited, chairman; Edward J. Halsey, esq., J. P., director City of Santos Improvements Company, Limited; W. T. Holmes, esq., director (London board) Bank of New Zealand, Limited; F. M. Smith, esq., president Pacific Coast Borax Company, San Francisco, managing director in United States of America; R. C. Baker, esq., of Messrs. Redwood & Sons, Belvedere Mills, Kent, managing director in Europe.

Bankers.—Messrs. Brown, Janson & Co., 32 Abchurch lane, E. C.

Brokers.—Messrs. D. L. Thompson & Co., 7 Drapers' Gardens and Stock Exchange.

Solicitors for the company.—Messrs. Parker, Garrett & Parker, St. Michaels' Rectory, Cornhill, E. C.

Secretary and registered offices (pro tempore).—H. Evan Thomas, Dock House, Billiter street, E. C.

Prospectus.

This company has been formed to take over and carry on as going concerns as from April 1, 1896, the businesses of the Pacific Coast Borax Company, of San Francisco, Cal., and of Messrs. Redwood & Sons, chemical manufacturers, of Cornwall Works, Kennington Green, and Belvedere Mills, Belvedere, Kent, and to acquire the lands and buildings in the United States and at Belvedere, Kent, the deposits of crude borax in California, Nevada, and Oregon, and the good will, stock in trade, engines, plant, machinery, tools, utensils, and trade-marks appertaining to both businesses.

The properties to be acquired consist of:

(1) The well-known deposit of crude borax (colemanite), situate at Daggett, San Bernardino County, Cal.; (2) deposits of crude borax in the southeast part of the State of California; (3) deposits of crude borax situate at Esmeralda County, Nev.; (4) deposits of crude borax (priceite) situate at Curry County, Oreg. The above-named properties comprise a total area of upward of 31,000 acres. (5) The land and factory at Alameda, on San Francisco Bay, with modern plant and machinery for refining purposes. (6) The freehold works recently acquired by Messrs. Redwood & Sons for the extension of their business of chemical manufacturers, and known as Belvedere Mills, Belvedere, Kent.

Mr. Thomas Price, the senior partner of the firm of expert chemists and assayers, Messrs. Thomas Price & Son, of San Francisco, has made a report on the Daggett deposits, which are those at present being worked, and which the report states as covering an area of 326.86 acres. In it he states that "there can be no question but that this deposit of borate is positively unique among deposits of this nature," and that "there certainly seems to exist here an almost inexhaustible deposit of available calcium borate."

A print of the full text of Mr. Price's report (which is too lengthy to be embodied in this prospectus) can be obtained as mentioned below, and intending subscribers are urged to peruse it. It will be found to afford ample evidence, coupled with the accountant's report set out below, of the great value of the property to which it refers.

The business of Redwood & Sons was founded by the late Dr. Redwood, Ph. D., F. I. C., F. C. S., etc., emeritus professor of chemistry to the Pharmaceutical Society of Great Britain, and has shown increasing annual profits from its commencement. It is intended to extend the manufacturing operations at present carried on by this firm to the United States, where it is believed a large and profitable business in addition to that now existing can be done.

Various additional chemical manufactures are being undertaken, the details of which it is not considered politic to disclose, but which should also increase the profits.

The accounts of the American company and of Messrs. Redwood & Sons have been investigated by Messrs. Price, Waterhouse & Co., and the following is a copy of their report:

I ask the Senate to pay especial attention to this in view of the statement made by the Senator from Rhode Island that it was necessary to protect these interests in order that these men may have a profitable industry. This is the official report issued by a London company asking for subscribers and making the statement themselves as to the advantages of this investment:

44 GRESHAM STREET, E. C., *May 20, 1896.*

To the directors of the Indian and General Investment Trust, Limited.

GENTLEMEN: We have examined the books and accounts of the Pacific Coast Borax Company, at San Francisco, for the three years ending August 31, 1895, and Messrs. Redwood & Sons, chemical manufacturers, Cornwall Works, Kennington Green, for the three years ending September 30, 1895, for the purpose of ascertaining the profits earned.

The Pacific Coast Borax Company.—We find that this company has, in preparing their accounts, made no reserve for exhaustion of minerals, nor for depreciation of buildings, plant, or machinery, but we are informed that these have been fully maintained out of revenue. Interest on borrowed money has not been charged.

The sales have been conducted through the agency of Mr. Smith, the president, who, out of a commission on gross sales, pays the agency expenses at New York, Chicago, and San Francisco, and guarantees the sales.

During the period under review the borate used at the Alameda refinery has been nearly all obtained from the Daggett mines, the other properties owned by the company in Nevada not having been worked.

Redwood & Sons.—Full reserve has been made for depreciation of plant and machinery, but no charge has been made for remuneration of managers or interest on loans.

Subject to the above remarks and taking the years as of even date, and in

the case of the American company converting the dollar at an exchange of $4.87 to £1 sterling, the combined profits as thus ascertained are as follows:

	£	s.	d.
Year 1892-93	39,290	7	1
Year 1893-94	81,036	19	1
Year 1894-95	53,431	4	2

The sales of borax made by the Pacific Coast Borax Company have been as follows:

	Pounds.
Year ending August 31, 1893	7,498,542
Year ending August 31, 1894	7,841,932
Year ending August 31, 1895	9,570,849

We are, gentlemen, your obedient servants,
PRICE, WATERHOUSE & CO.

Now, mark this:

The fall in the profits in the year 1894-95 was owing to the reduction in the price of borax by the American Company, United States of America, for the reasons hereinafter mentioned.

That reason, when it comes out, will be that they propose to control the American market and to drive out competitors.

The volume of business, however, it will be noted, shows a substantial increase over previous years.

For the seven months to March 31, 1896, the sales of the American Company have been at the rate of about 11,000,000 pounds per annum, in addition to which a considerable business has been done in boracic acid produced from the crude borax, and in borax compounds.

It must be borne in mind, in estimating the future prospects of the company, that it will have two distinct sources of profit, the one as owners of the deposits of crude material, the other as manufacturers of the refined borax, boracic acid, and compounds, with the possession of the valuable trademarks relating thereto.

To check competition in borax in the United States of America and to popularize the article, the American Company has largely reduced the selling price of borax during the past year or so, submitting to a temporary decreased profit and looking to the largely increasing demand to compensate it in the immediate future. In the United States of America the price has now been reduced so that neither the crude nor refined borax can be imported to compete with the company at a remunerative profit.

The Senator from Rhode Island seems to have found in the figures somewhere something to alarm him at the great rate of importation, but here is an official statement from the men who own this property, and who are asking for subscribers to an English company, stating what the facts are.

Imports into the United States are subject to a duty of 1¼ cents per pound, or £6 per ton (United States of America), on crude borax; 2 cents per pound, or £8 per ton, on refined borax, and 2½ cents per pound, or £10 per ton, on boracic acid.

These duties were fixed under the Wilson tariff in 1894, the previous duties under the McKinley tariff having been higher.

The amounts required to meet the interest and sinking fund on the debentures, and the dividend on the preference shares, are as follows, viz:

Debentures, £100,000, interest and sinking fund	£7,500
Premium on drawn bonds, commencing at £250 per annum and increasing to	600
Preference shares, £200,000	12,000
	20,100
The profits for the year 1894-95, as shown in Messrs. Price, Waterhouse & Co.'s report, were	53,431
Leaving the sum of	33,291

to provide for depreciation, etc., and dividend on the ordinary shares.

With the view to greater economy in working, it is intended to construct a line of railway to connect the Daggett deposit with the existing railway, at an estimated cost of $125,000. The funds for the construction of this railway will be provided out of the proceeds of the debenture issue, the balance of which will be available for improvements and for working capital.

Mr. STEWART. I should like to inquire of the Senator if that company has purchased the deposits referred to, or was that simply a prospectus in order to obtain subscribers?

Mr. JONES of Arkansas. If the Senator will wait until I finish the statement, he will have no doubt on that subject.

Mr. STEWART. Very well. I only wanted to know the facts.

Mr. JONES of Arkansas. I want to make this statement as they make it themselves in regular orderly sequence, and when the end of it comes I think the Senator will be satisfied. The prospectus continues:

Borax is used largely in potteries and in metal works as a flux for enamels and glazes, in the manufacture of glass, for household purposes in the form of soap powders, etc.; also for food preservation. It is a requirement in a large and increasing number of industries, and is now one of the staple products of the world.

The demand for boracic acid (the base of borax) is increasing very largely, this product being used in a number of industries, and in medicine and surgery, being recognized in the latter case as one of the most valuable antiseptics known.

Up to a recent date the crude material has been used by the American Company solely for refining purposes, but lately shipments have been made to England and have been sold at £9 per ton, showing a substantial profit; it is the intention of the board to extend this trade, and as the company is in a position to lay down the crude material in Europe at a low cost, a good and profitable business should be assured to the company from this source.

They are mining this crude borax, shipping it to London, and selling it, according to their own statement, at a profit of £9 sterling per ton—less than 2 cents a pound—and yet they have the audacity to come to the Senate of the United States and ask that we shall impose a tariff of 4 cents a pound to prevent the importation of an article that is being largely exported from this country.

The prospectus then says:

Messrs. Laird & Adamson, brokers, of Liverpool, in their market report for December, 1895, state:

"CALIFORNIAN BORATES.

"The material seems to meet with considerable demand from buyers, and appears likely to come into more general use, especially in the manufacture of English refined boracic acid."

In this connection, for fear I shall forget it, I want to say that it has been stated to me by men whom I understand to be reputable men, business men, men who are engaged in refining borax in the city of New York, that the condition upon which this borax is sold in London at less than 2 cents a pound, a little over 1¼ cents a pound, is that it shall not be sold to American refiners, and when an effort is made to buy from those producers by American refiners, they say they have no right to be in the business, that they propose to furnish refined borax to the United States, that they want a monopoly of it, that they do not want any competition, and when their borax goes abroad they do not intend that it shall be brought back here.

The prospectus then goes on to say:

"SOUTH AMERICAN BORATE OF LIME.

"The increasing shipments from California will, however, to some extent serve as a check and absorb consumers' requirements, and the future of the market may depend considerably upon the competition from this quarter.

"BORAX.

"The consumption is increasing at a rapid rate in all parts of the world."

The title of the American company to the Daggett deposits and to the lands and factory on San Francisco Bay, and the capacity of that company to vest such title in this company, has been investigated by Mr. E. S. Pillsbury, of San Francisco, acting under instructions from and on behalf of the Indian and General Investment Trust, who reports that this company can obtain a perfect title to those properties.

The title to the properties to be taken over from Messrs. Redwood & Sons, situate at Belvedere, in the county of Kent, has been examined and passed by Messrs. Sanderson, Holland, Adkin & Co., the solicitors to the Indian and General Investment Trust.

The American company has undertaken to make out a good title to the remaining properties to be taken over, to the satisfaction of the solicitors to the trustees for the debenture holders.

The price to be paid by the company to the vendors is £510,000, payable as to £133,340 in cash, or preference shares, at the option of the company, as to £66,660 in preference shares, and the balance, £310,000, in ordinary shares, being the whole issue of the latter.

The liabilities as at March 31, 1896, and the preliminary expenses up to allotment will be borne by the vendors.

The following contracts have been entered into:

Between Frank Marion Smith and Richard Charles Baker of the first part, Redwood & Sons of the second part, and the Indian and General Investment Trust, Limited, of the third part, dated June 1, 1896.

Between Messrs. Frank Marion Smith and Richard Charles Baker of the first part, the said Redwood & Sons of the second part, and David Charles Wilson, as trustee for this company, of the third part, dated June 1, 1896.

There are various other contracts in connection with the carrying on of the two businesses above referred to, which it is impossible to set out in this prospectus. Applicants for shares must be deemed to have waived their rights (if any) to particulars of these contracts, whether under section 38 of the Companies Act, 1867, or otherwise.

The above-mentioned contracts, together with the reports of Mr. Thomas Price and Messrs. Price, Waterhouse & Co., and the memorandum and articles of association, can be inspected at the offices of the solicitors to the company, and a copy of the draft trust deed for securing the debentures can be inspected at the office of the solicitors to the trustees.

Application will be made in due course to the Stock Exchange for quotations for the debenture and preference shares.

Prospectuses and forms of application and copy of Mr. Price's report can be obtained at the office of the company and from the bankers and solicitors.

Should no allotment be made, the deposit will be returned in full, and when the number of debentures or shares is less than that applied for, the balance of the deposit will be applied in reduction of the amount payable on allotment.

JUNE 19, 1896.

Here is an extract from the Chemist and Druggist, of London, of October, 1896:

The Pacific Borax and Redwood Chemical Works, Limited.—At the statutory general meeting of this company the chairman, Sir A. Wilson, stated that, after providing for the debenture interest for the whole period covering twelve months from the company's registration and the entire preference dividend for the year, there was a balance of profit for the six months ended September 30 last sufficient to enable the directors to pay 12 per cent on the ordinary capital, amounting to £310,000. An interim dividend of 6 per cent was declared, and sufficient to pay a further 6 per cent carried over. The company was only registered in June last, but took over the business as from April 1.

There was a prospectus; here was the result. In June they were proposing to organize a company, and in October they declared a dividend of 12 per cent. They then had a tax of from 1¼ to 2 cents on this stuff to protect them from its coming into the United States, they having the larger part of this business. Now they propose that the tax they had before shall be increased 100 per cent.

This, Mr. President, seems to me to indicate very plainly that the Senate of the United States is not called upon to increase the amount of protection that this English company has now in this monopoly of the borax of the United States. If we leave them the protection they had before, we shall leave them more than they ought to have. So far from the rate remaining where it was at the beginning, it ought to be reduced by the Senate, and I for one am not willing to increase the profits of an English company, which are shown here to be simply enormous. They have a monopoly now recognized by our people all over this country.

Mr. ALDRICH. Mr. President, I regret that the senior Senator from Nevada [Mr. JONES], who is entirely familiar with all the facts in regard to this case, is not here, but I know that there are a large number of companies, mostly in California and Nevada, outside of the Pacific Coast Borax Company, so called, to which the Senator from Arkansas alluded, which are organized and producing borax. I know, further, that the natural deposits in both California and Nevada are inexhaustible and that they cover so wide a range of territory that it would be simply impossible for any company to have a monopoly of the business. There can be no question about both of those statements. The testimony taken by the House committee shows that there are five borax companies in California and seven borax companies in Nevada, which makes twelve companies outside of the Pacific Coast Borax Company, to which the Senator alluded.

Mr. JONES of Arkansas. And at the end, in parentheses, it is stated they are not operating.

Mr. ALDRICH. They say "suspended since the passage of the act of 1894."

Mr. JONES of Arkansas. Yes; "suspended."

Mr. ALDRICH. That seems to be the reason given by the borax producers themselves why they are not operating.

Mr. JONES of Arkansas. They do not give any reason; they give the date. The reason is that they are all under the management of the Pacific Coast Borax Company, which absolutely controls the whole business, and they prefer to shut up a part of the places and not run the whole of them.

Mr. ALDRICH. The senior Senator from Nevada assured the committee that Mr. Smith, the gentleman who floated this Pacific Coast Borax Company in Great Britain, had no control whatever over these other companies; that they were, in fact, independent companies, acting entirely outside of the organization to which he refers.

Mr. WHITE. If the Senator from Rhode Island will permit me, as I know many of these gentlemen myself and am pretty familiar with the surroundings, I may state some pertinent facts in regard to the matter.

Mr. ALDRICH. I shall be very glad to hear the Senator from California.

Mr. WHITE. Mr. President, in the distribution of the alleged benefits to be conferred by this bill, if I can prevent it, I do not intend to be excluded so far as California is concerned.

The statements made by the Senator from Arkansas [Mr. JONES] are to some extent incorrect. He relies, of course, upon the circular he has read. Mr. President, while in other parts of the country, Arkansas and Rhode Island, for instance, when land or property is about to be sold, the parties putting it upon the market always represent the facts just exactly as they are, and present to the would-be purchaser the most disagreeable statement possible. In my part of the United States, I regret to say that the same candor does not always prevail, and very often those who have property to sell represent it at least for all it is worth.

They do not always state less than the facts justify, and I am informed by the gentleman who has already been referred to, Mr. Smith, and also by another gentleman who was formerly a member of Congress, and holds some stock himself, that there is not a word of truth in the statement that these mines are controlled by the British company, and that they failed to make a sale in England to complete the transaction which they were anxious, in view of their glowing circular, to be able to accomplish. They tried very hard to obtain acquiescence from our British cousins, and represented the borax mines, or the boracic-acid mines, as being very valuable, and no doubt they are; but the representations, as I have already stated, were not at all below what the facts justified, and when investigation was made they failed to make the sale, and Mr. Smith himself, who was individually the largest owner in any one of those mines, a citizen of Alameda County, Cal., is now trying to sell his interest. Far from realizing any immediate profit out of it, my information from absolutely reliable stockholders is that the institution has been operated at a loss during the last few years.

Now, of course it is proper to draw out any statement, or to use a statement which was made as this one was, because we are entitled to have all the evidence, but the Senate will readily see that it may not be absolutely accurate.

When this matter was before the Committee on Ways and Means, Mr. Henry Krebs, of San Francisco, was called as a witness, and he entered elaborately into a discussion of the matter, told how borax was manufactured, why boracic acid was a most valuable component and could be used itself for many purposes, and he suggested a duty much higher than that which has been adopted by the committee. He also called attention to a table, which Senators interested will find on page 40 of the hearing on chemicals, Schedule A, in which he speaks of the production of borax in the United States from 1864 to 1896. I will ask that that table be inserted as part of my remarks.

The table referred to is as follows:

Production of borax in the United States from 1864 to 1896, inclusive.

Year.	Production.	Wholesale price in New York City per pound.	Year.	Production.	Wholesale price in New York City per pound.
	Pounds.	*Cents.*		*Pounds.*	*Cents.*
1864	25,000	39	1882	4,236,291	13½
1865	250,000	37½	1883	5,600,000	14½
1866			1884	7,713,303	9½
1867			1885	7,471,404	8½
1868	No production.	33½	1886	9,841,482	6½
1869		35½	1887	10,182,000	6½
1870		30½	1888	7,830,000	8
1871		31½	1889	8,800,000	7½
1872		32	1890	9,500,000	7½
1873	2,000,000	24½	1891	13,380,000	7½
1874	4,000,000	14½	1892	12,538,196	7½
1875	5,433,658	12½	1893	8,699,000	7½
1876	5,180,810	10½	1894	13,000,000	7
1877	4,727,280	9½	1895	13,500,000	5½
1878	2,802,800	8½	1896	15,400,000	5
1879	1,554,986	9			
1880	3,860,748	12½	Total...	a 181,297,393	
1881	4,045,405	13½			

a Equal to 90,648.1363 tons.

Mr. WHITE. That table shows that the price of borax has descended from a maximum of 39 cents in 1864 to 5½ cents in 1895 and 5 cents in 1896.

I venture to say that it is an absurdity for anyone, whether the author of that schedule or not, to assert that this article can be sent to and sold in England at 2 cents a pound at a profit, and it appears nobody was gullible enough to believe that statement.

So far as my personal knowledge of the property is concerned, I have not that technical acquirement which would enable me to state definitely as to the matter of cost; but in the examination which was given to this matter by the House of Representatives a statement was submitted by Mr. Yerington, of Nevada, to be found on page 44, and an additional statement by Mr. Krebs, which can be found on pages 41 and following, from which it appears that upon the theory upon which this bill is constructed this is not by any means an excessive duty.

Of course, I know there are parties in New York City who consume borax, and others all over the country, who are naturally anxious to have the duty reduced; but this must be remembered, that in one of the letters, the most elaborate letter which I have seen upon the subject, protesting against this tax, the protest is made upon the ground that the present company have reduced the price of borax so low that these parties can not compete—a very curious statement, but it is made in the letter which I have here before me.

Mr. President, the Senator from Nevada [Mr. JONES], who is absent, has conversed with me a good deal about this matter. It is an industry affecting my own State and the State of Nevada, I believe, alone, and of course that sympathy which would be found perhaps if located elsewhere is unfortunately absent here. But if we are to maintain the theory of this bill, if we are to impose a duty which will enable these people to operate their mines at a reasonable profit, I do not think that any reduction can be had.

I call the attention of the Senate to the necessity of a change in the phraseology. Mr. Krebs explained the curious situation in that regard. It appears that under the present law there is a large amount of the semirefined matter imported.

Mr. ALDRICH. The statement to which the Senator refers will be found on page 34.

Mr. WHITE. That gentleman says:

> Under the operations of the present tariff the American miners and producers have been deprived of about 30 per cent of their market, and this is not altogether because the duties were lowered, since under the name of crude borate of lime, a calcined, concentrated, and artificially treated material (dehydrated), direct from Asia Minor, has been the bulk of foreign importations. This, in a crude state, is treated at the mines near Panderma, in Asiatic Turkey, by crushing, roasting, separating, and settling in reservoirs, and again roasting, to eliminate all traces of water. Thus processed, this is no longer a raw material, but a highly concentrated product of partial manufacture, so that each pound of this prepared article will make nearly 1½ pounds of refined borax.
>
> The present duty on crude borate of lime being 1½ cents per pound, this material being raised from 35 and 44 per cent to 54 and 60 per cent, pays in reality only about 1 cent per pound in duty, thereby evading payment of revenue due the Government and bringing upon the American producers loss and impending ruin.
>
> To show the increase and disturbing effect of these importations, we may state that the entire quantity of borate of lime imported into the port of New York in forty-eight months under the act of 1890 amounted to 1,167,465 pounds, while for twenty-seven months ending December 1, 1896, under the act of 1894, they amounted to 10,147,354 pounds. Of this latter quantity, about 10,000,000 pounds, owing to its enhanced value by artificial treatment, as set forth above, was equivalent to about 14,000,000 pounds of actual borax, being nearly ten times as much within half the time as was imported under the act of 1890, and paid a duty of only $152,208, whereas at its true value the duty should have been $210,061.20, thus depriving the Government of $30,853.20 of revenue.

Now, even if it were true that an English company were operating in California and developing this property to the exclusion of everybody else, I should feel justified in voting for this tariff, especially when our friends the Turks seem to be the main beneficiaries of the opposite policy. The California and Nevada product comes into competition with the product from Asia Minor.

Mr. President, I have no hesitancy, under prevailing circumstances, in voting for the tariff on borax and upon the articles mentioned in the bill under that heading.

Mr. STEWART. I have very little technical knowledge as to this matter, but in my visit to California and Nevada last fall I saw a large number of persons who have been engaged in this business, and they told me that the reduction in the tariff of 1894 had been very prejudicial to them. A good many of them closed down, particularly in Nevada. I then understood that there had been an attempt to make this sale in Europe in good faith, but I think the whole thing fell through. It was one of the bombastic prospectuses that the English put out. It must be exaggeration. If there had been any such enormous business as is represented, I should have heard something about it, because I have met most of these people.

Mr. WHITE. If the Senator from Nevada will excuse me, I will state that I personally know the gentlemen who are endeavoring and have been endeavoring for a long time to sell their stock at a depreciated price and can not do it.

Mr. STEWART. The Senator refers to the company in California?

Mr. WHITE. Yes, sir.

Mr. STEWART. It is very much like many prospectuses circulated in England in regard to South Africa, whereby over $150,000,000—some put it as high as $200,000,000—of the people's money has been lost. If they had gone into this game, it would have been a South African game.

Mr. JONES of Arkansas. Mr. President, I, of course, have no personal knowledge of the borax or borate deposits on the Pacific Coast. The Senator from California was mistaken in saying I had read to the Senate from a circular. I read from a prospectus—one of those statements issued by a corporation or proposed corporation setting out the facts of a proposed business.

My recollection is that the laws in England are exceedingly severe against any attempt to commit frauds by the publication of papers of this kind. They are given out to the public, and they carry the protection of the law behind them.

This was an official statement made by the company, and I will read now, as the Senator from Rhode Island regrets the absence of my namesake and friend the Senator from Nevada [Mr. JONES], a letter written to him from one of the borax producers in Nevada about the pending bill, which will give some of the facts, I presume, although my other distinguished friend the Senator from Nevada [Mr. STEWART] says, "I do not know, but I think the whole thing fell through." I think the Senator is not fully informed on the question, and I will read what the Columbus Borax Company, at Columbus, Esmeralda County, Nev., has to say. I regret to say that in preparing the copy which was sent to me a part of it seems to have been left out. However, so far as I have the letter I will read it. It says it is a copy of a letter sent to Senator JOHN P. JONES:

SIR: As miners and producers of borax in Nevada and taxpayers of that State, we respectfully beg to call your attention to the fact that the changes made in the proposed tariff bill in the Senate Chamber on borax, boracic acid, and borate of lime are exceedingly unjust and to the disadvantage of every one of the producers and manufacturers of borax and boracic acid in the United States, with the sole exception of an English company operating under the name of the Pacific Coast Borax and Redwood Chemical Company.

They do not seem to have fallen through, in the opinion of these gentlemen, who are competitors.

Their head office is in London, England, with branches in the United States at San Francisco, Chicago, and New York.

We think that if the proposed tariff on borax was amended to read as follows it would be more to the interests of the manufacturers of borax operating in Nevada, such as ourselves, the Nevada Salt and Borax Company, the Reno Borax Company, and other companies of a like nature, and also more of equity to the manufacturers of borates in the East—

Here is their schedule—

Borax, refined, 5 cents per pound.
Refined boracic acid, 1¼ cents per pound.
Borate of lime, 1 cent per pound.

I presume these gentlemen are manufacturers of borax. They would like to have the raw material out of which it is made at as reasonable rate as they can get it, and then they want protection on their product. So they want 5 cents a pound on borax, and they want boracic acid and borate of lime way below this proposition.

The fact is, that in Nevada there is not a single manufacturer of boracic acid, nor are there any miners of borate of lime, and a duty on these two articles would only result in stopping importations and a consequent loss to the United States Government of the revenue derived from these importations of boracic acid and borate of lime, while at the same time there are absolutely no sellers of borate of lime in the United States, with the single exception of this English company, the Pacific Coast Borax and Redwood Chemical Company.

The enterprise which my friend the Senator from Nevada thinks fell through, though he does not know. These men engaged in the business make this assertion in the letter which was sent to Senator JOHN P. JONES:

The fact is, that in Nevada there is not a single manufacturer of boracic acid, nor are there any miners of borate of lime, and a duty on these two articles would only result in stopping importations and a consequent loss to the United States Government of the revenue derived from these importations of boracic acid and borate of lime, while at the same time there are absolutely no sellers of borate of lime in the United States, with the single exception of this English company, the Pacific Coast Borax and Redwood Chemical Company.

Mr. ALDRICH. Would it interrupt the Senator from Arkansas if I ask him a question?

Mr. JONES of Arkansas. Not at all.

Mr. ALDRICH. Possibly the Senator may be aware of the fact that the borax deposits of Nevada and California, with a single exception, I think, are found in the form of borates of soda or other borates, rather than borate of lime, and these companies are only interested, therefore, in the other borates, borate of soda, for instance. Therefore they would like to have borate of lime come in free or at a very low rate, while they want a very high rate on refined borax.

Mr. JONES of Arkansas. I said a while ago that I presumed the men who are refining borax would like to have the raw material as nearly free as possible, but the people mining the borate of soda in Nevada have some interest in what shall be paid on borate of lime as well as borate of soda. They are miners of borate of soda, or at least they pretend to be. I know nothing about that. I presume they are a reputable concern. They call themselves the Columbus Borax Company, works at Columbus, Esmeralda County, Nev. Its office is at 10 Cedar street, New York, from which this letter is written. It is addressed to Senator JOHN P. JONES of Nevada, as I have said:

As we believe you are patriotic and just enough to protect the American home interests, and particularly the industries of your State, we beg to lay before you the facts in this matter, which we believe you are not aware of. We know you are familiar with the history of the borax industry of your State, but, to reiterate the same, beg to say that it is not owing to the importation of the crude materials and competition therefrom that the borax manufacturers of the United States, with the exception of the English company, the Pacific Coast Borax and Redwood Chemical Company, are unfavorably situated at present for the manufacture of borax, but it is due to the fact that the price of refined borax (the manufactured product) has been reduced so materially by the English company above named—

The one that did not fall through, as my friend the Senator from Nevada seemed to think it did—

that the other producers could not compete with them, because we are laboring under greater disadvantages on transportation, and further due to the difference in the materials used and labor employed. It is the avowed policy of this foreign corporation, the Pacific Coast Borax and Redwood Chemical Company, to crush all the other manufacturers by reducing the price of the manufactured article, thereby removing for its own benefit and profit all competition from the other manufacturers of borax and boracic acid. The Pacific Coast Borax and Redwood Chemical Company, the English company, in its prospectus issued one year ago in England, on page 7 thereof, states as follows:

"To check competition in borax in the United States of America, and to popularize the article, the American company has largely reduced the selling price of borax during the past year or so, submitting to a temporary decreased profit. In the United States of America the price has now been reduced, so that neither the crude nor refined borax can be imported to compete with the company at a remunerative profit."

This is quoted by the company domiciled in Nevada, miners of the borate of soda in Nevada, and they give currency to the statement which was denounced a while ago as being a mere trick of English speculators.

Mr. STEWART. What are the names of the parties?

Mr. JONES of Arkansas. The letter is written from the Columbus Borax Company, works at Columbus, Esmeralda County, Nev., office No. 10 Cedar street, New York. As I stated when I began, a part of the letter seems to have been dropped out.

We believe that if borate of lime and boracic acid are permitted to remain upon the tariff list at the present rates of duty the Government will receive a revenue from such, and that the other borax manufacturers of the United States will be protected against the monoply of the Pacific Coast Borax and Redwood Chemical Company. The amount of borax produced in the United States, nearly 10,000 tons per annum, is practically monopolized by the English company. They have reduced the prices thereon so low that the other manufacturers can not afford to compete. They have at the same time put up the price on the crude material used in the United States so high that the manufacturers of borax which exist in the East have not been able to use the same, though they state in their prospectus (page 8) as follows:

"It is the intention of the board to extend this trade, and as the company is in a position to lay down the crude material in Europe at a low cost, a good and profitable business should be assured to the company from this source."

We submit that were a duty of 1 cent per pound placed upon the crude borate of lime and 1¼ cents per pound on boracic acid, which is not manufactured at all in Nevada, it will be sufficient protection for the borax manufacturers of Nevada, as the Nevada manufacturers and miners have no borate of lime for sale. Our crude material, which we have in greater or lesser abundance, can be profitably worked into borax, provided the duty on the manufactured article is maintained at a fair amount and that the other manufacturers of borax are protected by the duty of 1 cent per pound on borate of lime from extortion on the raw material and virtual strangulation by the Pacific Coast Borax and Redwood Chemical Company.

If the duty be left at 3 to 4 cents a pound upon borate of lime, the Pacific Coast Borax and Redwood Chemical Company will practically be dictators

of the borax market in the United States by controlling the price of borate of lime, and it will compel all other manufacturers to close their works for good, whereas we had hopes of reestablishing such as soon as a new tariff was enacted, giving us a fair amount of duty upon the manufactured article and a low duty on the raw material. As the Pacific Coast Borax and Redwood Chemical Company are the only sellers of borate of lime in the United States, and as they state in their prospectus, which we referred to, that they are selling their crude goods abroad so to monopolize the business abroad and here, we respectfully submit that the duties as stated in the bill reported from the Senate will be a lever in the hands of this English company to the detriment and destruction of the American companies and of the borax industry of Nevada.

I appeal to the Senator from Nevada not to shut his ears against the entreaties of this Nevada company for protection against a rapacious English syndicate.

As the representative of that State, we ask that you use your best effort and influence to have this duty changed to 1 cent per pound on borate of lime and 1¼ cents per pound on boracic acid—

If the Senator from California [Mr. WHITE] will lend me the remainder of his letter, I will read it.

Mr. ALDRICH. There is only one word more.

Mr. WHITE. A few words.

Mr. JONES of Arkansas. There are not a great many; but if they are as weighty as those which have been read, I imagine it will be more than the Senator from Rhode Island wants to hear:

and that we may be accorded a hearing on the subject.

Yours, very truly,

E. C. CALM, *Manager.*

Mr. President, it seems to me that enough has been presented to the Senate to show that this business is absolutely in the hands of an English company, that they control it now with the rate of tariff we have on the article, and that it is unreasonable and not American for us to propose to increase the duty in this extravagant degree for the purpose of increasing their profits and, if possible, giving them a more absolute and complete hold on the business. Here we are told by competitors that the adoption of this proposition by the Senate will give the English concern the whole trade, will absolutely destroy all competition; that they are now the only sellers of borate of lime in the United States, and that it will entirely fasten their hold upon the other industries of the country.

This being an article of almost universal consumption, being used in numbers and numbers of industries, it is not right that that which is raw material as to many industries, requiring high skill, shall be increased in price for the purpose of enriching a lot of men on the other side of the water, who declare, as the result of six months' organization, that they have made a dividend of 12 per cent and have laid aside 6 per cent more that can be divided.

Mr. STEWART. Mr. President, I hold in my hand the statement of H. M. Yerington, of Nevada, a gentleman who has been engaged in developing the borax business in Nevada from the beginning. In fact, without him there would have been no borax business there. He is a very public-spirited man, and whatever he says of his own knowledge everybody who knows him will believe to be true.

I should like to have the Secretary read his statement, as then it will be heard better. The other statements come from persons not so well known, and whose reputation is not quite so high. I wish to have the whole of Mr. Yerington's statement read.

The VICE-PRESIDENT. The Secretary will read as indicated.

The Secretary read as follows:

STATEMENT SUBMITTED BY MR. H. M. YERINGTON, OF CARSON CITY, NEV.

CARSON CITY, NEV., *December 28, 1896.*

DEAR SIR: In view of the interest now taken in the tariff question, I feel that you will pardon me for calling your attention to some of our Nevada and California productions which require a little more protection, viz, borax and soda, the further details of which please find in the accompanying memorandum, wherein I have attempted to give a few unquestionable facts for your consideration.

Some ten years ago a number of our residents secured, by purchase from the Government, the extensive alkali deposit known as Owens Lake, in Inyo County, Cal., with the intention of extracting from its waters soda ash, bicarbonate of soda, caustic soda, and other by-products with which those waters are so strongly impregnated, without doubt the largest alkali deposit in America. About $250,000 has been invested in the lands and works at the lake, this year's production being over 3,000 tons of excellent carbonate of soda.

So far a dividend has never been declared, although, I believe, the consumption of carbonate of soda and its compounds in the United States is about 250,000 tons per annum, the greater portion coming from England and other foreign countries. The output at Owens Lake could be heavily increased by investment of more capital, but foreign competition is so great under present low tariff that a further investment is not advisable unless we have a higher duty to protect the industry against the raids of foreigners.

The borax interests are especially important, the production large (viz, over 35,000 tons since 1883, which, at present market price of 4½ cents per pound, would be over $3,000,000), with a heavy amount of capital invested, giving employment to a vast number of white people, and also to Indians coming off the Indian reservation, who are well paid, thus materially assisting the Government in taking care of them.

With the hope that they will give every possible aid in this matter, I have taken the liberty of writing Senator STEWART, Senator WHITE, Senator JONES, and other leading members of Congress now at Washington.

The borax marshes of the United States are confined almost entirely to the States of California and Nevada, consisting of many thousands of acres situated at widely different points, but entirely within the arid and desert region, as a rule far distant from railroad facilities; hence the transportation and freight of machinery, supplies, etc., to the various works, and the manufactured product from thence to railroad and market is found to be very expensive, necessitating the employment of an extensive outfit of heavy teams, wagons, etc. The result is that producers now find it extremely difficult to compete with the foreign product under its system of cheap labor and cheap transportation. But even under this adverse state of things our people have been able to increase their output from the small beginning of 600 tons in 1873 to over 5,000 tons per annum in 1895, and reducing the price from 33 cents per pound in 1873, when the country was entirely supplied by foreigners, to 4½ cents, the present rate, which could not have been done under the operation of a free list, for since the tariff of 1883 the prices of borax have ruled lower than ever known before. Therefore it is evident that through the action of our American producers consumers throughout the country have been immensely benefited; and they are found in every town and hamlet in the land. Aside from the great benefit to consumers generally, the manufacture is of great and vital importance to the people of the States of California and Nevada in this, that very large sums of money are invested in these works, namely:

First. By purchase of large tracts of land from the United States Government at $2.50 per acre. As a rule, those lands are absolutely worthless for any other purpose, and hence would lie as arid, unproductive wastes for all time, both to the Government and people.

Second. Large sums of money have been expended in the shape of extensive buildings, plant, and other machinery, which, without a tariff, would have to be abandoned and go to ruin and decay.

Third. The business requires much skilled and scientific labor, for which high remuneration is paid. Ordinary laborers are necessarily employed by the hundred at good rates of wages. On many of the marshes vast numbers of Indians, the nation's protégés, are given work nearly all the year round at never less than $1 per day, thus greatly aiding the Government in taking care of them. At one marsh in Nevada 300 Indians are frequently on its pay roll, engaged in gathering boracic acid, known as "cotton balls."

Fourth. Further, relative to the labor and industrial question as found in connection with the borax and soda productions of California and Nevada. Transportation cuts an important figure in its extensive teaming and freighting, requiring the services of great numbers of skilled teamsters, stable men, etc. The consumption of hay, oats, and barley is necessarily very great, and the supplies of beef, pork, vegetables, and other supplies for the use of the camps, all obtained from the nearest ranches, for which cash is paid and which the producers could not possibly obtain through any other source.

At all the works immense quantities of wood are used as fuel in the manufacture of borax and soda. This wood is cut in the mountains by white men and hauled to the works, thus employing an additional number of men and teams at a heavy outlay of cash, at the same time giving many of our people steady employment. The small country merchants scattered throughout those regions are also benefited by this trade, which helps greatly to keep their heads above water.

Fifth. The large amount of taxes paid the States and counties incident to these industries is important, and their loss would be severely felt by the several counties particularly.

Of late years the consumption of borax and soda enters into the arts, manufactures, and home life of the country very extensively, is wonderfully increasing every year, and, as above stated, English manufacturers, being the great foreign shippers into this country, they by their cheap labor, transportation, etc., under our low tariff, are enabled to cripple our home producers of both borax and soda very seriously, in fact, to-day almost driving them out of our own markets.

Soda stands relatively on the same ground with borax, the great natural deposits being found at Owens Lake, in Inyo County, Cal., Ragtown, and other points in Nevada, in an alkali, arid region, entirely devoid of vegetation. The production on the coast is comparatively small, at continued reduced prices, owing to the larger and improved works and methods of manufacture, and yet notwithstanding the desperate efforts of foreign competitors to hold the trade, it is only a question of time when our manufacturers will be able to supply the wants of at least one-half the country, provided a little higher tariff is granted them.

The sales of carbonate of soda or English ash on the coast are about 7,000 tons per annum, principally from England, less the home production of about 2,500 tons. Under the present tariff our people are subjected to very sharp competition from foreigners, rendered possible owing to their extensive moneyed capital, cheap labor, and extraordinarily cheap transportation to their shipping ports and across the sea, the bulk of their shipments coming over to our ports as ballast.

The annual consumption of soda and its compounds, viz, English ash (carbonate of soda), saleratus (bicarbonate of soda), caustic, bleaching and washing soda, etc., in the United States is about 250,000 tons, the major portion being from Great Britain, shipped to this country principally in foreign bottoms, thus adding greatly to their receipts from the pockets of our people.

Notwithstanding the high wages paid in this country, expense of transportation to market, etc., it is not to be supposed that, should the present tariff be increased somewhat, as desired, our producers can possibly advance prices; but, on the other hand, our works must shut down and foreigners have absolute control of this market, as previous to 1872, force up prices far beyond the present rates, and all American consumers suffer accordingly. In this connection it may be stated that in the manufacture of borax 33 per cent of soda is required to every ton.

Glass blowers, paper workers, soap manufacturers, woolen mills, etc., are consumers of carbonate of soda to an enormous extent, supplied principally from England. Therefore, in advocating a substantial increase of the present tariff, this appeal is not made wholly in the interest of the producers alone, but in that of the manufacturers above stated and that of a vast number of our people in every condition of life, and for the benefit of nearly every household in our broad land.

Under this state of things it is felt by the producers in Nevada and California that they are justified in asking that the following duties be fixed:

		Cents.
Boracic acid	per pound	5
Borax	do	4
Concentrated, calcined, or treated borate of lime, and other borax materials	per pound	3
Borate of lime	do	3
Borate of soda	do	3
Carbonate of soda	do	¼
Bicarbonate of soda	do	1
Sal soda or crystals	do	¼
Caustic soda	do	1
Silicate of soda	do	¼

H. M. YERINGTON.

Mr. STEWART. I have several other communications which corroborate the statement of Mr. Yerington. They come from citizens whom we all know, and who have been engaged in that

business. That the borax business is paralyzed in Nevada, I have not the slightest doubt. Not only one, but a large number of people have come to me and urged that if there was a tariff bill passed the duties on borax and its various products should be raised, and this is the schedule that they have sent to me. It is given in clear language. If we are to have a tariff bill, it seems to me that Nevada should be protected in the very few things that will do her any good. I am satisfied that this tariff proposed on borax would set a great many men to work and that it would be very useful.

Mr. WHITE. I have in my hand a telegram which I received from a gentleman in California with whom I am very well acquainted and for whom I am ready to vouch, wherein he says, in speaking of the mine in which he is himself interested:

Borax mines are owned by individuals and companies, all American.

I asked for the London price of borax, and he says:

Price borax London now about 5 cents pound; usually much higher. London has big advantage over us in freight rates.

Since I was on the floor I have spoken to Mr. Krebs, whose statement I read. He informs me that the company with which he is connected in San Bernardino County, Cal., turn out some thousands of tons of borax per annum, and that it is an American company exclusively and absolutely.

Mr. CAFFERY. Mr. President, it appears from the statement made on this floor that there is an inexhaustible bed of borax in Nevada and California. This statement is made by the Senator from Rhode Island in reply to the charge of monopoly in the business of mining this mineral. He states that a monopoly of this business is impossible by reason of the inexhaustible supply and the competition that a number of persons engaged in the business would have among each other so as to prevent any such result as a monopoly.

My distinguished friend and brother from California who is on this side of the Chamber [Mr. WHITE] seemed to apply the doctrine of General Hancock, that the tariff is a local issue, and that if there is any good in it going his way he wants a part of it.

Mr. STEWART. Why should we not have it?

Mr. CAFFERY. I am not talking about why he should not have it, but as to what he wants. If these favors are to be dispensed with a lavish hand through the medium of this bill, my friend from California does not want California to be left out in the cold.

I am in receipt of a letter, which purports to have been addressed to the Committee on Ways and Means of the House, concerning the tariff on borax and boracic acid. The letter addressed to me, inclosing this letter, is as follows:

NEW YORK, *May 24, 1897.*

DEAR SIR: We ask your attention to inclosed letter; original sent to the Committee on Ways and Means.

The Senate bill proposes to tax the ordinary article of commercial boracic, which runs from 82 to 84 per cent boracic acid, 4 cents per pound, equal to 118 per cent ad valorem.

The above article is the natural product of the Italian lakes, and used principally by potters. To this extent it comes in competition with the refined acid, 99 per cent purity, which is already selling to the potters at 8 cents a pound.

Any business man will agree with us that the only object in placing a duty of 4 cents a pound on boracic acid, wholly or partly dehydrated, is to prevent its importation and decrease revenue, also giving the control to a trust.

The present duty of 3 cents per pound is more than ample protection. If revenue is the object, 2 cents a pound duty is the extreme.

I will now read the letter addressed to the chairman of the Committee on Ways and Means, dated New York, December 24, 1896. Both of these letters are from Joseph F. McCoy.

NEW YORK, *December 24, 1896.*

DEAR SIR: As buyers of borax and boracic acid in this market and abroad, we suggest that the just and true principle for really increasing the revenue have full consideration at your hands. A cursory glance at facts that every year are becoming fixed facts should be borne in mind. American borax has been gaining for some time past a controlling influence in Europe as well as in the United States and Canada. Every consumer in this country is paying a tax—to a monopoly, as we understand it—equivalent to 40 per cent of the quantity selling price, the present duty being 2 cents a pound. As little or no refined borax is imported or can be, owing to the present duty, the revenue might be increased by reducing the rate of duty to 1 cent per pound and the crude to one-half cent per pound duty. If our information is correct, the entire product of borax in this country is under the control of a foreign corporation.

You can readily learn if this is so; and if so, see the injustice of taxing every user of borax in this country to benefit outsiders, not only through the tariff giving them a monopoly, but through a combination of foreign capital to that end. In fact, no borax can be imported and sold in competition, hence no revenue.

Boracic acid, refined, is also made by the same combination of interests, their lowest price being 8 cents per pound. The lowest price on foreign boracic acid, refined, is £28 10s. per ton, or say 6.1 cents per pound, present duty 3 cents, making the foreign cost 9.1 cents per pound, independent of freight, insurance, customs charges, consular invoices, etc.; present protection, 48 per cent ad valorem.

By reducing the duty to 2 cents per pound an increased revenue would be the result; a fairer competition and a benefit to every line of manufacture, to every household in the land, every pottery, and many other branches. Crude boracic acid, costing £15 10s. in Europe (without freight, insurance, and other charges), say 3½ cents per pound, pays now a duty of 3 cents per pound, or about 86 per cent ad valorem. This article is used by every pottery in the United States, and only by them. The duty should not be more than 1 cent per pound. The imports would be increased. Every potter would be benefited by getting this material so much nearer the cost of the article as paid by their foreign competitors in England and Germany.

Clays—china clay and china stone—pay at present a duty much greater than the duty on the manufactured ware. If made free, every pottery in the country would not only buy their foreign clays at less price, but the home producers would have to reduce their price.

JOS. F. McCOY CO.

In the hearings before the Committee on Ways and Means, Mr. Krebs makes a statement. He is asked by the chairman as to the natural conditions and the labor in getting this mineral. I quote from page 30, Schedule A, of the hearings:

The CHAIRMAN. Are the natural conditions as favorable for the production of the base—

The base I suppose to be borax; boracic acid is the derivative—

of boracic acid in this country as in any other?

Mr. KREBS. Yes, sir.

The CHAIRMAN. It is only the question of labor?

Mr. KREBS. That is all. The crude product represents but a small part of the manufactured product; more than three-quarters is in labor. Being a layman, an ordinary business man, I have reduced my thoughts briefly to paper, etc.

It appears that the only drawback, if any, even in the estimation of Mr. Krebs (who, I am told, is interested in this business, and who, for that reason alone, would not be entirely discredited, if discredited at all), in regard to this article is the labor cost, which, I suppose, he wants to have equalized with some pauper labor somewhere in some other country. The natural conditions surrounding this borax are quite as good in this country, from the statement of the Senator from Rhode Island, as in any other place in the world. There is an inexhaustible supply in Nevada and California, the healthiest portions of our Union. I should like to know whether an establishment which has existed for some eight or ten years, which is alleged and charged to be a monopoly (whether the establishment is composed of Englishmen or Americans, it makes no difference in that regard), ought to have a tariff of about 100 per cent to equalize labor conditions of which we are not informed.

Mr. BURROWS. Will the Senator from Louisiana allow me to interrupt him?

Mr. CAFFERY. Certainly.

Mr. BURROWS. The Senator will receive some information upon the question of labor if he will turn to the thirty-ninth page of the tariff hearings and contrast the price of the Turkish labor paid in the manufacture of this competing article with the wages paid in the United States.

Mr. CAFFERY. The per diem of labor I suppose is given in the hearing, and that is all. The per diem of labor is no kind of criterion, particularly in the use of mining machinery, as to the labor cost of an article, for it has been clearly demonstrated on many occasions, and perhaps it will be more clearly demonstrated as investigation goes on, that American labor in a line where American ingenuity can apply machinery is not at all dearer than foreign labor in the like business.

Mr. GRAY. May I interrupt the Senator?

Mr. CAFFERY. Certainly.

Mr. GRAY. I think perhaps the Senator from Michigan must have meant (and I make the suggestion to the Senator from Louisiana) the price of labor in those numerous industries in which boracic acid or borax is an essential raw material.

Mr. CAFFERY. So I suppose. I do not know, from the reference of the Senator from Michigan, whether the statement embraces the industry of boracic acid or borax, or whether it embraces all the industries in which it is employed.

Mr. BURROWS. The table to which I made reference is prefaced with this statement:

The following table shows the wages per day paid employees in the borax industry in the United States and in Asia Minor.

Then follows the table showing the wages paid in the borax industry in the two countries.

Mr. CAFFERY. It is to the mining business itself, in getting out the borax from the mines, that I understand the labor statistics to apply.

Mr. BURROWS. I ask that the table be printed in the RECORD.

The table referred to is as follows:

LABOR AND WAGES.

The following table shows the wages per day paid employees in the borax industry in the United States and in Asia Minor:

[Extract from report of Consul Maddan, August 26, 1896.]

	United States.	Turkey in Asia.	Difference in favor of labor in the United States.
Laborers	$2 per day	44 cents per day	$1.56 per day.
Carpenters	$3 per day	66 cents per day	$2.34 per day.
Blacksmiths	$3.50 per day	88 cents per day	$2.62 per day.
Tinsmiths	$3 per day	66 cents per day	$2.34 per day.
Engineers	$120 per month	$52.80 per month	$67.20 per month.
Firemen	$75 per month	$15.40 per month	$59.60 per month.
Bookkeepers	$125 per month	$35.20 per month	$89.80 per month.
Foremen	$240 per month	$44 per month	$196 per month.

Mr. CAFFERY. Mr. President, I take it that whenever the charge is made that the labor cost of a certain commodity of which labor is an element is greater in America than in any other country by reason of the increased price per diem paid to the American laborer over a foreign laborer, it is not sustained by the fact of the foreign laborer being a cheaper man per diem. You have to take all the elements of cost. You have to take the output of the labor, and you have to take all the elements before you can come to the conclusion that the simple labor cost in one country exceeding the per diem of another is the criterion. You can not do it. It is not true in behalf of borax or any other industry that you can merely cite the difference between American labor and foreign labor in the particular instance.

Mr. PERKINS. If my friend from Louisiana will permit me, I simply desire to say that when the borax fields were discovered in eastern California and southern Nevada the price of borax was 40 cents a pound. It was finally reduced to 25 cents a pound; and notwithstanding the difference in the wages that we are paying and the increased wages paid to American citizens who are spending their money in our own community, the price of borax has continually fallen until to-day the wholesale price is from 6 to 7 cents a pound. To whom do we owe it? We owe it to the enterprise of the American people.

Mr. CAFFERY. That question has been asked and answered the same way about ten thousand times, I suppose, by the advocates of protection.

Mr. GALLINGER. And it has always been answered right.

Mr. CAFFERY. It is nothing on earth but the old exploded argument of post hoc, ergo propter hoc. It has no sort of weight with me in the discussion of the tariff question, and it ought not to have weight with anybody. Everything has declined in——

Mr. PERKINS. If you close up our mines, the trust in England controlling the Turkish borax mines will put back the price of borax to 30 cents a pound.

Mr. CAFFERY. There is a trust or an alleged trust in Nevada or California on this same borax. Whether that be true or not I do not say, but it is said an English company forms a monopolistic trust.

Mr. PERKINS. I will say to my friend from Louisiana (and I speak advisedly, because I have been over those fields) there are thousands and thousands of acres where borax is in large deposits, which he or any other person can go and locate and work. There can be no trust and no monopoly of the borax fields of Nevada and California.

Mr. GRAY. With the leave of the Senator from Louisiana, I should like to ask my friend from California a single question in relation to the interesting statement he has just made. I ask him if this industry has been created by a protective tariff, as I understood him to say in effect? Is that true?

Mr. PERKINS. I so understand it.

Mr. GRAY. When was a tariff first placed on it?

Mr. PERKINS. That I am not advised upon.

Mr. GRAY. In 1890?

Mr. STEWART. In 1883.

Mr. GRAY. The Senator from Nevada says in 1883. I do not know whether that is correct; but——

Mr. PERKINS. On borax?

Mr. GRAY. On borax. What was the rate of duty?

Mr. ALDRICH. In 1890, 3 cents a pound.

Mr. GRAY. The Senator from Rhode Island says 3 cents a pound. Then I understand that this industry has been built up upon a tariff rate of 3 cents a pound, and the motion of the Senator from Missouri is to continue that rate and put it in this bill. I should like to ask the Senator from California, if this industry has been built up and these people have been able to make a profit on a duty of 3 cents a pound, why it is that, as time goes on and the infant industry is established, it still wants more than 3 cents a pound of increased nourishment?

Mr. PERKINS. It is simply the old story of crushing an industry which has been established. The mines are opened, the water is pumped out of them, roads have been built to the mines, and if they are abandoned, then the trusts again come in and advance the price.

Mr. CHILTON. Will the Senator from Louisiana permit me to ask the Senator from California a question?

Mr. CAFFERY. Certainly.

Mr. CHILTON. I should like to ask the Senator from California a question.

Mr. PERKINS. Certainly.

Mr. CHILTON. Do I not understand from the reading of the statement which the Senator from Nevada sent forward to the desk a few moments ago that the borax people themselves ask for a duty of only 4 cents a pound on borax; that the House of Representatives put a duty of 3 cents a pound on it, and that the Senate Finance Committee have raised the duty to 5 cents a pound, or 2 cents a pound more than the House of Representatives fixed it at, and 1 cent per pound more than the borax people themselves asked for?

Mr. ALDRICH. No.

Mr. CHILTON. As I understood the reading of the document, the borax people asked for a duty of 4 cents a pound.

Mr. ALDRICH. Five.

Mr. STEWART. What they asked for was that boracic acid shall be at 5 cents a pound, and borax at 4 cents a pound.

Mr. CHILTON. That is the point.

Mr. STEWART. And they asked for a duty of 3 cents a pound on concentrated, calcined, or treated borate of lime and other borax materials.

Mr. JONES of Arkansas. What page does the Senator read from?

Mr. STEWART. I read from page 46 of the tariff hearings.

The VICE-PRESIDENT. The Senator from Louisiana is entitled to the floor, and will proceed.

Mr. CAFFERY. Mr. President, it would appear that there is nothing in natural conditions. It would appear that there is nothing in the ability of the Americans to mine this mineral as cheaply as a foreigner can mine it. It would only appear that an industry which has flourished and grown to these large proportions under a high tariff should now, when it is so well established as to form a monopoly, demand of the Congress of the United States an additional tariff on an article necessary in many important industries. Borax or boracic acid, according to the statement read by the Senator from Missouri, enters into the manufacture of many finished products. It is not only a material necessary in manufacturing, but it is a material necessary in medicine and in the matter of saving meats.

This article goes into every household in the United States, and the duty is without any reason whatever, so far as I can see. We should not now be asked to put it upon the tariff list with the most exaggerated and untenable tariff rate, a specific rate nearly 100 per cent ad valorem of the selling price of this article. The Senator from California stated to me that this article was selling at 5 cents a pound, or had been selling at that rate.

I submit, Mr. President, that this is cutting a little too deep with the tariff knife, even upon a bill which is framed on the scientific lines of the highest protective ideas of the Senator from Rhode Island. One hundred per cent upon such a necessary of life as this, which will enhance the cost of every material into which this mineral enters as a raw material, is excessive, and it is clearly shown by the letter which I have read from this firm in New York that this tariff will produce no revenue whatever, but will cut off importations.

I submit to the Senator whether or not these gentlemen interested in this matter, located as these mines are, do not command the world as to their locality; and would they deprive the people living on the seaboard of the advantages of the sea? Would they by this tariff run up the price of this article to the importing point, and thereby increase the price of an important necessary of life? I can see no reason for it, and protest against it.

The VICE-PRESIDENT. The question is on the amendment to the amendment of the committee striking out "five" and inserting "three," so as to make the rate of duty on boracic acid 3 cents per pound.

Mr. VEST. I ask for the yeas and nays on the amendment to the amendment.

The yeas and nays were ordered; and the Secretary proceeded to call the roll.

Mr. HANSBROUGH (when his name was called). I am paired with the senior Senator from Virginia [Mr. DANIEL], but I transfer that pair to the Senator from North Carolina [Mr. PRITCHARD], and vote "nay."

Mr. LODGE (when Mr. HOAR's name was called). My colleague [Mr. HOAR] is paired with the Senator from Washington [Mr. TURNER]. If he were present, my colleague would vote "nay."

Mr. PETTUS (when his name was called). For this day I am paired with the Senator from Oregon [Mr. MCBRIDE] on the amendments to this bill.

Mr. PROCTOR (when his name was called). I am paired with the junior Senator from Florida [Mr. MALLORY].

Mr. SEWELL (when his name was called). I am paired with the Senator from Wisconsin [Mr. MITCHELL]. If he were present, I should vote "nay."

Mr. TILLMAN (when his name was called). I am paired with the Senator from Nebraska [Mr. THURSTON]. If he were present, I should vote "yea."

The roll call was concluded.

Mr. CLARK. I have a general pair with the Senator from Kansas [Mr. HARRIS]. If he were present, I should vote "nay."

Mr. BATE. I am paired with the junior Senator from Kentucky [Mr. DEBOE]. If he were present, I should vote "yea."

I wish to say while I am up that my colleague [Mr. HARRIS of

Tennessee] is paired with the Senator from Vermont [Mr. MORRILL]. Both of these Senators are absent from the Chamber.

Mr. WALTHALL. My colleague [Mr. GEORGE] is absent on account of sickness, by leave of the Senate. The junior Senator from Colorado [Mr. WOLCOTT] is absent on public business. Those two Senators are paired.

I ask that this announcement may apply to all the yea-and-nay votes taken upon this bill and amendments until further notice.

Mr. WETMORE (after having voted in the negative). I inquire if the senior Senator from Georgia [Mr. BACON] has voted?

The VICE-PRESIDENT. The senior Senator from Georgia has not voted.

Mr. WETMORE. I have a general pair with that Senator, and therefore withdraw my vote.

Mr. BUTLER (after having voted in the affirmative). I have a general pair with the junior Senator from Maryland [Mr. WELLINGTON]. I do not see him in his seat, and I inquire whether he has voted?

The VICE-PRESIDENT. The junior Senator from Maryland has not voted.

Mr. BUTLER. Then I withdraw my vote.

Mr. GALLINGER. I inquire whether the senior Senator from Texas [Mr. MILLS] has voted?

The VICE-PRESIDENT. He has not voted.

Mr. GALLINGER. I have a general pair with that Senator, but I will transfer that pair to the junior Senator from Illinois [Mr. MASON], and let my vote in the negative stand.

The result was announced—yeas 20, nays 34; as follows:

YEAS—20.

Berry,	Gorman,	Lindsay,	Roach,
Caffery,	Gray,	Morgan,	Smith,
Chilton,	Heitfeld,	Murphy,	Turpie,
Clay,	Jones, Ark.	Pasco,	Vest.
Cockrell,	Kenney,	Rawlins,	Walthall.

NAYS—34.

Aldrich,	Elkins,	Jones, Nev.	Quay,
Allison,	Fairbanks,	Lodge,	Shoup,
Baker,	Foraker,	McEnery,	Spooner,
Burrows,	Frye,	McMillan,	Stewart,
Cannon,	Gallinger,	Nelson,	Warren,
Carter,	Gear,	Penrose,	White,
Chandler,	Hanna,	Perkins,	Wilson.
Cullom,	Hansbrough,	Platt, Conn.	
Davis,	Hawley,	Platt, N. Y.	

NOT VOTING—34.

Allen,	Hale,	Mason,	Teller,
Bacon,	Harris, Kans.	Mills,	Thurston,
Bate,	Harris, Tenn.	Mitchell,	Tillman,
Butler,	Hoar,	Morrill,	Turner,
Clark,	Kyle,	Pettigrew,	Wellington,
Daniel,	McBride,	Pettus,	Wetmore,
Deboe,	Mallory,	Pritchard,	Wolcott.
Faulkner,	Mantle,	Proctor,	
George,	Martin,	Sewell,	

So Mr. VEST's amendment to the amendment of the committee was rejected.

The VICE-PRESIDENT. The question recurs on the amendment reported by the Committee on Finance.

The amendment was agreed to.

The reading of the bill was resumed. The next amendment of the Committee on Finance was, in line 2, on page 2, after the words "chromic acid," to strike out "and lactic acid;" so as to read:

Chromic acid, 4 cents per pound.

The amendment was agreed to.

The next amendment was, in line 3, after the words "citric acid," to strike out "eight" and insert "seven;" so as to read:

Citric acid, 7 cents per pound.

The amendment was agreed to.

The next amendment was, in line 3, after the word "pound," to strike out "salicylic acid, 10 cents per pound."

Mr. SEWELL. I ask the Senator from Rhode Island to postpone the consideration of that amendment for the present.

Mr. ALDRICH. I have no objection to the amendment being passed over.

The VICE-PRESIDENT. The amendment will be passed over.

The reading of the bill was resumed. The next amendment of the Committee on Finance was, on page 2, line 6, after the word "pound," to strike out "gallic acid, 10 cents per pound."

The amendment was agreed to.

The next amendment was, in line 7, after the words "tartaric acid," to strike out "seven" and insert "six;" so as to read:

Tartaric acid, 6 cents per pound.

The amendment was agreed to.

The reading of the bill was resumed, beginning on line 8, page 2, as follows:

All other acids not specially provided for in this act, 25 per cent ad valorem.

Mr. VEST. I should like to ask the Senators in charge of this bill whether they propose now to do away with the provision in the McKinley Act and in the Wilson Act that put all these other acids upon the free list, and to put 25 per cent upon them in this basket clause? I take it that is their purpose.

Mr. ALDRICH. That is the purpose of the committee, to put all acids except those that are named specifically in the free list upon the dutiable list at 25 per cent.

Mr. VEST. That is an entire change in the policy of the McKinley law and of the Wilson law. Under both those acts in this basket clause all the acids not specified and enumerated were put upon the free list. I recollect one acid particularly as to which the operation of this provision would be most unjust. Take liquefied carbolic acid. That was upon the free list in the McKinley Act and the Wilson Act.

Mr. ALDRICH. It is also in the free list according to the report of the committee.

Mr. VEST. I beg your pardon. It was struck out of the free list, if I am not mistaken, and if I am I should like to be corrected and should be glad to know it. The committee put it into the basket clause at 25 per cent.

Mr. ALDRICH. If the Senator will look on page 161, line 18, he will find that carbolic acid is on the free list by name.

Mr. VEST. Liquefied carbolic acid, or carbolium?

Mr. ALDRICH. Carbolic acid of all kinds is upon the free list.

Mr. VEST. Is that the intention?

Mr. ALDRICH. Certainly.

Mr. VEST. I took it for granted that carbolium was not included.

Mr. ALDRICH. It is intended to be included, and we intended to include all kinds of carbolic acid.

Mr. VEST. I am glad then to know that the intention of the committee is to include this article of carbolium; but I have still to say that this is a large departure from the policy in tariff acts heretofore. It reverses the policy of the Government entirely. Heretofore when acids were not specifically enumerated, they went upon the free list, and now they go under a duty of 25 per cent ad valorem.

I give notice now that when we come to the free list, I shall move to specify carbolium, which is a specific chemical product and different from pure carbolic acid, and I now move to strike out this portion of this paragraph, beginning in line 8 to the end of it, which reads:

All other acids not specially provided for in this act, 25 per cent ad valorem.

The VICE-PRESIDENT. The amendment proposed by the Senator from Missouri will be stated.

The SECRETARY. On page 2, beginning in line 8, it is proposed to strike out:

All other acids not specially provided for in this act, 25 per cent ad valorem.

The VICE-PRESIDENT. The question is on the amendment of the Senator from Missouri.

The amendment was rejected.

Mr. GRAY. I should like, if I am in order—I do not know whether I am or not at this time—to ask the Senator in charge of the bill what is the policy of the committee in regard to sulphuric acid, which has been upon the free list, which was on the free list in the McKinley law, and is now on the free list? This article is very largely used in the manufacture of fertilizers, and it is specially interesting to me, as many of these manufactories are in my State.

Mr. ALDRICH. Sulphuric acid is now upon the free list, and will remain upon the free list unless it comes from countries which impose a duty upon it under the provisions of treaties.

Mr. GRAY. That qualification is a new one.

Mr. ALDRICH. Oh, no; it was in the act of 1890.

Mr. GRAY. But not in the present act?

Mr. ALDRICH. No; not in the present act.

Mr. VEST. I understand the Senator from Rhode Island to state that sulphuric acid is now upon the free list in the bill as reported by the Senate committee?

Mr. ALDRICH. Yes, sir; unless it comes from a country which imposes a duty upon sulphuric acid.

Mr. VEST. Then there is a most unfortunate provision in this bill, and it ought to be corrected if that is the meaning of the Senator. This provision is:

Sulphuric acid or oil of vitriol not specially provided for in this act, one-fourth of 1 cent per pound.

That is an absolute provision of itself without qualification—"not specially provided for in this act." If the Senator means not specially provided for in this act, and the free list would make it specially provided for, it is an unfortunate expression, to say the least, and will give rise to trouble.

Mr. PLATT of Connecticut. The same expression is in the McKinley law.

Mr. VEST. I think not.

Mr. PLATT of Connecticut. I think it is.

Mr. VEST. I do not think it is the same provision.

Mr. GRAY. I should like to ask the Senator from Rhode Island where sulphuric acid is specially provided for?

Mr. ALDRICH. On page 185, paragraph 647.

Mr. GRAY. Why do we find in the very first paragraph—

Sulphuric acid or oil of vitriol not specially provided for in this act, one-fourth of 1 cent per pound?

I am asking for information now, because I want to understand it.

Mr. ALDRICH. Paragraph 647 provides that sulphuric acid shall be free for all these different purposes, and this provision is that sulphuric acid not specially provided for shall be dutiable.

Mr. GRAY. As to sulphuric acid imported from countries that impose a duty upon sulphuric acid imported into such countries, will that have to pay this duty of a quarter of a cent, even though it be imported for artificial manure, for agricultural purposes?

Mr. ALDRICH. I should think not.

Mr. ALLISON. Oh, yes.

Mr. GRAY. The Senator from Iowa says, "Yes."

Mr. ALDRICH. I was mistaken as to that.

Mr. GRAY. Why should we just now, in the depressed state in which we find our farmers, impose this duty upon so important a raw material of artificial manures, which are absolutely essential in the Eastern States? I suppose in the Western States phosphates are not used as they are in the East.

Mr. ALDRICH. I imagine the Senator is familiar with this industry. The only sulphuric acid that can possibly be imported into the United States is from Canada, along the border lines of the United States. It would not be possible, owing to the character of the article itself, the manner in which it must be transported, and the price at which it is sold, to send any sulphuric acid from Canada to Wilmington under any circumstances, as it is made so cheaply in this country and sold so cheaply.

Mr. GRAY. Does not a great deal of it come from Italy?

Mr. ALDRICH. None whatever.

Mr. GRAY. As sulphur?

Mr. ALDRICH. None whatever. It can not be brought across the ocean and never has been, for owing to the danger in transportation you can not get a ship to carry it.

Mr. GRAY. Why should we put this qualified tax on such an article?

Mr. ALDRICH. Simply because the Dominion of Canada imposed a duty at one time on sulphuric acid and kept the sulphuric acid of New York and some of the border States out of the Dominion of Canada. This is simply retaliatory legislation to protect the manufacturers of sulphuric acid along the border in our own country.

Mr. GRAY. And the users suffer from the retaliation. They must bear the brunt of it.

Mr. ALDRICH. The users do not suffer at all from the retaliation, because I think it is not necessary to say that there is no manufacturer of fertilizers anywhere within that limit who uses any foreign sulphuric acid or ever did.

Mr. GRAY. Let me read to the Senator—I do not want to consume time by any means, but I want to understand this matter, as it is important to many of my immediate constituents—paragraph 647, which is a portion of the free list:

647. Sulphuric acid which at the temperature of 60° F. does not exceed the specific gravity of 1.380, for use in manufacturing superphosphate of lime or artificial manures of any kind, or for any agricultural purposes—

That means that is free. Then the paragraph continues:

Provided, That upon all sulphuric acid imported from any country, whether independent or a dependency, which imposes a duty upon sulphuric acid imported into such country from the United States, there shall be levied and collected a duty of one-fourth of 1 cent per pound.

Now, that retaliatory feature of the paragraph of the free list must fall, if it falls upon anybody, upon those who use artificial manures to some extent. A Senator suggests to me that it does not fall on anybody. What is the use, then, of putting it there if it does not retaliate?

Mr. ALDRICH. It was simply to keep out the Canadian product.

Mr. GRAY. If you keep that out, do you not by that much enhance the price of the domestic product?

Mr. ALDRICH. Not at all.

Mr. GRAY. Then why do you put it there?

Mr. ALDRICH. Simply for the purposes which I have stated, that the manufacturers along the line in the border States should have some protection against the Canadian product in case it should be imported here; in order to give them the same protection the Canadian Government gives to its producers.

Mr. GRAY. How about the farmers?

Mr. ALDRICH. The Senator knows very well that the farmers do not use sulphuric acid.

Mr. GRAY. They use the commercial fertilizers, of which sulphuric acid is a component part.

Mr. ALDRICH. But they are made on the Atlantic seaboard, south of Wilmington, very largely.

Mr. GRAY. They are not all made south of Wilmington. I do not know how far north the manufacture extends.

Mr. ALDRICH. Sulphuric acid is used in dissolving phosphates. It is not used in the ordinary manures.

Mr. GRAY. That is a most important article of manure. There is not a farmer in New York, Pennsylvania, Delaware, or Maryland who does not use phosphates to make his corn crop.

Mr. ALDRICH. I assert that there is no farmer in any one of those States who ever uses, or ever did use, a pound of phosphate in which the imported sulphuric acid was used.

Mr. GRAY. But he uses sulphuric acid, and that is affected in some way by this tariff legislation or it would not be here.

Mr. ALDRICH. It can not be affected by tariff legislation, because it is so cheap that it is simply the question of transportation that affects the cost. It could not be carried successfully from my own State, for instance, where it is made very largely, to the Senator's State. It is a very expensive article to transport. It has to be transported in carboys, with very great care. The transportation companies will not take it at all under ordinary circumstances. It is so destructive in character that it is liable to destroy any ship or car in which it is transported.

Mr. GRAY. Then, as this is retaliation that does not retaliate, I can not see for what possible purpose the provision is inserted in the bill, and, as there may be some lurking hardship in it to the agricultural classes in this country, I move to strike out the words, in line 8, on page 2, "not specially provided for in this act;" and when we come to the free list I shall move to strike out the proviso which I have read. Whenever the proper time arrives, if it is not altogether proper now, I shall submit that motion.

Mr. ALDRICH. I suggest that when we reach paragraph 647 on the free list that will be the proper time for the Senator to move to strike out the proviso.

Mr. GRAY. You would have to strike out "sulphuric acid not specially provided for in this act, one-fourth of 1 cent per pound."

Mr. ALDRICH. By simply striking out the proviso in paragraph 647 the purpose the Senator has in view will be accomplished.

Mr. GRAY. To what does this tax of one-fourth of a cent apply?

Mr. ALDRICH. To sulphuric acid not within the limit of specific gravity and not coming from any country which is independent or a dependency, and which imposes a duty upon sulphuric acid.

Mr. GRAY. And not used for agricultural purposes?

Mr. ALDRICH. And not to be used for agricultural purposes.

Mr. GRAY. I give notice that I shall at the proper time move to strike that out.

The reading of the bill was resumed at line 10, on page 2, as follows:

2. All alcoholic perfumery, including cologne water and other toilet waters and toilet preparations of all kinds, containing alcohol or in the preparation of which alcohol is used, and alcoholic compounds not specially provided for in this act, 60 cents per pound and 45 per cent ad valorem.

Mr. VEST. I move to restore the old duty. The duty in the McKinley Act and in the Wilson Act was $2 a gallon and 50 per cent ad valorem. I am perfectly aware that all these articles of alcoholic perfumery are classed as luxuries; but it seems to me that this is protection run mad. There is neither protection nor revenue in any such taxation as this. Two dollars per gallon and 50 per cent ad valorem was an enormous tax, and I resisted the tax in the Wilson Act, which was $2 per gallon and 50 per cent ad valorem, because it was too high.

I call the attention of the Senate to the fact that it makes no difference if there is but one drop of alcohol in any of these perfumeries; it then becomes subject to this tax by the gallon. Under the McKinley Act and under the Wilson Act it was taxed by the gallon, and under this bill it is to be by the pound. What is the result of this change from gallons to pounds? It seems entirely innocent upon the face of it, but it is deadly and makes the tax absolutely prohibitive when it goes into actual operation. There are in alcohol 7 pounds to the gallon, while there are 8 pounds to every gallon of water. That is the statement of the official authorities. There are 7 pounds weight in each gallon of these perfumeries, and, at 60 cents a pound, there would be $4.20 of specific tax, together with 45 per cent ad valorem added, making a fraction over $5 to the gallon upon these perfumeries. The value, according to the comparative statement, of these perfumeries is $1.40 per gallon. We therefore put a tax at a little over $5 upon an article that is worth $1.40.

Mr. President, I take it that this sort of thing can not be defended either upon the ground of protection or revenue. Nobody can say that these articles are noxious or that they come under the ban as being immoral. It is true that men and women can live without them, but if we live in a state of civilization, there are a great many things not absolutely necessary to human life that are still necessary to social life and to comfort, and it is unjust to say that cologne, which becomes absolutely necessary in cases of sickness sometimes, shall be taxed this enormous amount—a gallon worth $1.40 taxed over $5. I move to put back the old duty

under the McKinley Act, which was $2 per gallon and 50 per cent ad valorem.

Mr. ALDRICH. The act of 1890 provided two different rates upon alcoholic perfumery and the other articles included in this paragraph. It provided for a duty on alcoholic perfumery, including cologne waters and other toilet waters, of $2 a gallon and 50 per cent ad valorem, and another duty on alcoholic compounds not specially provided for of $2 a gallon and 25 per cent ad valorem—quite different.

Mr. VEST. That is correct.

Mr. ALDRICH. Under the first portion of this paragraph, the importations were very large, amounting to $296,000 in 1893 and $337,000 in 1896. Under the last part of the paragraph, the importations have always been infinitesimal and entirely unimportant. They were in 1893 $6,200 and in 1896 exactly $1,000.

The unit of value to which the Senator alluded is on the $1,000, of $1.38 a gallon, while the unit of value on the first part of the paragraph was $16.02 a gallon in 1896, and $16.99 a gallon in 1893. So the rate which the Senator is now proposing to change, while it is a high rate upon the last part of the paragraph, which is entirely unimportant as to its importation, is only 70 per cent ad valorem on the first and most important part of the paragraph.

When we impose a tax of 1,100 per cent upon alcohol, a tax upon alcoholic perfumery—which certainly is a luxury, if there is any luxury in the world—of 70 or 71 per cent is not a high tax. These two paragraphs were consolidated in the act of 1894 by the Senator from Missouri, and he fixed the same rate of duty. The rate of duty which he then suggested was equivalent, as I remember, to 194 per cent. This is not very much higher than that. It is merely for the purpose of simplicity and of consolidation of these articles, which are analogous in their character, that we include the unimportant one, which does raise the duty, with the important one, which remains substantially as it has been heretofore.

The Senator from Connecticut suggests to me that when the act of 1894 was passed we increased the duty upon alcohol and did not increase the duty on alcoholic products that are provided for in this paragraph.

The VICE-PRESIDENT. The amendment will be stated.

The SECRETARY. After the word "act," in line 14, it is proposed to strike out "60 cents per pound and 45" and insert in lieu thereof the words "$2 per gallon and 50;" so as to read "$2 per gallon and 50 per cent ad valorem."

Mr. VEST. That is the McKinley rate.

The VICE-PRESIDENT. The question is on agreeing to the amendment proposed by the Senator from Missouri.

The amendment was rejected.

The VICE-PRESIDENT. The reading of the bill will be proceeded with.

The Secretary read as follows:

3. Alkalies, alkaloids, distilled oils, essential oils, expressed oils, rendered oils, and all combinations of the foregoing, and all chemical compounds and salts not specially provided for in this act, 25 per cent ad valorem.

Mr. JONES of Arkansas. I should like to ask the Senator in charge of the bill if the paragraph just read includes paris green?

Mr. ALDRICH. I should say it did.

Mr. JONES of Arkansas. I do not believe that a tax of 25 per cent ought to be imposed on an article so absolutely necessary as is paris green. I move to amend the paragraph so that it shall not include paris green, and hope it may be allowed to go on the free list.

It is perfectly well known to many members of the Senate what has been the practice of the men who have charge of this article in commerce. It has been handled something like cotton bagging has been. It has been bandied about by the few men who control the trade. Just before it is needed, the price has been put up. Immediately after it is needed, they dissolve the mutual understanding which they have, and the price goes down again and stays until such time as the article is needed for sprinkling potatoes and cotton to kill potato bugs and caterpillars. The rate now is 12½ per cent.

I remember that when the Wilson bill was under consideration we had some considerable discussion about this item. I think that instead of the tax on the article being increased, under which the agricultural classes of the country have been unfairly treated, it should go on the free list, and I will move to add the words "except paris green," at the end of the paragraph, with the idea that it shall go on the free list.

In this connection, I will read a statement made about the method of handling the article in the New York market:

It is impossible that any antitrust law will ever catch this will-o'-the-wisp trust. It is one of the most erratic of stars or comets in the trust firmament. It appears suddenly, shines brightly for a few months, and then is seen no more for one, two, or three years. The only certainty connected with it is that the eight or nine manufacturers (all in New York City) make a little fortune at every appearance, and that the farmers, who use immense quantities of paris green for killing potato bugs, see prices advance 50 to 100 per cent a few days or weeks before they are ready to make purchases.

It is also largely used to kill caterpillars in cotton.

It is also not certain that free trade in paris green would prevent all depredations by the desperadoes who pounce upon the market late in the spring, advance prices rapidly during the potato bug season, and get away with their booty before importers can obtain considerable quantities from abroad and find means of distributing it. For it should be noted that preparatory to a raid orders have been obtained from practically all the jobbers in the country, at prices to be fixed later, with the agreement that all jobbers who make no purchases elsewhere shall receive rebates of so much per pound at the close of the season. In most cases the certain loss of rebates would more than cover the probable profits from attempting, in the middle of the season, to sell imported paris green, no matter how great the difference in price.

Consumers are at the mercy of the manufacturers. It is costly and risky to import large quantities of paris green at the beginning of a season, for the protected manufacturers are then more than likely to "compete," as they did in 1893, and keep prices so low that the importer must sell at a considerable loss. If, however, all duty were removed, all prospective loss would be small and many importers might take the risk. Free trade would probably prevent the formation of this intermittent trust. Certainly it would greatly decrease the risk of attempting to compete, and thereby prolong the periods of intermission or keep down prices and profits.

It was an off year for the manufacturers in 1893, and paris green sold for 10 to 10½ cents per pound. About January 1, 1894, the eight or nine manufacturers (all in New York) signed and sent out a circular saying to jobbers that jobbing prices would be fixed later, and that all who would agree not to purchase elsewhere, and who would then order, would be given the following rebates: 600 to 1,000 pounds, 1 cent; 1,000 pounds to 2,000 pounds, 1½ cents; 2,000 to 4,000 pounds, 2 cents; 4,000 to 10,000 pounds, 2½ cents, and 10,000 pounds or over, 3 cents. Terms, 60 days, with 6 per cent discount for unexpired time. The wise jobber ordered early. As prices had not in five years exceeded 14 cents, 15 cents was considered the maximum price that the manufacturers would dare fix. To the surprise of all, prices were fixed about the middle of April at 20 cents, with the warning, "subject to change at any time without notification."

About the middle of May another circular raised prices 3 cents higher and continued the same warning clause. "It is not improbable," said the Oil, Paint and Drug Reporter of May 21, "that as the season advances and the demand from the Southern and Western sections becomes more pronounced further advantage will be taken of it." This last increase is to reward jobbers who bought large supplies from the trust and to punish those who did not do so. Jobbers are thus bribed to purchase from the trust and prevented from importing. It was too late in the season for other chemical manufacturers to adapt their plants to make paris green, and besides, for reasons above stated, it would be difficult to place the article upon the market.

Thus, in 1894, paris green could be bought from the manufacturers only through their agent, at No. 239 Broadway. Enormous profits were made by this raid upon the market. Next year the trust expects to retire and to keep prices down to prevent new competitors from entering the field. Unfortunately for the trust, a new tariff bill was under consideration during May and June, 1894. The Western farmers became so indignant that they petitioned their representatives in both the House and Senate to stop protecting this baleful trust. Although the rate of duty had been left at 25 per cent in both the House and Senate bills, a partial compliance was made by removing one-half of the duty.

Mr. President, these facts have been stated again and again, and I presume it is well known that the prices are put up in this way. I do not know of any articles other than cotton bagging and paris green on which this method is practiced; but again and again, just before the time of consumption begins, when it is too late to import the article from abroad, the price is suddenly put up, and it is kept up until the season is over, and then it comes down. In that way a large amount of money is made. I remember that one year the advance in cotton bagging consumed by one crop was easily and plainly estimated at $3,000,000, and smaller amounts are made on paris green. Under the circumstances, it seems to me that paris green ought to go on the free list, and I move to amend the paragraph by inserting the words "except paris green" at the end of the paragraph.

Mr. ALDRICH. I suggest to my colleague on the committee that the amendment will not be necessary, as the paragraph itself provides that chemical compounds not specially provided for shall be dutiable at 25 per cent. If paris green were specially provided for elsewhere, the amendment which he suggests would not be necessary at all. All that it is necessary for him to do is, when the free list is reached, to move to put it on the free list.

Mr. JONES of Arkansas. Then, I give notice that when the free list is reached, I will move to add "paris green."

Mr. RAWLINS. I should like to ask the Senator from Rhode Island if under this paragraph cyanide of potassium would be taxed 25 per cent?

Mr. ALDRICH. It would be in accordance with the amendment suggested by the Finance Committee. It came from the House, I think, at 6 or 8 cents a pound.

Mr. PLATT of Connecticut. Six cents.

Mr. ALDRICH. Six cents, I am informed.

Mr. RAWLINS. This chemical is of vast importance to the mining industry, especially gold mining, and I now give notice that I shall move to put cyanide of potassium upon the free list when we reach that portion of the bill.

The VICE-PRESIDENT. The reading of the bill will be proceeded with.

The reading of the bill was resumed. The next amendment of the Committee on Finance was, in paragraph 4, line 20, page 2, after the word "alumina," to insert "hydrate of;" so as to make the paragraph read:

4. Alumina, hydrate of, or refined bauxite, six-tenths of 1 cent per pound; alum, alum cake, patent alum, sulphate of alumina, and aluminous cake, and alum in crystals or ground, one-half of 1 cent per pound.

The amendment was agreed to.

Mr. CANNON. I move to amend paragraph 4 by inserting in line 23, after the word "ground," the words "and alum clay;" so that it will read:

Alum in crystals or ground, and alum clay, one-half of 1 cent per pound.

Mr. ALDRICH. Can the Senator from Utah tell us what is the price of alum clay?

Mr. CANNON. The price is governed entirely by the cost of transportation. Most of the alum clay comes in ballast, and is used here in the sizing of paper. There are vast deposits of alum clay in the States of Texas, Utah, and through the Rocky Mountain region, and if there were a tariff of one-half cent per pound the transportation charges would enable the domestic producers to send their alum clay into the market. There is none of domestic production now in use in the United States. I can not answer the direct question of the Senator from Rhode Island as to the cost at the present moment.

Mr. GRAY. I should like to know something about the cost, because alum clay is used very largely in sizing paper, as the Senator from Utah stated. Paper manufacturers situated in my own State have written to me in regard to this very matter, and they say it is a very important material in their industry. I should like to know why they should be taxed upon that article for an industry which has not yet even come out of the womb of the present.

Mr. CANNON. This is one of those prospective infant industries which should have our special care.

Mr. GRAY. An unborn infant.

Mr. CANNON. It has not been born yet. It wants attention. It will be born if it receives proper encouragement from the Congress of the United States in the pending bill. I have sent for information concerning the price of the commodity, but I regret to say that I have not yet received any satisfactory information concerning it.

Mr. ALDRICH. I suggest to the Senator that he offer his amendment later on, when he gets information, so that the Senate may act upon it advisedly.

Mr. CANNON. We are acting here on other amendments without that detailed knowledge. The bill aims to provide protection for all possible industries in the United States. While I am perfectly willing that the matter shall go over, if the question of the selling price of the article be a fatal objection to its present consideration, I feel that this can stand as well as plenty of other propositions on which we are called upon to vote without that knowledge.

Mr. GRAY. This is rather a serious matter, that we should not only put this tax upon an industry, but that we should do it blindly and without information. I have no objection in the world to the birth of new industries in the State of the Senator from Utah or any other State, but I do not want to be called upon to father them unless I know there is something of gain or profit or advantage in some way to the country at large, and especially to those whom I more particularly represent.

Mr. GALLINGER. Will the Senator from Delaware permit me?

Mr. GRAY. Certainly.

Mr. GALLINGER. Did I understand the Senator from Delaware to say that alum clay is used largely in the sizing of paper?

Mr. GRAY. So the Senator from Utah said.

Mr. GALLINGER. Can the Senator state what kinds or qualities of paper?

Mr. GRAY. I can not. I have some data in my desk at home which I shall be glad to produce here.

Mr. GALLINGER. I ask the question because we have in our country large paper manufacturing establishments, and they have been having a very hard time of late years—an exceedingly hard time. I should not want any additional burden placed upon them unless it were absolutely necessary.

Mr. GRAY. Certainly not.

Mr. GALLINGER. Perhaps the Senator from Utah can give us the information.

Mr. CANNON. We have to buy the paper from the State of the Senator from New Hampshire, and if we can get a proper tariff on alum clay we will have something with which to make the purchase and to pay the bills.

If it would be more satisfactory to the Senators who are interested for or against this proposition, I shall withdraw the amendment at the present time, or will ask that it may go over until such time as we can produce the desired information.

Mr. GALLINGER. I think that ought to be done.

Mr. CANNON. I will do that.

Mr. PLATT of Connecticut. There must now be a duty of $2 a ton upon this clay under the clause of "Clays, unwrought or unmanufactured." I do not know what the paragraph is.

Mr. ALDRICH. Paragraph 88.

Mr. CANNON. It is $1 a ton.

Mr. PLATT of Connecticut. One dollar per ton.

Mr. CANNON. It is $1 per ton, under "Clays, unwrought or unmanufactured."

Mr. PLATT of Connecticut. This would be $11.20 a ton—a half cent a pound.

Mr. CANNON. Yes, sir.

Mr. PLATT of Connecticut. That is a pretty large increase.

Mr. CANNON. The present duty is one-twentieth of 1 cent per pound.

The VICE-PRESIDENT. The Senator from Utah withdraws the amendment.

Mr. CANNON. I do not withdraw it. I ask that it may go over.

Mr. ALDRICH. There is no objection to the Senator having the right to offer the amendment at any time he sees fit. It is not necessary to pass over the paragraph. We will have it understood that the Senator has a right to renew his amendment.

The VICE-PRESIDENT. That will be the order.

Mr. JONES of Arkansas. I wish to make a suggestion as to the first line of paragraph 4. I do not know anything about it personally, but I understand that there are practically no importations of hydrate of alumina, but that there are large importations of anhydrous alumina, and the adding of these words to the bill will have the effect of taking that article, which is largely imported, out of the operation of the law. I suggest that it be passed over until it can be investigated, unless the Senator from Rhode Island is satisfied.

Mr. ALDRICH. I am satisfied that it is right, and to put in anhydrous alumina would not be right. But I am willing to pass over the paragraph if the Senator desires.

Mr. JONES of Arkansas. I merely wished to make the suggestion. My information was that it was probably a mistake.

Mr. ALDRICH. No; this is the way the committee prefer to have it, and it suits their wishes; but of course, if the Senator has some other proposition, we will pass over the paragraph, if he desires.

Mr. JONES of Arkansas. I know nothing about the matter.

The reading of the bill was resumed. The next amendment of the Committee on Finance was, in paragraph 5, line 1, page 3, before the words "of 1 cent," to strike out "one-half" and insert "three-tenths;" so as to make the paragraph read:

5. Ammonia, carbonate of, 1½ cents per pound; muriate of, or sal ammoniac, three-fourths of 1 cent per pound; sulphate of, three-tenths of 1 cent per pound.

The amendment was agreed to.

The next amendment was, on page 3, to strike out paragraph 6, as follows:

6. Argols or crude tartar or wine lees, crude, containing not more than 40 per cent of bitartrate of potash, 1 cent per pound; containing more than 40 per cent of bitartrate of potash, 1½ cents per pound; tartars and lees crystals, or partly refined argols, containing not more than 90 per cent of bitartrate of potash, and tartrate of soda or potassa or rochelle salts, 4 cents per pound; containing more than 90 per cent of bitartrate of potash, 5 cents per pound; cream of tartar and patent tartar, 6 cents per pound.

And insert in lieu thereof:

6. Tartrate of soda and potash, or Rochelle salts, 3 cents per pound; cream of tartar, 5 cents per pound.

The amendment was agreed to.

The next amendment was, on page 3, after line 16, to insert as a new paragraph the following:

7½. Bleaching powder, or chloride of lime, one-fourth of 1 cent per pound.

Mr. GRAY. Mr. President, I wish to pause on paragraph 7½. As the enumerations of the paragraphs would indicate, this is an afterthought, and has been put into the bill at the very last moment as a duty upon an article which has heretofore been free.

Bleaching powder, or chloride of lime, is a material very extensively used. It is one of the most important and essential materials in the manufacture of paper and paper pulp. The pulp makers of the United States who make the raw material, so to speak, for the paper manufacturers, depend entirely upon chloride of lime as a bleaching powder. It was free under the McKinley Act, and it is free under the present law.

It is pretty well known—I think I know it pretty well from personal observation—that the paper manufacturers of this country, through the tremendous development of their industry and the competition which it has created, and for other reasons, are now in a very depressed state. They are making, I am told by those in my own State engaged in the business, and who ought to know, no profit at all, but are getting along by the momentum of their great concerns, in order to keep their labor together and not have it scattered, hoping for better times. This would be a very cruel blow to the industry. It would be a burden that they ought not to be called upon to bear, and I do not believe that there is any sufficient reason or any ground whatever, whether a man believe in protection or free trade, why an industry employing thousands of laborers and so essential to the civilization of the country and the world as is that of paper making should be burdened in this way.

I should like to hear why, at the very last moment, after the article had been left free under the McKinley Act, free under the present law, free in the bill as it came from the House, it should

come from the Senate committee with a tax interpolated, as it seems to be, it being paragraph 7¼. In the first copy of the bill which I saw not only was it not dutiable, but it was on the free list; and I do not know but that now it is on the free list in the print I hold in my hand.

Mr. GALLINGER. I will say that since the bill was reported the Senator from Rhode Island has offered a printed amendment to take it from the free list.

Mr. GRAY. At all events, it was on the free list, and seeing it on the free list in the bill as it came here, I informed the persons in my own State who are very much interested about the imposition of the tax that the article was still on the free list, and much to their joy, no doubt, they received that information.

I afterwards found—it was pointed out to me by the Senator from Iowa—that it had been placed, as we have it here, interpolated, as a taxed commodity. I hope that the Senate will not feel that it is necessary to put this isolated article upon the dutiable list, entering as it does into so important an industry and an industry which is so widely diffused over the country. There is hardly a State in the country that has not a pulp mill. I know that in my own State it is a very important industry. I know that in the State of Pennsylvania, in all portions where poplar forests are found, it is a very widespread enterprise and is pursued with a great deal of assiduity, and heretofore has been a profitable and flourishing industry. But at the present time it is not in a situation to bear the additional burden, and I beg that the burden may not be placed upon it. It seems like a wanton exercise of our power for purposes of taxation or protection or whatnot so to burden this very important and worthy class of our community.

I am informed that it is very hard to manufacture chloride of lime in this country; that there are climatic reasons which make it not a profitable industry in this country, and it can not be made so without this support from the Government. I think our paper makers ought to have access to the natural sources of supply and not be compelled to build up an industry that does not naturally belong to our soil and that is driven from it naturally by the dryness of our climate and other reasons that make it not a profitable industry here. I do not think the people ought to be called upon to make it profitable, and make it a tax and a burden for that purpose on the paper manufacturers and through them indirectly on the whole people.

Mr. ALDRICH. I do not quite understand what the Senator means by stating that the committee inserted this paragraph at the last moment. It was inserted in the bill as it came from the committee and was put in in its regular order when it was reached in consideration.

Mr. GRAY. It has an earmark, I will say to the Senator from Rhode Island, for one thing, that confirmed my suspicion. I may be wrong, of course. It is numbered 7¼.

Mr. ALDRICH. We numbered the intermediate paragraphs as new paragraphs in that way.

Mr. GRAY. There is paragraph 6, which is a new paragraph.

Mr. ALDRICH. Paragraph 6 takes the place of paragraph 6 stricken out. That is not a new paragraph inserted.

Mr. GRAY. The Senator from Rhode Island is right about it.

Mr. ALDRICH. The United States consumes about $2,000,000 worth per annum of bleaching powder. It is practically supplied by one concern, the United Alkali Company of Great Britain. Although a manufactured product, it is upon the free list. The fact that it is upon the free list has allowed the United Alkali Company to monopolize the American markets. The elements that enter into this product are salt and lime, which are found in the United States in a great many places and in a great many places in juxtaposition.

There is no climatic or other reason why bleaching powder should not be made in the United States; and it is successfully made in the United States to-day by a newly discovered process, by which electric power is used in the treatment of the salt instead of the old process, which was entirely different. By this process, which is a very simple one, the brine is run over mercury, and electricity is run through the brine, producing the chlorine gas which is taken up in the lime deposits in another part of the apparatus; and the resultant product runs off as soda ash almost entirely pure, it being a process which produces bleaching powder much more successfully and more cheaply than it has ever been produced before by any other process.

Mr. GRAY. Then I ask the Senator, if he will allow me——

Mr. ALDRICH. Certainly.

Mr. GRAY. Why does it need protection if it can be produced more cheaply than it was ever produced before?

Mr. ALDRICH. It can be produced just as cheaply in Great Britain or Germany as here by the same process.

Mr. GRAY. But is not the process that you speak of protected by patents there as well as here?

Mr. ALDRICH. Yes, sir; undoubtedly.

Mr. GRAY. They have the protection of a patent that would prevent competition in the United States. Anybody who chooses can not participate in that patent, and that creates a monopoly such as patents create. I am not finding fault with that in proper cases, but it does create a monopoly for those who own the patents.

Mr. ALDRICH. But the trouble with the Senator's argument is that the patents are not owned by the same people. The patents are not owned by the same people in Great Britain, Germany, Belgium, and the United States. The American company which undertakes to make that process and use it here is obliged to compete to-day with the United Alkali Company, which controls the patents of Great Britain, and makes bleaching powder not alone by this process, but by other processes, and they have cheaper labor and cheaper materials, cheaper salt and cheaper limestone, on account of the difference in labor between the two countries.

So far as the paper makers, the pulp makers, who do use this material very largely, are concerned, they are all, or substantially all, so far as I am aware, agreed that it would be a good thing to place this article on the dutiable list. They believe that with the result which has been attained in the manufacture of soda ash, which is a substance somewhat analogous, being made also from salt, the price of the product and the article in the United States will be reduced by American competition. I think it is absolutely safe to assume that within five years we shall be making the entire amount of bleaching powder that is used in the United States, and it will be sold at a very much less price than when it is all imported by one concern—the United Alkali Company—from Great Britain.

Mr. GRAY and Mr. QUAY addressed the Chair.

The VICE-PRESIDENT. The Senator from Delaware.

Mr. GRAY. I will yield to the Senator from Pennsylvania.

Mr. QUAY. I was about to state that my attention was called to this clause of the bill for the first time this morning by a paper manufacturer from Pennsylvania. I have not had time to look into it, and I should be obliged to the Senator from Rhode Island if he would allow it to be passed over for the present.

Mr. ALDRICH. I have no objection to that course.

Mr. GALLINGER. Before that is done, I should like to put in the RECORD a statement on this point. I may not be present when it comes up again.

I sympathize very profoundly with anything that concerns either the industry of wood pulp or paper manufacture, because my immediate constituency is very largely interested in both those processes. Yet I am in possession of some information that it seems to me overcomes any objection that I might have on general principles to the imposition of an added burden, if this shall prove a burden, upon the manufacturers of paper in my State or community. I have here two letters from a gentleman connected with the chemical department of the New Hampshire College, at Durham, N. H., which is an agricultural college largely. His letters are brief, and I want to read what he says on this subject, and I should like to have the attention of the distinguished Senator from Delaware while I read them. These letters are from Charles L. Parsons, who is a professor in the chemical department of the New Hampshire College of Agriculture, at Durham, and in my State. He says:

> Some four years ago an American company, the Electro-Chemical Company, of Rumford Falls, Me., was formed with a preferred capital of $300,000 to manufacture caustic soda and bleaching powder under American patents. Fair profits seemed certain. Prices, however, greatly declined, and we have lost money almost continuously. A prohibitive duty has now been incorporated in the Dingley bill against our sole raw material, salt, so that we must purchase from New York at an advanced price of almost 25 per cent. Accordingly, it would seem that this industry, which promises almost as much as the tin-plate industry to American capital and labor, must succumb unless we are protected from the United Alkali Company of Great Britain by a fair duty on caustic soda and bleaching powder. We now have an output of over 300,000 pounds a month, and this could be very largely increased if there was any profit to the company, which at present there is not. On the contrary, we are simply holding together in the hopes of higher prices soon. I am personally a heavy stockholder in the company, and in the four years have never drawn a cent on the money invested, and am accordingly deeply interested.

In a subsequent letter, written only a few days ago, the same gentleman says:

> We started under a duty of 1 per cent on caustic soda, and this has been cut in half by the Wilson bill. Bleaching powder is now on the free list, and as we can soon produce, with anything like a fair market, a large part of that imported, we feel that we ought to have at least one-half per cent on bleaching powder. We are the only producers in the country, but another prospective company is asking for a higher rate.

I understand that this company are not the only producers in the country. The Senator from Connecticut [Mr. PLATT] calls my attention to the fact that there is a company, I think, incorporated in his own State.

Mr. PLATT of Connecticut. No; in Rhode Island.

Mr. GALLINGER. In Rhode Island, and operating at Niagara Falls——

Mr. PLATT of Connecticut. And in Virginia.

Mr. GALLINGER. And in Virginia, and is producing a very large amount of bleaching powder at the present time.

We feel that we are working under patents which, when we get a fair start, will enable us to compete with any process in the world when we are on an equal basis. Once well under way a great industry will have been established in America, the product of which is now wholly imported from England with the exception of the 300,000 pounds which we are making monthly.

There came into my possession, in one of these letters, I think, a copy of a letter addressed to the junior Senator from Massachusetts [Mr. LODGE] from the president of this Electro-Chemical Company, located in the State of Maine, and I want to read, with the Senator's permission, some extracts from that letter:

As the question of a duty on chloride of lime, or, as it is commercially designated, bleaching powder, is now before the Senate, as a representative of the only concern at present actually making the article in this country, I take the liberty of writing you a few particulars. The Electro Chemical Company, of Rumford Falls, Me., has been making the article for some years and struggling against the difficulties of an entirely new process, handicapped by cheaper labor and raw materials in England and on the Continent.

Our principal raw material is salt, and our product is bleaching powder and caustic soda. To add to our difficulties, the duty on caustic soda was reduced from 1 cent per pound to one-half cent per pound.

Salt.—We are using American salt at $1.35 per ton of 2,000 pounds at the mine, which, with freight at $4 a ton from Livonia, N. Y., to our works, made the cost $5.35 per ton of 2,000 pounds delivered at our works at Rumford Falls, Me. With English salt as it is under Wilson bill free, costing us $2.44 per ton of 2,240 pounds at Portland, Me., and freight $1.25 per ton, or $3.70 delivered at the works, we have been rapidly increasing our output and getting ahead very slowly.

The Dingley bill proposes a duty of 8 cents per 100 pounds on salt, and to offset this we certainly should have a duty on bleach.

This is an infant industry, and with reasonable protection a few years would see all of the article consumed in the country made here. The trade is an important one, and will not be given up by the foreign makers without a struggle, and the duty would not serve so much to increase the price as to protect a severe decline, as increased production here would mean a competition for the trade, which would result in lower prices.

In spite of improved processes, the cost of manufacture must always be greater in this country, as we have to contend against cheaper labor, cheaper raw materials, and a concentration of these, saving all freight charges and other expenses incidental on bringing the raw materials to the power, or the power to the raw materials. The power of course must be either water power or coal.

With protection given to all the other industries, we are certainly entitled to consideration.

We ought to have a duty of one-half cent per pound on bleach, etc.

Mr. President, I have been impressed with these statements, coming from reliable persons, and if this industry is making the progress that it seems to be making, and that under circumstances which preclude them from any present profit on their product (as these gentlemen state that to be a fact, and I am bound to believe it), it appears to me that notwithstanding this imposition of a duty may possibly work to the slight detriment of the paper interests of the country, we ought to protect this new industry and give it a helping hand, with a view, as the president of this company says, to producing in the near future all of this product that will be consumed in the country.

Mr. GRAY. How long has that company been in existence?

Mr. GALLINGER. I confess I do not know. I think the date is not stated here. Some four years ago, Mr. Parsons writes, it was formed.

Mr. GRAY. Four years ago?

Mr. GALLINGER. Four years ago, he states, the Electro-Chemical Company, of Rumford Falls, Me., was formed. He does not state when it commenced operations. Quite likely a little time after that.

Mr. GRAY. They seem to have succeeded in getting along pretty well up to this time, and I do not see why they should seek an additional subsidy, especially at the expense of an industry quite as worthy as their own, and that being an industry which concerns a raw material so widely used and entering into a product that requires the labor of so many thousands of men, scattered all over the United States, I do not see why we should consider that as being a parasite on this other industry. I do not use that term in any disrespectful sense, of course.

Mr. GALLINGER. Of course there may be a difference of opinion as to what is meant by getting along pretty well. This gentleman in my own State, who states that he has large investments in this company, says they—

Are simply holding together in the hopes of higher prices soon. I am personally a heavy stockholder in the company, and in the four years have never drawn a cent on the money invested, and am accordingly deeply interested.

Professor Parsons states the fact, as I know, knowing the gentleman as well as I do, and I would say if the Senator from Delaware or any other Senator had made an investment in a concern of this kind or any similar enterprise and had not drawn any dividends for four years, and had not made any profits, he would not think he was getting along very well.

Mr. GRAY. No; I would not, and it is quite likely the Senator's friend, Professor Parsons, is a very worthy gentleman, and has embarked his capital in an enterprise that is not paying him. But why should he seek to recoup his losses out of other industries that are already staggering along under the depression which everywhere prevails in the paper-making industry or the pulp-making industry?

Mr. GALLINGER. I scarcely think that is Professor Parsons's idea at all.

Mr. GRAY. I do not believe that he has that unworthy idea at all. Do not understand me as imputing that to him.

Mr. GALLINGER. Certainly not.

Mr. GRAY. But it is the selfishness of human nature operating within its own sphere that governs the transaction.

Mr. GALLINGER. They have $300,000 invested; and I understand that the company which has an investment at Niagara Falls has something like $1,250,000 or $1,500,000 invested. If these men have that large amount of money invested, and are not making any money, and are in competition with a great concern in England that has cheaper labor and cheaper raw materials than they can procure, it is very natural, and I think very proper, that they should ask us in a tariff bill to pay some little attention to their interests.

Now, Mr. President, a single word more and I am done. So far as the paper interests of my State are concerned, I have had only one suggestion from them regarding this matter. No manufacturer of pulp has written to me about it at all, but one paper manufacturer did, in a private letter a little time ago, say incidentally that he thought there ought not to be a duty imposed on bleach. In behalf of the paper interests of the country, it must be gratifying to the Senator from Delaware, as it is to me, to believe that under the proposed law they will be somewhat better taken care of than they are under the existing tariff law, and that if we pass this bill, even though we do them a little harm, possibly, in imposing this duty, we are legislating for them in such a way, so far as their own product is concerned, as very likely to more than compensate them for any little loss they might sustain.

Mr. ALDRICH. Mr. President——

Mr. QUAY. I understand that the clause has gone over.

Mr. ALDRICH. Yes; but I want to say just a word to the Senator from Delaware. I should like to have the Senator state one single reason why there should be a duty upon paper or any of its products that does not apply with equal force to the article which we have under consideration.

Mr. GRAY. I have this to say: I am not in favor of high duties on anything, or protective duties so called, as the Senator knows; but here are industries like the paper and pulp industries that have existed in the United States for a great many years. They have grown up largely upon the faith of a protective tariff, I suppose—some protection—but at all events, however supported or whatever depending upon them, have become institutions of the country, and they have entered into the daily industrial life in this country, and in a very large way, too; they have employed a great many thousands of hands, and their product amounts to a great many millions of dollars.

I have stated that that industry is now, like many others, in a depressed condition; that factories I know (I am told by those connected with them who are entirely credible gentlemen) are barely able to meet expenses, and if it were not that their labor would be scattered if they were to close down, they would close down, for they are making substantially no profit. It is a pretty serious thing to close down a concern employing several thousand hands and expensive machinery and intricate processes, and they have got to keep together as long as they can in order not to suffer a greater loss by the mere act of closing.

That is the condition of the paper manufacturers of the United States, and on the principle of the Senator from Rhode Island, upon his theory of what a protection bill ought to be (I am not controverting now the general principle, one on which he and I differ), it seems to me that it would be unwise to burden that widespread industry with a new tax on the essential raw material of their manufacture.

Mr. GEAR. The Senator from Delaware very properly admits that the great industries like paper and pulp manufacture have grown up and been developed under the protective system. That I believe to be true. It is the object of this bill, I understand, and of this clause to build up just such a development of the manufacture of that article as has been developed in the pulp and paper industry.

Mr. ALDRICH. Mr. President, a single word more, and then I shall not take the time of the Senate further.

This duty is not a large duty. It is 16 per cent ad valorem practically, a very small duty, much less than the average duties on paper. I do not believe myself that it will be a burden upon the paper industry. If I did, perhaps I might not be willing to support it. I am certain that in time the paper makers will buy their bleaching powder at a less price than they pay for it now.

Mr. GRAY. Has it always been free?

Mr. ALDRICH. It has been free for some time.

Mr. GRAY. I should like to know. I ask for information.

Mr. ALDRICH. It has been free under the last two or three tariffs.

Mr. BURROWS. Mr. President——

Mr. GRAY. I am not going to interrupt the Senator except to

state that I have something more to say, but I understand at the request of the Senator from Pennsylvania, in which the Senator from Rhode Island acquiesces, this matter will go over for the present.

The VICE-PRESIDENT. That is the agreement. The Senator from Michigan.

Mr. BURROWS. Before the item goes over, I ask to have printed in the RECORD a statement so comprehensive and so intelligent that I am sure it will throw light upon this subject. I have several letters from my own State in relation to this matter, in one of which it is said:

Some time since I wrote you relative to a tariff on chloride of lime or bleaching powder. I called your attention at that time to the fact that almost all our bleaching powder is furnished by an English syndicate with a capital of $35,000,000 back of them.

Mr. Herbert Dow, who by his genius has revolutionized bromine making in America, has invented a new process for manufacturing chloride of lime and bleaching powder, so that he can make the commodity at considerably less expense than by present methods.

I also have letters from parties in Cleveland, from an institution called "The Dow Process Company," in which they say:

We beg to call your attention to the inclosed petition, signed by some of the citizens of Cleveland.

During the past year and a half we have been perfecting a process for the manufacture of bleaching powder, and now that we have accomplished our object, we are ready to start a five hundred-thousand-dollar plant for manufacturing on a large scale.

In order to secure some protection from the United Alkali Company of Great Britain, who, having a capital of $35,000,000, now control the market and supply nearly all that is used in this country, we ask for a tariff of one-half cent a pound.

I desire to have another article read and printed. I desire to call attention to the following statement in it:

In the almost exactly parallel case of soda-ash manufacture there was no headway made in manufacturing it in this country until a protective tariff was placed upon it, and now American competition has lowered the price in England. On November 6, 1896, the chairman of the Society of Chemical Industry of Great Britain, in his annual address, said: "What I do fear is the coming competition with that remarkable race of English-speaking people, the Americans. America has made wonderful progress during the last quarter of a century in mechanical devices mainly, but she is now turning her hand to chemicals, and a sad mess she has already made with English prices."

The article is brief, and I ask that it be read. I think it throws light on the question.

Mr. GRAY. If that be so, I should like to ask the Senator from Michigan, why seek governmental aid? If they have already made this sad mess with English prices in bleaching powder, why do they ask for protection?

Mr. BURROWS. Let the article be read.

Mr. GRAY. Let it be printed. We will read it to-morrow.

Mr. COCKRELL. Let it be read.

The VICE-PRESIDENT. The reading of the paper is called for, and it will be read.

The Secretary proceeded to read the paper.

Mr. BURROWS. To save time, I ask that the paper be printed in the RECORD without reading.

Mr. ALLISON. That is satisfactory.

The VICE-PRESIDENT. It will be so ordered.

The paper is as follows:

The United States consumes yearly about $2,000,000 worth of chloride of lime or bleaching powder. It is practically all imported from the United Alkali Company of Great Britain, although small amounts have been received from the continent of Europe. None is made in the United States on a commercial scale, so far as we are aware, although one company at Erie, Pa., placed considerable amounts on the markets, but failed after a short existence. There are a number of firms, however, who are operating experimental works.

This manufacture is of such nature that it can not be profitably conducted upon a small scale. Capital is unwilling to invest large amounts on even terms with the United Alkali Company of Great Britain, with its $35,000,000 of capital, as they fear that a new company would be crushed before it became established, by the sheer force of immense capital, long experience, and a control of the present market, as was the tin industry crushed by Welsh combinations on three different occasions, according to Senator BURROWS, until sufficient tariff had been placed upon tin so that American manufacturers could pay American wages to American workmen and receive a fair profit under the beneficent working of the McKinley law.

In the almost exactly parallel case of soda-ash manufacture there was no headway made in manufacturing it in this country until a protective tariff was placed upon it, and now American competition has lowered the price in England. On November 6, 1896, the chairman of the Society of Chemical Industry of Great Britain, in his annual address, said: "What I do fear is the coming competition with that remarkable race of English-speaking people, the Americans. America has made wonderful progress during the last quarter of a century in mechanical devices, mainly, but she is now turning her hand to chemicals, and a sad mess she has already made with English prices."

We have an improved method of manufacture, and propose to invest $500,000 immediately, and enough more later to supply the entire United States demand, if we can be protected for a few years until we are well established. A duty of 1 cent per pound for five years, and one-half cent for the following five years, would be necessary, in our opinion, to place this industry where there would be no danger of foreign competition in an open market.

We wish to particularly call attention to the fact that soda ash has with protection continually fallen in price while bleach has been on the free list, and the price to-day, while lower than one or two years ago, is not as low as it was six years ago, and the general tendency during the past ten years has not been to make any marked reduction in price. With the protection asked we would be able ultimately to save to the country about $2,000,000 now spent abroad for bleach. If granted this protection we will immediately invest $500,000 of American capital now lying idle. We will necessarily employ a large number of American workmen at remunerative wages who are now out of work, or at least receiving very small wages during the present depressed condition of trade.

We will consume annually in this initial plant alone, after completion, 21,000 tons of coal, 3,700 tons of lime, 75,000 barrels, as well as quantities of other supplies. All the labor employed on the production of these supplies will be in addition to that now employed and will in no case be supplanting one American laborer by another.

To-day every enterprise in America using bleach is dependent upon a foreign trust. With a tariff you will make it dependent upon American capital and labor instead. Even the paper from which you read and upon which you write to-day depends upon an English industry to whiten its pages. So well has that English syndicate mastered the situation, that unless a tariff protective in its features is placed upon the product it is questionable if even American enterprise can hope to cope with them. We earnestly hope that the committee will find it compatible with the best interests of the country to grant our prayer.

Mr. ALLISON. I ask the Senate at this time to take up the conference report on the sundry civil appropriation bill, and I ask for a vote on concurring in the report.

Mr. ALDRICH. I will state, for the convenience of Senators, that it is not my purpose to proceed any further with the consideration of the tariff bill to-night. I shall be ready to have an adjournment after the Senator from Iowa shall have disposed of the appropriation bill in his charge.

SUNDRY CIVIL APPROPRIATION BILL.

The VICE-PRESIDENT. If there be no objection, the Senate will consider the conference report on the sundry civil appropriation bill.

Mr. WHITE. I inquire of the Senator from Iowa whether it will be necessary to consider that matter to-night? I am afraid it will lead to considerable discussion.

Mr. ALLISON. I will say to the Senator from California that for the convenience of the disposition of this bill at an early day it is important that it should be passed to-night. I have refrained from calling it up from time to time on account of the progress being made with the tariff bill, intending to do so somewhat earlier than now but for the fact that the question which has been under consideration seemed to be a pressing one and occupied much attention.

Mr. WHITE. I will say to the Senator from Iowa that some of us who have been paying very close attention to the tariff bill are interested in this matter, and I am certain that it will lead to discussion when taken up. I do not think it ought to be pressed to-night. Why can we not take it up to-morrow in the morning hour?

Mr. ALLISON. I can not think that the conference report will lead to any extended debate. The whole question is thoroughly understood by every Senator here, and if the report is not to be adopted I should be glad to know it to-night.

Mr. PETTIGREW. I hope the Senator from Iowa will let the conference report go over and ask to have it taken up in the morning hour to-morrow. There are two Senators absent this evening who did not know the report was to come up. I hoped they would come in. They wish to be present when this question is considered. I want to say that the report will lead to considerable discussion. So far as I am concerned, I should be willing to take it up to-night, but the absent Senators ought to be allowed an opportunity to be present.

Mr. ALLISON. I gave notice to every Senator who expressed an interest in the conference report that I should call it up this evening; and while I should be glad to accommodate Senators, I think we ought now to dispose of it.

Mr. WHITE. I do not wish to delay this matter unduly at all, but it appears to me that this is the usual hour to adjourn, and as there has been no serious effort, as the Senator from Iowa says, to bring this matter up before, it will not be amiss to let it go over. I am certain that there are some Senators who desire to be heard who are not here now, and who will feel that they are not being fairly dealt with if the consideration of the report is now proceeded with.

The Senator says he gave notice that the report would be taken up. I omitted to observe that fact or to hear the Senator, and only learned incidentally that it was coming up this evening. I am certain other Senators are in the same attitude.

Mr. CHANDLER. May I ask the Senator from Iowa if the report has been read?

Mr. ALLISON. The report has been read substantially.

Mr. CHANDLER. Then there is no necessity for reading it again.

Mr. ALLISON. No. If we are to progress with the business that we ought to progress with, we must not adjourn here every day at 5 o'clock in the afternoon, but we must attend to the necessary business and sit here long enough each day to do it. I should have no objection to putting this matter over until to-morrow but for the fact that it will consume that much time to-morrow which should be devoted to the tariff bill.

If we can not go on with the report to-night, I trust the Senator from Rhode Island [Mr. ALDRICH], who has charge of the tariff bill, will go on with that. I think, however, we can dispose of

the conference report to-night as well as we can to-morrow. It is in the nature of a privileged report, and the bill to which it relates is a very important one. It is necessary that it should pass at the earliest possible moment. Even if we consider it to-night, it may not become a law before the early part of next week, and I trust that Senators will not ask that it go over. It is thoroughly understood. The only question that is involved here is the question of forest reservations, and every Senator knows how he will vote upon that question, as it has been debated here over and over again. So I must insist on my motion. Of course if the Senate do not want to take up the conference report, that is another question, and they can vote down the motion.

Mr. PETTIGREW. One of the Senators from Washington and one of the Senators from Idaho expressed a desire to be present when this matter was disposed of and to be enabled to be placed on record on the question. Therefore it seems to me to be entirely proper that it should go over, and that the Senator from Iowa should not insist on its consideration at this time. I think it will be impossible to dispose of the report to-night if its consideration is insisted upon, and I think those Senators who are absent have a right to be present and participate.

Mr. ALLISON. I am told that one of the Senators from Washington will not be here for many days; the other is here at this moment; and whilst I should be very glad to accommodate any Senator, I must insist upon my motion.

The VICE-PRESIDENT. The Senator from Iowa moves to take up the conference report on the sundry civil appropriation bill.

The motion was agreed to; and the Senate proceeded to consider the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 16) making appropriations for sundry civil expenses of the Government for the fiscal year ending June 30, 1898, and for other purposes.

Mr. WHITE. I move that the Senate adjourn.

Mr. ALLISON. Upon that I call for the yeas and nays.

The yeas and nays were ordered; and the Secretary proceeded to call the roll.

Mr. GALLINGER (when his name was called). I have a general pair with the senior Senator from Texas [Mr. MILLS]. I transfer that pair to the junior Senator from Illinois [Mr. MASON] and vote "nay."

Mr. LODGE (when Mr. HOAR'S name was called). I desire to announce again that my colleague [Mr. HOAR] is paired with the Senator from Washington [Mr. TURNER], and I will let this announcement stand until my colleague's return.

Mr. SMITH (when his name was called). I am paired with the junior Senator from Iowa [Mr. GEAR], who is absent from the Chamber.

Mr. TILLMAN (when his name was called). I am paired with the Senator from Nebraska [Mr. THURSTON]. If he were present, I should vote "yea."

The roll call was concluded.

Mr. BATE (after having voted in the affirmative). I inquire if the Senator from Kentucky [Mr. DEBOE] has voted?

The VICE-PRESIDENT. The Senator from Kentucky has not voted.

Mr. BATE. Then I withdraw my vote. I am paired with that Senator for to-day.

The result was announced—yeas 14, nays 42; as follows:

YEAS—14.

Bacon,	Gray,	Murphy,	Walthall,
Caffery	Jones, Ark.	Pasco,	White.
Chilton,	Kenney,	Pettigrew,	
Cockrell,	Mantle,	Rawlins,	

NAYS—42.

Aldrich,	Elkins,	Lodge,	Quay,
Allison,	Fairbanks,	McEnery,	Sewell,
Berry,	Foraker,	McMillan,	Shoup,
Burrows,	Frye,	Mallory,	Spooner,
Butler,	Gallinger,	Morgan,	Stewart,
Cannon,	Hanna,	Penrose,	Turpie,
Carter,	Hansbrough,	Perkins,	Warren,
Chandler,	Harris, Kans.	Pettus,	Wetmore,
Clay,	Hawley,	Platt, Conn.	Wilson.
Cullom,	Jones, Nev.	Platt, N. Y.	
Davis,	Lindsay,	Proctor,	

NOT VOTING—32.

Allen,	George,	Martin,	Smith,
Baker,	Gorman,	Mason,	Teller,
Bate,	Hale,	Mills,	Thurston,
Clark,	Harris, Tenn.	Mitchell,	Tillman,
Daniel,	Heitfeld,	Morrill,	Turner,
Deboe,	Hoar,	Nelson,	Vest,
Faulkner,	Kyle,	Pritchard,	Wellington,
Gear,	McBride,	Roach,	Wolcott.

So the Senate refused to adjourn.

Mr. MANTLE. Mr. President, I voted in favor of adjournment at this time because I felt, on account of the importance of this question, every member of this body who has heretofore voted in favor of the proposition to revoke the orders of President Cleveland in regard to these forest reservations ought to be present and ought to have an opportunity to vote upon the report of the committee of conference at this time. I did not happen to be present when this subject was discussed, being absent on account of illness, but there is nothing that I can say to add to the force or clearness or emphasis of what was said upon that occasion in favor of the total revocation of those orders.

So far as that portion of the conference committee's report is concerned which provides that these revocations shall only extend until March 1, 1898, is concerned, I sincerely hope that the Senate will not concur in it. I say this in all deference to the committee of conference, but from a most earnest belief that to adopt that amendment will simply be perpetuating the great injustice and wrong which was done in the original orders. If those orders are wrong now, if they contain an injustice to the people of those States, as they undoubtedly do, they will be wrong on the 1st of March next, when it is proposed that they shall again come into force. I believe it would be much better and much wiser, as the Senate has twice by an overwhelming majority adopted an amendment absolutely revoking these orders, that it should now insist upon that proposition.

I need not reiterate the great harm that will result to the material interests of the people of those States if these orders are permitted to stand at this time, or if they are permitted to go into force at any future time. That has been sufficiently dwelt upon by Senators heretofore. I can not find language strong enough with which to express my indignation against the wrong contained in those orders of President Cleveland. Should they be carried into effect, there is no question in my mind but that they would result in the stoppage of a great portion of the industries of the State which I have the honor in part to represent.

As has already been said, the great industry of that State is the mining industry. That industry is dependent wholly upon its supply of timber for its maintenance and existence. To attempt in any manner to curtail that supply, as is contemplated and as would result in the execution and the carrying out of those orders, would mean the paralysis of that great industry in that State and the throwing out of employment of thousands of laboring people. It will be answered that the amendment as proposed by the conference committee does away with any possibility of this character for the reason that it revokes the orders until March 1, 1898. That is true; but there is another phase to this question.

The orders in and of themselves are wrong; they are inherently wrong; they are unjust; they were made in ignorance, without any examination or investigation of the territory set apart as forest reservations. It was, I was going to say, an insult to the people of those localities. I do not know but that I ought to use that word. It certainly was a gross violation of their rights. It interferes with every interest in which they are directly concerned. There was no excuse for it in the first place; there was no demand for it. Not a single individual in any of the States concerned, so far as I know, was ever consulted before the orders were made, nor was any single representative of any of those States in this body conferred with or questioned in regard to what the effect of those orders would be.

Mr. President, I assert that the orders were made without knowledge of what their effect would be, absolutely without knowledge of what area they would cover, or with what interests they would conflict, or in what manner they would interfere with the vested rights and other rights of the people of those localities. Being unjust in the extreme, being wrong all through, having been conceived in ignorance, and having been made without examination or investigation by gentlemen who have never set foot upon any of the territory set apart, who have never pretended to make any examination of the localities which they set apart, who have made their examination and investigation riding upon a Pullman car and looking out of the car windows—in consideration of those facts, I assert that the orders were wrong in conception and in execution, wrong in every particular; and that, therefore, they ought not to be perpetuated even by inference, as is proposed by the amendment of the conference committee.

I do not think that a revocation of these orders could be construed into any discourtesy to the Administration as it now stands.

Mr. ALLISON. May I interrupt the Senator?

Mr. MANTLE. Certainly.

Mr. ALLISON. It is my desire, and my only desire, to get early action upon this report. I do not wish to press the Senator or other Senators unduly this evening, and if we can have an understanding that this matter shall be taken up early in the morning——

Mr. COCKRELL. Immediately after the morning business.

Mr. FRYE. After the reading of the Journal.

Mr. ALLISON. I will say after the Journal shall have been read, and that we have a vote upon it, say, at half past 1 o'clock, which, I trust, will give ample time for Senators to be heard who desire to oppose the report, I shall be perfectly willing that the

Senator may then continue the discussion, and that he be not required to go on this evening.

Mr. COCKRELL. For one morning, as there is no very important business, but only routine morning business, such as the introduction of bills, etc., we might take up the report after the reading of the Journal, and get through it, in all probability, by 2 o'clock.

Mr. MANTLE. I think we hardly ought to agree that the vote shall be taken at that hour. I am not desirous of consuming any amount of time myself. I want only to enter my earnest and most emphatic protest against the continuing in any form of those orders, because of the gross injustice thereby done to my people.

Mr. ALLISON. Will the Senator consent to a vote at 2 o'clock?

Mr. MANTLE. I am perfectly willing, but I want all those who are opposed to the acceptance of the conference report in this particular to have an opportunity to express themselves. It is a matter of great consequence, of vast importance to the people of our State. We feel deeply concerned, and we do not want to be forced into a vote until we have had at least our say, and had an opportunity to appeal to the members of this body to support us in the position we take.

Mr. ALLISON. I will ask the Senator if he will be willing to take the vote at 2 o'clock?

Mr. BERRY. Will the Senator from Montana permit me to say a word?

Mr. MANTLE. Certainly.

Mr. BERRY. I hope the Senator from Montana will agree to take the vote at the earliest moment possible. I am especially interested that the sundry civil bill shall be passed and become a law as early as possible. It contains an appropriation, which is made immediately available, for the purpose of closing the crevasses of the Mississippi River, which may be opened again by the June rise; and it is all important to a large number of the people there that the bill shall become a law, as I say, at as early a date as possible. I appeal to the Senator from Montana that he consent that the vote on the conference report shall be taken as early as we can take it.

Mr. MANTLE. I agree with what the Senator from Arkansas has said, but I desire that he should understand that this is a matter of great moment to the people whom I represent. I do not want to repeat what I said, but I say that the people of those States are deeply concerned over this matter, and they want to be heard. They want action, but they want that action to be just.

I have no desire to say anything further than to appeal to Senators here to stand by the action which they have already taken, which was just and proper; and I hope that in this particular they will not recede from the position which they have twice taken upon this amendment.

Mr. WHITE. I have no desire to delay this bill, as I said before. I never read the amendment until to-day. Perhaps it was my fault that I did not do so, but I was unaware of the presentation of the conference report. It was printed on May 25. I merely desire to call attention to a couple of matters in the bill, which would take no great length of time if I had the opportunity to get a few papers that I need for that purpose. Therefore I made the suggestion, not only in my own interests, but in the interests of other Senators who are not here, not for delay, but simply for reasonable time. I do not intend to enter into any elaborate discussion, and if I can have an opportunity to get the papers I desire to look at, there will be no difficulty, so far as I am concerned, in reaching a vote; but if we are to go on to-night, it will take me some little time.

Mr. CHANDLER. Are we to understand that the less time the Senator has, the longer the speeches he will make?

Mr. WHITE. My friend from New Hampshire is again upon the floor and obstructing the passage of the saving tariff bill. [Laughter.]

Mr. PETTIGREW. I think we can come to an understanding to take this matter up immediately after the reading of the Journal in the morning, and have a vote by 2 o'clock.

Mr. CULLOM. That is right.

Mr. ALLISON. Very well.

Mr. PETTIGREW. So far as I am concerned, I am willing to do that.

Mr. ALLISON. I think two hours will enable every Senator who desires to speak to do so. Let that be the understanding.

The VICE-PRESIDENT. Is there objection to the request made by the Senator from Iowa, that the conference report be taken up to-morrow immediately after the reading of the Journal and that the vote be taken at 2 o'clock? If there be no objection, that will be the order. The Chair hears no objection.

EXECUTIVE SESSION.

Mr. QUAY. I move that the Senate proceed to the consideration of executive business.

The motion was agreed to; and the Senate proceeded to the consideration of executive business. After ten minutes spent in executive session the doors were reopened, and (at 5 o'clock and 40 minutes p. m.) the Senate adjourned until to-morrow, Thursday, May 27, 1897, at 12 o'clock meridian.

NOMINATIONS.

Executive nominations received by the Senate May 26, 1897.

ENVOY EXTRAORDINARY AND MINISTER PLENIPOTENTIARY.

Charles Burdett Hart, of West Virginia, to be envoy extraordinary and minister plenipotentiary of the United States to Colombia, vice Luther F. McKinney, resigned.

SECRETARY OF LEGATION.

François S. Jones, of Louisiana, to be secretary of the legation of the United States at Buenos Aires, Argentine Republic, vice George W. Fishback, resigned.

ASSISTANT ATTORNEYS-GENERAL.

James Edmund Boyd, of North Carolina, to be Assistant Attorney-General, vice J. M. Dickinson, resigned.

John G. Thompson, of Illinois, to be Assistant Attorney-General, vice Charles B. Howry, resigned.

COLLECTOR OF CUSTOMS.

Kenneth R. Pendleton, of North Carolina, to be collector of customs from the district of Albemarle, in the State of North Carolina, reappointment, his present commission having expired by limitation January 10, 1897.

COLLECTOR OF INTERNAL REVENUE.

James S. Fruit, of Pennsylvania, to be collector of internal revenue for the Twenty-third district of Pennsylvania, in place of Edmund A. Bigler, removed.

INDIAN AGENT.

Lucius A. Wright, of San Jacinto, Cal., to be agent for the Indians of the Mission Tule River Agency, in California, vice Francisco Estudillo, term expired.

REGISTER OF LAND OFFICE.

Thornton S. Howard, of Des Moines, Iowa, to be register of the land office at Des Moines, Iowa, vice Edward B. Evans, resigned.

RECEIVER OF PUBLIC MONEYS.

John W. Miller, of Woodward, Okla., to be receiver of public moneys at Woodward, Okla., vice David H. Patton, resigned.

POSTMASTERS.

John I. Fullwood, to be postmaster at Cedartown, in the county of Polk and State of Georgia, in the place of Augustus J. Tomlinson, removed.

Kate E. Moore, to be postmaster at Geneseo, in the county of Henry and State of Illinois, in the place of Joseph L. Moore, deceased.

William H. Conger, to be postmaster at Plymouth, in the county of Marshall and State of Indiana, in the place of John C. Jilson, removed.

E. E. Buell, to be postmaster at Elma, in the county of Howard and State of Iowa, the appointment of a postmaster for the said office having, by law, become vested in the President on and after April 1, 1897.

P. D. McMahon, to be postmaster at Charter Oak, in the county of Crawford and State of Iowa, in the place of J. J. McWilliams, whose commission expired January 14, 1897. John H. Kuehl nominated to the Senate and confirmed March 1, 1897, but not commissioned.

Arthur D. Patterson, to be postmaster at Cresco, in the county of Howard and State of Iowa, in the place of Francis A. Glass, whose commission expired April 5, 1897.

Marcellus L. Hussey, to be postmaster at Guilford, in the county of Piscataquis and State of Maine, in the place of James Hudson, removed.

F. J. Heinemann, to be postmaster at Kirkwood, in the county of St. Louis and State of Missouri, in the place of Henry W. Hough, whose commission expired April 5, 1897.

Lewis F. Babcock, to be postmaster at Billings, in the county of Yellowstone and State of Montana, in the place of Edward W. Dunne, removed.

William H. Illian, to be postmaster at Humphrey, in the county of Platte and State of Nebraska, the appointment of a postmaster for the said office having, by law, become vested in the President on and after April 1, 1897.

Fred P. Dearth, to be postmaster at Woodsville, in the county of Grafton and State of New Hampshire, in the place of Solon S. Evans, whose commission expired January 7, 1897.

W. I. Norton, to be postmaster at Hightstown, in the county of Mercer and State of New Jersey, in the place of J. M. Smith, whose commission expired April 5, 1897.

Henry D. Bonnet, to be postmaster at Del Rio, in the county of Valverde and State of Texas, the appointment of a postmaster for

the said office having, by law, become vested in the President on and after July 1, 1893; Nora Boothe, having been appointed by the President, and by him nominated to the Senate, not having been confirmed.

Fred B. Kinsley, to be postmaster at Barron, in the county of Barron and State of Wisconsin, in the place of Henry G. Ellsworth, removed.

William F. Brittain, to be postmaster at Sheridan, in the county of Sheridan and State of Wyoming, in the place of Oliver P. Hanna, removed.

CONFIRMATIONS.

Executive nominations confirmed by the Senate May 26, 1897.

ASSISTANT COMMISSIONER OF PATENTS.

Arthur P. Greeley, of Concord, N. H., to be Assistant Commissioner of Patents.

EXAMINER IN CHIEF, PATENT OFFICE.

Thomas G. Steward, of Plano, Ill., to be an examiner in chief in the Patent Office.

RECEIVER OF PUBLIC MONEYS.

Ephraim H. Smock, of Buffalo, Wyo., to be receiver of public moneys at Buffalo, Wyo.

REGISTERS OF THE LAND OFFICE.

Frank D. Healy, of Beaver, Okla., to be register of the land office at Woodward, Okla.

Frederick A. Tritle, jr., of Prescott, Ariz., to be register of the land office at Prescott, Ariz.

Hiram Yerkes, to be postmaster at Fairmount, in the county of Vermilion and State of Illinois.

Samuel H. Watson, to be postmaster at Mount Vernon, in the county of Jefferson and State of Illinois.

Charles F. Douglass, to be postmaster at Ashland, in the county of Cass and State of Illinois.

Jasper H. Thornburg, to be postmaster at Boonville, in the county of Warrick and State of Indiana.

Daniel E. Sherman, to be postmaster at Montrose, in the county of Montrose and State of Colorado.

Ramsey Arthur, to be postmaster at Schoolcraft, in the county of Kalamazoo and State of Michigan.

William V. Molloy, to be postmaster at New Rochelle, in the county of Westchester and State of New York.

William A. Smyth, to be postmaster at Owego, in the county of Tioga and State of New York.

Ellsworth Sweet, to be postmaster at Waterloo, in the county of Seneca and State of New York.

Emmett B. Hawkins, to be postmaster at Huntington, in the county of Suffolk and State of New York.

SENATE.

THURSDAY, *May 27, 1897.*

Prayer by the Chaplain, Rev. W. H. MILBURN, D. D.

On motion of Mr. QUAY, and by unanimous consent, the reading of the Journal of yesterday's proceedings was dispensed with.

WICHITA INDIAN LANDS.

Mr. QUAY. I understand that there is a special order for this morning upon the report of the committee of conference on the sundry civil appropriation bill. The Senator in charge of that bill is not in his seat, and before he comes in I should be glad to have placed before the Senate, by unanimous consent, the resolution in relation to the Wichita Indians, which was before the Senate yesterday. I do not propose to proceed to its discussion, but I wish merely to have a paper bearing upon it read and then allow the resolution to go over until to-morrow morning. It will occupy but a moment.

The VICE-PRESIDENT. Is there objection to the request of the Senator from Pennsylvania? The Chair hears none, and the paper referred to will be read by the Secretary.

Mr. QUAY. It is a statement of fact, I think, prepared by the attorney of the Wichita Indians, and I ask to have it read and go into the RECORD. I do not know, I may say, that it will be necessary to press the resolution, as I am inclined to think that the Interior Department will take action which may obviate its necessity.

The Secretary read as follows:

Memorandum In re Wichita Indians.

The allotments now being made upon the Wichita Reservation are made under the authority of an agreement entered into between the Wichita and affiliated bands of Indians and the United States, dated June 4, 1891 (see page 64 of accompanying brief); by this agreement, after ceding their entire reservation to the United States and consenting to accept allotments of 160 acres of land each, by the fifth article of said agreement the Indians consented to submit to Congress the question as to what sum of money, if any, should be allowed to them for their possessory right in and to their lands in excess of their allotments.

The United States had, by its commissioners, offered these Indians $280,000, being about 50 cents per acre, for their surplus lands (see pages 60 and 61 of appended brief), but the Indians thought they were entitled to $1.25 per acre (see pages 62 to 64 of brief).

The Wichita Indians did not understand the nature of the claim of the Choctaws and Chickasaws which had been set up to this and other lands in the leased district for the first time by a memorial to Congress in March, 1890, and they proceeded in their negotiations to the final agreement of 1891 in ignorance of the named claim of the Choctaws and Chickasaws. The agreement of 1891 was ratified by act of Congress approved March 2, 1895, being the Indian appropriation act.

Between the date of the agreement of 1891 and the date of its ratification Congress had awarded to the Choctaws and Chickasaws $2,991,450 for the alleged right of those Indians (Choctaws and Chickasaws) in the Cheyenne and Arapahoe Reservation, the lands in that and the Wichita Reservation being in like case respecting the claim of the Choctaws and Chickasaws.

By the act of 1895, cited supra, ratifying the agreement of 1891, the claim of the Choctaws and Chickasaws in and to the lands of the Wichitas was sent to the Court of Claims, with the right of the Wichitas to be heard, the act further providing, however, that at any time during the pendency of the suit which the act authorized the Choctaws and Chickasaws might negotiate with the Five Civilized Tribes Commission respecting the subject-matter of the suit, and by consent of the Secretary of the Interior and Attorney General the suit should be suspended until such negotiation should be accepted or rejected by Congress.

On the 23d of April, 1897, an agreement was entered into between the Choctaws and Chickasaws and the Five Civilized Tribes Commission under which all claims of the Choctaws and Chickasaws are referred to the United States Senate as an arbitrator.

The negotiation by the Choctaws and Chickasaws of April 23, 1897, places them in a position, under the terms of the act of 1895, to suspend the action in the Court of Claims, the effect whereof will essentially be to leave the Wichitas without a forum to prosecute their demand for payment for their lands in excess of allotments. The pending action must die. By the terms of the act of 1895, the Wichita Reservation shall be opened to settlement within one year after the allotments are made to the Indians.

Wherefore, if the allotments are allowed to be made now, the Wichita Indians will, under existing laws, at the end of a year be stripped of the possession of their surplus lands, and, being forumless, they will be left with nothing but a naked and inchoate claim against the United States.

The allotting of their lands at this time can not be regarded as in their interests, because by it, under the law, they will be ousted of possession of the surplus lands without compensation or any definite arrangement looking to compensation respecting the same.

This course is particularly unjust because these Indians have been the possessors of the soil on which their present reservation is located from a time beyond their tribal traditions and coextensive with the earliest incursion of white explorers. (See brief, page 7 et seq.)

No treaty has ever been made between the United States and these Indians canceling their original right of occupancy.

There was an agreement made between Francis Walker, Commissioner of Indian Affairs, and these Indians, dated October 19, 1872, defining the boundaries of their present reservation, whereby, in consideration of the existing reservation being given to them, they ceded to the United States the claim to all lands in Louisiana, Texas, and Indian Territory, but that agreement was never ratified.

By treaty of 1818 with the Quapaws the United States nominally canceled the Indian title to the lands in question (see brief, page 10); also, by treaty with the Osages of 1825 the Osages' right was extinguished (see brief, page 187); but neither of these tribes ever actually occupied lands in the so-called "leased lands" or west of the ninety-seventh meridian, nor had the Quapaws any possessory right in and to lands west of the present western line of the State of Arkansas. On the other hand, the Wichitas and some of the affiliates have always lived within the so-called "leased district" and in the neighborhood of their present reservation.

The "leased district" is so called from the treaty of June 22, 1855, between the United States and the Choctaws, whereby, for $600,000, the Choctaws quitclaimed to the United States all of their pretended rights west of the one hundredth meridian, and perpetually leased the territory west of the ninety-eighth meridian for Indian occupancy. The "leased district" was, without qualification, ceded to the United States by the Choctaws and Chickasaws by the third article of the treaty of April 23, 1866.

The same tribunal which tries the alleged rights of the Choctaws and Chickasaws should also at the same time consider and determine the rights of the Wichitas and affiliated bands, because it is as impossible to fairly consider the claims of the one tribe or nation, without at the same time considering the other as it would be to consider the rights of one claimant upon a bill of interpleader to distribute a specific fund without at the same time considering those of all claimants to the fund or to hear the case of a plaintiff in a suit at la without hearing that of the defendant, and unless the Government proposes to pay twice for the land in question, the rights of the claimants must be disposed of together.

MAY 26, 1897.

NOTE.—The vital point, not brought out in the discussion yesterday, is: The Wichita Reservation will be opened to settlement by operation of law (act of 1895) within one year from the date of the allotments. Thereby the Indians will be ousted from possession. Under the agreement of April 18, 1897, between the Choctaws and Chickasaws and the Five Civilized Tribes' commission the court is subject to be ousted of its jurisdiction in the pending action. Thus the Indians will be deprived of possession and left without a forum to try their right to compensation. They should be left in possession until the question of compensation shall be determined.

Mr. QUAY. Now the resolution may go over, unless there is objection, until to-morrow.

The VICE-PRESIDENT. There being no objection, the resolution will lie over.

CHINESE EXCLUSION.

The VICE-PRESIDENT laid before the Senate a communication from the Attorney-General, transmitting, in response to a resolution of the 17th instant, certain information relative to the alleged illegal entry into the United States of Chinese persons; which, with the accompanying papers, was ordered to lie on the table and to be printed.

SPECIAL EDITION OF THE CONGRESSIONAL DIRECTORY.

Mr. GORMAN. I ask unanimous consent to have a resolution adopted, as I shall be compelled to leave the Chamber for a while.

The resolution was read, considered by unanimous consent, and agreed to, as follows:

Resolved, That the Committee on Printing be, and it is hereby, directed to prepare and have issued a special edition of the Congressional Directory for the use of the special session, and that the same compensation be allowed for the compiling and editing of said edition as is authorized by law for the regular edition, the same to be paid out of the contingent fund of the Senate.

SUNDRY CIVIL APPROPRIATION BILL.

The VICE-PRESIDENT. Under the unanimous-consent agreement yesterday, the Chair lays before the Senate the report of the committee of conference on the bill (H. R. 16) making appropriations for sundry civil expenses of the Government for the fiscal year ending June 30, 1898, and for other purposes. The report has been read, and the question is on concurring therein.

Mr. WHITE. I understand that the conference report is now before the Senate?

The VICE-PRESIDENT. The conference report is before the Senate.

Mr. WHITE. I wish to call attention to a matter in connection with the report upon page 3. I am disposed to ask for a call of the Senate. I think we ought to have a full attendance for the consideration of this matter. I suggest the absence of a quorum.

The VICE-PRESIDENT. The absence of a quorum is suggested by the Senator from California, and the Secretary will call the roll.

The Secretary called the roll, and the following Senators answered to their names:

Allison,	Foraker,	Mantle,	Rawlins,
Bacon,	Frye,	Mitchell,	Roach,
Bate,	Gallinger,	Morgan,	Sewell,
Berry,	Gear,	Murphy,	Shoup,
Butler,	Gray,	Nelson,	Spooner,
Cannon,	Harris, Kans.	Pasco,	Stewart,
Carter,	Hawley,	Perkins,	Turpie,
Clay,	Heitfeld,	Pettigrew,	Vest,
Cockrell,	Jones, Ark.	Pettus,	Walthall,
Davis,	Kenney,	Platt, Conn.	Warren,
Deboe,	Kyle,	Platt, N. Y.	Wellington,
Fairbanks,	McMillan,	Pritchard,	White,
Faulkner,	Mallory,	Quay,	Wilson.

The VICE-PRESIDENT. Fifty-two Senators have answered to their names. The Senator from California will proceed.

Mr. WHITE. I desire to call the attention of the committee having charge of the matter in the Senate to the portion of the conference report to which my criticism will be mainly directed.

To begin with, the subject of forest reservations has been gone into so fully heretofore that I do not intend to run over the general topic at all. My object in addressing the Senate is to point out the legislation which affects persons located as follows: A person duly qualified as a preemption settler or homesteader, under the laws of the United States, has acquired absolute title to a particular tract of land. He sells that land to another party, as he has a right to do, being vested with the fee. Then the Government places a reservation around him and includes the tract within the limits of the reservation, and the grantee is excluded from the use of that land. Now, how is his case dealt with in this bill or in this amendment? I am now considering amendment numbered 16, on page 3 of the printed report. We find the following:

Nothing herein shall be construed as prohibiting the egress or ingress of actual settlers residing within the boundaries of such reservations—

Now, recollect, this amendment refers to the actual settlers within the boundaries of such reservations—

or from crossing the same to and from their property or homes.

In other words, the amendment properly reserves and gives to actual settlers the power of egress and ingress, but it does not deal in the same way with one who has bought from a person who has acquired title from the Government of the United States. His case is dealt with in another place as follows. I read on the same page, beginning with the next paragraph:

That in cases in which a tract covered by an unperfected bona fide claim or by a patent is included within the limits of a public forest reservation, the settler or owner thereof may, if he desires to do so, relinquish the tract to the Government, and may select in lieu thereof a tract of vacant land open to settlement not exceeding in area the tract covered by his claim or patent; and no charge shall be made in such cases for making the entry of record or issuing the patent to cover the tract selected: *Provided further*, That in cases of unperfected claims the requirements of the laws respecting settlement, residence, improvements, etc., are complied with on the new claims, credit being allowed for the time spent on the relinquished claims.

Now, I will state my objection to the provision. A man who has bought land from a person who has acquired title in fee from the Government is not protected by the bill. He is inclosed within a reservation and is compelled to stay there, and the only relief which the bill gives him is the right to go and select land elsewhere. By what right, by what authority, by what principle of justice is the man who has acquired absolute title in fee compelled by the Government of the United States to exchange his property for something else? Why this duress? Is there anything immoral or wrong in the attitude of a man who has bought land from the owner, and from an owner who has in his hand muniments of title derived from the Government of the United States? Why should a man who is a settler and who has an inchoate claim be given a greater right than the grantee of the owner in fee who has acquired a patent?

I know four persons who are included within one of the California reservations in this way—that is, they have bought land from the patentee, acquired title to it, to some extent improved it, living some distance away from the reservation in the pursuit of their business, and their lands were taken into this reservation. They were not settlers within the technical interpretation of that phraseology, but they bought their land from the patentee of the Government of the United States; and now we say to them, "You can not enjoy your property; you are shut out from it; but we accord you the privilege of exchanging it for something elsewhere." The individual would not be permitted to do that, and can the Government of the United States, pretending to take an honest attitude in this matter, justify legislation discriminating against the man who has bought upon the faith of its own patent?

Mr. ALLISON. Will the Senator from California allow me to call attention to the matter he is now discussing?

Mr. WHITE. Certainly.

Mr. ALLISON. The first quotation made by the Senator from California is the exact phraseology of the amendment which was inserted by the Senate itself. The conference committee did not change that phraseology. We supposed in dealing with this question on behalf of the Senate that those friendly to these general provisions had made adequate provision as respects these actual settlers. So there is no change in this conference report so far as the first paragraph read by the Senator from California is concerned.

As to the second paragraph, the one which the Senator is now commenting upon, there is no change in substance. The phraseology inserted in lieu of the phraseology in the original Senate amendment was believed to be better by all those interested in this matter, and the phraseology was shown to a great many Senators. The Senator from California, perhaps, was not consulted in regard to that question.

Mr. WHITE. No, sir.

Mr. ALLISON. But it was believed by those who were interested in this matter that the phraseology here is better phraseology for the protection of persons having patents than the phraseology in the original amendment. Now, let me call the attention of the Senator to the original amendment, for which this is a substitute.

Mr. WHITE. I will be happy to hear it, of course, but it does not affect my argument in the slightest.

Mr. ALLISON. I understood the Senator to criticise the report of the conference committee, when, in respect to the matters which he criticises, there is no substantial change from the original amendment which was adopted by the Senate, and which was supposed to be satisfactory to those interested in this matter.

Mr. WHITE. Of course I am criticising the report; but there is nothing personal about it at all.

Mr. ALLISON. Certainly not.

Mr. WHITE. This is an omission. Whether the original Senate phraseology ought to have been more definite or not is entirely outside of the necessities of the present case. There has been a change, and I say now, when attention is called to this manifest injustice, it ought to be rectified; and I assume that no member of the conference committee on the part of either House would object for a minute to inserting three or four words which can be readily suggested, and which will cure this entire discrepancy.

But I will call the attention of the Senator, if I am not interrupting him too much——

Mr. ALLISON. No; you are not interrupting me at all.

Mr. WHITE. I call his attention to the second section, which seeks to deal with this subject. In redrafting that provision it would be very easy to protect the right of any owner of land included within a reservation, giving to such owner the right of egress and ingress. That is all I complain about. I think that that could be readily done, and I can not see that anyone would have any objection to it. If it has been heretofore omitted, either by failure on the part of myself or any other Senator to observe it, to know that fact would certainly be of no assistance to the settler or to the patentee of the land or the purchaser. What we want to do is to get it right.

Mr. ALLISON. I do not think there is the slightest trouble in respect to the matter now suggested by the Senator in the general phraseology as it stands. I am quite sure that persons owning lands within a reservation are not to be deprived of the right to enter upon those lands.

Mr. WHITE. Will the Senator show me any provision here giving such right? I know it has been denied by the officers of the Government, and they have been excluded by soldiers.

Mr. BERRY. Will the Senator from California state from what part of the report he is reading?

Mr. WHITE. I am reading from page 3, commencing "Nothing

herein shall be construed," and also the other subdivision, "That in cases in which a tract," etc.

Mr. BERRY. What is the point of which the Senator is complaining?

Mr. WHITE. My complaint is that the purchaser from a patentee of land under the Government of the United States, the patent issued under the Government of the United States, and the title perfected, can not enjoy the right of egress and ingress; that he is shut out, excluded.

Mr. CANNON. Before the Senator from California takes his seat, I should like to ask him for his construction of the language here.

Mr. WHITE. I yielded to the Senator from Iowa, and then I interrupted him more than I should have done.

Mr. CANNON. Very well.

Mr. ALLISON. All I desire to say in regard to this particular paragraph is that it was inserted for the benefit of those who, having land in a reservation, might, because of the reservation, desire to take land somewhere else, and if they so desire that the time they had resided on the land or whatever rights they had acquired in the land on the reservation should lap over, and they should have credit for it upon any new land that they might occupy.

Mr. WHITE. I appreciate the beneficent purpose involved. I am only calling attention to the phraseology, which is of such a character that it precludes from the beneficial operation of this section any owner of land who does not come within the technical meaning of a settler and discriminates in favor of the possessor of an inchoate title against one who possesses a title in fee.

Mr. ALLISON. Now, just one word, if the Senator from Utah will allow me.

The general scope and object we had in view was to give time to correct any error or imperfections in the provision, and it was chiefly for that purpose that we urged upon the conferees on the part of the House that it was necessary temporarily to open up the reservations absolutely for a period of time in order that new legislation, if any might be required, could be had in the two Houses before that time expired. It may be that there will be other imperfections. That this is one I do not know, but, if so, it can be easily corrected hereafter.

Mr. WHITE. I want to attract the attention of the Senate to a fact. It is not easy to correct these things hereafter. They can be corrected more easily now. But there is phraseology in the last paragraph I cited which would tend to negative the theory of the Senator as to the intention. Of course the intention can not govern when the phraseology is otherwise. That section gives a right to one who holds under a patent to exchange the patented land. It thus seems to dispose of his case. If there is any other place in the amendment where the holder of a title under a patent is allowed the right to go in and out of the reservation it has not been pointed out, and by judicial construction it can not be inserted in the absence of legislation. That matter is so important, involving the actual property and almost the whole possession of a number of people, that it seems to me it ought to be corrected when I presume no one will deny that such a provision would be eminently wise and absolutely just.

Mr. CANNON. I should like to get the Senator's construction upon another point. In the first paragraph read by the Senator from California occur these words:

> Nothing herein shall be construed as prohibiting the egress or ingress of actual settlers residing within the boundaries of such reservations.

Now, take the case, not an uncommon one, of a man who resides in a town located almost at the line, but outside of the reservation, and with the exception of his mere residence property he has all his land and possessions within the reservation, but does not reside there. Is there any protection accorded to him under this paragraph?

Mr. WHITE. My response to that interrogatory would be that it must be construed to have been the intention of Congress, in adopting this amendment, to confer its benefits upon actual settlers, as that phraseology is used in the land laws of the United States, and the word "residing" would be construed with reference to those laws. I presume that if he had a residence adequate to make him an actual settler under the land laws of the United States, he would come within the beneficial operations of that section. But the question of the Senator from Utah brings us back and suggests again the fact that while this provision protects the person whose title is inchoate, the person who has a title in fee and whose title has ripened into a perfect one is excluded from the enjoyment of his property.

Mr. CANNON. Do not the words "residing upon" raise a dangerous question, that no persons shall own lands in a reservation who do not reside there?

Mr. WHITE. It should be "bona fide settlers upon or owners within a reservation."

Mr. SHOUP. I desire to inquire of the conferees their construction of the proviso following the portion of the paragraph which has just been under discussion.

> *Provided further*, That in cases of unperfected claims the requirements of the laws respecting settlement, residence, improvements, etc., are complied with on the new claims, credit being allowed for the time spent on the relinquished claims.

I will state, for the information of the conferees on the part of the Senate, that on one of the reservations in my State (and there are over 4,000,000 acres taken bodily from the State of Idaho on the two forest reserves that have just been set aside) there is not a single acre of unsurveyed agricultural land. There are farms under a high state of cultivation on that reservation, with good dwelling houses, barns, and other outbuildings and well inclosed with fences. I ask the chairman in charge of this report if those farmers would be compelled under this provision to abandon their homes and all they could get credit for would be the time spent while on that reserve, and that to apply to some piece of land upon which they might locate in any other locality? Is that the construction?

Mr. ALLISON. Absolutely not. If they have any claim there, that claim can be perfected under the general provisions of the amendment, as I understand it. They are not obliged to abandon anything under this provision. It is only in case they desire to do so that the Government is directed here to protect them elsewhere, and give them the benefit of the time they have been upon the land within the reservation. So there is no trouble, I will say to the Senator from Idaho, on that point, as I understand it.

Mr. SHOUP. I will call the Senator's attention to another portion of the report with which I am not in accord. It is on the first page, the last subdivision of the first paragraph. The time fixed is the 1st of March next. In my judgment that does not give sufficient time, and if a time must be fixed it should be a later date. I would much prefer to have that clause stricken out altogether, leaving it entirely to the discretion of the President as to when the law shall go into effect. It will be after the 1st of July in the event this provision becomes a law before surveyors can be placed on the reservations to commence their active work. As to the Bitter Root Reservation, a portion of it lies very high, the altitude is great, and it will be impossible after the 1st of September to do much, if any, work in surveying that reservation. The same condition of affairs exists on some of the other reservations. Hence, in my judgment, if a time must be fixed, it ought to be extended far beyond the 1st day of March next, giving the Secretary of the Interior, the surveyors, and all who have any control whatever of the final settlement and location of these claims a longer period of time within which to do the work.

Mr. BERRY. Mr. President, I wish to state that when this amendment was originally presented to the Senate I voted for it, I supported it, and was in full sympathy with those in the West who are so much opposed to the President's order. I also voted that it was in order to place the amendment upon an appropriation bill. I have thoroughly and earnestly supported the view and contention taken by those residing in the States affected by the order of President Cleveland. I believed then and I believe now that the order was so extensive in its application, so illy considered, that it worked great injustice to those people, and I aided and supported them in every way possible.

But now, when the Senate conferees have obtained all that it is possible for them to obtain, when it has become evident that the sundry civil appropriation bill must fail unless some concessions are made by the Senate, the question arises whether we would be justified in standing by the amendment as originally agreed upon and make no concession and thereby defeat this general appropriation bill. I think that such action could not be defended. We can not have all things as we want them. I think when the Senate conferees secured the abolishment of the order until the 1st day of March, 1898, they secured all that it will ever be possible to induce the House of Representatives to agree to. It seems to me that if the lands are left open until the 1st of March Congress will have ample time, from the 1st of December, a period of three months, to correct any wrong or defect.

In addition to that, the amendment also provides that the President of the United States can absolutely revoke the Executive orders or any part thereof for all time. It appears to me that the friends of the measure secure practically all that they would have secured by the original amendment. Can any Senator from that section show me wherein they are injured, except in their desire, in which I sympathize with them, to wipe out an unjust order entirely, with which I say I fully agree? I am unable to see what they have failed to secure under the conference report, except the satisfaction of having the Executive orders revoked absolutely.

Now, I wish to say a word in regard to the contention of the Senator from California [Mr. WHITE]. The Senator from California contends that this language would be construed to prohibit anyone who owns land, unless he was an actual settler within the limits, from going to and from that land. I do not think it possible that any court or any Department would ever give such a construction to the section. I wish to call the attention of the

Senator from California to two or three words that he did not read, or at least that he did not emphasize. The section reads:

Nothing herein shall be construed as prohibiting the egress or ingress of actual settlers residing within the boundaries of such reservations, or from crossing the same to and from their property or homes; and such wagon roads and other improvements may be constructed thereon as may be necessary to reach their homes and to utilize their property under such rules and regulations as may be prescribed by the Secretary of the Interior.

In addition to that here follows this language:

Nor shall anything herein prohibit any person from entering upon such forest reservations for all proper and lawful purposes, including that of prospecting, locating, and developing the mineral resources thereof: *Provided*, That such persons comply with the rules and regulations covering such forest reservations.

Now, then, there is an express provision that any person can enter for all lawful and proper purposes under such rules and regulations as shall be made by the Secretary of the Interior. Does anyone suppose that a man fit to be Secretary of the Interior of the United States would under that provision make a rule and regulation that because a man happened to reside in a town beyond the limits of the reservation he could not be permitted to have egress or ingress from his home to his possessions therein? I think such a construction would be exceedingly technical and exceedingly narrow.

One word more, and then I will have concluded. I want to say that there are other great interests in this bill as well as that of the forest reservations. While, as I said, I fully sympathize with the gentlemen from the West, I believe they secure by this report all that it is possible to secure on an appropriation bill. There are vast appropriations in the bill for many purposes in which a great many people are interested. In regard to my own section of the country, there is an appropriation here of $2,900,000 for the purpose of repairing the levees and to improve the navigation of the Mississippi River, which is made immediately available. That is placed in this bill so that the appropriation can be used as soon as the bill is passed. By reason of the recent floods a great many crevasses were formed which permitted the water to sweep over a large section of the country. It has receded and they are now planting their cotton crops. There is a probability that there will be a rise toward the latter part of June, and unless those crevasses can be closed before that comes, misfortune will again visit those people, and the crops now being planted will be destroyed.

For this reason and many others, in which other parties are interested in the bill, I do not think we would be justified in rejecting the conference report and longer delaying the passage of the sundry civil appropriation bill.

Mr. KYLE. Mr. President, I want to say a word while this subject is under consideration. I had something to do with the formation of the amendment which has been referred to by the Senator from California [Mr. WHITE]. In fact, the whole amendment is practically the bill which was considered by the Committee on Forest Reservations one or two years ago. That bill was the outgrowth of a report made by a committee appointed by this body to investigate damages to residents on the Sequoia National Park, in California. I was a member of that committee, and visited the Sequoia National Park. We took the testimony of a large number of bona fide settlers. It seems that a colony had gone there a number of years ago, and had settled upon the lands before they had been declared to be a national park. Those parties were ejected therefrom, and were forbidden ingress to or egress from the park. There was a great deal of trouble upon the part of settlers. Owing to this the committee were sent out there.

I wish that these matters might be remedied in a better way than that indicated in the bill now before us. The committee reported that a commission should be sent out by the Secretary of the Interior for the purpose of ascertaining the damages done to settlers, make a report to Congress of their appraisement, and that the settlers should be recompensed by actual cash. I thought that was the proper policy; and I think so yet.

The amendment as it now appears in the sundry civil bill is to the effect that the parties who own lands in these reservations can choose lands elsewhere of the same amount, and can have the time credited to them which they have spent upon the land in the reservations. That may be in a sense a compensation, but a number of these parties have been forced from their claims and have gone elsewhere, and now are not in shape to take advantage of the Government's offer. A second homestead offer is a poor compensation.

In other words, Mr. President, I do not believe that a man or a family who settled upon these reservations in years gone by and established improvements—trees, buildings, fences, etc., as was indicated upon the floor a short time since in the case of a settler who had gone upon the Sierra Park reservation—can be compensated by being privileged to go upon Government lands elsewhere. The years of toil spent in making improvements would indicate that they should have something more.

I believe we should not agree to the conference report, but ask further conference, with the hope that a better solution be arrived at by the appointment of a commission to investigate the amount of damages done to these settlers.

Besides, as has been stated by the Senator from Arkansas [Mr. BERRY], the parties who live in towns adjoining the reservations are to be permitted, according to this report, to enter upon the reservations for all "lawful" and all "proper" purposes. I believe that refers merely to the privilege, for instance, of getting stock to and from the reservations, and does not refer, as indicated by the Senator from Utah [Mr. CANNON] and the Senator from California [Mr. WHITE], to the privilege of occupying the lands for stock or farming purposes.

A better provision, Mr. President, can be framed than that found in the pending bill, one that will be just not only to those who live adjacent to the reservations, but just to the parties who have been compelled to leave the reservations and who should be compensated by an actual cash settlement.

Mr. STEWART. I do not propose to enter into any discussion of the details of this amendment. I simply want to call the attention of the Senate to the great blunder which has been made in inaugurating a system which has led to such lamentable results.

It is very well for the Government of the United States to select particular localities which present novelties, curiosities, and strange developments of nature as places of resort, such as the Yosemite and the other great reservations, but to inaugurate a system of reservations in a country that is to be occupied by settlers is a most absurd proposition on its face. In the first place, it can in no view of the question accomplish any good. If large tracts of land are reserved and the people kept off of them, they will soon become barren of timber, for nobody will be interested in protecting the timber. As a rebuke to such a policy, it would be the desire of everybody that the standing timber should be destroyed by letting the Indians and others burn it as much as they please.

So far as the question is concerned of protecting the streams for irrigating purposes, the settlers themselves are the best guardians. They will fight against fires; and where they have cut off timber in all that mountain region, it takes but a few years for lands which can not be cultivated, which lie open, to have a new growth of timber, which is a better protection than the original forests, for it is thicker, more luxuriant, and better covers the ground.

Take California. There was a great waste of timber there in the early times in cutting down those magnificent forests; and we have heard much of the great evil that that would be to the sources of water supply; but when we go there now, we find those slopes which are not cultivated thickly studded with a new growth, which protects the water and shades the land better than the original forest. So you will find it throughout the Rocky Mountain region.

Besides, these reservations create great inconvenience. Here is one reservation which covers 21,000,000 acres of land. It is that peculiar character of land which it has been the policy of the Government to keep open for exploration and development for mining purposes; it is land in which the mines of gold—if you will not use silver—and of copper and of lead will be found, the very lands in which people are hunting for all kinds of metals, upon the mining of which they rely, and in which there is great wealth.

This reservation of 21,000,000 acres of land contains just the kind of land that is being explored by the pioneers of the Western country. Why should there be needed an edict issued from Washington that the people of the West should be excluded from the use of the country in which they live, and that it should be dedicated to folly—for it is nothing else, and it will accomplish no good purpose? Any person familiar with the situation, and who has been over that country and observed it with his eyes open, knows that the regions where people have not been able to settle at all are depleted by forest fires of all vegetation; but where inhabitants are scattered around, they will do everything they can to prevent those depredations. They will aid the Government all the while.

If you are to protect your streams, you must have it done by the people. Those people are not bad; they are as much interested as you are, and much more so, for their own prosperity depends upon the protection of the timber.

The idea, Mr. President, of allowing the organization of a bureau of theorists here, who have studied botany and some other things, perhaps, in the Old World, to manage these forest reservations, people who have never seen the country, is an outrage upon the West. The proof of their ignorance, if not of their vicious disposition, is that, without seeing or knowing the country, without examination, ignoring the provisions laid down in the law, without consulting the people there, and without exercising great precaution, they should in a mass select 21,000,000 acres of land and dedicate it to folly and barbarism, and it shows that they are utterly incompetent if they are honest. Such a bureau ought to be abolished and it ought not longer to be allowed a place in this country.

That order was a disgrace to American civilization. It took in towns which were post-offices; miners were excluded from their property without any investigation. What would you think if there should be reservations in West Virginia or Pennsylvania taking five or ten million acres of land, taking in your inhabitants, and excluding the people from using the land while it was being worked for coal? You would think it would be a pretty rough transaction. This is the same. Suppose you had a reservation covering those localities which stopped the whole business and excluded the people from the use of that country and its development.

The idea that a band of theorists should be organized in Washington and that such a bureau should find an Executive sufficiently ignorant of the situation to comply with their request is a marvel. It is true the last Executive went West in his early life to Buffalo, but those localities are away beyond Buffalo. The present Executive, I think, knows something more about them; and I believe if you who are in touch with the present Administration will represent to the Executive the hardships, the folly, the extravagance, and the wickedness of this order, he will set it aside in toto and resort to the great powers he has of regulating these reservations.

When a reservation is made by the Government of the United States, it should be made for some public purpose; it should be made with some intelligence. It is not the way to carry on the settlement of the country to make such orders as these. I tell you that that country can be left to the people in it with as much confidence as any section of any country on earth. They are as good as any other people; they are as much interested in their country, and they will do as much to preserve its timber and its water. They are public-spirited; they are enterprising men from all sections of the country who have gone to the West. They are wide-awake; they will do everything they can to prevent injury to their country. The idea of setting aside 21,000,000 acres of land, a large portion of which is occupied, and all of which is necessary for the general welfare of the country, is the most barbarous outrage that has been perpetrated in the last half century.

Mr. CANNON. Mr. President, we who desire to have the forestry reservation order revoked have our standing before the Senate simply by the courtesy and good will of the members of the Appropriations Committee and other Senators. With no desire to abuse the kindness they have shown, we appeal to the Senate that the conference report may be rejected, a further conference ordered, and a complete revocation of these orders had.

A more inhumane order was never issued by Executive authority than this; and with no desire to reflect upon the Executive who issued it, or upon the Eastern people, I say that if any man had desired to prevent the development of the so-called "undesirable" States in the West, he could not have proceeded upon more unjust and cruel lines to prevent that development than by the issuance of such an order.

The withdrawal of areas of land that are the best in several of the States where the orders were made equals in extent two-thirds of the entire area of the State of Illinois or the State of Iowa, and is not a very good encouragement to people to settle and build up, and certainly is in itself so rank an injustice to the people who inhabit those States that we think the Senate might well stand upon the plain principle of justice. I appeal to the chairman of the Committee on Appropriations, who has charge of this conference report, to further insist with the House of Representatives upon the original amendment.

Mr. President, in the State of Utah we are having withdrawn by Executive order all the desirable portions of the State not already settled. There is no opportunity there for further enlargement of civilization by the establishment of agriculture or mining. If this policy should be pursued, nearly a million acres of land, upon which 7,000 people depend for their maintenance, would be withdrawn, without their consent and against their interest, from the public domain, and there is nothing in the proposal of the conference committee which in any sense protects those people, because, as said by the Senator from Idaho [Mr. SHOUP], these lands are not surveyed. Seven thousand people, by their chosen representatives, petition this Senate, in a paper submitted on the 6th day of May, now lying upon the table, to have this order revoked, stating that if the order were enforced strictly according to its letter, they would either perish or have to abandon the possessions which they had toiled for years to gain.

It seems to me, with all respect to the view which has been presented by the Senator from Arkansas [Mr. BERRY], that this body could not do better at this time than to insist upon the original view of the Senate, which was for an absolute revocation of this order. I would not have the sundry civil appropriation bill utilized to carry anything extraneous or not of the most emergent character; but it is just as important to the people who inhabit those States as the appropriation for the Mississippi River is to the people who live in that section. It is very much more important to all of this country than the appropriations for rivers and harbors and other things which have crept into the sundry civil bill.

In behalf of the needs of the people, I feel grateful for the consideration the Senate has shown in allowing the amendment to go on the sundry civil bill when it was not technically entitled to be there, and having taken this step, I appeal to the Senate to stand by it.

It is a cruelty, an inhumanity, and a barbarity that such an order should be allowed to remain one day longer than the time necessary for Congress to revoke and correct the evils thereby created.

I do not have the same confidence that Senators have expressed in our ability to get a correction of this evil by other means. The very phraseology of this conference report shows that it is intended to cover these reservations for all time to come. Under it the Secretary of the Interior has the power to make rules and regulations by which those vast areas of the public domain can be utilized. It is distinctly wrong that the people of those Western States, who are doing so much to upbuild their States and to benefit the country, should be obliged to send down to Washington and ask the Secretary of the Interior, often receiving a refusal, for permission to do something absolutely necessary to the development of their land.

I have here a letter received this morning concerning the cutting of timber, which it may be worth while to consider. Mr. Beauregard Kenner, of Manti, Utah, who writes me on this subject, states:

> If this Administration would go to the trouble to send a few men (with a little common sense) out here to investigate the timber, they would see at once that the lumber industry is not destroying the timber on the watersheds, for the reason that only about 25 per cent of the timber growing on our mountains is taken for lumber, the remainder being too small for use. We never cut timber smaller than 12 inches diameter, nothing is made in handling small timber, and it is not durable. And they would see what an expense the people have gone to in building roads and bridges that they might get the timber they use in constructing their homes and upbuilding the State.

Under the circumstances, it seems to me that the Senate can not do better than to insist on the original proposition, which was an absolute revocation of the order. I am satisfied, if this order or anything similar had been made concerning any of the Eastern or Middle Western States, there would have been a cry through the newspapers of this country which Congress would have heeded. The mere fact that this order was made concerning Western States, of which so little is known, is all that prevents us from having the entire sympathy of the country.

Mr. RAWLINS. Mr. President, in order that this question may be brought to a vote by the Senate, I wish to amend the pending motion, which I understand is to concur in the conference report, by moving to add to the report the following:

> And that the Senate ask a further conference with the House in respect to the amendment proposed.

I move to amend by striking out the last proviso on page 1 of the report in the following language:

> *Provided further*, That lands embraced in such reservations not otherwise disposed of before March 1, 1898, shall again become subject to the operations of said orders and proclamations as now existing or hereafter modified by the President.

Second, to amend by striking out the language alluded to by the Senator from California [Mr. WHITE] and inserting in lieu thereof the following:

> Nothing herein shall prevent any person or persons from ingress and egress upon such reservation connected with the use, possession, or ownership of lands or other property within its boundaries.

Mr. President, the effect of these amendments, as I understand, is to construe the report which has been made by the conference committee, so as to at once revoke absolutely the reservations made pursuant to the order of the President on the 22d of February last. They permit a full use of all properties and rightful possessions within the boundaries of those reservations. I think that the Senate ought to adopt these amendments and not agree to this conference report except as amended as thus provided.

Mr. GALLINGER. I would suggest to the Senator from Utah that a conference report is not amendable; that under our rules we must vote directly upon it, and either accept or reject the report.

The VICE-PRESIDENT. The Senator from New Hampshire is correct.

Mr. RAWLINS. I was not aware that was the parliamentary rule of the Senate. It is otherwise, I understand, in the House, where I find the provision in relation to this matter to be that a conference report in the House may be concurred in with an amendment.

The VICE-PRESIDENT. The Chair understands the rule of the Senate to be that the vote must be taken upon concurring in the report of the committee of conference. If the Senate does not concur, the report may be amended by a further conference committee.

Mr. GALLINGER. I ought perhaps to have added that undoubtedly a motion to recommit the report, whether with or without instructions, would be in order.

Mr. RAWLINS. Then I will change the motion and propose to recommit with instructions by the Senate that the report be amended as I have indicated.

Mr. WHITE. It appears to me, if the Senator from Utah will permit a suggestion, that the better way to do that would be to recommit the entire subject, and then the committee could deal with it in view of the discussion in the Senate, and not attempt to confine the committee to any set phraseology. I think the committee is more competent to deal with it than any other body of Senators so far as selecting a form of phraseology is concerned.

Mr. ALLISON. It seems to me that the only thing to do is to either adopt or reject the conference report.

Mr. WHITE. Undoubtedly that is the situation, and I simply wish to detain the Senate for a moment, in view of the remarks made by the Senator from Arkansas [Mr. BERRY] in reference to the criticism which I made a moment ago.

I am confirmed in my view by a more careful reading of the provision to which I have already called attention. The language is this:

> Nothing herein shall be construed as prohibiting the egress or ingress of actual settlers residing within the boundaries of such reservations, or from crossing the same to and from their property or homes; and such wagon roads and other improvements may be constructed thereon as may be necessary to reach their homes and to utilize their property under such rules and regulations as may be prescribed by the Secretary of the Interior.

Then follows the provision to which the Senator from Arkansas referred, as follows:

> Nor shall anything herein prohibit any person from entering upon such forest reservations for all proper and lawful purposes, including that of prospecting, locating, and developing the mineral resources thereof: *Provided*, That such persons comply with the rules and regulations covering such forest reservations.

If the last clause stood independently, it would still be exceedingly doubtful whether it would authorize the crossing of the reservation to other properties; but there is no necessity of attempting to construe it standing alone, because the lawmaking authority has, by the explicit excinding of patentees from the provision permitting this egress and ingress, limited it to the owners thereon specially designated. If the committee had said, "Nothing herein shall be construed as prohibiting the egress or ingress of actual settlers residing," and had added the four words, "or owners of land," then there would have been no difficulty.

Mr. ALLISON. Mr. President, the clause the Senator from California is reading is a clause in the original Senate amendment, and was not touched by the conference committee. It is your own clause, it is your own provision, which was inserted there, and by no possible construction has it been changed by subsequent or other clauses in the conference report. So that if we are now at this late day to enter upon a reconstruction of this great amendment, to occupy us in this body three or four days or a week, then of course we are to enter upon a new scheme of legislation with reference to these forest reservations, and I appeal to the Senator, in the interests which he and those associated with him have, not to undertake to require a conference committee to redraft this whole section.

Mr. WHITE. I am not making any such attempt. I believe that the Senator from Iowa and every other Senator admits that I am right as to my contention that this privilege should be accorded to the owners of land on the reservations.

Mr. ALLISON. Let me ask the Senator a question. Suppose I had a title from the Government, a patent to a tract of land, and afterwards the Government, for purposes of its own, created a reservation which embraced that tract of land, does he believe that any legislation we can make would deprive me of the power to go upon that land and exercise whatever right I desire to exercise as to the ownership and authority upon the land? Would a court sustain any statute which even in explicit and express terms would make such a prohibition? Certainly not.

Mr. WHITE. I attempted to state to the Senate and to the Senator from Iowa and I will now restate the fact, which perhaps is more valuable than theorizing about what a decision may be. I am personally aware of tracts of land in the State of California around which a reservation has been declared, whereon the owners of land, purchasers from patentees, have not been permitted to enter and have been excluded by the armed forces of the United States under the direction of the Department of the Interior; and this legislation will give color to the exercise of that authority, because it omits from the grant the privilege of ingress and egress to those who are owners of the land; and, as I said before, it is a discrimination in favor of the possessor of the inchoate title.

Now, in addition to what I said, I call the attention of the Senate to the last two lines on page 3:

> The settlers residing within the exterior boundaries of such forest reservations, or in the vicinity thereof, may maintain schools and churches within such reservation, and for that purpose may occupy any part of the said forest reservation, not exceeding 2 acres for each schoolhouse and 1 acre for a church.

It is the obvious intention here to exclude from participancy in these statutory permissions the owners of the fee within the reservation. As far as the land owned is concerned, of course the owners can do with it what they like; but the use of the land is a part of its enjoyment, and whether it be usurpation or no, the fact is that the Government assumes to exercise the authority which I have stated, does exercise it, and does exclude from the participancy and full exercise of the right of an owner in fee men circumstanced as those to whom I have directed attention.

If there is anything sacred in reference to the first clause which I have criticised, the amendment I have referred to can be incorporated in the second clause, which the Senator admits has been subject to the scrutiny of the committee and altered there. There is no difficulty in inserting in that clause a half dozen words giving the owners of land in the reservation the same rights of ingress and egress heretofore accorded to settlers therein. The only way, of course, to meet this is to send the report back.

I can not conceive of any argument, I can not conceive of any suggestion, which would induce me to think that any rational man, anxious to do right, would father a piece of legislation, when his attention was called to it, as our attention is now called to it, which would exclude the owner of the land from enjoying that land and give a superior right to one whose title is less than fee. Of course, if it is to meet with opposition elsewhere, if it can not be incorporated in here, that is the end of it. We might take the matter as it is, but we should not refrain from an attempt to correct it because of the difficulty of going back, whether it be owing to the inattention of myself or anybody else. I am not charging any inattention upon the committee. The Committee on Appropriations does a very vast amount of work in the discharge of its duty to this body and to the country with signal ability, and it is and always has been a matter of wonder to me how that great committee is able so thoroughly to discharge its many duties.

But still as we move on and examine this legislation there is perhaps none of us who may not discover some criticism that might be made. Our work, when it passes from this Chamber and from the Capitol, is frequently criticised, and frequently under the lamp of judicial scrutiny defects are discovered which would have been avoided if they had been called to our attention. When legislation is nascent is the time to point out defects. Whether those defects result from inattention on my part or inattention on the part of any other Senator or inattention on the part of anybody else cuts no figure with me. I will point it out, whether or not I have committed it, and will not consider that I am being unduly criticised if it is shown that I do not know everything.

Mr. WILSON. Before the Senator from California takes his seat, I should like at this point and along the line of his argument to ask a question as to which I also desire the attention of the chairman of the Committee on Appropriations. This is quite a long amendment, and I should like to know if any provision has been made, not for the actual settler, for whom the Senator is appealing so eloquently, which is right and proper and just; but in this hop, skip, and jump through the State which I in part represent, the forestry commission have withdrawn a large area of land, in round numbers, 8,000,000 acres. In those withdrawals we have selected, upon the part of the State, about 155,000 acres of land granted to us by Congress through the enabling act. There are also school lands. I should like to know what provision is made, if the forestry reservations are continued, to indemnify the State for selections already made, and for the schools, for their portion of this withdrawal of the public domain.

Mr. ALLISON. My first answer to the Senator from Washington is that the amendment has been changed in conference in only one particular from the amendment which received the approval of all the friends who are now opposing the conference report, and that particular is that instead of a revocation of the orders of the 22d of February for all time, the revocation only continues until March 1, 1898. From now until March 1, 1898, the orders of President Cleveland are not only suspended, but revoked, so that if I choose or if anyone else chooses to go upon any portion of any of the reservations, he or I can secure the same title to the land that he or I could have secured if the reservations had never been made.

So whatever criticisms are made here as respects the amendment and against it are criticisms that can not lie against the conference report, and are merely criticisms which show that the proper committees of the Senate and of the House, within the eight or nine months intervening, will have an opportunity to provide such remedial legislation as may be necessary. It is within the power of these two Houses, from now until the 1st of March next—if the Senator from Washington will allow me one moment more—absolutely to revoke by legislative enactment the entire orders of President Cleveland of February 22.

We revoke it only temporarily, up to the 1st of March. We have in the revocation taken the phraseology of the amendment introduced here by the friends—and I am one of them—of this legislation, which provided that the revocation should expire on the 1st

day of March. I may say that the House committee were wholly unwilling to revoke the orders; and whilst I do not undertake to say what will be done in the future, I have no doubt that the conferees on the part of the Senate have secured the best possible arrangement as to this particular matter. It is a legislative provision which has no place upon the pending bill at all. It was placed upon it because of the emergency of the situation. We went very far in the direction of putting new and important legislation upon an appropriation bill.

It was necessarily imperfect, and the Senator from California himself now criticises his own legislation and shows its imperfection. However, fortunately for us, seven or eight months will intervene in which Congress can act either by joint resolution or by new legislation, and cure the evils, if there are evils, in the legislation. Yet Senators now undertake to say that because they can not have everything in the amendment which ought to be there for future years, both for the protection of the settlers and for the protection of the public, they will reject a conference report involving millions upon millions of dollars.

In answer to the specific inquiry of my friend the Senator from Washington, I will say that by no possibility can any right of the State of Washington or any right of any citizen of that State be imperiled by the amendment. Whatever rights they have acquired as respects the public lands under the public-land laws are reserved and preserved, and the order of President Cleveland is absolutely revoked, so that a citizen of the United States can go upon any one of the reservations and do what he could have done before the order was issued.

Mr. TILLMAN. Will the Senator from Iowa answer me one question?

Mr. ALLISON. Certainly.

Mr. TILLMAN. If the order is revoked wholly, as the gentlemen of the West contend for, why can not President McKinley, after an examination and the report of such men as he can trust, issue another order setting apart forest reservations which will not conflict with the interests of those people?

Mr. ALLISON. Undoubtedly he can.

Mr. TILLMAN. Then why not let us get rid of this trouble which one President has brought upon those people by peremptorily and forever revoking the order and keeping it out, leaving these gentlemen and their constituents to manage their own affairs in their own way and for their own best interest until the President interferes?

Mr. ALLISON. One difficulty, I will say to my friend the Senator from South Carolina, is that legislation is passed by two Houses, and from all we know the other House do not quite accord with the views of the Senator from South Carolina.

Mr. TILLMAN. I hold a great many other opinions in which the other House do not concur. They have no House over there, anyway. They have one man running it.

Mr. MANTLE. Mr. President, it must be obvious from what has been said, especially by the Senator from California [Mr. WHITE], that there is at least one other serious defect in the proposed amendment. I do not care to prolong the debate or to take up the time of the Senate, but I wish to ask the distinguished chairman of the Committee on Appropriations if, in view of what has been stated here in the debate, he does not think it will be at least worthy of effort to make one more attempt to secure an extension of the period of revocation of the orders, say for one year?

I make the suggestion because, under the provisions of the amendment, by that time it is certain, or almost certain, that all the necessary information which can be obtained from an examination and survey of the land under the direction of the Geological Survey will be at the command of the President of the United States, so that he may then discriminatingly and intelligently and without injustice to any of the people of those States make an order setting apart forest reservations which will be absolutely just.

This is not asking very much in behalf of those people, and I do believe, in view of what has been said, that the conference report can be perfected in one or two other directions by re-referring it or sending it back for a brief period. The whole matter need not take more than a day, and I think after what has been said here that our friends at the other end of the Capitol will see that this request at least is a modest one, that it is reasonable, and that it is necessary, in view of the condition which exists.

I wish to ask the chairman of the committee if he does not think that this is a reasonable proposition, and that it may be brought about by another effort?

Mr. ALLISON. I can only say, in response to the Senator from Montana, that I believe the Senate conferees have secured the best possible adjustment of this matter, and that if we do not agree to it, the effect will certainly be a prolongation of the differences between the two Houses upon the amendment.

Of course it is a matter in which I have no interest other than the public interest. If Senators desire or believe that it is a wise thing for us to reject the report and enter into a controversy of that character, I think I can bear it as well as any other Senator. I believe that under these provisions and under the appropriation the President of the United States will act promptly and wisely for the interest of the people who are chiefly affected by the legislation. There is ample time between now and the 1st day of March to deal with the question by and large through these two bodies or through the President of the United States, and I believe it would be absolute unwisdom to hold this great appropriation bill any longer in the Senate.

Mr. MANTLE. It must be borne in mind that the President of the United States can, at any moment when he sees fit, under the provision of the pending amendment and under provisions of law, make other orders of a like character. There is absolutely nothing, if these orders are revoked, to prevent him from making another order on the following day.

I wish to state that we are not at all afraid or alarmed as to the character of an order which would be issued by the now President of the United States. We are willing to take chances upon any order which he may issue, but we do not want to be left in the position where, if nothing else shall be done in the meantime, the obnoxious and unjust orders now prevailing shall again be brought into life by the expiration of this legislation, which they will be unless action is taken in the meantime.

I do not believe that the necessary information from the Geological Survey can be had upon which wise, discriminating, and intelligent action can be had by the 1st of March, 1898, and it is for that reason that we ask that the order shall be revoked in toto or else that the time be so extended that we may be certain that the necessary information will be at the command of the Department and of the President.

Mr. PETTIGREW obtained the floor.

Mr. KYLE. Mr. President——

The VICE-PRESIDENT. The senior Senator from South Dakota is entitled to the floor.

Mr. PETTIGREW. I yield to my colleague.

Mr. KYLE. I wish to say just one more word in support of the proposition I made a while ago.

My objection to the amendment is that it works an injustice to the persons who are settlers upon the forest reservations, and if the matter be settled in this way it will be settled for all time to come, and the question of future compensation to those men will be out of the question. They might as well know that point first as last.

The case is this: Settlers have gone into the Western country, some of them twenty-five years ago, and have settled on lands, have established homes, planted trees, erected buildings, houses, barns, etc., and have made improvements, sometimes to the amount of three, four, or five thousand dollars. Then comes along a President, and, under authority of Congress, sets apart a certain section of country as a forest reservation. There may not be a settler for a distance of 10 or 15 miles; there may be no churches, no schools, no privileges of society.

Now, under the amendment which we have before us, the Government says, "You can get up and go and leave your improvements; leave your homes, if you do not like the situation; select 160 acres in another portion of the United States, and have the time you have spent upon your land accredited to you under the homestead laws, and that is all the compensation you will get." It is very small compensation for the years of labor and toil that a man has placed upon his homestead in the Western country.

My proposition is that the Government should send a commission there to appraise the lands and the improvements and pay the man $5,000, if $5,000 be due him. Pass this, if you will, and it will allow a man to select 160 acres in lieu of his homestead which he relinquishes, and that is all he will ever get.

Mr. PETTIGREW. Mr. President, the portion of the conference report to which I object is that which is found on page 1 of the printed report, as follows:

Provided further, That lands embraced in such reservations not otherwise disposed of before March 1, 1898, shall again become subject to the operations of said orders and proclamations as now existing or hereafter modified by the President.

If that language were changed so as to provide that the reservation should be subject to such order as the President might make, after examining the area, so that positive action would have to be had upon the part of the President, I should not object. But if, without action, without examination, we, as legislative bodies, are to continue the reservations, I am afraid the executive department will neglect to act. If the executive department is obliged to act before this region can be embraced within a reservation, then I am satisfied to give it the power, because then I believe it will be wisely exercised.

If the words which I have read were stricken out and the words I will suggest were inserted in their place, I think the amendment, taken as a whole, would be an excellent thing. I believe in saving and preserving the forests. I believe that fires should be prevented, that the ripe trees should be cut and sold, and that

where trees are cut young trees should be planted in their places, so that the forests will be preserved perpetually. But I do not believe that a region where there are no forests, but where there are cities and towns and railroads and mills and mines and farms, should be embraced within a forest reservation and the entire population occupying the same made criminals, as they have been, through the ignorant order of Grover Cleveland.

If we were to provide that the lands embraced within such reservations, not otherwise disposed of, shall, when the surveys of said reservation are completed, or after such examination of the areas embraced in said reservations as the President shall direct, be subject to such orders as the President may make in reference to the same, so as not to disturb the right of any actual settlers or claimants now residing upon any of the lands embraced in said reservations, it would be entirely satisfactory. Then when the President had examined the areas and had done what Cleveland ought to have done before he issued his order, and had decided that a portion of the area should be embraced within a forest reservation, so as not to do injustice to the people of that country, he could issue his order and I should be entirely content.

Mr. President, it seems that in 1863, by an act of Congress, the National Academy of Sciences was created, for the purpose of furnishing information to the Executive Departments of the Government. A year or so ago one of the members of the academy called upon the Interior Department and asked them to designate the academy, or a commission from the academy, to look into the forest reservations. The Secretary of the Interior addressed a member of the academy a letter calling on him for information, and he replied saying an appropriation was necessary. Congress appropriated $25,000 for them to make an examination, so that the forest reservations could be intelligently designated. What was then done? Five men were picked out. They took a palace car and started for the Yellowstone Park, and on the 8th of July last were importuning the Department for facilities with regard to their mail, and so on, etc. On the way they designated a reservation in the State of South Dakota, passed by it on the train, never entered the area embraced therein, and did not even see the country which they embraced within the reservation.

Mr. KYLE. Will my colleague allow me for a moment?

Mr. PETTIGREW. Certainly.

Mr. KYLE. Was it not done in the hotel room? Was not that as near as they got to the reservation?

Mr. PETTIGREW. Yes, sir. They went by in a car, and they designated as a forest reservation an area containing 17 post-offices, 15,000 people, and 50 miles of railroad. They come back and report that a great deal of timber has been cut in that region. So there has been. The land is unsurveyed. One hundred million dollars of gold has been produced in that region within the last twenty-two years. The people have used timber from the public domain, and have used it lawfully. Not a single suit has been tried, not a single conviction had; and yet the forest commission in their report spend a good deal of time describing the stealing of timber in that locality.

About two years ago timber was shipped in violation of law from the reservation down into Nebraska. The parties were indicted in the United States court, and in every case where they did not plead guilty they were found guilty by the jury. Law can be enforced by juries in that country. If there is any improvident or dishonest use of timber whatever, if there has been stealing of the timber, which is made an excuse for the dishonest and ignorant orders, why were not prosecutions had? Simply because they have lawfully used the timber. Every miner, every settler under existing law, obeying such rules and regulations as are laid down by the Secretary of the Interior, can cut timber on the public domain. We propose by the amendment to provide for the care of the forests, so that improvident cutting can not be had, but at the same time we insist that these improvident and dishonest orders shall be revoked.

What is more, Mr. President, this junketing commission went to Wyoming. I will read what the governor of the State of Wyoming says about their operations there. Let us see how they set apart a forest reservation in Wyoming:

> The commission made no examination whatever. They passed through Wyoming on the fast train of the Burlington Railroad, which at no place is within 15 miles of these mountains. When this train stopped at Sheridan, the people of that town, having become accidentally advised of the presence of the commissioners, solicited them to stop at least for a day and make an examination of the reservoirs and irrigation works already built within the limits of the forest areas on these mountains. Provision for their transportation—all the expenses of their maintenance—was to be made, not by interested parties, but by a member of the State board of water control and one of the officials of the State most interested in forest preservation. Instead of doing this they preferred to pass on without stopping, and to consider these matters in the attractive and salubrious surroundings of Yellowstone Park, 100 miles from the area with which they were dealing.

Then they went into Washington and did the same thing, and into Montana in the same manner. In their report there is not a word showing that they investigated a single area which they recommended to be set apart. I say they ought to be rebuked. I say the Senate ought to insist upon its amendment and the other House ought to yield.

Mr. President, all Senators and all Representatives in the other House from that part of the country are united on this question. There is no division among them, and it is a local question. Yet their will and wish are to be overridden by a junketing trip of five scientific gentlemen from a part of the country 2,000 miles away. If we should send a delegation from the far West into New England and insist upon a policy with regard to that section which would be destructive to their prosperity, protests would arise that would overshadow the threats of rebellion that came from the Hartford convention of years ago, and again they would talk of a dissolution of the Union.

It is a local question, Mr. President. The cutting of timber in those forests does not affect any other area in this country, for the reason that the Rocky Mountain pine when once cleared off grows up again. To-day, in spite of the fact that millions of dollars' worth of timber has been cut in the Black Hills of South Dakota, there are more trees there than ever before. The town of Deadwood is called Deadwood because when they first located there all the timber had been killed by fire and there was no timber fit to cut. To-day that country is covered with a dense forest of young pine thicker than ever; and so it is all over the Rocky Mountain region wherever we cut down trees fit for use. The young timber is better to preserve the water supply than the old timber and the large timber. You can cut every tree fit to use for lumber in the Rocky Mountain region and in thirty years, yea, in ten years, have a better forest for the preservation of water and the prevention of floods than you have now.

I say it is a local question. In Dakota we are interested in not having this timber shipped out of the State. We are interested in having these forests preserved, so that our people can use them. The great mine of which so much has been said has to-day in sight $100,000,000 of gold yet to be mined. It will take thirty years to exhaust it. They are interested, then, in the preservation of this timber. They are willing to pay a fair price for every tree they use, but they are not willing that an order shall be perpetuated which makes every man who takes a tree a criminal. Forty thousand people are supported by this means, independent of the 15,000 who reside within the area of the forest reservation. There is no other source for timber. Since the 22d day of last February every tree they have cut, everything they have done, has been in violation of the criminal laws of the United States. No wonder they are impatient! I would feel that I failed in my duty to those people if I did not insist, even to the defeat of the sundry civil appropriation bill, upon the absolute revocation of this order.

The VICE-PRESIDENT. The question is on concurring in the report of the conference committee.

Mr. PETTIGREW. On that I ask for the yeas and nays.

The yeas and nays were ordered; and the Secretary proceeded to call the roll.

Mr. HANSBROUGH (when his name was called). I have a general pair with the Senator from Virginia [Mr. DANIEL].

Mr. PETTIGREW. The Senator from Minnesota [Mr. NELSON] asked me to secure a pair for him in favor of the Senate amendment. I suggest to the Senator from North Dakota that he transfer his pair.

Mr. BATE (when the name of Mr. HARRIS of Tennessee was called). I desire to state that my colleague [Mr. HARRIS] is absent, sick. He is paired with the Senator from Vermont [Mr. MORRILL].

Mr. MANTLE (when his name was called). I have a general pair with the Senator from Virginia [Mr. MARTIN].

Mr. MITCHELL (when his name was called). I am paired with the Senator from New Jersey [Mr. SEWELL].

Mr. TILLMAN (when his name was called). I am paired with the Senator from Nebraska [Mr. THURSTON]. When this question was up before, he voted in favor of the revocation of the Executive order, and as I would vote that way, I do not think my vote would conflict with the pair. I therefore vote "nay."

Mr. TURNER (when his name was called). I am paired with the Senator from Massachusetts [Mr. HOAR]. If he were here, I should vote "nay."

Mr. VEST (when his name was called). I have a general pair with the Senator from Minnesota [Mr. NELSON]. I do not know how he would vote. If he were here, I should vote "yea."

The roll call was concluded.

Mr. GALLINGER. I have a general pair with the senior Senator from Texas [Mr. MILLS].

Mr. BERRY (after having voted in the affirmative). I have a general pair with the Senator from Colorado [Mr. TELLER], with an understanding, however, between him and myself that I can vote when I desire. On this question I think it is probable that he would vote "nay." Therefore I ask leave to withdraw my vote and announce the pair.

Mr. MANTLE. The Senator from Georgia [Mr. CLAY] has a general pair with the Senator from Massachusetts [Mr. LODGE].

I have a general pair with the Senator from Virginia [Mr. MARTIN]. We desire to transfer those pairs so that the Senator from Georgia may vote and that I may vote as well. I vote "nay."

Mr. CLAY. I vote "nay."

Mr. HANSBROUGH. I transfer my pair with the Senator from Virginia [Mr. DANIEL] to the junior Senator from Minnesota [Mr. NELSON]. I vote "yea."

Mr. VEST. That transfer having been made, I can vote. I vote "yea."

The result was announced—yeas 32, nays 25; as follows:

YEAS—32.

Aldrich,	Faulkner,	McEnery,	Proctor,
Allison,	Gear,	Morgan,	Quay,
Bate,	Gray,	Pasco,	Spooner,
Caffery,	Hanna,	Perkins,	Turpie,
Chandler,	Hansbrough,	Pettus,	Vest,
Cullom,	Hawley,	Platt, Conn.	Walthall,
Deboe,	Kenney,	Platt, N. Y.	Wellington,
Fairbanks,	Lindsay,	Pritchard,	Wetmore.

NAYS—25.

Bacon,	Foraker,	McMillan,	Stewart,
Butler,	Frye,	Mallory,	Tillman,
Cannon,	Harris, Kans.	Mantle,	White,
Carter,	Heitfeld,	Pettigrew,	Wilson.
Clark,	Jones, Ark.	Rawlins,	
Clay,	Jones, Nev.	Roach,	
Davis,	Kyle,	Shoup,	

NOT VOTING—31.

Allen,	Gallinger,	Martin,	Sewell,
Baker,	George,	Mason,	Smith,
Berry,	Gorman,	Mills,	Teller,
Burrows,	Hale,	Mitchell,	Thurston,
Chilton,	Harris, Tenn.	Morrill,	Turner,
Cockrell,	Hoar,	Murphy,	Warren,
Daniel,	Lodge,	Nelson,	Wolcott.
Elkins,	McBride,	Penrose,	

So the report was concurred in.

LIST OF CLAIMS ALLOWED.

The VICE-PRESIDENT laid before the Senate a communication from the Secretary of the Treasury, transmitting, in response to a resolution of the 17th instant, a list of all claims allowed up to and including the 25th instant by the several accounting officers of the Treasury Department under appropriations the balances of which have been exhausted or carried to the surplus fund under the provisions of section 5 of the act of June 20, 1874, etc.; which, with the accompanying papers, was referred to the Committee on Appropriations, and ordered to be printed.

LIST OF JUDGMENTS.

The VICE-PRESIDENT laid before the Senate a communication from the Secretary of the Treasury, transmitting, in response to the resolutions of April 6 and May 17, 1897, a list of judgments rendered by the Court of Claims, amounting to $159,901.35, which have been presented to that Department and require an appropriation for their payment; which, with the accompanying papers, was referred to the Committee on Appropriations, and ordered to be printed.

THE TARIFF BILL.

The VICE-PRESIDENT. The hour of 2 o'clock having arrived, it becomes the duty of the Chair to lay before the Senate the unfinished business, being the bill (H. R. 379) to provide revenue for the Government and to encourage the industries of the United States.

Mr. CARTER. I submit, by request, an amendment intended to be proposed to the pending bill, which I ask may lie on the table and be printed.

The VICE-PRESIDENT. It will be so ordered.

Mr. FAULKNER. I submit an amendment intended to be proposed by me to the pending tariff bill, which I ask may lie on the table and be printed.

The VICE-PRESIDENT. That will be the order.

Mr. HAWLEY. I wish to present sundry memorials.

The VICE-PRESIDENT. The Senator from Connecticut.

PETITIONS AND MEMORIALS.

Mr. HAWLEY. I present a memorial of the Lexington Print Works and 180 other textile manufacturing companies in the United States, remonstrating against placing coal-tar dyes on the free list. I move that the memorial be printed as a document, and referred to the Committee on Finance.

The motion was agreed to.

Mr. HAWLEY presented a memorial of the Stamford (Conn.) Manufacturing Company and 10 other firms engaged in manufacturing dyewood extracts, and a memorial of Huber & Co. and 26 other firms, manufacturers and exporters of American goods, remonstrating against placing coal-tar black dyes on the free list; which were ordered to lie on the table.

He also presented a memorial of F. H. Messenger & Co., of New York, and 48 other firms engaged in importing logwood dyes, remonstrating against placing aniline dyes on the free list; which was ordered to lie on the table.

He also presented a memorial of William P. Clyde & Co., of New York, and 71 other owners and agents of steamers and sailing vessels, remonstrating against placing aniline colors or blacks on the free list; which was ordered to lie on the table.

Mr. GALLINGER presented the memorial of Jason J. Burley, of New Hampshire, remonstrating against an increase of the duty on beer; which was ordered to lie on the table.

Mr. SPOONER presented a memorial of Cigar Makers' Union of Ashland, Wis., remonstrating against the proposed rate of duty to be placed upon Habana fillers and Habana and Sumatra wrappers; which was ordered to lie on the table.

He also presented a petition of the Merchant Tailors' Exchange of Milwaukee, Wis., praying for the passage without amendment of section 666 of the pending tariff bill, relating to the free entry of wearing apparel, personal effects, etc.; which was ordered to lie on the table.

Mr. KYLE presented a petition of sundry citizens of Deadwood, S. Dak., praying for the enactment of legislation for a more rigid restriction of immigration; which was ordered to lie on the table.

REPORTS OF COMMITTEES.

Mr. BUTLER, from the Committee on Post-Offices and Post-Roads, to whom the subject was referred, reported an amendment intended to be proposed to the general deficiency appropriation bill, the amendment providing for the relief of George Z. French, late postmaster at Wilmington, N. C., and moved that it be printed, and, with the accompanying papers, referred to the Committee on Appropriations; which was agreed to.

Mr. GALLINGER, from the Committee on Pensions, to whom was referred the bill (S. 1514) granting arrears of pension to H. Morris Husband, asked to be discharged from its further consideration, and that it be referred to the Committee on Claims; which was agreed to.

Mr. CARTER, from the Committee on Territories, to whom was referred the bill (S. 1040) to provide compensation for a bridge and for buildings and other improvements constructed by certain persons upon public lands afterwards set apart and reserved as the Yellowstone National Park, reported it without amendment, and submitted a report thereon.

He also, from the same committee, to whom was referred the bill (S. 643) for the relief of C. J. Baronett, of Gardiner, Mont., reported adversely thereon; and the bill was postponed indefinitely.

Mr. SHOUP, from the Committee on Territories, to whom was referred the bill (S. 2010) to establish a new land district, to be known as the Yukon land district, in the Territory of Alaska, asked to be discharged from its further consideration, and that it be referred to the Committee on Public Lands; which was agreed to.

BILLS INTRODUCED.

Mr. CARTER (by request) introduced a bill (S. 2036) to increase the pension of Mary C. Cook; which was read twice by its title, and, with the accompanying paper, referred to the Committee on Pensions.

Mr. SPOONER introduced a bill (S. 2037) granting a pension to Ellie Kee; which was read twice by its title, and referred to the Committee on Pensions.

ADDITIONAL TELEGRAPH OPERATOR.

Mr. DAVIS submitted the following resolution; which was referred to the Committee to Audit and Control the Contingent Expenses of the Senate:

Resolved, That the President of the Senate be authorized and directed to appoint an additional telegraph operator for service at the Senate Annex, at a salary of $1,200 per annum, to be paid from the contingent fund of the Senate until otherwise provided.

ALICE JOYCE.

Mr. DAVIS submitted the following resolution; which was referred to the Committee to Audit and Control the Contingent Expenses of the Senate:

Resolved, That the Secretary of the Senate be, and he hereby is, authorized and directed to pay to Alice Joyce the sum of $10 for typewriting in connection with the hearing had before the subcommittee of the Committee on Foreign Relations of Harry Earle in regard to conditions in Cuba, the same to be paid out of the contingent fund of the Senate.

THE TARIFF BILL.

The Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 379) to provide revenue for the Government and to encourage the industries of the United States.

The VICE-PRESIDENT. The Secretary will state the pending amendment.

The SECRETARY. On page 3 the Committee on Finance propose to insert the following as an additional paragraph:

7½. Bleaching powder, or chloride of lime, one-fourth of 1 cent per pound.

Mr. ALDRICH. That item was passed over yesterday by general consent.

The VICE-PRESIDENT. The reading of the bill will be proceeded with.

The reading of the bill was resumed. The next amendment of the Committee on Finance was, on page 3, in line 19, after the word "copper," to insert "one-half of;" so as to make the paragraph read:

8. Blue vitriol, or sulphate of copper, one-half of 1 cent per pound.

The amendment was agreed to.

The next amendment was, on page 3 to strike out lines 23 and 24, as follows:

10. Borax, crude, or borate of soda, or borate of lime, 2 cents per pound; refined borax, 3 cents per pound.

And to insert a new paragraph, as follows:

10. Borax, 5 cents per pound; borates of lime or soda, or other borate material not otherwise provided for, containing more than 36 per cent of anhydrous boracic acid, 4 cents per pound; borates of lime or soda, or other borate material not otherwise provided for, containing not more than 36 per cent of anhydrous boracic acid, 3 cents per pound.

Mr. VEST. I offer the following as a substitute for the committee amendment:

Borax, crude, or borate of soda, or borate of lime, 1¼ cents per pound; refined borax, 2 cents per pound.

Under the existing law the duty upon borax, crude; borate of soda, and borate of lime is 1¼ cents a pound, and on refined borax it is 2 cents a pound. Under the McKinley law the duty was 3 cents a pound upon borax, crude; borate of lime, and borate of soda, and 5 cents a pound upon the refined borax.

I call attention simply to the proposed duties, which it seems to me are enormous. I do not propose now to go back and discuss the duty upon borax, but I call attention to the fact that the value of borate of lime is 2.4 cents, according to the comparative statement, and upon it the proposed amendment puts a duty of 4 cents a pound. This is an enormous taxation, and there is nothing to justify it, as was said yesterday, and I do not care to repeat it at any length, upon an article which enters into almost all the ordinary uses of life. For that reason I propose to go back, if possible, to the existing duty as now provided by statute.

Mr. ALDRICH. I do not intend to prolong the discussion upon this article. I think the question was fairly settled yesterday in the vote of the Senate. But I do desire to call the attention of the Senator from Missouri to a fact which may have escaped his attention. In previous tariff acts the duties upon refined borax were very much higher than are suggested by the amendment of the committee. In 1862 the rate was fixed at 10 cents a pound, and it remained at 10 cents a pound until the act of 1883—nearly double, or quite double, the rate suggested by the committee.

Mr. JONES of Arkansas. I have mislaid for the moment a paper that I desired to present to the Senate. It was received by me subsequent to what I submitted to the Senate yesterday, and shows, among other things, the price of borate of lime in London now. I stated yesterday that borate of lime was sold in London at £9 sterling per ton. I yesterday received a communication, after making that statement to the Senate, showing quotations in the London market at £8 and 15s per ton—less than a cent and a half a pound as the London price of an American article shipped to the London market, and on which this bill proposes to give a protective tariff of 4 cents a pound. I am unable to find at this moment the paper which I wished to present to the Senate, but I will ask leave to insert it in the RECORD if I should be fortunate enough to find it.

I wish to call attention in this connection, for one moment, to a statement made by Mr. Krebs before the Ways and Means Committee of the House, which shows the animus of this proposition as distinctly as anything else can. In speaking of the proposition to put this tax on the borate of lime he used this language, on page 38:

As an evidence of good faith, the American miners have offered and stand ready to supply this raw material to contracting parties at the foreign price, plus the ruling rate of duty.

This is all we accuse them of, proposing to mine borate of lime in this country, send it abroad, and sell it at a cent and a half a pound, and they are willing to sell it to American consumers for the foreign price, which is about 1¼ cents a pound plus the ruling rate of duty, now about 2 cents a pound, I believe, and if the bill goes into effect it will be 4 cents.

I agree with the Senator from Rhode Island that this question was about settled yesterday. It is useless to attempt to argue the question further, and I am willing to submit the matter to the good sense of the Senate. I will insert in the RECORD, however, the paper which I spoke of just now, which comes from a borax manufacturer and refiner of borax who has been in the business for thirty years, and who states the facts in connection with his trade, which I commend to the attention of the Senate.

The paper referred to is as follows:

The Calico borate mine, near Daggett, San Bernardino County, Cal. (owned by an English corporation styled the Pacific Coast Borax Company, and Redwood & Sons, Chemical Works, Limited), is the only mine of borate of lime operated in the United States at the present time, and all their output is either refined by themselves and sold in this country or is exported in its crude form to Liverpool and sold there. The report of Thomas Price & Sons, San Francisco, is that there "certainly seems to exist here an almost inexhaustible deposit of available calcium borate." (See page 4, prospectus of this company.)

I wish to state—

First. That the Pacific Coast Borax Company is a foreign corporation, organized under English laws, and an absolute monopoly.

Second. It has driven out of existence every American borax mine by reason of superior conditions and business methods.

Third. It ships the crude article to England in large quantities (constantly increasing), and sells it there in competition with the Turkish borate.

Fourth. The reduction in price of borax refined is due alone to the fact that with a duty of 1¼ cents per pound on borate of lime under the present law and 2 cents per pound for borax refined there is a slight but uncertain chance for Eastern refiners to compete with the Pacific Coast monopoly.

Fifth. With the present rates of duty the Pacific Coast people are able to reduce prices and now control 80 per cent of the domestic market, and under existing rates (the Wilson bill), sooner or later, they will destroy the Eastern refining interests.

Sixth. Since the passage of the present law the Pacific Coast Borax Company have steadily reduced the price of refined borax until it is now 5¼ cents per pound in carload lots in New York. The domestic annual production, all by this one company now, has increased from 8,000,000 pounds in 1893, with a duty then under the McKinley law of 3 cents per pound on crude and 5 cents per pound on refined, to 16,000,000 pounds at the present time under the present law of 1¼ cents per pound on crude and 2 cents per pound on refined.

Seventh. This company admits that it can lay the borate down in San Francisco at 60 cent per 100 pounds; the freight to New York from there, 30 cents per 100 pounds, making 90 cents laid down in New York. This company sells the crude article in the London market at $1.95 per 100 pounds, as against the Turkish at $2 per 100 pounds. The foreign can not be landed in New York for less than 3¼ cents per pound, including duty. This leaves a margin between the cost of Pacific Coast borate laid down in New York and the foreign article laid down there of 2.6 cents per pound, or a protection to the domestic crude article in the New York market of 166 per cent, under the existing law of 1¼ cents per pound; the amendment proposed by the Finance Committee of 4 cents per pound on borate is equivalent to a protection of 425 per cent, based on a strength of 40 per cent.

To protect such a monopoly to this extent seems monstrous. The American system, of which we should all feel proud, was intended only to protect domestic products in which there is possibility of competition. There are two conditions only which forbid protective duties—first, a monopoly in the United States; second, the impossibility of production at home. For this first reason, the rate of duty on borate of lime should in no event exceed 1 cent per pound, which would be over 100 per cent on the present domestic value laid down in New York of the Pacific Coast article.

In their English prospectus for 1896, a printed document, they say:

"To check competition in borax in the United States the American Company (now the English corporation) has largely reduced the selling price of borax during the past year or so, submitting to a temporary decreased profit and looking for the largely increased demand to compensate it in the immediate future. In the United States of America the price has now been reduced so that neither the crude nor the refined borax can be imported to compete with the company at a remunerative profit."

The price paid by the English company for this monopoly was $2,500,000.

In October, 1896, this English company, called the Pacific Coast Borax Company and Redwood & Sons Chemical Works, Limited, after paying debenture interest and paying the entire preference dividend, reported a balance of profit for the six months ending September 30, 1896, sufficient to pay 12 per cent dividend.

This was in reality for the period from April to September, or only five months.

It is very important that you bear in mind these facts.

The domestic production of the crude article has increased from 8,000,000 pounds in 1894 to 16,000,000 in 1896, all by this English corporation.

The domestic consumption reached 20,000,000 pounds for 1896, so that this company possesses 80 per cent of the market.

The export of the crude article to Liverpool, all by this one company, has increased from 597,000 in 1893 to over 5,000,000 pounds in 1896.

The price of the refined borax in the United States is absolutely dictated by this one company.

All the domestic miners of crude borax in any form have been driven to the wall.

There is but one domestic manufacturer using foreign borate remaining in business. This English company asserts in its prospectus that his business has already been made unprofitable under the present rates. What, then, would be his condition if the rate of duty is advanced to 4 cents from 1¼ cents, and what would be the effect upon the many and diversified industries which are compelled to use borax, as follows:

Bleachers, calico manufacturers, cement makers, chemists, china manufacturers, color makers, coppersmiths, cosmetic makers, dentists, druggists, dyers, earthenware makers, enameled ware manufacturers, fish curers, fruit preservers, glass makers, harness makers, hat manufacturers, imitation-gem makers, imitation-marble manufacturers, ink makers, iron workers, jewelers, lace manufacturers, leather workers, linen manufacturers, machinists, meat packers, metallurgists, milk preservers, mucilage makers, opticians, painters, paper makers, photographers, pipe manufacturers, plasterers, polishers, porcelain makers, potters, printers, safe makers, silk manufacturers, soap makers, starch manufacturers, tanners, timber preservers, tile manufacturers, varnish makers, and wick manufacturers. And each year new uses are being discovered.

This company will not sell under usual business conditions their crude article in this country, claiming that they should have the exclusive control of refining.

CHAS. PFIZER & CO.

(Manufacturers of borax for the past thirty years.)

Mr. JONES of Arkansas. The following is a copy of a letter which has just come to my hands:

Below we submit copy of letter from a firm of brokers in Liverpool, England, showing exports of California borate or "colemanite:"

"California borate or colemanite.—Recent arrivals were for sale at about £8 15s. per ton, delivered ex. quay in bags, less 2½ per cent discount, on the basis of 40 per cent of anhydrous boracic acid.

"Imports into Liverpool, from January 1 to date have been, 1896, 755 tons and 30,011 bags; 1895, 13,745 bags; 1894, 9,252 bags; 1893, 5,427 bags. (Bags 112 pounds each.)

"DECEMBER 29, 1896."

The following is a copy of a letter showing the price of borax:

165 WATER STREET, NEW YORK, *May 22, 1897.*

DEAR SIRS: We beg to announce the following prices on borax, carload lots, f. o. b. your city, terms ten days, net. These prices are effective May 24:

	Cents.
Refined, powdered and crystal, in barrels	5½
Refined, crystal, in sacks	5
Concentrated in sacks (when in stock)	4½

Please note that orders for concentrated borax can only be accepted subject to our having the goods in stock at the time.

The above prices cancel all previous quotations.

Yours, truly,

PACIFIC COAST BORAX COMPANY.

This company advanced the price of borax one-eighth of a cent per pound, as shown, on May 22. A few weeks ago they reduced the price one-eighth of a cent per pound.

The PRESIDING OFFICER (Mr. GALLINGER in the chair). The question is on the substitute proposed by the Senator from Missouri [Mr. VEST] to the amendment of the committee.

The amendment to the amendment was rejected.

The amendment was agreed to.

The next amendment of the Committee on Finance was, in line 7, page 4, after the word "refined," to strike out "4" and insert "6;" so as to read:

Camphor, refined, 6 cents per pound.

Mr. VEST. I should like to ask why this duty is put 2 cents above the McKinley rate upon an article of general use in the country? I ask the Senator from Rhode Island why they go above the McKinley rate? What sort of reason can there be for an increase of 2 cents a pound?

Mr. ALDRICH. A considerable advance in the price of camphor, both crude and refined, rendered the duty of the McKinley bill inadequate at the present time. When a duty of 4 cents a pound was levied, it was equal to 15 per cent ad valorem. The 6-cent duty which we now propose is also equivalent to 15 per cent ad valorem.

Mr. VEST. It is more than 15 per cent.

Mr. ALDRICH. I think not.

Mr. VEST. I know it is; but I have not the comparative statement here.

Mr. ALDRICH. The figures of the committee show that this rate is not over 15 per cent. It is certainly not a very high rate.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the committee.

The amendment was agreed to.

The next amendment of the Committee on Finance was, on page 4, to strike out line 8 to line 13, inclusive, in the following words:

12. Chalk, ground, precipitated or prepared only, in the form of cubes, blocks, sticks, or disks, as tailors', billiard, red or French chalk, 1 cent per pound; all other chalk preparations, except medicinal or toilet preparations, and manufactures of chalk not specially provided for in this act, 25 per cent ad valorem.

And insert:

12. Chalk (not medicinal nor prepared for toilet purposes), when ground, precipitated naturally or artificially, or otherwise prepared, whether in the form of cubes, blocks, sticks, or disks, or otherwise, including tailors', billiard, red, or French chalk, 1 cent per pound. Manufactures of chalk not specially provided for in this act, 25 per cent ad valorem.

Mr. VEST. I simply want to call attention to the fact that, notwithstanding the statement made by the Senator from Rhode Island that in very few paragraphs were the duties made higher than under the McKinley Act, here again, on prepared chalk, is another increase over the McKinley rate. If there is any reason for it, I have been unable to discover it.

Mr. ALDRICH. It is the same rate.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the committee.

The amendment was agreed to.

The reading of the bill was resumed. The next amendment of the Committee on Finance was, on page 4, line 21, after the word "chloroform," to strike out "twenty" and insert "fifteen;" so as to read:

13. Chloroform, 15 cents per pound.

The PRESIDING OFFICER. Without objection, the amendment will be considered as agreed to.

Mr. JONES of Arkansas. The amendment in relation to chloroform ought not to be adopted in the form that it stands. For the present, however, I shall not detain the Senate on any motion in connection with it, but may subsequently submit a motion in relation to that in another paragraph.

The PRESIDING OFFICER. The amendment has been agreed to.

The Secretary read paragraph 14 as follows:

14. Coal-tar dyes or colors, 35 per cent ad valorem; all other products or preparations of coal tar, by whatever name known, not specially provided for in this act, 25 per cent ad valorem.

Mr. ALDRICH. I ask that that paragraph may be passed over for the present.

The PRESIDING OFFICER. The paragraph will be passed over.

Mr. QUAY. In connection with the clause which has been passed over, I send to the desk certain protests against placing coal-tar blacks on the free list. I do not ask to have them read, but I ask to have them printed in the RECORD.

The PRESIDING OFFICER. Without objection, that order will be made.

The protests referred to are as follows:

To the honorable the Senate of the United States:

We, the undersigned, textile manufacturers of the United States, having learned that in the tariff bill now being considered by you blacks enumerated as fast-black coal-tar dyes have been placed on the free list, and believe that the competition now existing between the aniline blacks and the logwood blacks, which we desire to have continued, tends to keep at a low price both classes of dyes, and that any legislation which will destroy, cripple, or restrict the continued production of American extract of logwood will be hurtful to our interests.

All of which we respectfully submit.

MAY, 1897.

—

At a meeting of the dyewood-extract manufacturers of the United States, held in the city of New York on May 5, 1897, it was deemed best to submit to the individual Senators of the United States a brief statement of the position of their industry as it would be affected by the enactment of the tariff bill as reported by the Senate Finance Committee; and to submit therewith statements from the various industries other than the manufacturers of the product, which indicate the result to each of legislation which would cripple or destroy the manufacture of dyewood extracts.

The dyewood-extract industry has been established in the United States for nearly one hundred years. It represents at the present time an investment of many millions of dollars, and is distributed through the States of Massachusetts, Rhode Island, Connecticut, New York, New Jersey, Pennsylvania, Delaware, Maryland, and Virginia.

It gives direct employment to thousands of operatives who are directly engaged in the manufacture of its products, as well as others who are employed in the freighting and handling of the raw material, which amounts approximately to 100,000 tons per annum.

All this raw material is brought into the United States from the West Indies, Central America, and Mexico, and for the most part in ships of American register. It serves as the chief article of freight from the countries named, and should the extract-manufacturing industry be crippled or destroyed, great damage and loss to the shipping interests would result, as will be seen from the petition of the shipowners and agents hereto annexed as signed.

In exchange for the raw material brought into the United States annually, many millions of dollars of manufactured goods and provisions of all classes are exported to the West Indies, Central America, and Mexico. The damage to these various exporting interests resulting from any reduction or cessation of imports of dyewoods is shown by the exporters' petition hereto annexed.

In the tariff bill as reported by the Finance Committee of the Senate to that body, coal-tar black dyes are placed upon the free list. These are the chief and sole products which compete with the logwood black dyes made by the American dyewood-extract manufacturers. Should they be retained in the free list, they will cripple, if not entirely destroy, the dyewood-extract business, prevent the importation of dyewoods from the countries now shipping them to the United States, and cut off a corresponding amount from the export trade of the country.

That the placing of the coal-tar blacks on the free list is not considered of advantage by the textile interests, who are the sole consumers, is fully shown in the petition from this interest hereto annexed, to which your attention is particularly called.

These colors are made and patented in Germany. They are also fully protected by United States letters patent, and can not be manufactured by Americans on that account. The result of placing them upon the free list will be the destruction of a long-established and progressive American industry, the throwing out of employment of thousands of men for no purpose and to no end but the benefit of the German manufacturer and his American representative, who have no capital invested in the United States, and who, owing to the protection given them by the Government in their patents, are in possession of an absolute monopoly.

For these reasons, and in order that this long-established American industry may have a fair and equal chance for existence, you are urged to use your influence to have coal-tar blacks restored to the dutiable list in which they have always been classed heretofore.

All of which is respectfully submitted.

The Stamford Manufacturing Company, of Connecticut and New York; The New York and Boston Dyewood Company, of New York and Boston; The Sharpless Dyewood Extract Company, of Philadelphia; Innis & Co., of New York; The Oakes Manufacturing Company, of New York; The Harway Dyewood and Extract Manufacturing Company, of New York; J. S. Young & Co., of Baltimore; John D. Lewis, of Providence; Browning & Bros., of Philadelphia and New Jersey; The W. G. Johnson Company, of Norwich, Conn.

—

To the honorable the Senate of the United States:

We, the manufacturers, sellers, and shippers of American goods for export to the West Indies, Central American and Mexican ports, having heard that coal-tar or aniline blacks have been placed on the free list, most earnestly protest against any such action.

The manufacture of dyewood extracts in this country has become a very important and large factor in the business that is done between the United States and the other countries. Some three millions of dollars' worth of dyewoods are brought into this country annually, and in return we sell American produce, clothing, and other articles to the shippers, agents, and importers of those dyewoods.

It is not alone the injury that would be done to the manufacture of dyewood extracts that we protest against, but because of the injury inflicted on the many interests now selling American goods for export to these countries, which have been steadily growing for many years.

Aniline or coal-tar colors, we believe, are almost entirely of foreign make and protected by United States letters patent; therefore the placing of them on the free list would be of no benefit to anyone in the United States.

Believing that the amount of trade created with these foreign countries by this dyewood business has not been fully understood, we offer you this petition and ask that you do not injure the large export business that has been brought about with these foreign countries owing to the dyewood extract manufacturers, and which would be the result were they injured by any adverse legislation.

All of which is respectfully submitted.

—

To the honorable the Senate of the United States:

Your petitioners comprise owners in and agents of steamers and sailing vessels under the American flag engaged in carrying goods from the port of New York to the countries of Haiti, Mexico, Jamaica, etc., and transporting back from these countries cargoes of logwood, fustic, and other dyewoods to the ports of New York, Boston, and Philadelphia to the extent of about 100,000 tons annually. This carrying trade has been of many years' continuance, and gives engagements to many sailing vessels and steamers under the American flag.

We earnestly protest against the reduction of duties on aniline colors or blacks, at present paying a 35 per cent duty. We earnestly protest against the placing of naphtharzine black or any other coal-tar black on the free list, as any such action would greatly diminish the use of logwood and other dyewoods in the United States. In consequence, the carrying trade which our vessels are engaged in in transporting these dyewoods from Haiti, Jamaica, and Mexico to the United States would be almost entirely lost; and, further, the loss of the logwood and dyewood trade with the United States would greatly reduce the abilities of the countries of Haiti, Jamaica, and Mexico to handle American goods, and so greatly affect our business of carrying cargoes from the United States to the above countries.

We further desire to call your attention to the fact that aniline colors, including blacks, are manufactured solely in Germany, owing to their being patented in that country, so that no manufacturer could produce them in the United States. We therefore regard any reduction of duties from the law on aniline dyes or blacks as favoring the commerce of Germany to the destruction of American commerce.

—

To the honorable the United States Senate:

Realizing from the information that we have gathered that the dyewood-extract business of this country is in jeopardy by the placing of aniline blacks upon the free list, we, the importers, agents, shippers, and handlers of logwood and other raw material coming from the West Indies, Central America, and Mexican ports, do most earnestly protest against any action that would seriously affect this branch of trade.

The amount of business done with these manufacturers in this country will amount to about 100,000 tons, in value from two and one-half to three million dollars, which is largely brought here by American steam and sailing vessels, and in return for the same we ship large quantities of American provisions and clothing to those countries, amounting to a greater amount in value than the imports.

This is one of the principal sources of business between those countries and the United States, and any action taken that will affect the manufacturers of the extract would affect also every other line in connection with it.

The extract of dyewood business is purely an American industry, but as far as we understand it the aniline business is almost entirely European, and the bringing of these dyes into this country free would not in any way assist the American shipping interests, either in the importing or exporting of goods.

We therefore ask, under these circumstances, that you do not injure an industry that will in turn injure and destroy others.

All of which is respectfully submitted.

NEW YORK, *May, 1897.*

The reading of the bill was resumed. The next amendment of the Committee on Finance was, on page 5, to strike out the paragraph from line 2 to line 7, inclusive, as follows:

16. Collodion, and all compounds of pyroxylin, by whatever name known, and whether rolled or in sheets, but not made up into articles, 50 cents per pound; if in finished or partly finished articles, including such as are commonly called celluloid articles, 75 cents per pound and 30 per cent ad valorem.

And in lieu thereof to insert:

16. Collodion, and all compounds of pyroxylin, whether known as celluloid or by any other name, rolled or in sheets or otherwise, but not made up into articles, 50 cents per pound; if in finished or partly finished articles, 60 cents per pound and 25 per cent ad valorem.

Mr. SEWELL. I ask the Senator from Rhode Island to allow that amendment to go over for the present.

Mr. ALDRICH. I am willing that paragraph 16 and the amendment reported to it by the committee shall go over.

The PRESIDING OFFICER. That order will be made, and paragraph 16, together with the proposed amendment of the committee, will go over for the present.

The reading of the bill was resumed. The next amendment of the Committee on Finance was, on page 5, line 18, after the word "roots," to strike out "nutgalls and other;" in line 20, after the word "nuts," to insert "nutgalls;" in the same line after the word "roots," to strike out the word "and;" and in line 23, before the words "not edible," to insert "drugs and;" so as to make the paragraph read:

19. Drugs, such as barks, beans, berries, balsams, ouds, bulbs bulbous roots, excrescences, fruits, flowers, dried fibers, dried insects grains, gums and gum resin, herbs, leaves, lichens, mosses, nuts, nutgalls, roots, stems, spices, vegetables, seeds (aromatic, not garden seeds), seeds of morbid growth, weeds, and woods used expressly for dyeing; any of the foregoing which are drugs and not edible, but which are advanced in value or condition by refining, grinding, or other process, and not specially provided for in this act, 10 per cent ad valorem.

The amendment was agreed to.

Mr. ALDRICH. I move to further amend, in line 26, by inserting after the word "act" the words "one-fourth of 1 cent per pound, and in addition thereto."

Mr. VEST. You propose to add that to the ad valorem?

Mr. ALDRICH. Yes; one-fourth of 1 cent per pound.

Mr. VEST. I should like to know the reason for that.

The PRESIDING OFFICER. The amendment proposed by the Senator from Rhode Island [Mr. ALDRICH] will first be stated from the desk.

The SECRETARY. In paragraph 19, on page 5, line 26, after the word "act," it is proposed to insert "one-fourth of 1 cent per pound, and in addition thereto."

Mr. ALDRICH. I will say that the reason for that is that the existing rate has proved inadequate so far as concerns a large number of the cheaper drugs.

Mr. VEST. How proved inadequate?

Mr. ALDRICH. It has given the business to the foreign grinders of drugs.

Mr. VEST. Ten per cent ad valorem has been the established duty in this country. Under the McKinley Act and under the act of 1894 the rate was 10 per cent ad valorem. The exports from this country of ginseng alone in 1896 were $770,673 worth, and of other herbs $152,896; and yet we are told now that it is necessary to put on an additional specific duty of one-fourth of 1 cent a pound, which upon a great many of these articles will be absolutely prohibitory. I protest against that sort of tax, although the majority of this Chamber may overrule me.

Mr. GRAY. I should like to ask the Senator from Rhode Island if I understood him correctly in saying that the reason for putting the specific duty in addition to the 10 per cent ad valorem was that the importers of these foreign articles control the market as against the domestic manufacturers of these drugs?

Mr. ALDRICH. Precisely; especially on some of the cheaper drugs.

Mr. GRAY. Then this is distinctly not a revenue item. This is a specific duty and is entirely for protection and not for revenue.

Mr. ALDRICH. It is for protection.

Mr. GRAY. It would decrease the revenue.

Mr. ALDRICH. It would on some of the cheaper drugs unquestionably.

Mr. GRAY. Very well. I just want to be able to know as we go through where the line is drawn between a revenue tariff and a merely protective one. This will reduce the revenue and will not increase it.

Mr. WHITE. I should like to ask the Senator from Rhode Island if he has any information as to the extent of the consumption of these products in the United States. I observe from looking at the official record that the importations since 1884, when the duty was imposed at 10 per cent, down to 1890 have in no case exceeded $100,000 worth, and the average has been, I think, about $70,000.

Mr. VEST. In 1896 we exported of those herbs, lichens, berries, etc., over $900,000 worth, and we imported some $79,000 worth. How is it possible that the market has been taken away under existing legislation? I repeat, and I want it answered, that we exported last year in all, according to the comparative statement, $900,000 worth of these herbs, etc., and we brought in a little over $79,000 worth. Now you want to put on these articles a quarter of a cent a pound more specific duty. I want the yeas and nays upon that sort of legislation, though I do not want to take up time.

Mr. GRAY. I want to call the attention of the Senator from Missouri as well as the Senator from Rhode Island to the fact that this is a very miscellaneous item. I supppose there are twenty different articles varying very much in price and value, and yet the specific duty is the same as to all. It may well fall out that this specific duty will be a duty of 100 or 200 per cent on certain articles and not so much on others, and will be a discrimination between these different articles, made at random, where it may do a very great injustice without our being able to point it out now. Putting a quarter of a cent per pound duty on 20 or 30 different articles will amount to an ad valorem varying on every article—nutgalls, vegetables, weeds, lichens, and all that sort of thing. On some of them the duty will be 100 or 200 per cent, and on some of them likely a very small per cent, but we do not know as to what we are prohibiting the importation of entirely and as to what articles we are merely increasing the price to the consumer.

Mr. ALDRICH. It is very certain that the cost of grinding these drugs is more than the duty of a quarter of a cent and 10 per cent ad valorem upon all the articles. There can be no question whatever upon that. There is no danger of imposing, if we adopt this amendment, a very high rate upon any of these articles. Of

course upon the higher-priced drugs a quarter of a cent is entirely inconsequential, and amounts to nothing; but it is upon the cheaper class of drugs where the foreigners have the market and where the importations have increased from $69,000 in 1893 to $79,000 in 1896, which this additional duty was intended to cover.

Mr. VEST. How about the exports?

Mr. ALDRICH. The exports would not be affected by this provision.

Mr. VEST. No; but we export $900,000 worth, showing that we absolutely control this market.

Mr. ALDRICH. We have control of this market as to a large portion of these drugs, but there are some of the cheaper ones, as I have stated, in which we can not compete with the foreign grinders; and it is to provide for them that this additional rate is proposed to be imposed.

Mr. GRAY. May I ask the Senator from Missouri or the Senator from Rhode Island whether these numerous articles do not include entirely raw material? Though they may not be regarded as raw material after they are ground, they are raw materials that come to this country to be ground. I read the following:

Berries, balsams, etc., which are drugs and not edible, but which are advanced in value or condition by refining, grinding, or other process.

So that the clause under consideration prohibits the importation of the raw material used by the grinders and refiners in this country.

Mr. ALDRICH. I beg the Senator's pardon. Those are on the free list in this bill, and we do not propose to disturb them. This is simply a duty upon drugs which are advanced in condition by grinding or refining, and not the crude product at all.

Mr. GRAY. Before they come over?

Mr. ALDRICH. Certainly; before they come over. Crude drugs are free, and always have been, and we do not propose to disturb them.

Mr. CAFFERY. Will the Senator explain what is the specific tax which he proposes as an amendment to the pending paragraph?

Mr. ALDRICH. One-fourth of a cent a pound.

Mr. CAFFERY. In addition to an ad valorem of 10 per cent?

Mr. ALDRICH. Yes.

Mr. CAFFERY. Mr. President, these drugs mentioned in the pending paragraph, "drugs, such as barks, beans, berries, balsams, buds, bulbs, bulbous roots, excrescences, fruits," etc., we have in as great abundance as any people on the earth. The mere process of drying and grinding these things is a very crude process in manufacture. There is no adequate reason given for this increase, and the exports are largely in excess of the imports. So we hold the American market; and this additional tariff is not for any protection whatever, but merely for prohibition. We not only hold the American market, but we export a very large quantity of these drugs.

I should like to inquire what reason there is that lurks behind this quarter of a cent per pound additional duty to the 10 per cent ad valorem? Under the McKinley law, 10 per cent was considered sufficient, and under the law of 1894 that rate was maintained. The importations under the Wilson law have only increased about $10,000—from $69,000 to $79,000. That can be accounted for, of course, by the increased consumption of those articles; it is not by reason of any insufficient duty whatever. I shall demand the yeas and nays on the amendment.

The yeas and nays were ordered.

The PRESIDING OFFICER. The question is on the amendment submitted by the Senator from Rhode Island [Mr. ALDRICH].

The Secretary proceeded to call the roll.

The PRESIDING OFFICER (when the name of Mr. GALLINGER was called). The present occupant of the chair is paired with the senior Senator from Texas [Mr. MILLS].

Mr. TILLMAN (when his name was called). I have a pair with the Senator from Nebraska [Mr. THURSTON], and therefore withhold my vote.

Mr. WETMORE (when his name was called). I have a general pair with the senior Senator from Georgia [Mr. BACON], and therefore withhold my vote.

The roll call was concluded.

Mr. BERRY. I desire to make a statement with reference to my pair with the Senator from Colorado [Mr. TELLER] which will apply to the various items of this bill. I have had a general pair with the Senator from Colorado for ten years. He has written me a letter, in which he states that I am at liberty to vote on any item in this bill as I see proper, except on certain items which he has specified, and stating that he expects to be present before the final vote is taken on the bill. I therefore am at liberty to vote, and vote "nay."

Mr. HARRIS of Kansas. I have a pair with the junior Senator from Wyoming [Mr. CLARK]. If he were present, I should vote "nay."

Mr. FRYE. My colleague [Mr. HALE] is detained from the Senate, being absent from the city. He is paired with the senior Senator from Arkansas [Mr. JONES] on all amendments to the tariff bill. I make this announcement, and shall not renew it.

Mr. JONES of Arkansas (after having voted in the negative). I am paired with the Senator from Maine [Mr. HALE], and withdraw my vote. I voted inadvertently.

The result was announced—yeas 35, nays 21; as follows:

YEAS—35.

Aldrich,	Fairbanks,	McMillan,	Quay,
Allison,	Foraker,	Mason,	Sewell,
Baker,	Frye,	Penrose,	Shoup,
Burrows,	Gear,	Perkins,	Spooner,
Carter,	Hanna,	Pettigrew,	Stewart,
Chandler,	Hansbrough,	Platt, Conn.	Warren,
Cullom,	Hawley,	Platt, N. Y.	Wellington,
Davis,	Jones, Nev.	Pritchard,	Wilson.
Deboe,	McBride,	Proctor,	

NAYS—21.

Bate,	Kenney,	Murphy,	Turpie,
Berry,	Lindsay,	Pasco,	Vest,
Caffery,	McEnery,	Pettus,	Walthall.
Cockrell,	Mallory,	Rawlins,	
Faulkner,	Mitchell,	Roach,	
Gray,	Morgan,	Smith,	

NOT VOTING—32.

Allen,	Elkins,	Hoar,	Nelson,
Bacon,	Gallinger,	Jones, Ark.	Teller,
Butler,	George,	Kyle,	Thurston,
Cannon,	Gorman,	Lodge,	Tillman,
Chilton,	Hale,	Mantle,	Turner,
Clark,	Harris, Kans.	Martin,	Wetmore,
Clay,	Harris, Tenn.	Mills,	White,
Daniel,	Heitfeld,	Morrill,	Wolcott.

So the amendment was agreed to.

Mr. CAFFERY. I inquire of the Chair whether paragraph 18, in relation to copperas, has been adopted?

Mr. ALDRICH. It has been adopted.

Mr. CAFFERY. I want to give notice that I shall offer an amendment to put copperas, or sulphate of iron, on the free list.

Mr. ALDRICH. That motion can be made in the Senate or later on as the bill progresses.

Mr. CAFFERY. I shall reserve the right to move an amendment when we reach the free list.

The PRESIDING OFFICER. The Senator's rights in that respect will be reserved.

The reading of the bill was resumed at line 1, on page 6, as follows:

20. Ethers: Sulphuric, 40 cents per pound; spirits of nitrous ether, 25 cents per pound; fruit ethers, oils, or essences, $2 per pound; ethers of all kinds not specially provided for in this act, $1 per pound: *Provided*, That no article of this paragraph shall pay a less rate of duty than 25 per cent ad valorem.

Mr. JONES of Arkansas. It seems to me that all these ethers, instead of being allowed to remain in the bill as they are and have been under two or three tariffs, ought to go on the free list from the fact that there is practically none of them imported. Of sulphuric ether there was imported in 1893 but 20 pounds and in 1896 191 pounds, according to the comparative statement prepared by the majority of the committee. The other ethers were somewhat more largely imported, but the largest importations only amounted to 1,400 pounds. I think when we reach the free list that these ethers ought all to go on that list. There is no revenue derived from them now.

Mr. ALDRICH. It will be a very anomalous state of affairs if we put on the free list certain articles that are made from alcohol while we retain a duty of about 1,600 per cent upon alcohol itself.

Mr. JONES of Arkansas. The duty under this bill is 40 cents per pound on sulphuric ether and 25 cents per pound on spirits of nitrous ether, which, in some instances, only amounts to 20 per cent.

Mr. ALDRICH. I understand that is on account of the value of the alcohol. Forty cents a pound would be $3 a gallon, when the duty on alcohol is only $2.70.

Mr. WHITE. The Senator from Rhode Island can probably inform the Senate whether these nitrous ethers are manufactured in the United States to any extent.

Mr. ALDRICH. They are all manufactured here, I think.

Mr. WHITE. I had been informed that such was not the case. I merely ask for information. I know nothing at all about it myself.

The reading of the bill was resumed. The next amendment of the Committee on Finance was, on page 6, line 8, after the word "dyewoods," to strike out "extract of sumac;" in the same line, after the word "barks," to strike out "or woods;" after the word "pound," at the end of line 10, to strike out "all the above in a solid or dry form, 1½ cents per pound;" in line 12, before the word "hemlock," to insert "quebracho and of;" and in line 13, after the word "pound," to insert "extracts of sumac, and of woods other than dyewoods, not specially provided for in this act, five-eighths of 1 cent per pound;" so as to make the paragraph read:

21. Extracts and decoctions of logwood and other dyewoods, and extracts of barks, such as are commonly used for dyeing or tanning, not specially provided for in this act, seven-eighths of 1 cent per pound; extracts of quebracho

and of hemlock bark, one-half of 1 cent per pound; extracts of sumac, and of woods other than dyewoods, not specially provided for in this act, five-eighths of 1 cent per pound.

The amendment was agreed to.

The reading of the bill was resumed at line 16, on page 6, as follows:

22. Gelatin, glue, isinglass or fish glue, and prepared fish bladders or fish sounds, valued at not above 10 cents per pound, 2½ cents per pound; valued at above 10 cents per pound and not above 25 cents per pound, 3 cents per pound and 15 per cent ad valorem; valued above 25 cents and not above 40 cents per pound, 5 cents per pound and 15 per cent ad valorem; valued above 40 cents per pound, 20 cents per pound and 15 per cent ad valorem.

Mr. BURROWS. I ask that that paragraph may be passed over for the present.

The PRESIDING OFFICER. Without objection, paragraph 22 will be passed over.

The reading of the bill was resumed at line 1, on page 7, as follows:

23. Glycerin, crude, not purified, 1 cent per pound; refined, 3 cents per pound.

Mr. GRAY. I should like to ask the Senator from Rhode Island how that compares with the existing law? I have not had an opportunity myself to look at it.

Mr. ALDRICH. It is the same as the existing law.

The reading of the bill was resumed. The next amendment was, on page 7, line 4, after the word "carmined," to strike out "or indigotine;" so as to make the paragraph read:

24. Indigo, extracts, or pastes of, three-fourths of 1 cent per pound; carmined, 10 cents per pound.

The amendment was agreed to.

The next amendment was, on page 7, line 5, after the word "powders," to strike out "printers' ink, and all other ink not specially provided for in this act;" so as to make the paragraph read:

25. Ink and ink powders, 25 per cent ad valorem.

The amendment was agreed to.

The next amendment was, on page 7, line 11, before the word "cents," to strike out "five" and insert "four and one-half;" and in the same line, after the word "pound," to strike out "chicle, 10 cents per pound;" so as to make the paragraph read:

28. Licorice, extracts of, in paste, rolls, or other forms, 4½ cents per pound.

The amendment was agreed to.

The next amendment was, after line 12, on page 7, to insert as a new paragraph the following:

28½. Chicle, 6 cents per pound.

Mr. GRAY. I want to understand something about the bill, and I am in doubt about a great deal of this mysterious chemical schedule. Therefore I ask the Senator from Rhode Island what this article is?

Mr. ALDRICH. It is an article used in the manufacture of chewing gum, a native Mexican gum.

Mr. GRAY. Is this a change from the rate in the present law?

Mr. ALDRICH. This article is at present on the free list.

Mr. GRAY. Then why is it to be put on the dutiable list?

Mr. ALDRICH. For revenue.

Mr. GRAY. Where is the revenue about that?

Mr. ALDRICH. It is estimated by the Bureau of Statistics that, at the rate suggested by the committee, the revenue will be $317,000.

The PRESIDING OFFICER. The question is on the amendment of the committee inserting paragraph 28½, which has been read.

The amendment was agreed to.

The reading of the bill was resumed. The next amendment of the Committee on Finance was, on page 7, line 15, after the word "calcined," to insert "medicinal;" so as to make the paragraph read:

29. Magnesia, carbonate of, medicinal, 3 cents per pound; calcined, medicinal, 7 cents per pound; sulphate of, or Epsom salts, one-fifth of 1 cent per pound.

The amendment was agreed to.

The next amendment was, on page 7, line 22, before the word "cents," to strike out "forty" and insert "thirty;" and in line 24, before the word "cents," to strike out "twenty" and insert "fifteen;" so as to make the paragraph read:

Oils:

30. Alizarin assistant, sulpho-ricinoleic acid, ricinoleic acid, by whatever name known, whether liquid, solid, or in paste, in the manufacture of which 50 per cent or more of castor oil is used, 30 cents per gallon; in the manufacture of which less than 50 per cent of castor oil is used, 15 cents per gallon; all other alizarin assistant, not specially provided for in this act, 30 per cent ad valorem.

The amendment was agreed to.

Mr. VEST. In regard to that last amendment, I want to make an inquiry. Under the first classification there were no imports, and at the rate of 50 per cent on castor oil there were no imports. In the last classification the unit of value, as I understand it, was thirty one-hundredths, which would be 50 per cent ad valorem, or 20 per cent over the existing law. Is that correct?

Mr. ALDRICH. The importations for 1896 were all under one class.

Mr. VEST. That is what I say.

Mr. ALDRICH. It is impossible——

Mr. VEST. The average value was 30 cents a gallon.

Mr. ALDRICH. This is undoubtedly a higher rate of duty than that imposed by the Wilson Act, but it is also lower than the McKinley Act.

Mr. VEST. I understand that, but it is 20 per cent over the Wilson Act.

Mr. ALDRICH. We have reduced it from 40 to 30 cents and from 20 to 15, as the bill came from the other House. It is a great reduction from the McKinley rate.

Mr. VEST. I understand that—from the McKinley Act. I was making a comparative statement between the Wilson Act, the existing law, and the proposed enactment, and it is 20 per cent over the existing law.

The reading of the bill was resumed. The next amendment of the Committee on Finance was, in paragraph 33, line 5, page 8, to strike out "seven" and insert "four;" so as to make the paragraph read:

33. Cotton-seed oil, 4 cents per gallon of 7½ pounds weight.

The amendment was agreed to.

The next amendment was, in paragraph 35, line 8, page 8, after the word "Flaxseed," to strike out "or;" in the same line, after the word "linseed," to insert "and poppy-seed oil;" in line 9, before the word "cents," to strike out "thirty-two" and insert "twenty;" and in line 10, after the word "weight," to strike out "poppy-seed oil, raw, boiled, or oxidized, 10 cents per gallon of 7½ pounds weight;" so as to make the paragraph read:

35. Flaxseed, linseed, and poppy-seed oil, raw, boiled, or oxidized, 20 cents per gallon of 7½ pounds weight.

Mr. VEST. I simply wish to call attention to the fact as to the linseed oil provision that we exported in 1895 $33,260 worth and imported $4,553 worth, and yet it is necessary, I suppose, to increase the taxation in order to protect the American market.

Mr. GEAR. I call the Senator's attention to the fact that under the law of 1890 we put a duty of 32 cents on flaxseed oil, and the price went down at that time to 31 cents, 1 cent below the duty. It has not advanced very much since. We exported some last year because of the short crop in India. This is proposed to be done on the general principle that we wish to protect all American industries.

Mr. CHILTON. Did the importations of linseed increase when the duty was decreased? Is it not a fact that they did not increase?

Mr. GEAR. During the interim when the McKinley law was in effect flaxseed was lower than ever before. Prior to that time there were large importations from India, and they were brought by water at lower freight than flaxseed can be laid down in my own State from New York. After the passage of the Wilson Act, so called, the importations of flaxseed rose to 4,500,000 bushels. It has gone down simply because last year there were no products of any kind in India, and there was no flaxseed, of course. Whenever the normal conditions arise, we will have importations.

Mr. CAFFERY. Do I understand the Senator from Iowa to say that after the passage of the act of 1894 the importations increased enormously?

Mr. GEAR. I do, of seed, not of oil.

Mr. VEST. We are talking about oil.

Mr. CAFFERY. Under the operation of the McKinley law, in 1893 the value of the importations of flaxseed was $2,491, and under the Wilson Act the importations amounted to $4,553.30. So a decline of 10 cents a gallon under the Wilson Act increased but slightly the importations.

Mr. GEAR. As to oil, that is true. I am speaking of the operation of the Wilson bill and the importations for 1896.

Mr. PLATT of Connecticut. These are the Wilson Act rates.

Mr. GEAR. There were no importations because of the absolute failure of the crop in India.

The PRESIDING OFFICER. The question is on agreeing to the amendment reported by the Committee on Finance.

The amendment was agreed to.

The reading of the bill was resumed. The next amendment of the Committee on Finance was, in paragraph 36, page 8, line 13, after the word "alcohol," to strike out "one-half" and insert "one-fourth;" so as to make the paragraph read:

36. Fusel oil, or amylic alcohol, one-fourth of 1 cent per pound.

The amendment was agreed to.

The next amendment was, in paragraph 38, page 8, line 17, before the word "cents," to strike out "fifty" and insert "thirty-five;" so as to make the paragraph read:

38. Olive oil, not specially provided for in this act, 35 cents per gallon.

Mr. PERKINS. I ask to have paragraph 38 passed over for the present.

Mr. ALDRICH. That can be done.

The PRESIDING OFFICER. It will be passed over.

The next amendment of the Committee on Finance was, in paragraph 39, page 8, line 18, before the word "cents," to strike out "sixty-five" and insert "fifty;" so as to make the paragraph read:

39. Peppermint oil, 50 cents per pound.

Mr. VEST. Under existing law the duty upon peppermint oil is 25 per cent. It is increased here to 50 cents per pound. The comparative statement shows that we exported in 1896 $1,741,810 worth, and we imported $4,000 worth. Now, this is an absolute mathematical demonstration of the fact that we control the American market and export an enormous amount, considering the value of the article, and yet here is an increase from 25 per cent ad valorem to 50 cents a pound.

Mr. ALDRICH. It is not very much of an increase; merely from 25 to 35 per cent.

Mr. VEST. Of course it depends upon the unit of value, but it is an increase over existing law, and it is an unnecessary increase, because we absolutely control the domestic market and export largely to other countries.

The PRESIDING OFFICER. The question is on agreeing to the amendment reported by the Committee on Finance.

The amendment was agreed to.

The Secretary read as follows:

40. Seal, herring, whale, and other fish oil, not specially provided for in this act, 8 cents per gallon.

Mr. VEST. As to paragraph 40, "Seal, herring, whale, and other fish oil, not specially provided for in this act," I wish to call attention to the fact that in 1896 we had no imports at all of lard oil, no imports of whale oil, and no imports of fish oil.

Paragraph 3 is the basket clause to the present paragraph, and it includes all other animal oil. While there were no imports, our exports of lard oil for 1896 were $426,401; of whale oil, $32,876; of fish oil, $163,829; of other animal oils, $50,839; showing that there was no competition from foreign countries, that we supplied the American market, and then made these exports besides.

Mr. CAFFERY. Does the Senator from Missouri say there was no importation of whale oil at all?

Mr. VEST. That is the way I have it marked. I believe we imported sixty-odd dollars' worth.

Mr. CAFFERY. I suggest to the Senator that the idea of putting a tariff upon the article is to stimulate the foreigner to make it, so that he can import it and pay American taxes.

The reading of the bill was resumed. The next amendment of the Committee on Finance was, in paragraph 41, page 9, line 4, before the word "dollars," to strike out "eight" and insert "six;" so as to make the paragraph read:

41. Opium, crude or unmanufactured, and not adulterated, containing 9 per cent and over of morphia, $1 per pound; morphia or morphine, sulphate of, and all alkaloids or salts of opium, $1 per ounce; aqueous extract of opium, for medicinal uses, and tincture of, as laudanum, and other liquid preparations of opium, not specially provided for in this act, 40 per cent ad valorem; opium containing less than 9 per cent of morphia, and opium prepared for smoking, $6 per pound; but opium prepared for smoking and other preparations of opium deposited in bonded warehouses shall not be removed therefrom without payment of duties, and such duties shall not be refunded.

Mr. ALDRICH. For the committee I withdraw the amendment and allow the rate to stand as it is.

Mr. VEST. I do not understand the Senator from Rhode Island.

Mr. ALDRICH. I withdraw the suggested amendment of $8 and allow it to stand at $6.

The PRESIDING OFFICER. The amendment is withdrawn.

Mr. VEST. I was about to call the attention of the Senate to the increase, and I desire to put in the RECORD, because it is a very interesting paper—I shall not detain the Senate by having it read—a communication made in 1894 to the Senator from Texas [Mr. MILLS] from the collector at the port of San Francisco, treating of the whole opium question, in which he says that a higher rate of duty than $6 per pound is simply an incentive to smuggling and brings no more revenue to the Government. I ask that the paper may be printed in the RECORD as a part of my remarks.

The PRESIDING OFFICER. Without objection, the paper will be printed.

The paper referred to is as follows:

OFFICE OF THE COLLECTOR OF CUSTOMS,
Port of San Francisco, February 20, 1894.

Senator ROGER Q. MILLS, *Washington, D. C.*

MY DEAR SENATOR: I inclose copy of my telegram to you of yesterday. This was done, and I am writing now, on account of a suggestion made to me that I furnish you with my views on, first:

Duty on prepared opium.—The duty on prepared opium was, for many years prior to 1870, collected at an ad valorem rate. In 1870 they fixed on a specific rate of $6 per pound, which was collected up to 1883. In 1883 they raised it to $10, and in 1890 to $12 per pound. To endeavor to prevent smuggling at these high rates of duty, sections 38 and 39 of the McKinley bill were enacted. These were very excellent, and I consider that it is absolutely necessary that they should be continued, as I stated in my telegram.

The result of these increases in duty was to create an enormous amount of smuggling, so that there were legitimately imported into the United States and placed in bonded warehouses last year only 52,000 pounds of prepared opium, which, in my opinion, was less than one-fourth of the opium imported and consumed in the United States, the difference having been illegitimately introduced.

I know of no way in the world, as human nature is at present constituted, to prevent the smuggling operations at these high rates. The profit is so enormous and the bulk so small that a small quantity, easily concealed, will last a man a long time, and if the smoker is unable to get the mild, imported article, he can go to any drug store in the United States and buy medicinal opium (Persian or Turkish), which can be prepared for smoking, being adulterated with gum arabic, while his meal is being cooked. Upward of 600,000 pounds of this crude medicinal opium, supposed to have been used for medicinal purposes, were imported during the last fiscal year. It was used, however, largely by morphine fiends, patent-medicine manufacturers, and the Chinese, who converted considerable into opium prepared for smoking. The legitimately sick got very little.

All the foregoing is preliminary to my views on the advisability of collecting duty on

Opium at an ad valorem rate.—As I telegraphed you, an ad valorem rate based on the comparison between the McKinley and Wilson bills compiled by the clerk of the Ways and Means Committee for the last fiscal year would be 85 per cent to equal the specific rate of $6 per pound. Since the last fiscal year, or since last July, exchange on China has fallen considerably, and a rate of duty based on the present rate of exchange would yield about $5 per pound, instead of the $6 rate I have urged. If exchange should go lower, the amount of duty collected would be less yet. During all this time the Chinese have not made any change in their price of opium in silver in China. It is selling to-day at practically the same price in silver that it has always sold at. The reduction mentioned above is only caused by the falling in our rate for exchanging silver into gold, which is prescribed quarterly by the Director of the Mint.

But it is my idea, however, that the Chinese will wake up before long to the fact that silver is not what it used to be, particularly in regard to opium, where they come so much in contact with the western world. I do not mean by this that they will ever give up their silver currency, for I do not think they will, but they will find that it is necessary to almost double the price in silver of their opium. The price per box of their opium now is 425 silver dollars, which is lower than it has been sold for, and this in spite of the fact that these silver dollars have only half their purchasing power. I therefore believe, instead of a dollar being able to buy as much opium in Hongkong or Macao as it ever has, that it will not be long before it will only buy half as much. When that time comes, one box of opium will cost 850 silver dollars. This, changed into gold and duty collected on it at the rate of 85 per cent, would put the duty back to somewhere about $10 per pound again, and the revenue back into the hands of the smugglers—the position we are in to-day.

On the other hand, I have urged the duty on prepared opium at $6 per pound specific, in accordance with the following figures:

A pound of opium costs in Victoria	$7.50
Manufacturer, who provides capital, pays licenses, etc	1.00
The smuggler who gets it to the seller in the United States is entitled to	2.00
The seller, who sells it in small lots without stamps and subject to imprisonment, is entitled to and would want at least	2.00
Total	12.50
While the imported article costs, as per comparative table of the Ways and Means Committee	7.07
Duty	6.00
Total	13.07

From these figures I have concluded that this amount is the highest duty that can be collected on opium, and, according to the reports of the special agents of the Treasury Department for several years, it is a little too high, as they recommend $4 or $5 per pound. But I have figured, even if it is a little too high, that the established brand, reputation, and more careful preparation of the opium that comes from China will more than offset the difference. Feeling as I do that the utmost revenue should be got out of opium that is possible, and feeling that $6 per pound will accomplish the result, I would urge very strongly that it be retained, rather than be started on any course of uncertainty which would certainly arise trying to collect so high an ad valorem rate on such high-priced goods. Of the difficulties of collecting high ad valorem rates you, of course, know all about, and that phase of it I will pass over. The second proposition is:

Duty on crude opium.—Both ad valorem and specific rates were collected on this article up to 1890, but from 1861 to 1890 they relied entirely on specific rates, which were $1, $2, and from 1864 to 1869 $2.50 per pound. In 1870 it was reduced to $1, and was taken off entirely by the McKinley bill.

If crude opium were the same as quinine, an article used entirely for medicine, I should be very strongly in favor of its retention on the free list, but the annual importations of crude opium are over 600,000 pounds, and it is used by four kinds of consumers:

First. Morphine manufacturers, who are the greatest users of crude opium, no doubt, although there are no figures extant on the subject that I know of. Most of their products are used by those commonly known as "morphine fiends."

Second. The patent-medicine manufacturers, who use large quantities; but again I have no figures.

Third. The Chinese, who use crude opium by reducing its strength and adulterating it with gum arabic for preparation into smoking opium. They use considerable quantities, but I have no figures.

It costs them less than one-third of what the prepared opium costs after paying $12 per pound. If a duty of $1 per pound were put on crude opium it would still cost them (paying a duty of $6 per pound) about one-half of what the prepared costs. But even with this difference I do not think its use will increase among them much, as the prepared, as before stated, is so much milder and finer in quality.

Lastly, the legitimately sick, who use opium in the shape of morphine almost entirely. At the rate of duty placed on it in the Wilson bill ($1 per pound) the amount of duty paid by the legitimately sick can be figured up as follows: 1 pound opium, containing 10 per cent of morphine, duty $1, yields over 480 grains—dose one-eighth of a grain (morphine), 3,840 doses; often dose is doubled to one-fourth of a grain (morphine), 1,920 doses.

At $1 per pound, therefore, the legitimately sick would get 3,840 average doses for 10 cents duty, or 1,920 double doses for 20 cents duty; and to my mind these are the only people in the United States entitled to consideration as far as opium is concerned. While there is so much illegitimate use of opium and morphine, I am strongly in favor of getting as much duty as possible.

I inclose a copy of a letter I wrote to Senator S. M. WHITE a few days ago, in which I advocated $1 per pound duty. I would now suggest, however, that $1.50 or $2 be placed on it. At $2, as above stated, the legitimately sick would only pay 20 cents for 1,920 doses, and it is rare for anyone to be given morphine for any length of time in ordinary sicknesses, and all others should be taxed as much as possible.

My idea of the whole thing and its effect on the revenue is:

Opium imported during the last calendar year would yield, 52,000 pounds, at $12 per pound, say	$600,000
Crude opium, free	Nothing.
Total revenue	600,000
Prepared opium illicitly introduced into the United States, including the legitimate importations, would be only 200,000 pounds, at $6	1,200,000
Crude opium, 600,000 pounds, at $2	1,200,000
Total	2,400,000
Or, with crude opium at 600,000 pounds at $1 the total would be	1,800,000

In the first case an increase of $1,200,000 and in the latter an increase of $1,800,000.

With the prospects of such a splendid increase in the revenue, and the practical certainty of the prevention of smuggling, I would strongly recommend the specific rates which we know rather than embark on the uncertainties that may arise from the introduction of the ad valorem rate on an article that has already caused us so much trouble.

Yours, truly, JOHN H. WISE, *Collector.*

Mr. JONES of Arkansas. Before we leave paragraph 41, I wish to protest against the increased tax on this medicine of almost universal use. Crude opium is now on the free list. The House bill as well as the Senate amendment proposes to impose a tax of $1 a pound. Morphine now pays a tax of 50 cents an ounce. The bill proposes to increase it to $1 an ounce. The other increases run through the paragraph in the same way.

It is a drug absolutely essential to the good of humanity. There can be no conceivable reason why the additional tax should be imposed upon this article of absolute necessity, and I for one am unwilling to allow this paragraph to pass without a word of protest. I do not propose to occupy the time of the Senate in discussion of the question, but I do wish the Senate to bear in mind that this proposition seems to me at least to be unreasonable.

I am tempted in this connection to read a letter which I have here, written by a manufacturing chemist in New York, which perhaps turns a light on the reasons why some persons want this change made. It is a letter written to another gentleman, and the writer says:

Your letter of the 11th received, and we note with interest the efforts of our friends Mr. Jones and Powers & Weightman to ruin their neighbors.

As you say, the conduct of these men is flagrant when their attitude toward the tariff on their own goods is considered. Now look at morphine; here are the figures: A pound of opium, commercial, contains from 10 per cent of morphine alkaloid upward, and, of course, yields in manufacture at least 1.6 to 2 ounces morphine. Tariff on this grade of opium, $1 per pound. Tariff on morphine, 1.6 to 2 ounces, at $1 per ounce, equals $1.60 to $2. This pound of opium also yields considerable quantities of codeine, which, under the old tariff, came in at 25 per cent ad valorem.

Mr. Jones has induced the Senate to make the tariff on this alkaloid $1 per ounce. No one has said a word, but it is more than 100 per cent protection and an enormous increase of duty on what is now an important chemical. The other important salt of morphine sulphate is obtained at the rate of 2 1/10 to 2¼ ounces to the pound of opium. This was taxed at 50 cents per ounce and opium free by Wilson bill; now sulphate is dutiable at $1 per ounce.

A little examination will show that on morphine and codeine and the morphine salts Powers & Weightman enjoy not less than 100 per cent protection. Now, this is a most valuable monopoly, and one from which they have reaped several fortunes, old Dr. Weightman being reputed one of the wealthiest men alive. Does it not seem to you that such people could struggle along with a duty of 50 per cent on morphine ad valorem, or its equivalent in a specific duty, say, 60 cents to 70 cents per ounce on morphine and its salts, and would it not be well to put codeine back among chemicals not otherwise enumerated at, say, 25 per cent?

There is really no more reason why morphine should shoulder 100 per cent tariff than any other generally useful chemical. The argument that the industry needs 100 per cent to keep it alive is absurd on its face, and the proposal to tax the people of the entire country to support the infant industry of Dr. Weightman, who has made millions out of this healthy infant already, would not stand much examination. We think any Senator would be justified in offering an amendment to the tariff on the lines proposed—say 50 per cent ad valorem on morphine and its salts, 25 per cent on codeine, or, say, 60 cents to 70 cents specific on morphine.

Mr. ALDRICH. Will the Senator from Arkansas give the name of his correspondent?

Mr. JONES of Arkansas. He is not my correspondent. The letter was written by a manufacturing chemist of New York to another gentleman. The name signed to it is the Albany Chemical Company, of Albany, N. Y., and the letter is addressed to Mr. W. S. Manning, who is himself, I believe, a manufacturing chemist. Does the Senator from Rhode Island question the correctness of any statement in the letter?

Mr. ALDRICH. I question the correctness of most of them, so far as they apply to the action of the Senate committee. We have not disturbed the paragraph at all. We left it exactly as it came from the House, and whatever may have been done by anybody was certainly done before it reached the Senate committee.

Mr. JONES of Arkansas. The Senate committee has reported the paragraph back practically without amendment.

Mr. ALDRICH. Certainly.

Mr. JONES of Arkansas. But the Senate committee has reported it back with a tax on opium, which has heretofore been free, a drug absolutely essential to the good of every family in the United States, and has reported the bill back with a tax on morphine that is twice as high as under the present law.

Mr. ALDRICH. I am surprised that the Senator from Arkansas should make that statement, because under the Wilson law, with which he had more or less to do, the duty on morphine was 50 cents an ounce.

Mr. JONES of Arkansas. Fifty cents, and you place it at $1. I said you doubled it.

Mr. ALDRICH. We have doubled it.

Mr. JONES of Arkansas. You are astonished at the statement.

Mr. ALDRICH. Under the Wilson Act opium was free, and we propose to put a tax of $1 a pound on crude opium, making the increase in this rate a necessity.

Mr. JONES of Arkansas. Increasing the rate on crude opium is no necessity for an increase of 100 per cent on morphine, because the other alkaloids, as pointed out by the chemical company, more than equal the amount of the tax paid on morphine. There can be no justification on earth, when 1 pound of opium will yield 2 ounces of morphine, to put such a tax on morphine. Then on codeine and other things you have put a tax of $1 an ounce.

Mr. ALDRICH. Will the Senator tell us on what we have put a tax of $1 an ounce—oh! on the alkaloids?

Mr. JONES of Arkansas. Yes, sir. I will move, at the proper time, to restore opium, crude and unmanufactured, to the free list. I now move to amend by striking out the words "one dollar," in line 24, page 8, and inserting "50 cents."

Mr. ALDRICH. In order to show that the relation between opium and morphia is correct in the pending bill, without attempting to elaborate the argument, I will say that it is the relation which has always existed in every tariff bill for the last half century. Whenever there has been a duty upon opium per pound, there has been a duty upon morphia at the same rate per ounce, the theory being that it took substantially 16 pounds of opium to make a pound of morphine, in connection with the cost of manufacturing, which is a very expensive one. This relative rate has always been maintained in all our tariffs, and I have never heard the accuracy of it questioned by anybody until this moment.

Mr. JONES of Arkansas. The Senator certainly will not deny the fact that opium containing less than 9 per cent of morphine comes in taxable at $6 a pound.

Mr. ALDRICH. Opium prepared for smoking.

Mr. JONES of Arkansas. Containing less than 9 per cent of morphine and prepared for smoking. Of course persons importing opium will import it containing the largest possible quantity of morphine, and the rate runs from 12 to 25 per cent of morphine in opium. They get a much higher rate in many instances than what is stated as the average by the chemical company, who state that the average of morphine obtained from opium is 1.6 to 2 ounces to the pound of opium. If the tariff bills have been framed on the hypothesis that it requires 16 pounds of opium to make 1 pound of morphine, that shows of itself that it has been clearly wrong; but in addition to that——

Mr. ALDRICH. In connection with the cost of manufacturing, in which alcohol and other important materials are used, which makes the difference.

Mr. JONES of Arkansas. Is alcohol now used in the preparation of morphine?

Mr. ALDRICH. I think it is.

Mr. JONES of Arkansas. Except in an exceedingly limited way, I think not. Other solvents are used. Alcohol has in great measure gone out of use. I do not say it positively, but that is my impression.

In addition to the morphine which you get out of the opium (which, instead of being 1 ounce to the pound of opium, as suggested by the Senator from Rhode Island, these manufacturing chemists state is 1.6 to 2 ounces per pound), there are other things.

Morphine sulphate is obtained at the rate of 2.1 to 2¼ ounces to the pound of opium. This was practically 50 cents per ounce, and opium free by the Wilson bill; now sulphate is dutiable at $1 per ounce. A little examination will show—

They say—

that on morphine and codeine and the morphine salts Powers & Weightman enjoy not less than 100 per cent protection.

Now, all these items, I understand, are got out of a pound of opium in addition to the morphine that is taken out, and altogether the tax is monstrously high, twice as high as it ought to be.

Mr. ALDRICH. I am a little surprised that the Albany Chemical Company does not go into the business of making morphine, if their statement is correct. I have in my hand a statement made by the president of the Chemical Manufacturers' Association of the United States upon this question, in which he says:

I have this morning received a number of letters upon the subject to which you refer, and without exception they all agree that $1 per ounce, with the duty on opium of $1 per pound, is none too much: in fact, two of them asked more, one for $1.25 and the other for $1.50 per ounce.

Another letter, from St. John Bros., of New York, says:

Please amend to read, "Morphia or morphine, sulphate of, and all alkaloids or salts of opium, $1.80 per ounce."

This would be, in their opinion, the proper rate, showing that the chemists of the United States, with the exception of the party to whom the Senator from Arkansas has referred, are all agreed that a duty on morphia at $1 an ounce is too low rather than too high.

Mr. GRAY. I do not suppose it is hard to get an agreement of that kind, that the duty is too low. I merely rise, however, to ask the Senator from Rhode Island whether this duty, as I asked about another duty, is a revenue duty or is purely a protective duty?

Mr. ALDRICH. Which one?

Mr. GRAY. The dollar an ounce on morphia.

Mr. ALDRICH. A protective duty; and the dollar a pound is a revenue duty.

Mr. GRAY. I observe that at 50 cents an ounce there was a revenue of $11,790 collected, while the estimated duty at $1 an ounce is $896.50. So we are giving up more than $10,000 of revenue to the Treasury, but not so far as the pockets of the people are concerned as to this small amount. That is still to be collected. It will go into the pockets of the stockholders of the chemical company.

Mr. ALDRICH. How much does the Senator say we are giving up?

Mr. GRAY. I am reading from the book I have before me—the comparative statement. I say that in 1890, at 50 cents per ounce, the duties collected were $11,790. Is that not right?

Mr. ALDRICH. Yes, in 1890; but in 1896——

Mr. GRAY. The estimated duty at $1 per ounce is $896.50.

Mr. ALDRICH. The Senator will notice that in 1896, which is the most recent testimony we have on the subject, the duty collected was only $448, upon the rate imposed by the Wilson Act.

Mr. GRAY. I notice that.

Mr. ALDRICH. So that we are not losing $10,000, but $448.

Mr. GRAY. The rate in the Wilson Act is the same as that of the McKinley Act.

Mr. ALDRICH. Yes, sir; with free opium. That shows that the relation which I have suggested is the proper one; was recognized by the Senator from Arkansas and his associates in the preparation of the act of 1894.

I suppose that the Senator from Delaware will agree with me that, having paid a revenue duty of $1 a pound upon opium, it is entirely proper that we should put relatively the proper duty upon morphia, a product of opium.

Mr. GRAY. I have no doubt when the vicious circle is commenced it ought to be completed. I wish to call attention to the fact that this is purely a protective duty and not a revenue duty, and what was collected from the people went into the pockets of the protected manufacturers and not into the Treasury.

Mr. WHITE. There is a peculiar feature not adverted to about the manufacture of smokers' opium, which has been referred to. We have an internal-revenue tax upon that article of $10, and as a result the imposition of that duty interferes with the importation of the crude product here.

Smokers' opium is now largely manufactured in British Columbia, and, singularly enough, there is nothing to indicate that the business is transacted in the United States in any other way than by bringing the manufactured opium here without any corresponding benefit to the Treasury from the imposition of $10 a pound, upon which we collect absolutely nothing. That provision, however, was inserted in the act of 1890, I think sections 35 to 37, and it stands there practically without any alteration except in the way I have stated.

The PRESIDING OFFICER. The question is on agreeing to the amendment proposed by the Senator from Arkansas.

Mr. JONES of Arkansas. On that I ask for the yeas and nays.

The yeas and nays were ordered; and the Secretary proceeded to call the roll.

The PRESIDING OFFICER (when Mr. GALLINGER'S name was called). The present occupant of the chair is paired with the Senator from Texas [Mr. MILLS].

Mr. TILLMAN (when his name was called). I again announce my pair with the Senator from Nebraska [Mr. THURSTON]. If he were present, I should vote "yea."

Mr. VEST (when his name was called). I am paired with the Senator from Minnesota [Mr. NELSON]. If he were present, I should vote "yea."

Mr. WELLINGTON (when his name was called). I have a general pair with the junior Senator from North Carolina [Mr. BUTLER]. He is absent, and I therefore withhold my vote. If he were present, I should vote "nay."

The roll call was concluded.

Mr. JONES of Arkansas (after having voted in the affirmative). I voted inadvertently. I am paired with the Senator from Maine [Mr. HALE], and withdraw my vote.

Mr. CLAY. I am paired with the junior Senator from Massachusetts [Mr. LODGE]. If he were present, I should vote "yea."

The result was announced—yeas 24, nays 39; as follows:

YEAS—24.

Bacon,	Faulkner,	Mallory,	Rawlins,
Bate,	Gray,	Mitchell,	Roach,
Berry,	Harris, Kans.	Morgan,	Smith,
Caffery,	Heitfeld,	Murphy,	Turpie,
Chilton,	Kenney,	Pasco,	Walthall,
Daniel,	Lindsay,	Pettus,	White.

NAYS—39.

Aldrich,	Elkins,	McBride,	Proctor,
Allison,	Fairbanks,	McEnery,	Quay,
Baker,	Foraker,	McMillan,	Sewell,
Burrows,	Frye,	Mason,	Shoup,
Cannon,	Gear,	Penrose,	Spooner,
Carter,	Hanna,	Perkins,	Stewart,
Chandler,	Hansbrough,	Pettigrew,	Warren,
Clark,	Hawley,	Platt, Conn.	Wetmore,
Cullom,	Jones, Nev.	Platt, N. Y.	Wilson.
Deboe,	Kyle,	Pritchard,	

NOT VOTING—25.

Allen,	Gorman,	Martin,	Turner,
Butler,	Hale,	Mills,	Vest,
Clay,	Harris, Tenn.	Morrill,	Wellington,
Cockrell,	Hoar,	Nelson,	Wolcott.
Davis,	Jones, Ark.	Teller,	
Gallinger,	Lodge,	Thurston,	
George,	Mantle,	Tillman,	

So the amendment was rejected.

Mr. JONES of Arkansas. In line 2, page 9, I move to strike out "forty" and insert "twenty," which is the same rate that is now in the law as the tax on that article.

The VICE-PRESIDENT. The amendment will be read.

The SECRETARY. In line 2, page 9, after the word "act," it is proposed to strike out "forty" and insert "twenty;" so as to read:

Aqueous extract of opium for medicinal uses, and tincture of, as laudanum, and other liquid preparations of opium, not specially provided for in this act, 20 per cent ad valorem.

The amendment was rejected.

The reading of the bill was resumed. The next amendment of the Committee on Finance was, in paragraph 43, line 14, page 9, after the word "iron," to insert "in pulp;" in line 15, after the word "oil," to insert "or water;" in the same line, after the word "water," to strike out "eight" and insert "six;" and in line 16, after the word "pound," to strike out "and in pulp or mixed with water, 8 cents per pound on the material contained therein when dry;" so as to read:

43. Blues, such as Berlin, Prussian, Chinese, and all others, containing ferrocyanide of iron, in pulp, dry ground in or mixed with oil or water, 6 cents per pound.

Mr. SEWELL. I ask the Senator from Rhode Island to let the paragraph go over.

Mr. ALDRICH. I have no objection. It can go over.

The VICE-PRESIDENT. The paragraph will be passed over.

The next amendment of the Committee on Finance was, in paragraph 45, page 9, line 22, after the word "vegetable," to strike out "under" and insert "by;" so as to make the paragraph read:

45. Black, made from bone, ivory, or vegetable, by whatever name known, including bone black and lampblack, dry or ground in oil or water, 25 per cent ad valorem.

The amendment was agreed to.

The Secretary read the next paragraph, as follows:

46. Chrome yellow, chrome green, and all other chromium colors in the manufacture of which lead and bichromate of potash or soda are used, dry or ground in or mixed with oil, 4½ cents per pound; in pulp or mixed with water, 4½ cents per pound on the material contained therein when dry.

Mr. ALDRICH. In accordance with the notice heretofore given, I offer an amendment as a substitute for paragraph 46.

The VICE-PRESIDENT. The amendment will be read.

The SECRETARY. Strike out paragraph 46, on page 10, and insert:

46. Chrome yellow, chrome green, and all other chromium colors in the manufacture of which lead and bichromate of potash or soda are used, in pulp, dry, or ground in or mixed with oil or water, 4½ cents per pound.

Mr. VEST. I wish simply to call attention to the fact that in 1893, under the McKinley Act, where the duty was 4½ cents, as it is now proposed to make it, we imported 172,409 pounds of this article, and in 1896, with a reduction of duty to 3 cents under the Wilson Act, we imported only 149,550 pounds, showing that the increase of duty does not always result in keeping out imports, for here under a lower duty there was a smaller import.

The VICE-PRESIDENT. The question is on agreeing to the amendment proposed as a substitute by the Senator from Rhode Island.

The amendment was agreed to.

The next amendment of the Committee on Finance was, in paragraph 47, page 10, line 10, after the word "act," to strike out "crude" and insert "dry;" and in line 11, after the word "pound," to strike out "dried or powdered, one-half of 1 cent per pound;" so as to read:

47. Ocher and ochery earths, sienna and sienna earths, umber and umber earths, not specially provided for in this act, dry, one-fourth of 1 cent per pound; ground in oil or water, 1½ cents per pound.

Mr. ALDRICH. The committee have an amendment to suggest to this paragraph later on, and I ask that it may be passed over on that account.

Mr. VEST. I can not hear the Senator.

Mr. ALDRICH. The committee have an amendment to suggest to the phraseology which they will submit later. I ask that the paragraph be passed over.

The VICE-PRESIDENT. It will be passed over.

The next amendment of the Committee on Finance was, in paragraph 48, page 10, line 14, after the word "three," to strike out "and one-half;" so as to make the paragraph read:

48. Orange mineral, 3 cents per pound.

The amendment was agreed to.

The next amendment was, in paragraph 49, page 10, line 15, after the words "red lead," to strike out "three" and insert "two and three-fourths;" so as to make the paragraph read:

49. Red lead, 2¾ cents per pound.

The amendment was agreed to.

The next amendment was, in paragraph 50, page 10, line 17, after the words "ultramarine blue," to strike out "and other ultramarine colors;" and in line 19, after the word "ultramarine," to strike out "four" and insert "three;" so as to make the paragraph read:

50. Ultramarine blue, whether dry, in pulp, or mixed with water, and wash blue containing ultramarine, 3 cents per pound.

Mr. SEWELL. I should like to have that paragraph go over.

Mr. ALDRICH. I have no objection.

The VICE-PRESIDENT. The paragraph will be passed over at the request of the Senator from New Jersey.

The next amendment was, in paragraph 51, page 10, line 22, after the words "ad valorem," to strike out "and on;" in line 23, after the word "varnishes," to strike out "for the alcohol contained therein;" in line 24, after the word "and," to strike out "thirty-two" and insert "fifty-two;" and in the same line, after the word "gallon," to strike out "additional" and insert "and 35 per cent ad valorem;" so as to make the paragraph read:

51. Varnishes, including so-called gold size or japan, 35 per cent ad valorem; spirit varnishes, $1.52 per gallon and 35 per cent ad valorem.

Mr. VEST. In connection with this increase of duty, which is a very distinct one, from $1.32 under the McKinley Act to $1.52 under the proposed act, and an increase from 25 per cent under existing law to 35 per cent ad valorem, I want to call attention to the fact that in 1896 we exported of all varnishes $362,975; we imported of spirit varnishes $5,879, and of all other varnishes $100,935, the difference in favor of this country being that between one hundred and five thousand and some hundred dollars and $362,975. Why there can be any necessity for an increase of duty when we unquestionably command the domestic market and export largely abroad, I am unable to understand, either for protective purposes or for revenue. The great increase made here is upon the spirit varnishes, and yet we imported of them last year only $5,879. There is no use taking a vote upon it; I simply want to call attention to the fact.

The amendment was agreed to.

The next amendment was, in paragraph 52, page 11, line 2, before the word "cents," to strike out "twelve" and insert "ten;" and in line 4, before the word "cents," to strike out "six" and insert "five;" so as to make the paragraph read:

52. Vermilion red, and other colors containing quicksilver, dry or ground in oil or water, 10 cents per pound; when not containing quicksilver but made of lead or containing lead, 5 cents per pound.

The amendment was agreed to.

The next amendment was, in paragraph 53, page 11, line 6, before the word "pigment," to strike out "white;" so as to read:

53. White lead, white paint, and pigment containing lead, dry or in pulp, etc.

The amendment was agreed to.

The next amendment was, in paragraph 53, page 11, line 8, after the word "oil," to strike out "three" and insert "two and three-fourths;" so as to read:

53. White lead, white paint, and pigment containing lead, dry or in pulp, or ground or mixed with oil, 2¾ cents per pound.

The VICE-PRESIDENT. If there be no objection, the amendment will be agreed to.

Mr. VEST. I beg pardon; I hope that last amendment will not be agreed to until we have considered it for a short time, anyhow. This is an increase over existing law upon white lead, an article which goes into consumption generally throughout the country, from 1½ cents a pound to 2¾ cents a pound, being only one-quarter of a cent below the McKinley rate. It is impossible to consider this paragraph without alluding to the duty upon lead. The duty upon lead has been doubled, as I had occasion to say in the opening of the discussion upon this bill, without the slightest excuse, in my judgment, for any such increase. We supply the domestic market with lead and then export largely—millions upon millions of pounds.

White lead is the product of the lead trust, and, as I said, goes into general consumption; the poor man uses it as well as the rich man. No house can be built without the use of it, externally if a frame house, and internally whether made of brick or frame. Why this increase? In whose interest is it made? Who has called for it? It is an increase from 1½ cents a pound to 2¾ cents, and for no other purpose except to increase the profits of the monopoly that controls the American market.

I stated the other day that this trust was paying a 12 per cent dividend upon its stock. I was mistaken. I have no intimate acquaintance with the people, but it is 7 per cent upon their preferred stock, as a friend informed me this morning. Seven per cent is above the normal interest. It is as well known that the white-lead trust controls the manufacture of this specific article as that the sugar-refining trust controls the production and sale of 70 per cent of the sugar in the United States.

I ask, without any disposition to delay action upon the bill, for the yeas and nays upon this abnormal and unnecessary increase of duty.

Mr. ALLISON. We reduced it from the House bill.

Mr. VEST. The House bill was outrageous, and this is only a quarter of a cent below the McKinley rate.

Mr. ALLISON. If the amendment is voted down, I suggest to the Senator that the House rate will prevail.

Mr. VEST. I move to strike out "two and three-fourths" and insert "one and one-half." That will bring up the question.

The VICE-PRESIDENT. The question is on the amendment of the Senator from Missouri to the amendment of the committee. Does the Senator ask for the yeas and nays on the amendment to the amendment?

Mr. VEST. I ask for the yeas and nays.

The yeas and nays were ordered.

The VICE-PRESIDENT. The amendment to the amendment will be stated.

The SECRETARY. It is proposed to amend the committee amendment by striking out "two and three-fourths" and inserting "one and one-half."

Mr. ALDRICH. The duty fixed in the bill on pig lead is 2 cents a pound. The Senator from Missouri now proposes to make the duty upon white lead, one of the products of pig lead, 1½ cents a pound. He says we propose to increase the duty on white lead. Why do we do it? Simply because we have increased the duty on pig lead, from which white lead is made.

Mr. VEST. The Senator will permit me. He did not understand me to agree to that increase of duty? When we reach the duty on pig lead, I shall move to strike out the proposed increase.

Mr. ALDRICH. You propose to reduce the duty on pig lead to a cent a pound?

Mr. VEST. Yes; as a matter of course. I have said so all the time.

Mr. PETTIGREW. I should like to ask the Senator from Rhode Island a question.

Mr. ALDRICH. Certainly.

Mr. PETTIGREW. Is it not a fact that we export white lead largely to other countries?

Mr. ALDRICH. I think not. I know of no export of white lead. We export pig lead very largely to other countries. The difference between pig lead and white lead, by the act of 1890, was a cent a pound. The makers of white lead (and there are a great many others besides the National Lead Company in the United States) claim that they ought to have a difference of at least a cent a pound between pig lead and white lead in order to live. This is partly shown by the fact that the imports of white lead have increased from 815,526 pounds in 1893 to 1,628,087 pounds in 1896. The imports were nearly doubled in those three years.

There is no use, I submit to the Senator from Missouri, to put a high rate of duty upon lead ores and upon pig lead if you intend to admit lead products at a lower rate than you put upon the raw material. You will simply import your lead into this country in the form of white lead and the other lead products and destroy the lead producers of the United States.

Mr. BATE. I do not want to discuss this question, but to call the attention of the Senate to the fact that the rate under the law of 1890 was 3 cents a pound, and it produced $24,465.79; and the rate under the law of 1894 is 1½ cents, and it produced almost the same amount to a fraction, namely, $24,421.34.

Mr. GEAR. We allowed the white lead to come in and take the place of the domestic, which should have been made in this country, and got $100 less revenue.

The VICE-PRESIDENT. The roll will be called on agreeing to the amendment of the Senator from Missouri to the amendment of the committee.

The Secretary proceeded to call the roll.

Mr. CLAY (when his name was called). I am paired with the junior Senator from Massachusetts [Mr. LODGE]. If he were present, I should vote "yea."

Mr. GALLINGER (when his name was called). I again announce my pair with the senior Senator from Texas [Mr. MILLS].

Mr. HARRIS of Kansas (when his name was called). I have a general pair with the junior Senator from Wyoming [Mr. CLARK]. If he were present, I should vote "yea."

Mr. TILLMAN (when his name was called). I again announce my pair with the Senator from Nebraska [Mr. THURSTON].

The roll call having been concluded, the result was announced—yeas 27, nays 35; as follows:

YEAS—27.

Bacon,	Faulkner,	Mallory,	Rawlins,
Bate,	Gray,	Mitchell,	Roach,
Berry,	Jones, Ark.	Morgan,	Turpie,
Caffery,	Kenney,	Murphy,	Vest,
Chilton,	Kyle,	Pasco,	Walthall,
Cockrell,	Lindsay,	Pettigrew,	White.
Daniel,	McEnery,	Pettus,	

NAYS—35.

Aldrich,	Foraker,	McMillan,	Quay,
Allison,	Frye,	Mason,	Sewell,
Burrows,	Gear,	Nelson,	Shoup,
Cannon,	Hanna,	Penrose,	Spooner,
Carter,	Hansbrough,	Perkins,	Stewart,
Chandler,	Hawley,	Platt, Conn.	Warren,
Deboe,	Heitfeld,	Platt, N. Y.	Wetmore,
Elkins,	Jones, Nev.	Pritchard,	Wilson.
Fairbanks,	McBride,	Proctor,	

NOT VOTING—26.

Allen,	Gallinger,	Lodge,	Thurston,
Baker,	George,	Mantle,	Tillman,
Butler,	Gorman,	Martin,	Turner,
Clark,	Hale,	Mills,	Wellington,
Clay,	Harris, Kans.	Morrill,	Wolcott.
Cullom,	Harris, Tenn.	Smith,	
Davis,	Hoar,	Teller,	

So the amendment to the amendment was rejected.

The VICE-PRESIDENT. The question recurs on the amendment reported by the committee.

The amendment was agreed to.

The reading of the bill was resumed at line 10, on page 11, as follows:

54. Whiting and paris white, dry, one-fourth of 1 cent per pound; ground in oil, or putty, 1 cent per pound.

Mr. CAFFERY. I should like to inquire of the Senator from Rhode Island why, in this paragraph in relation to whiting, ground in oil, there is any necessity for a return to the McKinley rate of 1 cent per pound? Under the operation of the law of 1894, imposing a duty of half a cent a pound, the importations fell off from 57,608 pounds in 1893 to 1,620 pounds in 1896. If the tariff or tax of half a cent a pound upon whiting, ground in oil, has been shown to be prohibitory, why reinstate the old rate in this bill?

Mr. ALDRICH. The unit of value was, if the Senator will notice, almost the same in 1896 that it was in 1893, and the ad valorem rate here is only 4 per cent, according to this calculation, which is certainly not a very high rate, whether there are importations or not.

Mr. CAFFERY. The unit of value in 1896 was twenty-three one-hundredths.

Mr. ALDRICH. One cent a pound would be only 4 per cent.

Mr. CAFFERY. And the unit of value was five one-thousandths in 1893.

Mr. ALDRICH. That shows that for some reason or other the price of putty went up between 1893 and 1896.

Mr. CAFFERY. But that does not show the necessity for an increase in the duty at all. The price of the article has risen under the lower tariff, and there is a decline in the importations.

Mr. ALDRICH. It will not make much difference whether the rate is half a cent a pound or 1 cent a pound. That is a pretty low rate to put upon anything.

The reading of the bill was resumed. The next amendment of the Committee on Finance was, on page 11, line 13, before the word "pigment," to strike out "white;" in line 16, after the word "pound," to strike out "sulfid of zinc white, or;" and in line 18, after the word "pound," to strike out "chloride of zinc and sulphate of zinc, 1 cent per pound;" so as to make the paragraph read:

55. Zinc, oxide of, and white paint or pigment containing zinc, but not containing lead, dry, 1 cent per pound; ground in oil, 1¼ cents per pound; white sulphide of zinc, 1¼ cents per pound.

The amendment was agreed to.

The next amendment was, on page 11, line 20, after the word "colors," to strike out "and;" in the same line, after the word "pigments," to strike out "whether dry or mixed, or ground in water or oil, or solutions other than oil, or;" in line 22, after the word "smalts," to strike out "and;" in the same line, after the word "frostings," to strike out "not specially provided for in this act;" in line 23, after the word "and," to strike out "all;" in line 24, after the word "pigments," to insert "commonly known as artists' paints or colors; all the foregoing, not specially provided for in this act;" in line 2, on page 12, before the word "solutions," to insert "with;" in line 3, after the word "oil," to insert "and whether;" and in line 4, after the word "other," to strike out "forms commonly known as artists' paints or colors" and insert "form;" so as to make the paragraph read:

56. All paints, colors, pigments, lakes, crayons, smalts, frostings, and paints, colors, and pigments commonly known as artists' paints or colors; all the foregoing, not specially provided for in this act, whether dry or mixed, or ground with water or oil, or with solutions other than oil, and whether in tubes, pans, cakes, or other form, 30 per cent ad valorem.

The amendment was agreed to.

Mr. ALDRICH. I have one other amendment to the phraseology. After the word "whether," in line 3, on page 12, I move to insert the words "in bulk or," so as to read "whether in bulk or in tubes, pans, cakes," etc.

Mr. CHILTON. I wish to inquire of the Senator from Rhode Island if all those paints and colors, except artists' colors, were not dutiable at 25 per cent even under the McKinley law?

Mr. ALDRICH. They were.

Mr. CHILTON. What reason exists for increasing the duty on these articles above even the McKinley rate or the Wilson rate? I think it fair that we should have some information on the subject.

Mr. ALDRICH. Owing to the large importations and the desire to make the rates uniform and harmonious with the rates upon other colors that are imported in other forms. For instance, under this bill and under all previous laws what are called coal-tar colors, which are substantially lakes, which are contained in this paragraph, have been put in the higher rates, and it is for the purpose of making these paragraphs consistent and giving a little larger protection to the American paint manufacturers.

Mr. GRAY. This is another case of diminishing the revenue by increasing protection.

Mr. ALDRICH. I do not think it will diminish the revenue.

Mr. GRAY. You want to diminish the importations. That is what I understand.

Mr. ALDRICH. We should be very glad to do that.

Mr. GRAY. That is what I understood the Senator to say.

Mr. VEST. This is an increase of 5 per cent over the McKinley Act as to "all paints, colors, pigments, lakes, crayons, smalts," etc., and now the Senator from Rhode Island tells us that this is put in to give additional protection to the American manufacturers of paint.

The comparative statement shows that we exported in 1896, after supplying the domestic market, $880,841 worth of these paints. That is a mathematical answer to the Senator's statement.

The VICE-PRESIDENT. The question is on the amendment which has been submitted by the Senator from Rhode Island [Mr. ALDRICH] to insert, after the word "whether," in line 3, on page 12, the words "in bulk or."

The amendment was agreed to.

Mr. JONES of Arkansas. I should like to ask the Senator from Rhode Island a question for information. I see in the comparative statement that as to one of the subdivisions under paragraph 56 we imported paris green and london purple. Are they included in this paragraph?

Mr. ALDRICH. They would be included as paints not otherwise provided for. They would be included there or in this chemical-compound paragraph—I am not sure which—but if the Senator succeeds in having them put upon the free list it would not be necessary in either case to make any amendment here, because it is said here, "not specially provided for in this act."

Mr. JONES of Arkansas. I did not understand why it was put in here.

Mr. ALDRICH. I suppose it was concluded that paris green was a color, although I never knew it to be used in that way.

Mr. JONES of Arkansas. I did not know it was used in that way.

Mr. ALDRICH. I always thought it was a chemical compound.

The reading of the bill was resumed. The next amendment of the Committee on Finance was, on page 12, line 6, after the word "white," to strike out "four," and insert "two and three-fourths;" so as to read:

Lead: Acetate of, white, 2¼ cents per pound.

Mr. VEST. I made no proposition to amend the preceding paragraph, because the Senate committee had reported the same rates as the existing law on acetate of lead, but on litharge, which is a lead compound, the McKinley Act imposed a duty of 3 cents, and the committee has reported a duty of 2¼ cents per pound. Under the existing law it is 1½ cents. I move to strike out "two and one-half" and insert "one and one-half."

The VICE-PRESIDENT. If there be no objection, the amendment reported by the committee, which has been stated, will be first considered, unless the Senator from Missouri desires a vote taken on his amendment now. If not, the question will be on the amendment reported by the committee.

The amendment was agreed to.

The next amendment of the Committee on Finance was, on page 12, line 7, after the word "pound," to strike out "in colors 3" and insert "brown gray, or yellow, one and three-fourths;" and in

line 9, after the words "nitrate of," to strike out "two" and insert "one;" so as to read:

87. Lead: Acetate of, white, 2½ cents per pound; brown, gray, or yellow, 1½ cents per pound; nitrate of, 1½ cents per pound, etc.

The amendment was agreed to.

The next amendment was, in the same paragraph, on page 12, line 10, before the word "cents," to strike out "three-fourths" and insert "one-half;" so as to read:

Litharge, 2½ cents per pound.

Mr. VEST. Now I move to strike out "2" and insert "1."

The VICE-PRESIDENT. The amendment of the Senator from Missouri will be stated.

The SECRETARY. In line 10, after the word "litharge," it is proposed to strike out "two" and insert "one;" so as to read:

Litharge, 1½ cents per pound.

The VICE-PRESIDENT. The question is on the amendment of the Senator from Missouri to the amendment of the committee.

The amendment to the amendment was rejected.

The VICE-PRESIDENT. The question recurs on the adoption of the amendment of the committee.

The amendment was agreed to.

The reading of the bill was resumed. The next amendment of the Committee on Finance was, on page 12, after the word "phosphorus," to strike out "twenty" and insert "ten;" so as to read:

Phosphorus, 10 cents per pound.

Mr. ALDRICH. I ask that that may be passed over for the present.

The VICE-PRESIDENT. The paragraph will be passed over.

The reading of the bill was resumed. The next amendment of the Committee on Finance was, under the head of "Potash," on page 12, line 15, to insert "refined, in sticks or rolls;" so as to read:

60. Caustic or hydrate of, refined, in sticks or rolls, 1 cent per pound.

The amendment was agreed to.

The next amendment was, in the same paragraph, on page 12, line 16, after the words "chlorate of," to strike out "three" and insert "two;" so as to read:

60. Caustic or hydrate of, refined, in sticks or rolls, 1 cent per pound; chlorate of, 2 cents per pound.

Mr. ALDRICH. In behalf of the committee, I modify that amendment so as to read "two and one-half cents per pound," instead of "2 cents per pound."

Mr. VEST. Under the McKinley Act and under existing law, that article was free, and now the Senator, not satisfied with putting 2 cents upon it, proposes to increase it half a cent more, as I understand him.

Mr. ALDRICH. Yes, sir.

Mr. VEST. Well, we shall simply content ourselves with the right of inquiry. I should like to know the reason for the additional duty. I suppose there is no use to take a vote upon it.

Mr. ALDRICH. Chlorate of potash is a very important article, not only in medicine, but in commerce, and it is very largely consumed in the United States. It has never been made here until within a very short time, owing to the fact that it was on the free list. It is a manufactured product, and a large number of materials and machines which are dutiable are used in its production. It is believed by the people now engaged in the industry that it can be largely developed, and that in a very short time American manufacturers can produce the entire product consumed in this country.

Mr. GRAY. Then they will not want any tax.

Mr. ALDRICH. The duty is 2½ cents a pound, which is only about 25 per cent ad valorem—not a high one at all. I think it is an experiment which we ought to try.

Mr. VEST. This article is a most important one in dyeing goods, and especially cotton goods. I have always understood—I do not wish to make any extended argument in regard to it—the policy of all conservative men in the United States was to make the raw material used in manufactures as cheap as possible, in the interests of the general consumers of the country, because it goes without saying that whenever you put a duty upon material used by the manufacturer, he recoups it in the price of the manufactured product from the purchaser.

The French people are to-day the most prosperous in Europe in proportion to territory and population, and they recovered from the most disastrous war in modern or almost in ancient history in an unparalleled short time, because they did two things: They expanded their currency and they admitted raw materials free. The result is that to-day France exports more largely than any other people, except possibly those of Great Britain, to all parts of the world, and would export as largely as Great Britain but for the fact that she has not a merchant marine with which to carry her products abroad. We are pursuing an entirely different policy. I have not said anything, because I take it it is useless, when the duties were increased upon all the list of chemicals over which we have passed—chemicals that go into manufactures that ought to be made as cheap as possible to the manufacturer.

Now, here we come to an article upon which the House of Representatives placed a duty of 3 cents; the Senate committee struck it out and made it 2 cents, and now they come back and propose to make it 2½ cents. The article was free under the McKinley Act and it is free under existing law, and yet we are told by the Senator from Rhode Island, deliberately and coolly and frankly, that it is done for the purpose of enabling certain manufacturers to build up their interests in the future. At whose expense? That is the question. If we put on this additional duty, and it costs the manufacturers more to purchase this raw material, who pays for it? My constituents, who do not manufacture it, and the constituents of every other Senator who has not a manufacturing industry of that sort in his State. I enter my protest, for one, against the general doctrine and this specific illustration of it.

Mr. PLATT of Connecticut. Some gentlemen, believing that at the price at which this article was sold in the United States they could manufacture it by using the electrical power at Niagara Falls, invested a large amount of money in a plant for that purpose and commenced the manufacture of it. The United Alkali Company of England, with a capital of $30,000,000, which controls all this product for the world, thereupon put down the price in the United States below the price in England and below the price at which it can be profitably manufactured here. When it is once known that the manufacture here is destroyed, the price will go back again to the old figures.

I thought that the duty ought to be left as it was fixed by the House of Representatives, but my associates upon the committee felt that it might be reduced somewhat. I believe that with this duty the result will be that in a very short time we shall produce this article in the United States, instead of being dependent upon the United Alkali Trust of England for it, with the usual result in such cases, that the price will be reduced to the consumer.

Mr. CAFFERY. I ask the Senator from Connecticut how long this depression of the English monopoly or trust, or whatever it may be, has crowded out the manufacture of this article in New York? How long has it been since they have exercised that depressing influence over that industry?

Mr. PLATT of Connecticut. This enterprise was started within less than a year; I think about eight months ago.

Mr. GALLINGER. Only six months ago.

Mr. PLATT of Connecticut. Only six months ago, I am told.

Mr. GALLINGER. About nine or ten months ago, I should have stated.

Mr. PLATT of Connecticut. The price at which the article was selling before this establishment was started would enable a little profit to be made upon it, but the price at which the English product is now put for the purpose of crushing out and stopping this industry in the United States will not allow it to be manufactured at a profit.

Mr. CAFFERY. Mr. President, it is a routine statement made that we have to protect infant industries from the greed of some foreigner who is selling an article in the United States below the cost of production for the purpose of crushing out the American industry. Such statements are made very largely, and I have never seen any authoritative or authentic proof of their entire correctness. I for one have not much objection to the Englishman or the Frenchman or anybody else selling things to America below the cost of production, because we enjoy the benefit of their product.

My friend from Missouri [Mr. VEST] seems to regret to have Senators on the other side of the Chamber descend from the elevated plane of the home market when it suits their purpose and come down to the old infant-industry idea that when we have the market we must hold it by high taxes, and when we have it not we must get it by high taxes. That appears to formulate their proposition in its exact character.

But if comparison be made between this country and France, showing how France has increased her export of manufactures by a low tariff or by having no tariff upon the raw materials, I think the Senator has made rather an invidious comparison somewhat upon the monetary lines of another country of Europe. That country is Great Britain. That country does not happen to have what the Senator from Missouri calls "an expanded currency," and yet, notwithstanding that fact, having nothing but the gold standard—which seems to meet with opposition sometimes on this side of the Chamber—that country has transcended France and all other countries in the world in the extent of its export trade.

Mr. GALLINGER. Mr. President, it seems to me that this is a very simple proposition, and I am going to say only a word about it.

In what I said to the Senator from Connecticut [Mr. PLATT] as to the length of time which we had been manufacturing this article in this country I somewhat misled him. The statement from which I got the fact is dated December 28, 1896, in which it is said

that the manufacture commenced six months before that time; so that it was about ten months ago.

Now, Mr. President, I want to read a very brief letter from the president of the only manufacturing establishment in this country that is making this article—the Chemical Construction Company of New York, which is operating at Niagara Falls:

The Chemical Construction Company herewith submits to your committee the reasons why it asks for a duty of 5 cents a pound on chlorate of potassium—

Mr. WHITE. From what page does the Senator read?

Mr. GALLINGER. From page 118 of the Tariff Hearings before the Committee on Ways and Means of the House of Representatives on Schedule A. That company asked for a duty of twice the amount that the Senate committee seemed willing to give. The statement from which I have been reading continues:

No chlorate of potassium was made in this country until 1896. The import in 1893 was 4,064,176 pounds; in 1894, 4,131,055 pounds; in 1895, 4,549,899 pounds; in 1896, 5,526,913 pounds. This company invested a large amount of capital in its plant, which was designed to turn out about 400,000 pounds, or less than one-sixteenth of the amount consumed in this country. A duty of 5 cents a pound on the balance, which would still have to be imported, would yield a revenue to the Government of over $250,000 per annum.

Previous to 1896 the price of chlorate of potassium had varied from 14 to 18 cents a pound. In that year—

Which was the year the manufacture was commenced in this country—

the foreign manufacturers, with the intention of stopping production here, forced their surplus on this market, and the price fell to 7½ cents a pound. This was so much below what they were selling for in Europe that reshipments were made at a profit. The company has now closed its works—

The only company in this country that has been operating in the manufacture of this article has closed its works—

being unable to operate under these conditions. It is very evident that when this industry has been destroyed the foreign manufacturers will raise chlorate of potassium to its normal selling price. The Government will lose this revenue without any benefit to the consumer.

CHEMICAL CONSTRUCTION COMPANY,
WALTON FERGUSON, *President.*

Mr. President, there it is in a nutshell. We have been importing nearly 6,000,000 pounds of this product into this country, and we have started to manufacture it, when the foreign manufacturer, with $30,000,000 or more of capital behind him, puts the price down so low that he destroys the American industry; and when the American industry is destroyed—and we have had a great many examples of that in the history of this Government—the price of the product is again raised to the American consumer, and we are dependent upon the foreign market for this article.

I think this is one of the industries that ought by all means to be protected. My only regret is that the duty is not a little higher than 2½ cents a pound.

Mr. BACON. I desire to ask the Senator from Connecticut or the Senator from Rhode Island if I correctly understand them to say that there is an American trust which has put the cost of this product below what it is in England?

Mr. PLATT of Connecticut. No; it is an English trust—the United Alkali Company.

Mr. BACON. Then I misunderstood the Senator.

Mr. PLATT of Connecticut. There is probably no trust in the world that corresponds to it in the control of the market in this product.

Mr. BACON. I misunderstood the Senator. I thought he said it was an American trust.

Mr. PLATT of Connecticut. Not at all.

Mr. GALLINGER. The article is controlled by an English trust, not by an American trust.

Mr. WHITE. I notice, upon consultation of the record, that from 1884, which is as far back as I have traced it, there was a duty of 3 cents a pound on this article down to 1890. Then the McKinley law dropped the duty, and the article has been free ever since. At that time it was deemed proper to put it on the free list. I understood the Senator from New Hampshire to state that the company he has referred to was the only manufactory in the country engaged in the production of this article.

Mr. GALLINGER. The only one I have any knowledge of, and the only one I find mentioned in the record here.

Mr. WHITE. I observe in the letter of the gentleman to which the Senator has adverted that he makes this statement:

This company invested a large amount of capital in its plant, which was designed to turn out about 400,000 pounds, or less than one-sixteenth of the amount consumed in this country.

Mr. GALLINGER. That is correct; but if by protection we enable this factory to go along and manufacture this product, there will soon be a great many others of a similar kind.

Mr. VEST. The whole argument upon the other side amounts to this: We are now to build up a factory which has utilized the water power at Niagara Falls and out of that has created electric power by which it can produce one-sixteenth of the amount that is necessary for the people of the United States. I am too much of an American to think that Niagara Falls requires the assistance of a protective tariff to compete with anything made in England. If we can not compete with English manufacturers, with the enormous natural resources which we admittedly have, it is perfectly useless to try to do it by artificial means.

Mr. JONES of Arkansas. I should like to ask the Senator from Connecticut a question for information. How extensive is the manufacture of permanganate of potash? Is not caustic potash essential for the manufacture of that article, and is not cyanide of potash an article used largely by miners?

Mr. PLATT of Connecticut. Not at all. It is not used in the manufacture of cyanide, as I understand it. Yellow prussiate is used in its manufacture.

Mr. JONES of Arkansas. I am told it is used in the manufacture of permanganate of potash.

Mr. PLATT of Connecticut. I think not. Cyanide of potassium is made from the yellow prussiate of potash.

Mr. JONES of Arkansas. I was this morning told by a man who said he is interested largely in the manufacture of permanganate of potash that the increase on caustic potash would destroy that industry, which is a large one, unless a large corresponding increase was given on it.

Mr. ALDRICH. Caustic potash in this bill is on the free list. I do not see how there can be——

Mr. JONES of Arkansas. In this bill?

Mr. ALDRICH. Yes.

Mr. VEST. Not refined, in sticks, etc.

Mr. ALDRICH. Not in sticks and rolls. In any other form it is on the free list.

Mr. VEST. In this very paragraph you have sticks and rolls, and you have caustic potash free. I do not know why you have done it, but it is done.

Mr. CHILTON. I understood the Senator from New Hampshire to inform the Senate that the factory started at Niagara Falls had brought the price of chlorate of potash down to its present low level—about 7 cents a pound.

Mr. GALLINGER. No; the Senator did not quite understand me correctly. The factory which manufactured this product, and which ran for four months at Niagara Falls, did not sell the article as low as 7½ cents a pound; but as it began to supply the American market, even to the extent of one-sixteenth of the entire product, the United Alkali Company of Great Britain, which is an enormous concern, a trust, put the price so low that the American manufacturer could not continue in business, and he has gone out of business as the result.

Mr. CHILTON. My information differs altogether from that of the Senator from New Hampshire. I think the price of chlorate of potash has steadily fallen for the last four or five years, and that almost all the reduction occurred before the Niagara Falls company began operations.

Mr. GALLINGER. Mr. Ferguson, who I think probably knows what he is talking about, and who is president of the Chemical Construction Company, says that "previous to 1896 the price of chlorate of potassium had varied from 14 to 18 cents a pound." Of course there were some variations. Then it dropped to 7½ cents, showing the enormous profit that this great trust is receiving at the expense of the people of the United States.

Mr. GRAY. At the expense of what people?

Mr. GALLINGER. The people who are purchasing the article.

Mr. GRAY. It was not much at their expense if they were buying at the low prices.

Mr. GALLINGER. They were paying from 14 to 18 cents a pound, and they will do so again.

Mr. CHILTON. The truth probably is that the factory at Niagara Falls had nothing to do with the decline in price of chlorate of potash. It has been going down for several years. In 1894 it was 18 cents a pound, and before the factory started it had ranged as low as 11 cents a pound. The product of that factory constituted only about one-sixteenth of the total current consumption in this country. Fifty-five hundred thousand pounds were imported into the United States in 1896.

Mr. GALLINGER. Can the Senator from Texas give any good reason why in 1894 this product should have been at 14 and from that up to 18 in 1896, and then drop to 7½? Can it be possible that it is being produced for less than half what it cost in 1896?

Mr. JONES of Arkansas. The comparative statement which by authority is placed on the desks of all Senators shows that in 1893 the average unit of value of the article was 11 cents, instead of 14 to 18 cents.

Mr. GALLINGER. Can the Senator give any good reason why it went up to 18 cents in 1896?

Mr. JONES of Arkansas. I do not know that it did, according to these papers.

Mr. CHILTON. I do not believe the price was 18 cents in 1896. The plain fact is that this one American company produced merely a small fraction of the amount needed for American consumption. This small concern now calls upon Congress to impose a tax on the whole people of the United States, who imported and consumed last year 5,500,000 pounds of chlorate of potash, in order to

sustain it in the manufacture of 333,000 pounds, and the employment of about 50 men!

Of course I understand that the majority here have made up their mind to vote these items through, but it does seem to me appropriate that attention should be directed to this perversion of the theory of protection.

Mr. GRAY. Before this subject is dismissed from our attention, I wish to ask the Senator from New Hampshire if he quite understands the witness, Mr. Overbury, before the Ways and Means Committee, who was advocating a high protective duty on this article, in regard to the price of chlorate of potash. He tells us that the commercial uses of chlorate of potash are very wide; that it is used in calico dyeing; it is used in matches and in blasting powder, two very important industries in this country.

I happen to know something about the manufacture of matches and blasting powder, both of which are important industries in my own State. Therefore I may be excused for scrutinizing as well as I may the proposal here to tax those industries in behalf of the Niagara Falls industry, which is using the power that nature gives to make a small quantity of this material, and to let the Senate and the country see what the morals of this proposition are; that it is a proposition to tax all these great industries, just as worthy of consideration as this particular little industry, for the purpose of building it up. Mr. Overbury says that in 1894 the price was 13 to 14 cents.

Mr. WHITE. From what page does the Senator read?

Mr. GRAY. Page 116 of the blue book. In 1895-96 it was 7 to 7¼ cents. That was the price as stated by this manufacturer.

Mr. CHILTON. As I understand, it had reached the price of 7¼ cents a pound before the factory was started at Niagara Falls at all.

Mr. GRAY. That is true.

There is imported every year, or at least there has been this year, 5,500,000 pounds—

As the Senator from Texas said—

Our company will make a very small proportion of such a quantity. A duty of 5 cents a pound—

Says this modest gentleman—

will bring it back to about 12 cents a pound—

Nearly 100 per cent increase—

where it has been for a number of years.

And that nearly 100 per cent increase has to be borne by the manufacturers of medicinal preparations, by the manufacturers of blasting powder, which goes into more industries, perhaps, and is more diffusely used than almost any other article, and into the manufacture of matches.

Now, I ask why should those industries, and why should the people who are affected so widely by this tax, be called upon to chip in in order to support the Niagara Falls industry which Mr. Overbury advocated before the Committee on Ways and Means?

Mr. GALLINGER. The Senator from Delaware is laboring under a slight misapprehension, as is the Senator from Texas, when the Senator from Texas says that the decline occurred before the company started—in 1895. This company was started in June, 1895. When the Senator from Delaware makes his estimate upon the statement of Mr. Overbury as to the cost of this product, he should remember that the statement was made upon the basis of 5 cents a pound. There is a slight difference in that respect of 2½ cents a pound.

I do not care to prolong the debate, but I think the Senator from Delaware must be aware of the fact that there are a great many instances in our history where precisely this thing has happened in our country, that we have started a manufacturing concern and foreign manufacturers have put down the prices so low that they drove the American manufacturer out of business, and immediately when he went out of business, the foreigners put up the price, and our people had to pay the high price as they had paid it before we began to manufacture for ourselves. I can not state any particular instance, but I know there are a great many such instances in our history, and some very striking instances, which perhaps, before the debate is through, I will cite to the Senate in connection with some of the schedules.

I have no doubt that the price of this article was lowered by the great English trust for the simple purpose of driving out of business the American concern which was in competition with them, because if the establishment at Niagara Falls becomes a certainty, and under the protective policy of the Republican party they are enabled to manufacture this article at a living profit, it will not be the only manufacturing concern in this country that will be making the product, but there will be many others scattered all over the country, and in a little while we will be doing with it precisely as with tin plate. I remember the dire prophecies of the Senator from Delaware and other Senators in regard to tin plate, that we could not make it in this country, and that it was absurd to talk about it, and yet to-day we are manufacturing almost every pound used in the United States. So in regard to this article,

Mr. GRAY. You can make almost anything if you can get a subsidy from the Government to support it.

Mr. GALLINGER. We are manufacturing tin plate at a less price than the American consumer paid for it before.

Mr. GRAY. You can raise oranges under glass in New Hampshire if you get enough subsidy.

Mr. GALLINGER. That is no argument. We are selling tin plate at less price than the American consumer was paying for it when the dire prophecies were made by our Democratic friends that we could not manufacture it at all, that it was an outrage upon the American people and upon the dinner pail of the workman. Yet we imposed that duty. We put that burden upon the poor workingmen of the United States, and under that policy the American people have gone on and developed this great industry and are producing tin plate in almost if not entire quantities to meet the requirements of the people of this great country.

Mr. GEAR. To fortify that argument, I will state that tin cups were peddled in my State, or proposed to be peddled, at two or three hundred per cent increase to show how iniquitous the McKinley law was which placed a duty upon tin plate.

Mr. GALLINGER. In my judgment this is an instance where we are starting by the protective policy, in which the Republican party believes, a new industry in the United States; and while it may be for a little time something of a burden upon the consumer—it may be, I am not sure it will be—in my opinion it will be but a little while before we will be manufacturing all we require in this country, and then the price will be lowered by American competition, as prices are always lowered when competition in this country has a fair opportunity to operate. That is my judgment. I may be wrong about it, of course.

Mr. GRAY. If the Senator will allow me, I do not want to take away the foundation upon which he stands—I do not know that I shall do it, certainly not in the Senator's opinion—but the illustration he uses is an unfortunate one—tin plate. He said we will have as to this industry what has occurred in respect to many others, and conspicuously tin plate, an industry built up by a high protective tariff. Yet up to 1894 the duty on tin plate had been 2 cents a pound, when the Wilson Act reduced it to 1⅛ cents, and if the tin-plate industry in this country has flourished at all, it has flourished under the lower duty and not under the higher.

Mr. GALLINGER. Yes; but it was established under the higher, and I have no doubt that after a time we can make tin plate practically without any duty.

Mr. GRAY. But in the year 1894 many Senators stated—I do not know whether the Senator from New Hampshire did—that if we reduced the duty from 2 cents to 1⅛ cents tin-plate establishments would die, they could not exist, and could not be prosperous with the lower rate of duty at all.

Mr. GALLINGER. Very likely. There were false prophecies made by Republicans as well as by Democrats. We are all human. But I do not care to prolong this controversy. Of course, if I should suggest that we used to pay a duty of $16 or $18 or $22 a ton on steel rails and in this bill the duty is $6.72, the Senator would say that the fact that we are manufacturing our steel rails in this country has nothing to do with it; that if we let England sell us steel rails as she used to do, at $160 a ton or thereabouts, England would continue to sell them as cheap as they are being produced and sold to the American people by American manufacturers. I do not believe that that is true. Of course I do not argue the matter. I shall not attempt to convert the Senator from Delaware to my way of thinking, because I know I can not do it, but nevertheless that is my conviction, and my conviction rests in regard to this little industry about which we are talking now upon the same belief—that we will build up here an American industry and will employ American labor and will furnish this product to the American people at a price not larger, certainly, than it is being sold for at the present time.

Mr. GEAR. May I suggest to the Senator from Delaware, as to tin plate, that, as almost everybody knows, in the manufacture of tin plate it is necessary to secure cheap billets, and the method of manufacturing billets is far cheaper now than even six years ago. Therefore tin plate can be made cheaper.

Mr. GRAY. Then it is not the tariff.

Mr. GEAR. The tariff helped.

Mr. GRAY. That is what I have contended for all along—that the tariff has nothing to do with the tin-plate industry in this country; and there is no man who is not so possessed of the protective idea as to have lost that common sense which in other respects might distinguish him who would not recognize the fact that the tin-plate industry at least owes none of its prosperity to the protective hand of the Government. I was wrong a moment ago, for it was even a greater reduction than I supposed. The duty on tin plate was reduced from 2.20 cents a pound to 1⅛ and not 1⅛ cents, as I said.

Mr. GALLINGER. That is right.

Mr. GEAR. My friend omits one thing. Of course, as a Republican, I believe these great industries were built up by the

protective system. The Senator from Delaware himself admitted that the pulp and paper industry had been built up by the protective system, and now he says that as to tin plate the tariff had nothing to do with it or anything else.

Mr. GRAY. I do say so, and I say the facts which are patent to everyone, that the tin-plate industry, which did not exist and did not flourish under a duty of 2.20 cents a pound, has flourished since it was reduced to 1⅛ cents a pound, demonstrate that there were other causes for that prosperity than the tariff.

Mr. CHILTON. While it is a sort of perfunctory performance to raise objections, it does not seem right that the claims made should go unchallenged on the floor of the Senate. My statement about the fall in the price of chlorate of potash was made largely from memory. My statement, however, concerning the date of the opening of the manufacturing establishment at Niagara Falls was derived from the testimony contained in the hearings, which have been published. I do not think I can be mistaken in the impression that the price of chlorate of potash went as low as 7 or 8 cents a pound in 1895.

Again, looking at the hearings, I call the attention of the Senator from New Hampshire to the testimony of Mr. Overbury, on page 116. The testimony was taken December 28, 1896. He was asked this question in regard to chlorate of potash:

How much do you manufacture?
Mr. OVERBURY. Our one company manufactures not far from one-third of a million.
Mr. PAYNE. How long have you been manufacturing it?
Mr. OVERBURY. About six months.
Mr. PAYNE. Six months since you commenced it?
Mr. OVERBURY. Yes, sir.

If that testimony is true, the factory at Niagara Falls was started in 1896, and not in 1895. The great fall in the price of chlorate of potash, which seems to have been an accomplished fact in 1895, must have occurred, therefore, anterior to the establishment of the industry in New York.

Mr. CAFFERY. Mr. President, I think the Senator from New Hampshire [Mr. GALLINGER] has been very unfortunate in the witness he summoned to prove his case. It is only one evidence of the exaggerated statements that interested parties will make when they want the helping hand of the Government to assist them in their business.

The authentic figures of the prices of chlorate of potash put down on the comparative statements show that in 1893 the article was selling at 11 cents a pound. In 1896 it was 8 cents a pound. Now, the witness whom the Senator from New Hampshire has summoned to prove his case makes this statement:

The import in 1893 was 4,064,176 pounds; in 1894, 4,131,055 pounds; in 1895, 4,549,899 pounds; in 1896, 5,526,913 pounds. This company invested a large amount of capital in its plant, which was designed to turn out about 400,000 pounds, or less than one-sixteenth of the amount consumed in this country. A duty of 5 cents a pound on the balance, which would still have to be imported, would yield a revenue to the Government of over $250,000 per annum. Previous to 1896 the price of chlorate of potassium had varied from 14 to 18 cents a pound.

"Previous to 1896 the price of chlorate of potassium had varied from 14 to 18 cents a pound."

Now, I submit to the Senate whether the statements of this witness are to be taken or the authentic finding of the fact by the Chief of the Bureau of Statistics? With what kind of grace can an industry of this sort come before the Senate of the United States or the Congress of the United States and ask the Government to support it when it supplies only one-sixteenth of the consumption of the United States?

Mr. GALLINGER. Upon precisely the same ground that we protect sugar produced in Louisiana, which is an infinitesimal proportion of what we consume.

Mr. CAFFERY. The keystone of the arch of Republican tariff taxation is free sugar. It was so declared in 1890. There is not a Republican of any prominence who was then in the Senate of the United States or the Congress of the United States who did not at that period declare that the tariff upon sugar was not within the circle of the protective idea, that it was not within the grasp of that principle.

Mr. GEAR. Mr. President——

Mr. GALLINGER. We protected it by a bounty.

Mr. GEAR. That is the statement I was about to make.

Mr. CAFFERY. And unanimously almost, if not entirely, the Congress of 1890 voted for free sugar, and in 1894 it substituted the debauching and the demoralizing principle of bounty in lieu of the Democratic principle of tariff for revenue on sugar.

Mr. GEAR. May I interrupt the Senator from Louisiana?

Mr. CAFFERY. Certainly.

Mr. GEAR. That is true. The Republican party in the House and the Senate of the United States voted for free sugar. We did place a bounty on it, under an arrangement of law, to last fifteen years, and the Democratic party, with a moral obliquity that always astonished me, refusing to carry out that which was an unwritten contract, the law of the land, took away the bounty. They refused to pay the bounty which was due, and there had to be a decision of the court to make them pay it.

Mr. CAFFERY. I am not one of those individuals who can see any moral obliquity in a party who proposes and makes a gift and then revokes it at any period he chooses. There was no party to make a contract with. It was not a contract in any sense.

Mr. GEAR. The Senator from Louisiana is a lawyer. He knows that a contract was made with every man in this land, from ocean to ocean, who would embark in the growth and production of sugar. Therefore it was a moral contract, a legal contract, in my judgment, of the Congress of the United States with those people.

Mr. CAFFERY. When we go into a metaphysical disquisition of moral contracts, I would propose to my Republican friends to have some tender regard for the bowed-back labor of this country. A moral contract implies a moral obligation, and you have behind you a moral obligation of the strongest kind in these depressed times not to be piling up the taxes on the backs of the people of the United States.

To call the bounty of 1890 a legal contract is a misnomer. It was never a contract. It can not be a contract. How can a government contract with itself? Who was the other party to the contract? It was nothing on earth but a gift, a pernicious gift, a demoralizing gift, a debauching gift, the bad consequences of which the Senator from Iowa heard the other day in the demand of an export gift upon cereals exported from this country.

Mr. GEAR. I imagine the Senator from Louisiana himself in person and his colleagues from that part of the country were beneficiaries under that gift and partook of its benefits.

Mr. CAFFERY. There is an old Spanish proverb which says, "Never look a gift horse in the mouth." The gift was forced upon us ex invito. We did not want it. I for one stand on Democratic lines when I ask for a tariff on sugar. It is the keystone of the arch of the Democratic idea of revenue. It produces revenue, and more revenue than any other article upon the dutiable list. It has less evil effect in building up any class of citizens at the expense of others than almost any other article upon the dutiable list, unless you find one that is not produced at all in the United States. It is produced to such a small extent that the tariff upon it yields money that goes into the coffers of the Government and not into the pockets of monopolists or classes, not into the pockets of such a gentleman as you now propose to pay by this tariff upon the prussiate of potash. Bring better witnesses than this gentleman. He is overthrown and controverted by the facts from the Bureau of Statistics. In being falsus in uno, he is falsus in omnibus. The statement that the English manufacturers have depressed the price of this article purposely to destroy the American industry, in my opinion, has no weight.

It is correctly stated by the Senator from Delaware that the natural surroundings, the natural resources, the natural ability of the American people have created the industry of tin plate, and the tariff on tin plate is not the cause of the growth of the industry. Sir, we have a new industrial force, we have a kind of moral machinery which surpasses the ingenuity of the mechanics and overslaughs all of nature's resources and advantages. It is the artificial product of Republican minds, that extraordinary production called a tariff bill. When you have tariff, you have everything you want. If you do not have tariff, the American industries languish and suffer and die. There is not a single American industry to-day that stands on its own legs and can compete with a foreign market that has not built itself up in spite of tariff, and that can not retain its hold in spite of tariff.

The VICE-PRESIDENT. The question is on the amendment of the Senator from Rhode Island [Mr. ALDRICH] to the amendment of the committee to strike out "three" and insert "two and a half" in line 16, page 12.

Mr. VEST. That is an increase of one-half a cent over the amendment of the committee?

Mr. FRYE. That is right.

Mr. ALDRICH. And a decrease of one-half a cent from the House bill.

Mr. VEST. But an increase of one-half a cent over the amendment before the Senate.

The VICE-PRESIDENT. The amendment to the amendment is to strike out "three" and insert "two and half."

Mr. VEST. Very good. Let me state the proposition as I understand it. The House bill proposes a duty of 3 cents. The Senate committee reported in lieu of that a duty of 2 cents. The Senator from Rhode Island, on behalf of the majority of the Committee on Finance, proposes now an increase from "two" to "two and one-half cents."

Mr. WHITE. He proposes to amend the committee amendment.

Mr. VEST. He proposes to amend the committee amendment by making it 2½ cents.

The VICE-PRESIDENT. The Chair so understands.

Mr. VEST. On that I call for the yeas and nays.

The yeas and nays were ordered; and the Secretary proceeded to call the roll.

Mr. CLAY (when his name was called). I am paired with the junior Senator from Massachusetts [Mr. LODGE]. If he were present, I should vote "nay."

Mr. GALLINGER (when his name was called). I am paired with the senior Senator from Texas [Mr. MILLS]. I will transfer that pair to the Senator from Connecticut [Mr. PLATT], and vote. I vote "yea."

The roll call having been concluded, the result was announced—yeas 33, nays 27; as follows:

YEAS—33.

Aldrich,	Elkins,	McBride,	Sewell,
Allison,	Fairbanks,	McMillan,	Shoup,
Burrows,	Foraker,	Mason,	Spooner,
Cannon,	Frye,	Penrose,	Stewart,
Chandler,	Gallinger,	Perkins,	Warren,
Clark,	Gear,	Platt, N. Y.	Wetmore.
Cullom,	Hanna,	Pritchard,	
Davis,	Hawley,	Proctor,	
Deboe,	Jones, Nev.	Quay,	

NAYS—27.

Bacon,	Faulkner,	McEnery,	Rawlins,
Bate,	Gray,	Mallory,	Roach,
Berry,	Harris, Kans.	Mitchell,	Turpie,
Caffery,	Heitfeld,	Morgan,	Vest,
Chilton,	Kenney,	Murphy,	Walthall,
Cockrell,	Kyle,	Pasco,	White.
Daniel,	Lindsay,	Pettus,	

NOT VOTING—28.

Allen.	Hale,	Martin,	Teller,
Baker,	Hansbrough,	Mills,	Thurston,
Butler,	Harris, Tenn.	Morrill,	Tillman,
Carter,	Hoar,	Nelson,	Turner,
Clay,	Jones, Ark.	Pettigrew,	Wellington,
George,	Lodge,	Platt, Conn.	Wilson,
Gorman,	Mantle,	Smith,	Wolcott.

So Mr. ALDRICH's amendment to the amendment of the committee was agreed to.

Mr. JONES of Arkansas. I wish to make a parliamentary inquiry. The vote just taken, as I understood the Chair to announce it a while ago, was on the adoption of the amendment proposed by the Senator from Rhode Island to the amendment of the committee.

The VICE-PRESIDENT. Yes, sir; adding the words "and one-half." The question now is upon striking out "three" and inserting "two"——

Mr. JONES of Arkansas. "Two and one-half."

Mr. FRYE. The question is on the amendment of the committee as amended.

Mr. ALDRICH. I suggest that while it may be in order in the Senate, it is not now in order to strike out a proposition which the Senate has just placed in the bill by an affirmative vote.

Mr. BERRY. It has not been put into the bill. The Chair announced that the question was on the amendment proposed by the Senator from Rhode Island to the amendment of the committee, an amendment to an amendment, and the vote was taken on that. Now the question would recur on the committee amendment as amended.

Mr. ALDRICH. I beg the Senator's pardon, Mr. President.

Mr. FRYE. As amended, of course.

Mr. BERRY. That is the situation.

Mr. WHITE. I notice in the testimony of a gentleman who has already been referred to, Mr. Overbury, he states that 3 cents would not protect him, and therefore we are in the unfortunate and unsatisfactory position of voting for this increased taxation without building up any industry.

Mr. TILLMAN. It seems to me that is good Democratic doctrine. We are getting revenue out of it, and it is purely a revenue matter, as it does not protect anybody.

Mr. JONES of Arkansas. As a parliamentary question, the motion I believe pending now is a motion to strike out "three" and insert "two and one-half." Is a motion to strike out and insert divisible? If so, I should like to have a vote on the first proposition to strike out "three," for the purpose of leaving this article on the free list, where it is now.

Mr. ALDRICH. A motion to strike out and insert is not divisible under the Senate rules, as I understand.

The VICE-PRESIDENT. The Chair so understands.

Mr. JONES of Arkansas. Then I can not make the motion I should like to make.

The VICE-PRESIDENT. The question is on the amendment of the committee as amended, to strike out "three" and insert "two and one-half," in line 16, page 12; so as to make the paragraph read:

60. Caustic or hydrate of, refined, in sticks or rolls, 1 cent per pound; chlorate of, 2½ cents per pound.

The amendment as amended was agreed to.

The Secretary resumed the reading of the bill. The next amendment of the Committee on Finance was, in paragraph 63, page 12, line 23, after the word "pound," to strike out "cyanide of, 6 cents per pound;" so as to make the paragraph, under the subhead "Potash," read:

63. Prussiate of, red, 3 cents per pound; yellow, 4 cents per pound.

Mr. STEWART. In regard to the amendment of the committee, I am in favor of it, but if it were adopted without further action it would increase the duty. The duty now under the bill is 25 per cent ad valorem. They are selling in this country cyanide of potassium as high as 35 cents. I understand it is lower than that, and that it is now to be sold for 26 cents. That would be 6½ cents specific.

Mr. ALDRICH. On the foreign price?

Mr. STEWART. No; on the price here. They say they are willing to sell it here at that. They have not sold any.

Mr. ALDRICH. The foreign cost would be less than that, and the action suggested by the committee would be a reduction of the rate rather than an increase.

Mr. STEWART. It is on the free list. Twenty-five per cent ad valorem is absolutely a prohibitory duty. This same article is sold in South Africa at about 22 cents a pound. This is the most important item in the whole chemical schedule so far as our country is concerned. Within the last few years a process of working gold ores has been discovered which has been applied to ores that otherwise could not have been worked at all. It is used in the Western mining States, in South Africa, and elsewhere. It is the most important discovery that has been made in many ways in regard to the working of gold ores. There are vast beds of low-grade gold ores in Nevada, Idaho, Montana, Utah, and in all the mining States. These ores have not been worked because what they get out of them would not pay expenses. A vast amount of them are not worked to-day on account of the cost of cyanide. Cyanide of potash costs so much that it interferes with the working.

It must be taken into consideration that they advance in the working of these gold mines just as fast as possible. They work mines at a loss until they get broke on them, with the hope of striking something better. It is a very fascinating business. The slightest tax strikes them very heavily. This is the most important element in the mining industry. The expense of it in this country has been a great drawback, and it is prohibitive to the working of many mines that otherwise would be worked. If it is important to increase the gold product, particular attention must be paid to this article, cyanide of potassium. I desire to have it perfectly understood. It was not understood in the House, because the facts were not brought out so far as the report is concerned. The House committee did not have the facts before it when they considered it, and it has not been fully considered.

Mr. GRAY. The committee has stricken out the duty proposed by the House, has it not?

Mr. STEWART. The committee has stricken out the rate of 6 cents per pound, but it has left a duty of 25 per cent ad valorem, which at a price anywhere above 24 cents would be an increase. It never has been sold in this country as low as 24 cents. It was sold in South Africa at an average price last year, I am told, of 22 cents. At 26 cents the rate would be 6½ cents instead of 6 cents. So it is doubtful whether the amendment would enlarge or decrease the duty. When we get to the free list, I propose to move to put it on the free list, and I shall then show the facts. There may be other changes in this same paragraph 63. Yellow prussiate may have to be reduced, because that is the base in making the other article, and they can be considered together. I hope that the amendment of the committee will be adopted, and that the question will then be left open until we come to the free list, so as to adjust this matter.

The VICE-PRESIDENT. The question is on agreeing to the amendment reported by the committee.

The amendment was agreed to.

Mr. RAWLINS. Mr. President, I move to strike out from the same paragraph the words "yellow, 4 cents per pound;" and I will state the effect of the amendment, if made. The alkali which it is proposed to tax in that way at 4 cents a pound would stand upon the free list. I gave notice yesterday, as the Senator from Nevada [Mr. STEWART] has given notice now, that when the free list is reached a motion will be made to put cyanide of potassium upon the free list. The yellow prussiate of potash is essential to the manufacture of cyanide of potassium.

The only manufacturers of cyanide of potassium in this country state that if they could have the yellow prussiate free of duty, and caustic potash, which is already free of duty, they can then compete with all the world in the manufacture of this article. I will read a brief statement to that effect from the Roessler & Hasslacher Chemical Company, manufacturing and importing chemists, in which they use the following language:

Give us free prussiate of potash and free caustic soda and we are willing to let cyanide of potash stand on the free list and to waive the claim to be compensated by the duty for the higher wages we have to pay in the manufacture of cyanide. We have, however, to take the circumstances as they are, or rather as they will be in the new tariff, and only these circumstances we want to have considered for cyanide in the new tariff.

This yellow prussiate of potash used in the manufacture of cyanide of potassium formerly was manufactured out of animal

refuse, but a new and improved method of manufacture has been discovered. It is now obtained as a by-product from the manufacture of gas. They are now manufacturing it extensively in Philadelphia in that way. They are enabled by this method of manufacture to compete with all the world. There is now a duty of 25 per cent upon the yellow prussiate of potash, but the American manufacturers have put down the price substantially so that the foreigners are unable to compete. As has already been pointed out, cyanide of potassium is of the utmost importance to the mining industry of the United States.

These propositions ought to receive the unanimous support of the members of all the parties in the Senate. The Republicans last fall in their campaign made their claim to the American people in favor of sound money and a protective tariff. The gold standard is essential to sound money, in their estimation. The production of gold is therefore a part of their cardinal creed. In voting upon this amendment they will have to determine whether they prefer protection to sound money. The Democrats are always favorable to any proposition which looks to the reduction of taxation and to the increase of industrial freedom. They are also in favor of an enlargement of the circulation, so that the people in carrying on trade and business may not be hampered and obstructed. As to the members of the Populist party, they, too, agree that we ought to have an enlarged circulating medium.

Cyanide of potassium is the means by which common earth almost is transformed into gold, which is now the most highly prized article of our advancing civilization and the very essence of sound money. We have in Utah large beds of earth. Nothing can be discovered in it. It looks like common clay. They dig it out of the hills, put it into vats, and put some cyanide of potassium in water and let the water run through the earth, and after it has percolated through the soil, it is converted into pure gold and carried to our mints and made into money. This stuff is taken out of the hills by the thousands of tons. We have mountains of it. It carries $2, $3, $5, $6, and sometimes as high as $7 a ton. Upon a slight increase in the cost of cyanide of potassium depends whether we shall have the output of millions or perhaps an output of nothing in the way of gold.

I appeal to the Republicans to investigate this question before we reach the free list. I appeal to all members of the Senate, because this is a new industry and it depends upon the placing upon the free list of cyanide of potassium.

Now, one word as to the manufacture of cyanide of potassium. It is unnecessary to protect it. It is true it has heretofore been manufactured by using prussiate of potash, but they have recently discovered a new method, by which the cyanide is extracted from the air. We can not put any tariff upon air to exclude it. They are now manufacturing it by what is known as the Roessler process in Germany out of air. The establishment in this country is located at Niagara Falls.

It can not be for the protection of national labor or to increase the wages of workingmen, because the power and force which is used to bring about the necessary mechanical combinations to produce this result by which gold is obtained is that which is given by nature itself at Niagara Falls. These manufacturers state that the labor cost is infinitesimal. Therefore there can be no reason whatever why any tax should be put upon cyanide of potassium, as it comes as a result of the manufacture of gas; the prussiate ought not to be protected, and these upon the free list reduce the cost of this article which is a prime necessity for the struggling production of gold in such quantities as to enable us to remain upon a gold basis and have sound currency in the estimation of our friends upon the other side.

Mr. WHITE. I simply wish to call attention to the phraseology in the paragraph referred to by the Senator from Utah [Mr. RAWLINS]. "Cyanide of potash" should be "cyanide of potassium." I believe the matter will be considered hereafter, but I mention that fact now in order that the correction may be made.

Mr. ALDRICH. The proposition of the Senator from Utah should not be adopted, because yellow prussiate of potash is not only used in the manufacture of cyanide, but it is used for many other purposes. It is a very important product of potash, and it should be allowed to remain as it is now in the bill.

Mr. RAWLINS. Mr. President, I did not make the motion to strike that out with a desire to have it voted upon at present, unless the Senator should insist upon it. I am willing that it may go over, to be voted upon when we come to the free list, and consider the whole question together. At that time I shall have other facts to present, which I think will make it plain that this motion of mine ought to be sustained.

Mr. ALLISON. As to the amendment proposed by the Senator from Utah, at any time before the bill is reported to the Senate the motion will be in order which he desires to make.

Mr. RAWLINS. I give notice, then, that I shall make it when we reach the free list, so that these questions can be considered together.

Mr. ALDRICH. I understand the Senator from Utah to withdraw his amendment.

The VICE-PRESIDENT. There is no amendment pending.

Mr. ALDRICH. In view of the fact that we have made considerable progress to-day upon the bill, and in view of the further fact that I know Senators who are engaged in the examination of the bill are greatly fatigued with their work for the past week, I move that the Senate adjourn.

Mr. JONES of Arkansas. Will the Senator withdraw that motion for one moment?

Mr. ALDRICH. Certainly.

Mr. JONES of Arkansas. I have an analysis of the explanation of the sugar schedule presented by the Senator from Rhode Island [Mr. ALDRICH], made by a gentleman connected with the sugar trade in New York. He advocates propositions in which I do not believe; but as I think Senators ought to be fully advised as to the views of all gentlemen who are informed on this question, I ask leave to have this statement inserted in the RECORD, so that Senators may see it.

I also have two letters of Willett & Gray, of New York, together with certain statements of theirs as to the value of sugars, which, I think, will be interesting to all Senators. I ask leave to have these letters, together with the statement to which I have referred, inserted in the RECORD.

The VICE-PRESIDENT. Is there objection? The Chair hears none, and that will be the order.

The statement and letters referred to are as follows:

STATEMENT OF PIERRE J. SMITH, OF NEW YORK.

Senator ALDRICH's defense of the Finance Committee's sugar schedule, as reported in the Evening Post, probably appears quite reasonable to anyone not posted about sugar, but to anyone in the trade the reasons given for adopting compound instead of specific rates are utterly unsound and infinitesimal compared with the objections to an ad valorem duty in any form.

First. He states that the Dingley rates applied to all importations of sugar at New York during January last show a range of 73.2 to 144.3 per cent ad valorem, and are very unequal on low grades. I do not know why the importations during January were selected and how the percentages were arrived at, but from knowledge of the business I believe such a statement does not fairly represent the facts, and if the comparisons were carefully figured out on the basis of the in-bond values ex ship for landed tests (which is the only fair basis), the results would probably be quite different, and might furnish better arguments for a specific duty.

Our raw-sugar-trade committee represents receivers of raw sugars from all parts of the world, and we have shown the Finance Committee and the Ways and Means Committee that the Dingley rates figure out only about 72 per cent ad valorem on to-day's extremely low values, and only about 50 per cent on low average values, such as prevailed when the Wilson bill was passed. Fully 97 per cent of all the sugars imported test between 84° and 97°, and under the Dingley schedule the variation in duty on these sugars is not exceeding 1 per cent.

Second. Senator ALDRICH states that the high specific rates on low grades testing under 87° would exclude these sugars from the United States.

In reply to this I can only say that such would not be the case, as the rates in the Dingley schedule are so graduated as to impose fair rates of duty on all sugars testing from 75° to 100°:

Can Senator ALDRICH tell why more low grades were imported under previous less carefully drawn specific schedules than under the present ad valorem Wilson bill?

Can he say why the entire raw-sugar trade of New York appointed our committee to protest against an ad valorem duty in any form if it had proved fair, reliable, or practicable?

Does he think the receivers of all grades of raw sugar, both high and low, would recommend the Dingley schedule if it would exclude any sugars?

Third. He states the total amount of sugars used testing under 87° is very small, and for obvious reasons the quantity is rapidly decreasing, but intimates the importation of same is very important, viewed from the standpoint of our trade and commerce.

This statement is rather remarkable, as it is difficult to see how the importation of a very small quantity of sugar (and even that small quantity rapidly decreasing) is such an important matter, viewed from the standpoint of trade and commerce, especially as the present bill is expected to enable our domestic producers to soon supply a good share of our consumption, and what will then become of this "little but so important trade in low grades," which Senator ALDRICH's committee has found it so necessary to protect?

Can Senator ALDRICH say why an allowance from the Dingley rates on such sugars would not have easily adjusted any discrimination against them, if there was any? And would this not have been a much better plan than adopting the ad valorem rates, which were strongly opposed by the domestic sugar producers and the raw-sugar trade, and were only wanted by the refiners?

His remarks about driving near-by low grades and all distant sugars from the United States and to free markets like Canada and England are without foundation, and are not borne out by the working of previous graduated specific duties. At present Canada has a specific duty of one-half cent on all grades of raw sugar below 16 Dutch standard, so that under the fairly graded rates of the Dingley schedule the shippers will be only too glad to send their sugars to the United States instead of Canada.

Under Senator ALDRICH's schedule, all sugars under 38° will be shut out if the market advances, as they will have to pay 75 per cent on the advance, while sugars over 88° will only pay 35 per cent on such advance. What will then become of this important "little trade in low grades?"

Fourth. Senator ALDRICH states that the compound rates were adopted on sugars over 87° because the specific rates would discriminate against sugars from some localities as compared with others.

The facts in the case do not bear out this statement, as the variation in the values of cane sugars of same test is very slight, if any, and a written statement, made by Professor Wiley, of the Agricultural Department, and which was filed with the Finance Committee, states that, as beet sugars are made to-day, there is no necessity to discriminate in their favor, as against cane sugars, in making up a schedule for duty.

Our committee showed tests of beet sugars recently arrived which contained less ash and impurities than many cane sugars.

There is, therefore, no good reason for adopting an ad valorem duty on sugars testing either above or below 87°, while there were shown conclusive

arguments why the ad valorem duty in any form is utterly unfair and resulted in great discriminations against sugars of same values coming from different countries, and even from different places in same countries.

It is also shown that it was unreliable for revenue purposes, and in many cases utterly impracticable, and resulting in continual reappraisements, disputes, etc.

Fifth. We heartily agree with Senator ALDRICH in giving our refiners adequate protection, but it is not necessary to have ad valorem rates to do this, as it can just as well be given openly under a specific schedule by adding sufficient extra duty on all sugars over 16 Dutch standard in color.

It is estimated by experts that the Wilson bill gives refiners about one-fourth to five-sixteenths cent protection, and the Senate schedule three-sixths to seven-sixteenths cent, as long as the bounty on beet sugars remains as at present.

It has been proved quite conclusively that our refiners have made plenty of money under the Wilson bill, and the leading one has made about 10 per cent dividends on $75,000,000 capital, and a large surplus besides, although it is estimated refineries could be built to turn out on the average as much sugar as they have for about $10,000,000, and could be built and run with a capital of about $15,000,000.

Under the circumstances it is not likely the refining industry would suffer under the Dingley specific schedule, especially if the extra duty on sugars over 16 Dutch standard should be made one-fourth cent.

The increased importations of foreign refined during the last few years have been owing mostly to the high prices prevailing here for refined, last August-October the difference between 96° centrifugals and granulated being 1¼ cents, and showed a profit to the refiners here of 1 cent, or over $5 per barrel, and at present the difference is 1 cent and the profit about one-half cent, or over $1.50 per barrel.

The large importations during April were owing to the probable increase in duty, and the longer the tariff bill is delayed the larger will be the importations of both refined and raw of all grades and descriptions.

Foreign refined is of poorer quality and hard to sell, even at one-eighth cent to one-fourth cent below prices for American refined, and last year our refiners were able to buy from the importers a large quantity of this foreign refined and remelt it, as the importers had hard work to sell it to the trade.

I give you these facts merely to show there is no necessity of an ad valorem duty to protect our refiners.

Messrs. Arbuckle and Doscher are both building new refineries to compete with the trust, and I believe any protection over one-fourth cent openly given our refiners will result in still further refineries, which will before long result in plenty of competition here and greatly reduced profits.

It seems to me Senator ALDRICH is making a mountain out of a molehill, while utterly ignoring more serious difficulties which an ad valorem duty in any form will surely bring about.

No. 91 WALL STREET, NEW YORK, *May 22, 1897.*

DEAR SIR: Your favor of 21st instant is received and noted.

The market value of a degree of sugar is mostly one-sixteenth cent to three thirty-seconds cent, after having given the fixed standard to start from, say 96° for centrifugals, 89° for muscovados and molasses sugar, 64° for lowest grade muscovados.

In detail, the duty-paid value to-day of each grade as per tests is as follows:

Centrifugals:		Muscovados:	
96°	3.43¾	94°	2.90¾
96°	3.375	93°	2.87¼
97°	3.3125	92°	2.84¼
98°	3.25	91°	2.81¼
95°	3.1875	90°	2.78¾
94°	3.125	89°	2.75
93°	3.061¼	88°	2.6875
92°	2.9375	87°	2.625
91°	2.84¾	86°	2.56¼
90°	2.75	85°	2.50
Molasses sugar:		**Lowest grades muscovados:**	
90°	2.50¼	84°	2.43¾
89°	2.50	83°	2.34¼
88°	2.43¾	82°	2.25
87°	2.375	81°	2.15¼
86°	2.3125	80°	2.06¼
85°	2.25	79°	1.96¼
84°	2.1875	78°	1.87¼
83°	2.09¾	77°	1.78¾
82°	2.00	76°	1.68¾
81°	1.90¾		
80°	1.81¼		

The custom-house fixes the ad valorem duties on cost of sugars f. o. b. in port of shipment, less certain port charges, etc., varying from different countries, and in some instances, where the foreign port has no general market for sugar, they arrive at the dutiable value by taking the cost and freight valuation and figuring backward.

If you will make up a pro forma of what you are trying to show, we will fill it out for you.

Yours, truly,

WILLETT & GRAY.

J. SCHOENHOF, Esq.
Care of Senator James K. Jones, Washington, D. C.

NEW YORK, *May 25, 1897.*

DEAR SIR: Your favor of the 24th instant is received and noted.

You can not do it that way. The duty-paid prices of sugar give no indication of dutiable value whatever, as they include freight, landing charges, duties, and profits and losses to importers.

It is absolutely impossible to draw an argument or make such an application from duty-paid prices. The appraisers sometimes use the cost and freight values here and figure back to the dutiable value for such ports as have no regular markets. What you require is the dutiable values as computed at the custom-house, and that would be an endless job, and would require to be taken at some one special time or month when values were about stationary, as under ad valorem duties the values constantly change.

We inclose a few samples taken from our custom-house for sugars of same test coming from different countries.

There are no net dutiable values adopted by the custom-house for various sugars. Every importation stands on its own merits and is assessed duty by its actual value at port of shipment on day of export less certain port charges, etc., allowed by appraisers, except as above stated.

The demand for specific duties has tried to be met by assuming that the dutiable value per degree of three one-hundredths of a cent per pound is as near correct as is practicable, and probably it is, except as to the lower grades of sugars for which the same test has one-fourth cent per pound difference in market value, and no kind of a specific duty can be devised that will not discriminate against such low grades, unless a special schedule is arranged for them by name.

In the haste of making up the values, we find on examination that several degrees were wrongly valued, and we send correction of same herewith. In explanation, muscovados are sold on 89° basis, with one thirty-second of a cent per degree up and one-sixteenth of a cent per degree down, and in other cases there is three thirty-seconds of a cent per pound difference per degree in selling values. You will note the difference in dutiable values of 96° sugars from Java, Trinidad, Santo Domingo, Barbados, and Cuba, caused by difference in f. o. b. values and rates of freight, etc., while all have the same value on arrival if sold on the same day.

From all this you will see there is no absolutely certain way of confirming or rejecting values per degree for specific schedule for duties, and the only way to make it a specific tariff is by two one-hundredths, three one-hundredths, or four one-hundredths of a cent per degree difference in duty. Some grades should have two one-hundredths, some three one-hundredths, and some four one-hundredths of a cent, but the objection is to introducing so many dividing lines into a specific duty, and so some grades must suffer from a regular three one-hundredths of a cent or a regular two one-hundredths of a cent difference, and the smaller the specific duty and the larger the ad valorem part of the duty the less they suffer.

Yours, truly,

WILLETT & GRAY.

J. SCHOENHOF, Esq.,
Care of Senator James K. Jones, Washington, D. C.

87° test.

Test	89.56°	89.55°.
Dutiable value	1.738 cents	1.724 cents.
United States currency	1.738 cents	1.724 cents.
Equal dutiable value, 87°	1.578 cents	1.575 cents.
Wilson duty 40 per cent	.631 cent	.630 cent.
Dingley bill	1.36 (1.44) cents.	1.36 (1.44) cents.
Difference	.729 cent	.733 cent.
Senate	1.48 cents	1.48 cents.

Specific duty of 1.36 cents per pound on 87°-test sugars raises the duty on muscovados 70¼ cents to 73⅞ cents per 100 pounds, imported from different parts of the world, while it raises the duty on molasses sugars of the same test 77⅞ cents to 84⅛ cents per 100 pounds. In other words, the specific duty of 1.36 cents for 87°-test sugars of all descriptions raises the duty from the 40 per cent ad valorem basis fully one-eighth cent per pound more on molasses sugar than on muscovados, while the molasses sugar has an inferior market valuation of one-fourth cent per pound. The specific-duty basis thus gives a discrimination against the use by refiners of the lower grades of 87°-test sugar.

EXECUTIVE SESSION.

Mr. ALDRICH. I renew my motion that the Senate adjourn.

Mr. FRYE. I hope the motion will be withdrawn, and that we may have an executive session.

Mr. ALDRICH. Very well; I withdraw the motion.

Mr. ELKINS. I move that the Senate proceed to the consideration of executive business.

The motion was agreed to; and the Senate proceeded to the consideration of executive business. After eleven minutes spent in executive session the doors were reopened, and (at 5 o'clock and 22 minutes p. m.) the Senate adjourned until to-morrow, Friday, May 28, 1897, at 12 o'clock meridian.

CONFIRMATIONS.

Executive nominations confirmed by the Senate May 27, 1897.

PROMOTION IN THE NAVY.

Asst. Engineer Doctor E. Dismukes, to be a passed assistant engineer.

ENVOYS EXTRAORDINARY AND MINISTERS PLENIPOTENTIARY.

Edwin H. Conger, of Iowa, to be envoy extraordinary and minister plenipotentiary of the United States to Brazil.

Charles Burdett Hart, of West Virginia, to be envoy extraordinary and minister plenipotentiary of the United States to Colombia.

POSTMASTERS.

J. H. Porter, to be postmaster at New Wilmington, in the county of Lawrence and State of Pennsylvania.

C. N. Marvin, to be postmaster at Shenandoah, in the county of Page and State of Iowa.

James L. Berry, to be postmaster at Humeston, in the county of Wayne and State of Iowa.

L. V. Buskirk to be postmaster at Bloomington, in the county of Monroe and State of Indiana.

William E. Hogueland, to be postmaster at Yates Center, in the county of Woodson and State of Kansas.

Joe Carey, to be postmaster at Garnett, in the county of Anderson and State of Kansas.

James A. Wilson, to be postmaster at Williamsburg, in the county of Iowa and State of Iowa.

John T. Lovett, to be postmaster at Little Silver, in the county of Monmouth and State of New Jersey.

Levi F. Burkett, to be postmaster at Bainbridge, in the county of Decatur and State of Georgia.

U. G. Holley to be postmaster at Sikeston, in the county of Scott and State of Missouri.

William L. Hunter, to be postmaster at Turtle Creek, in the county of Allegheny and State of Pennsylvania.

HOUSE OF REPRESENTATIVES.

THURSDAY, *May 27, 1897.*

The House met at 12 o'clock m. Prayer by the Chaplain, Rev. HENRY N. COUDEN.

The Journal of the proceedings of Monday, May 24, was read and approved.

MESSAGE FROM THE PRESIDENT.

A message in writing from the President of the United States was communicated to the House by Mr. PRUDEN, one of his secretaries.

ORDER OF BUSINESS.

Mr. TERRY. Mr. Speaker——

The SPEAKER. The House will receive a message from the Senate.

MESSAGE FROM THE SENATE.

A message from the Senate, by Mr. PLATT, one of its clerks, announced that the Senate had disagreed to the amendment of the House of Representatives to the amendment of the Senate numbered 10 to the bill (H. R. 15) making appropriations for the current and contingent expenses of the Indian Department and for fulfilling treaty stipulations with various Indian tribes for the fiscal year ending June 30, 1898, and for other purposes, had agreed to the conference asked by the House on the disagreeing votes of the two Houses thereon, and had appointed Mr. PETTIGREW, Mr. TELLER, and Mr. COCKRELL as the conferees on the part of the Senate.

The message also announced that the Senate had agreed to the report of the committee of conference on the disagreeing votes of the two Houses on the amendment of the House to the amendment of the Senate numbered 10 to the bill (H. R. 15) making appropriations for the current and contingent expenses of the Indian Department and for fulfilling treaty stipulations with various Indians tribes for the fiscal year ending June 30, 1898, and for other purposes.

The message also announced that the Senate had passed bills and joint resolutions of the following titles; in which the concurrence of the House was requested:

A bill (S. 1978) extending the time for the commencement and completion of the railroad bridge across the Illinois River, near Grafton, Ill., by the St. Louis, Perry and Chicago Railroad.

A bill (S. 1944) to authorize the construction of a bridge across the Clinch River, Kingston, Tenn.;

A bill (S. 1337) to authorize the President to commission First Lieut. Benjamin W. Loring a captain;

Joint resolution (S. R. 26) declaring that a condition of public war exists in Cuba, and that strict neutrality shall be maintained;

Joint resolution (S. R. 44) making an appropriation to supply a deficiency in the appropriations for public printing and binding for the fiscal year 1897; and

Joint resolution (S. R. 43) in amendment of the joint resolution of April 7, 1897, authorizing the Secretary of the Navy to transport contributions for the relief of the famishing poor of India.

The message also announced that the Senate had passed the following resolutions; in which the concurrence of the House was requested:

Resolved by the Senate (the House of Representatives concurring), That the Secretary of War be requested to furnish the Senate with such information as he may have in his possession with reference to the present condition of the harbor of Cumberland Sound, and to inform the Senate whether any immediate action is necessary to protect the entrance from being closed against the commerce usually entering the port of Fernandina.

The message also announced that the Senate had passed the following resolutions:

Resolved, That the Senate has heard with profound sorrow the announcement of the death of the Hon. JOSEPH H. EARLE, late a Senator from the State of South Carolina.

Resolved, That the Secretary communicate these resolutions to the House of Representatives.

Resolved, That, as a mark of respect to the memory of the deceased, the Senate do now adjourn.

Resolved, That the Secretary be directed to request the House of Representatives to return to the Senate the bill (S. 426) to authorize the construction of bridges across the Missouri River, between its mouth and the mouth of the Dakota or James River; and across the Mississippi River, between the mouth of the Minnesota River, in the State of Minnesota, and Donaldsonville, in the State of Louisiana; and across the Illinois and Des Plaines rivers, between the mouth of the Illinois and the city of Joliet, in the State of Illinois; and to prescribe the character, location, and dimensions of the same.

Mr. TERRY. Mr. Speaker——

QUESTION OF PRIVILEGE.

Mr. LEWIS of Washington. Mr. Speaker, I rise to a matter of privilege.

The SPEAKER. The gentleman will state his matter of privilege.

Mr. LEWIS of Washington. Mr. Speaker, I send to the Clerk's desk a resolution which, I respectfully urge, raises a question of a privilege of the House, and one of the highest order, and I respectfully request that the resolution be now read, in order that the question may be ascertained and——

Mr. DINGLEY (interposing). Mr. Speaker, I make the point of order that the gentleman should state his question of privilege.

Mr. LEWIS of Washington. I will accept the suggestion of the esteemed gentleman from Maine. The resolution suggests that as there has been passed in the Senate and reported to this House a resolution recognizing the belligerency——

Mr. DINGLEY. Mr. Speaker, I make the point of order that the gentleman is not raising any question of personal privilege.

Mr. LEWIS of Washington. If the gentleman will but be patient, he will soon see that I do raise a question of privilege. My resolution calls for action by this House upon a question of foreign policy——

Mr. DINGLEY. Mr. Speaker, that raises no question of personal privilege.

Mr. LEWIS of Washington. Mr. Speaker, I ask the opportunity of asserting and establishing that this is a question of privilege, and has been so decided by the parliaments of the present English-speaking world, and particularly in recent years upon a motion made by the honorable gentleman from Maine himself.

I respectfully assert that a resolution proposing that this House shall express its sense of a foreign policy is always a question of privilege, superseding and subordinating any other question, that it does not require unanimous consent for its consideration, and that no point of order can be addressed constitutionally to it. Mr. Speaker, I will not violate the courtesy of this occasion by entering into an argument as to the merits of the resolution itself.

I shall be so grateful to the gentleman for allowing me this opportunity that I shall but state my position on this subject from a legal standpoint, seeking to establish that this question, as one of the sovereignty of the House, is of the highest privilege and entitled to consideration prior to any other. As early as 1782, when this country presented to England her peace-conference report, Mr. Grattan, of Ireland, having then up for consideration his bill in relation to Irish rights, raised the point that it was not in order, according to the rule prescribing that day's business. Mr. Fox contended that a proposition of a foreign policy, or of the recognition of a foreign country, for any purpose, was at all times a question of precedence which subordinated all other questions, and that point was sustained.

Subsequently to that time the question has been considered at different periods. In this country the question arose upon a resolution of Mr. Clay, of Kentucky, made upon the floor of the House of Representatives as early as 1822, resolving that the United States recognize the Spanish republics and that the House prescribe a policy concerning the same. The point was made against it that it was not in order, when the gentleman from Kentucky contended that a proposition which went to the foreign policy of this country as against another country, and especially an intercontinental and not merely an international country, was a matter of privilege of the highest order. He was sustained on an appeal, though Speaker Barbour had held to the contrary.

In 1837, Mr. Webster, of Massachusetts, addressing himself to the question of the attitudes, respectively, of Greece and Turkey, contended that his resolution authorizing the President to name an ambassador and the House to propose, on behalf of Congress, a foreign policy, had precedence, and was entitled to consideration against any point of order that could be made, and his contention was sustained.

Later, in 1837, upon Senator Clay's motion in respect to Mexico, in the second session of that Congress, the point of order was made that the resolution could not be considered because the order of the day had been prescribed by a previous resolution. It was insisted by Mr. Foote, of Mississippi, that such a question always took precedence, as it went to the sovereignty of Congress, and that contention was sustained.

On other occasions subsequently the question has arisen in this House. In the second session of the Fifty-third Congress a resolution was introduced by the honorable gentleman from Maine, Mr. BOUTELLE, looking to the establishment of a foreign policy in respect to Hawaii. On that occasion the point of order was made by Mr. McCreary, of Kentucky, a member of the Foreign Relations Committee, that the proposition was not in order and did not present a question of privilege, and the honorable gentleman now occupying the chair is reported to have said that it had long been settled that questions relating to the foreign policy of the country as connected with other countries were always matters of privilege.

The Chair ruled the contrary. An appeal was taken; and the House decided that the question of a foreign policy was a question of privilege. I refer you, Mr. Speaker, to the Journal of the Fifty-third Congress, second session, page 44. The rules adopted at the present session on that subject embody that decision. Therefore, under that decision and under the rules of this House, my resolution becomes at once a privileged question of the first order; and it takes precedence for consideration, notwithstanding the point of the estimable gentleman from Maine. I read from the Manual of the present session, pages 496, 497:

Resolution expressing sense of the House relative to the foreign policy of the United States is privileged.

In page 495 of the Manual begins a recital of those questions which are privileged; and after giving them in collated form the Manual concludes on page 496 the recital with the announcement of the position I urge here. Therefore, that decision having become a part of the rules of this House, being there embodied from the ruling previously made upon a suggestion by the estimable gentleman now occupying the Chair as well as from one of the other gentlemen from Maine, I can not understand how it can now be held that the question is not both privileged and entitled to precedence. I respectfully insist that my resolution is privileged, and should be submitted to the House and acted upon as a privileged question. [Applause.] I ask that my resolution be read.

The SPEAKER. The Clerk will report the resolution.

The Clerk read as follows:

By Mr. LEWIS of Washington.

Resolution of the House of Representatives upon the right of the House to declare a foreign policy upon the subject of belligerency and neutrality and recognition both by treaty and commercial relations with the Republic of Cuba or any other country.

Whereas the United States Senate assembled has duly by a proper form of resolution declared for a state of neutrality and the according to the Island of Cuba all rights as a belligerent as against Spain; and

Whereas it is asserted that such right of recognition exists only with the Executive of the United States: Therefore,

Be it resolved by the House of Representatives of Congress, That as a foreign policy of the United States it is the right and authority of the Senate and House of Representatives in adopting a foreign policy of the United States to recognize as Congress the belligerency of and declare the attitude of neutrality of the United States to the Island of Cuba or any other government or country when in the sense of the House such course is demanded by existing conditions.

Mr. LEWIS of Washington. I move the adoption of the resolution just read.

Mr. DINGLEY. I make the point of order that the resolution does not raise a privileged question.

Mr. LEWIS of Washington. I have already answered the point of order as fully as demanded, and offered what I think sufficient precedent to prove my position that this is both a privileged question and entitled to precedence for consideration. I now call for a ruling on the question.

The SPEAKER. The Chair thinks this is not a question of privilege. Under the rules of the House such a resolution can be presented in the regular course and should have the report of a committee upon the subject.

Mr. LEWIS of Washington. A parliamentary inquiry, Mr. Speaker. Would the Chair suggest what would be "the regular course" at this time?

The SPEAKER. The regular course would be to file the resolution under the rules.

Mr. LEWIS of Washington. Does the honorable Speaker mean to suggest that the resolution shall be filed to await the appointment of a Committee on Foreign Affairs to consider it?

The SPEAKER. Certainly.

Mr. LEWIS of Washington. I did not understand the remark of the Chair.

The SPEAKER. Certainly, it should be filed under the rules of the House.

Mr. LEWIS of Washington. Then the Chair holds that my resolution is not privileged, and sustains the gentleman from Maine upon that point of order?

The SPEAKER. The Chair does.

Mr. LEWIS of Washington. I take an appeal from the decision of the Chair.

Mr. DINGLEY. I move that the appeal lie on the table.

The SPEAKER (having put the question). The ayes seem to have it.

Mr. LEWIS of Washington. I call for a division.

The question being again taken, there were—ayes 91, noes 57.

Mr. LEWIS of Washington. Yeas and nays, Mr. Speaker.

The yeas and nays were ordered.

The question was taken; and there were—yeas 89, nays 53, answered "present" 17, not voting 194; as follows:

Mr. BARHAM with Mr. LITTLE.

For this day:

Mr. PAYNE with Mr. RICHARDSON.

Mr. WHITE of Illinois with Mr. HUNTER.

Mr. HURLEY with Mr. DAVIS.

Mr. CRUMP with Mr. HANDY.

Mr. WILBER with Mr. FOX.

Mr. MADDOX. Mr. Speaker, I am paired with the gentleman from Indiana, Mr. ROYSE, on all political questions, and as this seems to be considered by some to be a political question, I withdraw my vote.

Mr. VANDIVER. I voted "no," but being paired with the gentleman from Missouri, Mr. PEARCE, on political questions, I withdraw the vote.

Mr. TERRY. Mr. Speaker, I rise to a parliamentary inquiry, and to a question affecting the rights and privileges of this House.

Mr. WHEELER of Alabama. Will the gentleman withhold his statement one moment, until I make an announcement with reference to my vote. I find that I am paired with the gentleman from Massachusetts, Mr. LOVERING; and therefore I wish to change my vote to "present."

Mr. TERRY. Mr. Speaker——

Mr. LEWIS of Washington. Mr. Speaker, I merely wish to

make the point of order to my friend from Arkansas [Mr. TERRY] that until the vote is announced I do not yield the floor.

Mr. COOPER of Texas. I desire to be recorded as present. I am paired with the gentleman from Iowa, Mr. PERKINS. If he were present, I would vote "no."

Mr. TERRY. Mr. Speaker——

The SPEAKER. For what purpose does the gentleman rise?

Mr. TERRY. I stated to the Chair that I rose to a question relating to the rights and privileges of the House, and to a parliamentary inquiry.

The SPEAKER. Will the gentleman state his parliamentary inquiry?

Mr. TERRY. I will state, Mr. Speaker, preliminary to it——

The SPEAKER. Does it relate to the present vote that is being taken?

Mr. TERRY. It does not relate to the present vote, Mr. Speaker.

The SPEAKER. The only thing in order is the announcement of the vote. On this question the yeas are 89, the nays 51, present 17—not a quorum.

Mr. DINGLEY. Mr. Speaker, inasmuch as it seems there is no quorum present for the transaction of business, I move that the House do now adjourn.

The question was taken.

Mr. JETT. Mr. Speaker, before the——

Mr. LEWIS of Washington demanded a division on the motion to adjourn, and then withdrew the demand.

Mr. RICHARDSON. I rise to a parliamentary inquiry. Would it not be in order to move a call of the House? We might get a quorum here for the transaction of business.

The SPEAKER. On that question——

Mr. TERRY. I demand a division.

The House divided; and there were—ayes 92, noes 35.

Accordingly, the motion of Mr. DINGLEY was agreed to; and (at 12 o'clock and 53 minutes p. m.) the House, under the order heretofore adopted, adjourned until Monday, May 31, 1897, at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS.

Under clause 2 of Rule XXIV, the following executive communications were taken from the Speaker's table and referred as follows:

A letter from the Attorney-General, transmitting a copy of a letter to the chairman of the Senate Committee on Appropriations, relating to an appropriation for witness fees, etc.—to the Committee on Appropriations, and ordered to be printed.

A letter from the Secretary of War, transmitting, with a letter from the Chief of Engineers, report of examination and survey of Mount Hope Bay and Fall River Harbor, Massachusetts—to the Committee on Rivers and Harbors, and ordered to be printed.

PUBLIC BILLS, RESOLUTIONS, AND MEMORIALS INTRODUCED.

Under clause 3 of Rule XXII, bills, resolutions, and memorials of the following titles were introduced and severally referred as follows:

By Mr. WHEELER of Kentucky: A bill (H. R. 3354) to raise additional revenue and providing for a tax upon certain occupations—to the Committee on Ways and Means.

By Mr. MADDOX: A bill (H. R. 3355) to exclude from the mails all matter emanating from any commercial agency which gives ratings and carries on collections connected therewith—to the Committee on the Post-Office and Post-Roads.

Also, a bill (H. R. 3356) to provide for the revision and consolidation of the statute laws of the United States—to the Committee on Revision of the Laws.

By Mr. BELL (by request): A bill (H. R. 3357) for the relief of settlers in Greer County, Okla.—to the Committee on the Public Lands.

By Mr. BABCOCK: A memorial of the legislature of the State of Wisconsin, for an amendment to the Constitution relating to trusts—to the Committee on the Judiciary.

PRIVATE BILLS AND RESOLUTIONS INTRODUCED.

Under clause 1 of Rule XXII, private bills and resolutions of the following titles were introduced and severally referred as follows:

By Mr. DANFORD: A bill (H. R. 3358) to authorize the Secretary of the Interior to place John W. Beardmore on the pension roll—to the Committee on Invalid Pensions.

By Mr. DOLLIVER: A bill (H. R. 3359) for the relief of Mrs. Mary E. Cross—to the Committee on Invalid Pensions.

Also, a bill (H. R. 3360) for the relief of the legal representatives of Edwin De Leon, deceased, for $8,000 due him for judicial services—to the Committee on Claims.

Also, a bill (H. R. 3361) for the relief of the legal representatives of Edwin De Leon, deceased, late consul-general of the United States in Egypt—to the Committee on Claims.

By Mr. KLEBERG: A bill (H. R. 3362) for the relief of Bolivar J. Pridgen, an invalid Mexican war veteran—to the Committee on Pensions.

By Mr. LENTZ: A bill (H. R. 3363) granting an increase of pension to George F. Davenport—to the Committee on Invalid Pensions.

Also, a bill (H. R. 3364) to correct the military record of Charles Dagenfield—to the Committee on Military Affairs.

By Mr. MARSH: A bill (H. R. 3365) for the relief of Eveline Pave—to the Committee on Invalid Pensions.

Also, a bill (H. R. 3366) for the relief of Charlotte A. Heavilin—to the Committee on Invalid Pensions.

Also, a bill (H. R. 3367) to grant a pension to Edgar Hill—to the Committee on Invalid Pensions.

Also, a bill (H. R. 3368) for the relief of Mrs. Elizabeth D. Pittman—to the Committee on Invalid Pensions.

By Mr. OLMSTED: A bill (H. R. 3369) granting a pension to Martin P. Schaffner, of Loyalton, Pa.—to the Committee on Invalid Pensions.

Also, a bill (H. R. 3370) to remove the charge of desertion from the military record of Francis Tomlinson—to the Committee on Military Affairs.

By Mr. WHEELER of Kentucky: A bill (H. R. 3371) for the relief of C. J. McConnell—to the Committee on War Claims.

Also, a bill (H. R. 3372) for the benefit of the estate of John T. Porter, deceased—to the Committee on War Claims.

Also, a bill (H. R. 3373) for the relief of J. R. Elkins, of Calloway County, Ky.—to the Committee on War Claims.

Also, a bill (H. R. 3374) for the relief of P. F. Warterfield—to the Committee on War Claims.

Also, a bill (H. R. 3375) for the relief of the estate of William M. Starks—to the Committee on War Claims.

Also, a bill (H. R. 3376) for the relief of the estate of S. M. Grace, deceased—to the Committee on War Claims.

By Mr. YOST: A bill (H. R. 3377) to remove the charge of desertion against John Dean—to the Committee on Military Affairs.

PETITIONS, ETC.

Under clause 1 of Rule XXII, the following petitions and papers were laid on the Clerk's desk and referred as follows:

By Mr. BELFORD: Petition of residents of Suffolk County, N. Y., asking for a more rigid restriction of immigration—to the Committee on Immigration and Naturalization.

By Mr. BELDEN: Petition of the First Methodist Episcopal Church and Preachers' Meeting of Syracuse, N. Y., relating to pictures of prize fights by mail; also petition of same for the prohibition of lottery messages and other gambling matter by telegraph—to the Committee on Interstate and Foreign Commerce.

Also, petition of the Methodist Episcopal Church and Preachers' Meeting of Syracuse, N. Y., asking that the age of protection for girls be raised to 18 years in the District of Columbia and the Territories; also petition of same, favoring the enactment of a Sabbath law for the national capital—to the Committee on the District of Columbia.

Also, petition of the Methodist Episcopal Church and Preachers' Meeting of Syracuse, N. Y., urging that the sale of intoxicating liquors be prohibited in Government buildings—to the Committee on Public Buildings and Grounds.

Also, petition of John H. Cunningham and 24 other citizens of Syracuse, N. Y., favoring the enactment of an immigration law similar to that vetoed by President Cleveland during the Fifty-fourth Congress—to the Committee on Immigration and Naturalization.

By Mr. BRUMM: Petition of W. L. Loeser and other citizens of Minersville; also of H. W. Bachert and others, of Quakake, Pa., requesting the passage of a bill restricting immigration—to the Committee on Immigration and Naturalization.

By Mr. CONNELL: Paper to accompany House bill No. 3300, to correct the military record of T. C. Kennedy—to the Committee on Military Affairs.

By Mr. CURTIS of Iowa: Petition of Thomas J. Houston and 8 other Union soldiers of Jackson County, Iowa, favorable to the passage of a service-pension bill—to the Committee on Invalid Pensions.

By Mr. DALZELL: Petition of sundry citizens of Quakake, Pa., in favor of the passage of a law to restrict immigration—to the Committee on Immigration and Naturalization.

Also, resolutions of the Trades' League of Philadelphia, Pa., in favor of civil-service reform—to the Committee on Reform in the Civil Service.

Also, resolutions of the Pennsylvania Civil Service Reform Association, of Philadelphia, against attacks on the civil-service law—to the Committee on Reform in the Civil Service.

By Mr. DAYTON: Sundry petitions of J. E. Ensminger and 14 other citizens of Logansport; L. J. Thrasher and 49 others, of Gormania; Solomon Clark and 49 others, and Stingley Clark and

49 others, of Bayard; M. B. West and 39 others, of Howesville; Amos Robinson and 43 others, of Elkins; J. F. Kerrs and 46 others, of Pawpaw; T. H. Devalt and 52 others, and S. W. Satterfield and others, of Rivesville; A. L. Ammons and 45 others, of Rymer; E. T. Glover and 44 others, and F. E. Robinson and 25 others, of Wise; William W. Rogers and 48 others, and Thomas D. Bennett and 48 others, of Wheeling; J. E. Kidwell and 14 others, of Grant County; Kirk Dysche and 49 others, and W. T. Baker and 47 others, of Morgan County; S. S. Wilson and 45 others, J. R. Gray and 76 others, W. C. Hawkins and 150 others, and H. S. Leeper and 41 others, of Marion County; B. W. McBee and 80 others, and H. P. Graves and 60 others, all citizens of the State of West Virginia, praying for the passage of an act restricting immigration—to the Committee on Immigration and Naturalization.

By Mr. DOLLIVER: Paper to accompany House bill for the relief of representatives of Edwin De Leon, deceased—to the Committee on Claims.

By Mr. HENRY of Indiana: Petition of the Christian Endeavor Society of the Christian Church of Salamonia, Jay County, Ind., asking for the passage of a bill prohibiting the sale of intoxicants in Government buildings—to the Committee on Public Buildings and Grounds.

Also, resolution of the Christian Endeavor Society of the Christian Church of Salamonia, Ind., in relation to sundry bills for the improvement of public morals—to the Committee on the Judiciary.

By Mr. HILL: Petition of H. N. French and other citizens of Northfield, Conn., asking for rural free delivery—to the Committee on the Post-Office and Post-Roads.

By Mr. LENTZ: Petition of S. O. Giffin and other citizens of Columbus, Ohio, asking for the restriction of immigration—to the Committee on Immigration and Naturalization.

By Mr. LIVINGSTON: Petition of citizens of Atlanta, Ga., for the appointment of a monetary commission and a reform in banking and currency legislation—to the Committee on Banking and Currency.

By Mr. LOUDENSLAGER: Petitions of Harry L. Conver and other citizens of Ocean City; Alexander B. Johnson and others, of Camden; Fred. A. Garrison, Joseph E. Locke, and others, of Dividing Creek, and Warren W. Vanneman and others, of Bridgeport, in the State of New Jersey, relative to immigration laws—to the Committee on Immigration and Naturalization.

By Mr. MARSH: Petition of sundry citizens of Macomb, Ill., praying for the passage of an immigration bill similar to the one passed at last session of Congress, vetoed by President Cleveland—to the Committee on Immigration and Naturalization.

By Mr. McDONALD: Paper to accompany House bill No. 3338, for the relief of David C. Winebrener—to the Committee on War Claims.

Also, paper to accompany House bill No. 3340, for the relief of the crew of the U. S. S. *Wyoming*—to the Committee on Claims.

By Mr. MILLER: Petition of Guy Peck and other residents of Cabell County, W. Va., praying for the passage of an immigration law—to the Committee on Immigration and Naturalization.

By Mr. MOODY: Petition of J. Albert Smith and 32 other citizens of Ipswich, Mass., favoring a more rigid restriction of immigration—to the Committee on Immigration and Naturalization.

By Mr. OLMSTED: Petition of Capital City Council, No. 237, Junior Order United American Mechanics, of Harrisburg, Pa., praying for the passage of a law to restrict immigration—to the Committee on Immigration and Naturalization.

By Mr. PITNEY: Sundry petitions of 28 citizens of Boonton, 38 citizens of Butler, 33 citizens of Chatham, 28 citizens of Finesville, 42 citizens of Frenchtown, 11 citizens of Hanover, 43 citizens of Hunterdon County, 82 citizens of Oxford, 24 citizens of Ringoes, and 27 citizens of Sergeantsville, in the State of New Jersey, in favor of the passage of an immigration bill—to the Committee on Immigration and Naturalization.

By Mr. SHOWALTER: Petition of J. S. Dean and other citizens of New Lebanon, Pa., asking for a more rigid restriction of immigration—to the Committee on Immigration and Naturalization.

By Mr. WILLIAM A. STONE: Petition of Charles Miller and other citizens of Allegheny, Pa., favoring a more rigid restriction of immigration—to the Committee on Immigration and Naturalization.

By Mr. YOST: Petition of Virginia people residing in Oklahoma Territory, praying for the reenactment of the old homestead law for that Territory—to the Committee on the Territories.

By Mr. YOUNG of Pennsylvania: Petition of Charles W. Toepfer and others and William W. Mayberry and others, citizens of Philadelphia, Pa., for the restriction of immigration—to the Committee on Immigration and Naturalization.

Also, resolutions of the Thirtieth Ward Republican executive committee of Philadelphia, asking for the repeal of the civil-service laws—to the Committee on Reform in the Civil Service.

SENATE.

FRIDAY, *May 28, 1897.*

Prayer by the Chaplain, Rev. W. H. MILBURN, D. D.

The Vice-President being absent, the President pro tempore took the chair.

The Journal of yesterday's proceedings was read and approved.

POSTAL TELEGRAPHS AND POSTAL SAVINGS BANKS.

The PRESIDENT pro tempore laid before the Senate a communication from the Postmaster-General, in response to a resolution of the 17th instant, calling for the reports received by the Department of State in obedience to a circular sent out by Secretary Blaine on May 20, 1881, to the consular agents of the United States, directing them to obtain from the several foreign governments certain information as to the practical workings of postal-telegraph systems and postal savings banks, stating that a most careful investigation has been made through the archives of the Post-Office Department, and he finds that the original responses of the consuls to this circular letter of the Secretary of State were not sent there, but were retained in the Department of State as part of the files of that Department, etc.; which, on motion of Mr. COCKRELL, was referred to the Committee on Post-Offices and Post-Roads, and ordered to be printed.

PETITIONS AND MEMORIALS.

The PRESIDENT pro tempore presented a petition signed by 15,000 citizens of Philadelphia County, Pa., praying Congress to recognize the right of the Cubans to wage war in defense of their liberties; which was read, and referred to the Committee on Foreign Relations, as follows:

To the representatives of the people of the United States in Congress assembled, greeting:

Whereas Spain has by a long course of cruelty and oppression toward Cuba demonstrated her unfitness to govern, and firmly believing that Cubans have the same right to wage war in defense of their liberties that our fathers had:

We, the people, citizens of the United States, county of Philadelphia, State of Pennsylvania, respectfully petition for the immediate recognition by our Government of that right.

The PRESIDENT pro tempore presented a petition of sundry citizens of Vinal Haven, Me., praying for the enactment of legislation for a more rigid restriction of immigration; which was ordered to lie on the table.

He also presented a petition of the Board of Trade of Columbus, Ohio, praying for the speedy passage of the pending tariff bill; which was ordered to lie on the table.

Mr. MILLS presented sundry petitions of citizens of Greenville, Tex., praying for the enactment of legislation for a more rigid restriction of immigration; which were ordered to lie on the table.

Mr. BURROWS presented memorials of Ezra Walling and 9 other citizens of Coopersville, of A. L. Cooper and 8 other citizens of Woodland, A. S. Newton and 12 other citizens of Maple Rapids, and of H. Sayers & Son and 9 other citizens, all in the State of Michigan, remonstrating against the imposition of a two-dollar rate on rough lumber; which were ordered to lie on the table.

Mr. DAVIS presented a petition of 47 citizens of Duluth, Minn., and a petition of 50 citizens of Duluth, Minn., praying for the enactment of legislation for a more rigid restriction of immigration; which were ordered to lie on the table.

He also presented a petition of the Merchant Tailors' Exchange of St. Paul, Minn., praying for the passage without amendment of section 666 of the pending tariff bill relating to the free entry of wearing apparel, personal effects, etc.; which was ordered to lie on the table.

Mr. MANTLE presented a petition of sundry citizens of Meagher County, Mont., praying for the abrogation of the Hawaiian reciprocity treaty; which was referred to the Committee on Foreign Relations.

Mr. FAIRBANKS presented a petition of sundry citizens of Indianapolis, Ind., praying for the repeal of the present civil-service law; which was referred to the Committee on Civil Service and Retrenchment.

He also presented a petition of the Christian Endeavor Society of the Salamonia Christian Church, of Jay County, Ind., praying for the enactment of legislation prohibiting the interstate transmission of any picture or description of prize fights, and also to protect the first day of the week as a day of rest in the District of Columbia; which was referred to the Committee on the District of Columbia.

Mr. QUAY presented a report and resolutions adopted by the committee on transportation and railroads of the Chamber of Commerce of Pittsburg, Pa., favoring the passage of Senate bill No. 775, directing the Interstate Commerce Commission to prepare and publish a classification of freight articles and rules, regulations, and conditions of freight transportation, to be known as the

"National freight classification;" which were read, and referred to the Committee on Interstate Commerce, as follows:

CHAMBER OF COMMERCE OF PITTSBURG.

Report of committee on transportation and railroads. Approved May 6, 1897.

Whereas there are now several classifications used in the transportation of freight between points in the United States, of which three of the principal ones are as follows: The official classification, covering the territory west from the Atlantic coast to the Mississippi River and north of the Ohio River; the Southern railway and steamship classification, covering the territory south of the Ohio River and west to the Mississippi River; the Western classification, covering all points west of the Mississippi River; and

Whereas we believe it to be to the interest and welfare of both shippers and railway companies that a uniform classification be adopted; and

Whereas there is now before the Committee on Interstate Commerce of the present (Fifty-fifth) Congress a bill (S. 775) directing the Interstate Commerce Commission to prepare and publish a classification of freight articles and rules, regulations, and conditions of freight transportation, to be known as the "National freight classification:" Therefore,

Be it resolved, That this body respectfully urge the favorable consideration of the aforesaid bill at the hands of said committee; and,

Be it further resolved, That our Senators and Representatives be requested to use their best efforts to the end that said bill become a law at the earliest possible date.

Attest:

GEO. H. ANDERSON, *Secretary*.

Mr. DANIEL. I present the memorial and accompanying papers of James Seldon Cowdon, of Virginia, in relation to the Lake Borgne Outlet. I move that the memorial and accompanying papers be printed as a document and referred to the Committee on Commerce.

The motion was agreed to.

Mr. DANIEL presented the petition of John L. Ziskle and sundry other citizens of Virginia, praying for the enactment of legislation for a more rigid restriction of immigration; which was ordered to lie on the table.

He also presented the petition of Charles A. Sykes, of New York City, praying for the adoption of an amendment to the pending tariff bill placing certain duties on artificial teeth; which was ordered to lie on the table.

Mr. BAKER presented the affidavit of Dr. E. W. Bliss, to accompany the bill (S. 1951) granting an increase of pension to E. Bierer; which was referred to the Committee on Pensions.

TRADE RELATIONS WITH HAWAII.

Mr. NELSON. I present a communication from Worthington C. Ford, Chief of the Bureau of Statistics, Treasury Department, with a statement of our commerce with the Hawaiian Islands under the reciprocity treaty of 1876 and its extension. I move that the communication and statement lie on the table and be printed as a document.

The motion was agreed to.

DEFICIENCY APPROPRIATIONS.

Mr. ALLISON presented a communication from the Secretary of the Treasury, transmitting a letter from the Attorney-General, submitting an estimate of deficiency in the appropriation for fees of witnesses, United States courts, for the fiscal year 1897, $50,000; which, with the accompanying paper, was referred to the Committee on Appropriations, and ordered to be printed.

He also presented a communication from the Secretary of the Treasury, transmitting a letter from the Secretary of the Interior, requesting that an item of appropriation in the sum of $1,800 be included in the general deficiency appropriation bill for the support of the Indian school at Carlisle, Pa., for the fiscal year 1897; which, with the accompanying paper, was referred to the Committee on Appropriations, and ordered to be printed.

REPORTS OF COMMITTEES.

Mr. VEST, from the Committee on Public Buildings and Grounds, to whom was referred the bill (S. 710) to provide for the purchase of additional land in the square now occupied by the custom-house in the city of Baltimore, Md., and for the erection of a new public building thereon for the accommodation of the Government service in said city, reported it with amendments.

Mr. FAIRBANKS, from the Committee on Public Buildings and Grounds, to whom was referred the bill (S. 1749) to provide for the purchase of a site and the erection of a public building thereon at Durham, in the State of North Carolina, reported it without amendment, and submitted a report thereon.

Mr. QUAY, from the Committee on Public Buildings and Grounds, to whom were referred the following bills, reported them severally without amendment:

A bill (S. 1270) to provide for the erection of a public building at Washington, Pa.;

A bill (S. 1271) for a public building at the city of Wilkesbarre, Pa., and appropriating money therefor;

A bill (S. 1272) to provide for the erection of a public building at McKeesport, Pa. (with accompanying report); and

A bill (S. 479) to provide for the purchase of a site and the erection of a public building thereon at Nashua in the State of New Hampshire (with accompanying report).

Mr. MANTLE, from the Committee on Public Buildings and Grounds, to whom was referred the bill (S. 164) to provide for the construction of a public building at Butte City, Mont., reported it without amendment, and submitted a report thereon.

Mr. DANIEL, from the Committee on Public Buildings and Grounds, to whom was referred the bill (S. 1964) for the erection of a public building for the use of the custom-house and post-office at Newport News, in the district of Newport News, Va., reported it without amendment.

Mr. WARREN, from the Committee on Claims, to whom were referred the following bills, reported them severally without amendment, and submitted reports thereon:

A bill (S. 967) for the relief of M. S. Hellman; and

A bill (S. 1029) for the relief of the Portland Company, of Portland, Me.

Mr. STEWART, from the Committee on Claims, to whom was referred the bill (S. 1711) for the relief of the legal representative of George McDougall, deceased, reported it without amendment, and submitted a report thereon.

BILLS INTRODUCED.

Mr. FORAKER introduced the following bills; which were severally read twice by their titles, and referred to the Committee on Pensions:

A bill (S. 2038) increasing the pension of W. D. Sigler; and

A bill (S. 2039) restoring the pension of Daniel Oberly.

Mr. WHITE introduced a bill (S. 2040) granting a pension to Mrs. A. McFarland; which was read twice by its title, and referred to the Committee on Pensions.

Mr. COCKRELL introduced a bill (S. 2041) to amend section 4386 of the Revised Statutes of the United States striking out "twenty-eight consecutive hours" and "twenty-eight hours" and inserting "forty consecutive hours" and "forty hours;" which was read twice by its title.

Mr. COCKRELL. I move that the bill be referred to the Committee on Interstate Commerce, and I desire to have a special order made for its printing, so that it will be here to-morrow morning. It may be necessary to consider it in the committee.

The motion was agreed to.

Mr. PETTIGREW introduced a bill (S. 2042) for the purchase of land and the construction thereon of an asylum for insane Indians within the jurisdiction of the United States; which was read twice by its title, and referred to the Committee on Indian Affairs.

TAX ON DISTILLED SPIRITS.

Mr. CULLOM submitted two amendments intended to be proposed by him to the bill (H. R. 379) to provide revenue for the Government and to encourage the industries of the United States; which were read, referred to the Committee on Finance, and ordered to be printed, as follows:

An amendment to be proposed by Mr. CULLOM to the bill (H. R. 379) to provide revenue for the Government and to encourage the industries of the United States.

That on and after the passage of this act distilled spirits, spirits, alcohol, and alcoholic spirits within the true intent and meaning of the provisions of section 3248 of the Statutes shall be held to include, and shall include, all substances known as wood naphtha or methylic alcohol or alcoholic spirits, whether ethyl or methyl, produced by fermentation or otherwise from any substance whatever, shall be subject to the payment of the same tax and to all the provisions of law regulating the manufacture and sale of distilled spirits as provided by law: *Provided, however*, That such provisions as to methyl spirits may be modified and changed in such manner and to such extent as may be prescribed by the Commissioner of Internal Revenue, to be approved by the Secretary of the Treasury.

An amendment to be proposed by Mr. CULLOM to the bill (H. R. 379) to provide revenue for the Government and to encourage the industries of the United States.

Strike out the item increasing the tax on beer and insert in lieu thereof the following:

"That section 3251a, section 48, of the act of August 28, 1894, be amended so as to read as follows:

"'That on and after the passage of this act there shall be levied and collected on all distilled spirits in bond at that time, or that have or that may be then or thereafter produced in the United States, on which the tax is not paid before that day, a tax of 70 cents on each proof gallon, or wine gallon, when below proof, and a proportionate tax at a like rate on all fractional parts of such proof or wine gallon: *Provided*, That in computing the tax on any package of spirits or fractional parts of a gallon less than one-tenth shall be excluded.

"'That all laws or parts of laws inconsistent herewith are hereby repealed.'"

AMENDMENT TO THE TARIFF BILL.

Mr. WARREN submitted an amendment intended to be proposed by him to the bill (H. R. 379) to provide revenue for the Government and to encourage the industries of the United States; which was ordered to lie on the table and to be printed.

WICHITA INDIAN LANDS.

The PRESIDENT pro tempore. The Chair lays before the Senate a resolution coming over from a former day, which will be read.

The Secretary read the resolution submitted by Mr. QUAY on the 25th instant, as follows:

Resolved, That the right to compensation on the part of the Wichita and affiliated bands of Indians for their possessory right in and to the lands ceded to the United States by said Indians, under the agreement made and entered into between said Indians and the United States at Anadarko, in the Indian

Territory, on the 4th day of June, A. D. 1891, should be considered and adjusted at the same time and by the same tribunal which shall determine the alleged claim of the Choctaw and Chickasaw nations in and to the said lands, and that the President is hereby requested to suspend the allotments to said Indians now in progress until the compensation to be allowed and paid to said Indians for the lands in excess of allotments shall be finally determined.

Mr. QUAY. The resolution may go over until to-morrow.

The PRESIDENT pro tempore. Retaining its place, does the Senator ask?

Mr. QUAY. Yes.

The PRESIDENT pro tempore. If there be no objection, the resolution will go over until to-morrow, retaining its place.

PROPOSED SENATORIAL INVESTIGATION.

Mr. TILLMAN. Mr. President, I suggest the absence of a quorum.

The PRESIDENT pro tempore. The Secretary will call the roll.

The Secretary called the roll, and the following Senators answered to their names:

Aldrich,	Davis,	McMillan,	Shoup,
Allison,	Deboe,	Mallory,	Spooner,
Bacon,	Fairbanks,	Mason,	Stewart,
Baker,	Faulkner,	Mills,	Tillman,
Bate,	Foraker,	Mitchell,	Turpie,
Berry,	Frye,	Morgan,	Vest,
Burrows,	Gallinger,	Murphy,	Walthall,
Carter,	Gear,	Nelson,	Warren,
Chandler,	Harris, Kans.	Pasco,	Wetmore,
Clark,	Heitfeld,	Perkins,	White,
Clay,	Jones, Ark.	Pettigrew,	Wilson.
Cockrell,	Kenney,	Pettus,	
Cullom,	Kyle,	Rawlins,	
Daniel,	Lindsay,	Sewell,	

The PRESIDENT pro tempore. Fifty-three Senators have responded to their names. A quorum is present.

Mr. TILLMAN. Mr. President, I rise to a question of privilege, and I send to the desk a resolution for which I ask immediate consideration.

The PRESIDENT pro tempore. The Senator from South Carolina rises to a question of privilege and asks for the reading of the following resolution.

The Secretary read as follows:

Whereas on the 17th of May, 1894, the following preamble and resolution was passed by the Senate:

"Whereas it has been stated in the Sun, a newspaper published in New York, that bribes have been offered to certain Senators to induce them to vote against the pending tariff bill; and

"Whereas it has also been stated in a signed article in the Press, a newspaper published in Philadelphia, that the sugar schedule has been made up as it now stands in the proposed amendment in consideration of large sums of money paid for campaign purposes of the Democratic party: Therefore,

"*Resolved*, That a committee of five Senators be appointed to investigate these charges and to inquire further whether any contributions have been made by the sugar trust, or any person connected therewith, to any political party for campaign or election purposes or to secure or defeat legislation, and whether any Senator has been or is speculating in what are known as sugar stocks during the consideration of the tariff bill now before the Senate, and with power to send for persons and papers and to administer oaths.

"*Resolved further*, That said committee be authorized to investigate and report upon any charge or charges which may be filed before it alleging that the action of any Senator has been corruptly or improperly influenced in the consideration of said bill, or that any attempt has been made to so influence legislation."

Whereas the committee therein designated, and in the pursuance of its duties, examined several witnesses; and

Whereas several of these witnesses refused point-blank to answer the questions put to them; and

Whereas one of these witnesses, after three years of legal contest, is now in prison under sentence of the court for contempt, said court having declared the questions put to him pertinent; and

Whereas another of these witnesses was yesterday acquitted on a technicality, which can not shield him from the consequences of refusing to answer the questions put to him, if the Senate will renew the inquiry; and

Whereas within the last thirty days sundry newspaper correspondents have openly charged Senators with speculating in sugar stocks while the sugar schedule is under discussion, and also charged that brokers in New York knew in advance as to what the Senate Finance Committee would report as to the sugar schedule, all of which involves a question of the highest privilege, to wit, the right of the Senate to protect its members from slander and to protect the body as a whole from these open charges of corruption: Therefore,

Be it resolved, That a committee of five be appointed with power to send for persons and papers, to employ a stenographer, and to administer oaths, to inquire into the truth or falsehood of the charges made in May, 1894, and into the charges recently made, and the scope of the investigation shall cover everything embraced in the resolution of May 17, 1894, as well as the methods pursued by the American Sugar Refining Company, better known as the sugar trust, in controlling legislation in its favor at the present time; and especially whether it has in any wise contributed to, or controlled the election of, a Senator in this body at any time.

The PRESIDENT pro tempore. The resolution will be referred to the Committee to Audit and Control the Contingent Expenses of the Senate, under the law.

Mr. TILLMAN. Before the resolution is referred, I supposed I might have an opportunity to present the reasons which influence me to present the resolution.

Mr. GRAY. I ask the Senator from South Carolina if he has just presented the resolution or whether it was submitted yesterday?

Mr. TILLMAN. I presented the resolution this morning.

Mr. GRAY. Would it not go over under the rule?

The PRESIDENT pro tempore. No; because under the law the resolution goes to the Committee to Audit and Control the Contingent Expenses of the Senate.

Mr. BATE. Under the rule the resolution must go to the committee; but when a Senator rises to a question of personal privilege I think he has a right to speak.

The PRESIDENT pro tempore. The Chair does not think that the privilege extends to a discussion of a resolution which is already referred to a committee, but the Senator of course, without objection, can proceed. Is there objection to the Senator from South Carolina proceeding with his remarks on the resolution? The Chair hears none. The Senator from South Carolina will proceed.

Mr. TILLMAN. Mr. President, as I have been a member of this body only a little over two years, I have hesitated about pressing this matter upon the attention of the Senate and the country. It is, perhaps, by reason of my short connection with the Senate that I do not lie under these accusations affecting the honor and honesty and the integrity of individual Senators and the body as a whole with the same calmness and equanimity which some of the older members seem to possess for their consolation.

When the Senator from Nebraska [Mr. ALLEN] introduced a resolution some two weeks back in regard to Chapman, it was referred to the Committee on the Judiciary with instructions to report back what was necessary. It came back the next morning with a report that it really effected no purpose; that there was no petition for Chapman's pardon pending, and therefore it was not worthy the attention of the Senate.

At that time I called attention to the recent charges of corruption which have been published broadcast over the country in all the metropolitan papers and sent forth by correspondents in the gallery under their own name; and it does seem to me that we have arrived at a time in the history of the Senate when we can no longer afford to lie under such damning accusations. If we have corrupt and debauched men in here owned by trusts and corporations, we ought to find out who they are and purge the Senate. If the newspapers are lying on Senators and the Senate, then the gallery ought to be cleared of all dishonest and dishonorable correspondents and the men who have slandered the Senate be punished.

We can not afford to lie back on our dignity and say it is beneath us to investigate charges of this character. While the committee which was appointed in 1894 came to no good, while no purpose was accomplished except to disclose some of the secrets by which one of the rich corporations known as the sugar trust is robbing the American people of millions yearly under the tariff schedule, sir, we are to-day face to face with the fact that both parties, Democratic and Republican, are on trial before the people, and as to whether their Finance Committees are honest or whether they are bought and sold like cattle.

The investigation of 1894 involved the President, the Secretary of the Treasury, the Finance Committee, and the Democratic party in general. Now we have a change of scene. The Republicans are in power. The same differential, the same benefit, the same ad valorem duties, which were acknowledged to be for the benefit of the trust, are presented here by another Finance Committee of the Senate, but this time it is Republican. Therefore both parties are involved in this smirching of the body and its honor and integrity, and both parties should emulate each other in endeavoring to clarify the atmosphere and restore the Senate to the respect in which the American people once held it. I confess, sir, that we have lost it in a large degree, and it is by reason either of corruption in the body or cowardice among its members in protecting their own honor and their own good name.

You will recall the fact that in the other investigation accusations were made that the President of the United States had met certain magnates of the sugar trust, brokers and others, on a yacht somewhere, in which a bargain was made, a corrupt bargain, by which the interests of the sugar trust were to be guarded in the tariff schedules to be formulated by the Democratic party. There was no testimony brought out which fastened that damning accusation upon him, but within a week or a month the Senator from Arkansas [Mr. JONES], a member of the Finance Committee, has brought forward corroborative testimony by a statement that during the pendency of the schedules being reported by the Finance Committee of the Senate Mr. Cleveland told him he thought that the sugar trust ought to have protection to the extent, I believe, of a quarter of a cent a pound.

Mr. JONES of Arkansas. Mr. President——

The PRESIDENT pro tempore. Does the Senator from South Carolina yield to the Senator from Arkansas?

Mr. TILLMAN. Certainly. I just want to get the matter straight. That is my only object.

Mr. JONES of Arkansas. I do not know that the expression of

the Senator from South Carolina is exactly correct. My statement was that pending the discussion of the tariff bill between the two Houses Mr. Cleveland said to me that he believed or was satisfied that the difference of one-quarter of a cent between raw and refined sugar was necessary to enable the refiners to maintain their business in the United States, and that if the difference of only one-eighth of 1 cent was made in the bill between raw and refined sugar it was his impression or he believed that the refiners would be driven out of this country and would be unable to carry on their business. I think that was about the substance of what I said.

Mr. TILLMAN. It was simply Mr. Cleveland's opinion and desire, I presume, that the Finance Committee should recognize the interests of the sugar trust, and if he had made a bargain, carry it out in good faith. We do not know whether he made it or not. I do not say he did. I hope to God he did not; but the question is, Did he, and have we an opportunity to find that out?

Mr. GRAY. Mr. President——

The PRESIDENT pro tempore. Does the Senator from South Carolina yield to the Senator from Delaware?

Mr. TILLMAN. Certainly.

Mr. GRAY. I should like to make a statement, as the Senator from South Carolina has just spoken in regard to the investigation of a charge that was made in the newspapers, to the effect that the sugar schedule was made up in pursuance of an understanding that was had between Mr. Cleveland and certain sugar magnates, Mr. Havemeyer and Mr. Searles, on Mr. Benedict's yacht, I presume, during the winter of 1893.

As I was chairman of that committee, it may not be inappropriate for me and I may be permitted to say that it is not only true, as the Senator from South Carolina says, that that charge was not proven, but it was absolutely and clearly proven that it was untrue. Every source of information was explored by the committee in order to ascertain the real truth in regard to that charge, and every person who was mentioned was examined before the committee. Mr. Havemeyer, the president of the sugar trust, who was charged substantially with being present, and Mr. Searles both testified not only that no such meeting occurred, but that they had never met Mr. Cleveland, then or on any other occasion, and did not know him personally except by his resemblance to his picture. I just put that in because I think justice requires that it should be stated.

Mr. TILLMAN. I want everything to go in that will clarify the situation and bring out the truth. I am not attacking any man directly or indirectly. I am defending the good name of Senators and the Senate, and I am trying to get it to defend itself along with me.

Mr. GRAY. I did not misunderstand the purpose of the Senator from South Carolina, I think. I merely wanted to supplement what he has said by the statement I have just made.

Mr. TILLMAN. And I want to supplement what you have said by saying that one-half of the American people or more do not believe but what there was rottenness and corruption, and a corrupt deal between some of the leaders of the Democratic party in 1892 in regard to the election, and one-half of us do not believe but that there is something rotten in Denmark now.

As I said, both parties are involved, and one is just as deep in the mud as the other was in the mire. You all know the cloud that rests upon the names of certain men, Democrats, on the Finance Committee in regard to the action they took and the votes they cast on the sugar schedule in 1894, when the tariff bill was here. It rests there, and they can not wipe it out until an investigation is had which will either prove the charges or exonerate them.

Now, I want to show directly that a more damning charge or a charge equally damning exists against the Republican members of the present Finance Committee. As far as the question of speculating in sugar stocks is concerned, it was under investigation and with it Mr. Chapman had more particularly to do. The very fact that Mr. Chapman has gone to jail rather than to testify to the innocence of Senators convicts every man in this body more or less, directly or indirectly, then a member of having done that dishonorable act. Now he is up here, a little king in your District jail, a new club created here or existing here for rich prisoners. You have read of his mode of life and the farcical travesty on punishment. Is that in fact any punishment? Then yesterday the other great "I am" of the sugar trust is turned loose on a technicality, mainly, I believe, by reason of the minority report of the two Democratic members of the investigating committee, wherein they declared their belief that they had no right to investigate the question as to how much money had been contributed by the sugar trust for campaign purposes.

Mr. PETTUS. Mr. President——

The PRESIDENT pro tempore. Does the Senator from South Carolina yield to the Senator from Alabama?

Mr. TILLMAN. I always yield to any man who wants to throw any light on this subject.

Mr. PETTUS. I will ask the Senator from South Carolina not to deal in generalties. If he desires to put a mark on a Senator upon this floor, I demand that he shall mark his man and not indicate the Senate generally.

Mr. TILLMAN. I want to mark the man by having the witnesses who have the proof against the man or the men to tell what they know and not sneak out under a technicality discovered by the court, and have a millionaire turned loose, whereas if he had been a poor man he would be in prison to-day. That is what I want. I know of nobody here having been bought or sold, but the charges are rife; they are sent broadcast over the country that we have been bought and sold, and that corruption exists here; and are we to sit quietly under it? That is what I am talking about. The Senator from Alabama has just come into the Senate. He, of course, is not to be considered as particeps criminis in any accusation brought against the Chamber.

Mr. PETTUS. And it is because of that very reason that I took the liberty of speaking in behalf of men who are, so far as I know, all of them honorable men, true men. They should not by general insinuation have a slur cast upon them in a general way; but if the Senator has any information, let him give it to us now.

Mr. TILLMAN. Why do you not wait until the Senator from South Carolina has time to make his speech?

Mr. PETTUS. The Senator from South Carolina is merely dealing in generalities. That is the point I object to.

Mr. TILLMAN. I have got specifications here, if you will just possess your soul in patience.

Mr. PETTUS. If you name a man, I will be satisfied.

Mr. TILLMAN. Mr. President, one of the peculiar things about the action of the Finance Committee four years ago and the action of the Finance Committee this year is the fact that, notwithstanding they have a most luxurious apartment here in the Capitol as a Senate committee room in which to transact their business, they saw proper to go to the Arlington Hotel to get away from the prying and spying correspondents, to get out of the way of any sources of information reaching the people.

Mr. VEST. Mr. President, will the Senator permit me?

The PRESIDENT pro tempore. Does the Senator from South Carolina yield to the Senator from Missouri?

Mr. TILLMAN. Certainly.

Mr. VEST. The Senator is grossly mistaken in his statement that four years ago the Democratic members of the Finance Committee who had charge of the tariff bill went to the Arlington Hotel or any other hotel. Our sessions were held in this Capitol, in the room of the Committee on Public Buildings and Grounds, of which I was the chairman, and nowhere else. If there was any meeting at any hotel, it was without my knowledge. I do not think any member of the committee will state otherwise.

Mr. WHITE. The Senator from Missouri, if I may be permitted to say so, should also state that, so far as the consideration of the present tariff bill is concerned, the minority meetings, when the minority has met at all, have been in this Capitol.

Mr. VEST. I take it for granted that every member of the Senate and every intelligent man in the country knows that the majority of the Committee on Finance in both instances controlled the making of the tariff bill. In 1894 the majority were Democrats, and the minority of the committee, the Republicans, were not in consultation with us until the bill was reported. Now the same thing obtains, the Democrats not having been consulted in regard to the pending measure until it was reported.

Mr. TILLMAN. I am glad to have my statement corrected. I certainly do not want to smirch my own party. I certainly do not want to attack any member of the committee who does not deserve to be attacked, and I am not attacking any individual; I am merely dealing with this question as an American citizen, and not as a Democrat, a Republican, a Populist, or anything else; but I am dealing with it as a free man who loves his good name. If any Democratic Senators have been corrupt, the party will be the stronger if it drives them out of this body and reduces its already weakened numbers, and avoids the very dangers which happened in 1893, 1894, and 1895; but nobody denies that there have been rooms occupied for two months by the Republicans on the Senate Finance Committee at the Arlington Hotel, in easy touch with telephones to New York and elsewhere, and in easy reach of the agents of the sugar trust.

Another strange thing—passing strange—is the fact that, whereas the Republican members of that former investigating committee have put themselves on record as testifying that an ad valorem duty is in the interest of the sugar trust, we have more ad valorems in the present sugar schedule than were ever known in any one before. That is the hocus-pocus by which the dear people are sought to be blinded, I suppose, to the robbery that they are to suffer during the time this tariff bill shall be a law.

In that connection, I desire to have inserted the concluding statement of Senators H. C. LODGE and C. K. DAVIS as a minority of the former investigating committee. The Secretary will please read the paragraphs that are marked.

The PRESIDENT pro tempore. The Secretary will read as directed.

The Secretary read as follows:

All the witnesses stated that in all these conferences and discussions nothing was presented except the ordinary arguments offered by any industry in regard to its interests in a tariff bill; but the undersigned feel that the American Sugar Refining Company occupies a very different position, not only in the public estimation, but as a matter of fact, from that of any other industry in the country. It is a very rich corporation, with an enormous interest in tariff legislation. It is a matter of complete indifference to the trust what duties are levied upon sugar so long as the form is ad valorem and a sufficient differential is given in favor of refined sugar.

The sugar trust, by the evidence of its president and treasurer, has contributed freely to the State and city campaign funds of both parties, and these contributions were made in years in which national elections were also held. This is a thoroughly corrupt form of campaign contributions, for such contributions, being given to two opposing parties, are not for the purpose of promoting certain political principles, but to establish an obligation to the giver on the part of whichever party comes into power. The trust does not give to political parties for the promotion of political principles in which it believes, but for the protection of its own interests, as appears by the same testimony. The fact that it gives to both political parties is sufficient proof of the purposes of its contributions and of their dangerous nature.

For these reasons the undersigned have felt it important to lay before the Senate and the country the fact that the sugar schedule, as it now stands, is, according to the testimony, in the form desired by the sugar trust, and to point out also the methods by which the sugar trust reached what it desired and obtained a substantial victory.

H. C. LODGE.
C. K. DAVIS.

Mr. TILLMAN. Now, Mr. President, since what has been brought out in the language just read, it is incumbent upon somebody to say why the sugar trust can always command such a tariff schedule as will give it an ad valorem duty instead of a specific duty in the face of the testimony recorded in this volume (the committee report), in which it is shown that with $50,000,000 of capital, or rather stock, which was worth only $25,000,000 and which sold for but 50 cents on the dollar, as soon as that trust organized as the American Sugar Refining Company in 1890 and the McKinley bill was passed, giving it the differentials, they acknowledged that they had cleared upward of $25,000,000 on that capital in three years.

They cleared it, how? By adding to the cost of the sugar of every man in America who drinks coffee or tea, or who uses sugar, and that means every man in the United States. Who did it? The Republican party. Then who came along and changed the bill in 1894, and still recognized this octopus, and still could not get from under its influence and control? The Democratic party. Now, three years later, when the pendulum has swung to the other side, to the disgrace and demoralization and defeat of the Democratic party, the Republicans come to the front, and we have a repetition in most damaging form of the power of this trust to control the Senate; and when we endeavor to investigate as to how they do it, what are their methods, and how much money they have contributed, the judge turns the man loose on the ground that the question was really not pertinent!

Why, sir, is it possible to hold any election in this country for a legislature which will not affect in some way the election of a United States Senator? Is it possible to conduct a State election during a Presidential year which does not involve the triumph or defeat of Presidential electors? The absurdity, the puerility of such an excuse for saying that the question was not pertinent, and that this man must not be made to answer, and that though he did not answer, he must not be punished! Are we to stop there? Are we to say we have exhausted our remedies and that we can go no further—that the people are jealous of their individual liberties and will not allow the Senate to preserve its own good name and dignity and honor?

The record shows that in past times when men have smirched and accused the Senate of dishonorable action or insulted it, they have been brought to the bar, and when they did not purge themselves, they were imprisoned. Have we lost that power? The Senate will determine, I suppose, by its vote whether it means to probe this festering wound to the bottom and cauterize it, or whether it will lie under the charge of the rottenness which now smells to heaven and can not be gotten rid of.

But I promised the Senator from Alabama [Mr. PETTUS] some specifications as to recent accusations. I send to the Secretary's desk a copy of the New York Journal of May 12, and ask the Secretary to read the headlines and the text of the paper down as far as I have marked.

The PRESIDENT pro tempore. If there be no objection, the Secretary will read the paper.

The Secretary read as follows:

SENATOR SMITH AHEAD ON SUGAR—HIS LITTLE SPECULATION HAS NETTED HIM $3,000 FOR ONE DAY—SOLD THE STOCK SHORT—THERE WERE 6,000 SHARES AND A FURTHER DECLINE MEANS GROWING PROFIT.

[By James Creelman.]

WASHINGTON, *May 11.*

Senator SMITH of New Jersey to-day sold 6,000 shares of sugar stock short at 116. Sugar stock closed at 115¾. His profit for the day, with the broker's commission deducted, was $3,000. If sugar stock continues to fall in price, he will make a good many thousands of dollars more on this transaction.

Mr. TILLMAN. I now ask the Secretary to read from the New York Herald of May 11 the marked paragraph, including the headlines.

The PRESIDENT pro tempore. If there be no objection, the Secretary will read.

The Secretary read as follows:

IN THE GRASP OF THE TRUST—EFFECTIVE WORK OF THE SUGAR LOBBY SHOWN IN THE SCHEDULE REPORTED BY THE SENATE COMMITTEE ON FINANCE—DIFFICULT TASK STILL BEFORE IT—GREAT FIGHT WILL BE MADE TO HAVE THE SCHEDULE RATIFIED BY SENATE AND HOUSE—NIGHT CONFERENCES HELD—UGLY BUT UNVERIFIED RUMORS AFLOAT AS TO SENATORIAL SPECULATIONS IN THE STOCK MARKET—TRYING TO SHUT OFF DEBATE—COTERIE OF REPUBLICANS PLANNING A MOVEMENT TO PREVENT EXTENDED DISCUSSION OF THE SUGAR DUTIES.

[By telegraph to the Herald.]

HERALD BUREAU, CORNER FIFTEENTH AND G STREETS NW.
Washington, May 10, 1897.

The mighty hand of the sugar trust is again grappling the throat of the United States Senate.

Ever since the reconstruction of the Dingley bill was commenced in the Arlington Hotel the sugar lobby has been in the city. Its work has been conducted with the usual secrecy, but up to this time it has been none the less effective. Its hand is so plainly stamped on the sugar schedule as reported by the Republican members of the Finance Committee that it can be seen without the aid of glasses by even those Senators who profess entire ignorance of the intricate questions involved that this schedule was written altogether in the interests of the trust.

Having been able to induce the Republican subcommittee to do its bidding, the lobby is now confronted with the more difficult task of having the work of the committee ratified by the Senate, concurred in by the House of Representatives, and approved by the President. It will be a great fight, and one which may leave the reputations of the Senatorial champions of the trust smirched with scandal. Senators who have the integrity of the Senate at heart fully realize what is before them, and it is with some misgivings that they look forward to the contest.

SUGAR INTERESTS GUARDED.

Exact details of the midnight conferences which resulted in giving the sugar trust all it asked for will probably never be known. Some interesting facts are coming to light, however. While Messrs. Havemeyer, Searles, and other officials of the sugar trust kept in the background, the interests of that organization were well looked after in the Arlington Hotel conferences. Among the men interested in sugar who have been in Washington and in repeated conferences with the committee are Henry Reed, of Boston; Herbert L. Terrell, of New York; former Senator Fenton, of California; Henry T. Oxnard, of Nebraska, and members of the Spreckels family, of California.

There seems to be no doubt that a favored few persons knew some days in advance exactly what the sugar schedule to be reported by the subcommittee was to be. I have already related the story of the sugar expert here who was approached by a broker a couple of days before the bill was made public with what he said would be the sugar schedule and with a request that the protection afforded the trust under it be calculated for him.

A direct statement has been published since then to the effect that a broker in Washington filled an order for 900 shares of sugar stock for three United States Senators before the bill was reported, and after it had been made public closed out the deal at a profit of $30,000 for his Senatorial customers.

Mr. TILLMAN. Now I ask the Secretary to read another article from the New York Herald of May 8. Do not omit the headlines. They are the only things the average busy man ever reads, and he immediately turns around and convicts the Senate of being rotten on the strength of them.

The PRESIDENT pro tempore. If there be no objection, the Secretary will read what the Senator from South Carolina asks to have read.

The Secretary read as follows:

SUGAR TRUST OWNS THE BILL—NEW TARIFF MEASURE GIVES THE MAMMOTH MONOPOLY PROTECTION OF HALF A CENT A POUND—UGLY RUMORS CIRCULATED—SCHEDULE AS INCORPORATED IN THE BILL IN THE HANDS OF A BROKER BEFORE IT WAS REPORTED—BASIS FOR SPECULATION—HEAVY DUTIES SUPPLEMENTED BY A CHARGE AGAINST BOUNTY SUGAR GIVING THE TRUST ABSOLUTE CONTROL.

[By telegraph to the Herald.]

HERALD BUREAU, CORNER FIFTEENTH AND G STREETS NW.,
Washington, May 7, 1897.

"The least possible protection to the sugar trust in the schedule adopted by the Senate Finance Committee is nearly half a cent a pound." This is the conclusion expressed to me to-day by Representative SWANSON of Virginia after a careful analysis of the schedule.

Mr. SWANSON is one of the Democratic members of the House Committee on Ways and Means, and ever since the preparation of the tariff bill was commenced he has devoted himself particularly to a study of the sugar question. He based his calculations on the prices of sugar on December 10 last as submitted to the Committee on Ways and Means by Mr. F. A. Oxnard.

This gave the price of granulated sugar at 4.10 cents per pound, on which the compound duty under the schedule would be 2.595 cents. Mr. SWANSON explains that the very highest grade unrefined sugars imported tested 96° by the polariscope and were valued at 3.25 cents a pound. On these the duty would be 2.1075, showing a differential or protection to the sugar trust of 0.4875 cent a pound. The average protection to the trust, according to Mr. SWANSON, would be much greater than this, however.

TRUST IN CONTROL.

The schedule is particularly favorable to the importation of sugars testing below 87° by the polariscope, which are subject only to a duty of 75 per cent ad valorem, and it will tend to greatly encourage the importation of these sugars. The invoice prices of some of these sugars are as low as 1.25 cents a pound for Java black stroops and 1.60 cents for muscovados, on which the duties would be respectively .9375 and 1.20 cents per pound, making the differential between these duties and the duty on refined sugars respectively 1.6575 cents and 1.395 cents. There is, however, much more waste in refining these low-grade sugars than in the higher grades.

"One of the most important provisions to the trust," said Mr. SWANSON, "insuring to them absolute control of the market in this country, is that which imposes on sugars from countries which pay an export bounty an additional duty equal to the bounty paid. At the present time the only sugars which come in competition with trust sugars to any extent are German

sugars, and last year there was but 1 pound of refined sugar imported into the country for every 30 pounds of sugar used.

"The importation of even this small amount was only possible on account of the German bounty of about thirty-eight one-hundredths of a cent a pound on refined sugar, while under the present law the countervailing duty is but one-tenth of a cent, giving German exporters a clear bounty of about twenty-eight one-hundredths of a cent. As the Senate bill proposes to make the countervailing duty equal to the export bounty paid abroad, it will be impossible for Germany to ship a pound of refined sugar to this country, and every consumer of sugar in the United States will have to pay for it whatever price the trust sees fit to impose."

UGLY RUMORS AFLOAT.

Some singular facts are coming to light regarding the preparation of the schedule by the Senate committee. I was told to-day by a sugar expert that, some days before the bill was made public by the committee, he was approached by a broker, who gave him a sugar schedule, asking him to figure out what would be the differential in favor of the trust in it, and assuring him that it was the schedule to be adopted in the bill. When the bill came out, it contained the identical schedule which was submitted by the broker, who had probably taken advantage of the rise in sugar stock which his advance information had made him certain would occur.

While the bill was being prepared, the subcommittee was able to consult with the general appraisers in New York or any other person outside of Washington from whom they might want special information regarding any article in the bill by long-distance telephone in an inner room used by the committee at the Arlington Hotel. It was also possible to talk with the officials of the sugar trust if they wished any special information as to what was wanted in the bill.

Mr. TILLMAN. Mr. President, before I send forward the next clipping, I want to say that, so far as I am concerned and feel, when a Senator whose vote will influence and perhaps govern in fixing the tariff on sugar takes advantage of inside knowledge, of the possession of the secrets of the committee, and speculates, knowing that when the report will come the price will go up—I say he commits an act unworthy of an honorable man and akin to that of the blackleg gambler who, in competition with another gambler, has cards up his sleeve; and, in addition to that, he commits a piece of official rascality that should make him hang his head in shame, if his colleagues here allow him to remain among them.

The mere speculating in sugar, as in cotton or anything else, when a man knows nothing about what is going to be done about sugar in the Senate, is not reprehensible any more than any other gambling. It is only when a man can influence the action of this body by his vote or use secret information that it becomes dishonorable and disreputable.

I ask to have read the clipping which I send to the desk from the Chicago Times-Herald. Do not omit the name of the author of the article. It is signed at the bottom of the second column.

The PRESIDENT pro tempore. Without objection, the paper will be read.

The Secretary read from the Chicago Times-Herald of Thursday, May 6, 1897, as follows:

FORTUNE FOR SENATORS—LARGE SUMS MADE BY SPECULATING IN SUGAR TRUST STOCK—PROFIT IN TIPS ON TARIFF—LITTLE LIKELIHOOD THAT THE MATTER WILL BE INVESTIGATED.

WASHINGTON, *May 5.*

Monday last a certain stock broker in this city filled an order for 9,000 shares of sugar stock in Wall street. His customers were three United States Senators.

In filling this order the broker began buying at 113¼ and bought up to 115. Yesterday this deal was closed out at from 117¼ to 118. The profit on the transaction was about $30,000.

This is what one broker did. How much stock was handled by other brokers here and in New York for Senatorial account no one knows.

It is pretty well understood that Senators who were able to get inside information concerning the sugar schedule in the Finance Committee revision have been buying in Wall street for a week or more. They were speculating on a sure thing, for the manner in which the sugar schedule favors the trust could not fail to put its shares up in the market when the facts should become public property.

There is a great deal of gossip about these Senatorial investments in sugar, but it is not considered probable the Senate will order an investigation. The Senate does not care for any more sugar-speculation investigations.

* * * * * * *

WALTER WELLMAN.

Mr. TILLMAN. Here is something else which I desire to have read—an extract from the same writer.

The PRESIDENT pro tempore. Is there objection to the reading? The Chair hears none, and the Secretary will read as requested.

The Secretary read from the Chicago Times-Herald of May 8, 1897, as follows:

TO BATTLE OVER SUGAR—SENATE'S TARIFF SCHEDULE AROUSES A STORM OF INDIGNATION—ALL THE TRUST ASKED FOR—STRONG EFFORT TO BE MADE TO RETAIN THE DINGLEY RATES—HOUSE EXPECTED TO STAND FIRM—CAPITAL SHOCKED AT THE METHODS OF THE UPPER HOUSE COMMITTEE AND THE DEALS IN WALL STREET.

* * * * * * *

It is significant that the Senators who bought sugar shares in Wall street before the Finance Committee's revision was made public are now reported to be selling the stock. Have they inside information as to the final disposition of the schedule, or are they merely bearing the market in anticipation of the opposition in Senate and House, and will they find opportunity on inside information to buy again at the right moment? Unfortunately, we have not heard the last of the sugar scandal.

WALTER WELLMAN.

Mr. TILLMAN. Here is something from the New York World, which I ask to have read.

The PRESIDENT pro tempore. Without objection, it will be read by the Secretary.

The Secretary read from the New York World of May 12, 1897, as follows:

WERE SENATORS IN SUGAR SECRETS?—NEW GROUND FOR SUSPICION THAT A FEW SPECULATED ON INSIDE INFORMATION—BROKER WHITE'S EXPLOIT—OPENED AN OFFICE IN WASHINGTON JUST AFTER THE HOUSE PASSED THE BILL—SENATORS HIS CUSTOMERS—HAD ACCESS TO THE ROOMS WHEN SUBCOMMITTEE'S SECRET MEETINGS WERE HELD—SAID TO HAVE CLEARED $70,000.

[Special from a World staff correspondent.]

WASHINGTON, *May 11.*

The stories of speculation by Senators in sugar stock on the strength of advance information as to the Finance Committee's sugar schedule continue the topic of conversation here. There is no doubt that the exact schedule was known to several persons outside of the committee at least two days before May 4, when the bill was made public, and it is generally believed that the knowledge was used to advantage in the market.

One of the brokers who could probably throw considerable light on the dealings of Senators in Wall street and who personally profited by advance information on the sugar schedule is Abraham White. Mr. White has offices at No. 16 Broad street and No. 31 Broadway, New York. He is the broker who successfully negotiated, with the aid of Russell Sage, the purchase of $1,000,000 worth of Government bonds during the last popular bond sale on a total investment of 48 cents for postage. He cleared about $300,000 by that deal.

When the Dingley tariff bill went into the hands of the Senate subcommittee, Mr. White came to Washington and opened an office at 1343 F street. He fitted it up in fine style and had a private wire to New York.

On April 8 his first advertisement appeared in the local papers. He did not stint himself on space. He made reference in his advertisement to his success in the bond deal, and in large letters announced that Russell Sage had helped him to complete that transaction.

It was noted that the persons who frequented his office and traded through him were mostly Senators and Representatives. He lived at the Arlington Hotel, where, it will be remembered, the Senate subcommittee held its secret meetings. He was frequently seen coming out of the room where these secret conferences were being held, although it was impossible for any but a few favored Senators and Representatives to enter this private chamber.

Mr. White spent all his time while in Washington either in his office, at the Capitol, or at the Arlington. People who were intimate with him say that he always appeared well posted on the movements and decisions of the Senators who were framing the tariff bill. On May 3 and 4, it is stated by those in a position to know, he bought sugar heavily. At noon on May 4 the bill was reported from the subcommittee to the Senate and made public. On May 8 Mr. White closed his office here and went back to New York. Before going he offered to sell his furniture for almost any sum to get rid of it. One of the gentlemen to whom he offered it said to the World correspondent to-day: "Mr. White could very well afford to give away this furniture or to let the landlord take it for kindling wood. His profits on sugar were probably not less than $70,000."

Mr. GRAY. Is that a signed article?

Mr. TILLMAN. No, sir; but I know the correspondent. Here is an article of news in the New York Evening Post of May 26, which I ask the Secretary to read.

The PRESIDENT pro tempore. If there be no objection, the Secretary will read as requested.

The Secretary read as follows:

Washington houses bought sugar certificates on the prospects of adoption of the Senate sugar schedule. Purchasers for Washington account yesterday and to-day were estimated at 40,000 shares.

Mr. TILLMAN. It seems that a good many of us have a finger in the pie, or else there are some very big fish in the pool. I have now presented the basis for the new investigation which I propose, as well as having pointed out that the old investigation did not go far enough, for the reason that the witnesses refused to testify just when the committee got them to a place that was interesting and where developments were likely. I think it would be unfair not to include the old with the new, corral the Democratic sheep and the Republican goats, or vice versa, and let us have a fumigation.

The question presents itself, sir, to us as Americans and as men who love our Government whether we shall continue to sit here as representatives of the States and of the people in them and have the respect of the people for this great body lost entirely by our cowardice or our corruption.

If the Democratic party owed any political debts in 1893 which it felt bound to pay to the sugar trust, let it be known. If the Republican party, which, by the way, in the last campaign received, I think, all of the contributions from the octopus, while the Democrats got not one dollar, are under party obligations and owe this gang debts, let it be brought out before the American people.

In connection with that, I wish to have Mr. Havemeyer's testimony as to this baby industry—this little infant—spread on the minutes. It is his testimony before the investigating committee of 1894, of which the Senator from Delaware [Mr. GRAY] was chairman.

The PRESIDENT pro tempore. If there be no objection, the Secretary will read as requested.

The Secretary read as follows:

Senator ALLEN. Mr. Havemeyer, is it not true that you control, that is, the American Sugar Refining Company controls, the prices of sugar to all the Louisiana refineries?

Mr. HAVEMEYER. Directly we do not; indirectly we do.

Senator ALLEN. Through your organization you do. If you fix the price at 4 cents for granulated throughout the United States the others obtain it, don't they? And in that way the price is controlled.

Mr. HAVEMEYER. We undertake to control the price of refined sugar in the United States. That must be distinctly understood.

Senator ALLEN. And the price of refined sugar in the United States is higher to the American people in consequence of the existence of the American Sugar Refining Company than it would be if the different companies in your organization were distinct and independent companies?

Mr. HAVEMEYER. For a short time it is.

Senator ALLEN. And what difference does it make for the consumers in this country in a year, in your judgment?

Mr. HAVEMEYER. It has been in three years past three-eighths of a cent more on every pound they ate, as against doing business at a loss.

Senator ALLEN. And that would be about how much in round numbers?

Mr. HAVEMEYER. It is a large sum in the aggregate.

Senator ALLEN. How many millions?

Mr. HAVEMEYER. I should say it was close to $25,000,000 in three years.

Senator ALLEN. And you intend to keep your hold upon the American people as long as you can?

Mr. HAVEMEYER. As long as the McKinley bill is there we will exact that profit.

Mr. TILLMAN. Now they are trying to put the duty above the McKinley Act, according to the best experts. Is not that a lovely infant to be here pleading for protection? Twenty-five million dollars profit in three years off the hard-working, starving American farmers and artisans, with a capital of not more than $50,000,000.

There is no doubt, however, that the same influences which carried through the last tariff bill by a narrow majority will pull this one through, in spite of the fact that two Republican Senators are on record, as I have put them, as saying that they are opposed to and believe that ad valorem duties are in the interest of the trust, and that they ought not to be had. I suppose the Republican caucus will agree as to these things, as to how much this gang of thieves and robbers shall have, and the balance of us will have to content ourselves with voting "nay." Let it go through; let the political debt be paid; let the American laboring man, when he sits down to his breakfast table and puts his spoonful of sugar into his coffee, realize what a glorious Senate represents him in Washington. We will see when the vote comes.

In conclusion, the question presents itself—coming back to the gist of the matter—have the correspondents lied on the Senate or is the Senate rotten? If they have lied, let us prove it on them and punish them. If they prove Senators corrupt, let us turn them out of here, for at last it is simply this question, and you are obliged to take one or the other prong of the dilemma: You have to punish those men if they have lied, or you have to purge this body of the corruption they charge upon it.

Mr. ALDRICH. Mr. President, the task of the Senator who is charged with the duty of preparing tariff schedules is at best a most difficult and ungracious one. He must enter upon that duty with the full knowledge that certain portions of the press throughout the United States are bound, judging by the precedents of the last ten or fifteen years, to charge unworthy motives upon him whatever he may do in connection with very many of the schedules.

In view of what the Senator from South Carolina [Mr. TILLMAN] has said and the extracts which he has caused to be read, perhaps I ought to make a statement in regard to the question of the duties upon sugar in the pending bill and how they came to be imposed. It is insinuated rather than charged in these various reports, or some of them, that the schedule as presented by the committee was in some manner suggested or influenced or demanded by the American Sugar Refining Company, commonly called the sugar trust.

Now, I desire to say to the Senator from South Carolina and to every other member of this body, and to every person in the United States, that no person connected, directly or indirectly, with the American Sugar Refining Company or any other refining company, or any other person, at any time or in any manner, suggested or dictated any schedule or any rates upon sugar to the Republican members of the Finance Committee; and I wish to make this statement as broad as it is possible for the English language to make it.

I desire to say, further, that the Republican members of that committee, and no one else, are solely responsible for this schedule, and that no person living knew what the schedule was to be, or what the rates imposed upon sugar were, until less than two days before the bill was reported to the Senate. It was submitted to the Senator from Nevada [Mr. JONES] for his approval or suggestion. I think this was about thirty-six hours before it was finally reported to the Senate. No one else ever knew or had any intimation as to what that schedule was to be—not a living person—and any person who says or insinuates anything of the sort deserves to be denounced in words which it would not be parliamentary for me to use here.

Mr. TILLMAN. Will the Senator from Rhode Island allow me?

Mr. ALDRICH. Certainly.

Mr. TILLMAN. Does the Senator from Rhode Island understand that I am fathering these charges?

Mr. ALDRICH. Not at all. I am now discussing the insinuations.

Mr. TILLMAN. Let me call the Senator's attention to the fact that I have given the basis of the request for the investigation.

Mr. ALDRICH. I understand.

Mr. TILLMAN. Furthermore, every paper I quoted supported the Senator's party.

Mr. ALDRICH. Oh, no.

Mr. TILLMAN. They did, except the Journal.

Mr. ALDRICH. That is not a matter of any consequence.

Mr. TILLMAN. They certainly have a right to accuse you, if they can prove it.

Mr. ALDRICH. Undoubtedly.

Mr. TILLMAN. And the question is, Will you allow any opportunity or will you sit here idly?

Mr. ALDRICH. I will say that, so far as I am concerned, and I am satisfied I speak for every other member of the subcommittee, we not only wish, but we court the most searching investigation into every single act of ours in connection with this schedule or any other then or at any other time.

Mr. CHANDLER. May I ask the Senator from Rhode Island a question?

Mr. ALDRICH. I would prefer the Senator not to interrupt me for just a second. One of the newspapers brings in a gentleman by the name of Mr. White.

Mr. CHANDLER. I was about to ask the Senator about Mr. White, whether by any possibility he could have known what it is said he did know.

Mr. ALDRICH. I never knew Mr. White and never heard of him. If there is any such man in existence, I do not know him. Certainly no such man came into the committee room, and no information was ever sent out of the committee room over a telephone or in any other way to any broker or anybody else.

Now, I make all these statements just as broad as it is possible to make them, and I know that I am speaking for the other members of the subcommittee as well as for myself. I never in my life bought or sold a share of sugar stock, directly or indirectly, or any other stock, I can say, on speculation. Of course it is very easy for correspondents to write a story in regard to any of these matters and to insinuate as to what Senators have done or have not done. I have made this statement to the Senate, not for any purpose of avoiding investigation, but that the Senate may know, so far as the subcommittee is concerned, what the facts are and how absolutely and utterly false are the suggestions which have been made in regard to their action. [Manifestations of applause in the galleries.]

The PRESIDING OFFICER (Mr. GALLINGER in the chair). The resolution will be referred to the Committee to Audit and Control the Contingent Expenses of the Senate. The Calendar under Rule VIII is in order.

THE TARIFF BILL.

Mr. ALDRICH. I ask the Senate to proceed to the consideration of House bill 379, being the tariff bill.

There being no objection, the Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 379) to provide revenue for the Government and to encourage the industries of the United States.

The reading of the bill was resumed, beginning on page 12, line 24, as follows:

Preparations:

64. Medical preparations containing alcohol or in the preparation of which alcohol is used, not specially provided for in this act, 55 cents per pound, but in no case shall the same pay less than 25 per cent ad valorem.

Mr. VEST. I simply desire to call attention to the fact that this is an increase of duty over the McKinley Act. Under the McKinley Act the duty was 50 cents a pound, and under the act of 1894 it was the same. This is an increase to 55 cents a pound. If all these preparations were pure alcohol, there would be 6¼ pounds of alcohol to the gallon, and that would make the duty under the McKinley Act and the act of 1894 $3.25 a gallon. At 55 cents, the increased duty now proposed, the duty per gallon upon all these preparations would be $3.60.

I have always considered this provision a very harsh one. It was harsh in the act of 1890 and the act of 1894, and under the pending bill it retains the same features. If Senators will give attention to this paragraph, they will see that if there is but one drop of alcohol in a gallon of any of these medicines, it then bears the duty of $3.60 per gallon, the tax upon alcohol being $2.20 a gallon.

Mr. MILLS. There is a great increase in the equivalent ad valorem.

Mr. VEST. The ad valorem, of course, is increased in proportion to the specific. We exported last year $2,479,510 worth of patent medicines, medicinal preparations, and we propose now to put this enormous duty upon a gallon of any medicinal preparation that comes into the country and has a single drop of alcohol in it. It is harsh tariff legislation of the most extreme kind.

Mr. MILLS. Let me also call attention to the fact that when the duty was 50 cents a pound, as the Senator from Missouri says, in 1893, the unit of value was $3.22. It is now 78 cents, and when the goods are 78 cents by the pound, the duty is increased. The

equivalent ad valorem in 1893 was 15.51. It has now gone to 70.51, being increased three or four times.

Mr. ALDRICH. One would suppose by the remarks of the Senator from Missouri that there was some radical change in this paragraph.

Mr. VEST. There is an increase.

Mr. ALDRICH. There is an increase of 5 cents a pound. Since the act of 1894 was enacted there has been an increase in the tax on alcohol to the American producer or consumer of 40 cents a gallon, 20 cents on distilled spirits. The increase provided for in the proposed act is not so great an increase as that on alcohol.

Mr. MILLS. It is much greater. There is 6.85 pounds in a gallon.

Mr. ALDRICH. Seven pounds to the gallon.

Mr. MILLS. You have increased it from 15.51 per cent to 70.51 per cent.

Mr. ALDRICH. I beg the Senator's pardon. We have simply changed the rate 5 cents a pound.

Mr. MILLS. I know, but the value of the article has gone down.

Mr. ALDRICH. The value of the article has nothing to do with it. There certainly has been no such increase in the price of those articles from 15 to 70.

Mr. MILLS. Certainly the Senator from Rhode Island does not say that the value of the article has nothing to do with the ad valorem tax.

Mr. ALDRICH. I do not say that at all.

Mr. MILLS. I thought the Senator said it.

Mr. ALDRICH. Oh, no; I say that the price which happened to be put down here does not show anything. According to that it would be an increase of from 15 to 70—more than four times—while the actual increase is only 5 cents a pound.

Mr. MILLS. I know it is 5 cents a pound, but I am stating what the amount of the tax is in proportion to the value of the article. It is 70 per cent instead of 15 per cent—400 per cent increase.

Mr. ALDRICH. If the Senator will pardon me, the increase in the tax upon alcohol is about 40 cents a gallon; at 7 pounds to a gallon it is only 6 cents a pound, while the increase is 5 cents a pound, or less than the actual increase in the tax on alcohol itself.

Mr. MILLS. All that evades the question of the value of the article taxed. We come back to the proposition that you have increased the tax from 15 to 70 per cent.

Mr. JONES of Arkansas. And the comparative statement which the Senator from Rhode Island brings into the Senate shows that fact.

Mr. MILLS. It shows that fact.

The PRESIDING OFFICER. The reading of the bill will be proceeded with.

The Secretary read as follows:

65. Medicinal preparations not containing alcohol or in the preparation of which alcohol is not used, not specially provided for in this act, 25 per cent ad valorem; calomel and other mercurial medicinal preparations, 35 per cent ad valorem.

Mr. VEST. I call attention to the fact that there is an increase upon calomel of from 25 to 35 per cent. The comparative statement shows that under the reduced duty in the act of 1894 from the McKinley rate calomel fell in price from 59 to 51 cents a pound in the United States; and yet with these facts staring us in the face we are to increase the duty from 25 to 35 per cent ad valorem upon this medicine of absolute necessity, especially amongst the poorer class of people who live in miasmatic regions. I should like to know from the Senator from Rhode Island, though it is a small matter, why that increase is put upon calomel.

Mr. ALDRICH. The proposition is to restore the McKinley rate. The importations, as the Senator knows, were only $7,000 per annum. It certainly will not be a great burden, I take it, upon anybody if mercurial preparations are advanced to this rate. It will then be less than the average for preparations of this kind.

Mr. VEST. That is no answer.

The PRESIDING OFFICER. The reading of the bill will be proceeded with.

The Secretary read as follows:

66. Plasters, healing or curative, of all kinds, and court-plaster, 35 per cent ad valorem.

67. Preparations used as applications to the hair, mouth, teeth, or skin, such as cosmetics, dentifrices, pastes, pomades, powders, and other toilet articles, and articles of perfumery, whether in sachets or otherwise, not containing alcohol or in the manufacture of which alcohol is not used, and not specially provided for in this act, 50 per cent ad valorem.

68. Santonin, and all salts thereof containing 80 per cent or over of santonin, $1 per pound.

Soap:

69. Castile soap, 1½ cents per pound; fancy, perfumed, and all descriptions of toilet soap, including so-called medicinal or medicated soaps, 15 cents per pound; all other soaps not specially provided for in this act, 20 per cent ad valorem.

Mr. VEST. I call attention to the fact that in paragraph 69 there is an increase of duty upon an article of prime necessity, the duty being doubled from the Wilson Act. It was 10 per cent in the Wilson Act. Now it is proposed to make it 20 per cent.

The comparative statement shows that in 1896 we exported of toilet soap $163,382 worth, and of all other soaps $1,115,353 worth. We imported of all kinds about $800,000 worth, there being a large balance in the matter of trade in favor of the United States. The exports exceeded the imports. I can not see why it is necessary to increase the duty, in view of the facts which are plainly before us.

The reading of the bill was resumed. The next amendment of the Committee on Finance was, in paragraph 72, page 14, line 14, before the words "of 1 cent," to strike out "one-half" and insert "three-tenths;" and in line 15, before the word "cents," to strike out "three" and insert "two;" so as to make the paragraph read:

72. Crystal carbonate of soda, or concentrated soda crystals, or monohydrate, or sesquicarbonate of soda, three-tenths of 1 cent per pound; chlorate of soda, 2 cents per pound.

The amendment was agreed to.

The next amendment was, in paragraph 73, page 14, line 16, after the word "soda," to strike out "one-half" and insert "three-fourths;" so as to read:

Hydrate of, or caustic soda, three-fourths of 1 cent per pound; nitrite of soda, 2½ cents per pound.

Mr. VEST. I should like to make an inquiry of the Senator in charge of the bill. I should like to know how it happens that this article, nitrite of soda, about which I know nothing, happens to be interpolated into the present paragraph. It is not in the preceding law. This is the first time I have ever noticed it.

Mr. ALDRICH. It is a new product.

Mr. VEST. I should like to ask if there is any factory in the United States; and if so, where is it located?

Mr. ALDRICH. In the city of Philadelphia.

Mr. VEST. Is there one in existence, or is one expected to be born?

Mr. ALDRICH. There is one already in existence.

Mr. VEST. Only one in this country?

Mr. ALDRICH. I think that is all.

Mr. JONES of Arkansas. Is there any such reason pertaining to chlorate of soda, which is taken off the free list and is taxed 2 cents a pound?

Mr. ALDRICH. Chlorate of soda, as the Senator from Arkansas knows, is analogous to chlorate of potash, and it is treated in the same way that chlorate of potash is treated.

Mr. WALTHALL. I should like to ask the Senator in charge of the bill why it is proposed to raise the duty on caustic soda? We are exporting a good deal of it, I believe.

Mr. ALDRICH. No; not of caustic soda. We are importing large quantities, and are exporting none.

Mr. WALTHALL. Do we not export it to South America?

Mr. ALDRICH. No. I think the Senator is referring to caustic of potash.

Mr. WALTHALL. No. My information differs from that of the Senator from Rhode Island.

Mr. ALDRICH. I am sure there is none exported, while the amount of the importation is very large.

Mr. WALTHALL. What is the reason for advancing the rate?

Mr. ALDRICH. The rate under the act of 1890 was 1 cent a pound. It was reduced in the act of 1894 to a half cent.

Mr. WALTHALL. It was a half cent in the Dingley bill as it came to us.

Mr. ALDRICH. It was a half cent a pound as it came to us from the other House. The importations in 1893 were 55,000,000 pounds, but they increased in 1896 to 60,000,000 pounds. The American producers now have about a third of the American market. They have not been able at half a cent a pound to compete successfully with their foreign competitor, the United Alkali Company.

Mr. WALTHALL. Is the Senator sure we are not exporting?

Mr. ALDRICH. I am absolutely certain that none is exported.

The PRESIDING OFFICER. The question is on agreeing to the amendment reported by the Committee on Finance.

The amendment was agreed to.

The next amendment of the Committee on Finance was, in paragraph 73, page 14, line 18, after the word "pound," to strike out the semicolon and the words "hypo-sulphite and sulphide of soda, one-half of 1 cent per pound."

The amendment was agreed to.

The next amendment was, in paragraph 74, page 14, line 20, after the word "concentrated," to insert "two-tenths of 1 cent per pound;" and in line 21, after the word "pound," to strike out "and soda ash, one-fourth of 1 cent per pound;" so as to read:

74. Sal soda, or soda crystals, not concentrated, two-tenths of 1 cent per pound.

The amendment was agreed to.

The next amendment was, on page 14, after line 22, to insert the following additional paragraph:

74½. Soda ash, three-eighths of 1 cent per pound.

Mr. VEST. This increase in soda ash, it seems to me, is utterly unnecessary, and it is very prejudicial to quite a large interest in the United States, namely, the people engaged in the manufacture of soap.

Mr. STEWART. I have received a good many letters in regard to this matter.

The PRESIDING OFFICER. The Senator from Missouri has the floor.

Mr. VEST. I yield to the Senator from Nevada.

Mr. STEWART. They want to have the duty raised above one-half cent a pound. They say that at the present rate they are unable to compete. It is produced largely from the mines of Nevada and California, and they take a very great interest in it. There is a very large amount imported, and this rise is very small, only one-eighth of a cent. I hope it will not be resisted.

Mr. VEST. I have in my hand a remonstrance from the soap makers of the United States. I think every city of any importance in the United States is represented in this remonstrance.

Mr. ALLISON. That is caustic soda.

Mr. VEST. Caustic soda and soda ash. In the statistics furnished by these gentlemen they say that soda ash at one-fourth of a cent per pound, which is proposed here to be increased to three-eighths, makes an ad valorem of 50 per cent, while upon caustic soda, even under the increased duty, it would only be 35 per cent, and upon sal soda, another ingredient used in soap, it would be only 20 per cent.

With great respect to the Senator from Nevada, it is the poorest argument in the world to say that this is a very small increase. When you put even a small increase upon an article that is used by 73,000,000 people it amounts in the aggregate to a very large amount. And besides, even as to the smallest duty, although it becomes insectivorous, the first question we ought to ask, as in regard to every other duty, is whether it is right and just.

It is very well understood how this increase happened to be made here. It is made in the interest of a few persons who have large amounts or small amounts, I care not which, invested in the desert factories, as I will call them, out in Nevada; and when the Senator from Nevada a member of the Finance Committee put in a demand for an increase upon borax and soda ash, as a matter of course the committee—those in charge of the bill—were compelled to accede to his demand. The deliberate judgment of the House and the deliberate judgment of the Senate was in favor of a smaller duty, but this increase was put here to meet the demand of the Senator from Nevada, and with the hope that the Senate, on account of the small increase, would permit it to go upon the bill.

Mr. CAFFERY. I do not know that the Senator from Missouri drew attention to the falling off of imports under the operation of the Wilson bill as compared with the McKinley rates. The rates were the same, a quarter of a cent per pound on soda ash, and the importations in value in 1893 were $4,860,787.77. In 1896, under the Wilson law, the importations in value were $1,970,975.31. This shows that there is no use for any increase of an eighth—a rise from a quarter to three-eighths—for purposes of protection, if that be the design. I think our friends from Nevada ought to be satisfied with the increased rate on borax, and not seek to put this eighth increase upon soda ash, to the detriment of the soap makers.

Now, before the Committee on Ways and Means appeared a number of gentlemen interested in the soap manufacture, all of them protesting against any increase of the duties on soda and soda ash or caustic soda, which is one of the main ingredients of soap making.

Mr. ALDRICH. Which is one of the main ingredients?

Mr. CAFFERY. Caustic soda and soda ash.

Mr. ALDRICH. Soda ash is.

Mr. CAFFERY. I will read one from New Orleans:

NEW ORLEANS, *December 23, 1896.*

Committee on Ways and Means:

We have been advised that your committee will take up the duty on caustic soda. We see no good reason to change the duty. It has not been long since it was reduced from 1 cent to one-half cent, which we think is a satisfactory duty, considering the value of the caustic.

Yours, truly,

J. H. KELLER SOAP WORKS.

He omitted to state that it was reduced to a quarter of a cent. He must have based his statement upon the prevailing rates.

From Chicago, the same date, here is another communication signed by James S. Kirk & Co. They say:

We do not favor an increase either on caustic soda or soda ash. Any advance of duty on these two commodities will simply go into the pockets of the few manufacturers of this country and not to the consumers. We will not say that there exists to-day in the United States a strong combination among the soda makers of this country, assisted by foreign makers, but what we can say and do know is that we can not contract as usual for any future delivery. The amount of revenue received by the Government from these two items is exceedingly small, and if removed entirely would not be felt very seriously. Yet, if the present duty on caustic soda and soda ash remain as now, we rather think it will be satisfactory to all concerned.

I will ask that the communications on this subject found in the Tariff Hearings before the Committee on Ways and Means, commencing at page 123, down to and including page 129, be printed in the RECORD.

Mr. STEWART. Those are from soap makers?

Mr. CAFFERY. They are from soap makers.

Mr. STEWART. Does the soap maker object to a duty on soap?

Mr. CAFFERY. He objects to the duty on caustic soda.

Mr. STEWART. Soap has got a heavy duty. The soap maker of course wants everything to come to him free. We get that kind of letters all the time. They all want the ingredients they use in the manufacture to come in free and a high duty placed on what they produce.

The PRESIDING OFFICER. Without objection, the papers will be printed in the RECORD.

The papers referred to are as follows:

CHICAGO, *December 26, 1896.*

Committee on Ways and Means:

We avail ourselves of the opportunity offered under your general invitation to put before the Ways and Means Committee, so far as our own industry is concerned, such changes in the tariff as would be beneficial both to the Government and ourselves. As the heading of our letter indicates, we are engaged in the manufacturing of soaps and glycerin, and consequently large users of chemicals, caustic soda, and soda ash. We do not favor an increase either on caustic soda or soda ash. Any advance of duty on these two commodities will simply go into the pockets of the few manufacturers of this country and not to the consumers. We will not say that there exists to-day in the United States a strong combination among the soda makers of this country, assisted by foreign makers, but what we can say and do know is that we can not contract as usual for any future delivery. The amount of revenue received by the Government from these two items is exceedingly small, and if removed entirely would not be felt very seriously. Yet, if the present duty on caustic soda and soda ash remain as now, we rather think it will be satisfactory to all concerned.

The duty on crude glycerin is now 1 cent per pound; on refined, 3 cents per pound. We would suggest that the duty on refined remain as it is now, and an increase on crude from 1 cent per pound to 2½ or 3 cents per pound, for this reason: The percentage of pure glycerin in the crude state is from 75 to 80 per cent; after it is put through the process of refining it shows 90 to 95 per cent. In order to bring about the article known as refined glycerin three to four distillations are required, which adds very much to its cost. What is now and has been imported for the past year or so comes as crude glycerin in an almost refined state, only one distillation being required to put it into refined or chemically pure glycerin. This is a shrewd trick, and no doubt will receive the attention it deserves from your committee.

We hope the committee will not add duty on tallow. If any advance in duty is put upon this article, it will simply go into the pockets of the "big four."

We have given you our views. They may be selfish, but as our business is a very large one, we are of the opinion that should any of the suggestions be adopted, they will be well received by those engaged in similar business to our own.

Very sincerely, yours,

JAS. S. KIRK & CO.

P. S.—During the enactment of the Wilson bill duty on soap was reduced from 20 to 10 per cent. We think this sufficient for our protection.

—

CINCINNATI, OHIO, *December 26, 1896.*

Committee on Ways and Means:

We are advised that hearings are now being given by the Ways and Means Committee to those interested in articles coming under Schedule A.

As large manufacturers of soap and correspondingly large consumers of oils, tallows, and heavy chemicals, we earnestly ask that as slight modification as possible be made in present tariff. The protection afforded to soap manufacturers under the present tariff law is, in our estimation, ample. The only modification that we would suggest would be to change the duty from an ad valorem to a specific basis. One-half cent per pound would probably be a fair equivalent for a specific duty of 10 per cent upon "all soaps other than castile and fancy perfumed, medicated, and all descriptions of toilet soaps." Our personal interests, of course, are that the rates of duty should be increased. It might possibly enable us to make a little larger profit, but as Republicans we feel very strongly the necessity of great moderation being exercised in the revision of the present tariff, which revision we believe is absolutely necessary.

As regards the heavy chemicals mentioned as entering into the manufacture of our product, would say that they consist mainly of common salt, soda ash, and caustic soda. The rate of duty upon soda ash and caustic is, we believe, high enough. We know that in private conversation with the writer the Solvay Alkali Works have stated that the present duty gives them all the protection they need. We also know that under the protection afforded by the present tariff they have largely increased their plant, and that additional plants are also now being erected by other parties.

Tallow is the principal article of raw material entering into the manufacture of soap. This country normally produces more tallow than she can consume, and has a corresponding surplus for export. It is only under very unusual circumstances, such as a succession of failures of the corn crop or a cornering of the supplies by speculative interests, that this country can afford to import tallow even when duty free. We believe that this condition should continue.

Yours, very respectfully,

THE PROCTER & GAMBLE COMPANY,
WM. COOPER PROCTER, *General Manager.*

—

NEW ORLEANS, *December 23, 1896.*

Committee on Ways and Means:

We have been advised that your committee will take up the duty on caustic soda. We see no good reason to change the duty. It has not been long since it was reduced from 1 cent to one-half cent, which we think is a satisfactory duty, considering the value of the caustic.

Yours, truly,

J. H. KELLER SOAP WORKS.

KANSAS CITY, *December 23, 1896.*

Committee on Ways and Means:

Learning that your committee is about to consider a revision of the tariff on chemicals, and believing the American manufacturers are now on a footing to compete successfully with foreign manufacturers, we would respectfully protest against any increase of tariff on such chemicals as are used in the manufacture of soap, and would earnestly solicit your aid in defeating any action tending to increase the present duty on such commodities.

PEET BROS. MFG. CO.

—

ZANESVILLE, OHIO, *December 29, 1896.*

Committee on Ways and Means:

As prominent manufacturers of soap, we desire to enter our protest against the proposed advance in duties on chemicals which enter largely into the making of soaps. The present tariff seems enough for ample protection to American makers, and also has merit as a revenue schedule on these articles.

SCHULTZ & CO.

—

BALTIMORE, MD., *December 29, 1896.*

Committee on Ways and Means:

As soap makers we respectfully protest against any increase in duties on chemicals used in our industry.

CHRIS. LIPPS CO.

—

ST. PAUL, MINN., *December 28, 1896.*

Committee on Ways and Means:

The soap makers of the United States can not stand any more tax on chemicals, such as soda ash, caustic soda, and caustic potash.

THE MINN. SOAP CO.

—

BOSTON, MASS., *December 26, 1896.*

Committee on Ways and Means:

We are informed that the question is up of increasing duties on chemicals used by soap manufacturers. We beg to add our protest and say that we feel that it is unnecessary for the interests of the chemical manufacturers at home, and would add that we are getting very severe competition in the East to-day from the largest soap manufacturers in the world, namely, Lever Bros., Limited, of London, manufacturers of the Sunlight soap, who are in our markets pushing Sunlight soap for all it is worth, because they can manufacture so much cheaper abroad. We do not think it is the intent of Congress to protect the foreign manufacturer. Trusting that this matter will have serious attention, and that our protest with others will prevail, we remain,

Yours, sincerely,

CURTIS DAVIS & CO.

P. S.—We are the largest and oldest soap manufacturers in New England.

—

NEW YORK, *December 26, 1896.*

Committee on Ways and Means:

Having been informed that a hearing is to be given by your committee on Monday next, 28th instant, in relation to proposed changes in the tariff as affecting articles in Schedule A, we take the liberty of addressing you to say that, as soap manufacturers, we have no desire to see any changes made in the matter of duties on any of the items relating to our business. We understand that efforts are to be made to secure an advance in the rates of duty on chemicals used by soap manufacturers, especially the items of caustic soda and soda ash. Any changes in this direction we would consider to be very injurious to the interests of our industry, as likely to materially increase the cost of soap to the people, and as seriously handicapping us in the effort to hold and increase our considerable export trade in soap.

Hoping that your committee may decide to let well enough alone as regards the articles mentioned, we remain,

Yours, very truly,

COLGATE & CO.

—

BOSTON, *December 26, 1896.*

Committee on Ways and Means:

Our attention has been called to the fact that your committee are considering the advisability of increasing the duties on chemicals used by soap manufacturers. At the present time our business is in its worst possible condition, caused by the very large overproduction and competition by the manufacturers of this country, and any increase of duty on alkalies would seriously add to our present great burdens. There are two concerns in this country manufacturing alkalies at the present time successfully in competition with foreign makes with the present protection, and any increase in duties will simply be for the benefit of these two manufacturers, whose interests, compared to the great population of this country—particularly the laboring part, who are the large consumers of soap—are hardly worth considering.

Yours, very truly,

JOHN REARDON & SONS.

—

LANCASTER, PA., *December 26, 1896.*

Committee on Ways and Means:

Pardon my addressing you upon a question that is to come before your honorable body—the question of increasing the duty on chemicals used in the manufacture of soap. This, allow me to say, would be most disastrous to the soap interests of this country. Besides, it would totally stop us from making any soap for foreign countries, and I must ask you to have the kindness to do all in your power to prevent such change in duty, and thereby protect our home interests.

CHARLES F. MILLER.

—

BUFFALO, N. Y., *December 26, 1896.*

Committee on Ways and Means:

We desire to enter our earnest protest against increasing the duties on chemicals used by soap manufacturers in their business. The present duties are ample to protect the American manufacturer, and any increase of duties on such chemicals would be a serious burden on an important industry.

Respectfully, yours,

GOWANS & SONS.

—

ST. LOUIS, *December 26, 1896.*

Committee on Ways and Means:

We earnestly protest against an increase of duties on soda ash and chemicals used by soap manufacturers. Soap is an article of first necessity in every household, and its cost to consumers should not be increased by legislation to protect the few manufacturers of ash and chemicals in this country.

Very respectfully,

SCHAEFFER BROS. & POWELL MFG. CO.,
Per WILLIS J. POWELL, *Treasurer.*

—

PHILADELPHIA, *December 26, 1896.*

Committee on Ways and Means:

In considering the tariff question we would like to ask the attention of your honorable committee to the duty on soap and chemicals used by soap manufacturers. As we understand it, the question of duty on chemicals is now under consideration. If you will kindly look over the matter, you will find that the duty on soap was reduced and changed considerably since the McKinley tariff bill was enforced, and under the present condition of things there is a great quantity of laundry soaps being shipped into this country from England. Of course a large quantity of toilet soap is also sent here, and manufacturers are paying a high duty on chemicals, considering the price at which the goods are being sold, owing to the very close competition.

In considering the question we trust that your committee is carefully considering the protection of our home industries, which are very necessary to the welfare of our own country. In looking over the matter carefully it would seem to us that greater protection should be arranged for the home manufacturers, and we therefore hope that you may see your way to allow the duty on chemicals to remain as it is at the present time, and we would respectfully urge upon you the necessity of placing the duty on soap to what it was under the McKinley tariff. It would certainly put the conditions regulating the soap manufacturing business in a position that will be more healthy and beneficial to the home industries. If you will kindly examine the matter carefully, you will see that the protection will not then be greater than it should be.

Your favorable consideration to the above is respectfully requested by

J. EAVENSON & SONS.

—

NEW YORK, *December 26, 1896.*

Committee on Ways and Means:

We understand your honorable committee are to have a meeting to hear arguments preparatory to increasing the duty on certain kinds of chemicals. Caustic soda and soda ash are largely used by soap makers, and to enhance the cost of their product by an increased duty would entail a severe hardship, as we believe it would be impossible to increase the price of soap sufficiently to cover the tax.

It is true some soap makers are making good profits because of their superior ability as advertisers, but the competitive manufacturer has a hard row to hoe, and makes little more than a living, and he is entitled to your consideration. An increased tax on soap imported would not serve to protect us from the loss entailed by an increased duty on caustic, etc., while the latter would serve to enrich the few manufacturers of American caustic to the detriment of the larger number in soap making.

Your earnest consideration of these facts, and asking that the present duty on caustic soda and soda ash may stand as at present specified, in the interest of the soap makers, your petitioners will ever pray.

DAVID S. BROWN & CO.

—

BROOKLYN, N. Y., *December 26, 1896.*

Committee on Ways and Means:

We hereby petition your committee to retain the duties of the present tariff on soap and soap makers' materials as per Schedule A, paragraphs 63, 65, and 67. We believe their retention will be a benefit to the soap manufacturing industry of the United States.
